He became mayor of Montreal in 1954, backed both by those wanting improved municipal services and those who demanded the elimination of gambling and prostitution. He sought more autonomy for the city and became a strong critic of MAURICE DUPLESSIS. When the October Crisis occurred in 1970 Drapeau, along with the Montreal chief of police and ROBERT BOURASSA, asked the federal government to implement the War Measures Act. He received 92 per cent of the votes in the following city elections. His administration backed Expo 67 (when General DE GAULLE delivered his notorious 'Vive le Québec libre' speech), and Montreal's successful bid to hold the 1976 Olympic Games. He was mayor until 1986, then went on to become ambassador to UNESCO in Paris (1987–91).

Draper, Henry 1837–82
US astronomer and pioneer of astronomical photography
Born in Prince Edward County, Virginia, he graduated in medicine at City University, New York, and taught natural science and later physiology there from 1860 to 1882. He retired in 1882 to devote himself to astronomical research. He applied the new technique of photography to astronomy and in 1872 obtained a photograph of the spectrum of the star Vega. In 1874 he directed the photographic section of the US commission that observed the transit of Venus. He was the first to notice that long photographic exposures at the focus of a large telescope revealed fainter stars than could be seen with the naked eye. After his death his widow established a fund to support spectroscopic work at Harvard, the result being the *Henry Draper Catalogue* of stellar spectra (9 vols, 1918–24).

Draper, John William 1811–82
US author and scientist
Born in St Helens, Lancashire, England, he began medical studies in London in 1829. In 1831 he emigrated to Virginia, qualified in medicine in 1836, and subsequently taught chemistry at the University of New York. Between 1850 and 1873 he was head of its medical department. He was an early pioneer of photography. In 1840 he made what is probably the oldest surviving photographic portrait, a picture of his sister, which required an exposure of 65 seconds. In the same year, he photographed the Moon and thereby initiated astronomical photography. In 1850 he made the first photomicrographs, which served as illustrations of a book called *Physiology*. He also made early ultraviolet and infrared photographs of the Sun, describing FRAUNHOFER lines in the solar spectrum. In 1841 he formulated Draper's law, the principle that only absorbed radiation can produce chemical change. He also established that all solids become incandescent at an identical temperature and, if heated enough, afford a continuous spectrum. Intellectually, he fell under the influence of AUGUSTE COMTE and his positivism, as is evident from his *A History of the Intellectual Development of Europe* (1863). A prolific author, he is best remembered today for his studies of the history of science,

especially *History of the Conflict Between Religion and Science* (1874), which claimed to show how scientific progress had been impeded by religious, especially Roman Catholic, bigotry. 🕮 Donald H Fleming, *John William Draper and the Religion of Science* (1950)

Draper, Ruth 1889–1956
US diseuse and monologuist
She was born in New York City, and made her stage debut in 1915. Following successful solo appearances for the US troops in France (1918), she toured extensively, appearing in 1926 before King GEORGE V at Windsor. Her repertoire comprised 36 monologues, which she wrote herself, and embraced 57 characters.

Drawbell, James Wedgwood 1899–1979
Scottish journalist
After a traumatic childhood with an alcoholic father, he left Scotland as a young man and worked as a newspaper reporter in Montreal and New York City. When he returned to Great Britain, his progress was meteoric and he became one of the youngest Fleet Street editors when he became editor of the *Sunday Chronicle* at the age of 24. Later, he pioneered the development of *Woman's Own* as a mass-circulation magazine, and achieved mild notoriety by publishing the memoirs of a royal governess, 'Crawfie'. His autobiography, *The Sun Within Us* (1963), includes a compelling account of his boyhood, spent in a Falkirk tenement.

Drayton, Michael 1563–1631
English poet
Born in Hartshill, near Atherstone, Warwickshire, he became a page in a wealthy household and spent the rest of his life in the households of patrons. His earliest work was *The Harmony of the Church* (1591), a metrical rendering of scriptural passages, which gave offence to the authorities. His first major poem, *Mortimeriados* (1596, recast in 1603 as *The Barons' Wars*) was followed by *England's Heroical Epistles* (1597). *Poems, Lyric and Pastoral* (c.1606) contains some of his most familiar poems, including the *Ballad of Agincourt* and *Fair Stood the Wind for France*. The first 18 'songs' or books of his greatest work, the panoramic *Polyolbion*, were published in 1613, with annotation by JOHN SELDEN, and the complete poem appeared in 1622. In 1619 he collected in one volume all the poems (except *Polyolbion*) which he wished to preserve, and in 1627 he published a new volume of miscellaneous poems, among them the whimsical *Nymphisdia, the Court of Fairy*. His last work, *The Muses' Elysium* (1630), contains some pastoral poems. His only surviving play is *The First Part of Sir John Oldcastle* (1600). He was buried in Westminster Abbey, London. 🕮 J A Berthelot, *Michael Drayton* (1967)

Dr Dre, *properly* **André Romell Young** 1965–
US record producer and rapper
Born in Los Angeles, he has had a major influence at several key stages in the development of rap music. He made his recording debut in 1988 with ICE CUBE on the Niggaz With Attitude (NWA) album *Straight Outta Compton*, which defined the gangsta rap genre. After leaving NWA in 1992 he set up Death Row Records, where he developed the G-Funk sound, rap beats based on the hardcore funk of George Clinton (1941–). His first solo album, 1992's *The Chronic*, featured rising star SNOOP DOGG. Declaring gangsta rap dead in 1996, Dre established his Aftermath production company, which continues to oversee the career of his protégé EMINEM.

Drebbel, Cornelis Jacobszoon c.1572–1633
British inventor
Born in Alkmaar, the Netherlands, he was apprenticed to a painter and engraver in Haarlem who was also an alchemist, and acquired an interest in chemistry and later in various branches of technology. He prepared a map of Alkmaar and designed a water-supply system for the town, then in 1604 moved to England where he spent most of the rest of his life. Among his inventions were a clock driven by changes in atmospheric pressure, a new method for the manufacture of sulphuric acid, a thermostat which could regulate the supply of air to a furnace, and a rudimentary submarine (1620), which was successfully tested in the River Thames.

Drechsler, Heike, *née* **Daute** 1964–
German athlete
Born in Gera, she came to prominence when, competing for East Germany, she won the European youth long-jump championship and heptathlon championship in 1981, setting a world junior record a year later for long jump. In 1983 she won the world championship, becoming the youngest-ever long-jump world champion, and in 1985 added wins in the European and World Cup events. She consistently jumped over seven metres, winning 27 successive competitions at long jump before 1987, when she was injured, and setting three world records before 1988. She was also a strong sprinter, picking up a variety of Olympic and world medals at 100 and 200 metres and equalling MARITA KOCH's 200-metres world record. She won the Olympic gold medal for long jump in 1992 and again in 2000, and won the world championship in 1993.

Drees, Willem 1886–1988
Dutch politician
Born in Amsterdam, he moved to The Hague as a government stenographer and then entered politics, joining the Socialist Democratic Workers' Party and becoming its chairman in 1911. He sat in the Second Chamber from 1933 until the German invasion of 1940, after which he played an important part in the Resistance movement. In 1947, as minister of social affairs, he introduced the state pension and then became prime minister (1948–58). A modest, puritanical man, he became the most durable figure in Dutch politics, a special stamp being issued to commemorate his hundredth birthday.

Dreiser, Theodore Herman Albert 1871–1945
US novelist
Born in Terre Haute, Indiana, to a German immigrant father, he was brought up on the breadline and left home at the age of 15 for Chicago. He did odd jobs before becoming a successful journalist, and wrote *Sister Carrie* (1900), a powerful and frank treatment of a young working girl's climb towards worldly success. The publisher, fearful of accusations of obscenity, was diffident in its promotion and it flopped commercially. After suffering a nervous breakdown and abandoning serious literary work for a decade, he wrote *Jennie Gerhardt* (1911), on a similar theme, which established Dreiser as a novelist. He went on to write a trilogy about a power-hungry business tycoon: *The Financier* (1912), *The Titan* (1914) and *The Stoic* (published posthumously in 1947). *An American Tragedy* (1925), based on a real-life murder case, has survived as a classic, despite its leaden prose. A large, egocentric man with an excessive sexual appetite, he saw his literary powers decline in later years and he occupied himself increasingly with philosophical speculations and left-wing journalism. His best works have been admired by SAUL BELLOW. 🕮 R Lingeman, *Dreiser: At the Gates of the City, 1871–1907* (1986), and subsequent volumes

Dresser, Christopher 1834–1904
English designer and writer
Born in Glasgow, he first studied botany, from which he developed the stylized plant motifs which became the basis for his interest in decorative design. He contributed to OWEN JONES's *Grammar of Ornament* and later wrote *The Art of Decorative Design* (1862) and *The Principles of Decorative Design* (1873). As a pioneer consultant designer, he designed glass, ceramics and cast-iron furniture for a number of manufacturers, but his most impressive works were items of functional metalwork, such as teapots and soup tureens. These, in their unadorned, geometric forms, are some of the most striking 'modern' designs of the 19th century.

Dressler, Marie, *originally* **Leila Marie Koerber** 1869–1934
Canadian actress
Born in Coburg, Ontario, the daughter of a music teacher, she made her stage debut in *Under Two Flags* (1886) and toured with a light opera company before her first Broadway appearance in *Robber on the Rhine* (1892). A popular straight actress, vaudeville headliner and comedienne, she made her film debut in *Tillie's Punctured Romance* (1914) but her support for an actors' strike in 1917 adversely affected her career and she struggled for a decade before returning to the cinema in small supporting roles. Her effective dramatic performance opposite GRETA GARBO in *Anna Christie* (1930) revived her fortunes and she was gainfully employed until her death. Her film appearances include *Min and Bill* (1930, Best Actress Academy Award), *Emma* (1932), *Dinner at Eight* (1933) and *Christopher Bean* (1933). She also published an autobiography, *The Life Story of an Ugly Duckling* (1924).

Drew, Charles Richard 1904–50
US physician
Born in Washington, DC, he became a surgeon and professor at Howard University (1942–50). He developed a method of preserving blood plasma for transfusion, and as the leading expert in the field he organized and directed blood-plasma programmes in Great Britain and the USA in the early years of World War II, becoming head of the first American Red Cross

Blood Bank in 1941. Ironically, the Red Cross would not accept donations of his own blood because he was an African–American. He lobbied to change their policy, but when they responded only by establishing a separate supply of blood donated and used by African–Americans, he resigned in protest (1942).

Drew, Dame Jane Beverley 1911–96
English architect
Born in Thornton Heath, Surrey, she trained at the Architectural Association, London (1929–34). After establishing her own practice during World War II, she then worked (1945–78) with her husband Maxwell Fry. She spent many years in India, where she was a senior architect at Chandigarh, the new capital of Punjab, India (1951–54), supervising work for LE CORBUSIER and designing the Government College for Women and the High School. From 1947 to 1965 she often worked in western Africa, and her work there includes Wesley Girls School, Ghana (1946) and the Olympic Stadium and Swimming Pool in Kaduna, Nigeria (1965). Deeply influenced by the MARS group, who were responsible for the introduction of the Modern Movement into Great Britain, she persuaded her political friends, including the prime minister, of the need for an Open University (Milton Keynes), a project on which she worked from 1969 to 1977. Her other works include the Hospital Building for the Kuwait Oil Company (1949–51) and the Festival of Britain Harbour Restaurant, London (1951). With her husband she wrote *Village Housing in the Tropics* (1945) and *Tropical Architecture in the Humid Zone* (1956). She was appointed DBE in 1996.

Dreyer, Carl Theodor 1889–1968
Danish film-maker
Born in Copenhagen, he was raised in a strict Lutheran family. His early career as a journalist brought him into contact with the developing film industry and he began writing scripts in 1912. He made his debut as a director with *Praesidenten* (1919, *The President*). Works like *Blade af Satans Bog* (1920, *Leaves from Satan's Book*), *La Passion de Jeanne d'Arc* (1928, 'The Passion of Joan of Arc') and *Vampyr* (1932, *Castle of Doom*) combine technical experimentation with a desire to explore spiritual themes and the influence of evil through torment and martyrdom. An exacting perfectionist whose work rarely found commercial favour, he returned to journalism in the 1930s and subsequently concentrated on documentaries. Infrequent fictional works like *Vredens Dag* (1943, *Day of Wrath*) and *Ordet* (1955, *The Word*) continued his fascination with spirituality and deliverance through death. His last film was *Gertrud* (1964), about a woman seeking perfect love, although until his death he continued to work on a long-cherished project to film the life of JESUS CHRIST.

Dreyer, John Louis Emil 1852–1926
Danish astronomer
Born in Copenhagen, he was appointed in 1874 as an assistant at the observatory of William Parsons (3rd Earl of ROSSE) at Birr Castle, Ireland. Four years later he moved to Dunsink, and in 1882 he became director of the Armagh Observatory. Dreyer is remembered for his catalogue of nebulae and star clusters. His *New General Catalogue*, published in 1888, was so influential that many nebulae are still referred to by their NGC number. Dreyer's two great literary contributions to astronomy were his biography of TYCHO BRAHE (1890) and his *History of Planetary Systems from Thales to Kepler* (1906). Dreyer was awarded the Gold Medal of the Royal Astronomical Society in 1916.

Dreyfus, Alfred c.1859–1935
French soldier
Born in Mülhausen, Alsace, he was the son of a rich Jewish manufacturer. He joined the army but in 1893–94 he was unjustly accused of delivering documents connected with the national defence to a foreign government. He was transported for life to Devil's Island, but the efforts of his supporters to prove his innocence provoked ÉMILE ZOLA's *J'accuse* (1898), in which he denounced the government's militarism and anti-Semitism. In 1898 the then chief of military intelligence, Major Hubert Joseph Henry (1846–98), confessed to forging the papers for the original trial with Major Marie Charles Esterhazy (1847–1923). Dreyfus was eventually found guilty but pardoned, but it was not until 1906 that the verdict was reversed by a civilian court. Dreyfus was restored to his rank of artillery captain, fought in World War I and was awarded the Legion of Honour. 🕮 Douglas Johnson, *France and the Dreyfus Affair* (1966)

Dreyfuss, Henry 1903–72
US designer and writer on design
Born in New York City, he worked initially in stage design, and in 1928 he opened his own design office, which continued in practice after his death (he and his wife committed suicide). He pioneered research into anthropometry, a study with clear implications for design, and he wrote *Designing for People* (1955) and *The Measure of Man* (1959). Functionalism took precedence over style in his design work. He was also concerned with the ethical standards of his profession, and restricted the number of his clients partly to prevent a conflict of commitment. Among the products which he designed were Bell telephones, Hoover vacuum cleaners, RCA televisions, John Deare agricultural machinery and Lockheed airliner interiors.

Dreyfuss, Richard Stephan 1947–
US actor
Born in Brooklyn, New York City, he studied at San Fernando Valley State College. Among his important early films were *American Graffiti* (1972), *The Apprenticeship of Duddy Kravitz* (1974), *Jaws* (1975), *Close Encounters of the Third Kind* (1976) and *The Goodbye Girl* (1977), which won him an Academy Award for Best Actor. After a lull in his career in the early 1980s he returned to form in such films as *Tin Men* (1987) and *Mr Holland's Opus* (1995, Academy Award nomination). He has continued to work on the stage.

Drezen, Youenn 1899–1972
Breton poet, dramatist, translator and novelist
He began as a journalist. He translated Greek tragedies and English and Spanish classics into Breton. *Chant à l'Ouest* is an epic poem about the Celts; however, his acknowledged masterpiece, written before he devoted himself to the theatre, is the novel *Notre-Dame des Carmélites* (1941). His chief aim was to elevate Breton literature and his books have become classics in their language.

Driesch, Hans Adolf Eduard 1867–1941
German physiologist and philosopher
Born in Bad Kreuznach, he was the son of a wealthy merchant. From 1886 to 1889 he studied zoology at the universities of Freiburg and Jena. During the following ten years he conducted his most important experiments, mainly at the Zoological Station in Naples. In 1891 he separated the two cells produced by division of a fertilized sea-urchin egg, and showed that each cell could form a whole larva, thus providing evidence opposed to the theory of preformation – the idea that in the fertilized egg a whole individual already exists in miniature – and opening up new avenues in experimental embryology. He was later appointed professor of philosophy at the universities of Heidelberg (1911), Cologne (1920) and Leipzig (1921).

Drinkwater, John 1882–1937
English poet, dramatist and critic
Born in Leytonstone, London, he was an insurance clerk, and had published several volumes of poems when he achieved an immediate theatrical success with his play *Abraham Lincoln* (1918). He followed it with *Mary Stuart*, *Oliver Cromwell* (both 1921), *Robert E. Lee* (1923) and a comedy, *Bird in Hand* (1927). His first volume of poems appeared in 1903, and he also wrote critical studies of WILLIAM MORRIS, ALGERNON CHARLES SWINBURNE and BYRON, and of lyric poetry. He was one of the founders of the Pilgrim Players and became manager of the Birmingham Repertory Theatre. He published two volumes of an unfinished autobiography, *Inheritance* (1931) and *Discovery* (1932). 🕮 G Matthews, *John Drinkwater: A Lecture* (1925)

Driver, Sir Godfrey Rolles 1892–1975
English biblical scholar
The son of the Old Testament scholar Samuel Rolles Driver (1846–1914), he became professor of Semitic philology at Oxford (1938–62). From 1965 to 1970 he was joint director of the project to develop the new translation of the *New English Bible*.

Droeshout, Martin 17th century
Flemish engraver
He lived in London. He is known for his portrait of SHAKESPEARE, prefixed to the folio edition of 1623.

Droste-Hülshoff, Annette Elisabeth, Baroness von 1797–1848
German poet
Born in Westphalia, she is regarded as Germany's greatest woman writer. She led a reclusive life and from 1818 to 1820 wrote religious verses, published posthumously as *Geistliche*

Jahre (1851). Her long narrative poems, notably *Das Hospiz auf dem grossen Sankt Bernard* (1838, 'The Hospice on the Great Saint Bernard') and *Die Schlacht im Loener Bruch* ('The Battle in the Loener Marsh'), were influenced by BYRON. She also wrote a novella, *Die Judenbuche* (1841, 'The Jew's Beech Tree'). 🕮 C Heselhaus, *Annette von Droste-Hülshoff. Werk und Leben* (1971)

Drouet, Jean Baptiste, Comte d'Erlon 1765–1844
French soldier
Born in Reims, he served in the Napoleonic Wars in the campaigns of the Moselle, Meuse, Sambre and Peninsula. At the first Restoration the BOURBONS gave him a command, but on NAPOLEON I's return he was put under arrest in Lille citadel. He seized and held it for the emperor, and at Waterloo (1815) he commanded the first *corps d'armée*. After the capitulation of Paris he fled to Bavaria, returned for the July Revolution (1830), and became Governor-General of Algeria (1834–35) and Marshal of France (1843).

Droz, Antoine Gustave 1832–95
French novelist
Born in Paris, he devoted himself to art before achieving his first and greatest success with *Monsieur, Madame, et Bébé* (1866, Eng trans *Papa, Mamma and Baby*, 1887). Later came *Entre nous* (1867, 'Between Ourselves'), *Les Étangs* (1876, 'The Ponds'), *L'Enfant* (1885, 'The Child') and others.

Druce, George Claridge 1850–1932
English botanist
Born in Potterspury, Northamptonshire, he was apprenticed to a Northampton chemist firm in 1866, and in 1879 he purchased a chemist's shop in Oxford. There, he helped to found the Ashmolean Museum and began his best work, a series of county floras covering the Upper Thames Valley (*Flora of Oxfordshire*, 1886; *Flora of Berkshire*, 1897; *Flora of Buckinghamshire*, 1926; *Flora of Northamptonshire*, 1930). He wrote many papers on British botany, was extremely active in the Botanical Exchange Club, and also served on Oxford City Council.

Drucker, Peter Ferdinand 1909–2005
US management consultant
Born in Vienna, Austria, and educated in Austria and England, he became an economist with a London international bank before going to live in the USA in 1937. He was professor of philosophy and politics at Bennington College (1942–50), professor of management at the Graduate School of Business, New York University (1950–72), and was appointed professor of social sciences at the Claremont Graduate School in California in 1972. He was well known as a management consultant, and wrote numerous successful textbooks on management, including *The Effective Executive* (1967), *Management: Tasks, Practices, Responsibilities* (1974), *The New Realities* (1989) and *Managing at a Time of Great Change* (1995). He also wrote two novels.

Drummond, Dugald 1840–1912
Scottish locomotive engineer
Born in Ardrossan, Ayrshire, he was the chief mechanical engineer of the London & South Western Railway from 1905. He made his reputation in Scotland (1876–78) with the 4-4-0 'Abbotsford' class, examples of which were still running in the 1960s. His younger brother, Peter Drummond (1850–1918), born in Polmont, Stirlingshire, was also a locomotive engineer with the Highland and Glasgow & South Western Railways.

Drummond, George 1687–1766
Scottish entrepreneur and philanthropist
Born in Perthshire, he is known as the founder of the New Town in Edinburgh. An anti-Jacobite Whig, he fought at the Battle of Sheriffmuir (1715) and commanded a company in the 1745 Rising. A skilled accountant, he worked on the accounts for the Union of Parliaments in 1707, and was appointed Accountant-General of Excise. He was Lord Provost of Edinburgh six times between 1725 and 1764. He was the driving force behind the building of the Royal Infirmary (1738) and the Royal Exchange (1760, now the City Chambers), the expansion of Edinburgh University, and the proposal to create a New Town to the north of Princes Street. He drained the Nor'Loch (1759), and in 1763 laid the foundation stone of the North Bridge.

Drummond, Henry 1786–1860
English banker, politician and religious leader
Born in Albury, Surrey, he studied at Oxford for two years, but did not finish his degree. He was MP for Plumpton Earls (1810–13) and West Surrey (1847–60). Living for a time near Geneva he continued a campaign begun by Robert Haldane (1764–1842) against the creed of Socinianism founded by FAUSTUS SOCINUS. He founded a chair of economics at Oxford (1825), and became the founder and chief prophet of the Catholic Apostolic, or Irvingite, Church, based on the messianic creed of EDWARD IRVING.

Drummond, Henry 1851–97
Scottish evangelical theologian and biologist
Born in Stirling, he studied at Edinburgh, and became lecturer (1877) and professor of natural science (1884) at the Free Church College, Glasgow. He travelled in the Rocky Mountains, Central Africa, Japan and Australia. Attempting to reconcile Christianity and DARWINISM, he wrote such works as *Natural Law of the Spiritual World* (1883), *The Ascent of Man* (1894) and *Tropical Africa* (1888).

Drummond, Thomas 1797–1840
Scottish engineer and politician
Born in Edinburgh and educated there and at Woolwich, he joined the Royal Engineers in 1815, and in 1820 joined the Ordnance Survey, whose work was immensely facilitated by his improved heliostat and limelight (the 'Drummond Light'); the latter was also developed at about the same time by Sir GOLDSWORTHY GURNEY. He became head of the boundary commission under the Reform Bill, and under-secretary for Ireland (practically its governor) in 1835.

Drummond (of Hawthornden), William 1585–1649
Scottish poet
Born in Hawthornden, near Edinburgh, he was educated at Edinburgh University, studied law at Bourges and Paris, then became Laird of Hawthornden (1610), and devoted his life to poetry and mechanical experiments. He enjoyed the friendship of BEN JONSON, who paid him a memorable visit (1618–19), and Drummond wrote *Notes* of their talk. His chief works are the pastoral lament *Tears on the Death of Moeliades* (ie Prince Henry, 1613), *Poems, Amorous, Funereall, Divine, Pastorall in Sonnets, Songs, Sextains, Madrigals* (1614), *Forth Feasting* (1617) and *Flowers of Sion* (1623). In prose he wrote *A Cypress Grove* (1630) and a *History of the Five Jameses*, and his *History of Scotland 1423–1524* was posthumously published in 1655. His death was hastened by grief over CHARLES I's execution. 🕮 F R Fogle, *A Critical Study of William Drummond of Hawthornden* (1952)

Drury, Alfred 1857–1944
English sculptor
He was born in London, and trained there at the Royal Academy Schools. Among his works in London are *St Agnes* (1896, Chantrey Collection, Tate), a bronze statue of Sir JOSHUA REYNOLDS (1931, Burlington House quadrangle) and the memorial to the London Troops of two world wars. He also sculpted the figures of VICTORIA and ALBERT over the entrance to the Victoria and Albert Museum (1903) and, between 1901 and 1924, worked on the Canada and Africa gates in the Mall, London.

Drusus, Nero Claudius, *also known as* **Drusus Senior** 39–9 BC
Roman soldier
He was the son of Livia Drusilla, stepson of Emperor AUGUSTUS, and younger brother of Emperor TIBERIUS. His campaign against the Rhaeti and other Alpine tribes (15 BC) was celebrated by HORACE in his *Odes*. Until his death he was engaged chiefly in establishing Roman supremacy in Germany, and received the title Germanicus. CLAUDIUS I was his son.

Druten, John van 1901–57
US playwright
Born in London, England, he became famous in 1928 with his play *Young Woodley*, which was first produced in the USA after falling foul of the British censor. After several years and considerable success, he was granted US citizenship in 1944. *The Voice of the Turtle*, one of his most successful plays, was produced in 1943 and his adaptation of sketches by CHRISTOPHER ISHERWOOD, *I Am A Camera*, in 1951. 🕮 *The Way to the Present* (1938)

Dryden, John 1631–1700
English poet
He was born at the vicarage of Aldwinkle All Saints, Northamptonshire, and educated at Westminster School under RICHARD BUSBY and at Trinity College, Cambridge, where he stayed until 1657. Going up to London in that year he attached himself to his cousin Sir Gilbert Pickering, CROMWELL's chamberlain, in the hope of employment, as both sides of his family were Parliamentarians. His *Heroic Stanzas*, in quatrains, on the death of Cromwell (1658) was soon followed by his *Astrea Redux* (1660), celebrating the Restoration in heroic couplets, which

was to be his staple measure even in the myriad plays which he soon produced for the amusement of 'a venal court'. The first of these 'heroic' verse plays to appeal to the public was *The Indian Emperor* (1665), dealing with the conquest of Mexico by HERNÁN CORTÉS and his love for the emperor's daughter, and the last was *Aureng-Zebe* (1676). In 1663 he married Lady Elizabeth Howard, eldest daughter of the Earl of Berkshire. In 1667 he published *Annus Mirabilis, The Year of Wonders, 1666*, which established his reputation, and he was appointed Poet Laureate in 1668 following Sir WILLIAM D'AVENANT, and historiographer royal in 1670. Meanwhile he was writing a series of comedies for the stage, including *The Rival Ladies* (1664, in rhymed verse) and culminating with *Marriage à la Mode* (1672). He used blank verse for *All for Love* (1677), his best play and comparable to SHAKESPEARE's *Antony and Cleopatra*. His adaptation of another Shakespeare play, *Troilus and Cressida*, in 1678, was by comparison a failure. He had adapted *The Tempest* in 1670, MILTON's *Paradise Lost* (as *The State of Innocence*, 1677) and CORNEILLE's *The Mock Astrologer* (1668). He wrote a series of important critical essays as prefaces to his plays, including his charming *Essay of Dramatic Poesy* (1668) and the *Defence of the Epilogue* (to *The Conquest of Granada*, 1670). In 1680 he began a series of satirical and didactic poems, starting with the most famous, 'Absalom and Achitophel' (1681), and followed by 'The Medal' (1682) and 'MacFlecknoe' (1684), written some years before, which did much to turn the tide against the Whigs. To this era also belong the didactic poem *Religio Laici* (1682), which argues the case for Anglicanism, and *The Hind and the Panther*, marking his conversion to Catholicism in 1685. A place in the Customs (1683) was his reward for his political labours. At the Revolution of 1688 he lost the poet laureateship and took up translation to earn a living. Of these his fine translation of VIRGIL was most profitable, and that of JUVENAL and PERSIUS was prefaced by a *Discourse Concerning the Origin and Progress of Satire*. His final work, published in 1699, was *Fables, Ancient and Modern*, which, with its paraphrases of CHAUCER, OVID and BOCCACCIO, has delighted generations of readers. These works are only the most outstanding of a lifetime's industry. Dryden is transitional between the Metaphysical poets of the school of JOHN DONNE and the neoclassic reaction which he did so much to create. 🕮 G Wasermann, *John Dryden* (1964); C Ward, *A Life of John Dryden* (1961)

Drygalski, Erich Dagobert von 1865–1949
German geophysicist and explorer
Born in Königsberg, Prussia (now Kaliningrad, Russia), he headed expeditions to Greenland (1891–93) and in the *Gauss* to the Antarctic (1902–03), where he discovered and named the Gaussberg volcano.

Drysdale, Sir (George) Russell 1912–81
Australian painter
Born in Sussex, England, he settled in Melbourne in 1923 and, although he originally intended to work on the land, attended art school. In 1939 he took part in the first exhibition of the Contemporary Art Society of Australia. Eventually he settled in Sydney, and in 1942 had his first one-man exhibition. KENNETH CLARK encouraged him to exhibit in London in 1950. In 1954 he represented Australia at the Venice Biennale. His paintings of the Australian outback often stress drought and erosion, and show the influence of abstract and Surrealist art.

dsh *See* HOUEDARD, DOM SYLVESTER

Duarenus, *originally* **François Douaren** 1509–59
French humanist jurist
He was a professor at Bourges and wrote *Pro libertate ecclesiae Gallicae* (1551), *Commentarius in Consuetudines Feudorum* (1558) and a commentary on JUSTINIAN I's *Digest*.

Duarte, José Napoleón 1925–90
El Salvadorean politician
Trained as a civil engineer in the USA at the University of Notre Dame in South Bend, Indiana, he founded the Christian Democratic Party (PDC) in 1960. After serving as Mayor of El Salvador (1964–70), he was elected president in 1972 but was soon impeached and exiled for seven years to Venezuela. He returned and in 1980 regained the presidency, with US backing. He lost the 1982 election and for two years witnessed a fierce struggle between the right- and left-wing elements. He returned as president in 1984 but in 1988, stricken by terminal cancer, was forced to resign.

Dubček, Alexander 1921–92
Czechoslovak statesman
Born in Uhrovek, Slovakia, he lived from 1925 to 1938 in the USSR, where his father was a member of a Czechoslovakian industrial co-operative. He returned home and joined the Communist Party in 1939, fought as a Slovak patriot against the Nazis (1944–45), and gradually rose in the party hierarchy until in 1968 he became first secretary. He implemented a programme of far-reaching economic and political reforms, including abolition of censorship, increased freedom of speech, and suspension of ex-president ANTONÍN NOVOTNÝ and other former Stalinist party leaders. Despite his avowed declaration of democracy within a Communist framework, his policy of liberalization during the Prague Spring led in August 1968 to the occupation of Czechoslovakia by Warsaw Pact forces. In 1969 the Russians exerted strong pressure on the Czechoslovak government, and Dubček was replaced as first secretary by GUSTAV HUSÁK. He was elected president of the Federal Assembly for a few months in 1969, but expelled from the Presidium in September and deprived of party membership in 1970. He spent the next 18 years working as a clerk in a lumber yard in Slovakia, but having publicly pledged support for the reforms of MIKHAIL GORBACHEV, he was given freedom to travel. Following the overthrow of the existing Communist regime in November 1989 in a bloodless 'Velvet Revolution', he dramatically re-emerged from retirement to be elected chairman of the Federal Assembly in December 1989 but lost his parliamentary seat in the elections of 1992. He was awarded the Sakharov Peace prize in 1989 and his book about the events of 1968, *The Soviet Invasion*, was published in 1990. He died as the result of a car accident.

Dubinsky, David 1892–1982
US labour leader
Born in Brest (now Brest Litovsk), Russian Poland, he was exiled to Siberia (1908) for union activity. In 1911 he escaped and reached the USA. He found a job as a cloak cutter and joined the International Ladies' Garment Workers Union, rising to become its president (1932–66). Dubinsky transformed the ILGWU into a model international union with 450,000 members, raising the workers' standard of living and pioneering initiatives in housing, pension plans and health centres.

Dubois, Guillaume 1656–1723
French prelate
Born in Brive-la-Gaillarde, he studied for the priesthood, then was appointed first tutor and later secretary to the Duc de Chartres, and became very influential when his employer (now Duc D'ORLÉANS) became regent in 1715. He was appointed foreign minister and archbishop of Cambrai (1720), a cardinal (1721), and prime minister of France (1722).

Dubois, Marie Eugène François Thomas 1858–1940
Dutch palaeontologist
Born in Eijsden, Limburg, he studied medicine in Amsterdam and taught there from 1899. His interest in the 'missing link' between the apes and humans took him to Java in 1887, where in the 1890s he found the humanoid remains named as *Pithecanthropus erectus* (Java Man) and which he claimed to be the missing link. His view was contested and even ridiculed. When in the 1920s it eventually became widely accepted, Dubois began to insist that the fossil bones were those of a giant gibbon, and maintained this view until his death.

Du Bois, W(illiam) E(dward) B(urghardt) 1868–1963
US writer and editor
Born in Great Barrington, Massachusetts, he studied at Fisk University, Tennessee, and at Harvard, from where he was the first black person to be awarded a PhD (1895) and was later professor of economics and history at Atlanta University (1897–1910). He was co-founder of the National Association for the Advancement of Colored People (1908), and edited its magazine, *Crisis* (1910–34), but later disassociated himself from the association, finding it too conservative. He wrote a number of important works on slavery and the 'colour problem', including *The Negro* (1915), *Black Reconstruction* (1935) and *Colour and Democracy* (1945). He also wrote novels, such as *The Dark Princess* (1928) and *Worlds of Color* (1961). A passionate advocate of radical black action and an early supporter of the suffragette movement – which he tried to link with the struggle for black rights – he joined the Communist Party in 1961. He moved to Ghana at the age of 91, renounced his US citizenship and became a naturalized Ghanian just before he died. 🕮 *Autobiography* (1968)

Du Bois-Reymond, Emil Heinrich 1818–96
German physiologist
Born into a Swiss family which had settled in Berlin, he trained in medicine there, working under JOHANNES MÜLLER, and graduating in 1843. He succeeded Müller as professor of physiology at

Berlin in 1858, and was appointed head of the new Physiological Institute which opened in 1877. Du Bois-Reymond's importance lay in his investigations of the physiology of muscles and nerves, and in his demonstrations of electricity in animals. He improved the techniques for measuring such effects, first investigated by LUIGI GALVANI, and was able to detect an electric current in ordinary localized muscle tissues, tracing it to individual fibres. He demonstrated the existence of electrical currents in nerves, and his experimental methods proved the basis for almost all future work in electrophysiology.

Du Bos, Charles 1882–1939
French writer
Born in Paris, of an English mother, he studied at Oxford (1900–01) and in Germany. He wrote critical works on BYRON, FRANÇOIS MAURIAC, ANDRÉ GIDE and others, and published a collection of critical essays under the title *Approximations* (7 vols, 1922–27). His *Qu'est-ce que la littérature?* ('What is Literature?') was published posthumously in 1945, and contains a 'Hommage' by a number of writers, including CHARLES MORGAN.

Dubos, René Jules 1901–82
US bacteriologist
He was born in Saint-Brice, France, and studied at the Institut National Agronomique, Paris, and Rutgers University, New Jersey. He worked at Rockefeller University in New York City from 1927 and became a US citizen in 1938. In 1939 he discovered tyrothricin, the first commercially produced antibiotic.

Dubricius, St d.612
Welsh religious
He was the traditional founder of the Welsh bishopric of Llandaff.

Dubuffet, Jean 1901–85
French painter and printmaker
Born in Le Havre, he enrolled at the Académie Julian in Paris in 1918, but never studied seriously, enjoying life as the son of a rich wine merchant, whose business he took over in 1925. He began painting again during World War II, when he invented the concept of Art Brut and pioneered the use of rubbish, such as discarded newspapers, broken glass, and rough plaster daubed and scratched like an old wall, to create 'pictures'. His artwork is regarded as presaging the Pop Art and Dada-like fashions of the 1960s, and his collected writings were published in 1967. 🕮 Andreas Franzke, *Dubuffet* (1981)

Du Camp, Maxime 1822–94
French photographer and writer
Born in Paris, he was a close friend of GUSTAVE FLAUBERT, with whom he travelled in the Middle and Near East in 1844–45 and 1849–51. His renown as a photographer dates from this time, and his pictures are a testament to the fascination seen in the East by those involved in the Romantic movement. They are also early examples of topographical photography and were published in one of the first books illustrated by original photographs, *Égypte, Nubie, Palestine et Syrie* (1852). In 1848 Du Camp fought and was decorated as a counter-revolutionary; he also fought as a volunteer with the Italian revolutionary GARIBALDI. He wrote books on Paris and was a founder of the *Revue de Paris* (1851), in which Flaubert's *Madame Bovary* was first published in serial form. His other writings include *Souvenirs littéraires* (2 vols, 1882–83, 'Literary Recollections') and several novels.

Duccio, Agostino di *See* AGOSTINO DI DUCCIO

Duccio di Buoninsegna c.1260–c.1320
Italian painter
His work shows the Byzantine tradition of Italian art in its most highly developed state. His masterpiece is the *Maestà* for the altar of Siena Cathedral (1311), most of which is now in the cathedral museum, the Museo dell'Opera del Duomo. The *Rucellai Madonna* in the Uffizi, Florence, long attributed to GIOVANNI CIMABUÉ, is now generally considered to be his work. He is represented in the National Gallery, London, by three paintings taken from the predella of the *Maestà*: the *Annunciation, Christ Healing the Blind Man* and the *Transfiguration*.

Du Chaillu, Paul Belloni 1831–1903
US traveller
Born in Paris, France, he spent several years in Gabon and in 1852 went to the USA, where he was naturalized. From 1855 he spent four years exploring the interior of West Africa. He was received at first with much distrust, but his *Explorations in Equatorial Africa* (1861) made important contributions to geographical, ethnological and zoological science, especially as to the river Ogowé's source, the culture of Fang, and the natural history of the gorilla.

Duchamp, Marcel 1887–1968
US painter
Born in Blainville, France, he moved to Paris to join his two artistic brothers in 1904. Associated with several modern movements including Cubism and Futurism, he shocked his generation with such works as *Coffee-Mill* (1911) and *Nude Descending a Staircase* (1912, Philadelphia), and was one of the pioneers of Dadaism, the anti-art protest, which favoured the presentation of energy and change above classical aesthetic values and fulminated against mechanization. In 1914 he introduced the first 'ready-made' by signing a bottle-rack and declaring it to be art. In 1915 he left Paris for New York City, where he worked for eight years on a ten-foot (3m) high composition in glass and metal, *The Bride Stripped Bare by Her Bachelors, Even*, known as *The Large Glass*, in which many of the shapes were obtained by chance effects, such as dust blown on to the drawings. He described this in his *Green Box* notes (1933). He edited the US art magazine *VVV* (1942–44), and became a US citizen in 1955. He was the brother of JACQUES VILLON and half-brother of RAYMOND DUCHAMP-VILLON. 🕮 Calvin Thomkins, *The World of Marcel Duchamp* (1966)

Duchamp-Villon, Raymond 1876–1918
French sculptor
Born in Damville, Normandy, the brother of JACQUES VILLON and half-brother of MARCEL DUCHAMP, he began as a medical student, turning to sculpture in 1898. By 1914 he was one of the leading Cubist sculptors in Paris. His most striking work is the bronze *Horse* (1914, Peggy Guggenheim Collection, Venice), in which realism is rejected in favour of an abstract swirl of forms that captures the energetic movement of the animal.

du Châtelet-Lomont, Gabrielle *See* CHÂTELET-LOMONT, GABRIELLE DU

Duchenne, Guillaume Benjamin Amand 1806–75
French physician
Born in Boulogne-sur-Mer, he was educated at Douai and Paris. After eleven years as a general practitioner in Boulogne, he returned to Paris and devoted himself to the physiology and diseases of muscles. A pioneer of electrophysiology and electrotherapeutics, he did important work on poliomyelitis, locomotor ataxia and a common form of muscular ('Duchenne's') dystrophy. He also developed a method of taking small pieces of muscle (biopsy) from patients for microscopical examination. Although he never held a formal hospital appointment, he worked at the Salpêtrière Hospital, where JEAN MARTIN CHARCOT was his patron.

Duchesne, André, *Latin* **Chesnius** or **Quercetanus** 1584–1640
French historian
He was royal historiographer, and is known as the 'Father of French history'. He wrote histories of England, Scotland and Ireland, of the popes up to PAUL V, and of the House of Burgundy. He also made collections of the early Norman and French histories.

Duchesne, Père *See* HÉBERT, JACQUES RENÉ

Duchesne, St Rose Philippine 1769–1852
French Roman Catholic nun and missionary
She was born in Grenoble and entered the women's community called the Society of the Sacred Heart in 1804, and in 1818 was sent as a missionary and teacher to the USA. That year she founded a branch of the society, a convent and school at St Charles, Missouri. Using this as her base, she went on to establish several convents, orphanages and schools, for example at St Louis, Missouri (1827), and at Grand Cocteau, Louisiana. In the early 1840s she worked to spread the gospel among the Potawatomi in Kansas. Beatified in 1940, she was canonized in 1988 and her feast day is 17 November.

Ducis, Jean François 1733–1816
French poet and playwright
He was born in Versailles. His own tragedies are regarded as mediocre and he is best known for his adaptations of SHAKESPEARE for the French stage, which he completed from earlier French versions, since he knew no English. They did help popularize Shakespeare in France, despite wild inaccuracies and such liberties as allowing Othello to discover his mistake and spare Desdemona.

Duckworth, Sir John Thomas 1748–1817
English naval commander
Born in Leatherhead, Surrey, he was educated at Eton, but left early to join the navy as a volunteer, and in 1759 saw action in the battles of Lagos Bay and Quiberon Bay, under EDWARD HAWKE. He served at sea in the War of American Independence (1775–83) and in the French Revolutionary Wars (1792–1800), including the Battle of Ushant (1794). In 1801 he captured Swedish and Danish possessions in the West Indies, and was commander-in-chief at Jamaica from 1803 to 1813.

Ducos du Hauron, Louis 1837–1920
French scientist
Born in Langon, he became interested in photography from 1859, and his publication *Les Couleurs en photographie* (1869) outlined for the first time all the principles of additive and subtractive colour reproduction, although at that period suitably sensitive photographic materials were not available. In 1878 he published *Photographie en couleur*, describing practical methods which he patented, and in 1891 he proposed the anaglyph method of viewing stereoscopic images.

Duddell, William du Bois 1872–1917
English engineer
He worked on radiotelegraphy and in 1897 invented an improved version of the oscillograph. He also designed a high-frequency generator. The Physical Society instituted the Duddell Medal in his honour.

Dudley, Edmund c.1462–1510
English lawyer and privy councillor
He was Sir RICHARD EMPSON's partner in collecting taxes and dues for HENRY VII, whose son and successor HENRY VIII had him executed.

Dudley, Lord Guildford d.1554
English nobleman
The fourth son of John Dudley, Earl of WARWICK and Duke of Northumberland, he was persuaded by his father to marry the unwilling Lady JANE GREY (1553) as EDWARD VI lay dying, and then proclaimed her queen on 9 July. After the accession of MARY I, Tudor (Edward's sister), Dudley and his wife were imprisoned in the Tower of London and beheaded.

Dudley, Leon *See* SORABJI, KAIKHOSRU SHAPURJI

Dudley, William Stuart 1947–
English stage designer
He was born in London, and educated at St Martin's School of Art and the Slade School of Art, London. He designed his first stage set for *Hamlet* at the Nottingham Playhouse (1970). He subsequently designed many productions for the Royal Court, including ALAN BENNETT's *Kafka's Dick* (1986). He has worked extensively at the National Theatre, being associate designer there since 1981, and at the Royal Shakespeare Company. He has also worked extensively in opera in Great Britain and elsewhere, and designed PETER HALL's production of *The Ring* at Bayreuth (1983) and BILL BRYDEN's productions of *The Ship* (1990) and *The Big Picnic* (1994) in Glasgow. He has won seven Olivier awards, most recently for *All My Sons* (2001, National Theatre) and *Hitchcock Blonde* (2004, Royal Court).

Dudok, Willem Marinus 1884–1974
Dutch architect
Born in Amsterdam, he trained as an army engineer and became city architect of Hilversum in 1915. Mixing modern and traditional elements, his fully developed style is characterized by dramatic massing of asymmetrical plain brick blocks, deep-set windows and vertical elements. The Hilversum Town Hall (1928–30) was his masterwork. His most important building outside Hilversum was the Bijenkorf Department Store in Rotterdam (now demolished), where large areas of glazing contrasted with plain brickwork. Dudok had no successors, but was widely imitated abroad.

Dufay, Charles François de Cisternay 1698–1739
French chemist
Born in Paris, he joined the army at the age of 14, leaving in 1721 and being appointed chemist at the Academy of Sciences (1723), rising to the position of director in 1733. His early research on mercurial phosphorus showed him to be a thorough and methodical investigator of natural phenomena. He reported his observations of natural magnetism and the effect of distance on the force between magnets, but his most important work concerned electrostatics, in which he defined the difference between positive and negative electricity and recognized that they exhibit repulsive as well as attractive forces. He worked in many areas, including double refraction in crystals, the colouring of artificial gems, the heat of slaked lime and plane geometry.

Dufay, Guillaume c.1400–1474
French composer
Born probably in Cambrai, he was the most celebrated 15th-century composer. A choirboy at Cambrai, he returned there as canon in 1439 after extensive travel and residence in Italy. Almost 200 of his works are extant, including eight complete masses, many motets, and songs. His warmth of emotion, strong sense of melody and pioneering of the *cantus firmus* mass greatly influenced Renaissance composers. 🕮 David Fallows, *Dufay* (1982)

Duff, Sir Lyman Poore 1865–1955
Canadian judge and jurist
Born in Ontario, he became a judge of the Supreme Court of British Columbia (1904–06) and the Supreme Court of Canada (1906–33), and was later chief justice of that court (1933–44). He had an extensive knowledge of law, both common law and the modern civil law of France and Quebec, and wrote leading opinions on many important constitutional decisions. His influence was particularly significant on the question of the distribution of powers between the federal government and the provinces, and on that of upholding the federal government's power to abolish, without the consent of the provinces, appeals to the Privy Council. He also sat on the judicial committee of the Privy Council (1919–46).

Duffy, Carol Ann 1955–
Scottish poet
Born in Glasgow, she is considered one of the leading women poets of her generation. Much influenced by the dramatic monologues of ROBERT BROWNING and by LAURA RIDING, she is striking in her use of a kind of toughened and good-natured whimsicality in her verse. Her collections include *Standing Female Nude* (1985), *The Other Country* (1990), *The World's Wife* (1999), *Meeting Midnight* (1999), a collection for children, and *The World's Second Wife* (2006). In 1993 she won the Whitbread award for poetry for her collection *Mean Time*. She was awarded the OBE in 1995 and the CBE in 2002. Her collection *Rapture* (2005) won the T S Eliot prize.

Duffy, Sir Charles Gavan 1816–1903
Irish nationalist and politician
Born in County Monaghan, he helped to start the *Nation* (1842), the Young Ireland organ, and for twelve years engaged in agitation, and was tried for sedition and treason. On the break-up of the Independent Irish Party, he emigrated in 1856 to Australia, where after the establishment of the Victorian constitution, he became minister of public works (1857), minister of lands (1858, 1862), and prime minister (1871). In 1877 he was elected speaker of the legislative assembly. His *Ballad Poetry of Ireland* became a household book in his native country. In 1880, when he returned to Europe, he published his *Young Ireland, 1840–50* (final edn, 1896), followed in 1883 by *Four Years of Irish History, 1845–49*, and in 1898 by *My Life in Two Hemispheres*.

Duffy, Tony 1937–
English photographer
Born in London, he worked as an accountant before taking his famous photograph of BOB BEAMON smashing the world long-jump record at the Olympic Games in Mexico City (1968). He subsequently founded the Allsport photographic agency and became one of the world's leading sports photographers.

Dufour, Guillaume Henri 1787–1875
Swiss soldier and military writer
He served in the French army (1807–14), and founded the military academy at Thun, Switzerland, in 1818. Chief of staff of the Swiss army from 1831, he commanded the new Swiss federal forces against the Sonderbund in 1847. He was also responsible for a topographical map of Switzerland (1864) and presided over the Geneva Convention in 1864 that led to the foundation of the Red Cross.

Du Fu (Tu Fu) 712–70
Chinese poet of the Tang dynasty
He was born in Xiangyang, and spent much of his youth travelling, during which time he soaked up impressions of his country's sharply juxtaposed cultural riches and social ills. One of the foremost lyricists in the language, his poems include 'The Ballad of Beautiful Women', 'The Newlyweds' Parting' and 'The Chariots' Song'. These last two reflect the violent uncertainties of life at the time, but they are also beautifully crafted and full of memorable imagery. In his later years, he was

supported financially by an old friend, who enabled him to travel once more, in greater comfort than he had experienced in his youth. The best English-language source for Du Fu is still Florence Ayscough's two-volume *The Autobiography of a Chinese Poet* (1929); a definitive edition of the complete works appeared in Beijing (Peking) in 1979. 🕮 W Hung, *Tu Fu, China's Greatest Poet* (1952)

Dufy, Raoul 1877–1953
French artist and designer
Born in Le Havre, he was much influenced by the brightness and colour of Fauvism, which he did much to popularize. Later he abandoned it, but retained his singing blues and reds. From 1907 he worked in woodcut and engraved many book illustrations, including GUILLAUME APOLLINAIRE's *Bestiary* (1911), and produced woodcuts for making printed silk fabrics for dress designers. He also made pottery and tapestries, but in 1919 he returned to painting on the Riviera, where he produced a notable series of seascapes, bathers, sailing regattas and racecourse scenes.

Dugdale, Sir William 1605–86
English antiquary
Born in Shustoke, Warwickshire, he studied law and history under his father, and in 1625 purchased the neighbouring manor of Blythe. In 1638 he was created a pursuivant-at-arms extraordinary and in 1640 Rouge Croix pursuivant. During the Civil War he adhered to the Royalist cause, and from 1642 to 1646 lived at the king's headquarters in Oxford, becoming a Chester herald, while pursuing his antiquarian researches. At the Restoration he received the office of Norroy, and in 1677 was made garter principal king of arms, and given a knighthood. His works include the *Monasticon Anglicanum* (1655, 1664, 1673), *Antiquaries of Warwickshire* (1656), *History of Imbanking and Drayning* (1662) and *Baronage of England* (3 vols, 1675–76).

Dughet, Gaspard, *also called* **Gaspard Poussin** 1615–75
Italian landscape painter
He was born in Rome of French descent. His sister married NICHOLAS POUSSIN and he called himself after his more famous brother-in-law. He specialized in landscapes which, while modelled on the Roman countryside, combine the classical manner of Poussin with the more lyrical style of CLAUDE LORRAIN. His works were avidly collected by 18th-century English travellers to Rome and were often taken as models for landscaped gardens and parks.

Duhamel, Georges 1884–1966
French novelist and poet
Born in Paris, he originally studied medicine and worked as an army surgeon in World War I. This provided the background for *La Vie des martyrs* (1917, 'Life of the Martyrs') and *Civilisation* (1918, awarded the Prix GONCOURT). Many of his 50 volumes of vigorous, skilful writing have been translated. They include *Salavin* (1920–32), *Le Notaire du Havre* (1913, Eng trans *News from Le Havre*, 1934), the first of the ten parts of *Chronique des Pasquier* (1933–44, Eng trans *The Pasquier Chronicles*, 1937–45) and *Positions françaises: Chronique de l'année 1939* (1940, Eng trans *Why France Fights*, 1940). He edited *Mercure de France*. 🕮 *Light on My Days*, translation of two volumes of autobiography (1948)

Duhamel du Monceau, Henri-Louis 1700–82
French technologist
Born in Paris, he proved the distinction between what we would now call potassium and sodium salts, showed that soda can be made from rock salt, and improved the making of starch, soap and brass. He reviewed agricultural practice and introduced JETHRO TULL's methods into France.

Duhem, Pierre Maurice Marie 1861–1916
French philosopher and physicist
Born in Paris, he held teaching positions at Lille, Rennes and Bordeaux. A devout Catholic all his life, he began his scientific work in thermodynamics and many of his ideas were well in advance of their time. He made important contributions to the history of science, in particular reviving an interest in medieval science, his magnum opus being *Système du monde* (10 vols, 1913, 'The World System'). His philosophical views are developed in *La Théorie physique, son objet et sa structure* (1906, 'The Aim and Structure of Physical Theory') and present a formalistic account of science, whereby scientific theories and models should be regarded as useful predictive devices and psychological aids rather than direct descriptions or explanations of the world.

Duilius, Gaius fl.260 BC
Roman general
As consul in 260 BC he led 143 new Roman galleys to a decisive victory over the Carthaginians off Mylae, by the first use of new devices nicknamed *corvi* (ravens), combined grappling-hooks and boarding-bridges.

Dukakis, Michael 1933–
US politician
Born in Boston, Massachusetts, the son of Greek immigrants, he studied law at Harvard and served in Korea (1955–57) before concentrating on a political career in his home state. Elected as a Democrat to the Massachusetts legislature in 1962, he became governor of the state in 1974. His first term was unsuccessful, marred by an unwillingness to compromise, and he was defeated in 1978. He returned in 1982, and was elected governor again. His second term coincided with the state's emergence as a centre of US high technology and its new-found prosperity helped assure his re-election with an increased majority in 1986. He captured the Democratic Party's presidential nomination, defeating JESSE JACKSON and presenting himself as a neo-liberal, but was defeated by GEORGE H W BUSH in 1988. In 1990 he retired from politics.

Dukas, Paul Abraham 1865–1935
French composer
He was born in Paris. Some of his music was classical in approach, but he tended mainly towards musical Impressionism, and is noted for the symphonic poem *L'Apprenti sorcier* (1897, 'The Sorcerer's Apprentice') and the opera *Ariane et Barbe-Bleu* (1907, 'Ariadne and Bluebeard'). He also wrote several orchestral and piano pieces, and was professor of composition at the Paris Conservatoire from 1927. He wrote some musicological books, and edited works by JEAN PHILIPPE RAMEAU and ALESSANDRO SCARLATTI.

Dulac, Edmund 1882–1953
British artist and book illustrator
Born in France, he is best known for his illustrations of classics and fairy tales. He designed the coronation stamp for 1937 and 1953.

Dulbecco, Renato 1914–
Italian virologist and Nobel Prize winner
Born in Catanzaro, he studied medicine at the University of Turin, and in 1947 he emigrated to the USA, securing appointments at Indiana University and then at the California Institute of Technology (Caltech). From 1972 to 1977 he was assistant director of research at the Imperial Cancer Research Fund, London. He then returned to the USA as professor of pathology and medicine at the University of California (1977–81), and since 1977 he has been Research Professor at the Salk Institute, La Jolla, of which he is currently president emeritus (1993–). Dulbecco demonstrated how certain viruses can transform some cells into a cancerous state, such that those cells grow continuously, unlike normal cells. For this discovery he was awarded the 1975 Nobel Prize in physiology or medicine, jointly with his former students, DAVID BALTIMORE and HOWARD TEMIN. He returned to Italy in 1993, and is president of the Institute of Biomedical Technologies in Milan.

Dulles, Allen Welsh 1893–1969
US intelligence officer
Born in Washington, DC, into a clerical family with diplomatic links, he was educated at Princeton. After working in Allahabad, India, he entered the US diplomatic service when his uncle, ROBERT LANSING, was Secretary of State. He had served at Vienna, Berne, Paris, Berlin and Istanbul by 1920. He was chief of Division of Near Eastern Affairs, Department of State (1922–26), and worked for a law firm with powerful international links from 1926 to 1942. In World War II he served in Europe with the US Office of Strategic Services (1942–45), and played an important part in arranging the surrender of Italian forces without Russian knowledge, as described in his *The Secret Surrender* (1966). When the TRUMAN administration decided on the formation of the Central Intelligence Agency (CIA), Dulles was made deputy director (1951), becoming director in 1953 coincident with his brother, JOHN FOSTER DULLES, becoming Secretary of State. Under his direction the Agency had some success in clandestine operations, assisting in right-wing coups in Guatemala and Iran which were believed to be in the US interest, but the 1961 disaster at the Bay of Pigs in the attempt to overthrow FIDEL CASTRO in Cuba was followed by his resignation. Two years later he served on the Warren Commission investigating JOHN F KENNEDY's death. He also wrote *The Craft of Intelligence* (1963).

Dulles, John Foster 1888–1959
US Republican politician
Born in Washington, DC, the brother of ALLEN WELSH DULLES, he was educated at Princeton and the Sorbonne. As a young lawyer from a family with a diplomatic tradition he attended the Hague Conference of 1907. At the Versailles Conference he was adviser to President WOODROW WILSON and was principal US spokesman on the Reparations Commission. During World War II he was a strong advocate of a world governmental organization. In 1945 he was adviser to Senator ARTHUR VANDENBERG at the Charter Conference of the United Nations, and later served as US delegate to the General Assembly (1946–48, 1950). In 1953 he became US Secretary of State. By the end of 1954 he had travelled nearly 180,000 miles and had visited more than 40 countries, signing treaties and agreements and drawing the attention of the Western nations more strongly to the threat of communism. In 1954 he launched the concept of SEATO (South-East Asia Treaty Organization) and backed the plan to bring West Germany into NATO. In 1956, after the nationalization of the Suez Canal by Egypt, he proposed the Suez Canal Users' Association, and later opposed the Anglo-French military intervention. His advocacy of the policies of 'massive retaliation' and 'brinksmanship' raised tensions in the Cold War and seemed at odds with his belief that a moral purpose should inform international affairs. He resigned in 1959. Possibly the most powerful Secretary of State ever seen in the USA up to that time, he was awarded the highest US civil decoration, the Medal of Freedom, shortly before his death from cancer. He published *War, Peace and Change* (1939) and *War or Peace* (1950). 🕮 Richard Goold-Adams, *John Foster Dulles: A Reappraisal* (1962)

Dulong, Pierre Louis 1785–1838
French chemist
Born in Rouen, he trained first as a doctor, and later became professor of chemistry and then of physics in Paris. In 1813 he discovered the explosive nitrogen trichloride. With ALEXIS THÉRÈSE PETIT he carried out research on heat and enunciated the law of the constancy of atomic heats (1819).

Dumas, Alexandre *See panel p476*

Dumas, Alexandre, *known as* **Dumas fils** 1824–95
French writer
He was born in Paris, the illegitimate son of ALEXANDRE DUMAS, and at the age of 16, after a course of training at the Institution Goubaux and the Collège Bourbon, he joined the literary society to which his father belonged. 'Dumas fils' began by writing fiction, then turned, with equal success, to drama and theoretical writings on art, morals, politics and even religion. His novels include *La Dame aux camélias* (1848, Eng trans *The Lady with the Camellias*, 1856) and *L'Affaire Clémenceau* (1864, Eng trans *Wife Murder; or, The Clémenceau Tragedy*, 1866), which was a great success in dramatic form (1852). Of his 16 plays, *Le Demi-monde* (1855, Eng trans 1921), *Les Idées de Mme Aubray* (1867, Eng trans *Mme Aubray's Opinions*, 1965), *Monsieur Alphonse* (1873, Eng trans 1874) and *Denise* (1885, Eng trans 1885) are notable. Other dramas in which he had a share include *Le Supplice d'une femme* (1865, 'The Torture of a Woman'), whose chaotic original is due to ÉMILE DE GIRARDIN. He may have assisted GEORGE SAND in preparing several of her works for the stage, and he completed and produced his father's *Joseph Balsamo* (1878). 🕮 F H Gribble, *Dumas, Father and Son* (1930)

Dumas, Jean Baptiste André 1800–84
French chemist
Born in Alais, he started his professional life as an apothecary there, but moved in 1816 to Geneva, where he studied pharmacy, chemistry and botany. In 1823 he returned to France, where he taught chemistry at the École Polytechnique and at the Athenaeum to adults in the evening. He also lectured occasionally at the Collège de France and gave instruction in a private chemical laboratory. In 1840 he became the editor of *Annales de chimie et de physique*. His most important contribution to science was his attempts to classify organic compounds. He developed a simple method for the determination of vapour density, and thus relative molecular mass, but interpretation of the data was confused by the lack of distinction between an atom and a molecule. In 1834 he proposed that many organic compounds are formed by substitution of hydrogen by another element. This theory was developed further by AUGUSTE LAURENT and CHARLES FRÉDÉRIC GERHARDT. After the Revolution of 1848 he was elected to the legislative assembly. He was minister of agriculture (1850–51) and later became a senator. He was also vice-president and president of the Paris Municipal Council. 🕮 Marcel Chaigneau, *Jean-Baptiste Dumas, sa vie, son œuvre, 1800–1884* (1984)

du Maurier, Dame Daphne 1907–89
English novelist and short-story writer
Born in London, the daughter of the actor-manager Sir GERALD DU MAURIER, she wrote a number of highly successful period romances and adventure stories. Many of them were inspired by Cornwall, where she lived, including *Jamaica Inn* (1936), *Rebecca* (1938), *Frenchman's Creek* (1942) and *My Cousin Rachel* (1951). Several of these have been filmed, and her short story 'The Birds' (published in *The Apple Tree*, 1952) became a classic HITCHCOCK movie. Later books include *The Flight of the Falcon* (1965), *The House on the Strand* (1969), *The Winding Stair*, a study of FRANCIS BACON (1976), *The Rendezvous and Other Stories* (1980) and a volume of memoirs, *Vanishing Cornwall* (1967). 🕮 *Growing Pains: The Shaping of a Writer* (1977, published in the USA as *Myself When Young*); M Forster, *Daphne du Maurier* (1993)

du Maurier, George Louis Palmella Busson 1834–96
British artist, cartoonist and novelist
Born in Paris, he was the grandson of émigrés who had originally fled to England during the French Revolution. In 1851 he went to London himself and studied chemistry, but returned to Paris to study art there, and later in Antwerp and Düsseldorf. Back in England he made his name as an illustrator, with new editions of THACKERAY's *Esmond* and his ballads, JOHN FOXE's *Book of Martyrs* and stories in periodicals like *Once A Week* and the *Cornhill Magazine*. He joined the staff of *Punch* (1864–96), and some of his illustrations were collected as *English Society at Home* (1880). He also wrote and illustrated three novels, *Peter Ibbetson* (1891), *The Martian* (1897) and the very successful *Trilby* (1894), the story of a young singer under the mesmeric influence of another musician, Svengali.

du Maurier, Sir Gerald Hubert Edward Busson 1873–1934
English actor-manager
He was born in London, and educated at Harrow. He left a business career for the stage. He played a small part in his father GEORGE DU MAURIER's *Trilby* (1895), but became known for criminal roles, starting with a dramatization of *Raffles* (1906). He became joint manager of Wyndham's Theatre (1910–25), and was knighted in 1922 for his services to the stage. He was manager of the St James's Theatre from 1926 until his death.

Dumont, Louis Charles Jean 1911–98
French social anthropologist
Born in Greece, he carried out fieldwork in southern India and became known for his studies of caste, as in *Homo hierarchicus* (1967), in which he distinguishes between the holistic, hierarchical ideology of traditional Indian society and the individualistic, egalitarian ideology of the modern West. The latter is explored in *Homo aequalis* (1977) and *Essais sur l'individualisme* (1983). His honours included the Académie Française prize (1984) and the Tocqueville prize (1987).

Dumont, Pierre Étienne Louis, *known as* **the Apostle of Benthamism** 1759–1829
Swiss churchman
Born in Geneva, he accepted the charge of the French Protestant church at St Petersburg in 1783. He became tutor in London to the sons of Lord Shelbourne (1785), his talents and liberalism recommending him to the Whigs. During the early years of the French Revolution he was in Paris, and became attached to Honoré, Comte de MIRABEAU, about whom he wrote in his *Souvenirs sur Mirabeau* (1832, 'Memories of Mirabeau'). In 1791 he returned to England and met JEREMY BENTHAM. Convinced of the value of Bentham's views on legislation, he obtained permission to edit his unpublished writings. The results appeared in his *Traité de législation civile et pénale* (1802), *Théorie des peines et des récompenses* (1811) and other works. Dumont returned to Geneva in 1814, and became a member of the Representative Council.

Dumont d'Urville, Jules Sébastien César 1790–1842
French naval explorer
Born in Condé, Calvados, he joined the navy in 1807. During hydrographic surveys of the eastern Mediterranean (1819–20) he secured the statue of the *Venus de Milo*, which had been found on the Aegean island of Mílos, for France. He first visited the Pacific as a member of the Louis-Isidore Duprey biological expedition (1822–5) and on his return proposed a second voyage. Sailing in the *Astrolabe*, he found the sunken remains of the Comte de LA PÉROUSE's ship on the reefs of Vanikoro and also collected much important information on the ethnic groups,

Dumas, Alexandre, *in full* **Alexandre Dumas Davy de la Pailleterie**, *known as* **Dumas père** 1802–70
French novelist and playwright

Dumas was born in Villers-Cotterêts, the son of General Alexandre Davy-Dumas and Marie Labouret, the daughter of a tavern keeper and landowner. He moved to Paris in 1823, working as a clerk and taking up writing. At the age of 27, he became famous for his play *Henri III et sa cour* (1829, 'Henry III and his Court'), performed at the Théâtre Français, which revolutionized historical drama. In 1831 he did the same for domestic tragedy with *Antony*, and scored a tremendous success with *Richard Darlington*. In 1832 he carried the romantic 'history' to its culmination in *La Tour de Nesle* (in collaboration with Gaillardet). In that same year he fell ill with cholera, went to Switzerland to recuperate, and wrote for the *Revue des deux mondes* the first of his famous and delightful travelogues called *Impressions de voyage*.

Having returned to Paris, Dumas took a conspicuous part in the Days of July; in 1837 he received the red ribbon; in 1842 he married Mlle Ida Ferrier, from whom he promptly separated. In 1855 he went into exile for two years at Brussels; from 1860 to 1864 he was helping GARIBALDI in Italy, and conducting and writing a journal, and in 1866 he produced the last but one of his plays. By this time he was ill and suffering from overwork. He had gone through a series of fortunes, and he left Paris for the last time with only a couple of napoleons in his pocket. He went to his son's villa in Dieppe, and stayed there until his death.

📖 Dumas was a prodigious worker, and his output was enormous. Only a selection can be mentioned here. It was as a storyteller on historical themes that he gained enduring success. He decided to put the history of France into novels, and his earliest attempt was *Isabelle de Bavière* (1836). It was followed by *Pauline* (1838), *Acté* (1839), *Othon l'archer* (1840) – and others on different lines. Then he turned again to the historical vein in *Le Chevalier d'Harmenthal* and *Ascanio* (1843).

In the 1840s, there appeared *Le Comte de Monte Cristo* (1844–45, *The Count of Monte Cristo*); the three works *Les Trois mousquetaires* (1844, *The Three Musketeers*), *Vingt ans après* (1845, 'Twenty Years After') and *Dix Ans plus tard ou le Vicomte de Bragelonne*, (1848–50, 'Ten Years Later; or, The Vicomte de Bragelonne'), which are set in the reign of LOUIS XIII and follow the adventures of d'Artagnan, who joins the king's musketeers and shares in the adventures of Athos, Porthos and Aramis; *La Fille du régent* ('The Regent's Daughter'); *La Reine Margot* (1845, Eng trans *Queen Margot*, 1845), about the religious wars of 16th-century France; *La Guerre des femmes* ('The War of the Women'); *Le Chevalier de Maison Rouge* (1845), about the Chevalier de Rougeville's plot to rescue Marie Antoinette; *Le Bâtard de Mauléon* ('The Bastard of Mauléon'); *La Dame de Monsoreau* (1846, 'The Lady of Monsoreau'); *Les Mémoires d'un médecin, Joseph Balsamo* (1846–48, 'The Memoirs of Dr Joseph Balsamo'); and *Le Collier de la Reine* (1849–50, 'The Queen's Necklace'), about the 'Affair of the Diamond Necklace'.

There followed works as varied as *La Tulipe noire* (1850, 'The Black Tulip'), *Le Trou de l'enfer* (1850) and *La Femme au collier de velours* (1851, 'The Lady with the Velvet Collar'); the historical masterpiece *Olympe de Clèves* (1852); and from 1852 to 1854 the ten delightful volumes of *Mes Mémoires*, and *Ange Pitou* (1851) and *La Comtesse de Charny* (1852–55). Other achievements in the romance of French history were *Ingénue* (1854), *Les Compagnons de Jéhu* (1857), *Les Louvres de Machecoul* (1859) and *Les Blancs et les bleus* (1867–68, 'The White and the Blue'), with which the sequence ended.

📖 Claude Schopp, *Alexandre Dumas* (1988); F W Hemmings, *Alexandre Dumas* (1980); A Craig Bell, *Alexandre Dumas* (1950).

Tous pour un, un pour tous.

'All for one, one for all.'

– From *Les Trois Mousquetaires*, ch.9 (1844).

plants and geology of the Pacific Islands, revising the majority of existing maps (1826–29). From 1837 to 1840 he sailed to the Antarctic via the Magellan Strait but was stopped by ice at 63° S. The following year he returned south from Tasmania, and this time, getting inside the ice barrier, he discovered Adélie and Joinsville Islands, so giving France its claim to Antarctica. He was promoted to rear admiral on his return. Forty-nine volumes of text and maps record his voyages.

Dumouriez, Charles François du Périer 1739–1823
French general
Born in Cambrai, he served during the Seven Years' War from 1757. He was imprisoned for trying to help dissidents in Poland, but in 1778 LOUIS XVI made him commandant of Cherbourg. In 1790 he became one of the Jacobins, and was appointed commandant at Nantes. He now attached himself to the Girondins and was appointed minister of foreign affairs in 1792, but resigned to command the northern army against Austria and Prussia. He prevented the allies from sweeping over Champagne, defeated the Prussians at Valmy (1792), and overthrew the Austrians at Jemappes. At Neerwinden (1793) he sustained a severe defeat from the Austrians. His leanings towards constitutional monarchy aroused the suspicion of the Revolutionists, and soon he was denounced as a traitor and summoned to Paris. To save his head he went over to the Austrian camp. After wandering through Europe he finally settled in England. Besides pamphlets, he wrote *Mémoires* (1794).

Dunant, Jean Henri 1828–1910
Swiss philanthropist and Nobel Prize winner
Born in Geneva, he inspired the foundation of the International Red Cross after seeing the plight of the wounded on the battlefield of Solferino (1859). His efforts brought about the conference at Geneva (1863) from which came the Geneva Convention (1864). In 1901, with FRÉDÉRIC PASSY, he was awarded the first Nobel Peace Prize. 📖 H N Pandit, *The Red Cross and Henry Dunant* (1969)

Dunaway, (Dorothy) Faye 1941–
US actress
Born in Bascom, Florida, she trained at the Boston University School of Fine and Applied Arts and made her Broadway debut in *A Man for All Seasons* (1962). She was signed to a personal contract with producer-director OTTO PREMINGER, and first appeared in his film *Hurry Sundown* in 1967. She quickly rose to fame, receiving a Best Actress Academy Award nomination for her performance in *Bonnie and Clyde* (1967). One of Hollywood's top leading ladies in the late 1960s and early 1970s, her impressive list of films includes *The Thomas Crown Affair* (1968), *The Three Musketeers* (1973), *The Towering Inferno* (1974), *Chinatown* (1974, Academy Award nomination) and *Network* (1976, Academy Award). Later notable performances include *Mommie Dearest* (1981) and *Barfly* (1987). She published her autobiography, *Looking for Gatsby*, in 1995.

Dunbar, Paul Laurence 1872–1906
US poet
Born in Dayton, Ohio, he was the son of escaped black slaves. He gained a reputation with *Lyrics of Lowly Life* (1896), many of which were in dialect. He published several other volumes of verse, and four novels. His *Complete Poems* appeared in 1913. 📖 A Gayle Jnr, *Oak and Ivy: A Biography of Dunbar* (1971)

Dunbar, William c.1460–c.1520
Scottish poet
Born probably in East Lothian, he seems to have studied at St Andrews University (1475–79). He became a Franciscan novice, and travelled widely in England before leaving the order. He then became secretary to some of JAMES IV's embassies to foreign courts. In 1500 the king gave him a pension. The following year he visited England, and as a courtier of James IV he wrote poems, including *The Thrissil and the Rois* and the *Lament for the Makaris*. In 1508 Walter Chepman (c.1473–1538) printed seven of his poems – the earliest specimen of Scottish typography. Dunbar also wrote satires, such as *The Tua Mariit Wemen and the Wedo* and *The Dance of the Sevin Deadly Synnis*. His name disappears from the records altogether after the Battle of Flodden (1513). 📖 J Baxter, *William Dunbar, a Biographical Study* (1952)

Duncan I c.1010–1040
King of Scots
He was the son of Bethoc and Crinan, Abbot of Dunkeld, and the grandson of MALCOLM II. He succeeded to Strathclyde in 1034 and

probably ruled over most of Scotland except the islands and the far north. He attempted southwards expansion, and a long and unsuccessful siege of Durham weakened his position. He was killed by MACBETH at Pitgaveney, near Elgin.

Duncan, Adam, Viscount 1731–1804
Scottish naval commander
Born in Dundee, he joined the navy in 1746, and commanded the *Valiant* in the sack of Havana (1762). He commanded the *Monarch* at Cape St Vincent (1780), and as admiral took command in 1795 of the North Sea Squadron to watch the Dutch fleet (Holland and France being at war with Great Britain). His blockade of the Texel was effective, and Dutch trade was almost ruined. In the spring of 1797 the mutiny of the Nore spread to Duncan's seamen, and his position was for some weeks critical, but in the autumn he gained an impressive victory over JAN DE WINTER at Camperdown.

Duncan, Isadora, *originally* **Angela Duncan** 1877–1927
US dancer and choreographer
Born in San Francisco, she travelled throughout Europe, performing her own choreography, and founded schools in Berlin, Salzburg and Vienna. A pioneer of modern dance, she based her work on Greek-derived notions of beauty and harmony, but also used running, skipping and walking movements. In Moscow (1922) she married a young Russian poet, SERGEI YESENIN, who later committed suicide. An influential and controversial figure, she held unconventional views for the time on marriage and women's liberation. She was accidentally strangled when her scarf caught in the wheel of her car. She published her autobiography, *My Life*, in 1926–27.

Duncan, Robert Edward, *originally* **Edward Howard Duncan** 1919–88
US poet
Born in Oakland, California, he was adopted by Theosophists in 1920 and named Robert Edward Symmes. Educated at the University of California, he was editor of *Experimental Review* (1938–40) and *Phoenix and Berkeley Miscellany* (1948–49). Aligned with the Black Mountain school of poets, and influenced by GEORGE BARKER and EZRA POUND, he wrote in a style that emphasized natural forms and processes. His collections include *Heavenly City, Earthly City* (1947), *The Opening of the Field* (1960), *Roots and Branches* (1964) and *The Years as Catches* (1966). His 1944 essay 'The Homosexual in Society' was an important document in the development of homosexual cultural politics. 🕮 *The Truth and Life of Myth: An Essential Autobiography* (1968)

Duncan, Thomas 1807–45
Scottish painter
Born in Kinclaven, Perthshire, he is best known for historical and genre works, many with a Jacobite flavour, such as *Prince Charles's Entry into Edinburgh after Prestonpans* and *Charles Edward Asleep after Culloden*.

Duncan-Sandys, Duncan Edwin Sandys, Baron 1908–87
British Conservative politician
He was educated at Eton and Magdalen College, Oxford, worked for the diplomatic service (1930–33), and in 1935 entered politics as MP for Norwood, London (1935–45), and later Streatham (1950–74). In 1951 he was made minister of supply in the CHURCHILL government and in 1954 became minister of housing and local government. He introduced the Clean Air Act and the concept of green belts around cities, and was the founder of the Civic Trust (1956). As minister of defence (1957–59) he inaugurated a controversial programme of cutting costs and streamlining the forces. He was subsequently minister of aviation (1959–60), secretary of state for commonwealth relations (1960–64) and secretary of state for the colonies (1962–64). In 1935 he married Diana, daughter of Sir Winston Churchill (divorced 1960). He published two books, *European Movement and the Council of Europe* (1949) and *The Modern Commonwealth* (1961).

Duncan Smith, (George) Iain 1954–
English Conservative politician
Born in Edinburgh, he was educated at Dunchurch College of Management, at the Royal Military Academy, Sandhurst, at the University of Perugia, Italy, and at HMS Conway Cadet School, Anglesey. He served with the Scots Guards (1975–81) and worked for GEC (1981–88), Bellwinch PLC (1988–89) and Jane's Information Group (1989–92) before becoming MP for Chingford in 1992. On the Eurosceptic right wing of the Conservative Party, he served as shadow social security secretary (1997–99) and shadow defence secretary (1999–2001), and in the wake of crushing electoral defeat in 2001 succeeded WILLIAM HAGUE as party leader. In 2006 he was appointed chair of the party's Social Justice Policy Group.

Dundas, Henry, 1st Viscount Melville and **Baron Dunira** 1742–1811
Scottish jurist and politician
Admitted to the Scottish Bar in 1763, he was successively advocate-depute and Solicitor-General. In 1774 he became MP for Midlothian, in 1775 Lord Advocate, and in 1777 Keeper of the Signet for Scotland. Elected in opposition to the then administration, he soon became a strenuous supporter of Lord NORTH and one of the most obstinate defenders of the war with America. When North resigned in 1781 Dundas continued as Lord Advocate under the Marquis of ROCKINGHAM. On the formation of the coalition he went over to WILLIAM PITT, the Younger, and became his ablest helper. When Pitt returned to power in 1784 Dundas was appointed president of the Board of Control, and introduced a bill for restoring the Scottish estates forfeited after the 1745 Jacobite Rebellion. He resigned with Pitt in 1801, and in 1802, under the Addington (see SIDMOUTH) administration, was made Viscount Melville and Baron Dunira. For 30 years he was the effective ruler of Scotland. In 1805 he was impeached for 'gross malversation and breach of duty' as Treasurer of the Navy, but was acquitted by his peers on all charges involving his honour.

Dundas of Arniston
Scottish family distinguished for their legal and political talent
Sir James Dundas, the first of Arniston, was knighted by JAMES VI AND I, and was governor of Berwick. His son, Sir James (d.1679), was a judge of the Court of Session under the title of Lord Arniston (1662), but was deprived of his office in 1663 for refusing to abjure the Covenant. His eldest son, Sir Robert (d.1726), was also a judge at the Court of Session, from 1689. The latter's son, Robert, was Solicitor-General for Scotland (1717), Lord Advocate (1720) and Lord President of the Court of Session (1748–53). His son, also Robert, was Solicitor-General for Scotland (1742), Lord Advocate (1754) and Lord President of the Court of Session (1760–87).

Dundee, John Graham of Claverhouse, 1st Viscount, *known as* **Bonny Dundee** or **Bloody Claverse** c.1649–1689
Scottish soldier
He served in both the French and Dutch armies as a professional soldier. In 1674 at the Battle of Seneff he is said to have saved the life of William of Orange (WILLIAM III). In 1677 he returned to Scotland, and became lieutenant in a troop of horse commanded by his kinsman, the Marquis of MONTROSE, against the Covenanters. At Drumclog (1679) he was routed by Covenanters, but three weeks later he commanded the cavalry at Bothwell Brig, where the Covenanters were defeated. From 1682 to 1685 he was active in hunting down Covenanters in the south-west of Scotland. When William III landed in England in 1688 at the start of the 'Glorious Revolution', Dundee marched into England in support of JAMES VII AND II. In Scotland, after leaving the Convention of 1689, he raised an army in the Highlands. He defeated the loyalist forces in a fierce encounter at Killiecrankie in July 1689, but in the process was mortally wounded. 🕮 Andrew Murray Scott, *Bonnie Dundee* (1989)

Dundonald, Earl of *See* COCHRANE, THOMAS

Dunér, Nils Christofer 1839–1914
Swedish astronomer
Educated at Lund, he became professor of astronomy at Uppsala and director of the observatory there (1888–1909). He made a study of variable and double stars and was an expert on stellar spectroscopy.

Dunham, Katherine 1909–2006
US dancer, choreographer and teacher
Born in Chicago, she studied anthropology at the University of Chicago and researched dance in the West Indies before her appointment as dance director of the Federal Theatre Project (1938). Her first New York concert in 1940 launched her career as a leading choreographer of African-American dances. She subsequently worked on Broadway (most importantly for the musical *Cabin in the Sky*, 1940) and in Hollywood on *Stormy Weather* (1943), while developing a successful formula for live black performance revues. Her Dunham School of Dance (1945–55) exerted considerable influence on the direction of African-American dance with its combination of elements of classical ballet, modern and Afro-Caribbean techniques. She choreographed for opera, toured extensively with her own company and wrote several books about her field. She published her autobiography, *A Touch of Innocence*, in 1959.

🕮 Veve Clark and Sara Johnson (eds), *Kaiso! Writings By and About Katherine Dunham (2006)*

Dunhill, Thomas Frederick 1877–1946
English composer and teacher
Born in London, he studied under CHARLES STANFORD at the Royal College of Music in London, and taught at Eton (1899–1908). In 1907 he organized concerts to publicize the works of younger British composers. He made his name with chamber works, songs and the light opera *Tantivy Towers* (1931) to words by AP HERBERT.

Dunlop, Frank 1927–
English stage director and administrator
He was born in Leeds and after founding and directing the Piccolo Theatre, Manchester (1954), he became an associate director of the Bristol Old Vic (1956). From 1961 to 1964 he was director of the Nottingham Playhouse, opening the first season in the new building. He directed *Saturday Night and Sunday Morning* in the West End (1965), and directed Pop Theatre, a company he founded himself, in *The Winter's Tale* and EURIPIDES's *The Trojan Women* at the Edinburgh Festival (1966). He became associate director at the National Theatre (1967–71) and also administrator (1968–71). He founded the Young Vic (1970), and was the company's director (until 1978, and 1980–83). He was director of the Edinburgh Festival for eight years (1984–91); his subsequent productions have included *The Invisible Man* (USA, 1998) and *Scapino* (Israel, 1999).

Dunlop, Joey (William Joseph) 1952–2000
Northern Irish motorcyclist
Born in Ballymoney, Antrim, he was an outstanding rider at Isle of Man Tourist Trophy (TT) races, winning 26 races between 1977 and 2000, including the Senior Tourist Trophy in 1985, 1987–88 and 1995. He won the Formula One TT for the sixth successive season in 1988, and was Formula One world champion (1982–86). In 1988, he set the TT lap record at 118.54mph (190.73kmph).

Dunlop, John Boyd 1840–1921
Scottish inventor
Born in Dreghorn, Ayrshire, he became a veterinary surgeon in Edinburgh and then Belfast (from 1867). He is generally credited with inventing the pneumatic tyre, having in 1887 fitted his child's tricycle-wheels with inflated rubber hoses instead of solid rubber tyres. The principle had already been patented, in 1845, by Scottish engineer ROBERT WILLIAM THOMSON, but in 1889 Dunlop formed the business that became the Dunlop Rubber Company Ltd, which produced commercially practical pneumatic tyres for bicycles and, later, motor cars.

Dunlop, Ronald Ossary 1894–1973
Irish painter
Born in Dublin, he was a member of the London Group, best known for his palette-knife painting with rich impasto and glowing colour. His work is represented in the Tate Collection, London, and many provincial galleries, and his writings on art include *Landscape Painting* (1954) and the autobiographical *Struggling with Paint* (1956).

Dunmore, Helen 1952–
English writer
Born in Yorkshire, she was educated at York University. Since her first poetry collection, *The Apple Fall* (1983), she has published poems and fiction for both adults and children. Her poetry includes *The Sea Skater* (1986), *Recovering a Body* (1994), *Secrets* (1995, Signal Poetry Award) and *Bestiary* (1997). Her fiction includes *Zennor in Darkness* (1994), *A Spell of Winter* (1995, Orange Prize), *The Siege* (2001), *Mourning Ruby* (2003) and *House of Orphans* (2006).

Dunn, Douglas 1942–
US post-modern dancer and choreographer
Born in Palo Alto, California, he studied dance while at Princeton, moving later to New York and the MERCE CUNNINGHAM studio. While working there (1969–73) he met YVONNE RAINER. As well as performing in her works (including *Continuous Project Altered Daily*, 1969–70), he joined her as one of the founders of the experimental dance group Grand Union, with which he was associated for six years until 1976. During that time, he made a solo piece, *101*, which required him to lie motionless for four hours a day, six days a week for two months. In 1977 he founded his own company and in 1980 created *Pulcinella* for Paris Opera Ballet. His fun-filled, original and loose-limbed choreography has been seen in later works such as *Landing* (1992), *Stucco Moon* (1994), *Caracole* (1995) and *Muscle Shoals* (2003).

Dunn, Douglas Eaglesham 1942–
Scottish poet
Born in Inchinnan, Renfrewshire, he was educated at the Scottish School of Librarianship and Hull University, where he was employed in the library simultaneously with PHILIP LARKIN, who became a friend and mentor. His first collection of poems, *Terry Street* (1969), articulates contempt and warmth in almost equal measure for the working-class suburb of Hull where he was then living. This was followed by *The Happier Life* (1972), *Love or Nothing* (1974) and *Barbarians* (1979), which echoed and extended his first collection. He returned to Scotland in 1984. His best-known volume, *Elegies* (1985), written on the death of his first wife, is a moving valediction, emotionally raw but tightly controlled. It won the Whitbread prize. Other books of poetry include *St Kilda's Parliament* (1981), *Dante's Drum-kit* (1993) and the long narrative poem *The Donkey's Ears* (2000). *Secret Villages* (1985) and *Boyfriends and Girlfriends* (1994) are collections of stories. His *New Selected Poems 1964–2000* appeared in 2002, and in 2003 he was awarded the OBE. He has been professor of English at St Andrews University since 1991.

Dunne, Finley Peter 1867–1936
US humorist
Born in Chicago, he worked as a journalist there, and was editor of the *Chicago Journal* (1897–1900). *Mr Dooley in Peace and War* (1898) established the character 'Mr Dooley', a Chicago Irish philosopher-bartender, and from 1900 Dunne was *the* exponent of US–Irish humorous satire on current personages and events.
🕮 E J Bander, *Mr Dooley and Mr Dunne: The Literary Life of a Chicago Catholic* (1981)

Dunne, Irene, *originally* **Irene Marie Dunn** 1898–1990
US actress
Born in Louisville, Kentucky, she trained at the Chicago Musical College, establishing herself as a musical-comedy star in her first Broadway appearance in *The Clinging Vine* (1922). Her Hollywood debut came with *Leathernecking* (1930) and she received the first of five Best Actress Academy Award nominations for the Western *Cimarron* (1931). An intelligent, versatile actress, she had many successes, including *The Awful Truth* (1937), *Love Affair* (1939) and *I Remember Mama* (1948). She retired in 1952 and served as an alternate delegate to the United Nations 12th General Assembly in 1957. An active charity worker, she was honoured for her lifetime achievement at the Kennedy Arts Center in 1985.

Dunne, John William 1875–1949
English inventor and philosopher
He designed the first British military aeroplane (1906–07) and wrote the bestselling speculative works *An Experiment with Time* (1927), *The Serial Universe* (1934), *The New Immortality* (1938) and *Nothing Dies* (1940).

Dunnett, Sir Alastair MacTavish 1908–98
Scottish journalist
Born in Kilmacolm, Ayrshire, he was educated at Hillhead High School, Glasgow, and joined the head office of the Commercial Bank of Scotland at the age of 17. He gave up his job to publish a magazine for Scottish boys, and though short-lived, this venture launched him on his journalistic career. He was chief press officer to the Secretary of State for Scotland (1940–46) and editor of the *Daily Record* (1946–55) before becoming editor of *The Scotsman* from 1956 to 1972, thereafter serving as chairman of Thomson Scottish Petroleum (1979–87). Intensely committed to his native country, he served with distinction on the boards of several national bodies. He co-wrote the autobiographical *Among Friends* (1984) with his wife, the novelist DOROTHY DUNNETT. He became a Fellow of the Royal Society of Arts in 1987 and was knighted in 1995.

Dunnett, Dorothy, *née* **Halliday** 1923–2001
Scottish novelist
Born in Dunfermline, Fife, and educated at James Gillespie's High School for Girls, Edinburgh, she began her career with the civil service as a press secretary in Edinburgh. In 1946 she married the journalist ALASTAIR DUNNETT. A recognized portrait painter from 1950, she exhibited at the Royal Academy and was a member of the Scottish Society of Women Artists. She used her maiden name for a series of detective novels, starting with *Dolly and the Singing Bird* (1968), but her best-known works comprise a series of historical novels, including *Game of Kings* (1961) and *Checkmate* (1975), which continue the Scottish tradition of historical romance. In 1986 she embarked upon a second historical series, this time featuring the house of Charetty and Niccoló, which ran to eight books.

Dunning, John Ray 1907–75
US physicist
Born in Shelby, Nebraska, he studied at Wesleyan University, Nebraska, and at Columbia University, New York, where he worked from 1933, becoming professor in 1950. In 1940 he confirmed NIELS BOHR's hypothesis that the slow neutrons required to maintain nuclear chain reactions would only result from the fission of ^{235}U, which would have to be separated from the more abundant ^{238}U to obtain fissionable material for the Manhattan atomic-bomb project. Dunning led the group which developed the gaseous diffusion technique, where the lighter ^{235}U passes through a diffusion filter faster than ^{238}U, leading to an increase in the ^{235}U concentration. This process provided most of the ^{235}U used in the atomic bombs dropped on Japan.

Dunning, William Archibald 1857–1922
US historian and educator
Born in Plainfield, New Jersey, he studied and taught at Columbia University, New York. His major work was a three-volume *History of Political Theories* (1916), spanning two thousand years of European thought, but his chief significance lies in his direction of doctoral research on American history. In particular the 'Dunning School' (apart from his prize pupil, ULRICH BONNELL PHILLIPS) produced detailed studies of individual states under Reconstruction.

Dunois, Jean d'Orléans, Count, *known as* **the Bastard of Orléans** 1403–68
French general
The illegitimate son of Louis, Duc d'Orléans, he was a general in the Hundred Years' War. He defeated the English at Montargis (1427), defended Orleans with a small force until its relief by JOAN OF ARC (1429), then inflicted further defeats on the English, forcing the Duke of Bedford from Lagny and chasing them out of Paris. By 1453 he had also liberated Normandy and Guyenne. He joined the league of nobles against LOUIS XI, but remained loyal to LOUIS XII.

Dunoyer de Segonzac, André *See* SEGONZAC, ANDRÉ DUNOYER DE

Dunsany, Edward John Moreton Drax Plunkett, 18th Baron 1878–1957
Irish novelist, poet and playwright
Born in London, and educated at Eton and Sandhurst, he served in the Second Boer War, and then settled in Ireland. In World War I he was an officer of the Inniskilling Fusiliers. By World War II, he was Byron Professor of English Literature at Athens, and was associated with the Irish revival led by W B YEATS and Lady GREGORY. He became known for his poetic and imaginative literary works, such as *The King of Elfland's Daughter* (1924), and his 'Jorkens' stories, beginning with *The Travel Tales of Mr Joseph Jorkens* (1931). At Yeats's invitation he wrote many plays for the Abbey Theatre, Dublin, including *The Laughter of the Gods* (1919), which became popular both in Great Britain and the USA. His verse is contained in *Fifty Poems* (1930) and *Mirage Water* (1939). He also wrote an autobiographical series (1938–49). 🕮 M Amory, *Lord Dunsany* (1972)

Duns Scotus, John, *Latin* **Joannes** c.1265–1308
Scottish Franciscan philosopher and theologian
His brief life is scantily documented. Born probably in Duns, Berwickshire, he became a Franciscan and was ordained priest in St Andrews Church, Northampton, in 1291. He studied and taught at Oxford and Paris, probably also in Cambridge, and finally at Cologne, where he died and was buried. His works, consisting mainly of commentaries on the Bible, ARISTOTLE and the *Sentences* of PETER LOMBARD, many incomplete, were later collected and edited (not always very responsibly) by his associates. The main works are now taken to be the *Opus Parisiense* (the Parisian lectures, as recorded by a student), the *Opus Oxoniense* (the Oxford lectures, also known as the *Ordinatio*, and probably revised by the author), the *Tractatus de Primo Principio* (Eng trans *A Treatise on God as First Principle*, 1966) and the *Quaestiones Quodlibetales*. His philosophy represents a strong reaction against both Aristotle and St THOMAS AQUINAS. He propounded the primacy of the individual (in the dispute about universals) and the freedom of the individual will. He saw faith as the necessary foundation of Christian theology, but faith was for him exercised through an act of will and was practical, not speculative or theoretical. He also pioneered the doctrine of the Immaculate Conception. He rivalled Aquinas as the greatest theologian of the Middle Ages – the Franciscans followed Scotus as the Dominicans did Aquinas – and was known by contemporaries as 'Doctor Subtilis' for his dialectical skill. In the 16th century the Scotists were ridiculed by the English Reformers, and dubbed 'Dunses' (hence 'dunce') for their defence of the papacy against the divine right of kings. More recently he has been admired by figures as diverse as CHARLES PEIRCE, MARTIN HEIDEGGER and GERARD MANLEY HOPKINS, who found him 'of realty the rarest veinèd unraveller'. 🕮 Efrem Bettoni, *Duns Scotus* (1961)

Dunstan, St c.909–988
Anglo-Saxon prelate
Born near Glastonbury, Somerset, he was educated at the abbey there, and took monastic vows. Appointed abbot of Glastonbury in 945, he transformed Glastonbury into a centre of religious teaching. An adviser of King EDMUND I, he fled during Edwy's reign, but was recalled by King EDGAR, who was now king of the country north of the Thames, and was created Bishop of Worcester (957) and of London (959). In that year, on Edwy's death, Edgar became king of all England, and immediately appointed Dunstan Archbishop of Canterbury. Dunstan strove to make the clergy real teachers of the people in secular as well as religious matters. He made the payment of tithes by landowners obligatory, and introduced the Benedictine rule into England. On Edgar's death he declared for EDWARD the Martyr, Edgar's elder son, and crowned him. On Edward's murder (978) ETHELRED succeeded, whose hostility ended Dunstan's political career. His feast day is 19 May.

Dunwoody, Richard 1964–
Northern Irish National Hunt jockey
Born in Ulster, the son of a jockey, he rode his first winner in 1983 and thereafter shadowed the success of the champion jockey PETER SCUDAMORE, until Scudamore retired in 1993. Dunwoody's highly impressive career includes victories at the Grand National (1986 and 1994), Cheltenham Gold Cup (1988) and the Champion Hurdle (1990). He retired in 1999. Since 1993 he has been vice-president of the Jockeys Association. He is the co-author of three books, *Hell for Leather* (1993), *Duel* (1994) and *Hands and Heels* (1997). In 2000 he published his autobiography, *Obsessed*.

Duparc, Henri, *in full* **Marie Eugène Henri Fouques-Duparc** 1848–1933
French composer
Born in Paris, he studied under CÉSAR FRANCK. Although he wrote a variety of works, he is remembered for his 15 songs, based on poems by BAUDELAIRE and others, which remain popular.

Dupleix, Joseph François 1697–1763
French colonial administrator
Born in Landrecies, he was appointed to a seat in the French East India Council in 1720. His skilful diplomacy among the native princes almost made the Carnatic a French province, and his power alarmed the English company. When war broke out in Europe between France and England, BERTRAND DE LA BOURDONNAIS, who had taken Madras, was bribed with £40,000 to restore it to the English on payment of a ransom. This Dupleix refused to accede to, and violent disputes resulted in La Bourdonnais' recall. Dupleix skilfully defended Pondicherry against Admiral BOSCAWEN's five-week attack, but his ambitious project of founding a French empire in India was frustrated by Sir ROBERT CLIVE. The French company refused to reimburse him for the vast sums he had spent out of his (alleged) private fortune, and he died in poverty and neglect in 1763.

Duplessis, Maurice le Noblet 1890–1959
French-Canadian politician
He led the Union Nationale to power in Quebec in 1936, gaining power through a methodical exploitation of nationalism and fear of anglicization, yet he encouraged further encroachments by US corporations on Quebec's economic life. His campaign against radical reformers gained him the support of the Catholic Church, which he retained almost throughout his political career. His attitude towards labour was expressed in the notorious Padlock Act of 1937, which crippled the socialist Cooperative Commonwealth Federation (CCF), but it was his antagonistic attitude towards federal government (which he claimed was invading provincial rights through the War Measures Act) which contributed most to his defeat in 1939, when Ernest Lapointe and other French-Canadian ministers threatened to resign if he was returned to office. He did regain power in 1944, defeating both the incumbent Liberals under Adélard Godbout and the extremist Bloc Populaire, and maintained his pre-war policies. An alliance between labour, professionals, academics, and even some churchmen, eventually succeeded in demonstrating the scale of corruption in his government and although Duplessis himself died suddenly

in 1959, the Union Nationale was defeated by the Liberals in 1960.

Dupond, Patrick 1959–
French dancer
Born in Paris, he was the youngest dancer ever accepted into the Paris Opéra Ballet (at the age of 15), and at 17 won top honours at the Varna international competition. In 1980 he was made *étoile*, and he has since been a guest performer with various companies around the world. An unconventional and mercurial virtuoso, one of his most notable roles was that of VASLAV NIJINSKY in JOHN NEUMEIER's tribute to the dancer (1979). From 1988 to 1990 he was artistic director of Ballet de Nancy, and from 1990 to 1995 he was artistic director of the Paris Opéra Ballet.

du Pont (de Nemours), Éleuthère Irénée 1771–1834
US industrialist
Born in Paris, the younger son of PIERRE-SAMUEL DU PONT DE NEMOURS, he worked in his father's printing plant until it was closed down in 1797. He emigrated to the USA (1800), and in 1802 established in Wilmington, Delaware, a gunpowder factory which developed into one of the world's largest chemical concerns. 🕮 William H Carr, *The du Ponts of Delaware* (1964)

du Pont (de Nemours), Pierre-Samuel 1739–1817
US economist
Born in Paris, France, he was a disciple of FRANÇOIS QUESNAY and expounded the theories of Quesnay's Physiocratic school in *Physiocratie* (1767). He was imprisoned in 1792 for his defence of LOUIS XVI, and he emigrated to the USA in 1799. He was approached by THOMAS JEFFERSON to create a new American education system, but this was never implemented; however it was adopted as part of the French educational code. He returned to France in 1802, where he became secretary to the provisional government, but finally settled in the USA in 1815. He also wrote *Origines et progrès d'une science nouvelle* (1768) and *Du pouvoir législatif et du pouvoir exécutif* (1795).

du Pont, Pierre Samuel 1870–1954
US businessman
Born in Wilmington, Delaware, he graduated from Massachusetts Institute of Technology (MIT) and joined the family gunpowder company. In 1902 he bought the company with his cousins, Thomas Coleman du Pont and Alfred Eugene du Pont, and decentralized many of its activities, although family control was maintained. As president (1915–20) he also introduced and developed many new industrial management techniques, including a systematic approach to strategic planning, control systems and the pioneering of modern industrial accounting methods. He became president of General Motors (GM) in 1920 after the du Pont company had rescued it from near bankruptcy. He reorganized GM and appointed ALFRED SLOAN, JNR, as its chief executive officer. 🕮 William H Carr, *The du Ponts of Delaware* (1964)

du Pont, Samuel Francis 1803–65
US naval officer
Born in Bergen Point, New Jersey, he joined the navy in 1815, and commanded a sloop during the Mexican War in the Gulf of California and off San Diego. In the Civil War he organized the blockade of the South Atlantic area by Federal naval forces, and captured the ports of South Carolina and Georgia. Unjustly blamed for the failure of the Federal attack on Charleston in 1863, he was relieved of his command.

du Pré, Jacqueline Mary 1945–87
English cellist
Born in Oxford, she studied at the Guildhall School of Music with William Pleeth (1916–99), with PAUL TORTELIER in Paris, PABLO CASALS in Switzerland and MSTISLAV ROSTROPOVICH in Moscow. She made her concert debut at the Wigmore Hall aged 16, and subsequently toured internationally. In 1967 she married the pianist DANIEL BARENBOIM. After developing multiple sclerosis in 1972 she pursued a teaching career, including master classes on television. 🕮 Carol Easton, *Jacqueline du Pré: A Biography* (1989)

Dupré, Marcel 1886–1971
French organist
Born in Rouen, he was chief organist at St Sulpice Church, Paris, and Notre-Dame Cathedral. He won the Prix de Rome for composition in 1914, and became a professor at the Paris Conservatoire in 1926. A gifted improviser, he composed many chorales and an organ concerto, and was acclaimed throughout Europe for his organ recitals. 🕮 Michael Murray, *Marcel Dupré, the Work of a Master Organist* (1985)

Dupuytren, Guillaume, Baron 1777–1835
French surgeon
Born in Pierre-Buffière, near Limoges, he was professor of clinical surgery in Paris from 1812, and surgeon to LOUIS XVIII and CHARLES X. He invented many surgical instruments, and devised surgical techniques for many conditions, including 'Dupuytren's contracture', in which fibrosis in the palm causes the retraction of the fingers.

Duquesne, Abraham, Marquis of 1610–88
French naval officer
Born in Dieppe, he distinguished himself from 1637 to 1643 in the war with Spain. Serving Sweden (1644–47) he became vice-admiral and won victories over a Danish–Dutch naval alliance. He returned to France and captured Bordeaux, which had declared for the Fronde (1650). He defeated MICHIEL DE RUYTER and MAARTEN TROMP several times (1672–73) and the united fleets of Spain and Holland off Sicily in 1676. On the revocation of the Edict of Nantes, Duquesne was the only Protestant excepted.

Duquesnoy, François 1597–1643
Flemish sculptor
He was born in Brussels. In 1618 he settled in Rome, where he worked under GIAN BERNINI on the famous baldacchino of St Peter's. His most important works are considered to be *St Andrew* (1629–40, St Peter's) and *St Susanna* (1629–33, Santa Maria di Loreto, Rome). He also produced many small bronzes, which helped to spread his reputation and make him one of the most famous non-Italian sculptors of his day. His comparatively restrained style, influenced by the Classicism of his friend NICOLAS POUSSIN, tempered some of the Baroque excesses of the time.

Durack, Dame Mary 1913–94
Australian author
Born into a pioneering Western Australian family in Adelaide, she wrote historical novels such as *Kings in Grass Castles* (1959) and its sequel *Sons in the Saddle* (1983). Other works include *The Rock and the Sand* (1969) and the play *Swan River Saga* (1975). She also wrote a number of books for children, some with illustrations by her younger sister, Elizabeth Durack (1915–2000). Her libretto for the opera *Dalgerie*, with music by Australian composer James Penberthy, was based on her own novel *Keep Him My Country* (1955) and was produced at the Sydney Opera House in 1973. Her husband was Horatio Clive ('Horrie') Miller (1893–1980), a pioneer of Australian aviation.

Duran *See* CAROLUS-DURAN

Durand, Alice *See* GRÉVILLE, HENRY

Durand, Asher Brown 1796–1886
US painter, engraver and illustrator
Born in New Jersey, as well as producing reproductions of the work of US artists, he made his own engravings of famous contemporary Americans. Between 1835 and 1840 he also painted portraits of eminent Americans. After a visit to Europe in 1840 he was associated with the Hudson River school and painted Romantic and dramatic landscapes. His graphic work strongly influenced the design of US paper currency.

Durand, Charles Auguste Émile *See* CAROLUS-DURAN

Durand, Marguerite 1864–1936
French feminist writer
Born in Paris, she became an actress at the Comédie-Française in 1881 but abandoned her acting career and married Georges Laguerre (1888), whom she later divorced. She became a feminist and was for a time vice-president of *La Ligue française pour le droit des femmes*. She established the first women's daily paper in the world, *La Fronde* ('The Insurrectionist'), and campaigned for better working conditions for women and for female suffrage. From 1908 until 1914 she was co-director of the Parisian newspaper *Les Nouvelles*. In 1922 she organized an exhibition on 19th-century women in Paris and five years before her death endowed a feminist archive, the Bibliothèque Marguerite Durand.

Durante, Jimmy 1893–1980
US comedian
Born in New York City, he played the piano and told jokes in saloons and nightclubs in the 1920s and performed on Broadway in the 1930s. A fixture in US show business for more than half a century, he appeared in many Hollywood films and had his own radio and television programmes. Known for his battered hat, gravelly voice and oversized nose (he was nicknamed 'Da Schnozz'), he often mangled and invented

Dürer, Albrecht 1471–1528
German painter and engraver

Albrecht Dürer was born in Nuremberg, the son of a goldsmith from Hungary. In 1486 he was apprenticed to MICHAEL WOLGEMUT, the chief illustrator of the *Nuremberg Chronicle*, and in 1490 started on travels that lasted four years. In 1497 he set up on his own; he completed many paintings, among them the Dresden triptych, and the Baumgartner altarpiece in Munich.

In 1498 he published his first great series of designs on wood, the illustrations of the Apocalypse. The copperplates of this period include *The Prodigal Son* (1500) and *Adam and Eve* (1504). From 1505 to 1506 he visited Venice, and there produced the *Feast of the Rosaries*, now the property of Strahow monastery, Prague. On or before his return he painted *Adam and Eve* (1507), now in Madrid; and the triptych *Assumption of the Virgin*, the centre of which was destroyed by fire in Munich in 1674. It was followed in 1511 by the *Adoration of the Trinity*, now in Vienna.

Dürer did much work for MAXIMILIAN I, including several portraits, and 43 pen-and-ink drawings for his prayer book. In his honour Dürer drew the *Triumphal Car* and (with others) the *Triumphal Arch*, which were engraved on wood, the latter on 92 blocks, forming a surface of 100 square feet (9.3m^2), the largest known woodcut.

From 1520 to 1521 Dürer visited the Netherlands. He met ERASMUS in Antwerp, and was present at the coronation of CHARLES V, who appointed him his court painter. During his later years he met MARTIN LUTHER and showed great sympathy with the Reformation.

As an engraver on metal and a designer of woodcuts he ranks even higher than as a painter. His work is distinguished by an unerring perception of the capabilities of the material, his metal plates being executed with extreme finish and refinement, while his woodcuts are boldly drawn with a broad expressive line. His copperplates, over 100 in number, include the *Small Passion* (16 plates, 1508–13); the *Knight, Death, and the Devil* (1513); *St Jerome in his Study* and *Melancholia* (1514). He may also be regarded as the inventor of etching, as he produced several plates in which all the lines are bitten with acid. He completed around 200 woodcuts, including the *Greater Passion*, twelve subjects; the *Small Passion*, 37 subjects; and the *Apocalypse*, 16 subjects. He also wrote several treatises on measurement and human proportion.

📖 F Anzelewsky, *Dürer: His Life and Art* (1983).

> 'He that would be a painter must have a natural turn thereto. Love and delight are better teachers of the Art of Painting than compulsion is.'
>
> – From *On Painting*. Quoted in William Martin Conway, *Literary Remains of Albrecht Dürer* (1889).

words and repeated trademark lines such as his sign-off 'Goodnight, Mrs. Calabash, wherever you are'.

Duras, Marguerite, *pseudonym of* **Marguerite Donnadieu** 1914–96
French novelist
Born in Gia Dinh, Indo-China, she studied law and political science at the Sorbonne in Paris, and during World War II took part in the Resistance at great risk to herself as a Jewess. Her novels include *Un Barrage contre le Pacifique* (1950, Eng trans *The Sea Wall*, 1952 (US); 1953 (UK)), *Le Vice-Consul* (1966, Eng trans *The Vice Consul*, 1968) and *Détruire, dit-elle* (1969, Eng trans *Destroy, She Said*, 1970). She also wrote film scripts such as *Hiroshima mon Amour* (1960, 'Hiroshima My Love') and a number of plays, including *La Musica* (1965, Eng trans *The Music*, 1966). The semi-autobiographical *La Douleur* was published in 1985 (Eng trans 1986), and *L'Amant* (1984, Eng trans *The Lover*, 1985) won the Prix GONCOURT. Remarkably, Duras, in her later life, survived a two-year period in a coma and continued to write. Her final novel, *C'est tout* ('That's All'), was published in 1995. She is considered one of the great European writers of the 20th century. 📖 A Cismaru, *Duras* (1971)

Durbin, Deanna, *originally* **Edna Mae Durbin** 1921–
Canadian entertainer
Born in Winnipeg, Manitoba, she and her family moved to California, where her singing voice attracted the attention of the Hollywood studios. She first appeared in the short film *Every Sunday* (1936), and became an immediate star with *Three Smart Girls* (1936). Already popular on radio, her sweet, girl-next-door image led to box-office success with such films as *One Hundred Men and a Girl* (1937), *Mad About Music* (1938) and *Three Smart Girls Grow Up* (1939). Her flair for comedy was evident in *It Started With Eve* (1941) and she gave creditable dramatic performances in *Christmas Holiday* (1944) and *Lady on a Train* (1945). She was for a time the highest-paid female star in the world, but made her last two films in 1948 and has enjoyed a long and contented retirement near Paris.

Durcan, Paul 1944–
Irish poet
Born in Dublin, he graduated in history and archaeology from University College, Cork, in 1973. His poems, which have won the Patrick Kavanagh award for poetry (1974) and the Whitbread Poetry award (1990), are direct statements of commitment to a relentless humanist standpoint. His publications include *O Westport in the Light of Asia Minor* (1975), *Teresa's Bar* (1976), the autobiographical *The Berlin Wall Café* (1985) and *Daddy, Daddy* (1990), the politically informed *A Snail in My Prime* (1993) and *The Art of Life* (2004). The loose long-line structure he assimilated from the US Beat Poets and the Russian Modernists often conceals the craft and passion that is the emotional trademark of all his work.

Durcansky, Ferdinand 1906–74
Slovak Populist Party politician
Upset by the union of Czechs and Slovaks in a single state in 1918, he was active in the 1930s in trying to negotiate Slovak independence. After the Munich Agreement he visited HERMANN GOERING and others in Berlin and was encouraged to make trouble for the rump Czechoslovak government in Prague. Eventually HITLER virtually ordered him and his superior, JOZEF TISO, to declare independence. This was the signal for the Nazis to sweep into Prague in 1939 and establish the Bohemian Protectorate. He was immediately made Slovak foreign minister, although about a year later he was dismissed as insufficiently compliant. Condemned to death in absentia in 1947, he spent the remainder of his life abroad.

Dürer, Albrecht *See panel above*

Durey, Louis 1888–1979
French composer
Born in Paris, he did not begin his musical education until he was 22. In 1916, under the influence of ERIK SATIE, he became one of the group of young French composers known as Les Six, but broke with them in 1921. He wrote large orchestral and choral works, but is chiefly known for his songs and chamber music.

D'Urfey, Tom (Thomas) 1653–1723
English dramatist and songwriter
He was born in Exeter, a nephew of HONORÉ D'URFÉ. He was a prolific playwright, and his comedies, which include *The Fond Husband* (1676), *Madame Fickle* (1677) and *Sir Burnaby Whig* (1681), were especially popular. In 1683 he published his *New Collection of Songs and Poems*, which was followed by a long series of songs, collected as *Wit and Mirth, or Pills to Purge Melancholy* (6 vols, 1719–20). Several plays he had written in the meantime were criticized as being immoral by JEREMY COLLIER. 📖 R S Forsyte, *A Study of the Plays of Thomas D'Urfey* (1916)

Durham, John George Lambton, 1st Earl of 1792–1840
English politician
Born in London, he served in the dragoons, and in 1813 became a Whig MP. In 1828 he was created Baron Durham. He became Lord Privy Seal (1830) and helped to draw up the Reform Bill. He was made an earl in 1833, and became ambassador to St Petersburg (1835). As Governor-General of Canada (1838), he resigned when the House of Lords voted disapproval of his amnesty to several of the French-Canadian rebels. His report on Canada (1839) advocated the union of Upper and Lower Canada, which was accepted in 1841.

Durkan, Mark 1960–
Northern Ireland politician
Born in Derry, Northern Ireland, he was educated at St Columb's College, Derry, Queen's University, Belfast, and the University of Ulster. He became assistant to Social Democratic and Labour Party (SDLP) leader JOHN HUME in 1984 and was

himself SDLP chairperson (1990–95). He played a key role in the so-called Good Friday Agreement and was elected to the Northern Ireland Assembly in 1998, representing Foyle. He became minister of finance in 1999 and in 2001 succeeded Hume as SDLP leader and became Northern Ireland's deputy first minister. He was re-elected to the suspended assembly in 2003, and retained his Westminster seat in the general election of 2005.

Durkheim, Émile 1858–1917
French sociologist
Born in Épinal, he was educated at the École Normale Supérieure, Paris, and he taught at the University of Bordeaux (1887–1902) and at the Sorbonne (1902–16). He was appointed to the first chair of sociology in France in 1913. He believed that sociology should be rigorously objective and scientific, and he developed a systematic sociological methodology based on the view that what he called 'social facts', that is, social phenomena, should be treated as 'things' to be explained solely by reference to other social facts, not in terms of any individual person's actions. This approach is presented in his methodological writings, such as *Les Règles de la méthode sociologique* (1894, 'The Rules of Sociological Method'), and is applied particularly in his study of suicide (1897). Also central to his work is his concept of 'collective representations', which explains how the social power of ideas stems from their development through the interaction of many minds. He is generally regarded as one of the founders of sociology.

Durrell, Gerald Malcolm 1925–95
English writer and naturalist
He was born in Jamshedpur, India. His interest in zoology was sparked off when his family moved to Corfu in the 1930s, where he kept a menagerie of local animals. As he wrote in his bestselling memoir, *My Family and Other Animals* (1956), it was like living 'in one of the more flamboyant and slapstick comic operas'. He combined writing with zoology, published many popular books, including the autobiographical *Birds, Beasts and Relatives* (1969), and made many expeditions and wildlife films. He founded the Jersey Zoological Park in 1959, about which he wrote *The Stationary Ark* (1976), and the Jersey Wildlife Preservation Trust in 1963. In 1976 he established the International Training Centre next to the Jersey Zoo, an educational institute for scientists and fieldworkers from all over the world. His discovery in Madagascar of an aye-aye – a lemur which was thought to have been extinct – is described in his book *The Aye-Aye and I* (1992). He was the brother of LAWRENCE DURRELL. 🕮 David Hughes, *Himself and Other Animals* (1997)

Durrell, Lawrence George 1912–90
English novelist, poet, travel writer and playwright
He was born in Jullundur, India, and sent to England to be educated at St Edmund's School, Canterbury. He took numerous odd jobs – in nightclubs, as an estate agent and in the Jamaica police – and once said he had been driven to writing 'by sheer ineptitude'. He convinced his family, who had moved back to England following his father's early death, that life would be more congenial in a warmer climate and they moved to Corfu until the outbreak of World War II, during and after which he travelled widely as a journalist and in the service of the Foreign Office. His first novel was *Pied Piper of Lovers* (1935) and his second, *Panic Spring*, appeared two years later under the pseudonym Charles Norden, so woeful were the sales of its predecessor. He made his name with the 'Alexandria Quartet' – *Justine* (1957), *Balthazar* (1958), *Mountolive* (1958) and *Clea* (1960) – a complex, interlocking series set in Egypt, remarkable for its sensuous language. The *Avignon Quincunx – Monsieur* (1974), *Livia* (1978), *Constance* (1982), *Sebastian* (1983) and *Quinx* (1985) – is conceived on a similarly grand and elaborate scale. He also wrote travel books, *Prospero's Cell* (1945) and *Bitter Lemons* (1957), verse (*Collected Poems, 1931–1974*), comic sketches, criticism, plays and a children's novel, *White Eagles Over Serbia* (1957). His long friendship with HENRY MILLER is recorded in their correspondence, published in 1988. 🕮 J Unterecker, *Lawrence Durrell* (1964)

Dürrenmatt, Friedrich 1921–90
Swiss writer
Born in Konolfingen, Bern, he studied there and at Zurich. The theme which recurs in all his work is that life is a calamity which has to be accepted for what it is but without surrender. His novels include the detective story *Der Richter und sein Henker* (1952, Eng trans *The Judge and His Hangman*, 1954) and *Die Panne* (1956, Eng trans *A Dangerous Game*, 1960), and his plays include *Romulus der Grosse* (1949, Eng trans *Romulus*, 1961) and *Die Ehe des Herrn Mississippi* (1952, Eng trans *The Marriage of Mr Mississippi*, 1958), which established his international reputation. The play *Ein Engel kommt nach Babylon* (1953, Eng trans *An Angel Comes to Babylon*, 1962) is a parable in which an angel brings chaos instead of happiness, and *Der Besuch der alten Dame* (1956, Eng trans *The Visit*, 1958) is a play which portrays the return of an old lady to her native village to revenge herself on a seducer. Later works include the plays *Die Physiker* (1962, Eng trans *The Physicists*, 1963) and *Porträt eines Planeten* (1970, Eng trans *Portrait of a Planet*, 1973), and a novel, *Der Sturz* (1971, 'The Fall'). 🕮 M B Peppard, *Dürrenmatt* (1969)

Durruti, Buenaventura 1896–1936
Spanish revolutionary anarchist
He was the most prominent violent activist to emerge from the ferocious urban guerrilla warfare in Barcelona (1919–23) between the employers (backed by the state) and the Confederación Nacional de Trabajo (CNT, the National Confederation of Labour). While in exile in Europe and South America (1923–31), he was the principal leader of the revolutionary Iberian Anarchist Federation (FAI). During the Second Republic, he agitated for an immediate revolution from below, and was frequently jailed. He led the anarchist militia in the Spanish Civil War until he was shot dead in 1936 in mysterious circumstances, probably by a Nationalist sniper. His funeral procession in Barcelona was the last great demonstration of strength by the anarchist movement.

Duruflé, Maurice 1902–86
French organist, teacher and composer
He was born in Louviers and showed considerable talent as an organist from an early age. Moving to Paris, he became an organ student of Louis Vierne (1870–1937) at the Conservatoire, and took lessons in composition from PAUL DUKAS. In 1930 he became the organist at St Étienne-du-Mont in Paris. Twelve years later he returned to the Conservatoire and soon became professor of harmony (1943–69). Included in his comparatively small but valuable and interesting oeuvre is his *Requiem*; clearly modelled on GABRIEL FAURÉ's, it is a thing of mystic beauty. Duruflé's *Three Dances for Orchestra* (1939) are arresting pieces and are sometimes programmed by adventurous orchestras.

Dury, Ian 1942–2000
English rock singer
Born in east London, he overcame physical disability resulting from childhood polio to emerge as a star performer during the punk era of the late 1970s. As the ebullient gravel-voiced frontman for Ian Dury and the Blockheads, he enjoyed repeated chart success with such hits as 'Sex and Drugs and Rock 'n' Roll' (1977), 'Hit Me with Your Rhythm Stick' (1978) and 'Reasons to be Cheerful' (1979). He pursued a solo career from 1980, and also worked as an actor.

Duse, Eleonora, *known as* **the Duse** 1859–1924
Italian actress
Born near Venice, she rose to fame in Italy, then triumphed (1892–93) throughout the European capitals, mainly acting in plays by IBSEN, contemporary French dramatists and the works of her lover, GABRIELE D'ANNUNZIO. She returned to the stage in 1921 after years of retirement. She ranks among the greatest actresses of all time. 🕮 Jeanne Bordeux, *Eleonora Duse: The Story of Her Life* (1925)

Dussek, Jan Ladislav 1760–1812
Czech composer and pianist
Born in Czaslau, Bohemia, he produced his earliest works for the piano in Amsterdam. After considerable success in London (1788–1800), he was instructor to Prince Louis Ferdinand of Prussia (1803–06), and in 1808 entered TALLEYRAND's service. He composed over 30 sonatas.

Dutrochet, (René Joachim) Henri 1776–1847
French physiologist
Born in Néon, he qualified in medicine at the University of Paris, becoming an army medical officer and serving as personal physician to JOSEPH BONAPARTE of Spain. After the Peninsular War he conducted researches in animal and particularly plant physiology. Dutrochet believed that life processes were to be explained exclusively in physicochemical terms. He isolated stomata, identified the role of chlorophyll in photosynthesis, and made wide-ranging studies of osmosis.

Dutt, Michael Madhu Sudan 1824–73
Indian poet
Born in Sagandari, Bengal, he absorbed European culture and became a Christian. He wrote poetry and drama in English and

Dvořák, Antonín Leopold 1841–1904
Czech composer

Dvořák was born near Prague, the son of a butcher. He worked for a time in the business, but showed such musical talent that he was sent to the organ school in Prague in 1857. In 1859 he began to earn his living playing the viola in an orchestra and giving lessons, but all the while he was composing in secret. It was not until 1873 that he attracted attention with his *Hymnus*, a nationalistic cantata based on Halek's poem *The Heroes of the White Mountain*. In 1873 he married, and from 1874 to 1877 was organist at St Adalbert's church in Prague, during which time he made a name for himself with several compositions which were promising enough to bring him to the notice of the authorities and secure him a state grant.

In 1877 BRAHMS became a member of the committee which examined the compositions of grant holders. He recognized Dvořák's talent and introduced his music to Vienna by sponsoring the publication of the *Klänge aus Mähren*, which were followed by the *Slavonic Dances* (1878), a commissioned work. Brahms's friendship was a great influence and stimulus in the life of the young composer. His work, basically classical in structure, but characterized by colourful Slavonic motifs, won increasing recognition, culminating in European acclaim for his *Stabat Mater* (1877), first performed in London in 1883. He had now written six symphonies and much chamber and piano music, and enjoyed a worldwide reputation. In 1891 he was offered the directorship of the New York Conservatory.

It was in the USA in 1893 that he wrote his Ninth Symphony, the ever-popular 'From the New World', containing themes redolent of American folk music yet retaining a distinct Slavonic flavour. The beautiful solo for cor anglais in the slow movement is firmly established as a world favourite among classical melodies. At this time he also wrote some of his best chamber music. He returned to Prague in 1895. The last period of his life was spent composing chiefly orchestral music, but he also wrote three more operas, including *Rusalka* (1901) and *Armida* (1904), which, like their predecessors, were not highly successful.

📖 P Young, *Dvořák* (1970); J Clapham, *Antonín Dvořák* (1966); A Robertson, *Dvořák* (rev edn, 1964).

In a letter to SIBELIUS, Dvořák wrote: 'I have composed too much.'

Bengali, such as the plays *Sarmishtha* (1858), *Padmavati* (1859) and the blank-verse epics *Tillotama* (1860) and *Meghanad-Badha* (1861). 📖 H M Das Gupta, *Studies in Western Influence on 19th Century Bengali Poetry* (1935)

Dutton, Geoffrey Piers Henry 1922–98
Australian poet, novelist, critic and editor
Born in Kapunda, South Australia, he began working in publishing after serving in World War II. His verse collections include *Night Flight and Sunrise* (1944), the prize-winning *Antipodes in Shoes* (1958) and *A Body of Words* (1977). Other works include the novels *The Mortal and the Marble* (1950), *Tamara* (1970) and *Queen Emma of the South Seas* (1976), and critical studies of PATRICK WHITE (1961) and WALT WHITMAN (1961). He also wrote three historical biographies of pioneering Australians, as well as art appreciation, short stories (*The Wedge-Tailed Eagle*, 1980) and books for children. His work as a scholarly and enthusiastic editor produced the acclaimed *The Literature of Australia* (1964, rev edn 1976) and representative anthologies of Australian verse. His history of the publishing house of Penguin Books in Australia, *Rare Birds*, was published in 1996.

Duun, Olav 1876–1939
Norwegian novelist
Born in Tosnes, he worked as a farmer and fisherman before training as a teacher, and the experience gave him a profound feeling for the lives of rural Norwegians. Between the Wars he became an important exponent of the new 'national language', *Landsmål* (later known as *Nynorsk* or New Norwegian), for which he was twice shortlisted for the Nobel Prize, but which has thwarted international translation and recognition of his work. He was immensely prolific, and his major fictional achievement is the massive six-volume *Juvikfolke* (1918–23, 'The People of Juvik'), which asserts human indomitability in the face of large-scale natural forces. 📖 A Overland, *Olav Duun* (1955)

Duval, Claude 1643–70
French highwayman
Born in Domfront, Normandy, he went to England at the Restoration (1660) in the train of the Duke of Richmond. Soon taking to the road, he pursued a successful career until, captured while drunk, he was hanged at Tyburn.

Duvalier, François, *known as* **Papa Doc** 1907–71
Haitian politician
Born in Port-au-Prince, he trained in medicine, and became director of the Public Health Service in 1946 and minister of health in 1949. After the military coup in 1950 he opposed the government, and in 1957 was overwhelmingly elected president of Haiti in army-supervised elections. His rule became increasingly autocratic and murderous, and saw the creation of the brutal civil militia of the so-called Tontons Macoutes. A professed believer in voodoo, he fought off invasions and threatened uprisings with US economic help. He was made president for life in 1964 and was succeeded by his son, JEAN-CLAUDE (BABY DOC) DUVALIER. 📖 E Abbott, *Haiti: The Duvaliers and Their Legacy* (1988)

Duvalier, Jean-Claude, *known as* **Baby Doc** 1951–
Haitian politician
He was born in Port-au-Prince, son of FRANÇOIS (PAPA DOC) DUVALIER. After studying law at the University of Haiti he followed his father into politics. At the age of 19 he became president for life, ruling, as had his father, through a private army. In 1986 he was deposed in a military coup led by General Henri Namphrey and went into exile in Grasse, in the south of France. Although he proclaimed his intention to return to Haiti for the 2006 elections, he never became a candidate.

Duvall, Robert Selden 1931–
US actor
Born in San Diego, California, he studied at the Neighborhood Playhouse in New York. His career as a character actor took off in the late 1960s and 1970s with films including *True Grit* (1969), *M*A*S*H* (1970), *The Godfather* (1972) and *The Eagle Has Landed* (1977), and he played the psychopathic surf-loving Lieutenant-Colonel Kilgore in *Apocalypse Now* (1979). He won an Academy Award for Best Actor in *Tender Mercies* (1983) and received an Emmy nomination for the television Western series *Lonesome Dove* (1989). He wrote, directed and starred in *The Apostle* (1997). 📖 Judith Slawson, *Robert Duvall: Hollywood Maverick* (1985)

Duve, Christian René de *See* DE DUVE, CHRISTIAN RENÉ

Duveen (of Millbank), Joseph Duveen, 1st Baron 1869–1939
English art dealer
Born in Hull, Yorkshire, he began by working in his father's antique shop, then developed a business in the USA specializing in Old Masters and established significant collections in the USA and Europe. He was a benefactor of the National Gallery, London, and gifted a gallery in the British Museum to house the Elgin marbles.

Dvořák, Antonín Leopold *See panel above*

Dvorák, Tomás 1972–
Czech athlete
Born in Zlín, Czech Republic, he became a specialist in the decathlon and won the bronze medal at the Olympic Games of 1996. He won the gold medal in the European Cup in 1995 and 1999, when he scored a world record of 8,994 points, and was also victorious in the world championships at Athens in 1997, at Seville in 1999 and at Edmonton in 2001.

Dwight, John c.1637–1703
English potter
He was born in Oxfordshire, and at his pottery in Fulham (1671–98) he patented a 'transparent earthenware' resembling porcelain, thus pioneering the English pottery industry.

Dwight, Timothy 1752–1817
US clergyman and educationalist
Born in Northampton, Massachusetts, he was taught by his mother before he went to Yale at the age of 13, graduating in 1769. Headmaster of Hopkins Grammar School in New Haven (1769–71) and a tutor at Yale from 1771, he was a chaplain with

the Continental Army during the American Revolution (1775–83), and thereafter became minister of Greenfield Hill, Connecticut, where he also ran an academy. In 1795 he was elected president of Yale and professor of divinity. His principal works are an epic poem, *The Conquest of Canaan* (1785), *Theology Explained and Defended* (1818) and *Travels in New England and New York* (1821). His grandson, Timothy Dwight (1828–1916), was also president of Yale from 1886 to 1899, and a member of the US committee for revising the English Bible.

Dworkin, Andrea 1946–2005
US feminist and critic
Born in Camden, New Jersey, and educated at Bennington College, she was an anti-war activist in the 1960s and escaped an abusive marriage before joining the contemporary women's movement. Her early publications include *Woman Hating* (1974), *Our Blood: Prophecies and Discourses on Sexual Politics* (1976) and *The New Woman's Broken Heart* (1980). Her crusade against pornography was detailed in *Take Back the Night: Women on Pornography* (1980) and *Pornography: Men Possessing Women* (1981), where she identified pornography as a cause rather than a symptom of a sexist culture. She portrayed contemporary society as one that promotes the hatred of women via debased images of them, and saw this as creating an atmosphere conducive to rape and woman-battering. This view is shared by CATHERINE MACKINNON, with whom Dworkin battled to have pornography legally condemned as an infringement of equal rights. Her later works include *Letters from a War-Zone 1976–1987* (1989), *Mercy* (1990) and *Heartbreak: The Political Memoir of a Feminist Militant* (2002).

Dybwad, Johanne 1867–1950
Norwegian actress and director
Born in Bergen, she trained there at the National Scene and made her professional debut in 1887. She quickly established a reputation as Norway's leading actress with her natural, unaffected style, and became the leading actress of the new National Theatre when it opened in Oslo in 1899, a position she retained for the next 40 years. She worked especially well with the great director Bjørn Bjørnson, and was particularly valued for her interpretations of IBSEN's plays. She also directed regularly from 1906, although she was sometimes criticised for a lack of fidelity to the works she undertook.

Dyce, William 1806–64
Scottish historical and religious painter
He was born in Aberdeen, and in 1825 went to Rome, where he developed sympathies with the German Nazarenes, which he transmitted to the Pre-Raphaelites. Professor of fine arts at King's College London from 1844, he executed frescoes in London in the new House of Lords, Osborne House, Buckingham Palace and All Saints', Margaret Street.

Dyck, Sir Anthony Van *See* VAN DYCK, ANTHONY

Dyer, Anson, *originally* **Ernest Anson-Dyer** 1876–1962
English animator
Born in Brighton, Sussex, he studied at Brighton Art School, and designed stained-glass windows before trying animation with a series of *Dicky Dee's Cartoons* (1915). For the Cartoon Film Company he produced the bi-monthly *John Bull's Animated Sketchbook* (1916), followed by ten *Kine Komedy Kartoons* (1917). After World War I he made a series of *Shakespeare Burlesques* (1920). In 1935 he began a series of colour cartoons based on the STANLEY HOLLOWAY character, *Old Sam*, his biggest popular success.

Dyer, Sir Edward c.1545–1607
English poet and diplomat
Born in Sharpham Park, Somerset, he studied at Balliol College or Broadgates Hall, Oxford, and became a courtier. He was a friend of Sir FULKE GREVILLE and Sir PHILIP SIDNEY; the latter wrote a song in praise of their friendship, while Dyer commemorated Sidney's death in a moving elegy. Only six of his poems have survived, of which the best known is 'My Mind to Me a Kingdom Is'. 🕮 R M Sargent, *At the Court of Queen Elizabeth: The Life and Hymns of Sir Edward Dyer* (1935)

Dyer, George 1755–1841
English writer
He was born in London and educated at Christ's Hospital and at Cambridge. In 1792 he settled in Clifford's Inn, London, and, together with 'poems' and a vast mass of hack work, produced the *History of the University of Cambridge* (1814) and *Privileges of the University of Cambridge* (1824). He contributed 'all that was original' to Valpy's classics (141 vols, 1809–31), and became totally blind soon after his life's work was done. 🕮 *The Poet's Fate* (1797)

Dyer, John 1699–1757
Welsh poet and painter
Born in Llanfynydd parish, Dyfed, he was educated at Westminster School. He abandoned law for art, and in 1725 published his most successful work, *Grongar Hill*, inspired by the scenery of the valley of the River Towy in Carmarthenshire. In 1750 he published *The Ruins of Rome*, and was ordained the following year. His longest work, *The Fleece* (1757), a didactic poem, is praised by WORDSWORTH in a sonnet. 🕮 'The Poems of John Dyer' and 'The Life of John Dyer' in Dr S Johnson, *The Lives of the English Poets* (1779–81)

Dyer, Reginald Edward Henry 1864–1927
British general
Born in Murree in the Punjab, India, of Irish parents, he was commissioned into the Queen's Royal Regiment before transferring to the Indian army. During World War I he commanded allied troops in south-east Persia, returning to India in 1917 to command a training brigade at Jullundur. There he gained a reputation as a strict disciplinarian and two years later was responsible for an incident which strained relations between the British and Indian nationalist politicians. Following an assault on a British lady missionary in Amritsar, Dyer banned all public meetings, but the order was disobeyed and troops fired into the crowd, killing around 400 people. An official enquiry blamed Dyer and he was forced to resign from the army. 🕮 Ian Colvin, *Life of General Dyer* (1951)

Dyke, Dick Van *See* VAN DYKE, DICK

Dyke, Greg(ory) 1947–
English television executive
Born in London, he worked in retail and journalism before reading politics at York University. He later built a successful career at London Weekend Television (LWT), and was recruited in 1983 as editor-in-chief of TV-am, whose failing fortunes he restored, partly by introducing the children's character Roland Rat. He returned to LWT in 1987. From 1989, he held posts at Channel 4, BSkyB, Pearson Television and Channel 5 Broadcasting. In 2000 he became director-general of the BBC, remaining there until his resignation in 2004 following the Hutton Inquiry. His tenure was marked by an informal, anti-bureaucratic approach. He became chancellor of York University in 2004. 🕮 *Inside Story* (2004)v

Dyke, Henry Van *See* VAN DYKE, HENRY

Dylan, Bob *See panel p485*

Dymoke, Sir John d.1381
English knight
By his marriage (c.1350) with the heiress of the MARMIONS he got the Lincolnshire manor of Scrivelsby, and became King's Champion at RICHARD II's coronation. The function (to challenge all comers to the king's title) was last exercised at GEORGE IV's coronation by Henry Dymoke (1801–65), but Dymokes bore the standard of England at the coronations of EDWARD VII, GEORGE V, GEORGE VI and Queen ELIZABETH II.

Dympna c. 9th century
Irish princess
She is said to have been killed by her pagan father in Gheel, Belgium, for resistance to his incestuous passion. She is the patron of the mentally ill.

Dyskolos *See* APOLLONIUS

Dyson, Sir Frank Watson 1868–1939
English astronomer
Born in Measham, Leicestershire, he was Astronomer Royal for Scotland (1905–10) and England (1910–33), and is known for his work on the distribution of stars and on solar eclipses.

Dyson, Freeman John 1923–
US physicist and author
Born in Crowthorne, England, he was educated at Cambridge and Cornell universities and went on to carry out research into nuclear engineering while based at the Institute for Advanced Study, alongside ROBERT OPPENHEIMER and others. He became best known, however, as a writer on science, interpreting complex scientific topics for the general reader. His influential writings on a diverse range of subjects have included the autobiographical *Disturbing the Universe* (1979), *Weapons and Hope* (1984), in which he discusses nuclear disarmament, and *The*

Dylan, Bob, *originally* **Robert Allen Zimmerman** 1941–
US singer and songwriter

Bob Dylan was born in Duluth, Minnesota. He was instrumental in the popular revival of the folk tradition in the early 1960s, when his work, with its overt social and political concerns, was greatly influenced by the pioneering folk-singer and songwriter WOODY GUTHRIE. His unconventional vocal style was immediately influential, and many of his songs, notably 'Blowin' in the Wind' and 'The Times They Are a-Changin'', were widely performed and imitated. Quickly tiring of his unsought role as spokesman for his generation, he turned in 1965 to rock-and-roll music with the group which later became The Band. The use of amplified instruments alienated many of his early admirers, initially at the Newport Folk Festival in 1965, and then on the infamous world tour of 1966, when he was accused of being Judas by a fan in England during a widely bootlegged concert.

Dylan soon reached a much wider rock audience, however, while songs like 'Mr Tambourine Man', 'Desolation Row', 'Subterranean Homesick Blues' and 'Like a Rolling Stone' had a profound influence. Self-consciously literary and often the product of his experiments with hallucinogenic drugs, they helped raise the latter form to new heights, and were treated by many critics as poetry, although his only novel, *Tarantula* (1971), was a reminder that songs were his forte. After a motorcycle accident in 1966 he briefly retired from public view, emerging to record more personal songs in a country-influenced style. The early 1970s saw a creative lull, but he returned to form in his records of the mid-1970s, which contain some of his most lasting work.

His subsequent conversion to evangelical Christianity (he was born into the Jewish faith) again alienated some of his audience, a controversy which obscured the quality of some of the music on his albums of the late 1970s and early 1980s, notably in songs like 'Precious Angel' and 'Every Grain of Sand'. He returned to Judaism in the 1980s. His collaboration with four other big-name musicians (including GEORGE HARRISON and ROY ORBISON) as The Traveling Wilburys (1988–91) was largely disappointing, and certainly did not achieve the sum of its parts. Numerous live albums, both legitimate and bootlegged, have been issued, and he has appeared in or directed a number of films, including the celebrated documentary *Don't Look Back* (1967), the concert film *Hard Rain* (1976) and the sprawling *Renaldo and Clara* (1978). Since the 1990s he has maintained a rigorous performing schedule on the so-called Never-Ending Tour. The expectation placed by fans and critics on each new release (despite the variable quality of his latter-day recorded work), and in particular the attention accorded *No Direction Home* (2005), a TV documentary filmed by MARTIN SCORSESE, confirm his status as one of the seminal influences on popular songwriting. He published his first volume of autobiography, *Chronicles*, in 2005.

♫ Major recordings include: *The Freewheelin' Bob Dylan* (1963), *Another Side of Bob Dylan* (1964), *Bringing It All Back Home* (1965), *Highway 61 Revisited* (1965), *Blonde On Blonde* (1966), *John Wesley Harding* (1968), *Nashville Skyline* (1969), *New Morning* (1970), *Planet Waves* (1973), *Blood On The Tracks* (1974), *Desire* (1975), *Street Legal* (1978), *Slow Train Coming* (1979), *Infidels* (1983), *Oh Mercy* (1989), *Time Out Of Mind* (1997), *Love and Theft* (2001), *Modern Times* (2006)

🕮 Nigel Williamson, *The Rough Guide to Bob Dylan* (2nd edn, 2006)

> Speaking at an induction dinner in the Rock and Roll Hall of Fame in 1988, BRUCE SPRINGSTEEN said: 'Bob freed your mind the way Elvis freed your body. He showed us that just because music was innately physical did not mean that it was anti-intellectual. He had the vision and the talent to make a pop record that contained the whole world'.

Sun, the Genome, and the Internet (1999). His many honours include being elected a Fellow of the Royal Society (1952) and receiving the Templeton Prize (2000).

Dyson, James 1947–
English designer
Born in Cromer, Norfolk, he studied at the Royal College of Art. He worked for the industrial-equipment manufacturer Rotork from 1970 to 1973, developing the Sea Truck high-speed landing craft, then left to become a freelance inventor, producing the Ballbarrow wheelbarrow and the 'bagless' Dyson Dual Cyclone vacuum cleaner, both of which enjoyed huge commercial success. He is founder and chairman of Dyson Research (1979–) and Dyson Appliances (1992–) and has won numerous international design awards, including the Queen's Award for Innovation in 2003. He was made a CBE in 1998.
🕮 *Against the Odds* (1997)

Dzerzhinsky, Felix Edmundovich 1877–1926
Russian revolutionary
He was born in Dzerzhmovo, near Minsk, of Polish descent. In 1897 he was exiled to Siberia for political agitation, fought in the Russian Revolution of 1905, and in 1917, as one of the organizers of the coup d'état, became chairman of the secret police and a member of the Bolshevik Central Committee until his death. After 1921 he also reorganized the railway system, and was chairman of the Supreme Economic Council (1924–26), trying to combine industrialization with good relations with the peasantry.

Dzierzon, Jan 1811–1906
Polish apiculturist
Born in Lowkowitz, Upper Silesia, he discovered parthenogenesis in bees and introduced a new type of hive. He wrote *Rationelle Bienenzucht* (1861).

E

Eadgar *See* EDGAR

Eadmer d.c.1124
English monk and historian
He was the devoted friend of Archbishop ANSELM, to whom he had been sent by Pope URBAN II. In 1120 at ALEXANDER I's request he became Bishop of St Andrews. He was the author of *Historia Novorum in Anglia* (c.1115) and a *Vita Anselmi* (c.1125, 'Life of Anselm').

Eads, James Buchanan 1820–87
US engineer and inventor
Born in Lawrenceburg, Indiana, he received little education due to frequent travelling, but read widely. He invented a diving bell and founded a salvage company that made a fortune from sunken river steamboats. In 1861 he built in 100 days eight iron-clad Mississippi steamers for the govern ment. He built the steel triple-arched Eads Bridge (1867–74) across the Mississippi at St Louis, with a central span of 520 feet (158.6m), and his works for improving the Mississippi mouth were completed in 1875–79. 🕮 Florence Dorsey, *Road to the Sea and the Mississippi River: The Story of James B Eads* (1947)

Eagleton, Terry (Terence Francis) 1943–
British literary critic
Born in Salford, Greater Manchester, he was a Fellow in English at Jesus College, Cambridge (1964–69), tutorial Fellow at Wadham College, Oxford (1969–89), and lecturer in critical theory and Fellow of Linacre College, Oxford (1989–92), before becoming Thomas Warton Professor of English Literature and Fellow of St Catherine's College, Oxford, in 1992. His works include *Criticism and Ideology* and *Marxism and Literary Criticism* (both 1976), *The Function of Criticism* (1984), *The Crisis of Contemporary Culture* (1993), *The Idea of Culture* (2000) and *Holy Terror* (2005). He is currently professor of cultural theory at the University of Manchester.

Eakins, Thomas 1844–1916
US painter and photographer
Born in Philadelphia, he was influenced by ÉDOUARD MANET and went on to become the leading US Realist painter. Fond of river scenes, he was a master of light effects. He introduced European educational techniques into the USA. In the 1870s he allowed both sexes to draw from the nude model at his class in the Pennsylvania Academy, and as a result was forced to resign. His interest in photography led him to extend the advances made by EADWEARD MUYBRIDGE in his studies of figures in motion, and his composite plates inspired MARCEL DUCHAMP's *Nude Descending the Staircase* (1912). Having a private income, he was never obliged to bow to the restrictive attitudes of the US art establishment.

Ealdhelm, St *See* ALDHELM, ST

Ealdred *See* ALDRED

Eames, Charles 1907–78 and **Ray**, *née* **Kaiser** c.1916–88
US designers and architects
Charles Eames was born in St Louis, Missouri. He started a course in architecture which he did not complete, then set up an office in 1930 as an architect and industrial designer. He taught at Cranbrook Academy of Art from 1936. He collaborated with colleagues EERO SAARINEN and Ray Kaiser on original furniture designs for a competition organized by ELIOT NOYES at the Museum of Modern Art, New York. The designs of this period used new materials such as moulded plywood, foam upholstery and steel rod frames with great versatility. He and Kaiser were married in 1941 and they set up an office in California. They displayed a great ability to communicate in all mediums, so much so that their Santa Monica House (1949) is almost the only building for which they are known. Constructed entirely from standard building components, it was a prototype of worldwide interest and a seminal building in postwar architecture, due to having industrial components in its construction and a contrasting light-hearted feel to it as a whole. They are best known for their range of furniture designed in 1946, and for such pieces as the 'Lounge Chair' produced with the manufacturer Herman Miller (1956), originally designed for BILLY WILDER. In 1979 the couple were awarded the RIBA (Royal Institute of British Architects) gold medal for their record of innovation and excellence in the fields of architecture, furniture design and, more recently, film, graphics and exhibition design.

Eanes, António Ramalho Dos Santos 1935–
Portuguese general and politician
He was born in Alcains. For his role in quashing the far left at the end of the revolution of 1974–75, he was promoted from an unknown colonel to chief of staff. His austerity associated him with the SALAZAR regime. In 1976 he was elected president as the principal non-Communist candidate. During his ten-year administration, he upheld the new democratic regime amidst the debilitating squabbles of the political parties, and his honesty won him wide popular support. From 1986 to 1987 he was leader of the Portuguese Democratic Renewal Party.

Eardley, Joan 1921–63
English painter
Born in Warnham, Sussex, she began her studies at Goldsmiths College of Art, London (1938), but moved to study at the Glasgow School of Art in 1940. After World War II she studied at Hospitalfield, Arbroath, and at Glasgow School of Art, winning various prizes and travelling to France and Italy on a CARNEGIE bursary. Greatly influenced by VAN GOGH, both technically and in terms of her choice of subjects, in 1949 she took a studio in Cochrane Street, Glasgow, and began to paint poor children of the nearby tenements. In 1950 she first visited Catterline, the tiny fishing village on the north-east coast of Scotland which inspired her finest landscapes and seascapes. She lived and worked there until her death.

Earhart, Amelia Mary 1897–1937
US aviator
Born in Atchison, Kansas, she was an army nurse and social worker before becoming the first woman to fly the Atlantic Ocean (from Newfoundland to Burry Point, Wales) on 17 June 1928. Although merely a passenger on that initial flight, she later became the first woman to fly solo across the Atlantic (1932) and the first person to fly alone from Hawaii to California (1935). Her records made her a celebrity and a spokeswoman both for commercial aviation and for feminism. In 1937 she attempted a round-the-world flight, but her plane disappeared in the Pacific somewhere between New Guinea and Howland Island. Her autobiography, *Last Flight* (1938), was published posthumously.

Early, Jubal Anderson 1816–94
US soldier
Born in Franklin County, Virginia, he commanded a Confederate brigade at Bull Run (1861) and a division at Fredericksburg and Gettysburg (1863). He was defeated three times (1864) by PHILIP SHERIDAN and GEORGE CUSTER on a raiding expedition down the Shenandoah Valley towards Washington, and was relieved of his command after a rout at Waynesboro. He fled to Canada, but returned in 1869 to his former profession as a lawyer in Virginia.

Earp, Wyatt Berry Stapp 1848–1929
US lawman and gunfighter
Born in Monmouth, Illinois, he served as assistant marshal in the Kansas cattle town of Dodge City, then moved (1878) to Tombstone, Arizona, where he worked as a Wells Fargo messenger, gambler and saloon guard, while his brother Virgil served as marshal. His falling-out with the Clanton gang led to the famous shootout at the OK Corral (1881). Though they were represented later in the stories of the Old West as the champions of law and order, at the time Wyatt and his friends were seen by the townspeople of Tombstone as little more than criminals.

East, Sir Alfred 1849–1913
English painter and etcher
He was born in Kettering, Northamptonshire, where there is a gallery devoted to his work. He studied at the Glasgow School of Art, and is best known for his landscapes of Japan, which he visited in 1889. From 1902 he produced a large number of etchings, and in 1906 he wrote *The Art of Landscape Painting in Oil Colour*.

Eastaway, Edward *See* THOMAS, (PHILIP) EDWARD

Eastham, George 1936–
English footballer
Born in Blackpool, he is more noted for the court case he pursued, *Eastham* v *Newcastle United and others*, than for his playing. Through this case, he established the right of professional footballers to freedom of contract. Heard in 1961, it led to a decision that the retain and transfer lists then operating were in restraint of trade and should be abolished. This outcome revolutionized the pay structure in association football.

Eastlake, Sir Charles Lock 1793–1865
English historical painter
Born in Plymouth, he studied under BENJAMIN HAYDON. He made his name with two full-length portraits of NAPOLEON I, sketched while a prisoner on HMS *Bellerophon* in Portsmouth harbour (1815). He produced many Italianate genre paintings, and became a director of the National Gallery from 1855. He is also remembered for his *Materials for the History of Oil Painting* (1847).

Eastlake, Charles Lock 1836–1906
English architect, furniture designer and writer
He was born in Plymouth, and became the protégé of his uncle, the painter Sir CHARLES LOCK EASTLAKE. He studied architecture at the Royal Academy, London, then studied art on the Continent, returning to England to write. Probably his most important book, *Hints on Household Taste in Furniture, Upholstery and Other Details* (1868) developed an aesthetic reasoning in reaction to 19th-century excesses. It was especially influential in the USA, where it, and the robust furniture it illustrated, gave rise to the 'Eastlake' style. Another major book, *A History of the Gothic Revival*, was published in 1872. He was assistant secretary of the RIBA (Royal Institute of British Architects) from 1866, secretary from 1871 to 1877, and a keeper at the National Gallery in London (1878–98).

Eastman, Crystal 1881–1928
US suffragette
She graduated from New York University with a law degree (1907), then spent a year in Pittsburg researching *Work Accidents and the Law*, which illuminated the plight of working families debilitated by industrial accidents. In 1909 she drafted New York's first worker compensation law, which was later used as a model nationwide, and in 1913 she founded the forerunner of the National Women's Party, which campaigned for the Equal Rights Amendment of 1923. She was also a founder of the Feminist Congress which convened in New York in 1919. After her second marriage she moved to England and she became involved in the women's rights movement there.

Eastman, George 1854–1932
US inventor and philanthropist
Born in Waterville, New York, and educated in Rochester, he turned from banking to photography, producing a successful roll-film (1884) and the 'Kodak' box camera (1888), and joining with THOMAS EDISON in experiments which made possible the moving-picture industry. He formed the Eastman Kodak Co. in 1892 and produced the Brownie camera in 1900. He was the founder of the Eastman School of Music in Rochester, New York. 🕮 Elizabeth Brayer, *George Eastman: A Biography* (1996)

Eastwick, Edward Backhouse 1814–83
English Orientalist
Born in Warfield, Berkshire, he worked for the East India Company then was appointed professor of Hindustani at Haileybury College (1845), and assistant political secretary in the India Office (1859). He was also secretary of legation in Persia in 1860–63, then later became MP for Penryn and Falmouth (1868–74). He produced many translations from the Persian, notably the *Gulistan* of SĀDI. He also produced a *Hindustani Grammar* (1847) and *Journal of a Diplomate in Persia* (1864), and translated FRANZ BOPP.

Eastwood, Clint(on), Jnr 1930–
US actor and director
Born in San Francisco, he worked as a lumberjack and lifeguard before being signed to a standard Universal contract, making his film debut in *Revenge of the Creature* (1955). He found television fame in *Rawhide* (1958–65) and then became an international star with three Italian-made 'spaghetti' Westerns, beginning with *Per un Pugno Di Dollari* (1964, *A Fistful of Dollars*). In the USA his box-office status was confirmed in adventure films and as tough detective *Dirty Harry* (1971). He was actor–director for the first time in the thriller *Play Misty for Me* (1971). Later films include *Pale Rider* (1985), *Bird* (1988), *Unforgiven* (1992, Best Director Academy Award), *In the Line of Fire* (1993) and *The Bridges of Madison County* (1995). His career enjoyed a late revival with *Mystic River* (2003, Best Director Academy Award nomination), *Million Dollar Baby* (2004, Best Director and Best Picture Academy Awards) and *Letters from Iwo Jima* (2006, Academy Award nomination). He has also composed music for some of his films. From 1986 to 1988 he was mayor of Carmel, California.

Eaton, Margaret, *known as* **Peggy**, *née* **O'Neill** 1799–1879
US socialite
She was born in Washington, DC, the daughter of an innkeeper. Her first husband died in 1828, and the following year she married John Henry Eaton, secretary of state for war under President ANDREW JACKSON. The wives of the other cabinet ministers refused to mix with her because of her alleged premarital intimacy with Eaton and because of her background, forcing Eaton to resign (1831) despite the strenuous efforts of Jackson, who even transferred his support to a presidential candidate, MARTIN VAN BUREN, favourably disposed towards her. A great social success in Europe when Eaton became ambassador to Spain (1836), after his death she married a young dancing instructor.

Ebadi, Shirin 1947–
Iranian lawyer, human rights activist and Nobel Prize winner
Born in Hamedan in north-western Iran, she studied law at Tehran University and went on to become the country's first woman judge. She was president of the Tehran city court from 1975 until, along with other female judges, she was forced to resign after the Islamic revolution of 1979. Since then she has written books on human rights and taken on many sensitive cases in her own law practice (established in 1992), representing the families of students killed by security forces and defending the rights of women and children. She was awarded the 2003 Nobel Peace Prize for her efforts for democracy and human rights.

Eban, Abba, *originally* **Aubrey Solomon** 1915–2002
Israeli diplomat and politician
Born in Cape Town, South Africa, he was educated at Cambridge University, and went on to teach oriental languages there before serving as a liaison officer at Allied HQ during World War II. By 1944 he was working in the Middle East Arab Centre in Jerusalem. In 1948 he became Israeli UN representative in New York, and he was responsible for the 1949 address to the General Assembly which resulted in Israel's acceptance into the UN. He then served as ambassador to Washington (1950–59). Returning to Israel in 1959, he won a seat in the Knesset and joined DAVID BEN-GURION's government. Between 1959 and 1974 he held several posts under various prime ministers, including that of foreign minister (1966–74). He remained a member of the Israel Labour Party in the Knesset until 1988. His publications include *Israel Through My Eyes* (1993). In 2001 he received the Israel Prize, the country's highest award.

Ebba, St, *also called* **St Abb** d.683
Northumbrian princess
The daughter of Æthelfrith, King of Northumbria, she founded the double monastery of Coldingham, and ruled it as abbess until her death.

Ebbinghaus, Hermann 1850–1909
German experimental psychologist
Born in Barmen, Prussia (Germany), he trained at the University of Bonn before becoming assistant professor at the Friedrich-Wilhelm University in Berlin and, from 1894, professor at the University of Breslau (Wrocław, Poland). He carried out pioneering experimental research on memory to investigate higher mental processes, and discovered the so-called 'forgetting curve' that relates memory failure to time. He published his findings in *Über das Gedächtnis* (1885, 'Memory').

Eberhardt, Isabelle 1877–1904
Russian writer and traveller
She was born near Geneva, where her mother Nathalie de Moender, a Russian general's wife, had fled with her lover, the anarchist Alexander Trophimovsky. She was reared as a boy, and spoke six languages, including Arabic. In 1897 she went to Bône (now Annaba) in Algeria with her mother, where they both converted to Islam and Eberhardt began journeying in the Sahara disguised as an Arab. Though an enthusiast for all things Arab, she worked for the French government of North Africa. After an assassination attempt on her failed, she was expelled from Algeria, but returned after she married Slimène Ehnni, an Arab. In 1903 she was drowned while reporting for an Algerian newspaper on General LOUIS LYAUTEY's campaign in Morocco.

Eberhart, Richard Ghormley 1904–2005
US poet
Born in Austin, Minnesota, he attended the University of Minnesota and Dartmouth College, New Hampshire, where he studied under ROBERT FROST, before going to England and St John's College, Cambridge. He started teaching, one of his pupils being ROBERT LOWELL. An important 20th-century US poet, he was the author of numerous collections, including *A Bravery of Earth* (1930), *Reading the Spirit* (1936), *The Quarry* (1960) and *Fields of Grace* (1972). With his *Selected Poems 1930–1965* he won a Pulitzer Prize in 1966, and with *Collected Poems 1930–1976* a National Book Award in 1977. A traditional, lyrical, reflective writer, deliberating upon the natural world and the cycles of life and death, he wrote in the romantic tradition of WILLIAM BLAKE, WORDSWORTH and WALT WHITMAN. His poems 'The Groundhog' and 'The Fury of Aerial Bombardment' have been much anthologized.

Ebers, Georg Moritz 1837–98
German Egyptologist and novelist
He was born in Berlin. Lecturer (1865) and professor (1868) at Jena, he visited the East in 1869, and from 1870 to 1889 was professor of Egyptology at Leipzig. He discovered and published (1875) the celebrated hieratic medical *Papyrus Ebers* ('Ebers Papyrus'), and wrote on biblical sites in Goshen, Sinai and Egypt. He is best known as the author of numerous historical novels based on ancient Egypt.

Eberst, Jakob *See* OFFENBACH, JACQUES

Ebert, Friedrich 1871–1925
German statesman
Born in Heidelberg, a tailor's son, he became a saddler there, then a Social Democrat journalist and Reichstag member (1912). Chairman of his party (1913), he was a leader in the Revolution of 1918–19. He was the first president of the German Republic (1919–25).

Ebert, Karl Egon 1801–82
Bohemian poet
He was born in Prague, and his poems include the national epic *Vlasta* (1829).

Eboussi-Boulaga, F
Cameroonian theologian
He was born in Cameroon and is a former director of studies at the Nkol-Bisson Seminary, Yaounde. He is concerned with the search for a faith relevant to Africans, and speaks in his book *Christianity without Fetishes* (1984) of the 'alienated belief' of African Christians, who need to understand Christ present in their own history and culture. This work offers an African critique of Christianity and seeks to reclaim an identity for the African Christian, a theme also addressed in *La Crise du Muntu: Authenticité Africaine et Philosophie* (1977).

Eça de Queirós, José Maria de 1845–1900
Portuguese novelist
He was born in Lisbon. He established realism in the Portuguese novel and was influenced by ÉMILE ZOLA and GUSTAVE FLAUBERT in his attempt to analyse what was wrong with his country's society. Though greatly admired in his own country, his work, in particular his masterpiece *Os Maias* (1888, Eng trans *The Maias*, 1965), has been neglected elsewhere. Other works include *O Crime do Padre Amaro* (1876, Eng trans *The Sin of Father Amaro*, 1962), *O primo Basilio* (1878, Eng trans *Cousin Basilio*, 1958), a variation on the theme of Flaubert's *Madame Bovary*, and *Cartas de Inglaterra* (1903, Eng trans *Letters from England*, 1970), these last written during his time in the consular service in Newcastle and Bristol. He died in Paris, where he served as consul-general from 1888. 🕮 Maria Filomena Monica, *Eça de Queirós* (2005)

Eccles, Sir John Carew 1903–97
Australian neurophysiologist and Nobel Prize winner
Born in Melbourne, he was educated at the universities of Melbourne and Oxford, where he collaborated with Sir CHARLES SHERRINGTON in papers on neural inhibition. He was director of the Kanematsu Institute of Pathology at Sydney University (1937), then professor of physiology at Otago University (1944–51) and the Australian National University, Canberra. In 1968 he moved to the State University of New York at Buffalo, and was latterly distinguished professor emeritus. His significant contributions to the neurosciences include the recording of the depolarization of a post-synaptic muscle fibre in response to a neural stimulus, the identification of inhibitory neurons, and the demonstration of how inhibitory synapses control the flow of information within the nervous system. He was awarded the 1963 Nobel Prize in physiology or medicine, with Sir ALAN HODGKIN and Sir ANDREW HUXLEY, for discoveries concerning the functioning of nervous impulses. He was elected FRS in 1941, knighted in 1958, and in 1990 was awarded the AC (Companion of the Order of Australia).

Ecevit, Bülent 1925–2006
Turkish writer and politician
Born in Istanbul, he studied in Ankara, in London and at Harvard. He worked as a government official and a journalist before becoming an MP for the centre-left Republican People's Party in 1957. He was minister of labour for four years, and in 1966 became secretary-general of his party and subsequently (1972) chairman. He became prime minister of a coalition government in 1974, during which he ordered the invasion of Cyprus. He resigned later that year over differences of opinion with the other coalition party. Briefly prime minister in 1977, he resumed the office in 1978 and imposed martial law on Turkey, but his government lasted for only 22 months. After the military coup of 1980, he was imprisoned twice for criticizing the military regime. He was re-elected to parliament in 1991, and in 1999 returned as prime minister at the head of a coalition government which held power until 2002. A distinguished poet and writer, he was a left-leaning nationalist politician committed to maintaining both Turkey's independence within NATO and the country's position as a secular Muslim nation.

Echegaray y Eizaguirre, José 1833–1916
Spanish dramatist and joint Nobel Prize winner
Born in Madrid, of Basque descent, he taught mathematics, held portfolios in various ministries (1868–74), then won literary fame through many plays in prose and verse. His plays are usually on simple themes, but with elaborate plot twists and rhetorical passages, and some incorporate social comment, as in his masterpiece, *El gran Galeoto* (1881, 'The Great Galeoto'). He was jointly awarded the Nobel Prize in literature (with FRÉDÉRIC MISTRAL) in 1904. The following year he returned to politics as minister of finance, and to science as professor of physics at Madrid University. 🕮 J Mathias, *Echegaray* (1970)

Echeverria, Estaban 1805–51
Argentine writer
Born in Buenos Aires, from 1826 until 1830 he lived in Paris, where he absorbed the essence of European Romanticism, which he later introduced to his country. His novella *El matadero* (1871, Eng trans *The Slaughter House*, 1959), written in about 1840, is one of the earliest of the great Latin-American anti-dictator documents; here the country is shown as an abattoir run by insane butchers. His famous poem is 'La cautiva' ('The Captive'). He died in exile because of his opposition to the dictator General JUAN MANUEL DE ROSAS.

Echeverría Alvarez, Luis 1922–
Mexican politician
He joined the Institutional Revolutionary Party and held many government posts, including secretary of the interior (1964–69). As president of Mexico from 1970 to 1976, he sponsored reforms such as land redistribution and the expansion of social security, but his administration was troubled by runaway inflation, high unemployment and a declining balance of trade. Between 2004 and 2005 he was twice unsuccessfully indicted for genocide during the so-called 'Dirty War' of the 1960s and 1970s, waged by his government against left-wing campaigners and activists.

Eck, Johann Mayer von 1486–1543
German Catholic theologian
Born in Egg, Swabia, he studied at Heidelberg, Cologne, Tübingen and Freiburg im Breisgau universities. As professor of theology at Ingolstadt (1510–43), he was the ruling spirit of that university. He disputed with MARTIN LUTHER at Leipzig in 1519,

wrote his *De Primatu Petri* and went to Rome in 1520, to return with the bull which declared Luther a heretic. He also disputed with JOANNES OECOLAMPADIUS at Baden and with PHILIP MELANCHTHON at Worms (1540).

Eckart, Johannes *See* ECKHART, JOHANNES

Eckener, Hugo 1868–1954
German aeronautical engineer
Born in Flensburg, he became a friend of FERDINAND VON ZEPPELIN and in 1911 was made a director of his airship company. In 1924 he piloted the ZR3, later called the *Los Angeles*, from Friedrichshafen to Lakehurst, New Jersey, on the first flight by an airship directly from continental Europe across the Atlantic. He built the *Graf Zeppelin* (1929), in which he circumnavigated the world, and made many other notable flights, including a polar expedition in 1931.

Eckermann, Johann Peter 1792–1854
German writer
He was born in Winsen, Hanover, and studied at Göttingen. After the publication of his *Beiträge zur Poesie* (1823, 'Contributions on Poetry') he moved to Weimar, where he assisted GOETHE in preparing the final edition of his works. He achieved fame with his *Gespräche mit Goethe in den letzten Jahren seines Lebens, 1823–32* (1836–48, Eng trans in part as *Conversations with Goethe*, 1839). 🕮 E Hitschmann, *Johann Peter Eckermann, eine psychoanalytisch-biographische Studie* (1933)

Eckert, J(ohn) Presper 1919–95
US engineer and inventor
Born in Philadelphia, he graduated in electronic engineering from the University of Pennsylvania, where he remained for a further five years as a research associate. From 1942 to 1946, with JOHN MAUCHLY, he worked on the Electronic Numerical Integrator And Calculator (ENIAC), one of the first modern computers. It weighed several tons, used thousands of valves and resistors, and required 100kW of electric power. He and Mauchly continued to develop improved versions of their computer, including UNIVAC I, which in 1951 became one of the first computers to be sold commercially. Eckert himself was granted more than 85 patents for his electronic inventions. He retired in 1989.

Eckhart or **Eckart, Johannes**, *also called* **Meister Eckhart** c.1260–1327
German theologian and mystic
Born in Hochheim, near Gotha, he entered the Dominican order, studied and taught in Paris. He acted as prior of Erfurt and as vicar of his order for Thuringia, was Dominican provincial in Saxony (1303–11), vicar-general of Bohemia (1307), and from 1312 preached at Strasbourg, Frankfurt and Cologne. Eckhart's teaching is a mystic pantheism, which influenced later religious mysticism and speculative philosophy. In 1325 he was accused of heresy by the Archbishop of Cologne, and two years after his death his writings were condemned by Pope JOHN XXII. His extant works consist of Latin and German sermons and tractates. 🕮 F E Copleston, *A History of Philosophy*, vol iii (1953); J M Clark (ed), *The Great German Mystics* (1949); *Meister Eckhart: An Introduction* (1957, with translations)

Eco, Umberto 1932–
Italian novelist and semiotician
Born in Alessandria, Piedmont, he was a student of philosophy at Turin University and was awarded a doctorate for his thesis on St THOMAS AQUINAS. He taught at Turin (1956–67), and was appointed professor of semiotics at the University of Bologna in 1971. Imbued with a 'taste and passion' for the Middle Ages, he undertook a prolonged study of the commentary of Beatus of Liébana, an 8th-century saint, on the Book of Revelation and of 11th-century illuminations, all of which bore fruit in his first novel, *Il nome della rosa* (1980, Eng trans *The Name of the Rose*, 1983). A suspense story set in a medieval monastery, centring on the criminal investigation of Brother William of Baskerville, an English Franciscan, it is indebted to ARTHUR CONAN DOYLE's Sherlock Holmes stories, despite having been described as 'a completely semiotic book'. It was an international bestseller and was successfully translated to the screen by the director Jean-Jacques Annaud in 1986. Eco's other novels include *Il pendolo di Foucault* (1988, Eng trans *Foucault's Pendulum*, 1989), *L'isola del giorno prima* (1994, Eng trans *The Island of the Day Before*, 1995) and *Baudolino* (2000, Eng trans 2002), set during the 13th century. He also continues to write books on semiotics and philosophy. 🕮 Michael Caesar, *Umberto Eco* (1999)

Edberg, Stefan 1966–
Swedish tennis player
Born in Västervik, he rose to prominence in 1983 by becoming the first player to win all four junior grand slam singles titles. He won the men's singles title at Wimbledon in 1988 and 1990. Other wins include the Australian Open (1985, 1987) and the US Open (1991–92). He retired from professional tennis in 1996, his last victory a doubles title with Petr Korda (1968–) at that year's Australian Open.

Eddery, Pat(rick James John) 1952–
Irish jockey
Born in Newbridge, Kildare, he was champion jockey eleven times between 1974 and 1996 and had several successes in the Classics, including Derby winners in 1975, 1982 and 1990. He also won the Oaks three times (1974, 1979 and 1996) and the St Leger four times (1986, 1991, 1994 and 1997). He had a particularly good record in France, winning the Prix de l'Arc de Triomphe in 1980, 1985, 1986 and 1987. He retired at the end of the 2003 flat season and now works as a trainer. He was awarded an honorary OBE in 2005.

Eddington, Sir Arthur Stanley 1882–1944
English astronomer
Born in Kendal, Westmorland (Cumbria), he studied at Manchester and Cambridge. He was appointed chief assistant at the Royal Observatory, Greenwich (1906), and Plumian Professor of Astronomy and Experimental Philosophy at Cambridge (1913), and in the following year also became director of the university observatory. His first book, *Stellar Movements and the Structure of the Universe* (1914), dealt with the kinematics and dynamics of stars in the Milky Way. In 1916 he deduced a theoretical relationship between the mass of a star and its total output of radiation, and suggested that extreme values of density may exist in stars such as white dwarfs. He published these investigations in *Internal Constitution of the Stars* (1926). Concurrently, he had become deeply interested in ALBERT EINSTEIN's theory of relativity, and published a nonmathematical account of the theory of relativity, *Space, Time and Gravitation* (1920), which he extended to his *Mathematical Theory of Relativity* (1923). He wrote a series of scientific books for the layman. In 1947 the Royal Astronomical Society instituted the Eddington Medal to be awarded for outstanding work on theoretical astronomy; the first recipient was the cosmologist GEORGES HENRI LEMAÎTRE in 1953. Eddington was awarded the gold medal of the Royal Astronomical Society in 1924, was knighted in 1930 and received the Order of Merit in 1938. He was president of the Royal Astronomical Society (1921–23) and at the time of his death was president of the International Astronomical Union. 🕮 A Vibert Douglas, *The Life of Arthur Stanley Eddington* (1956)

Eddington, Paul Clark 1927–95
English actor
Born in London and trained at RADA, he joined Birmingham Rep in 1945. After making his West End debut in *The Tenth Man* (1961), he rose to become one of Great Britain's most authoritative actors. He joined the National Theatre to play George in *Who's Afraid of Virginia Woolf?* (1981) and acted the headmaster in *Forty Years On* (1984), George in *Jumpers* (1985), Orgon in *Tartuffe* (1991) and Spooner in *No Man's Land* (1992). On television, he played Jerry in *The Good Life* (1975–77) and Jim Hacker in *Yes, Minister* and *Yes, Prime Minister* (1980–87), as well as straight roles in *The Prisoner* (1967), *The Camomile Lawn* (1992) and *King Henry IV* (1995). 🕮 *So Far So Good* (1995)

Eddy, Mary (Morse), *née* **Baker** 1821–1910
US founder of the Christian Science Church
She was born in Bow, New Hampshire, and brought up as a Congregationalist. After a brief first marriage (to George Glover, 1843–44), she was married a second time, in 1853, to Daniel Patterson (divorced in 1873). Frequently ill as a young woman, she later turned to faith healing and in 1862 came under the influence of Phineas P Quimby (1802–66). She developed the spiritual and metaphysical system she called Christian Science while recovering from a severe fall in 1866, and published her beliefs in *Science and Health with Key to the Scriptures* (1875), which proclaimed the illusory nature of disease. She married Asa G Eddy in 1877, and in 1879 founded at Boston the Church of Christ, Scientist, which attracted great numbers of followers. She founded various publica tions, including the *Christian Science Journal* (1883) and the *Christian Science Monitor* (1908). 🕮 Edwin F Dakin, *Mrs Eddy* (1929)

Ede (of Epsom), James Chuter Ede, Baron Chuter- 1882–1965
English politician
Born in Epsom, Surrey, he was educated at Epsom National School, Dorking High School, Battersea Pupil Teachers' Centre, and Christ's College, Cambridge. Assistant master at Surrey elementary schools (1905–14), he was elected MP for Mitcham (1923) and for South Shields (1929–31, 1935–64). As minister of education (1940–45) he helped to bring about the Education Act of 1944. He was home secretary (1945–51), during which time he introduced the Criminal Justice Act of 1948 and was involved in controversy on capital punishment. He was leader of the House of Commons in 1951. A nonconformist with a passion for political liberty, he was greatly depended upon by R A BUTLER for his knowledge of the local authorities.

Edel, (Joseph) Leon 1907–97
US scholar and biographer
He was born in Pittsburgh, Pennsylvania. A professor at New York University from 1955, he edited the works of HENRY JAMES and won the Pulitzer Prize for parts of his five-volume biography (1953–72) of James. His other books include biographies of JAMES JOYCE, WILLA CATHER and HENRY DAVID THOREAU, as well as literary histories such as *Bloomsbury: A House of Lions* (1979). He examined the art of biography in his book *Writing Lives: Principia Biographia* (1984), asserting that biography is a literary form in its own right, which must emulate the subtlety and structural inventiveness of fiction while remaining scrupulously faithful to the facts, a credo that is well borne out in his own works.

Edelfelt, Albert Gustav 1854–1905
Finnish artist
Born in Porvoeo, he worked in many different media in a naturalistic style. Among his best works are a portrait of LOUIS PASTEUR, *Christ and the Magdalene* and *Women in the Churchyard*.

Edelinck, Gerard 1649–1707
Flemish copper engraver
He was born in Antwerp and in 1665 he went to Paris, where he produced more than 300 engravings and portraits. His portrait of JOHN DRYDEN, after Sir GODFREY KNELLER, is his best-known work.

Edelman, Gerald Maurice 1929–
US biochemist and Nobel Prize winner
Born in New York City, he was educated at the University of Pennsylvania and at Rockefeller University, where he then became professor of biochemistry in 1966 and Vincent Astor Distinguished Professor in 1974. He purified the light chain from a human multiple myeloma, and reported the complete amino acid sequence (1969). He also analysed the antibody structure and the nature of the subunit interactions, subsequently investigating the number of antibody forms in different vertebrates. This work, together with RODNEY PORTER's studies in England, enabled a picture of a typical Y-shaped human immunoglobulin (IgG) antibody molecule to be established. For these discoveries they shared the 1972 Nobel Prize in physiology or medicine. Edelman's DNA interest continued in the 1970s with the development of a system for studying yeast plasmid DNA replication *in vitro*. His many books, including *Neural Darwinism* (1987) and *Second Nature: Brain Science and Human Knowledge* (2006), combine philosophy and physiology for popular and scientific audiences in proposing biological theories of consciousness. In 1992 he became chairman of the Department of Neurobiology at the Scripps Research Institute.

Eden, Sir (Robert) Anthony, 1st Earl of Avon 1897–1977
British statesman and prime minister
Born at Windlestone Hall, Bishop Auckland, County Durham, he was educated at Eton and Christ Church, Oxford. He won the MC in 1917, and became Tory MP for Warwick and Leamington (1923–57). In 1931 he became foreign under-secretary, in 1934 Lord Privy Seal and in 1935 foreign secretary. He resigned in 1938 following differences with the prime minister, NEVILLE CHAMBERLAIN, principally on the issue of the policy towards Fascist Italy. In 1940 he was CHURCHILL's secretary of state for war, issuing the historic appeal that brought the Home Guard into being. In 1940 he was foreign secretary again. Strenuous wartime work culminated in his leadership of the British delegation to the 1945 San Francisco Conference, which established the United Nations. With Labour in power from 1945 to 1951, he was deputy leader of the opposition, returning to the Foreign Office once more in 1951 in Churchill's government. He succeeded Churchill as prime minister in 1955, a year marked by the summit conference at Geneva with the heads of government of the USA, France and the USSR. In 1956 he ordered British and French forces to occupy the Suez Canal Zone ahead of the invading Israeli army. His action was condemned by the UN and caused a bitter and prolonged controversy in Great Britain, which did not subside when he ordered a withdrawal. In failing health, he abruptly resigned the premiership in 1957. He was created an earl in 1961. Regarded as one of the Western world's most experienced statesmen, he aimed principally for world peace based on respect for law. He wrote *Place in the Sun*, *Foreign Affairs* (1939), *Freedom and Order* and *Days for Decision* (1949), his memoirs (3 vols, 1960–65) and an account of his pre-political life, *Another World* (1976). 🕮 Sidney Aster, *Anthony Eden* (1976)

Eden, Dorothy 1912–82
New Zealand writer
She is best known for her suspense and historical novels, especially *Bride by Candlelight* (1954). Her early books, such as her first, *Singing Shadows* (1940), had a New Zealand setting. A move to London in the 1950s inspired contemporary themes such as Nazi Europe in *The Shadow Wife* (1968) and a spy plot in *Waiting for Willa* (1970). Her Gothic romances, mainly Victorian in period, ranged from England and Ireland to South Africa and China during the Boxer Rebellion. She returned to her home province of Canterbury after her 40th and last book, *An Important Family* (1982), was published.

Ederle, Gertrude Caroline 1906–2003
US swimmer
She won a gold medal at the 1924 Olympic Games, as a member of the US 400m-relay team, and two bronze medals. On 6 August 1926 she swam the English Channel from Cap Gris Nez to Kingsdown, the first woman to do so, in 14 hours 31 minutes, nearly two hours faster than the existing men's record. She later turned professional.

Edgar or **Eadgar** 944–75
English King
The younger son of King Edmund of Wessex, he was made King of Northumbria and Mercia (957) and succeeded to Wessex on his brother Eadwig's death (959), thus becoming ruler of a united England. He recalled St DUNSTAN from exile and made him his closest adviser and Archbishop of Canterbury. In 973 he was formally crowned and received the submission of all the kings in Britain. His reign was one of secure peace and prosperity, with the acceptance of the Danelaw as a separate but integral part of England, under his nominal authority. He is renowned for his legal codes, his coinage reform and his revival of the English Church. His two sons became EDWARD, the Martyr, and ETHELRED II (the Unready). 🕮 Helen Panter, *King Edgar* (1971)

Edgar the Ætheling c.1050–c.1125
English prince
Born in Hungary, the son of EDWARD THE ÆTHELING and grandson of EDMUND II, IRONSIDE, he was the legitimate heir to the English throne on the death of his great-uncle EDWARD THE CONFESSOR (1066). He was passed over as king in favour of HAROLD GODWINSSON, but after Harold's defeat and death at Hastings, some English nobles supported the Ætheling's claims against WILLIAM THE CONQUEROR, until he was compelled to submit to William (1067). In 1068 he fled to Scotland, where King MALCOLM III (Canmore) welcomed him and married the Ætheling's sister, St MARGARET. In 1074 the Ætheling made peace with William, and led the Norman expedition that conquered Apulia (1086) and an expedition to Scotland (1097) to depose the usurper Donald Bane and put Malcolm's son Edgar on the throne. He was captured by HENRY I (1106) but was released and spent his last years in obscurity.

Edgar, David 1948–
English dramatist
Born in Birmingham, he studied drama at Manchester University, and was a journalist in Bradford before deciding to write for the stage full time. *Destiny* (1976), a large-scale play looking at the roots of fascism in British society, was produced by the Royal Shakespeare Company (RSC). His eight-hour adaptation of DICKENS's *The Life and Adventures of Nicholas Nickleby* for the RSC (1980) brought his work to a massive audience and won awards in London and New York. *Maydays* (1983), the first contemporary play to be presented by the RSC at the Barbican Theatre in London, was similarly ambitious. Other works include *Entertaining Strangers* (1985), *The Shape of the Table* (1990), which charts the negotiations between a Communist government and the forces acting against it in the autumn of 1989, the television documentary *Civil War* (1991), the radio play *A Movie Starring Me* (1991), many adaptations, including *The Strange Case of Dr Jekyll and Mr Hyde* (1991), and the hit play *Pentecost* (1994), which deals with ethnic strife in

Edison, Thomas Alva 1847–1931
US inventor and physicist

Born in Milan, Ohio, he lost much of his hearing as a boy and had little formal training. He worked as a railroad newsboy on the Grand Trunk Railway, and soon printed and published his own newspaper on the train, the *Grand Trunk Herald*. During the Civil War he worked as a telegraph operator in various cities, and invented an electric vote-recording machine. In 1871 he invented the paper ticker-tape automatic repeater for stock exchange prices, which he then sold in order to establish an industrial research laboratory at Newark, New Jersey. In 1876 he moved the laboratory to Menlo Park, New Jersey, where he was able to give full scope to the astonishing inventive genius that won him the name 'the Wizard of Menlo Park'.

He took out more than 1,000 patents in all, including the gramophone (1877), the incandescent light bulb (1879), and the carbon granule microphone as an improvement for ALEXANDER GRAHAM BELL's telephone. To make possible the widespread use of electric light, he invented a system for generating and distributing electricity and designed the first power plant (1881–82). Amongst his other inventions were a megaphone, a storage battery, the electric valve (1883) and the kinetoscope (1891). He moved his laboratory to West Orange, New Jersey, in 1887, and in 1912 he produced the first talking motion pictures. He also discovered thermionic emission, formerly called the 'Edison Effect'. Tireless at experimentation but always practical and commercial in his goals, he was the most prolific inventor the world has ever seen.

📖 W Wachhorst, *Thomas Alva Edison: An American Myth* (1981); R Silverberg, *Light for The World* (1967); M Josephson, *Edison: A Biography* (1959).

> Often called the 'Wizard' or 'Genius' of Menlo Park for the invention factory he created in New Jersey, Edison is cited as the originator of the proverb 'Genius is one per cent inspiration, ninety-nine per cent perspiration' (c.1903). Quoted in *Harper's Monthly Magazine*, September 1932.

eastern Europe. He was appointed honorary professor by the University of Birmingham in 1992. He was commissioned to write his major two-part drama *Continental Divide* (2003) by the Oregon Shakespeare Festival and the Berkeley Repertory Theater.

Edgerton, Harold Eugene 1903–90
US electrical engineer
Born in Fremont, Nebraska, he became professor of electrical engineering at the Massachusetts Institute of Technology (MIT) in 1934. A specialist in stroboscopes and high-speed photography, he produced a krypton-xenon gas arc which was employed in photographing the capillaries in the white of the eye without hurting the patient.

Edgerton, Sidney 1818–1900
US politician
Born in New York City, he sat in Congress (1859–63), became first chief justice of Idaho Territory, and as such was a founder of the new state (1864) of Montana, of which he was made the first governor.

Edgeworth, Francis Ysidro 1845–1926
Irish economist
Born in Edgeworthstown, County Longford, the nephew of MARIA EDGEWORTH, he was educated at Trinity College, Dublin, and Balliol College, Oxford. Professor of political economy at Oxford (1891–1922), and first editor of the *Economic Journal* (1891–1926), he was perhaps the most outstanding mathematical economist of his time. He was best known for his *Mathematical Psychics* (1881), and he also carried out important work in the field of statistical theory.

Edgeworth, Maria 1767–1849
Irish novelist
Born in Blackbourton, Oxfordshire, the eldest daughter of the inventor and educationalist Richard Lovell Edgeworth (1744–1817), she was educated in England, then returned in 1782 to Edgeworthstown in County Longford, Ireland, where she became her father's assistant and governess to his many other children. With her father, and to illustrate his educational ideas, she wrote *Letters to Literary Ladies* (1795), *The Parent's Assistant* (1796) and *Practical Education* (1798). In 1800 she published her first novel, *Castle Rackrent*, which was an immediate success, followed by *Belinda* in 1801. She was praised by Sir WALTER SCOTT and was lionized on a visit to London and the Continent, where she turned down a proposal of marriage from the Swedish Count Edelcrantz for the sake of her father. The next of her 'social novels' of Irish life was *The Absentee* (1809), followed by *Ormond* (1817). All her works were written under the influence of her father, which may have inhibited her natural story-telling talent. After her father's death (1817) she did little more writing apart from a late novel, *Helen* (1834), but devoted herself to looking after the family property and to 'good works'. She is also remembered for her children's stories. 📖 P H Newby, *Maria Edgeworth* (1950)

Edinburgh, Prince Philip, Duke of 1921–
Consort of Queen Elizabeth II
The son of Prince Andrew of Greece and Princess Alice of Battenburg, grandson of GEORGE I of Greece and great-grandson of Queen VICTORIA, he was born in Corfu and educated at Cheam School, Gordonstoun and Dartmouth. He joined the Royal Navy (1939) as lieutenant Philip Mountbatten. In 1941 he joined HMS *Valiant*, on which he fought in the Battle of Cape Matapan, subsequently serving in the Pacific on HMS *Whelp*. In 1947 he became a naturalized British subject, and on 20 November 1947, as the Duke of Edinburgh, he married his third cousin, Princess Elizabeth, the future Queen ELIZABETH II. As a prince of Great Britain and Northern Ireland since 1957, he has shown a keen and occasionally outspoken interest in science and technology, as well as in youth adventure training, through the Duke of Edinburgh's awards, and world wildlife. He is also interested in sports, especially carriage driving. His speeches and essays were published in *Men, Machines and Sacred Cows* (1984). 📖 Basil Boothroyd, *Philip: An Informal Biography* (1971)

Edison, Thomas Alva *See panel above*

Edmonds, Noel 1948–
English television presenter
Born in Ilford, Essex, he joined Radio Luxembourg as a disc-jockey in 1968 while still a student teacher, moved to BBC Radio 1 in 1969 and, later, to television. His first success was the children's show *Multi-Coloured Swap Shop* (1976–81). Moving to peak-time, he became a regular fixture in the BBC's Saturday-evening ratings battle with ITV, presenting *The Late Late Breakfast Show* (1982–86) and *Noel's House Party* (1991–99), as well as hosting the long-running quiz show *Telly Addicts* (1985–98). He returned to television in 2005 with the successful Channel 4 game show *Deal or No Deal*.

Edmonds, Sarah Emma 1841–98
Canadian soldier
Born in Nova Scotia, she was a habitual cross-dresser who claimed to be 'naturally fond of adventure, a little ambitious and a good deal romantic'. These qualities led her not only to pose as a door-to-door Bible salesman among other exploits, but also to enlist as a man in the Union Army's Michigan regiment during the Civil War, under the name of Frank Thompson. She became known as the 'Beardless Boy' by fellow soldiers, and her talent for subterfuge led her to be frequently assigned to serve as a spy, on one occasion infiltrating the Confederate camp as a young black male cook. She also took on the role of nursing the fatally wounded, still in her masculine disguise, and proved that she could shoot in cold blood when necessary by firing a pistol at point-blank range into the face of a Confederate captain. Her autobiography, *Nurse and Spy in the Union Army* (1865), is a lively account of her contribution to the history of female impersonation of men as a means of access to masculine work.

Edmund, St c.841–870
King of East Anglia
According to tradition, he was the son of a Frankish king and succeeded OFFA of Mercia as his adopted heir. When the great Danish invasion of 865 entered East Anglia (870), Edmund met them at Hoxne, Suffolk, and was defeated and killed. Tradition claims that he was taken captive, and when he refused to abjure his Christian faith he was tied to a tree and shot to death with arrows by the pagan Danes. A miracle cult quickly sprang up and in 903 his remains were moved from Hoxne to Bury St Edmunds, which became a popular pilgrimage centre.

Edmund, St, *originally* **Edmund Rich** 13th century
English ecclesiastic and scholar
Born in Abingdon, Oxfordshire, he studied and taught at Oxford and Paris and, acquiring fame as a preacher, was commissioned by Pope GREGORY IX to preach the Sixth Crusade throughout England (c.1227). In 1234 he was made Archbishop of Canterbury, and became the spokesman of the national party against HENRY III, even threatening him with excommunication if he did not dismiss foreign favourites. But his gentleness, generosity, austerity and purity led to his authority being diminished by the arrival of the papal legate, Cardinal Otho, in 1237, and in 1240 he retired to the Abbey of Pontigny in France. The last Archbishop of Canterbury to be canonized, his feast day is 16 November. St Edmund Hall, Oxford, was named in his honour. 🕮 Lord Francis Hervey, *The History of King Eadmund the Martyr and of the Early Years of His Abbey* (1929)

Edmund I 921–46
King of the English
The son of EDWARD, THE ELDER, he succeeded his half-brother, ATHELSTAN, in 939. He re-established English control of Mercia against the Norse Vikings of Northumbria, and re-conquered from them the Five Boroughs of the Danelaw, whose Danish settlers now regarded themselves as English citizens. He subdued the Norsemen in Cumbria and Strathclyde, which he entrusted to MALCOLM I of Scotland as an ally. He was killed at Pucklechurch, Gloucestershire, by an outlawed robber. His reign saw the beginning of the 10th-century monastic revival.

Edmund II, Ironside c.990–1016
King of the English
The son of ETHELRED II, the Unready, and half-brother of EDWARD THE CONFESSOR, he was lord of most of Mercia from 1015. When KNUT SVEINSSON (Canute) invaded England that summer, Edmund was elected king by the beleaguered defenders of London on his father's death (April 1016), while Knut was chosen king by the Witan (Council) in Southampton. Edmund raised an army, reconquered Wessex and relieved London, before being routed by Knut in a fierce battle at Ashingdon in Essex. He agreed to partition the country, but died a few weeks later, leaving Knut as sole ruler. Edmund's elder son, EDWARD THE ÆTHELING, became the legitimate heir apparent to the throne of his uncle, EDWARD THE CONFESSOR.

Edmunds, George Franklin 1828–1919
US politician
Born in Richmond, Vermont, he sat in the state legislature and senate, and in the US Senate (1866–91). He took an active part in the prosecution of President ANDREW JOHNSON, and was author of the Edmunds Act for the suppression of polygamy in Utah.

Edrich, William John 1916–86
English cricketer
He was born in Lingwood, Norfolk. As a batsman he is always associated with his Middlesex partner, DENIS COMPTON, but took longer to develop. He played 39 Tests and in 1938 became one of a handful of players to have scored 1,000 runs before the end of May. With Compton he shared a record third-wicket Test partnership of 370 against South Africa at Lord's in 1947. After World War II he reverted to amateur status to make himself available for the England captaincy, but was never selected for the post.

Edrisi or **Idrisi** c.1100–1164
Arabic geographer
Born in Ceuta, he studied at Córdoba, and travelled in Spain, Barbary and Asia Minor. He then settled at the court of ROGER II of Sicily, who invited him to write a description of the Earth. To this end travellers were sent on journeys of exploration, and were asked to send him an account of all they had seen or heard. This occupied many years, and Edrisi's 'Description of the World' (*Nuzhat-el-Mushtāk*) or 'Book of Roger', as it was also called, was not completed till 1154. It is one of the principal medieval geographies.

Edward, St, *called* **Edward the Martyr** c.963–978
Anglo-Saxon King of England
The elder son of King EDGAR, he succeeded to the throne at the age of twelve (975). His accession provoked rival claims on behalf of his younger half-brother, ETHELRED II, the Unready, and in 978 he was treacherously murdered by Ethelred's household at Corfe Castle in Dorset. He was canonized in 1001. 🕮 Christine Fell, *Edward, King and Martyr* (1971)

Edward the Confessor c.1003–1066
King of England and saint
Born at Islip, Oxfordshire, he was the elder son of ETHELRED II, the Unready, by his wife EMMA, and half-brother of EDMUND II, IRONSIDE. In 1016 the English throne passed to KNUT SVEINSSON (Canute), who married Ethelred's widow, and had a son by her, HARDAKNUT KNUTSSON. Edward meanwhile went to Normandy (1016–41) and became very religious, taking a vow of chastity. Hardaknut recalled him to England (1041) and Earl GODWIN of Wessex helped him to the throne (1042). In 1045 he married Godwin's only daughter, Edith. His reign was marked by the conflict between the Norman party at court and the 'National' party led by Godwin and his son, Harold Godwinsson, later HAROLD II. Although his legitimate heir was EDGAR THE ÆTHELING (the grandson of Edmund Ironside), on his deathbed he allegedly nominated Harold Godwinsson as his successor. He was buried in Westminster Abbey, which he founded shortly before his death, and became the subject of a cult which saw him canonized in 1161. 🕮 Frank Barlow, *Edward the Confessor* (1970)

Edward I, *also known as* **Edward Longshanks** and **the Hammer of the Scots** 1239–1307
King of England
Born in Westminster, London, the elder son of HENRY III and ELEANOR OF PROVENCE, he married ELEANOR OF CASTILE (1254) and later Margaret of France, the sister of PHILIP IV (1299). He initially supported SIMON DE MONTFORT in the Barons' War (1264–67), but rejoined Henry III and defeated de Montfort at Evesham (1265). He became king on his father's death (1272), while away on the Eighth (and last) Crusade to the Holy Land (1270), but was not crowned until his return (1274). He annexed north and west Wales (campaigns in 1276–77, 1282–83) and tried to unite England and Scotland through the marriage of his infant son Prince Edward (later EDWARD II) to MARGARET, MAID OF NORWAY, Queen of Scotland. When Margaret died, he chose JOHN DE BALLIOL as king (1292) in preference to ROBERT DE BRUCE. However, Edward's insistence on full rights of suzerainty forced Balliol to refuse to recognize Edward and ally with France (1295), starting the Scottish Wars of Independence. Despite victories such as the defeat of WILLIAM WALLACE at Falkirk (1298), Edward could not subdue Scotland. ROBERT DE BRUCE (son of Robert de Bruce) had himself crowned King Robert I of Scotland at Scone (1306). Edward marched north, but died near Carlisle (1307). He was called the English JUSTINIAN for his improvement in the efficiency of royal justice, and several statutes (1275–90) reorganized the state both centrally and locally. He regularly summoned local representatives to central assemblies (such as the so-called 'Model' Parliament of 1295), which voted him useful revenues and gave him national approval for his actions. He expelled the Jews from England (they were not readmitted until 1655). 🕮 T F Tour, *Edward the First* (1893)

Edward II, *called* **Edward of Caernarvon** 1284–1327
King of England
Born in Caernarvon, Wales, the son of EDWARD I and ELEANOR OF CASTILE, he was created the first Prince of Wales in 1301. On his father's death (1307) he abandoned Edward I's plans to subdue the Scots and went to France (1308) to marry ISABELLA, daughter of PHILIP IV, leaving his foreign favourite, Piers Gaveston, Guardian of the Kingdom. Not an energetic ruler, Edward antagonized the barons, who wanted to regain their place in government and rid the country of such royal favourites. Edward invaded Scotland (1314), but was decisively defeated by ROBERT DE BRUCE at Bannockburn (1314). Bruce went on to capture Berwick (1318) and undid virtually every trace of the conquest of Edward I. Risings in Wales and Ireland followed, as did two seasons of unprecedented famine and pestilence. Edward's authority was challenged by Thomas, Earl of Lancaster, but with the aid of his new favourites, HUGH DESPENSER and his son, Edward, he overthrew Lancaster (1321) and put him to death (1322). He made a truce with Scotland for 13 years in 1323, but then CHARLES IV of France, brother of his wife, Isabella, seized Edward's French territories. Edward sent Isabella to negotiate with Charles, but she despised her husband, hated the Despensers, and had fallen in love with Roger de Mortimer, one of the disaffected nobles. In 1326 she landed with a large body of malcontents on the coast of Suffolk. The Despensers were executed, and Edward was imprisoned in Kenilworth Castle and forced to abdicate (1327) in favour of his eldest son (EDWARD III). He was murdered at Berkeley Castle. 🕮 Hilda Johnstone, *Edward of Caernarvon* (1946)

Edward III, *called* **Edward of Windsor** 1312–77
King of England
Born in Windsor, he was the son of EDWARD II, who was forced to abdicate in his favour (1327). During his minority the country

was governed by his mother, ISABELLA, sister of CHARLES IV of France, and her lover, Roger de Mortimer. Edward married PHILIPPA OF HAINAULT (1328), executed Mortimer, banished his mother and assumed full control of the government (1330). He successfully supported EDWARD DE BALLIOL against DAVID II of Scotland, and David sought refuge in France (1333–1341). Balliol failed to hold Scotland, and despite successive English invasions the Scots rallied each time. Edward then claimed the French crown, declared war against PHILIP VI (1337), and started the Hundred Years' War. He raised money for the war by tallages, forced loans, and by seizing wool, but was increasingly reduced to offering privileges in exchange for funds, which devalued royal authority and wrecked the country's public finances. He destroyed the French navy at Sluys (1340), and in 1346, with his son, EDWARD, THE BLACK PRINCE, conquered a large part of Normandy and defeated the French at Crécy. There were further successes, and Calais fell after a year's siege. Meanwhile the Scots had been defeated at Neville's Cross (1346), and David II was captured and imprisoned. In England, a third of the population died from the Black Death (1349). War in France was renewed (1355) with a great victory at Poitiers (1356), where King JOHN II of France was taken prisoner. Unable to raise his proposed ransom, he died in captivity in London (1364). A three-year truce was concluded in 1374, but Edward had failed to win the French crown, and his extravagance and constant betrayals of trust had alienated both parliament and public. His mistress, Alice Perrers, became increasingly influential, until his fourth (third surviving) son, JOHN OF GAUNT, took over the government. The Black Prince, opposed to his father's policy, died the year before the king. 🕮 M Packe, *Edward III* (1983)

Edward IV 1442–83
King of England
Born in Rouen, France, he was the eldest son of RICHARD, Duke of York, and bore the title Earl of March. His father Richard claimed the throne as the lineal descendant of EDWARD III's third and fifth sons (Lionel, Duke of Clarence, and Edmund, Duke of York), against the Lancastrian King HENRY VI (the lineal descendant of Edward III's fourth son, JOHN OF GAUNT). Richard was killed at Wakefield (1460), but Edward entered London (1461) and was recognized as king when Henry VI was deposed (1461). With the support of his cousin, Richard Neville, Earl of WARWICK, he defeated the Lancastrians at Towton (1461). He threw off his dependence on Warwick, and secretly married ELIZABETH WOODVILLE (1464), but Warwick forced him into exile in Holland (1470), and Henry VI regained the throne. Edward returned to England (March 1471), was restored to kingship (April), then defeated and killed Warwick at Barnet (April), and destroyed the remaining Lancastrian forces at Tewkesbury (May). Henry VI was murdered at the Tower of London soon afterwards, and Edward remained secure for the rest of his reign. Direct, straightforward and intelligent, he ensured his court rivalled the splendid court of Burgundy. He made his own decisions, periodically reviewed his grants of patronage, restored order, ended private war, subdued the nobility, and died solvent. In his financial reforms he foreshadowed the Tudors, but his advancement of his wife's family was to have serious repercussions in the royal minority that followed his death. 🕮 Charles Ross, *Edward IV* (1974)

Edward V 1470–83
King of England
Born in Westminster, London, he was the son of EDWARD IV and ELIZABETH WOODVILLE. When his father died (1483), he and his younger brother, the Duke of York, were left to the guardianship of their paternal uncle, Richard, Duke of Gloucester (the future RICHARD III). The Woodvilles (headed by Edward V's uncle, Anthony Woodville, 2nd Earl RIVERS) tried to gain influence over him, but Richard took Edward to London (May 1483), and the same month was appointed Protector. In June the Duke of York also reached London, and the two boys were placed in the Tower of London (then a royal residence as well as a prison). Parliament petitioned Richard to take over the throne the day after that originally set for Edward's coronation, and the 'Princes in the Tower' made no more public appearances. From about October 1483 there were rumours that Richard had had them murdered, and in 1674 some bones were discovered and reinterred as theirs in Westminster Abbey. In recent years it has been suggested that HENRY VII may equally have been responsible for their deaths. 🕮 Alison Weir, *The Princes in the Tower* (1992)

Edward VI 1537–53
King of England and Ireland
Born in London, the son of HENRY VIII and his third wife, JANE SEYMOUR, he was ten years old at his accession (1547). The government was at first in the hands of his uncle, EDWARD SEYMOUR, Duke of Somerset, who, as Lord Protector, attempted to resolve the economic, social and religious problems of the realm. The publication of the conservative first *Book of Common Prayer* (1549) was an important step towards the establishment of uniform observance in the newly reformed English Church, but it caused the Western Rebellion in the south-west. ROBERT KETT's rebellion in East Anglia in 1549 helped cause Somerset's fall; his moderate religious policy pleased neither adherents of the old faith nor the more zealous Protestants, while his cautious approach towards popular discontent worried those who advocated a harder line. He was executed (1552) and replaced by John Dudley, Earl of WARWICK, who had achieved great influence over the young king. Edward was highly intelligent, with a mind of his own, but his religious views were intensely narrow. A revised prayer book was produced, confirmed by a second Act of Uniformity (1552) and the Forty-Two Articles (1553) were intended to give the English Church a definitive creed. As the English Reformation flourished, the king's health, never robust, deteriorated suddenly, and Warwick persuaded the dying boy to alter the succession in favour of his own daughter-in-law, Lady JANE GREY. Edward died of tuberculosis, and Lady Jane Grey was overthrown after only nine days on the throne by his Catholic half-sister, MARY I. 🕮 W K Jordan, *Edward VI* (2 vols, 1968–70)

Edward VII 1841–1910
King of Great Britain and Ireland
The eldest son (Albert Edward) of Queen VICTORIA and Prince ALBERT, he was born at Buckingham Palace, London. He served a 60-year apprenticeship as Prince of Wales during his mother's long reign. He was educated privately, and also at Edinburgh University, Christ Church, Oxford, and Trinity College, Cambridge. In 1860 he made the first tour of Canada and the USA undertaken by a royal prince, and after his father's death (1861) took his seat in the House of Lords as Duke of Cornwall. In 1863 he married Princess ALEXANDRA, eldest daughter of CHRISTIAN IX of Denmark. Considered too frivolous for responsibility by his mother, he was devoted to social and leisure activities such as horse-racing, theatre-going and yachting. He had several mistresses, and caused a scandal by being cited as a witness in a divorce suit (1870). He succeeded to the throne in 1901 and was crowned the following year. As king he restored vitality and flair to the monarchy, and endeavoured to promote international friendship by visits to continental capitals, preparing the way for the Entente Cordiale with France (1904) and the Anglo-Russian agreement (1907). He and Queen Alexandra had six children: Albert Victor, Duke of Clarence (1864–92); George, later King GEORGE V; Louise, Princess Royal (1867–1931); Victoria (1868–1935); Maud (1869–1938), who married King HAAKON VII of Norway; and Alexander (born and died in 1871). 🕮 Sir Philip Magnus, *King Edward the Seventh* (1964)

Edward VIII 1894–1972
King of Great Britain and Northern Ireland
The eldest son of GEORGE V, he was born at White Lodge in Richmond, Surrey, and educated at Osborne, Dartmouth, and Magdalen College, Oxford. Invested as Prince of Wales (1911), he was in the navy and (in World War I) the army, travelled much, and achieved considerable popularity. He was forthright in his comments on poverty, especially in South Wales. He succeeded his father (20 January 1936), but abdicated (11 December) on account of general disapprobation of his proposed marriage to Mrs WALLIS SIMPSON. He was thereupon given the title of Duke of Windsor, and the marriage took place in June 1937. From 1940 to 1945 he was governor of the Bahamas, as described in his *A King's Story* (1951). After 1945 he lived in Paris and was not invited back to England with his wife to an official public ceremony until 1967. 🕮 Frances Donaldson, *Edward VIII: A Biography of the Duke of Windsor* (1975)

Edward, *called* **Edward the Elder** c.870–c.924
King of Wessex
The son of ALFRED the Great, he succeeded his father in 899. Tenacious and imaginative, he was the best Anglo-Saxon royal strategist. He brought back under English rule the whole of the Danelaw south of the Humber, building a series of fortresses to consolidate his rule. He took control of Mercia (918) after the death of his sister ETHELFLÆD (the 'Lady of the Mercians'), and subdued the Scots, the Norsemen in Northumbria and the Welsh Britons of Strathclyde.

Edward, Prince *See* **Wessex, Prince Edward, Earl of**

Edward the Black Prince 1330–76
English heir to the throne
Born in Woodstock, Oxfordshire, the eldest son of EDWARD III, he was created Earl of Chester (1333), Duke of Cornwall (1337) and

Prince of Wales (1343). While still a boy, he commanded the right wing at Crécy (1346), and is said to have won his popular title (first cited in the 16th century) from his black armour. He won several victories in the Hundred Years' War, including the great victory of Poitiers (1356). In 1361 he married his cousin, Joan, the 'Fair Maid of Kent' (1328–85), who bore him two sons, Edward (1365–70) and the future RICHARD II. In 1362 his father created him Prince of Aquitaine, and he lived there until 1371, when a revolt forced him to return to England. In 1367 he espoused the cause of PEDRO, the Cruel, of Castile and restored him to the throne, winning, at Najera, his third great victory and taking BERTRAND DU GUESCLIN prisoner. Worn out by sickness, he mercilessly sacked Limoges (1370), after which, mortally ill, he returned to England and took no further part in public life. A chivalric legend in his own lifetime, brave and inspirational, he tended to live beyond his means, and it is doubtful if he had the pragmatic realism necessary for medieval kingship. 🕮 Richard Barber, *Edward, Prince of Wales and Aquitaine* (1978)

Edward the Ætheling, Prince d.1057
English nobleman
He was the son of EDMUND II, IRONSIDE, and nephew of the childless EDWARD THE CONFESSOR. After Edmund's death (1016), he was taken for safe keeping to Hungary, where he had a son, EDGAR THE ÆTHELING. Edward the Ætheling was recognized as the proper heir to Edward the Confessor's throne, but he died shortly after landing in England (1057).

Edwardes, George 1852–1915
English theatrical manager
He was born, of Irish parents, in Clee, Lincolnshire. He became business manager at the Savoy Theatre, London (1881), leaving to enter into partnership with John Hollinshead at the Gaiety (1885), and taking over the sole management in the following year. In 1893 he built Daly's Theatre for AUGUSTIN DALY. He is known as the father of musical comedy, the form of which he standardized by his gift of foreseeing public taste and recognizing and developing talent. His many successes include *The Geisha*, *The Merry Widow*, *The Gaiety Girl* and *The Quaker Girl*.

Edwardes, Sir Michael Owen 1930–
British business executive
Born in South Africa and educated at Rhodes University, Grahamstown, he joined the Chloride Group of companies in Africa in 1951. In 1966 he first worked in Great Britain, as commercial director and then as general manager of Chloride's smallest subsidiary, Alkaline Batteries. He proved his skills in reviving an ailing company by defining sound business targets and building a team of competent and enthusiastic executives to achieve them. In 1974 he was appointed chairman of the Chloride Group, and in 1977 he was asked to rescue British Leyland, Britain's major motor manufacturer, from commercial collapse, a task considered to be virtually impossible. In five years, however, Edwardes's strong leadership and expectations of excellence had turned the company round. He described this experience in his book *Back from the Brink* (1983). He was knighted in 1979.

Edwards, Amelia Ann Blandford 1831–92
English novelist and Egyptologist
Born in London, she was the author of *My Brother's Wife* (1855), *Debenham's Vow* (1869) and *Lord Brackenbury* (1880). She founded the Egyptian Exploration Fund, and contributed papers on Egyptology to the principal European and US journals, and wrote *A Thousand Miles up the Nile* (1877) and *Pharaohs, Fellahs, and Explorers* (1891). 🕮 K S MacQuoid, *Amelia Blandford Edwards* (1897)

Edwards, Gareth Owen 1947–
Welsh rugby player
Born in Gwaun-cae-Gurwen, near Swansea, he was first capped for Wales in 1967 at the age of 19, and became their youngest-ever captain a year later. With BARRY JOHN and Phil Bennett he created the most famous Welsh half-back partnerships, and he also played full-back or centre. His 53 consecutive caps set a Welsh record. He played in ten Lions Tests, which included series victories against New Zealand in 1971 and South Africa in 1974. 🕮 With Peter Bills, *Gareth Edwards: the Autobiography* (2000)

Edwards, Sir George Robert 1908–2003
English aircraft designer
Born in Highams Park, Essex, he studied engineering at London University, then joined the staff of Vickers-Armstrong at Weybridge, where he was experimental manager in World War II. He became chief designer in 1945, responsible for designing Viking, Valiant, Viscount and Vanguard aircraft. His V1000, potentially the first transatlantic jetliner, was cancelled by the British government in 1956 shortly before its maiden flight. He was managing director and later chairman of the British Aircraft Corporation (1963–75) and was involved in negotiations over Concorde. He received the US Guggenheim award and the Royal Aeronautical Society gold medal and was awarded the Order of Merit in 1971.

Edwards, Jimmy (James Keith O'Neill) 1920–88
English comedian
Born in London, he performed with the Cambridge Footlights before serving in the RAF during World War II. His distinguishing feature was his huge handlebar moustache, worn to disguise the results of plastic surgery after his Dakota was shot down at Arnhem (1944). After the war he played Pa Glum in the hit radio series *Take It From Here* (1948–60), developing his bluff and blustering characterization, and headmaster 'Professor' James Edwards in the television series *Whack-O!* (1956–60, 1971). On television, he also played the title role in the series *John Jorrocks Esq.* His films included *Bottoms Up!* (1959), *The Plank* (1967), *The Bed Sitting Room* (1969) and *Rhubarb* (1970). 🕮 *Six of the Best* (1984)

Edwards, Jonathan 1703–58
American philosopher and theologian
Born in East Windsor, Connecticut, he was educated at Yale and succeeded his grandfather, SOLOMON STODDARD, as minister of the Congregationalist Church at Northampton, Massachusetts, in 1729. Renowned for his powerful preaching and hardline CALVINISM, expressed in sermons such as 'Sinners in the Hands of an Angry God' (1741), he helped inspire the revivalist movement known as the 'Great Awakening'. He was dismissed in 1750 for his zealous orthodoxy and became a missionary to the Housatonnuck people at Stockbridge, Massachusetts. In 1758, he became president of the College of New Jersey (now Princeton University). He is regarded as the greatest theologian of American Puritanism, his main doctrinal work being the *Careful and Strict Enquiry into the Modern Prevailing Notions of that Freedom of the Will* (1754). 🕮 Perry Miller, *Jonathan Edwards* (1949)

Edwards, Jonathan 1745–1801
US theologian
Born in Northampton, Massachusetts, he was the son of JONATHAN EDWARDS. Graduating from the College of New Jersey (now Princeton University), he became a pastor at White Haven, Connecticut (1769) and at Colebrook, Connecticut (1796), and president of the new college at Schenectady, New York, in 1799. His works include *On the Necessity of the Atonement* (1785) and *A Dissertation Concerning Liberty and Necessity* (1797).

Edwards, Jonathan David 1966–
English athlete
Born in London, he gave up work as a genetics research officer to specialize in the triple jump. He won the bronze medal in the event at the world championships of 1993 and in 1995 became the world champion, twice breaking his own world record to clear 18.29 metres. He won silver medals in the Olympic Games (1996), the world championships (1997 and 1999) and world indoor championships (2001) and further golds in the European championships (1998), the European indoor championships (1998), the Goodwill Games (1998 and 2001), the Olympic Games (2000) and the world championships (2001). He published *A Time to Jump* in 2000, and retired from athletics in 2003 to pursue a career as a television presenter. He was awarded the MBE in 1996 and the CBE in 2001.

Edwards, Jorge 1931–
Chilean author and diplomat
Born in Santiago and educated at the University of Chile and at Princeton University, his early career as a diplomat involved high-level posts in Cuba and France. His books include *Persona Non Grata* (1973), a disenchanted memoir of the Cuban revolution; *The Imaginary Woman* (1985), a novel; *Goodbye, Poet* (1993), a biography of his compatriot PABLO NERUDA; and *The Whisky of the Poets* (2000), a collection of short stories. He was awarded the Cervantes Prize, the highest award for Spanish literature, in 2000.

Edwards, Robert Geoffrey 1925–
British physiologist
He was educated at the universities of Wales and Edinburgh, and following a one-year research fellowship at the California Institute of Technology joined the National Institute of Medical Research, Mill Hill (1958–62). He moved to the University of

Glasgow (1962–63) and to Cambridge (1963–89), where he became Ford Foundation Reader in Physiology (1969–85) and professor of human reproduction (1985–89). His experimental researches focused on the mechanisms of human fertility and infertility, and the process of conception. In collaboration with PATRICK STEPTOE he contributed substantially to the successful development of the *in vitro* fertilization ('test-tube babies') programme. Edwards was able to analyse and then recreate the conditions necessary for the egg and sperm to survive outside the womb. He discovered the factors that would facilitate the ripening of immature eggs, and he provided the appropriate artificial conditions to ensure successful fertilization and subsequent maturation of the embryo. In July 1978 the first healthy 'test-tube baby' was born as a result of their research. With Steptoe he established the Bourn Hall Clinic, of which he became scientific director (1988–91). He was awarded the CBE in 1988 and the Lasker Award for Clinical Medical Research in 2001.

Edwards, Robert Walter Dudley 1910–88
Irish historian
Born in Dublin, of an English father and Irish mother, he was one of the founders of modern Irish historiography. He studied at University College, Dublin, and then at the Institute of Historical Research, University of London. In 1938, with T W Moody, he founded the authoritative journal *Irish Historical Studies*. He was professor of modern Irish history at University College, Dublin (1945–79). His most important published work is *Church and State in Tudor Ireland* (1936).

Edwards, Shaun 1966–
English rugby-league player
Born in Wigan, he signed for Wigan at the age of 17 for £35,000 – the world's biggest fee paid for a schoolboy. He went on to become the youngest player to appear in a Challenge Cup final and was the youngest international when he played against France at the age of 18. He played in 43 consecutive winning Challenge Cup games, as Wigan won the trophy for a record eight successive seasons (1988–95). Considered to be one of the greatest rugby-league players ever, he retired in 2000 and the following year joined rugby-union club Wasps as a coach, helping the team to three championships (2003–05) and a Heineken Cup win in 2004. He was awarded the OBE in 1996.

Edwin, St c.585–633
King of Northumbria
The son of Ælla, King of Deira, Edwin was kidnapped by Æthelfrith, King of Bernicia, when Ælla died (588). King Rædwald of East Anglia gave him sanctuary and, with his support, Edwin killed Æthelfrith (616), creating a united Northumbrian kingdom. He extended this north to the Lothians in Scotland and west to Anglesey and the Isle of Man, and, when Rædwald died (c.625), into East Anglia, soon becoming master of all England except Kent. He accepted Christianity in order to marry the daughter of ETHELBERT, King of Kent, who had been converted by St AUGUSTINE of Canterbury. His wife's chaplain, PAULINUS, converted Edwin to Christianity (627). He was killed at Hatfield Chase, near Doncaster (633), defending Northumbria from invasion by CADWALLON of Wales and PENDA of Mercia.

Egan, Sir John Leopold 1939–
English industrial executive
Born in Coventry and educated at Imperial College, London, as a petroleum engineer he spent five years in the oil industry before taking a degree at London Business School. In 1968 he entered the motor industry, first with General Motors, then with British Leyland and Massey Ferguson. In 1980 he became chairman and chief executive of the then ailing Jaguar company, and restored the company's high reputation in Great Britain and abroad. He moved to become chief executive of the British Airports Authority (1990–99), implementing plans for a fifth terminal at Heathrow airport and a major programme to expand retailing space in airports. He served as president of the Confederation of British Industry from 2002 until 2004. He was knighted in 1986.

Egan, Pierce 1772–1849
English sporting writer
He was born in London, and worked as a journalist there, and was the author of many works, including *Boxiana; or Sketches of Ancient and Modern Pugilism* (1812–13). He achieved fame with his description of the life of a 'man about town', *Life in London*, published in serial form in 1820 and as a book in 1821, with coloured illustrations by the CRUIKSHANK brothers. In 1824 he launched a weekly sporting journal *Pierce Egan's Life in London*, incorporated into *Sporting Life* in 1859. 🕮 J Reid, *Bucks and Bruisers: Pierce Egan and Regency England* (1971)

Egas Moniz, António Caetano de Abreu Freire 1874–1955
Portuguese neurosurgeon and Nobel Prize winner
He was born in Avanca. Professor of neurology at Coimbra (from 1902) and Lisbon (1911–44), he did important work on the use of dyes in the X-ray localization of brain tumours and developed prefrontal lobotomy for the control of schizophrenia and other mental disorders. In 1949 he shared the Nobel Prize in physiology or medicine with WALTER HESS. The early promise which some saw in lobotomy was not substantiated and the operation, which frequently produces serious long-term side effects, has fallen into disrepute. Egas Moniz also had a successful political career, as a deputy in the Portuguese parliament (1903–17), foreign minister (1918) and leader of the Portuguese delegation to the Paris Peace Conference.

Egbert d.839
West Saxon king, and first ruler of all the English
The son of Ealhmund of Kent, he was driven into exile by OFFA of Mercia to CHARLEMAGNE's court (789). In 802 he returned to England and was recognized as King of Wessex. He ended Mercian dominance at the Battle of Ellendun (Wroughton, Wiltshire), conquering Mercia itself (829), and the Northumbrians accepted his overlordship. He became *Bretwalda*, the (first) sole ruler of Britain, but by 830 he had lost Mercia again. His last years were dominated by Viking invasions, and in 839 he defeated an alliance of Cornish insurgents and Danish invaders at Hingston Down, near the River Tamar. His reign was important for consolidating West Saxon domination of the south-west and south-east of England.

Egede, Hans, *known as* **the Apostle of Greenland** 1686–1758
Norwegian missionary
A pastor at Vagen (1707–17), he learned to speak the language of the Inuit, and in 1721 set out with his family as the first missionary to Danish Greenland. He founded a permanent mission there (1721–36), returned to Copenhagen where he founded a seminary for training missionaries to Greenland, and was appointed bishop (1740). He wrote *Det gamle Grönlands nye Perlustration* (1729), and published the first book written in Inuit (1742). His son Paul (1708–89) succeeded him as bishop, and translated the New Testament (1766), as well as a catechism (1756) and prayer book (1783).

Egerton, Francis, 3rd Duke of Bridgwater 1736–1803
English engineer
From 1759 he constructed the earliest canal in England, the Bridgwater Canal. Designed by JAMES BRINDLEY, it was 42 miles (67km) long, and united Worsley with Manchester and Runcorn on the Mersey above Liverpool. He later built the Manchester–Liverpool canal (1772). He was known as the 'father of British inland navigation'.

Egerton, Francis Henry, 8th Earl of Bridgwater 1756–1829
English clergyman and antiquary
He was a prebendary of Durham, but lived in Paris for many years and kept his house and garden full of animals dressed up like manikins, because he was fond of shooting. He left £8,000 to be paid to the author of the best treatise on the subject of God manifested in Creation, which was eventually awarded to eight authors of the 'Bridgwater Treatises'.

Egerton, Sir Thomas, Baron Ellesmere and **Viscount Brackley** 1540–1617
English lawyer and statesman
Having been called to the Bar in 1572, he acquired a large practice in Chancery. He became Solicitor-General in 1581, a confidant of ELIZABETH I and JAMES VI AND I, and a friend of FRANCIS BACON and Robert Devereux, Earl of ESSEX. He took part in the trials of MARY, QUEEN OF SCOTS (1586) and Essex (1600–01), and became Lord Chancellor in 1603. In the struggle with Sir EDWARD COKE and the courts of common law, he maintained the supremacy of his own court. He wrote *Privileges of Prerogative of the High Court of Chancery* (1641).

Eggan, Frederick Russell 1906–91
US cultural anthropologist
Born in Seattle and educated at the University of Chicago under both EDWARD SAPIR and ALFRED RADCLIFFE-BROWN, he maintained links with his alma mater throughout his academic life, lecturing there from 1935 to 1974. His main contribution to anthropological theory was his method of 'controlled comparison', a synthesis of the synchronic perspective of the British structural-functionalism school and the diachronic approach of American historical ethnology. His works include the edited

volume *Social Anthropology of North American Tribes* (1937, enlarged edition 1955) and *Social Organization of the Western Pueblos* (1950).

Egge, Peter Andreas 1869–1959
Norwegian novelist
He was born in Trondheim. Too poor to pursue his education, he was discovered by KNUT HAMSUN, who arranged for the publication of his first novel, *Common People* (1891). His first real success was with *The Heart* (1917), which is a serious and penetrating study of marriage between two dissimilar personalities, and *Hansine Solstad* (1926), a delicate, sympathetic description of a woman wrongfully accused of theft. Egge also wrote plays, in which he followed IBSEN in creating drama from defects of character. 🕮 C M Woel, *Peter Egge* (1929)

Eggers, Dave (David) 1970–
US writer
Born in Boston, he was educated at the University of Illinois at Urbana-Champaign. During the early 1990s he worked in San Francisco as an editor for Salon.com, and founded *Might* magazine. In 1998 he founded *Timothy McSweeney's Quarterly Concern*, now a highly influential US literary journal and website. *A Heartbreaking Work of Staggering Genius* (1999), a boundary-breaking autobiography, polarized critics, sparked a national debate about the merits of literary irony and was a bestseller. His first novel, *You Shall Know Our Velocity* (2002), received mixed reviews. His publishing house, McSweeney's, does much to promote the cause of children's literacy, supporting and publishing children's writing.

Eggleston, Edward 1837–1902
US writer and pastor
Born in Vevay, Indiana, he held a Methodist ministry in Minnesota, and was editor of journals like *Little Corporal, National Sunday School Teacher* and *Hearth and Home*. He also wrote several classic novels, among them *The Hoosier Schoolmaster* (1871), which was based on his brother's experience as a small-town teacher, *The Circuit Rider* (1874), on his own as an itinerant minister, and *The Graysons* (1888), in which ABRAHAM LINCOLN is a central character. 🕮 W P Randel, *Eggleston, Author of 'The Hoosier Schoolmaster'* (1946)

Egidius, St *See* GILES, ST

Eginhard *See* EINHARD

Egmont or **Egmond, Lamoraal, Graf van** 1522–68
Flemish soldier and Prince of Gavre
Born in the castle of La Hamaide, Hainault, he accompanied Emperor CHARLES V on many campaigns, notably against the French at St Quentin (1557) and Gravelines (1558), for which he was made governor of Flanders and Artois. He opposed PHILIP II of Spain's Catholic policy, thus becoming a popular hero, but when he later broke with the Prince of Orange, he was executed as a traitor.

Ehrenberg, Christian Gottfried 1795–1876
German naturalist
Born in Delitzsch in Prussian Saxony, he became professor at Berlin University from 1839, and travelled in Egypt, Syria, Arabia and Central Asia. His works on microscopic organisms founded a new branch of science, and he discovered that phosphorescence in the sea is caused by living organisms.

Ehrenburg or **Erenburg, Ilya Grigorevich** 1891–1967
Soviet novelist and journalist
Born in Kiev, he was in exile in Paris before 1917 and returned to fight against the Communists. He went back to Paris as a correspondent, but was allowed to return to the USSR in 1923, and he subsequently wrote novels in praise of the Communist system. Among his best works are *The Extraordinary Adventures of Julio Jurenito* (1921), a satire on the aftermath of World War I, and *The Fall of Paris* (1941) and *The Storm* (1947), both novels about World War II. In the KHRUSHCHEV period he wrote in favour of an East–West thaw and managed to open the eyes of the Soviet public to some genuine truths about the West. He published his memoirs *People, Years, Life* in six volumes from 1960 to 1966.

Ehrenfest, Paul 1880–1933
Austrian physicist
Born in Vienna, he studied at the universities of Göttingen and Vienna, where he completed his doctorate under LUDWIG BOLTZMANN (1904). With his wife he recast the statistical mechanics of Boltzmann and JOSIAH GIBBS, their exposition of the foundations of this subject appearing in 1911. The following year Ehrenfest was appointed to the chair in theoretical physics at Leyden University. ENRICO FERMI was one of his many students, and ALBERT EINSTEIN and NIELS BOHR were amongst his close friends. He demonstrated the comprehensibility of the early quantum-mechanical theory and its relation to classical physics, and his 'adiabatic principle' assumed a foundational status within quantum theory by linking it to statistical mechanics, a vital achievement during quantum theory's uncertain infancy.

Ehrlich, Paul 1854–1915
German bacteriologist and Nobel Prize winner
He was born of a Jewish family in Strehlen, Silesia (now Strzelin, Poland). He trained in medicine at Leipzig and developed his interests in chemistry and bacteriology there. A pioneer in haematology and chemotherapy, he synthesized salvarsan as a treatment for syphilis, and propounded the side-chain theory in immunology. He was joint winner, with ELIE METCHNIKOFF, of the 1908 Nobel Prize in physiology or medicine. 🕮 Ernst Bäumler, *Paul Ehrlich, Scientist for Life* (1984)

Eichendorff, Joseph, Freiherr von 1788–1857
German poet, novelist and critic
Born near Ratibor, he studied law and became a government official. His poems were set by a number of composers, including SCHUMANN and FELIX MENDELSSOHN, and reveal his profound veneration for the divine gifts of natural beauty. His novels include the idyllic *Aus dem Leben eines Taugenichts* (1826, Eng trans *Memoirs of a Good-for-Nothing*) and *Das Marmorbild* (1826, 'The Marble Statue'). He is regarded as one of the most important Romantic lyricists writing in German, known for *Gedichte* (1837) and the epic *Robert und Guiscard* (1855). 🕮 L R Radner, *Eichendorff: The Spiritual Geometer* (1970)

Eichhorn, Johann Gottfried 1752–1827
German theologian and biblical scholar
Born in Dörrenzimmern, Franconia, he became professor of Oriental languages at Jena (1775) and Göttingen (1788). His introductions to the Old and New Testaments (1780–1814) were the first attempt to apply the ordinary methods of literary criticism to Scripture. He derived each of the four gospels from one original Greek gospel.

Eichmann, (Karl) Adolf 1906–62
Austrian Nazi war criminal
Born in Solingen, and a fanatical anti-Semite, he became a member of the SS and organized anti-Jewish activities, particularly their deportation to concentration camps. Captured by US forces in 1945, he escaped from prison some months later, having kept his identity hidden, and in 1950 reached Argentina. He was traced by Israeli agents and in 1960 taken to Israel, convicted of crimes against humanity and executed. 🕮 Hannah Arendt, *Eichmann in Jerusalem* (1963)

Eiffel, (Alexandre) Gustave 1832–1923
French engineer
Born in Dijon, he was the designer of many notable bridges and viaducts. The Eiffel Tower, 985ft (295.5m) high, was erected (1887–89) on the Champ-de-Mars in Paris at a cost of £260,000 for the World Exhibition of 1889, and was the highest building in the world until 1930. In 1893 Eiffel was condemned to two years' imprisonment and fined for breach of trust in connection with the abortive French Panama Canal scheme. 🕮 Bernard Marrey, *La vie et l'œuvre extraordinaires de Monsieur Gustave Eiffel* (1984)

Eigen, Manfred 1927–
German physical chemist and Nobel Prize winner
Born in Bochum and educated in Göttingen, he was the director of the MAX PLANCK Institute for Physical Chemistry there from 1964. He developed methods for the study of very fast chemical reactions and for this work shared the Nobel Prize in chemistry in 1967 with RONALD NORRISH and Sir GEORGE PORTER.

Eijkman, Christiaan 1858–1930
Dutch physician, pathologist and Nobel Prize winner
He was born in Nijkerk and studied medicine at the University of Amsterdam. He investigated beriberi disease in the Dutch East Indies (Indonesia), and was the first to produce a dietary deficiency disease experimentally (in chickens) and to propose the concept of 'essential food factors', later called vitamins. He showed that the substance (now known as thiamine, a B-complex vitamin) which protects against beriberi is contained in the husks of grains of rice, and carried out clinical studies on prisoners in Java to show that unpolished rice could cure the disease. After his return from the Dutch East Indies, he became professor of public health and forensic

Einstein, Albert 1879–1955
German–Swiss–US mathematical physicist

Albert Einstein, who ranks with GALILEO GALILEI and Sir ISAAC NEWTON as one of the great contributors to the understanding of the universe, was born in Ulm, Bavaria, of Jewish parents, and educated in Munich, Aarau and Zurich. He took Swiss nationality in 1901, was appointed examiner at the Swiss Patent Office (1902–05), and began to publish original papers on the theoretical aspects of problems in physics. He achieved world fame by his special and general theories of relativity (1905 and 1916), and won the 1921 Nobel Prize in physics for his work. The special theory provided a new system of mechanics which accommodated JAMES CLERK MAXWELL's electromagnetic field theory, as well as the hitherto inexplicable results of the MICHELSON–MORLEY experiments on the speed of light. Einstein showed that in the case of rapid relative motion involving velocities approaching the speed of light, puzzling phenomena such as decreased size and mass are to be expected. His general theory accounted for the slow rotation of the elliptical path of the planet Mercury, which Newtonian gravitational theory had failed to do.

In 1909 a special professorship was created for Einstein at Zurich; and in 1911 he became professor at Prague. In 1912 he returned to Zurich and from 1914 to 1933 was director of the Kaiser Wilhelm Physical Institute in Berlin. By 1930 his best work was complete. After HITLER's rise to power he left Germany and lectured at Princeton, USA, from 1934, becoming a US citizen and professor at Princeton in 1940. In September 1939 he wrote to President ROOSEVELT warning him of the possibility that Germany would try to make an atomic bomb, thus helping to initiate the Allied attempt to produce one (called the Manhattan Project).

After World War II Einstein urged international control of atomic weapons and protested against the proceedings of the un-American Activities Senate Subcommittee, which had arraigned many scientists. He spent the rest of his life trying, by means of his unified field theory (1950), to establish a merger between quantum theory and his general theory of relativity, thus bringing subatomic phenomena and large-scale physical phenomena under one set of determinate laws. His attempt was not successful.

🕮 His works include *About Zionism: Speeches and Letters* (1930), *Why War* (1933, with SIGMUND FREUD), *The Evolution of Physics* (1938) and *Out of My Later Years* (1950). See also Ronald W Clark, *Einstein: The Life and Times* (1971); Peter Michelmore, *Einstein: Profile of the Man* (1962).

> On his part in develping the atom bomb, he commented: 'If only I had known, I would have become a watchmaker'.
>
> – Quoted in the *New Statesman*, 16 April 1955.

medicine at the University of Utrecht in 1898. He shared the 1929 Nobel Prize in physiology or medicine with Sir FREDERICK GOWLAND HOPKINS.

Einaudi, Luigi 1874–1961
Italian politician
Professor of public finance in Turin (1902–49), he was a senator (1915–45) and president of Italy (1948–55). His most important role was as budget minister (a post specially created for him in 1947 by ALCIDE DE GASPERI). He devised a rigorous deflationary policy of tight monetary control and high interest rates, which was not abandoned until 1950. While this may have slowed Italy's postwar industrial recovery, and certainly contributed to high unemployment, it also helped to revive confidence in the lira and to lay the foundation for growth in the post-1950 era.

Einem, Gottfried von 1918–96
Austrian composer
Born in Bern, Switzerland, his most successful works were for the stage, including several ballets and the operas *Dantons Tod* (1947, 'The Death of Danton') and *Der Besuch der alten Dame* (1970, 'The Visit of the Old Lady'). His *Jesu Hochzeit* (1980, 'Jesus's Wedding') offended the Catholic Church and occasioned a national scandal. He also wrote orchestral, choral and chamber music, concertos and many songs.

Einhard or **Eginhard** c.770–840
Frankish historian
Born in East Franconia, Einhard was sent to the court of CHARLEMAGNE, where he became a pupil of ALCUIN and a favourite of the emperor and of his successor LOUIS I, THE PIOUS. For years lay abbot of various monasteries, he ultimately retired to Mühlheim. His *Life of Charlemagne* (c.820) is the great biographical work of the Middle Ages. He also wrote *Annales Francorum*, covering the period 741–829, and 62 *Epistolae*.

Einstein, Albert *See panel above*

Einstein, Alfred 1880–1952
US musicologist
Born in Munich, Germany, he fled the Nazi regime in 1933, and lived in Florence and London (1933–39). He settled in the USA in 1939, becoming a US citizen in 1945. He collaborated in several well-known musical reference books, such as *Eaglefield's Dictionary of Modern Music*, but is perhaps best remembered for his work on MOZART, especially the revision of LUDWIG VON KÖCHEL's catalogue. His *Essays on Music* were published in 1958.

Einthoven, Willem 1860–1927
Dutch physiologist and Nobel Prize winner
Born in Semarang, Dutch East Indies (Indonesia), he trained in medicine at the University of Utrecht before becoming professor of physiology at Leyden in 1886. In 1903 he invented the string galvanometer, prompting great advances in electrocardiography. He was awarded the 1924 Nobel Prize in physiology or medicine.

Eiríksson, Leifur heppni *See* LEIF THE LUCKY

Eisenhower, Dwight D *See panel p498*

Eisenman, Peter David 1932–
US architect
Born in Newark, New Jersey, he was educated at Cornell, Columbia and Cambridge universities and subsequently taught at Cambridge, Princeton, and the Cooper Union in New York before setting up his own practice in 1980. His innovative designs, which have ranged from private houses and schools to large-scale urban projects, are notable for their fusion of contextually disconnected architecture taking inspiration from philosophy and linguistics. His most important designs have included the Berlin Holocaust Memorial (2001–05).

Eisenstaedt, Alfred 1898–1995
US photojournalist
Born in Dirschau, Germany (now Tczew, Poland), he moved with his family to Berlin in 1906, and served in the German army in World War I. He started freelancing as a photojournalist in the 1920s, and emigrated to the USA in 1935, where he became one of the original photographers working on *Life* (1936–72). He was voted Photographer of the Year in 1951, and his worldwide assignments and telling photo-essays made him one of the most impressive practitioners of the 20th century. His publications include *Witness to Our Time* (1966), *The Eye of Eisenstaedt* (1969), *Photojournalism* (1971) and *Eisenstaedt Remembrances* (1990). He was awarded the National Medal of Arts in 1990.

Eisenstein, Sergei Mikhailovich 1898–1948
Russian film director
Born in Riga, Russia (now Latvia), he served in the Red Army during the Russian Revolution (1916–18), and after training in theatrical scene-painting was appointed to make propaganda films on the history of the Revolution: *The Battleship Potemkin* (1925), on the 1905 mutiny, and *Ten Days That Shook The World* (1928), on the October Revolution. His substitution of the group or crowd for the traditional hero, and his consummate skill in cutting and recutting to achieve mounting impressionistic effects, especially in the macabre Odessa steps sequence of *The Battleship Potemkin*, greatly influenced film art. Later he made the patriotic epic *Alexander Nevski* (1938), *The Magic Seed* (1941), the masterpiece *Ivan the Terrible* (1944) and its sequel, *The Boyars Plot*, which was banned in the USSR for many years. 🕮 Yon Barna, *Eisenstein* (1973)

Eisler, Hanns 1898–1962
German composer
Born in Leipzig, he studied under ARNOLD SCHOENBERG at the Vienna Conservatory (1919–23). A committed Marxist, he

Eisenhower, Dwight D(avid), *nicknamed* **Ike** 1890–1969
US general and 34th president of the USA

Dwight D Eisenhower was born in Denison, Texas, of immigrant stock originating in the Rhineland. He graduated from West Point Military Academy in 1915, took the war college course in 1928 and gained experience under the assistant secretary for war. By 1939 he had become chief military assistant to General MACARTHUR in the Philippines. On the outbreak of World War II he obtained leave to return to troop duty in the USA. Carefully groomed for the responsibility by General GEORGE C MARSHALL, in 1942 he assumed command of allied forces mustered for the amphibious descent on French North Africa. Without experience of high command, but perceptive and assimilative, he rapidly learned to translate strategic theory into terms of practical action. At the same time he exhibited a rare genius for smoothly co-ordinating the activities of an interallied staff, perhaps his most valuable contribution to the war effort.

His successful conduct of the North African operations, plus the preponderant American element in the forces earmarked for 'Operation Overlord', led to his selection as supreme commander for the 1944 cross-Channel invasion of the continental mainland, which he resolutely launched despite unnervingly capricious weather conditions. With an acute appreciation of the psychology of his US forces, his strategic preference for the drive to cross the Rhine was for a shoulder-to-shoulder advance in line – a choice of method that found some justification in the failure of the 'left-hook' stroke at Arnhem. But his reluctance to push on beyond the Elbe and occupy Berlin, and his quiescence in the rather hasty dismantling of the Anglo-American armies, resulted in Russia's emergence as the leading military power in Europe.

Among many honours, he received an honorary Order of Merit in 1945, and in 1948 became for a while president of Columbia University. With the establishment of NATO in 1950 he was made supreme commander of the combined land forces, but in 1952 the popularity which he had gained in Europe swept him to nomination and ultimate victory in the presidential elections. Standing as a Republican, he won by a large majority despite the even balance of parties in the house, and he was re-elected in 1956. During his presidency the US government was preoccupied with foreign policy and the campaign against Communism, and undercurrents of extremism and excess of zeal often placed the president in an invidious position, but his political inexperience was balanced by sincerity, integrity and a flair for conciliation. More recently his presidency has been subject to a favourable reassessment, now seen as maintaining stability during a difficult period.

📖 R A Melanson and D Mayers (eds), *Reevaluating Eisenhower* (1987); Stephen E Ambrose, *The Supreme Commander: The War Years of General Dwight D Eisenhower* (1970).

> 'The eyes of the world are upon you. The hopes and prayers of liberty-loving people everywhere march with you.'
>
> –From his speech despatching US forces on D-Day, 6 June 1944.

wrote political songs, choruses and theatre music, often in collaboration with BERTOLT BRECHT. From 1933 he worked in Paris, London and Copenhagen, and moved to Hollywood in 1938, teaching and writing film music. Denounced in the MCCARTHY anti-Communist trials, he returned to Europe in 1948. He settled in East Germany in 1952, composing popular songs and organizing workers' choirs. He wrote about 600 songs and choruses, music for over 40 films, and for nearly 40 plays. In his orchestral and chamber music he often adopted sophisticated techniques, including the twelve-note technique.

Eisner, Kurt 1867–1919
German journalist and politician
Born in Berlin, he was the leader of the successful Bavarian revolution of 1918–19. Appointed first president of the Bavarian republic in 1919, he was assassinated in Munich later the same year.

Eisner, Will (William Erwin) 1917–2005
US comic-book artist and writer
Born in New York City, he became staff artist on the *New York American*. In 1937 he started mass-producing strips for the comic *Wags*, in which he developed a strip called *The Flame* into the long-running weekly serial *Hawks of the Seas*. In 1940 he was responsible for the first comic insert for Sunday newspapers, starring his famous character, *The Spirit*, a crimefighter in a fedora and a blue eye-mask. He produced the very first graphic novel, *A Contract with God* (1978), and further graphic novels such as *Invisible People* (2000) and *Fagin the Jew* (2003) helped to establish this new literary form.

Ekeberg, Anders Gustaf 1767–1813
Swedish chemist and mineralogist
Born in Stockholm, he was educated at Uppsala and became an assistant professor there in 1794 and full professor in 1799, the same year that he was elected a member of the Royal Swedish Academy of Sciences. In the 1790s he braved the hostility of his superiors to introduce the theories of ANTOINE LAVOISIER into Sweden. Around 1795 he began investigating yttria, a newly discovered heavy metal from the quarry at Ytterby, Sweden, and in 1802 he found that it contained another unknown heavy metal. This he called 'tantalum', a reference to the tantalizing work of coaxing its oxide to react with an acid. One of his greatest distinctions was his role as the teacher of JÖNS JACOB BERZELIUS.

Ekelöf, (Bengt) Gunnar 1907–68
Swedish poet
A leader of the postwar Modernists, he is considered one of the most significant Swedish poets of the 20th century. Much influenced by the French Symbolists, he published his first book of poetry, *Sent på jorden* (1932, 'Late Arrival on Earth'), followed by *Dedikation* (1934, 'Dedication'), *Sorgen och stjärnan* (1936, 'Sorrow and the Star') and *Färjesång* (1941, 'Ferry Song'). *En Mölna-elegi* (1960) was translated into English (*A Mölna Elegy*, 1979), as were his *Selected Poems* (1966) and *Guide to the Underworld* (1967). 📖 S Karlsson and A Liffman, *En bok om Gunnar Ekelöf* (1956)

Ekelund, Vilhelm 1880–1949
Swedish poet and essayist
He was a Symbolist and early Modernist, and his works include poetry such as *Stella Maris* (1906) and volumes of essays inspired by NIETZSCHE, including *Classical Ideal* (1909). 📖 S Ahlstrom, *Vilhelm Ekelund* (1940)

Ekman, Vagn Walfrid 1874–1954
Swedish oceanographer
Born in Stockholm and educated at Uppsala University, he worked at the International Laboratory for Oceanographic Research in Oslo (1902–08) before returning to Sweden, where he was appointed professor of mathematical physics at Lund University (1910–39). He explained the variation in direction of ocean currents with depth, basing his work on an observation made by the Norwegian explorer FRIDTJOF NANSEN, who noted that the path of drifting arctic sea ice did not follow the prevailing wind direction, but deviated 45° to the right. Ekman explained this as an effect of the Earth's rotation (CORIOLIS force). He also showed that the general motion of near-surface water is the result of interaction between surface wind force, the Coriolis force, and frictional effects between different water layers. The resulting variation of water velocity with depth is known as the 'Ekman spiral'.

Ela, Jean Marc 1936–
Cameroonian theologian
He was born in Ebolowa and studied at the universities of Paris and Strasbourg, gaining doctorates in both theology and sociology. His major works, *My Faith as an African* (1985) and *African Cry* (1986), urge the rejection of colonial structures and of imposed Western symbols in the Church. He challenges African Christians to embrace the liberating God of Exodus and to re-read the Gospel through African eyes.

Elagabalus *See* HELIOGABALUS

ElBaradei, Mohamed 1942–
Egyptian diplomat and Nobel Prize winner
Born in Cairo, he studied law there and in New York before joining the Egyptian diplomatic service in 1964. In 1980 he joined the UN, and from 1984 was a senior member of the

International Atomic Energy Agency (IAEA) Secretariat. He also taught international law at New York University (1981–87), and has lectured widely and written books on international law, arms control and the peaceful uses of nuclear energy. In 1997 he was appointed director general of the IAEA, and has strengthened the organization's role in monitoring nuclear weapons proliferation. He shared the 2005 Nobel Peace Prize with the IAEA for their efforts to prevent the spread of nuclear weapons. In 2006 he was awarded Egypt's highest honour, the Nile Collar.

Elcano *See* CANO, JUAN SEBASTIAN DEL

Elder, Sir Thomas 1818–97
Australian businessman
Born in Kirkcaldy, Fife, Scotland, in 1854 he emigrated to Adelaide, South Australia, where he joined his brother, Alexander, in the firm of Elder and Company. They financed copper mines in South Australia. With the proceeds and in partnership with ROBERT BARR SMITH, who was to marry his sister, Joanna, Elder founded the firm of Elder, Smith & Co in 1863. This grew into one of the world's largest woolbroking firms, which built up extensive pastoral holdings as a source for the supply of wool, stretching into Western Australia and Queensland. He brought in camels to provide efficient transport in the outback, and Afghans to manage them, and his stud of camels was invaluable, especially for some of the early expeditions into the 'centre' made by PETER WARBURTON, JAMES ROSS and WILLIAM GILES, all of which were financed by Elder. He was appointed a knight of the Order of St Michael and St George in 1887.

Elders, M(innie) Joycelyn, *née* **Jones** 1933–
US paediatrician
Born in Skaal, Arkansas, she was educated at the Brock Army Medical School and the University of Arkansas. After postgraduate training and medical posts, she became professor of paediatrics at the University of Arkansas in 1974. Her research interests have focused on endocrine mechanisms in growth and development. In 1987 she was appointed director of the Arkansas Department of Health, and under the CLINTON administration became the first African-American US surgeon-general (1993–94) and only the second woman to hold the post. She subsequently returned to her former academic postion at the University of Arkansas. *Dancing with Bears*, a collection of her lectures on health care reform, was published in 1994, and her autobiography appeared in 1996.

Eldh, Carl 1873–1954
Swedish sculptor
He studied in Paris (1896–1903) and his early work was much influenced by AUGUSTE RODIN. His mature work after his return to Sweden is characterized by an idealized social realism. Among his public works are the AUGUST STRINDBERG and KARL BRANTING monuments in Stockholm, the young CAROLUS LINNAEUS in Uppsala and ENGELBREKT in Arboga. He also produced many portrait busts of the figures of his day.

Eldridge, Roy (David) 1911–89
US jazz trumpet player
Born in Pittsburgh, Pennsylvania, he was sometimes known as 'Little Jazz'. His originality and technical facility made him a jazz virtuoso to compare with LOUIS ARMSTRONG and DIZZY GILLESPIE (on whom he was an early influence). He learned to play the drums as a child, before progressing to bugle and then trumpet. He worked with travelling shows and lesser-known jazz groups until 1930, when he moved to New York. A passionate improviser, able to play with ease in the ultra-high register, he was in demand as a featured soloist with top bands of the 1930s, such as McKinney's Cotton Pickers and the Teddy Hill and FLETCHER HENDERSON Orchestras. He adapted to the changing demands of the modern jazz era after the late 1940s, and continued to perform until suffering a stroke in 1980.

Eleanor of Aquitaine c.1122–1204
Queen of France and of England
She was the daughter of William, Duke of Aquitaine, whom she succeeded as duchess (1137) before marrying Prince Louis, who became King LOUIS VII of France a month later. Beautiful and volatile, she led her own troops on the Second Crusade (1147–49), dressed as an Amazonian warrior. In 1152 the marriage was annulled, and she married Henry Plantagenet, who became HENRY II of England (1154). She took an active part in administration and the management of her own lands, making her court at Poitiers a model of courtly life. As a result of Henry's infidelities she supported their sons, Richard and John, in a rebellion against him, and was imprisoned (1174–89). She acted as regent for her son RICHARD I during his crusading campaigns abroad (1189–94), and raised the ransom for his release. In 1200 she led the army that crushed a rebellion in Anjou against her second son, King JOHN. 🕮 Amy Kelly, *Eleanor of Aquitaine and the Four Kings* (1950)

Eleanor of Castile c.1245–1290
Queen of England
The daughter of FERDINAND III of Castile, she married the future EDWARD I of England in 1254. She accompanied him to the Crusades (1270–73), but the story that she saved his life by sucking the poison from a wound is probably apocryphal. She died in Harby, Nottinghamshire, and the Eleanor Crosses at Northampton, Geddington and Waltham Cross are survivors of the nine erected by Edward at the halting places of her cortège. The last stopping place was Charing Cross, where a replica now stands. 🕮 John Carmi Parsons, *Eleanor of Castile: Queen and Society in Thirteenth-Century England* (1994)

Eleanor of Provence 1223–91
Daughter of Raymond Berengar IV, Count of Provence
In 1236 she married HENRY III of England but alienated the barons by advancing her foreign uncles to high office. In the Barons' War (1264) she raised an army of mercenaries in France to support her husband, but her invasion fleet was wrecked. After the accession of her son, EDWARD I, she retired to a convent.

Eleonora of Arborea c.1350–1404
Sardinian ruler and national heroine
The daughter of a district chieftain (*giudice*), she defeated an incursion from Aragon (1383) and became Regent of Arborea for her infant son, Frederick. In 1395 she introduced a humanitarian code of laws (*Carta di Logu*), which was far ahead of its time. Her statue stands in the Piazza Eleonora in Oristano. She gave special protection to hawks and falcons, and Eleonora's Falcon is named after her.

Elgar, Sir Edward 1857–1934
English composer
Born in Broadheath, Worcestershire, he was the son of an organist and music dealer, but musically was largely self-taught. In his youth, he worked as an orchestral violinist and became conductor of the Worcester Glee Club and the County Asylum Band, and organist of St George's Roman Catholic Church, Worcester, in succession to his father. Devoting himself to composition from 1891, he wrote the *Enigma Variations* (1899) and the oratorio *The Dream of Gerontius* (1900), which both consolidated his position as the leading figure in English music. Other works include the oratorios *The Apostles* (1903) and *The Kingdom* (1906), two symphonies and concertos for violin and cello as well as incidental music and, during World War I, topical occasional music. From 1924 he was Master of the King's Musick. His command of the orchestra and of late 19th-century musical styles within his own personal idiom were very influential in re-establishing English music internationally. He was knighted in 1904, after the Elgar Festival held in London. 🕮 Michael Hurd, *Elgar* (1969)

Elgin, James Bruce, 12th Earl of Kincardine and **8th Earl of** 1811–63
English politician and colonial administrator
Born in London, the son of Thomas Bruce, 7th Earl of ELGIN, he became governor of Jamaica (1842–46) and Governor-General of Canada (1847–54). While on his way to China in 1857 as plenipotentiary, he heard at Singapore of the Indian Mutiny, and diverted the Chinese expedition to India. His own mission, although delayed, resulted in the Treaty of Tientsin (1858). He also negotiated a treaty with Japan, and on his return home became Postmaster-General. In 1860 he was again in China to enforce the treaty, and in 1861 became Governor-General of India.

Elgin, Thomas Bruce, 11th Earl of Kincardine and **7th Earl of** 1766–1841
British diplomat and art connoisseur
While ambassador to the Ottoman sultan (1799–1803) he became interested in the decorated sculptures on the ruined Parthenon at Athens, and, because they were in danger of damage and destruction, arranged for some of them to be transported to England. This action brought criticism and accusation of vandalism, but the earl was vindicated by a government committee and the Elgin Marbles were purchased for the nation in 1816 and later placed in the British Museum, London.

El Greco *See* GRECO, EL

Elhuyar y de Suvisa, Don Fausto d' 1755–1833
Spanish chemist and metallurgist
Born in Logroño, Rioja, he studied medicine in Paris and mining in Freiberg, returning to Spain to teach mineralogy and geology

Eliot, T(homas) S(tearns) 1888–1965
US-born British poet, critic and dramatist, one of the most important figures of 20th-century English literature

T S Eliot was born in St Louis, Missouri, the son of a successful businessman of New England origin. He attended the Smith Academy in St Louis and studied for four years at Harvard (1906–10), where the chief influence on his development was that of IRVING BABBITT with his selective humanism and his resistance to modern trends. Eliot spent a year in Paris, attending lectures at the Sorbonne and improving his command of French, then returned to Harvard to study philosophy for three years. He had distinguished teachers such as JOSIAH ROYCE and GEORGE SANTAYANA and, for a time, BERTRAND RUSSELL. A travelling scholarship from Harvard took him to Merton College, Oxford, where he continued his work on a doctoral dissertation on F H BRADLEY, and read PLATO and ARISTOTLE under H H Joachim.

In 1914 he met EZRA POUND, to whom he had shown his poems; Pound persuaded him to remain in England, where he lived from then on, taking up naturalization in 1927. In 1915, he married Vivien Haigh-Wood. After a period of schoolteaching, he worked for eight years in Lloyds Bank before becoming a director of the publishing firm of Faber & Gwyer (later Faber & Faber). At Faber, he built up a list of new poets, including WH AUDEN and STEPHEN SPENDER, as well as Pound. Pound said of Eliot that 'he has actually ... modernized himself on his own', and his support led to the publication of Eliot's first volume of verse, *Prufrock and Other Observations* (1917). In the same year Eliot became assistant editor of *The Egoist*, to which he contributed criticism, and he wrote reviews for *The Times Literary Supplement* and *Athenaeum*. He was introduced by Bertrand Russell into the Bloomsbury Group, where the quality of his work was immediately recognized.

Ara vos prec (1920) included new poetry, notably the dramatically pessimistic 'Gerontion'. In 1921 both Eliot and his wife were affected by nervous disorders, and he was granted three months' leave to receive treatment in Lausanne. At this time he completed *The Waste Land* (1922), which was published by LEONARD and VIRGINIA WOOLF at the Hogarth Press. It received wide attention and helped to reinforce his reputation. However, *The Hollow Men*, which followed in 1925, gave more excuse for regarding Eliot at that point as a cynical defeatist. *The Waste Land* had appeared in the first number of *The Criterion*, a quarterly review which Eliot edited from 1923 to 1939. This aimed at impartiality in presenting opposing political philosophies and is indispensable for a study of ideas – political and religious – between the wars, as well as for the literary developments, in Great Britain and abroad, during that period. In 1933 Eliot divorced his wife Vivien; she was sent in controversial circumstances to a psychiatric hospital, where she died in 1947.

In 1939 Eliot published a collection of children's verse, *Old Possum's Book of Practical Cats*, which revealed another side of his character, influenced by EDWARD LEAR. It has been one of his most popular works, and was adapted as a musical (*Cats*, 1981). *Four Quartets* (1944), the last of his major poems, is considered, despite its obscurity, to be one of the greatest philosophical poems in English. Each of its four sections

cont

at the Real Seminario Patriótico in Vergara. In the 1780s he and FRANÇOIS CHABANEAU founded the Real Escuela Metalúrgica and worked together to extract platinum and make it malleable. He collaborated with his brother Juan José in experiments to isolate tungsten (then known as wolfram) from wolframite. Subsequently the government sent him to be director of mines in Mexico, where he succeeded in revitalizing the mining industry until interrupted by the War of Independence in 1810. In 1821 he returned to Spain as director-general of mines and did much to reform mining law.

Eliade, Mircea 1907–86
Romanian historian and philosopher of comparative religion
He was born in Bucharest, and studied Indian philosophy and Sanskrit at Calcutta University (1928–31) before returning to Romania as a lecturer in the history of religion and metaphysics at Bucharest (1933–39). He served in the diplomatic service during World War II, and later taught at the Sorbonne, Paris (1946–48), and Chicago University (1957–85). A pioneer in the systematic study of world religions, he published numerous books and papers, incuding *The Myth of the Eternal Return* (1949), *Patterns in Comparative Religion* (1958), *Yoga: Immortality and Freedom* (1958), *The Sacred and the Profane* (1959), *A History of Religious Ideas, I–III* (1978–85) and two volumes of autobiography (1982, 1988). He was editor-in-chief of *The Encyclopedia of Religion* (1987), and wrote a number of novels, including *The Forbidden Forest* (1955).

Eliezer, Israel ben *See* BAAL-SCHEM-TOV

Eligius, St *See* ELOI, ST

Elijah fl.c.900 BC
Hebrew prophet
His story is told in 1 Kings 17–19, 21, and 2 Kings 1–2. His loyalty to God inspired him to oppose the worship of Baal in Israel under King AHAB and JEZEBEL, and was rewarded by his direct ascent into heaven in a whirlwind.

Elijah ben Solomon 1720–97
Jewish scholar
Born in Vilna (now Vilnius, Lithuania), he was a student of the Cabala and a commentator on the Halakah. He was revered for his exemplary life and was considered leader of the Jewish community of Vilna, the cultural centre of East European Jewry. He was a vigorous opponent of Hasidism, denouncing its focus on miracles, visions and collective joy as idolatrous.

Elin, Pelin, *pseudonym of* **Dimitur Ivanov** 1877–1949
Bulgarian writer and editor
He was born in Baylovo. In his many writings he depicted the peasantry (*shopi*) of the country around Sofia, where he lived, with a loving detachment and always with a large dose of psychological realism. His rural tales are still read and loved; his collected work was published in Bulgaria (10 vols, 1958–59). He also wrote plays. He had the approval of the Communist government, but did not like socialist realism, and declared that the emotions of men, and not machines, should determine literature. He wrote little in the last 25 years of his life, but remained active in literary circles. 🕮 C Manning and R Smal-Stocki, *The History of Modern Bulgarian Literature* (1960)

Elion, Gertrude Belle 1918–99
US biochemist and Nobel Prize winner
Born in New York City, she studied at Hunter College and New York University, before joining Burroughs Wellcome in 1944 as a research associate of GEORGE HITCHINGS. She progressed through the company to become head of experimental therapy (1967–83), and from 1983 was emeritus scientist. With Hitchings she worked extensively on drug development, synthesizing compounds that inhibited DNA synthesis, in the hope of preventing the rapid growth of cancer cells. From their work came drugs active against leukaemia and malaria, drugs used in the treatment of gout and kidney stones, and also drugs that suppressed the normal immune reactions of the body, proving vital in transplant surgery. In the 1970s they produced an antiviral compound active against the herpes virus, which preceded the successful development of AZT, the anti-AIDS compound. In 1988 Elion and Hitchings, with Sir JAMES BLACK, shared the Nobel Prize in physiology or medicine. She was appointed research professor of pharmacology and medicine at Duke University, North Carolina, in 1983.

Eliot, Charles William 1834–1926
US educationalist
Born in Boston, he became a mathematician and chemist. As president of Harvard College (1869–1909) he carried out radical reforms of its faculties and teaching methods and turned it into a full university. During his tenure it doubled in strength, and the old undergraduate curriculum was abandoned for an optional system of studies. He also organized a graduate school of arts and sciences, and helped to establish Radcliffe College in Cambridge, Massachusetts. He published two manuals of chemistry and several books on education, and was editor of the *Harvard Classics*.

Eliot, George, *pseudonym of* **Mary Ann** or **Marian Evans** 1819–80
English writer
She was born on Arbury Farm in Astley, Warwickshire. Her father, Robert Evans, a Warwickshire land agent, was a man of strong character, and many of his traits were transferred by Eliot to her characters Adam Bede and Caleb Garth. She lost her

Eliot, T(homas) S(tearns) *cont*

depicts one of the seasons against the background of historical events and of experiences of wartime London: 'Burnt Norton' is a Cotswold house Eliot often visited; 'East Coker' is a Somerset village; 'The Dry Salvages' is a rock formation off the coast of Massachusetts; and 'Little Gidding' is the Huntingdonshire home of NICHOLAS FERRAR and his 17th-century religious community.

Eliot's critical work consists of literary criticism, such as *The Sacred Wood* (1920, on Jacobean dramatists), the admirable *Homage to Dryden* (1924), *The Use of Poetry and the Use of Criticism* (1933), *Elizabethan Essays* (1934), *After Strange Gods* (1934) and *On Poetry and Poets* (1957); and social comment, such as *After Strange Gods* (1934), *Essays Ancient and Modern* (1936), *The Idea of a Christian Society* (1939) and *Notes towards the Definition of Culture* (1948). He was often highly provocative, as in his *Modern Education and the Classics* (1934), where he maintained that the classics were to be studied not for their own sake but as a buttress for the faith.

The new poetry, as announced by Ezra Pound, T E HULME and Eliot, was to be related to modern life and expressed in modern idiom, preferably in free verse. Rhetoric and romantic clichés were to be avoided. In his late essay 'Milton II', in *On Poetry and Poets*, Eliot confessed that he and his friends had insisted overmuch on these ideas and this was a sort of recantation for his abuse of MILTON.

In 1927, the year in which he became a British subject, Eliot was baptized and confirmed in the Anglican Church, having been raised as a Unitarian. In the preface to the volume of essays *For Lancelot Andrewes* (1928), Eliot declared himself to be 'classicist in literature, royalist in politics, and anglo-catholic in religion'; the first fruit of this spiritual attitude was *Ash Wednesday* (1930). In the 1930s, Eliot developed his writing of poetic drama. The religious plays *The Rock* (1934) and *Murder in the Cathedral* (1935) further confirmed his reputation as the poet who had revived the verse play in the interests of Catholic devotion. *The Family Reunion* (1939) was a kind of comedy which dealt with social concerns; and his later dramas, *The Cocktail Party* (1950), *The Confidential Clerk* (1954) and *The Elder Statesman* (1958), were to be West End successes rather than sacred plays in church precincts. Catholic doctrine inspired all these plays, sometimes to the embarrassment of critics and audience alike.

Eliot's standing was greatly enhanced in 1948, when he received the Order of Merit and was awarded the Nobel Prize in literature. In 1957 he married Valerie Fletcher, his secretary at Faber. His poem 'A Dedication to My Wife' celebrates the evidently happy marriage that followed. Following his death, Valerie Eliot edited his letters, the first volume of which appeared in 1988.

🕮 There is a valuable biographical introduction by Valerie Eliot in the 1971 edition of *The Waste Land*. See also James E Miller, *T S Eliot: The Making of an American Poet* (2005); P Ackroyd, *T S Eliot* (1984); L Gordon, *Eliot's Early Years* (1977) and *Eliot's New Life* (1988).

mother, whom she loved devotedly, in 1836, and soon afterwards took entire charge of the household. She was taught German and Italian, and music, of which she was passionately fond throughout her life. She was also an immense reader. In 1841 her father moved to Coventry, and there she met Charles Bray, a writer on the philosophy of necessity from the phrenological standpoint, and his brother-in-law, Charles Hennell, who had published a rationalistic *Inquiry Concerning the Origin of Christianity* (1838). Under their influence she rejected her earlier evangelical Christianity. In 1844 she took on the laborious task of translating DAVID STRAUSS's *Leben Jesu* (published 1846). After her father's death in 1849 she travelled on the Continent. Returning to England in 1850 she began to write for the *Westminster Review*, becoming assistant editor in 1851. She was also at the centre of a literary circle, two of whose members were HERBERT SPENCER and G H LEWES. She translated LUDWIG FEUERBACH's *Essence of Christianity* (1854), the only book that bore her real name. Her intimacy with Lewes grew, and in 1854 she formed a liaison with him which lasted until his death in 1878. In 1856 she attempted her first story, 'The Sad Fortunes of the Rev. Amos Barton', the beginning of *Scenes of Clerical Life*. It came out in *Blackwood's Magazine* in 1857, and at once showed that a new author of great power had emerged. 'Mr Gilfil's Love Story' and 'Janet's Repentance' followed quickly. Her first novel, *Adam Bede* (1859), had enormous success. *The Mill on the Floss* (1860), *Silas Marner* (1861), *Romola* (1863) and *Felix Holt* (1866) appeared next. Her first poem, 'The Spanish Gypsy' (1868), was followed by 'Agatha' (1869), 'The Legend of Jubal' (1870) and 'Armgart' (1871), and in 1871–72 appeared *Middlemarch*, generally considered her greatest work. After that came *Daniel Deronda* (1876), her last great novel. After the death of Lewes, she was coaxed to write *Impressions of Theophrastus Such* (1879), a volume of miscellaneous essays. She fell in love with John Walter Cross (d.1924), a friend of long standing whom she married in 1880. As a novelist, George Eliot will probably always stand among the greatest of the English school. Her pictures of farmers, tradesmen and the lower middle class, generally of the Midlands, are hardly surpassed in English literature. 🕮 Kathryn Hughes, *George Eliot: The Last Victorian* (1998)

Eliot, Sir John 1592–1632
English statesman
Born in Port Eliot, near St Germans in Cornwall, he entered Parliament in 1614, was knighted in 1618 and in 1619 was appointed vice-admiral of Devon. Previously a follower of the 1st Duke of BUCKINGHAM, he broke with him in 1625 and was instrumental in securing his impeachment. In 1628 he denounced arbitrary taxation and helped to force the Petition of Right from CHARLES I. After further protests against the king he was sent to the Tower of London, where he was kept in confinement until his death.

Eliot, John, *known as* **the Apostle to the Indians** 1604–90
English missionary
Born in Widford, Hertfordshire, he graduated at Cambridge (1622), took orders, left England for America on religious grounds and settled in Roxbury, Massachusetts (1632), where he served as pastor. In 1646 he began to preach to the Native Americans at Nonantum, establishing his native converts, who numbered 3,600 in 1674, in 14 self-governing settlements nearby. However the numbers diminished after the war with the native King PHILIP (1675), and at the hands of the English. He was the author of *A Primer or Catechism, in the Massachusetts Indian Language* (1653). He also translated the Bible into the Native American language (1661–63), which was the first Bible printed in America. His book *The Christian Commonwealth* (1659) was suppressed for its republican sentiments.

Eliot, Sir Thomas *See* ELYOT, SIR THOMAS

Eliot, T S *See panel p500*

Eliott, George Augustus *See* HEATHFIELD, 1ST BARON

Elis-Thomas, Dafydd, Baron 1946–
Welsh nationalist leader
He was born in Carmarthen, Wales. After an early career as a lecturer, writer and broadcaster, and as a self-proclaimed Marxist, he became a Plaid Cymru MP in 1974 and president of the party in 1984. He remained as party leader until 1991, when he resigned over growing criticism that he was moving to the right and ignoring the interests of traditional Welsh nationalists. He was created a life peer in 1992. Since 1999 he has been presiding officer of the Welsh National Assembly.

Elisha 9th century BC
Hebrew prophet
He succeeded ELIJAH and his activities are portrayed in 1 Kings 19 and 2 Kings 2–9, 13. He was active in Israel under several kings from AHAB to Jehoash, was credited with miraculous signs, counselled kings, and attempted to guide the nation against her external enemies, especially the Syrians.

Elizabeth I *See panel p502*

Elizabeth II 1926–
Queen of Great Britain and Northern Ireland, and Head of the Commonwealth
Born in London, she was formerly known as Princess Elizabeth Alexandra Mary, the first daughter of the Duke and Duchess of York. She grew up in London and Windsor, and was educated at home with her sister, Princess MARGARET. She became the heir to the throne upon the unexpected accession of her father as GEORGE VI in 1936, and as a teenager began to undertake official engagements, both alongside her parents and on her own. In 1947 she married her third cousin, Philip Mountbatten, who

Elizabeth I 1533–1603
Queen of England and Ireland from 1558

Elizabeth was the daughter of HENRY VIII and his second wife, ANNE BOLEYN. When her father married his third wife, JANE SEYMOUR, in 1536, Elizabeth and her elder half-sister Mary Tudor (the future MARY I) were declared illegitimate by Parliament in favour of Jane Seymour's son, the future EDWARD VI. Her childhood was precarious but well educated, and unlike her sister she was brought up in the Protestant faith. In 1549, during the reign of Edward VI, she rejected the advances of THOMAS SEYMOUR, Lord High Admiral of England, who was subsequently executed for treason. On Edward's death she sided with her half-sister Mary against Lady JANE GREY and the Earl of WARWICK (Northumberland), but her identification with Protestantism aroused the suspicions of her Catholic sister, and she was imprisoned in the Tower.

Her accession to the throne in 1558 on Mary's death was greeted with general approval, as she was seen as an earnest advocate of religious tolerance after the persecutions of the preceding reigns. Under the able guidance of Sir WILLIAM CECIL (later Lord Burghley) as secretary of state, Mary's Catholic legislation was repealed, and the Church of England was fully established (1559–63). Cecil also gave support to the Reformation in Scotland, where MARY, QUEEN OF SCOTS had returned in 1561 to face conflict with the Calvinist reformers led by JOHN KNOX. She was forced to abdicate in 1567, and in 1568 escaped to England, where she was placed in confinement and soon became a focus for Catholic resistance to Elizabeth. The Northern Rebellion of 1569 was followed by the RIDOLFO plot (1570); and also in 1570 the papal bull *Regnans in Excelsis* pronounced Elizabeth's excommunication and absolved her Catholic subjects from allegiance to her.

Government retribution against English Catholics, at first restrained, became more repressive in the 1580s. Several plots against the queen were exposed, and the connivance of Mary in yet another plot in 1586 (the BABINGTON conspiracy) led to her execution at Fotheringhay Castle in 1587. The harsher policy against Roman Catholics, England's support for the Dutch rebellion against Spain, and the licensed piracy of men like Sir JOHN HAWKINS and Sir FRANCIS DRAKE against Spanish possessions in the New World – all combined to provoke an attempted Spanish invasion in 1588. The Great Armada launched by PHILIP II of Spain reached the English Channel, only to be dispersed by storms and English harassment, and limped back to Spain after suffering considerable losses.

For the remainder of her reign, Elizabeth continued her policy of strengthening Protestant allies and dividing her enemies. She allowed marriage negotiations with various foreign suitors but with no real intention of getting married or of settling the line of succession; but with the death of Mary, Queen of Scots, she was content to know that the heir-apparent, JAMES VI of Scotland, was a Protestant. She indulged in romances with court favourites such as Robert Dudley, Earl of LEICESTER, and later with Robert Devereux, Earl of ESSEX, until his rebelliousness led to his execution in 1601.

Her fiscal policies caused growing resentment, with escalating taxation to meet the costs of foreign military expeditions, and famine in the 1590s brought severe economic depression and social unrest, only partly alleviated by the Poor Law of 1597, which charged parishes with providing for the needy. England's vaunted sea power stimulated voyages of discovery, with Drake circumnavigating the known world in 1577 and Sir WALTER RALEIGH mounting a number of expeditions to the North American coast in the 1580s, but England's only real Elizabethan colony was Ireland, where opportunities for English settlers to enrich themselves at the expense of the native Irish were now exploited more ruthlessly than ever before and provoked a serious rebellion under HUGH O'NEILL, Earl of Tyrone, in 1597.

At Elizabeth's death in March, 1603, the Tudor dynasty came to an end and the throne passed peacefully to the Stuart JAMES VI of Scotland as James I of England. Her long reign had coincided with the emergence of England as a world power and the flowering of the English Renaissance; and the legend of the 'Virgin Queen', assiduously promoted by the queen herself and her court poets and playwrights, outlived her to play a crucial part in shaping the English national consciousness.

📖 S Bassnett, *Elizabeth the First* (1988); Roy Strong, *The Cult of Elizabeth: Elizabethan Portraiture and Pageantry* (1977); J B Black, *The Reign of Elizabeth, 1558–1603* (2nd edn, 1959); J E Neale, *Queen Elizabeth* (1934, reissued as *Queen Elizabeth I*, 1971).

> 'I know that I have the body of a weak and feeble woman, but I have the heart and stomach of a king – and a king of England too; and think foul scorn that Parma or Spain, or any Prince of Europe, should dare to invade the borders of my realm.'
>
> –From her address at Tilbury on the approach of the Spanish Armada (1588).

was created Duke of EDINBURGH on the eve of their wedding and later styled Prince Philip. The couple's first child, Prince CHARLES, was born the next year, and was followed by Princess ANNE (1950), Prince ANDREW (1960) and Prince EDWARD (1964). In 1952, while on an official visit to Kenya, Elizabeth was proclaimed Queen on the death of her father. Her coronation in 1953 was the first major royal event to be televised, and was broadcast in 44 languages and seen by over 20 million people, many of whom had never watched television before. She is Queen of Great Britain and Northern Ireland, Canada, Australia, New Zealand and several other countries, and is the Head of the Commonwealth. The Queen has aimed to modernize the monarchy and make it more informal, introducing luncheon parties for distinguished individuals and pioneering royal walkabouts. In addition to performing her ceremonial duties, she has always shown a keen interest in governmental matters and a strong personal commitment to the Commonwealth. She undertakes several hundred engagements annually. In 2002 she celebrated her Golden Jubilee, which was marked by several days of celebrations in Britain and throughout the Commonwealth. 📖 Ronald Flamini, *Sovereign: Elizabeth II and the Windsor Dynasty* (1992)

Elizabeth, *known as* **the Winter Queen** or **the Queen of Hearts** 1596–1662
Queen of Bohemia
The eldest daughter of JAMES VI AND I of Scotland and England and ANNE OF DENMARK, she married FREDERICK V, Elector Palatine, in 1613. Intelligent and cultured, she enlivened the court at Heidelberg by her presence and, with Frederick's championship of the Protestant cause and his brief, unhappy winter as King of Bohemia, she became a potent symbol of the Protestant cause in Europe. Driven from Prague and deprived of the palatinate by MAXIMILIAN I of Bavaria, the couple lived in exile in The Hague with their numerous children, continually beset by financial difficulties. Frederick died in 1632, Elizabeth outliving him by 30 years. Her son, Charles Louis, was restored to the palatinate in 1648, but his mother remained in Holland. She died in London while on a visit to her nephew, the newly restored CHARLES II of England.

Elizabeth, *originally* **Lady Elizabeth Bowes-Lyon** 1900–2002
Queen Mother, and Queen Consort of Great Britain and Northern Ireland
Born in London, the daughter of the future 14th Earl of Strathmore, she spent much of her childhood at Glamis Castle in Scotland, where she helped the nursing staff in World War I. In 1920 she met the Duke of York, second son of GEORGE V, and they were married in 1923. Princess Elizabeth (later ELIZABETH II) was born in 1926 and Princess MARGARET in 1930. The Duke of York came to the throne as King GEORGE VI (1936). She was with the king when Buckingham Palace was bombed (1940), and travelled with him to visit heavily damaged towns throughout the War. After George VI's death (1952), the Queen Mother continued to perform public duties, becoming a widely loved figure. She never retired and, from 1953 onwards, found a new interest in restoring the Castle of Mey, on the Pentland Firth, as her favourite Scottish home. In 1978 she became Lord Warden of the Cinque Ports, the first woman to hold the office. She was an expert fisherwoman and had great enthusiasm for horse-racing. In 2000 her 100th birthday was widely celebrated. 📖 Grania Forbes, *My Darling Buffy: The Early Life of the Queen Mother* (1997)

Elizabeth 1st century BC–1st century AD
Biblical character
Elizabeth was the wife of the priest Zechariah. Though the marriage was childless for many years, her husband received

an angelic prophecy concerning the birth and mission of a son who would prepare people for the message of JESUS CHRIST. The apparent impossibility of this struck Zechariah dumb until their son John (later known as JOHN THE BAPTIST) was born, while Elizabeth believed and was thankful. When MARY was told by the angel Gabriel about the forthcoming birth of Jesus, she was also informed that her kinswoman Elizabeth was pregnant and went to visit her. When the two women met, Elizabeth prophesied, blessing Mary's faith, and stayed about three months.

Elizabeth of Hungary, St 1207–31
Hungarian princess
Born in Sáros, Patak, she was the daughter of Andreas II of Hungary. At the age of four she was betrothed to Louis IV, Landgrave of Thuringia, and educated at his father's court, the Wartburg, near Eisenach. At 14 she was married, and had two children. Louis, who admired her for her long prayers and generous charity, died as a crusader at Otranto in 1227, and Elizabeth was exiled by her husband's brother. At length, she was received into the monastery of Kitzingen by the abbess, her aunt. She was canonized by Pope GREGORY IX in 1235. Her feast day is 17 November.

Elizabeth of Portugal, St, *known in Portugal as* **Isabel** 1271–1336
Portuguese saint and Queen of Portugal
The daughter of King Peter III of Aragon and great-niece of ELIZABETH OF HUNGARY, she married King Denis of Portugal and as queen became known for her piety, social concern and generosity, despite the corrupt life of the court. The institutions she founded included a hospital, an orphanage and a women's hostel. She earned the sobriquet of 'peacemaker' because she brought about the reconciliation of Denis and their rebellious son Afonso, who had attempted an armed coup. In 1336 she rode on to the battlefield between the forces of her son (now Afonso IV) and Alfonso of Castile to avert a war between Portugal and Castile. Though her marriage was an unhappy one, she nursed her unfaithful husband through a long illness before his death. Afterwards she retired to live near a Poor Clare convent which she had founded in Coimbra. She was canonized in 1625 and her feast day is 8 July.

Elizabeth of Romania *See* CARMEN SYLVA

Elizabeth Petrovna 1709–62
Empress of Russia
Born in Kolomenskaye, near Moscow, the daughter of PETER I, the Great, and CATHERINE I, she was passed over for the succession in 1727, 1730 and 1740, finally becoming empress on the deposition of Ivan VI in 1741. Attractive and vivacious, she enjoyed food, clothes, parties and guards officers. A war with Sweden (1741–43) was brought to a successful conclusion, but her animosity towards Frederick II, the Great (1712–86) led her to take part in the War of the Austrian Succession (1740–48) and the Seven Years' War (1756–63), which helped to establish Russia as a European power. At home, she contributed considerably to the extension and entrenchment of serfdom. She founded Russia's first university (in Moscow) and built the Winter Palace (now the Hermitage Art Gallery) in St Petersburg. She was succeeded by her nephew, PETER III. 🕮 R N Bain, *The Daughter of Peter the Great* (1899)

Elkin, Stanley Lawrence 1930–95
US writer and academic
He was born in Brooklyn, New York City, and educated at the University of Illinois, where he took a PhD. Some of his short stories in *Criers and Kibitzers, Kibitzers and Criers* (1966) are noteworthy, and *The Living End* (1979) – three stories about heaven and hell – is his most widely read book, but he is pre-eminently a novelist. *Boswell* (1964), about a professional wrestler obsessed with death and greatness, marked his debut and was followed by *A Bad Man* (1967), *The Dick Gibson Show* (1971) and *The Franchiser* (1976), all fixated with modern USA. His other novels include *George Mills* (1982), set in Sultanic Turkey, *The Magic Kingdom* (1985), *The Rabbi of Lud* (1987) and *MacGuffin* (1993). 🕮 P Bailey, *Reading Stanley Elkin* (1985)

Elkington, George Richards 1801–65
English inventor and manufacturer
Based in Birmingham, he introduced electroplating from 1832 in conjunction with his cousin, Henry Elkington (1810–52).

Ellery, William 1727–1820
US politician
Born in Newport, Rhode Island, he sat in the Congress of 1776, and was one of the signatories of the Declaration of Independence.

Ellesmere, Baron *See* EGERTON, SIR THOMAS

Ellet, Charles 1810–62
US civil engineer
Born in Bucks County, Pennsylvania, he was educated in France, and built the first wire suspension bridges in the USA, including one over the Schuylkill River at Fairmount (1842) and another over the Ohio River at Wheeling (1849). He also advocated and demonstrated the use of ram-boats, then built and commanded a fleet of them on the Mississippi, capturing Memphis (1862), but was killed in action. He was known as the 'BRUNEL of America'.

Ellington, Duke *See panel p504*

Elliotson, John 1791–1868
English physician
Born in London, he trained at Edinburgh, Cambridge and at hospitals in London. He became professor at London University (1831), and helped to establish University College Hospital. His conversion to MESMERISM (1837) cost him his professorship in 1838, but hardly injured his large practice. One of the first to use the stethoscope, he experimented on the action of drugs, encouraged clinical study, and founded the Phrenological Society.

Elliott, Denholm 1922–92
English actor
Born in London, he studied at RADA and served in the RAF during World War II, spending three years in a POW camp. He made his stage debut at Amersham in *The Drunkard* (1945) and his London debut the following year in *The Guinea Pig. Venus Observed* (1950) won him the Clarence Derwent award, whilst his New York debut in *Ring Round the Moon* (1950) received the Donaldson award. Following his first film appearance in *Dear Mr Prohack* (1949) he played breezy juveniles and heroic servicemen in films like *The Cruel Sea* (1953) and *They Who Dare* (1954). *Nothing But the Best* (1964) launched a second career as a distinguished character actor, playing largely rogues, bounders and life's losers, in films like *Alfie* (1966), *Saint Jack* (1979), *September* (1987), *Scorchers* (1992) and *Noises Off* (1992). A prolific performer in all media, and an inveterate scene-stealer, he won British Film awards for *Trading Places* (1983), *A Private Function* (1984) and *Defence of the Realm* (1985).

Elliott, Grace Dalrymple c.1758–1823
Scottish courtesan
She was the daughter of an Edinburgh advocate, and in 1771 married Sir John Elliott, MD (1736–86), who divorced her in 1774. She was the mistress successively or simultaneously of Lord Valentia, Lord Cholmondley, the Prince of Wales (the future GEORGE IV), Charles Windham, GEORGE SELWYN, Philippe Égalité (Duke of ORLÉANS), and many others. She died at Ville d'Avray near Sèvres, leaving an interesting but untrustworthy *Journal of My Life during the Revolution*, which was published in 1859 by her granddaughter.

Elliott, Herbert James 1938–
Australian athlete
Born in Perth, Western Australia, he was winner of the gold medal in the 1,500 metres at the 1960 Olympics in Rome, and his time of 3 minutes 35.6 seconds for that event was unbeaten for seven years. He was never beaten on level terms over a mile or 1,500 metres, and he ran the sub-four-minute mile 17 times. He was noted for the rigour and severity of his training schedule.

Elliott, Ramblin' Jack, *professional name of* **Elliott Charles Adnopoz** 1931–
US folk singer
Born in Brooklyn, New York, he rebelled against his middle-class upbringing by joining a rodeo as a teenager. He met WOODY GUTHRIE in 1949, working with him until striking out on his own. He travelled and performed widely in Europe in the 1950s, and established a semi-legendary presence on the folk scene, becoming an important influence on PETE SEEGER, BOB DYLAN and others. He recorded only intermittently, preferring to devote time to his love of boats and the sea. His music draws on both folk and country sources, peppered with more eclectic borrowings, and he uses his wit and engaging delivery to overcome his technical limitations as a singer. He enjoyed a renaissance thanks to the alt-country genre that became popular in the late 1990s, and the album *I Stand Alone* (2006) is one of several strong latter-day releases. 🕮 Aiyana Elliott, *The Ballad of Ramblin' Jack* (2000)

Elliott, Sumner Locke 1917–1991
US novelist and playwright
Born in Sydney, Australia, the son of the writer Sumner Locke (1881–1917), he became an actor and wrote several plays, of

Ellington, Duke (Edward Kennedy) 1899–1974
US jazz pianist, composer and bandleader

Duke Ellington was born in Washington, DC, into a middle-class black family. He received his only formal musical education as a child through elementary piano lessons, but he was influenced while young by church music and burlesque theatre. After forming bands to play at parties and dances he led his first regular group, the Washingtonians, when he succeeded Elmer Snowden as its leader in New York in 1925. In the next three years, his band increased in size from six to ten or more players. In 1927 he began a four-year residence at the Cotton Club in Harlem, which offered him not only a high-profile live engagement (albeit to segregated white-only audiences) but regular access to radio airtime, then crucial in the dissemination of popular music, and recording contracts. His work at this time placed him in the forefront of orchestral jazz, a position he maintained throughout his career.

His music of this period was largely written and performed as the accompaniment for dance shows; but he began to emerge as the most important of jazz composers, and went on to produce around 2,000 works. He worked closely with his staff arranger, BILLY STRAYHORN, who was an important composer in his own right, and wrote the tune which became the band's signature, 'Take the A Train'. He led some of the greatest big bands ever assembled by a jazz musician, and was highly skilled at drawing the optimum contributions from his outstanding soloists. He wrote much of his music with their specific qualities and sound characteristics in mind, a process that has led some critics to suggest the band rather than the piano was his real instrument, and he was not averse to borrowing themes and ideas from his sidemen and incorporating them within his trademark sophisticated compositions.

He broke new ground in jazz by writing extended works and suites like *Black, Brown and Beige* (1943) and *The Perfume Suite* (1945). Such works remained a regular feature of his output until the end of his career. His use of instrumental colours and textures and innovative chord voicings make him a major figure in 20th-century music, irrespective of genre, although his real genius is arguably more accurately reflected in his shorter works, or in individual segments of extended suites, rather than genuine long-form works. Many of his song-length pieces, such as 'Mood Indigo' and 'Sophisticated Lady', became part of the standard jazz repertoire. He also wrote and performed music for films, the most important of which were *Anatomy of a Murder* (1959) and *Paris Blues* (1961). His son, Mercer Ellington (1919–96), continued to run the orchestra after his father's death, but an irreplaceable element was missing.

📖 His vast discography is among the richest in jazz. He also wrote a highly selective memoir, *Music Is My Mistress* (1973), which stops short of being a proper autobiography. Mercer Ellington also wrote a memoir, *Duke Ellington in Person* (1978), with critic Stanley Dance, whose own *The World of Duke Ellington* (1970) remains useful. See also J L Collier, *Duke Ellington* (1987).

> Ellington explained the genesis of a famous phrase inextricably associated with him in a 1965 interview: '[Trumpeter] Bubber [Miley] was the first man I heard use the expression, "It don't mean a thing if it ain't got that swing". Everything, and I repeat, everything had to swing'.

which *Rusty Bugles* (1948) achieved great success and some notoriety when its realistic army language was heavily censored. By that time he had left for the USA, where he settled, becoming a US citizen in 1955. He was a scriptwriter for NBC and CBS television when his play, *Buy Me Blue Ribbons*, was produced on Broadway in 1951. His semi-autobiographical novel *Careful, He Might Hear You* (1963), dealing with the traumatic experiences of his own childhood and the battle for his custody, was translated into many languages and became a successful film in 1983. He also wrote *Water under the Bridge* (1977), which begins with the opening of Sydney Harbour Bridge in 1932 and ends in the early 1950s.

Ellis, Alexander John, *originally surnamed* **Sharpe** 1814–90
English philologist
Educated at Shrewsbury, Eton and Trinity College, Cambridge, he wrote much on mathematical, musical and philological questions, and did more than any other scholar to advance the scientific study of phonetics, early English pronunciation and existing English dialects. His major work was *Early English Pronunciation* (1869–89).

Ellis, Bret Easton 1964–
US novelist
He was born in Los Angeles and educated at Bennington College, Vermont. *Less Than Zero* (1985), published when he was an undergraduate, was hailed by critics for its stark combination of grim subject matter and detached, documentary-style prose, drawing comparisons to Salinger's *The Catcher in the Rye*. *The Rules of Attraction* (1987) continued his dissection of the jaded amorality of 'Generation X' youth. *American Psycho* (1991), a graphically violent novel about a serial killer which Ellis describes as a satirical black comedy, established his celebrity but provoked a public debate about his literary merits. *The Informers* (1994), *Glamorama* (1998) and *Lunar Park* (2005), a semi-autobiographical ghost story, have followed.

Ellis, Frank 1905–2006
English radiation oncologist
Born in Sheffield, he obtained his medical degree from Sheffield University. A pioneer of cancer radiotherapy, he set up and headed radiotherapy departments in three hospitals, the future Weston Park in Sheffield (1930–43), the Royal London (1943–50) and the Churchill in Oxford (1950–70). His many contributions to radiotherapy include the concept of the 'nominal standard dose', various formulae to determine radiation doses, the development of filters to spare sensitive organs and ways of determining the right dose to remove a tumour but save surrounding tissue. After retiring from the National Health Service in 1970 he continued to lecture and publish internationally, serving as visiting professor at several US universities. He received the Royal College of Radiologists' gold medal in 1987 and an OBE in 2000.

Ellis, George 1753–1815
British satirist and poet
Born in Grenada, West Indies, the son of a planter, he won early popularity with his *Poetical Tales by Sir Gregory Gander* (1778). He contributed satires on WILLIAM PITT, the Younger, and others to the Whig *Rolliad*, though later he was co-founder with GEORGE CANNING of the Tory *Anti-Jacobin*. A friend of Sir WALTER SCOTT, he edited *Specimens of Early English Poets* (1790) and *Specimens of Early English Romances in Metre* (1805).

Ellis, (Henry) Havelock 1859–1939
English physician and writer
Born in Croydon, Surrey, the son of a sea captain, he travelled widely in Australia and South America before studying medicine at St Thomas's Hospital, London. In 1891 he married Edith Lees and throughout his life had a number of female followers, notably OLIVE SCHREINER. His interest in human biology and his own personal experiences led him to compile his seven-volume *Studies in the Psychology of Sex* (1897–1928, rev edn 1936), which caused tremendous controversy, and was banned in Great Britain. He also founded the 'Mermaid' series on Elizabethan and Jacobean dramatists, and wrote *My Life* (1940).

Ellis, Ruth, *née* **Neilson** 1926–55
Welsh murderess
Born in Rhyl, Clwyd, she was a nightclub hostess. She shot dead her former lover, David Blakely, a racing-car driver, outside a Hampstead pub in April 1955. The case achieved notoriety as a 'crime passionnel', as Blakely was trying to extricate himself from their tempestuous, often violent, relationship at the time of his murder. Ellis was the last woman to receive the death penalty in Great Britain, and was hanged on 13 July 1955.

Ellis, William 1794–1872
English missionary
Born in London, he was sent as a missionary to the South Sea Islands, but his wife's illness obliged him to return home in 1825, after which he became secretary to the London Missionary Society. After 1853 he made four visits to Mada-

gascar. His works included a history of Madagascar (1838), *Madagascar Revisited* (1867) and *The Martyr Church of Madagascar* (1870).

Ellis, William Webb 1805–72
English sportsman
According to a rather doubtful tradition, he was a pupil at Rugby School in 1823 when he broke the rules by picking up and running with the ball during a game of association football, thus inspiring the new game of rugby football.

Ellison, Ralph Waldo 1914–94
US novelist
Born in Oklahoma City, he studied music at Tuskegee Institute and served during World War II in the US Merchant Marine. He met RICHARD WRIGHT in 1937, through whom he gained a new perspective on social and racial injustice, and who encouraged him to write. His early work appeared in *New Challenge* magazine. *Invisible Man* (1952), his only completed novel, is the quest of a nameless black man, travelling from the South to the North, in search of a personal and racial identity. Allusive but highly original and ingenious, it had a seminal influence on other black writers and won the National Book award. He was Albert Schweitzer Professor in the Humanities at New York University (1970–79). He published two books of essays, *Shadow and the Act* (1964) and *Going to the Territory* (1986), but the long-awaited second novel never appeared. 🕮 R Dietze, *Ellison: The Genesis of an Artist* (1982)

Ellmann, Richard 1918–87
US biographer and academic
Born in Detroit, Michigan, he graduated from Yale, and after World War II lived in Dublin for a year, where he wrote his first book, *Yeats; the Man and the Mask* (1948). Some ten years later came his masterful biography of JAMES JOYCE, now accepted as one of the great 20th-century biographies, as much for its elegant composition as its astute judgement and erudition. A professor at Northwestern University, Illinois, until 1968, he moved to Oxford in 1970 as Goldsmiths' Professor of English Literature, remaining there until his death. His biography of OSCAR WILDE (1987) a 20-year labour of love, was published posthumously to wide acclaim. Selected essays were published under the title *a long the riverrun* in 1988. 🕮 *Literary Biography: Inaugural Lecture* (pamphlet, 1971)

Ellroy, James, *also known as* **Lee Earle Ellroy** 1948–
US writer
He was born in Los Angeles; in 1958, his mother was murdered in a case that remains unsolved. As a young man, during more than a decade of petty crimes and sporadic homelessness, he spent much time reading in public libraries. In 1979 he began his first novel, *Brown's Requiem* (1981), which was followed by numerous crime novels throughout the 1980s. *The Black Dahlia* (1987), based on a case similar to his mother's murder, was hailed as a tour de force; it was followed by three further novels, *The Big Nowhere* (1988), *LA Confidential* (1990) and *White Jazz* (1992), together constituting the 'LA Quartet'. His most recent trilogy, which includes *American Tabloid* (1995) and *The Cold Six Thousand* (2001), concerns politics and racism in US history. 🕮 *My Dark Places* (1996)

Ellsworth, Lincoln 1880–1951
US explorer
Born in Chicago, the son of a millionaire financier, he was the first person to fly over both the North Pole (in the airship *Norge* with UMBERTO NOBILE and ROALD AMUNDSEN in 1926) and the South Pole (in 1935). In his Antarctic explorations (1935, 1939), he claimed thousands of square miles of territory for the USA (Ellsworth Land). He led an expedition to the Andes in 1924, helped survey the route for the Canadian transcontinental railway, and in 1931 financed Sir GEORGE HUBERT WILKINS's transarctic submarine expedition in the *Nautilus*.

Ellsworth, Oliver 1745–1807
US politician and jurist
Born in Windsor, Connecticut, he studied at Yale (from which he was dismissed for mischievous behaviour) and the College of New Jersey, then practised law in Connecticut and became active in politics, representing the colony at the Continental Congress (1777–84). As a delegate to the Constitutional Convention (1787) he helped engineer the Connecticut Compromise, which gave all states equal representation in the US Senate and based representation in the House on population, thus resolving the conflict between large and small states that threatened to scuttle the convention. As a senator from Connecticut (1789–96), he was chiefly responsible for the Judiciary Act of 1789, which established the nation's federal judicial structure. He served as chief justice of the Supreme Court (1796–1800), and is noted for his defence of the tradition of English common law against the attacks of anti-Federalists.

Ellwood, Thomas 1639–1713
English Quaker
He was born in Crowell, Oxfordshire, and converted to Quakerism at the age of 20. In 1662 he befriended MILTON, and in 1665 he hired a cottage in Chalfont St Giles so that the latter could escape the plague in London. Milton gave him the manuscript of *Paradise Lost* to read, and Ellwood's criticisms inspired Milton to write *Paradise Regained*.

Elman, Mischa 1891–1967
US violinist
Born in Talnoye, Ukraine, he was a child prodigy. His debuts were in Berlin (1904), London (1905) and New York (1908), and they confirmed him as an exceptional violinist. He settled in the USA in 1911 and became a US citizen in 1923.

Elms, Lauris Margaret 1931–
Australian singer
Born in Melbourne, Victoria, she studied in Paris and made her debut (1957) at Covent Garden, London, in VERDI's *Un Ballo in Maschera* ('A Masked Ball'), becoming principal resident artist there. She toured Australia with JOAN SUTHERLAND in 1965, and appeared at the royal opening of the Sydney Opera House in 1973. She has appeared with all the leading Australian companies, and is renowned for her Azucena in Verdi's *Il Trovatore* ('The Troubadour'). A frequent broadcaster, she gives regular lieder recitals with pianist Geoffrey Parsons. She has made a number of successful recordings, including *Peter Grimes* under the composer BENJAMIN BRITTEN. She published her autobiography, *The Singing Elms*, in 2001.

Eloi or **Eligius, St** 588–658
Flemish Bishop of Noyon and Apostle of Flanders
He was originally a goldsmith, and so became patron of smiths. His feast day is 1 December.

Elphinstone, George Keith, Viscount Keith 1746–1823
Scottish naval officer
Born in Elphinstone Tower, Stirling, he joined the navy in 1761 and fought in the American War of Independence (1775–83). In the French Revolutionary wars (1792–1800) he helped capture Toulon. Promoted to rear admiral, he commanded the expedition that captured Cape Town (1795) and Ceylon (1796). He helped to quell the Nore mutiny in 1797, and took Malta and Genoa (1800). He landed ABERCROMBY's army at Aboukir Bay (1801). As commander of the Channel fleet (1812–15), he arranged NAPOLEON I's transfer to St Helena.

Elphinstone, William 1431–1514
Scottish churchman and statesman
Born in Glasgow, he was ordained priest, spent five years in France, and lectured on law at Paris and Orleans. He was appointed Bishop of Ross in 1481, and of Aberdeen in 1488. Under JAMES IV he was ambassador to France (1491) and Keeper of the Privy Seal from 1492. It was chiefly through his influence that the first printing press – that of Walter Chepman (c.1473–1538) and Andrew Myllar – was established in Scotland (1507). The University of Aberdeen (King's College) was founded by him in 1494. His *Breviarium Aberdonense* (1509–10) was printed by Chepman and Myllar.

Els, Ernie 1969–
South African golfer
Born in Johannesburg, he established his reputation in 1992 by winning a hat trick of the South African Open, Professional Golfers' Association and Masters titles. In 1994 he became only the fourth foreign-born player since 1927 to win the US Open, a feat he repeated in 1997. His other achievements have included an unprecedented three successive World Match Play championship wins (1994–96), victory in the World Cup in 1996 and victory in the Open Championship at Muirfield in 2002.

Elsasser, Walter Maurice 1904–91
US physicist
Born in Mannheim, Germany, he studied at Göttingen University before leaving Germany in 1933 for the Sorbonne, Paris. In 1936 he moved to the USA, working first at the California Institute of Technology (1936–41) and then for the US Signal Corps in radar research (1941–46). He subsequently held professorships at the universities of Pennsylvania, Utah, Princeton and Maryland. In 1939 he suggested a theory which provided an explanation of the Earth's permanent magnetic field. Considering the Earth as having a core of molten iron which would not retain any permanent magnetism, he

suggested that eddy currents in the liquid core would cause the Earth to behave as an electromagnet. He was also interested in the relationship between the biological sciences and quantum mechanics.

Elsheimer, Adam 1578–1610
German painter
Born in Frankfurt, he worked in Venice after 1598 and in Rome after 1600. Basing his style on a close study of TINTORETTO and other Italian masters, he excelled in the portrayal of atmosphere and effects of light, and exerted a profound influence on the development of German landscape painting.

Elssler, Thérèse 1808–78 and **Fanny** 1810–84
Austrian dancers
Born in Vienna, the younger of the two sisters, Fanny, was the more popular, with more than 25 years of successful world touring, first in Europe and then in the USA (1840–42), the only major Romantic ballerina to go there. As well as joining her sister on stage as a performer, Thérèse was one of the few female choreographers of the time. Fanny retired in 1851, and Thérèse married Prince Adalbert of Prussia, nephew of FREDERICK WILLIAM III, in 1850.

Elster, Johann Phillipp Ludwig Julius 1854–1920
German physicist
Born in Bad Blankenburg, he studied with HANS GEITEL in Heidelberg and then in Berlin, and both were appointed teachers of mathematics and physics at the Herzogliches Gymnasium in Wolfenbüttel, near Brunswick. They produced the first photoelectric cell and photometer and a Tesla transformer, but refused to take out patents, believing that such inventions should benefit all. Among other achievements, they determined in 1899 the charge on raindrops from thunderclouds, showed that lead in itself is not radioactive, and that radioactive substances producing ionization cause the conductivity of the atmosphere.

Elstracke, Renold c.1590–1630
Belgian engraver
Born probably in Hasselt, he was one of the earliest engravers in England. He worked chiefly for booksellers, and his engravings include portraits of the kings of England and MARY, QUEEN OF SCOTS.

Elton, Ben(jamin Charles) 1959–
English comedian and writer
Born in Catford, South London, he made his first professional appearance as a stand-up comedian at the Comic Strip Club in 1981. At the forefront of the alternative comedy movement, he co-wrote such popular television comedies as the anarchic *The Young Ones* (1982, 1984), *Happy Families* (1985), *Blackadder II* (1986), *Blackadder the Third* (1987), *Blackadder Goes Forth* (1989) and *The Thin Blue Line* (1995–96). A regular fixture on the cabaret circuit and television, he has also written stage plays, bestselling novels, a musical and a film. His own television shows include *Ben Elton – The Man from Auntie* (1990; 1994). From 2000, he began working on stage musicals, creating *The Beautiful Game* (2000) with ANDREW LLOYD WEBBER and *We Will Rock You* (2003) with the rock band Queen. In 2005 he returned to stand-up, embarking on a tour of the UK, Australia and New Zealand.

Elton, Charles Sutherland 1900–91
English ecologist
Born in Liverpool, he studied at Liverpool College and New College, Oxford, and spent most of his career there (1936–67). His four Arctic expeditions in the 1920s and his use of trappers' records for fur-bearing animals led to his classic books on animal ecology. His talents were turned to reduction of food loss in World War II through his studies of rodent ecology. His work on animal communities led to the recognition of the ability of many animals to counter environmental disadvantage by change of habitats, and to the use of the concepts of 'food chain' and 'niche'. His books include *Animal Ecology* (1927), *Animal Ecology and Evolution* (1930) and *The Pattern of Animal Communities* (1966). He exercised a formative influence on animal ecology through his founding and long editorship of the *Journal of Animal Ecology*, and was elected FRS in 1953.

Éluard, Paul, *pseudonym of* **Eugène-Émile Paul Grindel** 1895–1952
French poet
Born in Saint-Denis, he was founder with ANDRÉ BRETON and LOUIS ARAGON of the Surrealist movement, and was also involved with the Dada movement. He became France's leading 20th-century love poet. His early poetry showed Surrealist influence, as in *Le Devoir et l'inquiétude* (1917, 'Duty and Anxiety'), *Capitale de la douleur* (1926, 'The Capital of Pain') and *La Rose publique* (1934, 'The Public Rose'), but his chief Surrealist poetry is in *Les Dessous d'une vie ou la pyramide humaine* (1926, 'The Underbelly of Life or the Human Pyramid'). In 1938 he broke with the movement. During World War II he was active in the Resistance, joined the Communist Party in 1942, and circulated his poetry secretly (*Poésie et vérité*, 1942, and *Au rendez-vous allemand*, 1944). His postwar work was more lyrical and personal, especially his last volume, *Le Phénix*. English translations include *Thorns of Thunder* (1936), *Selected Writings* (1951) and *Last Love Poems* (1980). 🕮 P Nugent, *Paul Éluard* (1974)

Elvehjem, Conrad Arnold 1901–62
US biochemist
Born in McFarland, Wisconsin, he studied and spent most of his career at Wisconsin University, ultimately becoming president (1958–62). Studying pellagra, a human dietary disease, in 1935, Elvehjem showed that liver extracts cured pellagra-like symptoms caused by a steroid-limited diet. In 1937 he confirmed and extended his original finding by curing the related disease, black tongue in dogs. A year later, with collaborators, he showed that nicotinic acid also cured the canine disease, and they correctly anticipated its efficacy for curing pellagra in humans. Elvehjem also showed that certain elements are essential in animal nutrition in trace levels, including copper (necessary in the formation of haemoglobin), cobalt and zinc.

Elvström, Paul 1928–
Danish yachtsman
Born in Copenhagen, he is the only yachtsman to have won four individual Olympic gold medals: in the Firefly class in 1948 and the Finn class in 1952, 1956, and 1960. He was also the first to win the same event at four consecutive Olympics. He came fourth in the Tornado class at the 1984 Olympics, his seventh Games, with his daughter, Trine.

Elway, John Albert 1960–
US player of American football
Born in Port Angeles, Washington, Elway played as an All-American quarterback at Stanford University and became well known for snatching victory through last-minute heroics. He joined the Denver Broncos in 1983 and led them to runners-up position in the Super Bowl three times before finally securing victory in the Super Bowl in 1998 and 1999. Voted National Football League Most Valuable Player in 1987 and having established several records for a quarterback, he retired at the end of the 1998 season.

Elwyn-Jones, Frederick Elwyn-Jones, Baron 1909–89
Welsh jurist and Labour politician
Born in Llanelli, Dyfed, and educated there and at the universities of Aberystwyth and Cambridge, he was called to the Bar in 1935. He was a member of the British War Crimes Executive at Nuremberg in 1945, and was MP for the Plaistow division of West Ham (1945–50), West Ham South (1950–74) and Newham South from 1974. He was involved in the founding of Amnesty International (1961). In 1964 he was appointed Attorney-General by HAROLD WILSON and while in this post he led the team of counsel to the investigating tribunal of the Aberfan pit disaster (1966). He was Lord High Chancellor (1974–79), and Lord of Appeal (1979–89).

Elyot or **Eliot, Sir Thomas** c.1490–1546
English scholar and diplomat
Born in Wiltshire, the son of a jurist, he was educated at Oxford and the Middle Temple, and in 1523 became clerk of the Privy Council. In 1531–32, as ambassador to Emperor CHARLES V, he visited the Low Countries and Germany, having orders to procure the arrest of WILLIAM TYNDALE. His chief work, *The Boke Named the Gouernour* (1531), is the earliest English treatise on moral philosophy. He also wrote a medical handbook, based on classical sources, *The Castel of Helth* (1538), and compiled the first English dictionary (1538).

Elytis, Odysseus, *pseudonym of* **Odysseus Alepoudelis** 1911–96
Greek poet and Nobel Prize winner
Born in Heraklion, Crete, he was educated at Athens University and at the Sorbonne, Paris, and worked in broadcasting and as a critic of art and literature. His pseudonym is said to combine the three most prevalent themes in his work: Greece, hope and freedom. He was influenced by the Surrealists, both French and Greek, and his career as a poet dates from 1929. His early poems exude a love of Greece, sun and life, but after war experience in Albania a natural joie de vivre is set against violence and the imminence of death. His greatest achievement was *To axion esti* (1959, Eng trans *The Axion Esti*, 1974), a long, optimistic poem

which took 14 years to write. His final poetic collection ('West of Sorrow') was published in Greek in 1995. In 1979 he was awarded the Nobel Prize in literature and in 1989 was made a Commander of the French Legion of Honour. 🕮 I Ivask, *Elytis: Analogies of Light* (1980)

Elzevir
Dutch family of printers
Based at Leyden, Amsterdam and elsewhere, between 1592 and 1681 they issued some 1,600 editions of Latin, French and Italian classics. The founder of the family, Louis (1540–1617), was born in Louvain, and settled in Leyden. Five of his sons carried on the business: Matthias, Louis, Aegidius (Giles), Jodocus (Joost) and Bonaventura; and Abraham and Isaac, sons of Matthias, were also notable. A Daniel, another Louis, another Abraham, and Peter all maintained the traditions of the house.

Emanuel I *See* MANOEL I

Emecheta, (Florence Onye) Buchi 1944–
British novelist
Born near Lagos, Nigeria, she was educated at the Methodist Girls' High School, Lagos, and the University of London, and has worked as a teacher, librarian and social worker. She moved to England in 1962 and has since lived in London. She writes of marriage as a battle of the sexes, and her novels are powerful social documents, graphic in their depiction of man's inhumanity to woman. Her work includes *In the Ditch* (1972) and *Second-Class Citizen* (1974), which were published together as *Adah's Story* (1983), *The Slave Girl* (1977), *The Joys of Motherhood* (1979), *The Rape of Shavi* (1983), *Gwendolen* (1989), focusing on the cultural isolation of a young Caribbean immigrant, *Kehinde* (1994) and *The New Tribe* (2000). She has also written children's stories and television plays. In 2004 she was awarded the OBE. 🕮 *Head Above Water* (1986)

Emerson, Gladys Anderson 1903–84
US biochemist
Born in Caldwell, Kansas, she was educated at Oklahoma College for Women, and later studied nutrition and biochemistry at the University of California, Berkeley. Following the identification of vitamin E, Emerson succeeded in isolating it in a pure form. At the Merck Pharmaceutical Company in New Jersey she studied the role of vitamin B deficiencies in diseases, and also investigated the possible dietary causes of cancer. In 1956 she became professor of nutrition at UCLA.

Emerson, Ralph Waldo 1803–82
US poet and essayist
Born in Boston, of a long line of ministers, he graduated from Harvard in 1821 and became pastor of the Second Church (Unitarian) in Boston (1829), but his controversial views resulted in his resignation. In 1833 he went to Europe and visited THOMAS CARLYLE, beginning their 38-year correspondence the next year. He moved to Concord, Massachusetts (1834), and in 1836 published a prose rhapsody entitled *Nature*, which was followed by 'The American Scholar', an oration delivered at Harvard. His 'address before the Divinity Class, Cambridge, 1838' produced a great sensation, especially among the Unitarians. In 1849 he revisited England to lecture on *Representative Men* (published in 1850). He also published *English Traits* (1856), *The Conduct of Life* (1860), *Society and Solitude* (1870) and *Letters and Social Aims* (1876). He was an idealist or transcendentalist in philosophy, a rationalist in religion, and a firm advocate of individualism and spiritual independence. 🕮 G W Allen, *Emerson: A Biography* (1981)

Emerson, Roy Stanley 1936–
Australian tennis player
Born in Queensland, he holds the record for the most grand slam titles – 28 (twelve singles and 16 doubles) – and his record twelve grand slam singles titles was only surpassed by PETE SAMPRAS in 2000. These victories, however, were at a time when the majority of his rivals had turned professional and were ineligible for those championships. A classic all-court player, he is celebrated as the first man to play a serve-volley game for five sets. He won the French Open singles in 1963 and 1967, the Wimbledon singles in 1964 and 1965, the Australian Open singles six times, and the US Open singles in 1961 and 1964. He held the French doubles title for five consecutive years (1961–65) with different partners.

Emett, Rowland 1906–90
English cartoonist and designer of eccentric mechanical displays
Born in London, he studied art at Birmingham College and worked in a local commercial studio until 1939. A draughtsman during World War II, he helped develop the jet engine. After his earliest joke drawings for *Punch* (1939), he evolved a unique and fantastic style depicting a quaint, Victorian world of his own, culminating in Nellie the steam engine of the Far Tottering and Oyster Creek Railway. He built a replica of his railway for the Festival of Britain (1951). Many working models followed, including the famous Guinness Clock.

Emin, Tracey 1963–
English artist
Born in London and brought up in Margate, she studied at Maidstone College of Art and the Royal College of Art. She gained widespread public attention with various 'confessional' installation works such as *Everyone I Have Ever Slept With 1963–95* (1995, destroyed by fire in 2004), which featured a small tent with dozens of names embroidered inside, and the stained and detritus-littered *My Bed* (1998). Her major exhibitions include *Minky Manky* (1995), *Personal Effects* (1998) and *You Forgot to Kiss My Soul* (2001), which featured a large wooden helter-skelter. She founded the Tracey Emin Museum, London, in 1996. In 2004 she made a film, *Top Spot*, which was controversial for its graphic depiction of a girl's suicide. 🕮 Carl Freedman and Honey Luard, *Tracey Emin* (2006)

Eminem, *properly* **Marshall Bruce Mathers III** 1972–
US rapper
He was born in Kansas City, Missouri, into a working-class family. After moving to Detroit as a child he developed his talent in local rap 'battles' and eventually came to the attention of DR DRE, who became his mentor. He is a skilled wordsmith, with a fluent command of complex rhythms. His vitriolic, black humour has aroused controversy, particularly in lyrics expressed by his alter ego Slim Shady, often containing ferocious verbal attacks on his mother, his wife and other pop stars. His second album, *The Marshall Mathers LP* (2000), set a record as the fastest-selling rap album of all time. 🕮 Nick Hasted, *The Dark Story of Eminem* (2005)

Eminescu, Mihail, *pseudonym of* **Mihail Eminovici** 1850–89
Romanian poet
Born in Ipoteşti, Moldavia, he studied at Czernowitz, Vienna and Berlin, and worked as a librarian, then an editor. In 1883 he suffered a mental collapse, with recurring bouts of madness until his death. He wrote lyric versé which was widely read and translated posthumously. His works were collected in four volumes in 1939, and his masterpiece is generally considered to be the long poem *Luceafărul* (1883). He is remembered for creating an influential school of poetry. 🕮 G Calinescu, *Mihail Eminescu* (1965)

Emin Pasha, *originally* **Eduard Schnitzer** 1840–92
German doctor, explorer and linguist
Born in Neisse, of Jewish parents, he studied medicine at Breslau and Berlin, and practised at Scutari (Albania), where he adopted the Muslim faith. After 1876, as Emin Effendi, he was in the Egyptian service, becoming bey and pasha. General CHARLES GORDON appointed him chief medical officer of the Equatorial Province, and in 1878 made him governor of the province. A skilful linguist, Emin Pasha added enormously to the knowledge of African languages, made important surveys and wrote valuable geographical papers, and sent to Europe rich collections of plants and animals. He was 'rescued' by HENRY MORTON STANLEY's expedition in 1889, and, isolated by disaffection within his troops, he accompanied Stanley to Zanzibar, but immediately returned to extend the German sphere of influence around Lake Victoria. He never regained his old influence, and was marching for the west coast when he was murdered by Arabs in the Manyema country. 🕮 A Symons, *Emin, the Governor of Equatoria* (1928)

Emlyn, Thomas 1663–1741
English Presbyterian clergyman
He was born in Stamford, Lincolnshire. The first person in England to describe himself as 'Unitarian', he was imprisoned and fined for blasphemy (1702–05).

Emma d.1052
Queen of England
The daughter of Richard II, Duke of Normandy, she was a forceful, ambitious and unscrupulous survivor, who played a leading part in English political life for 40 years. She married ETHELRED II, the Unready (1002), and had a son, EDWARD THE CONFESSOR. She fled to Normandy when SVEIN HARALDSSON, (Fork-Beard), invaded England (1013), returning to England (1017) to marry Ethelred's successor, KNUT SVEINSSON (Canute). She tried to put their son, HARDAKNUT KNUTSSON, on the throne after Knut's death (1035), but was thwarted by HAROLD I KNUTSSON, (Harefoot),

her stepson, and fled to the Flemish court of Baldwin the Pious, father-in-law of WILLIAM THE CONQUEROR. When Hardaknut was elected king (1040), Emma returned to England, but on his death (1042) his successor, her other son, Edward the Confessor, confiscated her property when she apparently favoured his rival, MAGNUS I, the Good, of Norway.

Emmerich, Anna Katharina, *known as* **the Nun of Dülmen** 1774–1824
German visionary
Born near Coesfeld, she entered the Augustinian Order in 1802, and from 1812 bore the stigmata of Christ's Passion. Her revelations were recorded by the poet CLEMENS VON BRENTANO.

Emmet, Robert 1778–1803
Irish nationalist
Born in Dublin, he joined the United Irishmen in 1789, travelled on the Continent, interviewed NAPOLEON I and TALLEYRAND in 1802, and returned the next year to spend his fortune of £3,000 on muskets and pikes. He plotted to seize Dublin Castle and secure the viceroy, in conjunction with the expected French invasion of England, but was forced to begin his insurrection prematurely and it failed. He escaped to the Wicklow Mountains, but returning for a last meeting with his sweetheart, Sarah, daughter of the orator JOHN CURRAN, was arrested and hanged. 🕮 Helen Landreth, *The Pursuit of Robert Emmet* (1948)

Empecinado, El, *originally* **Juan Martín Díaz** 1775–1825
Spanish general and patriot
He gained distinction as a guerrilla leader against the French in the Peninsular War (1808–14) and became a general (1814). However, he petitioned FERDINAND III to re-establish the Cortes and was banished to Valladolid (1818). On the outbreak of the insurrection in 1820 he joined the Constitutionalists. On the Absolutists' triumph in 1823 he was exhibited in an iron cage, and fatally stabbed by a soldier.

Empedocles fl.c.450 BC
Greek philosopher and poet
He was born in Acragas (Agrigento), Sicily, and was by tradition a doctor, politician and soothsayer. He attracted various colourful but apocryphal anecdotes – such as the story that he jumped into Mount Etna's crater to support his own prediction that he would one day be taken up to heaven by the gods. His thought reflects both the Ionian and the Eleatic traditions, but we have only fragments of his writings from two long poems. *On Nature* describes a cosmic cycle in which basic elements, earth, air, fire and water, periodically combine and separate under the influence of dynamic forces akin to what we might call 'love' and 'strife'. This notion was adopted by ARISTOTLE and the doctrine of four elements became central to Western thought for the following 2,000 years. *Purifications* has a Pythagorean strain and describes the Fall of Man and the transmigration and redemption of souls. Empedocles was the first to demonstrate that air has weight. He was also aware of the possibility of an evolutionary process, and believed that some creatures less well-adapted to life on Earth had perished in the past. 🕮 Jean Bollack, *Empédocle* (1965)

Empson, Sir Richard d.1510
English politician
In 1491 he became speaker of the House of Commons, and in 1504 high steward of Cambridge University and chancellor of the Duchy of Lancaster. Throughout HENRY VII's reign he was employed in exacting taxes and penalties due to the Crown. His conduct, which he defended as strictly legal, was regarded by the people as tyrannical, and in the second year of HENRY VIII's reign he was convicted of tyrannizing and constructive treason, and beheaded on Tower Hill with his partner EDMUND DUDLEY.

Empson, Sir William 1906–84
English poet and critic
Born in Howden, Yorkshire, he was educated at Winchester and Magdalene College, Cambridge, where he studied mathematics and literature. His first work of criticism was his university dissertation, published as *Seven Types of Ambiguity* (1930). From 1931 to 1934 he was professor of English literature in Tokyo, and at Peking (1937–39, 1947–53), having been in the meantime with the BBC's Far Eastern Service. In 1953 he became professor of English literature at Sheffield University. His other critical works include *The Structure of Complex Words* (1951) and *Milton's God* (1961). *Collected Poems*, noted for wit, concentration and complexity of thought, was published in 1955. 🕮 R Gill, *William Empson: The Man and His Work* (1974)

Encina or **Enzina, Juan del** c.1469–c.1530
Spanish dramatist and poet
Born near Salamanca, he was secretary to the first Duke of ALVA, then musical director in Pope LEO X's chapel at Rome, and later prior of León in Spain. He wrote *Cancionero* (1496, 'Songbook') and in 1521 a poetical account of his pilgrimage to Jerusalem. His fame rests on 14 dramatic poems, seven of which were the first secular poems to be dramatized in Spain (1492). 🕮 J R Andrews, *Juan del Encina* (1959)

Encke, Johann Franz 1791–1865
German astronomer
Born in Hamburg, he was educated at the University of Göttingen, where he studied mathematics under CARL FRIEDRICH GAUSS. In 1816 he became assistant to Bernhard von Lindenau at the Seeberg Observatory, near Gotha, then succeeded him as director in 1822. Later he moved to Berlin (1825), where he superintended the building of a new observatory, which had been promoted by Baron ALEXANDER VON HUMBOLDT, and became professor of astronomy at the university there. His principal work was concerned with facilitating computations of the movements of comets and asteroids, and included a method of calculating the gravitational influences of the planets on the motion of comets. On investigating the orbit of a comet discovered by JEAN-LOUIS PONS in Marseilles (1818), he demonstrated that the same comet had been observed on previous returns and deduced that it moved around the Sun in an elliptic orbit with a period of only 3.25 years. Encke's comet, as it is called, has the shortest known period of any comet. Encke was twice awarded the gold medal of the Royal Astronomical Society (1823, 1830).

Endecott, John c.1588–1665
English colonialist
Born in Dorchester, Dorset, he landed in America in 1628 to manage a plantation near Salem, where he also established an independent Puritan church. After JOHN WINTHROP arrived as governor with the main body of colonists in 1630, he served as an assistant. He headed a violent expedition against the Native Americans in 1636, was deputy governor (1641–44, 1650, 1654), and governor six times from 1644 to 1665.

Ender, Kornelia 1958–
German swimmer
Born in Bitterfeld, she won three Olympic silver medals in 1972, aged 13, and between 1973 and 1976 broke 23 world records (the most by a woman under modern conditions). At the 1973 and 1975 world championships she won ten medals, including a record eight golds. In 1976 she became the first woman to win four gold medals at one Olympic Games, in the 100-metres and 200-metres freestyle, the 100-metres butterfly and the 4 × 100-metres medley relay.

Enderby, Samuel fl.1830–39
English entrepreneur
The grandfather of General CHARLES GORDON, he was one of a firm of London merchants who fitted out three Antarctic expeditions (1830–39). The name Enderby Land was given in 1831 to a tract of Antarctica by its discoverer, John Biscoe, a whaler employed by the company.

Enders, John Franklin 1897–1985
US bacteriologist and Nobel Prize winner
Born in West Hartford, Connecticut, he studied literature at Harvard, but turned to science and received a PhD in bacteriology. He researched antibodies for the mumps virus, and in 1946 founded a laboratory for poliomyelitis research in Boston. He shared, with FREDERICK ROBBINS and THOMAS WELLER, the 1954 Nobel Prize in physiology or medicine for the cultivation of polio viruses in human tissue cells, thus greatly advancing virology and making possible the development of a polio vaccine by JONAS EDWARD SALK. In 1962 Enders developed an effective vaccine against measles.

Endlicher, Stephan Ladislaus 1804–49
Austrian botanist
Born in Pressburg (now Bratislava, Slovakia), he entered the archiepiscopal seminary in Vienna in 1823, became keeper of the botany department at the Naturaliencabinet in 1836, professor of botany at the University of Vienna, and director of the botanic garden in 1840. He formulated a system of plant classification, publishing *Genera Plantarum* (1836–41, five supplements 1840–50) along with other botanical works. He was also a noted Sinologist, publishing a book on the elements of Chinese grammar.

Endo, Shusako Paul 1923–96
Japanese novelist and short-story writer
He was born in Tokyo. After his parents divorced, he and his mother converted to Roman Catholicism. He graduated in French literature from Keio University, then studied for several years in Lyons. He has gained wide recognition in the West and, although he is considered by some Japanese to be 'un-Japanese', has won many literary awards. In 1981 he was elected to the Nihon Geijutsuin, the Japanese Arts Academy. His books include *Chimmoku* (1966, Eng trans *Silence*), *Umi to dokuyaku* (1972, Eng trans *The Sea and the Poison*), *Obakasan* (1974, Eng trans *Wonderful Fool*), *Iesu no shogai* (1978, Eng trans *Life of Jesus*, Dag Hammarskjöld Prize) and *Samurai* (1982, Noma Literary Prize). He also published a play, *Ogon no kuni* (1966, Eng trans *The Golden Country*). Inveterately a moralist, he is often labelled 'the Japanese GRAHAM GREENE'.

Enesco, Georges, *originally* **George Enescu** 1881–1955
Romanian composer
Born in Dorohoiu, he studied in Vienna and under JULES MASSENET and GABRIEL FAURÉ in Paris (from 1895). Successful as a virtuoso and teacher of the violin (his pupils included YEHUDI MENUHIN), he was also active as a composer. His works include music in the Romanian national style, the opera *Oedipe* (1936), three symphonies, and orchestral and chamber music.

Enfield, Harry (Henry Richard) 1961–
English comedian
Born in London, he studied at York University. He made his television breakthrough in 1987 with the characters Loadsamoney and Stavros on *Saturday Live*, gaining his own series, *Harry Enfield's Television Programme* (1990, 1992) and *Harry Enfield and Chums* (1994, 1997), which introduced the characters Tim Nice-but-Dim, Wayne and Waynetta Slob, and Kevin and Perry the teenagers (who later starred in the 2000 feature film *Kevin and Perry Go Large*). Enfield also appeared in the first series of *Men Behaving Badly* (1992) and presented *Harry Enfield's Guide to the Opera* (1993).

Engel, Johann Carl Ludwig 1778–1840
Finnish architect
Born in Berlin, Germany, he planned the layout of Helsinki as capital of Finland, and designed many churches and public buildings.

Engel, Johann Jakob 1741–1802
German writer
Born in Parchim, he intended to follow his father as a Lutheran pastor, but instead became a teacher. He wrote a number of plays, mainly in the comic manner of GOTTHOLD LESSING, but is best known for the novel *Herr Lorenz Stark* (1795) and popular philosophical books, including the four-volume work *Der Philosoph für die Welt* (1775–1803, 'The World's Philosopher'). 🕮 C Schroeder, *Johann Jakob Engel* (1897)

Engelbart, Douglas Carl 1925–
US computer scientist
Born on a farm near Portland, Oregon, he studied at Oregon State University and, after war service in the navy, at the University of California. He subsequently took up a position at the Stanford Research Institute, where he became a pioneer of ARPANET, the forerunner of the Internet. The first public trials of Englebart's best-known invention, the computer mouse, took place in 1968 and he also helped develop many of the features that are now integral to modern computing, including e-mail, groupware and hypermedia. In 1989 Engelbart founded the Bootstrap Institute for research into advanced computer technologies. 🕮 Thierry Bardini, *Bootstrapping: Douglas Engelbart, Coevolution, and the Origins of Personal Computing* (2001)

Engelbrekt or **Engelbrektsson** c.1390–1436
Swedish rebel and military commander
He was born in Bergslagen into a German iron-mining family. When the war between King ERIK VII of Pomerania and the Hanseatic League disrupted iron exports, he led a series of rebellions against the king, and in 1434 forced the Council of the Realm to retract its oath of loyalty to Erik. In 1435 at a meeting at Arboga ('the first Swedish parliament'), he was appointed commander-in-chief of the Realm. The Council soon reversed its decision, but a year later Erik was again deposed, and Engelbrekt was re-appointed. Shortly after this Engelbrekt was murdered in a personal quarrel. He is celebrated as a hero of national liberation in a play by STRINDBERG, among other works of literature.

Engels, Friedrich 1820–95
German philosopher and politician
Born in Barmen, he lived mostly in England after 1842. Having gained experience from working in his father's cotton factory in Manchester and established contacts with the Chartist movement, he wrote *Condition of the Working Classes in England in 1844* (1845). He first met KARL MARX at Brussels in 1844 and collaborated with him on the *Communist Manifesto* (1848), and returned to Germany with his mentor in 1848 to work on the *Neue Rheinische Zeitung* and fight on the barricades at Baden during the unsuccessful revolution of that year. After Marx's death in 1883, Engels devoted the remaining years of his life to editing and translating Marx's writings, including the second (1885) and third (1894) volumes of the influential *Das Kapital*, which established the materialist interpretation of history. 🕮 Gustav Mayer, *Friedrich Engels: A Biography* (1936)

Enghien, Louis Antoine Henri de Bourbon, Duc d' 1772–1804
French soldier
He was the only son of Louis Henri Joseph, Prince de Condé. He commanded the emigré vanguard from 1796 to 1799. At the Peace of Lunéville (1801) he went to reside in Baden. NAPOLEON I, claiming that Enghien was involved in a conspiracy against him, violated the neutral territory of Baden, captured the duke and took him to Vincennes. In 1804 he was shot in the castle moat. Boulay de la Meurthe said of this act that it was worse than a crime, it was a blunder – a saying often wrongly attributed to Fouché or to TALLEYRAND.

Engle, Robert F(ry), III 1942–
US economist and Nobel Prize winner
Born in Syracuse, New York, he studied physics at Williams College and physics and economics at Cornell University. Over a distinguished academic career at the Massachusetts Institute of Technology, the University of California, San Diego, and New York University, he developed a method for analysing unpredictable movements in financial market prices. He and SIR CLIVE GRANGER shared the 2003 Nobel Prize in economics for methods of analysing economic time series.

Engler, (Heinrich Gustav) Adolf 1844–1930
German systematic botanist
Born in Sagan, Lower Silesia (now Zagan, Poland), he was educated at Breslau, and worked as keeper of the Royal Herbarium, Munich (1871–78), then became professor of botany and director of the botanic garden at Kiel University (1878–84). From 1884 to 1889 he was professor of botany at Breslau University and began *Die natürlichen Pflanzenfamilien* (1887–1915). In 1889 he became professor of botany at Berlin University, where he developed the present botanic garden in the Dahlem district, and began *Das Pflanzenreich* (107 vols, 1900–53). In 1892 he published *Syllabus der Pflanzenfamilien*, his system of classification, which for many years was the most widely used.

Ennius, Quintus c.239–169 BC
Roman poet
Born in Rudiae, Calabria, probably of Greek extraction, he is said to have served in the Punic Wars, and returned from Sardinia to Rome with CATO, the Elder. In Rome he taught Greek, gained the friendship of SCIPIO AFRICANUS, the Elder, and attained the rank of Roman citizen. He introduced the Greek hexameter into Latin, using it in his *Annales*, which became the model for Latin epic poetry. In addition, he wrote satires, didactic verse, epigrams and numerous plays. Only fragments of his works survive. 🕮 O Skutsch, *The Annals of Quintus Ennius* (1953)

Enoch
Biblical character
The son of Jared and father of Methuselah, he was depicted as extraordinarily devout, and therefore was translated directly into heaven without dying (Genesis 5.24). In the Graeco-Roman era his name became attached to Jewish apocalyptic writings allegedly describing his visions and journeys through the heavens (1, 2, and 3 Enoch).

Enquist, Per Olov 1934–
Swedish playwright and novelist
Born in Hjoggböle, his best-known work for the theatre is a collection of three plays published in 1981 under the collective title *Triptych*, comprising *Lesbian Night* (about STRINDBERG and his wife), *To Phaedra* and *The Life of the Slow-Worms* (about HANS CHRISTIAN ANDERSEN). His major novel is *The Legionaries* (1968), a controversial documentary about the expulsion of Baltic refugees to Russia from Sweden after World War II.

Ensor, James Sidney Ensor, Baron 1860–1949
Belgian painter and engraver
He was born in Ostend, of Anglo-Belgian parentage, and trained at the Brussels Academy. He rarely left Ostend and was neglected as an artist for much of his life, but is now regarded as a pioneer of Expressionism. He is best known for his macabre carnival paintings of fighting skeletons and masked revellers, such as his *Entry of Christ into Brussels* (1888), which owe a great deal to HIERONYMUS BOSCH, PIETER BRUEGHEL, the Elder, and GOYA. His later work is less fierce.

Ensor, Sir Robert Charles Kirkwood 1877–1958
English radical journalist and historian
Born in Somerset, he was educated at Winchester and Oxford. He joined *The Manchester Guardian* as a leader-writer, and edited an anthology of speeches and writings, *Modern Socialism* (1904). He was active in the Labour movement and the Fabian Society (1907–19). He worked as leader-writer on the liberal *Daily News* (1909–11) and on the radical *Daily Chronicle* (1912–30), but left the *Daily Chronicle* when it merged with the *News*. He then became a lecturer at the London School of Economics (1931–32), and held various other academic posts. Chosen to write the late Victorian volume of the *Oxford History of England*, he produced *England 1870–1914* (1936), a masterpiece combining personal knowledge with massive research. His *Courts and Judges* (1933) compared the British, French and German legal systems.

Enver Pasha 1881–1922
Turkish soldier and politician
A leader in the 1908 revolution of Young Turks, as the pro-German minister of war he steered the Turkish government into a secret alliance with Germany directed against Russia in August 1914. After the Turkish surrender in 1918 at the end of World War I, he fled to Russia and was killed in an insurrection in Turkestan. 🕮 E E Ramsaur, *The Young Turks* (1957)

Enzensberger, Hans Magnus 1929–
German poet
He was born in Kaufbeuren in Bavaria, and educated at Erlangen, Freiburg, Hamburg and Paris. He served with the militia towards the end of World War II then worked as an editor for the Süddeutscher Rundfunk broadcasting company at the end of the 1950s. His first significant poetry was published in *Verteidigung der Wölfe* (1957, 'Defence of the Wolves'). The first English translations of his work were made by MICHAEL HAMBURGER (1966). His radical style is influenced by Georg Trakl, GOTTFRIED BENN and BERTOLT BRECHT, and is most apparent in his long poem *Der Untergang der Titanic* (1978, Eng trans *The Sinking of the Titanic*, 1980). His other poetic works include *Die Gedichte* (1983, 'Poems') and *Kiosk* (1995). The 'mathematical adventure' *Der Zahlenteufel* (Eng trans *The Number Devil*, 2005) appeared in 1997. Also an essayist and a writer for stage and screen, he has translated a wide range of literature and, like GÜNTER GRASS, has been a commentator on European unification.

Enzina, Juan del *See* ENCINA, JUAN DEL

Eoin *See* MACNEILL, JOHN

Eötvös, Roland von, Baron 1848–1919
Hungarian physicist
Born in Pest (Budapest), the son of the writer and statesman Josef von Eötvös (1813–71), he studied at the universities of Königsberg and Heidelberg, and was appointed to a professorship at Budapest University in 1872. His early research on liquids produced the 'Eötvös law', which described the relationship between surface tension, molar volume and temperature for liquids. His subsequent research into gravitation led him to devise the sensitive Eötvös torsion balance in 1888, to conclusively demonstrate GALILEO's assertion that all bodies have the same acceleration in a gravitational field, and to provide a vital stepping-stone in ALBERT EINSTEIN's later development of the general theory of relativity.

Epaminondas c.418–362 BC
Theban general
His victory at the Battle of Leuctra (371 BC) broke the military power of Sparta and made Thebes the most powerful state in Greece. Two years later, with PELOPIDAS, he marched into the Peloponnesus, and incited some of the allies to desert Sparta. In 368 BC war was renewed, and Epaminondas made a somewhat unsuccessful invasion into the Peloponnesus. To atone for this he advanced into Arcadia, and near Mantinea broke the Spartan phalanx, but was killed there.

Épée, Charles Michel, Abbé de l' 1712–89
French educationalist
Born in Versailles, he became a preacher and canon at Troyes, but was deprived of his functions for being a Jansenist. In 1765 he began to educate two sisters who could not hear or speak, and invented a language of signs. He also pioneered the use of 'spatial aids' to assist the memorizing of, for example, vocabulary by associating words with particular locations in space. His attempts succeeding, at his own expense he founded an institute for those who could neither hear nor speak, which was converted into a public institution two years after his death.

Ephialtes d.461 BC
Athenian politician
Predecessor of PERICLES in the leadership of the democratic party, he enacted the constitutional reforms (462–461 BC) which broke the power of the Areopagus and ushered in radical democracy at Athens. He was assassinated in 457 BC by his political opponents.

Ephraem Syrus, St c.306–378 AD
Syrian churchman
Born in Nisibis, he went to a desert school near Edessa (now Urfa, Iraq) after the capture of Nisibis by the Persians in AD 363. Devoting himself to prayer, fasting and the study of the Scriptures, Ephraem's orthodoxy, asceticism and learning were the admiration of his contemporaries, and his works, written in a fervid and popular style, maintain his reputation as an orator and poet. Part of them have come down to us in Syriac, part in Greek, Latin and Armenian translations. His feast day is 18 June.

Ephron, Nora 1941–
US screenwriter and director
Born in New York City, to parents who were both writers, she was educated at Wellesley College. Her debut screenplay collaboration *Silkwood* (1983) earned her the first of three Academy Award nominations, the others being two of the most successful romantic comedies of the period, *When Harry Met Sally* (1989) and *Sleepless in Seattle* (1993). She adapted *Heartburn*, her novel about her failed marriage to CARL BERNSTEIN, one of the *Washington Post* journalists who uncovered the Watergate affair, for the screen in 1985. Amongst other work, she has written and directed *Mixed Nuts* (1994), *Michael* (1997), *You've Got Mail* (1998) and *Bewitched* (2005). She has also published collections of essays, including *Crazy Salad* (1975) and *I Feel Bad About My Neck* (2006).

Epicharmus c.540–450 BC
Greek poet
Born in Cos or Syracuse, he wrote 35 or more comedies, performed in Syracuse. Only fragments of his works survive. 🕮 L Berk, *Epicharmus* (1964)

Epictetus 1st century AD
Greek Stoic philosopher and moralist
Born in Hierapolis, Phrygia, he was a slave in Rome. After he was freed he taught philosophy there until banished by Emperor DOMITIAN along with other philosophers in AD 90, when he settled at Nikopolis in Epirus. His pupil, the historian ARRIAN, collected his sayings into a manual entitled the *Enchiridion* and into eight volumes of *Discourses*, of which four survive. Epictetus taught a gospel of inner freedom through self-abnegation, submission to providence and the love of one's enemies.

Epicurus c.341–270 BC
Greek philosopher and founder of the Epicurean school
Born on the island of Samos, he visited Athens at the age of 18, opened a school at Mitylene (310 BC) and taught there and at Lampsacus. He returned to Athens and established a successful school of philosophy (305 BC), known as the 'Gardens', where he led a life of temperance and simplicity. The Gardens became the model for other Epicurean communities, or communes, where members could live peacefully in friendship. Only three letters and a few fragments of his 300 or so works survive and most of our knowledge of his doctrines comes from CICERO, PLUTARCH and, in particular, LUCRETIUS. Epicurus believed that pleasure is the chief good and the only goal of morality, by which he meant freedom from pain and anxiety, not (as the term 'epicure' has since come to mean) one who indulges sensual pleasures without stint. These ethical views are supported by a materialistic psychology and an atomistic physics (largely derived from DEMOCRITUS) which demonstrate that the world operates on mechanical principles and that neither death nor the gods are to be feared, that the

Erasmus, Desiderius c.1466–1536
Dutch humanist and scholar, one of the most influential figures of the Renaissance

Erasmus was born in Rotterdam, and educated by the Brethren of the Common Life at Deventer. He joined an Augustinian monastery at Steyn near Gouda in 1487, and was ordained a priest in 1492; but he was already reacting against scholasticism and was drawn to the Humanists. He studied and taught in Paris, and later in most of the cultural centres in Europe, including Oxford (1499) and Cambridge (1509–14), where he was professor of divinity and Greek. He travelled widely, writing, teaching and meeting Europe's foremost intellectuals (including, in England, JOHN COLET and THOMAS MORE).

He published many popular, sometimes didactic works, including *Adagia* (*Adages*, 1500, 1508), *Enchiridion Militis Christiani* (*Handbook of a Christian Soldier*, 1503) and the famous *Encomium Moriae* (*In Praise of Folly*, 1509). He also published scholarly editions of classical authors and the Church Fathers, and edited the Greek New Testament (1516). He became strongly critical of the pedantries and abuses of the Catholic Church, and his *Colloquia familiaria* of 1518 helped prepare the way for MARTIN LUTHER and the Reformation; but he also came to oppose the dogmatic theology of the Reformers and specifically attacked Luther in *De Libero Arbitrio* (1523). Despite these controversies he enjoyed great fame and respect in his last years, which he spent in Basel.

📖 J M Sowards, *Desiderius Erasmus* (1975); R H Bainton, *Erasmus* (1969).

In regione caecorum rex est luscus.

In the country of the blind, the one-eyed man is king.

– *Adages* bk 3, century 4, no.96 (c.1500).

gods do not intervene in the world or punish the guilty, and that the human soul and body are a combination of atoms that dissolve and perish together. Epicureanism and Stoicism were the two great philosophies of the Hellenic period, and both found many followers in Rome and endured for many centuries.

Epimenides fl. 7th century BC
Semi-legendary Greek poet and priest
Born in Crete, he is said to have lived for 299 years, during 57 of which he received, while sleeping, the divine inspiration that determined his future career. GOETHE wrote a poem on the subject, *Des Epimenides Erwachen*. Epimenides is said to have gone about 600 BC to Athens, where he stayed and with SOLON reformed the Athenian constitution. He was the 'prophet' quoted by ST PAUL in Titus 1.12, but it is unlikely that he wrote the epic poems ascribed to him. 📖 H Demoulin, *Epimenides de Crète* (1901)

Épinay, Louise Florence, *née* **Tardieu d'Esclavelles** 1726–83
French writer
She was born in Valenciennes. After her marriage at the age of 19 to a 'worthless' cousin, she held a brilliant salon at La Chevrette and formed liaisons with JEAN JACQUES ROUSSEAU, FRIEDRICH MELCHIOR GRIMM and others. Her *Conversations d'Émilie* (1774), a work on education, won her a gold medal from the Académie Française.

Epiphanes *See* ANTIOCHUS IV

Epiphanius, St c.315–403 AD
Palestinian Christian Church Father
Born in Palestine, he founded a monastery near Eleutheropolis in AD 335. He was Bishop of Constantia in Cyprus from AD 367 until his death. He showed intolerance to ST JOHN CHRYSOSTOM and proclaimed ORIGEN a heretic in AD 394. He wrote several works against Arianism and various other heresies.

Episcopius or **Biscop, Simon** 1583–1643
Dutch theologian
Born in Amsterdam, he studied at Leyden under JACOBUS ARMINIUS and FRANCIS GOMARUS, and succeeded to the latter's chair in 1612. He and twelve other Arminians were banished by the Synod of Dort (1618), and in the Spanish Netherlands he wrote his famous Arminian *Confessio* (1622). On the renewal of the war between Spain and Holland, he lived in France, and published a series of able controversial treatises. Permitted to return in 1626, he was a professor at the Arminian College at Amsterdam from 1634, where he produced his *Institutiones theologicae* and *Responsio*.

Epstein, Sir (Michael) Anthony 1921–
English microbiologist
Born in London, he was educated at Trinity College, Cambridge, worked at Middlesex Hospital Medical School and moved to the University of Bristol as professor and head of the pathology department (1968). In 1985 he moved to Oxford, taking up a fellowship at Wolfson College. In 1964 he discovered a new human herpes virus, known as the Epstein–Barr virus, which has been implicated in some forms of human cancer, notably BURKITT's lymphoma. This was the first virus to be associated with cancer in man, and its discovery stimulated the current vast research on the viral origins of human tumours. He has received many national and international awards, was elected FRS in 1979, made a CBE in 1985 and knighted in 1991. From 1986 to 1991 he served as foreign secretary and vice-president of the Royal Society, which awarded him its Royal Medal in 1992.

Epstein, Sir Jacob 1880–1959
British sculptor
He was born in New York City, USA, a Russian–Polish Jew, and studied at the École des Beaux-Arts in Paris (1902). He became a British subject in 1907, and his early commissions included 18 nude figures for the façade of the British Medical Association building in the Strand, London (1907–08), and *Night and Day* (1929) for the London Transport Building. These and later primitivist sculptures, such as the marble *Genesis* (1930, Granada Television), the *Ecce Homo* (1934) and the alabaster *Adam* (1939), resulted in great controversy and accusations of indecency and blasphemy. He modelled many impressive bronze portrait heads of famous people, such as JOSEPH CONRAD, ALBERT EINSTEIN, T S ELIOT and GEORGE BERNARD SHAW, and of children, such as *Ester* (1944), his youngest daughter. He also executed two bronze *Madonna and Child* works (1927, Riverside Church, New York; 1950, Holy Child Jesus Convent, London). In the 1950s, his last two large commissioned works, the aluminium *Christ in Majesty* (Llandaff Cathedral) and *St Michael and the Devil* (Coventry Cathedral), won more immediate critical acclaim. 📖 Richard Buckle, *Jacob Epstein, Sculptor* (1963)

Equiano, Olaudah c.1750–97
Nigerian autobiographer
Captured by slave traders at the age of ten, he was sold in the West Indies. After buying his freedom, he worked as a merchant seaman and was active in the English anti-slavery movement. He wrote *The Interesting Narrative of the Life of Olaudah Equiano, or Gustavus Vassa, the African* (1789).

Érard, Sébastien 1752–1831
French pianoforte maker
Born in Strasbourg, he set up a workshop in Paris, where he invented the harp with double pedals, the mechanical harpsichord and the piano with double escapement.

Erasistratus of Ceos fl.c.250 BC
Greek physician
Born on the island of Ceos (Chios), he studied medicine in Athens, and later founded a school of anatomy at Alexandria. His writings are known largely through GALEN's accounts. On the basis of vivisection and dissection of animals, accompanied by postmortems on humans, he built up an extensive grasp of human and comparative anatomy. He denied ARISTOTLE's view that digestion was a process similar to cooking, and also rejected the theory likening it to fermentation, contending instead that food, once in the stomach, was torn to pieces and pulped by the peristaltic motion of the gastric muscles. He also traced arteries and veins to the heart and, like HEROPHILUS, clearly recognized the difference between sensory and motor nerves. On the basis of such investigations, he is considered one of the founders of modern medicine.

Erasmus, Desiderius *See panel above*

Erastus, Thomas, *originally* **Thomas Liebler** or **Lieber** or **Lüber** 1524–83
Swiss theologian and physician
Born in Baden in Switzerland, he studied theology at Basel, philosophy and medicine in Italy, and was appointed physician to the counts of Henneberg. Professor of medicine at Heidelberg and physician to the Elector Palatine (1558), he became

professor of ethics at Basel in 1580. He was a skilful physician and a vigorous writer against PARACELSUS and witchcraft. In theology he followed HULDREICH ZWINGLI, and represented his view of the Lord's Supper at Heidelberg (1560) and Maulbronn (1564). In England the name of Erastians was applied to the party that arose in the 17th century. The Erastians denied the right of autonomy to the Church – a right which was neither maintained nor denied by Erastus.

Eratosthenes c.276–194 BC
Greek mathematician, astronomer and geographer
Born in Cyrene, he became the head of the great library at Alexandria and was the most versatile scholar of his time, known as 'pentathlos', or 'all-rounder'. He measured the obliquity of the ecliptic and the circumference of the Earth with considerable accuracy. In mathematics he invented a method, the 'sieve of Eratosthenes', for listing the prime numbers and a mechanical method of duplicating the cube. He also wrote on geography, chronology and literary criticism, but only fragments of this work remain. 🕮 P M Fraser, *Eratosthenes of Cyrene* (1971)

Ercilla y Zúñiga, Alonso de 1553–c.1595
Spanish poet
Born in Bermeo on the Bay of Biscay, he entered the service of PHILIP II, and accompanied him in 1554 to England on the occasion of his marriage to Queen MARY I, TUDOR. Shortly after, he joined the expedition against the Araucanians in Chile, whose amazing heroism inspired his monumental epic poem *La Araucana* (1569–89, Eng trans 1945). When an unfounded suspicion of his complicity in an insurrection nearly led to his execution, he returned to Spain, but as Philip treated him with indifference he made a tour through Europe, and became chamberlain to Emperor RUDOLF II. In 1580 he returned to Madrid, where he lived in poverty until his death. 🕮 Frank Pierce, *Alonso de Ercilla y Zúñiga* (1984)

Ercker, Lazarus c.1530–1593
German metallurgist
Born in Annaberg, Saxony, he held a variety of posts in mines and mints, and latterly served under Emperor RUDOLF II as chief superintendent of the mines of the Holy Roman Empire and Bohemia. He was reputed to be both well informed and a careful observer, and his extensive influence was due to his book *Beschreibung allerfürnemisten mineralischen Ertzt und Berckwercksarten* (1574, 'Description of Leading Ore Processing and Mining Methods'). This was the first systematic account of analytical and metallurgical chemistry, describing how to test alloys and metallic compounds and how to separate and refine the metals in them. It was translated into many languages and remained the leading manual until around the middle of the 18th century.

Erckmann-Chatrian
French writers
Émile Erckmann (1822–99) and Alexandre Chatrian (1826–90) were both from Lorraine: Erckmann was born in Phalsbourg and Chatrian in Abreschwiller. Their literary partnership dates from 1848, but they had little success until the publication of *L'Illustre Docteur Mathéus* (1859, Eng trans *The Illustrious Dr Mathéus*, 1872). *Le Fou Yégof* (1862, Eng trans *The Great Invasion of 1813–14; or, After Leipzig*, 1870) is one of a series of novels, to which also belong *Histoire d'un conscrit de 1813* (1864, Eng trans *The Conscript: A Tale of the French War of 1813*, 1865), *Waterloo* (1865, Eng trans 1865) and *Le Blocus* (1867, Eng trans *The Blockade*, 1869). Well-known plays by them include *Le Juif polonais* (1869, Eng trans *The Polish Jew*, 1871) and *Les Rantzau* (1882, Eng trans *The Rantzaus*, 1882). After the annexation of Alsace-Lorraine to Germany, they demonstrated a strong anti-German feeling in several of their books – the best of these is *L'Histoire du plebiscite* (1872, Eng trans *The Story of the Plebiscite*, 1872). They quarrelled over money just before Chatrian died.

Erdtman, Otto Gunnar Elias 1897–1973
Swedish palynologist
Born in Hjorted, Småland, he graduated from Stockholm University but could not then gain academic employment, and instead worked as a high-school teacher. In 1933 he developed and published the acetolysis method to prepare pollen for microscopy, which is still used today. In 1944 he was allowed to set up a small palynological laboratory at a Stockholm school, and he became director of a palynological laboratory financed by the Swedish Research Council, which rapidly became the foremost of its kind. In 1952 he published the first of four volumes covering all spores (1952, 1957, 1965, 1971). In 1954 he founded the palynological journal *Grana Palynologica* and in 1970 initiated the World Pollen and Spore Flora project.

Erenburg, Ilya Grigorevich *See* EHRENBURG, ILYA GRIGOREVICH

Erhard, Ludwig 1897–1977
German economist and politician
Born in Fürth, North Bavaria, the son of a haberdasher, he studied economics at Nuremberg. His career was held back during the 1930s as a result of his refusal to join the Nazi Party. However, immediately after World War II, he became professor of economics at Munich University. In 1949 he was elected to the Bundestag (federal parliament) in Bonn and was appointed finance minister in the ADENAUER Christian Democrat administration. He was the pioneer of the West German 'economic miracle' of recovery from wartime devastation, devising a successful policy of social free enterprise (Marktwirtschaft). He succeeded Adenauer as chancellor (1963–66), but economic difficulties forced his resignation.

Eri, Vincent Serei 1936–1993
Papua New Guinean novelist and politician
He was born in Moveave, and was educated by Catholic missionaries and at the University of Papua New Guinea, Port Moresby. He held various government offices both at home and in Australia, including Governor-General of Papua New Guinea (1990–91). His novel *The Crocodile* (1970), the first significant novel from his country, describes the period of colonialism and concerns the opposition between traditional values and modernity. The crocodile itself is a symbol of power, magic and both fertility and death, and the novel concludes ambiguously, its central character precariously balanced between different worlds.

Erickson, Arthur Charles 1924–
Canadian architect
Born in Vancouver and educated at British Columbia and McGill universities, he established Arthur Erickson Architects after working in various other partnerships. Powerful articulation and theatricality mark his designs, and he had a strong preoccupation with technology and materials. The influences of LE CORBUSIER, LOUIS KAHN and brutalism are evident in his works. He received international recognition with the Simon Fraser University buildings, British Columbia (1963), confirmed by his avant-garde design of Lethbridge University, Alberta (1971). Further major works include the Canadian Pavilion at Expo '70, Osaka, the Museum of Anthropology, British Columbia (1971–77) and Roy Thomson Hall, Toronto (1976–80).

Ericsson, John 1803–89
US inventor
Born in Långbanshyttan, Värmland, Sweden, he served as an officer of engineers in the Swedish army (1816–26), and in 1826 moved to England, where he set up as an engineering consultant. He built (1829) a formidable rival to GEORGE STEPHENSON's *Rocket*, and in 1836 he patented, six weeks after Sir FRANCIS PETTIT SMITH, one of the first successful screw-propellers. In 1839 he went to the USA, where he designed the warship *Princeton*, the first steamer with engines and boilers entirely below the waterline. He became a naturalized US citizen in 1848. In 1861, during the Civil War, he designed the iron-clad *Monitor* (the first warship with an armoured revolving turret) and in 1878 *The Destroyer*, which could launch submarine torpedoes. His inventions largely revolutionized navigation and the construction of warships. He was the brother of the engineer NILS ERICSSON. 🕮 Ruth White, *Yankee from Sweden: Days of John Ericsson* (1960)

Ericsson, Nils 1802–70
Swedish engineer
After supervising the building of the new Trollhättan Canal and the Saima Canal in Finland, he became director of state railway building (1854–62) and was responsible for the main lines in southern and central Sweden. He was the brother of the inventor JOHN ERICSSON.

Erigena, John Scotus, *also called* **Johannes Scotus Eriugena** or **John the Scot** c.810–c.877
Irish philosopher and theologian
Born in 'Scotia' (Ireland), he taught at the court of CHARLES I, the Bald, in France, then supported HINCMAR in the predestination controversy with his *De Praedestinatione* (851), which the Council of Valence condemned as *pultes Scotorum* ('Irishman's porridge') and 'an invention of the devil'. He also translated into Latin and provided commentaries on the Greek writings of the theologians of the Eastern Church. His major work *De*

Divisione Naturae (c.865) tried to fuse Christian and Neoplatonic doctrines and to reconcile faith and reason, but his work was later condemned for its pantheistic tendencies and eventually placed on the Index by GREGORY XIII in 1685. He was an enigmatic and singular figure who stands outside the mainstream of medieval thought. Tradition has it that, having become abbot of Malmesbury, he was stabbed to death by his scholars with their pens 'for trying to make them think'.

Erik VII, *also known as* **Erik of Pomerania** c.1381–1459
King of Denmark, Sweden (Erik XIII) and Norway (Erik III)
The son of Duke Wratislaw VII of Pomerania and Maria, niece of Queen MARGRETHE I, he was adopted as heir to the triple monarchy by his great-aunt (1389), and crowned at Kalmar, Sweden (1397), when the treaty of union between the three countries was formally sealed. He married Philippa, the daughter of King HENRY IV of England (1405), but it was not until 1412, on Queen Margrethe's death, that he gained actual power. Aggressive commercial and military policies against Holstein and the Hanseatic League that ultimately failed led to economic disasters that provoked rebellion, and he was deposed by all three countries one by one: Sweden and Denmark (1438) and Norway (1442). He was succeeded by his nephew, Kristofer of Bavaria.

Erik IX Jedvardsson, *called* **Erik the Saint** d.1160
King and patron saint of Sweden
King of Sweden from c.1150, he is said to have led a Christian crusade for the conversion of Finland, and to have been murdered at Mass in Uppsala by a Danish pretender to his throne. He was married to Christina, and was the father of King Knut Eriksson (d.c.1195).

Erik XIV 1533–77
King of Sweden
Born in Stockholm, the eldest son and successor of GUSTAV I VASA, he ruled from 1560 to 1568. Tutored by a German Lutheran nobleman, he had the outlook of a Renaissance prince, although he was highly unstable. Suspicious of others to the point of paranoia, he imprisoned his half-brother, Johan, for treason (1563), and launched a war against Denmark for control of the Baltic ports, which ended inconclusively with the Peace of Stettin (1570). He had several of his courtiers butchered on suspicion of treason and, after various attempts to marry Queen ELIZABETH I of England and MARY, QUEEN OF SCOTS, he married a soldier's daughter, Karin Månsdotter, who alone seemed capable of controlling his paroxysms of fury. Her coronation (1568) provided a pretext for rebellion. He was dethroned (1568) in favour of his brother JOHAN III, and spent the rest of his life in captivity, listening to music and writing psalms. He probably died of arsenic poisoning.

Erik Haraldsson, *called* **Erik Blódøx ('Bloodaxe')** d.954
King of Norway
The eldest son of HARALD I HALFDANARSON, he succeeded to the throne of Norway (c.942) when his father abdicated. His wife was Gunnlaug, sister of King HARALD GORMSSON of Denmark. His reign in Norway was violent, and Erik killed several of his half-brothers who had rebelled against him. He was deposed by his youngest brother, HAAKON I HARALDSSON (947), and sought refuge in England, where he was accepted in York as king of the Norse realm in Northumbria (948, 952–54). He was eventually expelled (954) and killed in battle at Stainmore, Yorkshire.

Erik of Pomerania *See* ERIK VII

Erik the Red, *properly* **Erik Thorvaldson** 10th century
Norwegian sailor
He explored the Greenland coast and founded the Norse colonies there (985). His son LEIF THE LUCKY landed in 'Vinland', often identified as America (1000). Both men are the subject of Icelandic sagas.

Erikson, Erik Homburger 1902–94
US psychoanalyst
Born in Frankfurt am Main, Germany, to Danish parents, he trained in Vienna under SIGMUND FREUD and ANNA FREUD, specializing in child analysis. In 1933 he emigrated to the USA, where he engaged in clinical work and taught successively at Yale, Berkeley and Harvard. Seeking to test the limits of Freudian theory and to determine the extent to which human psychology is modified by social and cultural forces, he carried on anthropological studies of children in various societies, including those of the Sioux and Yurok. His most important book, *Childhood and Society* (1950), divides human development into eight stages, each characterized by a crisis that the individual must resolve in order to continue his emotional progress. The originator of the concept of the adolescent 'identity crisis', Erikson expanded on his theory in books such as *Identity: Youth and Crisis* (1968) and traced the psychological development of historical figures in *Young Man Luther* (1958) and *Gandhi's Truth* (1969, Pulitzer Prize).

Erinna 4th century BC
Greek poet
Mistakenly believed in antiquity to have lived in the 7th century, she was born on the island of Telos, and though she died at the age of only 19, she won fame for her epic, *The Distaff*, which is on the joys of childhood and was apparently written in mourning for a friend. Only four lines of this and a handful of epigrams survive of her work. 🕮 C Latte, *Erinna* (1953)

Eriugena, Johannes Scotus *See* ERIGENA, JOHN SCOTUS

Erixson, Sven, *known as* **X-et** 1899–1970
Swedish artist
Born in Tumba, he spent much time in the Mediterranean countries and took his motifs from there as well as from Sweden. His colourful paintings, with their mixture of folk art and naivism, full of incident from everyday life, made him much in demand for large-scale public commissions, such as his tapestry *Melodies on the Square* (1937–39) in the Concert Hall in Gothenburg. He was also active as a scenic artist in the theatre.

Erlander, Tage Fritiof 1901–85
Swedish politician
He became active in the Social Democratic Party while he was studying at the University of Lund and was elected to parliament in 1933. He was minister without portfolio in the wartime coalition government from 1944, and was minister for ecclesiastical affairs when chosen to succeed PER ALBIN HANSSON as party leader and prime minister in 1946. He made way for the younger OLOF PALME in 1969. He was a moderate, and his brand of consensual government was dubbed 'Harpsund democracy' after his country estate, where he consulted with leaders from all walks of society.

Erlanger, Joseph 1874–1965
US physiologist and Nobel Prize winner
Born in San Francisco, and educated at the Johns Hopkins Medical School, where he accepted an assistant professorship, he was subsequently appointed professor of physiology at Wisconsin University (1906–10) and then at Washington University, St Louis (1910–46). His early career was devoted to studying the heart and the circulation, but during World War I he studied different problems, including the treatment of wound shock. In 1921 he began collaborating with HERBERT GASSER in analysing fundamental properties of the neural conduction of impulses, discovering that the velocity of the impulse was proportional to the diameter of the nerve fibre. For this research they shared the 1944 Nobel Prize in physiology or medicine. Their development of the necessary equipment, especially the cathode-ray tube, for the prosecution of their researches, heralded a new electronic age in neurophysiology.

Ermanaric, *Icelandic* **Jörmunrekkr** fl.c.375 AD
King of the Ostrogoths
He is the oldest historical personage depicted in the heroic lays of Scandinavia. He built up a huge empire in the Ukraine, centred on the Dnieper, but was overthrown by the Huns, and may have committed suicide when wounded. In Germanic legend he is depicted as a cruel tyrant who had his wife trampled to death by wild horses, and was mortally wounded by her brothers in a suicidal revenge attack.

Ernest Augustus 1771–1851
King of Hanover
Born at Kew, the fifth son of GEORGE III, he was educated at the University of Göttingen. He then entered the Hanoverian army and was created Duke of Cumberland (1799). He married Princess Frederica of Mecklenburg-Strelitz in 1815, and in 1837 under Salic law succeeded his brother WILLIAM IV of Great Britain as Ernest I of Hanover. His policy was reactionary, but in 1848 he saved his throne by the unwilling concession of liberal reforms. He was succeeded by his son, GEORGE V.

Ernst, Max 1891–1976
German painter and sculptor
He was born in Brühl, near Cologne. After studying philosophy and psychiatry at Bonn, he turned to painting, and in 1918 founded at Cologne the German Dada group. Later, in Paris, with PAUL ÉLUARD and ANDRÉ BRETON, he participated in the Surrealist movement. He invented the technique of frottage

(pencil rubbings on canvas), and settled in the USA in 1941, but returned to France in 1953. He won the Venice Biennale prize in 1954. 🕮 Edward Quinn, *Max Ernst* (1977)

Ernst, Richard Robert 1933–
Swiss physical chemist and Nobel Prize winner
Born in Winterthur, he studied at the Swiss Federal Institute of Technology (ETHZ) in Zurich, worked as a research scientist with Varian Associates in Palo Alto, California (1962–68), and then joined the staff of the ETHZ, becoming full professor (1976–98). In 1990 he became president of the Research Council there. He was awarded the Nobel Prize in chemistry in 1991, for innovations in nuclear magnetic resonance (NMR) spectroscopy, which has been an important tool for the determination of molecular structure in organic chemistry. During the first 20 years its applications were based on a restricted range of nuclei, which Ernst sought to extend after 1966 (in cooperation with Weston A Anderson) by increasing enormously the sensitivity of the instrumentation and developing his 'Fourier transform NMR'. His work is of particular value in probing very large molecules, such as are often involved in biology and medicine.

Ernulf or **Arnulf** 1040–1124
French Benedictine monk
Appointed prior of Canterbury by ANSELM, he was subsequently abbot of Peterborough (1097) and Bishop of Rochester (1114). He was remarkable for his skill in canon law and personal saintliness and compiled a great collection of documents about his own church, laws and papal decrees, which from the old name of the see (*Hrôlfe-ceaster*) was known as the *Textus Roffensis*. As 'Ernulphus' he was comprehensively cursed in Book III of LAURENCE STERNE's *Tristram Shandy* (1759–67).

Erpenius, *properly* **Thomas van Erpen** 1584–1624
Dutch Orientalist
Born in Gorkum, he studied at Leyden, and at Paris learned Arabic from an Egyptian. In 1613 he became professor of Oriental languages at Leyden, where he erected an Arabic press in his own house. His *Grammatica Arabica* (1613) enjoyed undisputed supremacy for two hundred years, like his *Rudimenta* (1620). His other works were *Proverborum Arabicorum Centuriae Duae* (1614) and an edition of El-Mekin (1625).

Ershad, Hossain Mohammad 1930–
Bangladeshi soldier and chief martial law administrator
He was born in Rangpur in northern Bengal, India (now Bangladesh), and joined the Pakistan army in 1952. He subsequently served in East Pakistan, rising to the rank of colonel during the 1971 civil war. He became chief of staff to the Bangladesh army, and was appointed a lieutenant-general in 1979. He assumed power in a military coup in 1982, became president in 1983 and proceeded to introduce a new rural-orientated economic programme and amend the constitution, declaring Islam the state religion. He was re-elected in 1986 and lifted martial law, but faced continuing political opposition and demands for a full return to civilian rule until he resigned in 1990. In the early 1990s he faced a number of criminal charges, and he spent time in prison at intervals throughout the following decade. In the 1996 general election he was elected to parliament. Although he was found guilty of corruption and jailed in 2000, he was released on bail and remains a leading figure within the Jatiya Party.

Erskine, David Stewart, 11th Earl of Buchan 1742–1829
Scottish nobleman
He was a noble antiquary, though considered somewhat eccentric. He founded the Society of Antiquaries of Scotland (1780) and brought about a reform in the election of Scottish peers. He was the brother of THOMAS ERSKINE and Henry Erskine (1746–1817).

Erskine, Ebenezer 1680–1754
Scottish clergyman
Born at Chirnside, in the Scottish Borders, he was minister of Portmoak in Kinross-shire from 1703 to 1711, and then in Stirling. He took the evangelical side in the rise of the Marrow Controversy in 1718, and in the patronage dispute of 1733 advocated the right of the people to choose their own pastors, and with three other ministers was suspended and finally deposed (1740). Meanwhile, in 1733, he and his three colleagues formed an Associate Presbytery, setting up the Secession Church of Marrowkirk. In the divisions of 1747 (Seceders divided into Burghers and Antiburghers), Erskine led the Burghers. He was the brother of RALPH ERSKINE.

Erskine (of Carnock), John 1695–1768
Scottish jurist
He was called to the Bar in 1719, and became professor of Scots law at Edinburgh (1737). His two works, *Principles of the Law of Scotland* (1754) and the more important *Institutes of the Law of Scotland* (1773), have maintained their value, the latter being one of the classics of Scots law.

Erskine, Ralph 1685–1752
Scottish clergyman
Born in Chirnside, in the Scottish Borders, he was a minister in Dunfermline from 1711. He joined his brother EBENEZER ERSKINE in the Secession (Associate Presbytery) in 1737, and also took part with the Burghers in the divisions of 1747. His sermons were highly thought of, and many of them were translated into Dutch. His *Gospel Sonnets* and *Scripture Songs* are well known, and his *Practical Works* were published in 1764.

Erskine, Thomas Erskine, 1st Baron 1750–1823
Scottish jurist
Born in Edinburgh, he was sent to sea (1764), and in 1768 bought a commission in the 1st Royals, studying English literature in Minorca (1770–72). He entered Lincoln's Inn (1775) and Trinity College, Cambridge (1776), and was called to the Bar in 1778. His acute legal mind led to immediate success and in 1783 he became a KC, and MP for Portsmouth. A sympathy with the French Revolution led him to join the 'Friends of the People' and to undertake the defence in many political prosecutions of 1793–94. His acceptance of a retainer from THOMAS PAINE cost him the Attorney-Generalship to the Prince of Wales (held since 1786). Erskine's speeches for Paine, the Scottish radical Thomas Hardy (1794) and JOHN TOOKE (1794) are very fine examples of forensic skill, and his defence of Hadfield (1800), indicted for shooting at GEORGE III, dismantled the contemporary theory concerning the criminal responsibility of the mentally ill. In 1802 he was appointed Chancellor to the Prince of Wales, an ancient office revived for him, and in 1806 he was appointed Lord Chancellor, but resigned the following year. He published a pamphlet on army abuses (1772), a discussion of the war with France (1797), a political romance (*Armata*, 1817), a pamphlet in favour of the Greeks, and some poems. He was the brother of DAVID ERSKINE and the jurist Henry Erskine (1746–1817). 🕮 Lloyd Paul Stryker, *For the Defense: Thomas Erskine, the Most Enlightened Liberal of His Times 1750–1823* (1947)

Ervin, Sam(uel James) 1896–1985
US senator
Born in Morgantown, North Carolina, he became a lawyer and served on the North Carolina supreme court. In 1954 he was elected to the US Senate, where he remained for the next 20 years. He was a conservative Democrat who led Southern filibusters against civil rights laws. As chairman of the Senate committee that investigated the Watergate scandal (1973–74), he fought President RICHARD NIXON's efforts to withhold testimony on the ground of executive privilege.

Ervine, St John Greer 1883–1971
Irish playwright and writer
He was born in Belfast, and in 1900 emigrated to London, where he wrote novels and plays. From 1915 to 1916 he was manager of the Abbey Theatre, Dublin, where his first plays, *Mixed Marriage* (1911) and *Jane Clegg* (1914), were produced. After World War I, in which he served with the Dublin Fusiliers and lost a leg, he won a high reputation as a drama critic, working on *The Observer* and the *Morning Post*, and for the BBC (1932). His most successful plays are perhaps *Anthony and Anna* (1926), *The First Mrs Fraser* (1929) and *Robert's Wife* (1937). Other publications include seven novels and several biographies. 🕮 *Some Impressions of My Elders* (1922)

Erving, Julius 1950–
US basketball player
Born in Roosevelt, New York, he played for the American Basketball Association's Virginia Squires (1971–73) and New York Nets (1973–76) and the National Basketball Association's Philadelphia 76ers (1976–87). Nicknamed 'Dr J', he won fame for his dazzling moves and soaring slam dunks. He was named most valuable player four times (ABA, 1974–76; NBA, 1981) and placed third on the all-time scoring list with a career total of 30,026 points (in the ABA and NBA combined).

Erwitt, Elliott 1928–
US photojournalist
Born in Paris, France, of Russian parents, he emigrated to the USA with his family in 1939 and studied photography at the City College, Los Angeles, and film at the New School for Social Research, New York. After military service he became a

freelance photographer and joined Magnum Photos in 1953. His photograph of NIKITA KHRUSHCHEV and RICHARD NIXON arguing in front of a refrigerator established his reputation and he went on to shoot photo-essays all over the world. Noted for their warmth and humour, his most popular photographs include his comical portraits of dogs, collected in *Son of a Bitch* (1974) and *Dogs, Dogs* (1999). Since the 1970s he has also developed a career as a maker of films, television commercials and documentaries.

Erzberger, Matthias 1875–1921
German politician
He was born in Buttenhausen, Württemberg. He became controversial when, as a leading member of the Centre Party, he began to advocate peace without annexations as early as 1917, and again (1918–19) when, as a member of the armistice delegation, he advocated acceptance, despite fierce German opposition, of the terms of the Treaty of Versailles. Finance minister and vice-premier in 1919, he drastically reformed the tax system and nationalized the German railways. Unsuccessful in a libel action against an unscrupulous political opponent, he resigned in 1921 and was assassinated in August of that year by members of an extremist group (Organisation Consul) in the Black Forest.

Esaki, Leo 1925–
Japanese physicist and Nobel Prize winner
Born in Osaka, he was educated at Tokyo University, working for his doctorate on semiconductors. In 1957, at the Sony Corporation in Tokyo, he investigated conduction by quantum mechanical 'tunnelling' of electrons through the potential energy barrier of a germanium p-n diode. He used the effect to construct a device with diode-like properties, the tunnel (or Esaki) diode. Their very fast speeds of operation, small size, low noise and power consumption give these diodes widespread application in computers and microwave devices. He shared the Nobel Prize in physics in 1973 for work on tunnelling effects with BRIAN JOSEPHSON and IVAR GIAEVER. From 1960 to 1992 he worked at IBM in the USA, where his research interests included man-made semiconductor superlattices. He was president of the University of Tsukuba in Japan (1992–98).

Esarhaddon d.669 BC
King of Assyria
He was the younger son of SENNACHERIB, whom he succeeded in 680 BC. He achieved the conquest of Egypt (675–671 BC). A great builder, he established the city of Nineveh. He was succeeded by his son, ASHURBANIPAL.

Esau
Biblical character
The elder son of Isaac, he is depicted as his father's favourite son, but he was deprived of Isaac's blessing and his birthright by his cunning brother JACOB (Genesis 27). The story explains why Esau's descendants, the Edomites, were thereafter hostile to Jacob's descendants, the Israelites.

Eschenbach, Wolfram von *See* WOLFRAM VON ESCHENBACH

Eschenmoser, Albert 1925–
Swiss chemist
Born in Erstfeld, Uri, he enrolled at the Swiss Federal Institute of Technology in Zurich in 1949, obtaining a doctorate in 1951 for work with LEOPOLD RUŽIČKA. He first came to prominence when his group joined with that of ROBERT WOODWARD in uniting two halves of the vitamin B_{12} molecule (one made in Zurich and the other in Boston) to give a few micrograms of synthetic B_{12}. Since then he has worked on prebiotic chemistry (the type of chemistry which might have created the molecules now characteristic of living things), and has synthesized molecules analogous to DNA but containing non-naturally-occurring sugars. He has received prizes and awards from all over the world, including the Davy Medal of the Royal Society (1978) and the Oparin Medal, the highest award of the International Society for the Study of the Origin of Life (2002). 🕮 M Volkan Kisakürek (ed), *Hominatio: An International Tribute to Albert Eschenmoser* (2001)

Escher, Maurits Cornelius 1898–1972
Dutch artist
Primarily a printmaker, he created whimsical visual fantasies in lithographs and woodcuts. He often used geometric distortions and tricks of perspective to deceive the eye.

Escoffier, Auguste c.1847–1935
French chef
Born in Villeneuve-Loubet, he served with a Russian grand duke, then became chef de cuisine to the general staff of the Rhine army in the Franco-Prussian War (1871) and of the Grand Hotel, Monte Carlo, before César Ritz persuaded him to go to the Savoy, London, and finally to the Carlton. He invented the '*bombe Nero*' of flaming ice and '*pêche Melba*', among other dishes, and wrote the *Guide culinaire* (1903, 'Culinary Guide') and *Ma cuisine* (1934). 🕮 Timothy Shaw, *The World of Escoffier* (1994)

Eshkol, Levi 1895–1969
Israeli politician
Born in the Ukraine into a pious Jewish family, he settled in Palestine as an agricultural worker in 1914. After Israeli independence in 1948, he supervised the founding of several hundred new villages to absorb immigrants. A member of the Mapai Party, he served as minister of finance (1952–63) and as prime minister and defence minister (1963–69), transferring the latter post to MOSHE DAYAN during the Six-Day War of 1967. Eshkol established diplomatic relations with West Germany and was also the first Israeli leader to visit the USA. Despite internal political difficulties in 1964–65, he remained prime minister until his death.

Espert Romero, Nuria 1935–
Spanish actress and stage director
Born in Hospitalet, Barcelona, she began her professional career at the age of twelve, at 16 played Juliet and at 19, Medea. At the age of 24 she co-founded the Nuria Espert Theatre Company. She has played the title role in *Hamlet*, and both Prospero and Ariel in the same production of *The Tempest*. Other productions include BERTOLT BRECHT's *The Good Person of Setzuan* and OSCAR WILDE's *Salomé*. She has appeared as an actress in productions all over the world. In 1986 she directed a revival of FEDERICO GARCÍA LORCA's *The House of Bernarda Alba* in London, which won the *Evening Standard* Drama Award, and PUCCINI's *Madame Butterfly* for Scottish Opera. She played MARIA CALLAS in Terence McNally's *Master Class* (1998).

Espinel, Vicente de 1551–1624
Spanish writer and musician
Born in Ronda, he served as a soldier in France and Italy, meeting with some of the adventures related in his *Relaciones de la vida del Escudero Márcos de Obregón* (1618, Eng trans *The History of the Life of the Squire Marcos de Obregon*, 1816). This book was much drawn upon by ALAIN LESAGE for his *Gil Blas*. After his return to Spain he took holy orders. He also published a volume of poems (1591) and a translation of the *Ars Poetica* of HORACE. He was, if not the inventor, the improver of the ten-line stanza, and is credited with adding the fifth string to the guitar. 🕮 G Haley, *Vicente Espinel e Marcos de Obregon* (1959)

Espriu (i Castelló), Salvador 1913–85
Catalan writer
He was born in Santa Coloma de Farners and raised and educated in Barcelona, where he studied and practised law. An extensive range of writings began with *Israel* (1929), published when he was sixteen. *Aspectes* (1934, *Aspects*), a short-story collection, introduced his alter ego, Salom de Sinera, who would reappear in later works. Other works include *Ariadna a laberint grotesc* (1935, *Ariadna in the Grotesque Labyrinth*), a collection of literary sketches, ballads and anecdotal accounts, the novel *Miratge a Citerea* (1935, *Mirage at Citerea*) and numerous works for the stage. In 1946 he published his first collection of existentialist and minimalist verse, *Cementiri de Sinera* (1946, *Sinera's Cemetery*), in Catalan. Other verse collections include *Les cancons d'Ariadna* (1949, *The Songs of Ariadna*), *Obra lirica* (1952, *Lyrical Work*), *El caminant i el mur* (1954, *The Wayfarer and the Wall*) and *La pell de brau* (1960, *The Bull-Hide*), a popular series of poems concerning Catalan life. He won numerous awards, including the Montaigne prize in 1971, and was twice nominated for the Nobel Prize.

Espronceda, José de 1808–42
Spanish poet and revolutionary
Born in Almendralejo, Estremadura, he travelled widely in Europe, partly to escape persecution for his liberalism and partly in pursuit of Teresa Marcha, who is commemorated in his unfinished poem *El Diablo mundo* (1841, 'The Devil of the World'). He wrote romantic poems in the BYRONIC manner, and is considered by some the greatest lyricist of his time. 🕮 J Casalduero, *Espronceda* (1961)

Espy, James Pollard 1785–1860
US meteorologist
Born in Westmoreland County, Pennsylvania, he obtained a degree at Transylvania University, Lexington, and later studied law. He taught in the Franklin Institute and became so impressed with the meteorological writings of JOHN DALTON and

JOHN FREDERICK DANIELL that he began to observe and study the weather. In 1840 he was appointed chief of the Meteorological Bureau of the War Department (1842–57). He organized a service of daily synchronous weather observations and from these compiled charts for 1,100 days, which he analysed to deduce the main characteristics of cyclones and tornadoes.

Esquivel, Manuel 1940–
Belizean politician
Born in Belize City, he was educated at Loyola University in the USA and the University of Bristol in the UK. Following a career in teaching he joined the United Democratic Party and was elected to the Senate in 1979. He was prime minister between 1984 and 1989, and again between 1993 and 1998. During those terms of office he was responsible for negotiating the reduction of British military forces in Belize. He resigned the party leadership in 1998, following electoral defeat.

Es-Sa'id, Nuri, *officially* **Nouri Said Pasha** 1888–1958
Iraqi politician
Born in Kirkuk and educated at the Istanbul Staff College for the Turkish Army, he fled to Egypt when his pan-Arab activities became suspect. In World War I he fought against the Turks under King HUSSEIN IBN ALI of the Hejaz. In 1921 he became Iraq's first chief of the general staff and a year later defence minister. From 1930 he filled the office of prime minister many times until he was assassinated in 1958 after the coup d'état of Brigadier ABDUL KASSEM.

Essex, Robert Devereux, 2nd Earl of 1566/67–1601
Elizabethan soldier and courtier
Born in Netherwood, Herefordshire, the eldest son of WALTER DEVEREUX, he succeeded his father in 1576. Under Robert Dudley, Earl of LEICESTER, his stepfather from 1580, he served in the Netherlands (1585–86), distinguishing himself at Zutphen. At court he quickly rose in the favour of Queen ELIZABETH I, despite his clandestine marriage (1590) with Frances Walsingham, the daughter of Sir FRANCIS WALSINGHAM and widow of Sir PHILIP SIDNEY. He became Master of the Horse (1587) and in 1591 he commanded the forces sent to help HENRY IV of France against the Catholic League (1591). He took part in the capture of Cadiz (1596), but was largely responsible for the failure of an expedition to the Azores (1597). He became earl marshal (1597), and chancellor of Cambridge University (1598), but because of his great quarrel with Elizabeth, when he turned his back on her and she boxed his ears, they were never reconciled. When his six months' lord lieutenancy of Ireland proved a failure, he returned to England, and Elizabeth had him imprisoned. Unfortunately, although handsome and brave, and an ideal courtier, Essex aimed at the highest state office, despite being politically and administratively unskilled. He plotted to raise revolt in London and remove Elizabeth's councillors (1601), but was found guilty of high treason and beheaded. 🕮 Robert Lacey, *Robert, Earl of Essex* (1970)

Essex, Robert Devereux, 3rd Earl of 1591–1646
English soldier
He was the eldest son of Robert Devereux, 2nd Earl of ESSEX. In 1604 the earldom was restored to him after his father's execution for treason in 1601. In 1606 he married Frances Howard (1592–1632). From 1626 Essex attached himself to the popular party, and in 1642 he received the command of the Parliamentary army. Though personally brave, he was a poor general, and the prolongation of the war was largely due to him. The inconclusive Battle of Edgehill, the capture of Reading, and the relief of Gloucester were followed by his blundering march into Cornwall, whence he fled by sea. In 1646 he resigned the command, and died soon afterwards.

Essex, Walter Devereux, 2nd Viscount Hereford and **1st Earl of** 1541–76
English colonialist
The scion of an old Herefordshire house, he earned notoriety as the merciless colonizer of Ulster from 1573. As Earl Marshal of Ireland he dealt severely with the rebellious Sorley Boy MacDonnell and his followers.

Estaing, Charles Hector Théodat, Comte d' 1729–94
French naval officer
He served in the East Indies, and was captured twice by the British. As a vice-admiral, he commanded French naval forces (1778) against the British in the American Revolution, and captured St Vincent and Grenada in 1779, but his operations on the mainland were unsuccessful. During the French Revolution Estaing was guillotined for writing in support of MARIE ANTOINETTE.

Esterházy
Hungarian noble dynasty
A powerful Magyar family, originally founded by Ferenc Zerhazy (1563–94), it developed along the Franknó, Csesznek and Zólyom lines and produced diplomats, soldiers and art patrons into the 20th century. The Franknó line was founded by Zerhazy's son Miklós Esterházy (1582–1645), whose goal was to free Hungary from Turkish dominance and whose son Pál Esterházy (1635–1713) was made a prince of the empire (1687) for his successes against the Turks, thus establishing the princely line. He also strongly supported the HABSBURG monarchy, whose wealth was exceeded by that of the Esterházy dynasty, and helped to reduce the power held by the Magyar nobles. Prince Miklós Joseph (1714–90), a notable art patron, employed HAYDN in his private orchestra for nearly 30 years. The fourth Prince Miklós (1765–1833) formed a splendid collection of pictures in Vienna, but his extravagance put his estates into sequestration. He raised an army to fight the French in the Napoleonic Wars and refused the honour of becoming king. Prince Pál Antal (1786–1866) represented Austria at London until 1842, and in 1848 was Hungarian minister of foreign affairs. His extravagance caused the estates to be sequestrated again in 1860. Count Moritz (1807–90) too was a diplomat; he served as Austrian minister in Rome until 1856, and later as minister without portfolio (1861–66). 🕮 Rebecca Gates-Coon, *The Landed Estates of the Esterházy Princes: Hungary during the Reforms of Maria Theresa and Joseph II* (1994)

Estes, Richard 1932–
US painter
Born in Kewanee, Illinois, he studied at the Art Institute of Chicago (1952–56) and moved to New York in 1959. For several years he worked in the illustration and advertising industry before becoming a full-time painter in 1966. In the late 1960s, he began painting precise copies of photographs, particularly of New York street scenes, and for over three decades he has continued to produce meticulously detailed Photorealist works which can easily be confused with photographs. Some of his wide-angle street scenes combine several viewpoints. His works include *The Candy Store* (1969), *Downtown* (1978) and *The Plaza* (1991).

Esther 5th century BC
Biblical queen
She was the foster daughter of the Jew MORDECAI. According to the Book of Esther she was chosen by the Persian King Ahasuerus (XERXES I) as his wife in place of the disgraced Queen Vashti, and brought about the deliverance of her people.

Estrada, Joseph Marcelo Ejercito 1937–
Philippine politician
Born in Tondo, Manila, he established a reputation as a popular film actor before entering politics. Having served as mayor of San Juan (1969–86) he became a member of the Senate in 1987 and was appointed vice-president of the Partido ng Masang Pilipino (PMP) in 1992. He was president of the Philippines from 1998 to 2001, but his period in office ended in controversy after his impeachment in November 2000 on charges of corruption. Denying all charges, he has been held in detention since being forced from office. His trial began in 2001 and continued into 2007.

Estridsson *See* SVEIN II ULFSSON

Etchahounia, Pierre Topet d' 1786–1862
Basque poet
He was born in Etchahounia in the French Basque provinces. He is famous for having cursed his father for forbidding him to marry a poor girl; 'God curse Gaztelondo Topet and all those who fall in love with poor girls!' is now proverbial. He beat up the rich (and allegedly unfaithful) woman whom he did marry, killed her supposed lover, was refused permission to live at home, and spent much of his life as a beggar and travelling bard. His trenchant poetry, often questioning the existence of God, is considered the best there is in the Basque language. It survives only because it is easily memorable; his family burned it on a bonfire as soon as he died. It was collected in *Le Poète Pierre Topet, dit Etchahun, et ses œuvres* (1946). ADELBERT VON CHAMISSO told his story well.

Ethelbert or **Æthelbert** d.616/618
King of Kent
He was the first English king to adopt Christianity. During his reign, which historians now tend to date from c.590, Kent achieved hegemony over England south of the Humber. BEDE describes him as powerful, but cautious and superstitious. He married Bertha, a Frankish Christian princess (c.580) and

welcomed St AUGUSTINE in 596, allowing him to settle at Canterbury and set up further bishoprics at Rochester and London. He himself was baptized with his court, and Canterbury became the capital of Roman Christianity in Britain. He was also responsible for the first written code of English laws.

Etheldreda or **Æthelthryth** or **Audrey, St** c.630–79
Anglo-Saxon princess and abbess
She was the daughter of King Anna of East Anglia, and was widowed after three years of her first marriage, which was said never to have been consummated. In 660 she married Ecgfrith, future King of Northumbria, but refused to consummate the marriage. Instead she took the veil and withdrew to the double monastery at Coldingham founded by her aunt, EBBA, and in 672 founded a double monastery herself on the isle of Ely, of which she was appointed abbess.

Ethelflæd or **Æthelflæd** c.870–918
Anglo-Saxon ruler of Mercia
She was the daughter of ALFRED, the Great, and sister of EDWARD, the Elder, of Wessex. She married Ethelred (Æthelred), the alderman of Mercia (c.886), and fought alongside him to repel the Danish invaders, their battle culminating in a decisive victory near Tettenhall in 910. She succeeded her husband (911) and built fortified strongholds throughout Mercia, including Tamworth and Stafford, and planned and led Mercian counterattacks on the Danes. In 917, with her brother Edward, she captured Derby, and took Leicester in 918. She also kept up Mercian pressure on the Welsh. She died when poised to invade Danish-held Northumbria.

Ethelred or **Æthelred I** d.871
Anglo-Saxon King of Wessex
One of the five sons of King Ethelwulf (Æthelwulf) and elder brother of ALFRED, the Great, he succeeded to the throne in 865. In that year a large Danish invasion army landed in East Anglia intent on permanent conquest, and captured York and Northumbria. Ethelred, with Alfred as his second-in-command, helped to defend Mercia against them. Early in 870 the Danes established a fortified camp at Reading in Wessex. Ethelred and Alfred defeated them at Ashdown in Berkshire but Ethelred died soon afterwards, to be succeeded by Alfred.

Ethelred or **Æthelred II**, *wrongly referred to as* **the Unready** c.968–1016
King of England
The son of King EDGAR and his second wife, Ælfryth (Elfryth), he was ten when he succeeded to the throne (978) after the murder of his half-brother EDWARD, THE MARTYR. He married EMMA, daughter of Duke Richard of Normandy. He at first attempted to buy off Viking invaders (hence his Anglo-Saxon nickname of *Unræd*, meaning 'lack of counsel' – mistranslated as 'Unready' – meant as a pun on his name Ethelred, which means 'good counsel'). However, in 1002, he ordered a savage massacre of all Danish settlers. In 1013, beleaguered by the invasion of SVEIN I HARALDSSON of Denmark, he abandoned his throne and fled to Normandy but was recalled in 1014. Recent scholarship has seen his reign in a more positive light than the hostile *Anglo-Saxon Chronicle*, and has emphasized the efficient financial and secretarial system and the flowering of vernacular literature. By a first marriage he left a son, EDMUND II, IRONSIDE, who succeeded him for a few months, and by Emma he was the father of EDWARD THE CONFESSOR.

Etherege, Sir George c.1635–91
English dramatist
Born probably in Maidenhead, Berkshire, he was secretary to the ambassador at Constantinople (Istanbul) from 1668 to 1670 or 1671. He married a wealthy widow, and in 1685 was sent to be resident at the Imperial court at Ratisbon, where he drank, flirted with actresses, and engaged in correspondence with THOMAS MIDDLETON, DRYDEN and THOMAS BETTERTON. In English literature he is the founder of the comedy of intrigue. He sought his inspiration in MOLIÈRE, and out of Etherege grew the legitimate comedy of manners and the work of RICHARD BRINSLEY SHERIDAN and OLIVER GOLDSMITH. His three plays are *The Comical Revenge or, Love in a Tub* (1664), *She Would If She Could* (1668) and *The Man of Mode or, Sir Fopling Flutter* (1676) – all highly popular in their day. 🕮 D Underwood, *Etherege and the 17th-century Comedy of Manners* (1957)

Etty, William 1787–1849
English painter
Born in York, the son of a baker, he went to London in 1806, and studied at the Royal Academy Schools, for a year under Sir THOMAS LAWRENCE. In 1822–23 he spent 18 months in Italy, half of them at Venice, where he was deeply influenced by the Venetian masters. Renowned for his nudes, he depicted historical and classical subjects, as in *The Combat* (1825, National Gallery of Scotland), but was at his best when working on a less ambitious scale.

Eucken, Rudolf Christoph 1846–1926
German philosopher and Nobel Prize winner
Born in Aurich, Ostfriesland, he was educated at the University of Göttingen. He became professor at Basel (1871) and at Jena (1874), and won the Nobel Prize in literature in 1908 in recognition of his 'earnest search for truth' and 'idealistic philosophy of life'. His distinctive philosophy of ethical activism was broadly in the idealist tradition of IMMANUEL KANT, and sought to identify and vindicate the spiritual significance of history and life. His works include *Philosophie der Geschichte* (1907), *Der Sinn und Wert des Lebens* (1908, Eng trans *The Meaning and Value of Life*, 1916) and *Mensch und Welt* (1918).

Eucleides of Megara fl.c.390 BC
Greek philosopher
A disciple of SOCRATES, mentioned by PLATO as one of those present during Socrates's last hours, he founded a school of Megarians, who were evidently influenced by PARMENIDES as well as by Socrates and are associated with various developments in logic like the 'liar paradox' (attributed to one of their number, Eubulides). Nothing of their writings survives.

Euclid fl.300 BC
Greek mathematician
He taught in Alexandria, where he appears to have founded a mathematical school. His *Elements* of geometry, in 13 books, is the earliest substantial Greek mathematical treatise to have survived, and is probably better known than any other mathematical book, still being used as the basis of school textbooks in the earlier part of the 20th century. It was the first mathematical book to be printed and has stood as a model of rigorous mathematical exposition for centuries. It covers the geometry of lines in the plane, including PYTHAGORAS's theorem, and goes on to discuss circles, ratio, and the geometry of three dimensions. He wrote other works on geometry, including the theory of conics, and on astronomy, optics and music. 🕮 Henry Albaugh, *Euclid* (1971)

Eudocia, *also called* **Athenais** AD 401–65
Byzantine princess
She was the daughter of an Athenian professor of rhetoric. Pulcheria, sister of Emperor Theodosius II (AD 401–50), chose Eudocia to be his wife. Eudocia renounced paganism, changing her name from Athenais, and was married to Theodosius in AD 421. Pulcheria and Eudocia became fierce rivals, and despite the fact that Eudocia supported the controversial patriarch NESTORIUS, while Pulcheria opposed him, Pulcheria was banished. Eudocia then backed EUTYCHES, head of an opposite heresy, until Pulcheria regained her influence shortly before Theodosius's death (450). Eudocia retired to Jerusalem, where she wrote a panegyric on Theodosius's victories over the Persians, paraphrases of Scripture, hymns and poetry.

Eudoxus of Cnidus 408–353 BC
Greek mathematician, astronomer and geographer
Thought to have been a member of PLATO's Academy, he spent over a year studying in Egypt with the priests at Heliopolis, and formed his own school in Cyzicus. He made many advances in geometry and it is possible that most of EUCLID's Book XII is largely his work. He drew up a map of the stars and compiled a map of the known areas of the world. He correctly recalculated the length of the solar year and his philosophical theories are thought to have had a great influence on ARISTOTLE.

Eugène of Savoy, Prince, *properly* **François Eugène de Savoie Carignan** 1663–1736
Austrian soldier
Born in Paris, he left France after his mother, a niece of Cardinal MAZARIN, was banished from court by LOUIS XIV. He entered the service of Emperor LEOPOLD I against the Turks. He distinguished himself in the war against Louis XIV in Italy, and his defeat of the Turks at Zenta (1697) put an end to their power in Hungary. The War of the Spanish Succession (1701) recalled him to Italy, but LOUIS, DUC DE VENDÔME, defeated him there (1702). In command of the imperial army he helped the Duke of MARLBOROUGH at Blenheim (1704). Eugène defeated the French in Italy, but his defeat by CLAUDE, DUC DE VILLARS, at Denain (1712) was followed by other disasters, until the Peace of Rastadt (1714) ended the war. He continued to fight the Turks from 1716 and then the French in a war over the Crown of Poland. After the peace he returned to Vienna.

Eugénie, Empress, *originally* **Eugénie de Montijo** 1826–1920
Spanish empress of France
Born in Granada, a Spanish noblewoman renowned for her beauty, she was consort of NAPOLEON III from 1853 until 1871. She used her political influence to oppose liberal and democratic ideas and to serve as an advocate of the Church. She is also believed to have played a large role in the decision to create a French-sponsored kingdom in Mexico (1861). After Napoleon III's deposition during the Franco-Prussian War, she fled to England, where she was befriended by Queen VICTORIA.

Eugenius III, *originally* **Bernardo Paganelli** 12th century
Italian pope
Born near Pisa, he was a disciple of BERNARD OF CLAIRVAUX and became a Cistercian monk, being appointed pope in 1145. His predecessor (Lucius II) had died during a rebellion against the papacy in Rome, and so Eugenius was obliged to flee to Viterbo immediately upon his election. Soon after his return he was again driven out by a revolt initiated by ARNOLD OF BRESCIA and turned his attention to promoting a second crusade in France.

Eugenius IV, *originally* **Gabriele Condulmer** 1383–1447
Italian pope
Born in Venice, he was installed as pope in 1431, and quarrelled with the reforming Council of Basel convoked by his predecessor MARTIN V, which sought to limit papal power. Driven from Rome in 1434 by the Colonnas, he opened a new council, first at Ferrara, then at Florence, and excommunicated the bishops assembled at Basel. The Council of Basel deposed him (1439) and elected AMADEUS VIII of Savoy, as Felix V. At the Council of Ferrara, John Palaeologus II, Emperor of Constantinople (Istanbul), appeared with 20 Greek bishops, and a union between the Greek and Latin Churches was effected for a short time in 1439. In 1444 Eugenius returned to Rome.

Euhemerus fl.c.300 BC
Greek philosopher and mythographer
Born probably in Messene, Sicily, he wrote *Hiera anagraphe* or *Sacred History*, which 'Euhemerized' Greek mythology by explaining the gods as distorted representations of warriors and heroes from remote history.

Euler, Leonhard 1707–83
Swiss mathematician
Born in Basel, he studied mathematics there under JEAN BERNOULLI. In 1727 he went to St Petersburg to study at the Academy of Sciences (founded by CATHERINE II), where he became professor of physics (1731) and then professor of mathematics (1733). In 1741 he moved to Berlin at the invitation of FREDERICK II, the Great, to be director of mathematics and physics in the Berlin Academy, but he returned to St Petersburg in 1766 after a disagreement with the king, and remained in Russia until his death. He published many books and papers on every aspect of pure and applied mathematics, physics and astronomy. He studied infinite series and differential equations, introduced or established many new functions, including the gamma function and elliptic integrals, and created the calculus of variations. His *Introductio in analysin infinitorum* (1748) and later treatises on differential and integral calculus and algebra became standard textbooks, and his notations such as *e* and *i* (the square root of -1) have been used ever since. In mechanics Euler studied the motion of rigid bodies in three dimensions, the construction and control of ships, and celestial mechanics. For the princess of Anhalt-Dessau he wrote *Lettres à une princesse d'Allemagne* (1768–72), a non-technical outline of the main physical theories of the time. His powerful memory enabled him to continue mathematical work though nearly blind. 🕮 Otto Speiss, *Leonhard Euler* (1929)

Euler, Ulf Svante von 1905–83
Swedish pharmacologist and Nobel Prize winner
Born in Stockholm, the son of Nobel laureate HANS EULER-CHELPIN, he qualified in medicine from the Karolinska Institute and joined the department of pharmacology there as Research Fellow (1926–30), before travelling on a Rockefeller Fellowship to work with, amongst others, Sir HENRY DALE and CORNEILLE HEYMANS (1930–31). He began studying neuroactive substances in the autonomic nervous system, and with John Gaddum he discovered a new active factor, a polypeptide. Returning to the Karolinska, he continued research on biologically active substances and in 1935 isolated a group of lipids he called prostaglandins. Later he reverted to the study of neurally active chemicals and isolated and characterized the principal transmitter of the sympathetic nervous system, noradrenaline, in the early 1940s. For the next 30 years he continued to study noradrenaline and its chemical relatives in many situations. Appointed professor of physiology at the Karolinska (1939–71), he shared the 1970 Nobel Prize in physiology or medicine with JULIUS AXELROD and BERNARD KATZ.

Euler-Chelpin, Hans Karl August Simon von 1873–1964
Swedish biochemist and Nobel Prize winner
Born in Augsburg, Germany, after studying in Berlin, Göttingen and Paris, he became a lecturer in physical chemistry at Stockholm University (1900), then was appointed professor of chemistry and director of the Institute for the Biochemistry of Vitamins in 1929. Interested in a wide range of scientific areas, his many collaborations and publications were oriented towards elucidating the chemistry and kinetics of peptidases, zymase (yeast extract causing fermentation) and, in particular, saccharase. He showed that zymase was markedly activated by vitamins A and B, and purified the system by alcohol fractionation and aluminium oxide adsorption. He also analysed the properties and reactions of the saccharases. With Sir ARTHUR HARDEN, Euler-Chelpin was awarded the Nobel Prize in chemistry in 1929 for his researches on enzymes and fermentation.

Eumenes II d.159 BC
King of Pergamon
The son of Attalus I, he ruled from 197 BC, and during his reign Pergamon reached the zenith of its importance. He was an ally of Rome against ANTIOCHUS III and Macedonia. He made Pergamon a centre of learning, founded a great library, and had the famous sculptured altar of Pergamon built (now in the Pergamon Museum in Berlin).

Eumenes of Cardia c.360–316 BC
Macedonian soldier
He was one of the ablest generals of ALEXANDER THE GREAT, after whose death he became governor of Cappadocia, Paphlagonia and part of Pontus. He was ultimately defeated in 317 BC by ANTIGONUS (Monophthalmos) and executed.

Eunomius d.c.399 AD
Cappadocian prelate
Born in Cappadocia, Asia Minor, he was Bishop of Cyzicus (c.360 AD) but was deposed for his Arian views. With FLAVIUS AËTIUS he became the leader of an extreme sect of Arians, known as the Anomoeans or Eunomians.

Euphranor 4th century BC
Greek painter and sculptor
Born in Corinth, he was famed for his decoration of the Stoa Basileios at Athens.

Euphronios fl. late 6th century–5th century BC
Greek potter and vase painter
His name is inscribed, as either painter or potter, on 15 vessels which constitute some of the finest surviving examples of vessels painted in the 'red figure' style.

Euripides 484 or 480–406 BC
Greek tragic dramatist
Born probably in Salamis, he did not take much part in public life. In politics he was moderate, approving of a democracy but not of demagogues. Of about 80 of his dramas whose titles are known, 18 survive complete. They include *Medea* (431 BC), *Andromache* (425 BC), *Supplices* (423 BC), *Troades* (415 BC, Eng trans *The Women of Troy*), *Phoenissae* (410 BC, Eng trans *The Phoenician Women*) and *Orestes* (408 BC). *The Bacchae* (405 BC) and *Iphigenia Aulidensis* (405 BC, Eng trans *Iphigenia in Aulis*) were put on the Athenian stage only after the author's death. It is doubtful whether the *Rhesus* is genuine. He brought a new style to tragedy and the treatment of traditional mythology, and is notable for highlighting unusual opinions and portraying socially marginal characters. SOPHOCLES, who deemed him 'the most tragic of poets', also commented that while he himself showed people as they ought to be, Euripides portrayed them as they are. 🕮 Gilbert Murray, *Euripides and His Age* (1913)

Eurytus of Croton late 5th century BC
Greek philosopher
A follower of PYTHAGORAS, he is known only for the reported story that he used pebbles to represent the essential definitions of physical objects.

Eusebio, *in full* **Silva Ferreira da Eusebio** 1942–
Portuguese footballer
Born in Mozambique, he was one of the first great players to emerge from the African continent. He had a long and successful career with Benfica of Lisbon, with whom he won

European Cup medals. He was nominated European Footballer of the Year in 1965, and in the centenary match to mark the foundation of the FA he played for the Rest of the World against England in 1963. In the World Cup of 1966 he was the top goal-scorer. His record of 41 goals for Portugal was surpassed in 2005 by Pauleta (1973–), although Eusebio's goals-per-game ratio is far superior.

Eusebius of Caesarea, *known as* **the Father of Church History** c.264–340 AD
Palestinian theologian and scholar
Born probably in Palestine, he became Bishop of Caesarea (c.313 AD), and in the Council of Nicaea was the head of the semi-Arian or moderate party, which was averse to discussing the nature of the Trinity. His *Chronicon*, a history of the world to AD 325, contains extracts from lost works. His *Praeparatio Evangelica* is a collection of such statements in heathen authors as support the evidences of Christianity, and its complement is the *Demonstratio Evangelica* in 20 books, ten of which are extant, intended to convince the Jews of the truth of Christianity from their own scriptures. His most important work, the *Ecclesiastical History*, is a record of the chief events in the Christian Church down to AD 324. Other works include the *Theophania* (discovered in 1839) and a life of CONSTANTINE I, THE GREAT.

Eusebius of Nicomedia d.342 AD
Syrian prelate
Born probably in Syria, he was bishop first of Beryta (Beirut) in Syria and then of Nicomedia. He defended ARIUS at the Council of Nicaea (AD 325) and afterwards became the head of the Arian party. Exiled to Gaul for his views, he came back in AD 328 and influenced Emperor CONSTANTINE I, THE GREAT, to move towards Arianism, and baptized him in AD 337, just before Constantine died. He had also been responsible for the deposition of ATHANASIUS in AD 335. In AD 339 he was appointed Patriarch of Constantinople, and enjoyed the patronage of Emperor CONSTANTIUS I.

Eustachio, Bartolomeo 1520–74
Italian anatomist
Born in San Severino (now Ancona), he studied medicine in Rome, and after serving as a personal physican taught anatomy at the Collegia della Sapienza, Rome. He made considerable studies of the thoracic duct, larynx, adrenal glands, the teeth, and above all the kidneys. From 1552 he was involved in the production of a remarkable, but unpublished, series of anatomical illustrations. He is remembered for his precise account of the Eustachian canal (auditory tube) of the ear, and also of the Eustachian valve in the foetus. His most important work was the *Opuscula Anatomica* (1564).

Eustathius fl. mid-12th century
Greek scholar and commentator
Born in Constantinople (Istanbul), he was Archbishop of Thessalonica from 1160 and of Myra from 1174. He was the author of numerous chronicles and commentaries on classical writers. His commentary on HOMER and other writings contain extracts from works which are no longer in evidence.

Euthymides fl. late 6th century–early 5th century BC
Greek vase painter of the so-called 'red figure' style
He was a contemporary of EUPHRONIOS and, seemingly, a rival, since among the six surviving signed vessels is one inscribed with the words 'Euphronios never did anything like it'. His painted figures are among the earliest to show foreshortened limbs.

Eutropius fl. 4th century AD
Roman historian
He was secretary to Emperor CONSTANTINE I and fought against the Persians under JULIAN, the Apostate. He wrote a survey of Roman history, *Breviarium Historiae Romanae*, from the foundation of the city to AD 364. Written in simple, concise style, it may have been intended for use in schools.

Eutyches c.384–c.456 AD
Greek religious Archimandrite at Constantinople
He was the founder of 'Eutychianism', which held that after the incarnation human nature became merged in the divine, and that JESUS CHRIST had therefore but one nature. He was condemned by a synod at Constantinople (Istanbul) in AD 448, but the Council of Ephesus (AD 449) decided in his favour and restored him, deposing his opponents. The Council of Chalcedon (AD 451) annulled this decision, and Eutyches died in exile. His sect was put down by penal laws.

Euwe, Max (Machgielis) 1901–81
Dutch chess player
Born near Amsterdam, he was originally a professor of mathematics and mechanics. He was the only amateur to win the world championship in the history of chess, by defeating ALEXANDER ALEKHINE (1935), but he lost the title in a return match two years later. After his academic retirement he served (1970–78) as president of FIDE (Fédération Internationale des Échecs), arbitrating over the turbulent FISCHER–SPASSKY world championship match in Reykjavík, Iceland, in 1972. A prolific annotator, he contributed more to the literature of chess than any other grandmaster.

Evagrius, *known as* **Scholasticus** c.536–c.600
Byzantine church historian
He was born in Epiphanica, Syria, and was the Patriarch of Antioch. His Greek *Ecclesiastical History, 431–594*, was a continuation of that of EUSEBIUS OF CAESAREA.

Evans, Alice 1881–1975
US microbiologist
She received little formal education, but won a scholarship to study science at Cornell University. She worked for the Dairy Division of the US Department of Agriculture before moving to the US Public Health Service (later the National Institutes of Health) in 1918. Her investigations into the dangers of non-pasteurized cow's milk and her assertion that cattle brucellosis and human Malta fever had a common origin were strongly resisted by veterinarians, dairymen and many physicians. Compelling confirmation during the late 1920s and 1930s led to the recognition of Evans's achievements and she received several honours, including that of being the first woman president of the Society of American Bacteriologists (1928).

Evans, Sir Arthur John 1851–1941
English archaeologist
He was born in Nash Mills, Hertfordshire. A curator at the Ashmolean Museum, Oxford (1884–1908), he developed an interest in the ancient coins and seals of Crete. Between 1899 and 1935 he excavated the Bronze Age city of Knossos (modern Kephala), discovering the remains of the civilization which in 1904 he named 'Minoan' after Minos, the Cretan king of Greek legend. He later rebuilt and repainted substantial parts of the Minoan palace in an effort to recreate its original appearance. 🕮 Ann Brown, *Arthur Evans and the Palace of Minos* (1983)

Evans, Bill (William John) 1929–80
US jazz pianist and composer
Born in Plainfield, New Jersey, he played jazz while a student in Louisiana, but took up music seriously after leaving the army in 1954. He studied in New York, then began to play professionally with clarinettist Tony Scott in 1956, and was a member of the MILES DAVIS group which recorded the hugely influential *Kind of Blue* album in 1958. Although he recorded solo, in duos (with Jim Hall and Bob Brookmeyer) and even with orchestral accompaniment, his preferred format as leader was the piano trio. He is among the most important (and influential) pianists in jazz, and developed his essentially bop-based style in lyrical, highly sophisticated directions.

Evans, Caradoc, *pseudonym of* **David Evans** 1878–1945
Welsh short-story writer and novelist
Born in Llanfihangel-ar-Arth, Dyfed, he spent much of his childhood at Rhydlewis, but left home in 1893 to work as a shop assistant in Carmarthen, Barry, Cardiff and finally London. While in London, he attended evening classes and eventually found employment as a journalist (1906). His collections of short stories, *My People* (1915), *Capel Sion* (1916) and *My Neighbours* (1919), savagely exposed the hypocrisies, lust and greed of the chapel-going people of his native West Wales. His play *Taffy* (1923) was in similar vein and in his own time he was vilified by the Welsh as a traitor for his assaults on many cherished aspects of Welsh culture from Nonconformity and the Eisteddfod to the integrity and intelligence of the people themselves. 🕮 T L Williams, *Caradoc Evans* (1970)

Evans, Chris 1966–
English broadcaster
Born in Warrington, Cheshire, he left school aged 16 and took numerous casual jobs before becoming a broadcasting assistant at Piccadilly Radio, Manchester. He later presented popular shows such as BBC Radio 1's Breakfast Show (1995–97) and Channel 4 television's *The Big Breakfast* (1992–94) and *TFI Friday* (1996–2000). His company Ginger Productions took over Virgin Radio in 1997. He later sold his Ginger Media Group to SMG (Scottish Media Group), in 2000. He married the singer and actress Billie Piper (1982–) in 2001; they later separated

amicably. He returned to broadcasting in 2005. 🕮 David Jones, *Freak or Unique: The Chris Evans Story* (1997)

Evans, Dame Edith Mary 1888–1976
English stage and film actress
Born in London, she became known for her versatility, in many SHAKESPEARE and SHAW plays, and in others, including *The Way of the World*, *The Late Christopher Bean* and *Daphne Laureola*, but her most famous role was as a memorable Lady Bracknell in *The Importance of Being Earnest* (also on film, 1952). During World War II she entertained the troops at home and abroad, and in 1946 was created DBE. She played her first major film role in *The Queen of Spades* (1948) and continued to act until her eighties. 🕮 Bryan Forbes, *Ned's Girl* (1978, also published as *Dame Edith Evans*)

Evans, Frederick Henry 1853–1943
English photographer
Retiring from his profession as a bookseller in 1898, he devoted himself to architectural photography, especially of the cathedrals of England, emphasizing their structural rhythms and repetitions. He found similar order and pattern in his studies of trees and in photomicrographs, as well as in his austerely formed landscapes. His best work was done in the early years of the 20th century, but he remained unsympathetic to the modern activism then emerging.

Evans, Sir Geraint Llewellyn 1922–92
Welsh baritone
He was born in Pontypridd, Mid Glamorgan. He studied singing in Hamburg and Geneva, and made his London debut with the newly formed Covent Garden Opera Company in 1948, singing the Nightwatchman in WAGNER's *Meistersinger*. He sang regularly at Covent Garden until 1984, establishing a reputation in many roles, notably Figaro and Leporello in MOZART, Beckmesser in Wagner, Don Pasquale in DONIZETTI, and Falstaff in VERDI. He also sang at Glyndebourne, San Francisco and elsewhere, created a number of roles, including Flint in BENJAMIN BRITTEN's *Billy Budd*, and produced works with Welsh Opera and in Chicago and San Francisco. He was knighted in 1971, and published his autobiography, *A Knight at the Opera*, in 1984, the year of his retirement.

Evans, Gil (Ian Ernest Gilmore Green) 1912–88
Canadian jazz pianist, composer and arranger
Born in Toronto of Australian parents, he spent his childhood in Washington State and California, and was self-taught as a musician. His first influential work was done in the mid-1940s, when, apart from three years' military service, he was principal arranger for the Claude Thornhill Orchestra. Although basically a dance orchestra, its use of french horns and tuba to create dense textures attracted the interest of young jazz performers. The result was a series of collaborations between Evans and MILES DAVIS, starting in the late 1940s, which led to the emergence of the 'cool jazz' style. As an arranger and conductor, Evans continued to collaborate with Davis until 1960, covering a very influential period in the trumpeter's career. Evans went on to lead and write for a range of groups until his death, and was one of the first modern jazz arrangers to use electronics and rock influences successfully in combination with the swing and bebop idioms.

Evans, (Thomas) Godfrey 1920–99
English cricketer
Born in Finchley, London, he was educated at Kent College, Canterbury, and joined the Kent county cricket staff at the age of 16. First capped for England in 1946, he played in 91 Test matches, and set many new records, including 218 Test dismissals (75 against Australia). He was the first wicket-keeper to have dismissed more than 200 batsmen and scored 2,000 runs in Test cricket. He scored two Test centuries and held records for both the fastest scoring and the slowest (his 10 not out in 133 minutes against Australia at Adelaide in 1946–47 saved the match). After his retirement he went into public relations.

Evans, Sir Harold Matthew 1928–
English journalist
Born in Manchester, he started as a weekly reporter at the age of 16, then studied at Durham University and the University of Chicago. He worked on the *Manchester Evening News* and the *Northern Echo* before becoming editor of *The Sunday Times* (1967–81), and was a pioneer of investigative journalism during the thalidomide scandal. He was editor of *The Times* (1981–82) but resigned after its controversial takeover by RUPERT MURDOCH's News International. He went to New York and became chief editor of *Traveler* magazine for Condé Nast in 1986 and from 1990 to 1997 ran Random House, the book publishing division belonging to the same company as Condé Nast. From 1998 he was the editorial director and vice-chairman of the *New York Daily News* and *US News and World Report*, retiring in 1999 to concentrate on writing books. He married TINA BROWN in 1981. His books include *Good Times, Bad Times* (1983), *The American Century* (1998) and *They Made America* (2004). He was knighted in 2004.

Evans, Janet 1971–
US swimmer
Born in Fullerton, California, she won three gold medals at the 1988 Olympics (400m freestyle, 800m freestyle and 400m medley) and one at the 1992 Olympics (800m freestyle). She set the world records in the 400-metre freestyle, the 800-metre freestyle and the 1,500-metre freestyle, and was a Sullivan award winner in 1989.

Evans, Marian or **Mary Ann** *See* ELIOT, GEORGE

Evans, Oliver 1755–1819
US inventor
Born in Newport, Delaware, he was apprenticed to a wagon-maker. By 1777 he had invented a high-speed machine for assembling the wire-toothed combs used in carding textile fibres. By 1785 he had established a continuous production line, with improved machinery, in a flour mill at Wilmington. Meanwhile he had engaged in a number of profitable business ventures, so that when he moved to Philadelphia he was able to devote his time to improving the very primitive steam engines then coming into use. Most engineers at that time followed the lead of JAMES WATT in rejecting the use of high-pressure steam because of the practical difficulties and the danger of explosion, but by 1802 Evans had successfully built a high-pressure steam engine. For several years he tried to harness the power of steam for road vehicles without much success, although his amphibious steam dredging machine of 1804 is considered to have been the first US steam-powered road vehicle. He built 50 or so engines in total, and was largely responsible for the more rapid adoption of high-pressure steam in the USA than in Great Britain during the early years of the 19th century.

Evans, Walker 1903–75
US photographer
Born in St Louis, Missouri, he started as an architectural photographer in 1933. Moving to social studies, from 1935 he began to record the life of rural depression in the southern states for the US government Farm Security Administration (FSA), although he left this organization a few years later. The two themes were combined in his *American Photographs* (1938), the first section of which shows members of society and the second its buildings, all the images intended to be viewed in sequence. He worked with the writer JAMES AGEE for *Fortune* magazine, documenting the lives of the sharecroppers of the Deep South, and the material was eventually published as *Let Us Now Praise Famous Men* (1941). During his years as associate editor of *Fortune* (1945–65) he continued with architectural studies, but particularly impressive were his records of people in the New York City subways, published in 1966 as *Many Are Called*. He was professor of graphic design at Yale from 1965 to 1974.

Evans-Pritchard, Sir Edward Evan 1902–73
English social anthropologist
Born in Crowbridge, Sussex, he studied history at Oxford, and succeeded his teacher ALFRED RADCLIFFE-BROWN in the chair of social anthropology (1946–70). He carried out fieldwork in East Africa in the 1920s and 1930s among the Azande and the Nuer, resulting in a number of classic monographs, including *Witchcraft, Oracles and Magic among the Azande* (1937), *The Nuer* (1940) and *Nuer Religion* (1956). Though strongly influenced by the sociological theory of ÉMILE DURKHEIM, he came to reject Radcliffe-Brown's view that social anthropology could be regarded as a natural science of society, choosing instead to emphasize its affinity with history, requiring interpretation and translation rather than scientific explanation. His later work on religion was strongly coloured by his own experience of conversion to Catholicism.

Evarts, William Maxwell 1818–1901
US lawyer and politician
He was born in Boston. He was defense counsel for President ANDREW JOHNSON in the impeachment proceedings of 1868, US Attorney-General, US counsel before the *Alabama* tribunal in Geneva (1872), secretary of state (1877–81), and sat in the Senate from 1885 to 1891.

Evatt, Elizabeth Andreas 1933–
Australian lawyer
Born in Sydney, the daughter of a barrister, she was the youngest student at Sydney University Law School, where she was the first woman to win the law medal, and at Harvard, before becoming a barrister in New South Wales at the age of 21. In 1958 she was called to the English Bar, and worked in England for several years, focusing on family law with the Law Commission. On returning to Australia, she became the deputy president of the Arbitration Commission (1973–89). She chaired the Royal Commission of Human Relationships (1974–77) and the Family Law Council (1976–79) and was chief judge in the Family Court of Australia (1976–88). A member of the UN Committee on the Elimination of Discrimination Against Women from 1984 until 1992, she joined the UN Human Rights Committee in 1993. Her other positions included being president of the Law Reform Commission (1988–93), a member of the Human Rights and Equal Opportunities Commission in Australia (1995–98) and chancellor of the University of Newcastle (1988–94). She was made a Companion of the Order of Australia in 1995.

Eve
Biblical character
According to Genesis, Eve was made by God from one of Adam's ribs, as a companion for him. Adam, the first man, named the first woman 'Eve', meaning 'the mother of all living'. They tended the garden of Eden together, until they were expelled for eating the fruit of the tree of knowledge. Although both knew that God had forbidden this, Adam blamed Eve for tempting him. This view has coloured much later interpretation of Eve's character, starting with a brief mention in the New Testament of Eve as a weak seducer, and culminating in a negative assessment of women in general. A few commentators have considered Eve's fellowship with Adam more positively. If Christ can be seen as the Second Adam, reversing the effects of the Fall, then the Virgin Mary can be seen as the Second Eve, her 'yes' to the birth of Jesus being an act of obedience to reverse Eve's disobedience. This interpretation, popular in medieval Catholicism, finds echoes in recent feminist and ecological spirituality that sees women far more in tune with creation than men.

Evelyn, John 1620–1706
English diarist and writer
Born in Wotton, near Dorking, Surrey, he was brought up in Lewes (1625–37), then entered Balliol College, Oxford, and in 1640 the Middle Temple. The Covenant being pressed on him, he travelled for four years on the Continent, and in Paris (1647) married the ambassador's daughter, Mary Browne (1635–1709). He settled at Sayes Court, Deptford, in 1652, but spent a lot of time at court after the Restoration, and from 1685 to 1687 was one of the commissioners of the privy seal. From 1695 to 1703 he was treasurer of Greenwich Hospital and was a prominent FRS. He was always active in church affairs and was involved in the rebuilding of St Paul's Cathedral in London. Of his three dozen literary works the chief are *Fumifugium, or the Inconvenience of the Air and Smoke of London dissipated* (1661), *Sculptura, or the Art of Engraving on Copper* (1662), *Sylva, or a Discourse of Forest-trees* (1664) and a *Diary* (discovered in an old clothes-basket at his brother's home at Wotton in 1817). It covers the years 1641–1706 and contains vivid portraits of his contemporaries. 🕮 B Saunders, *Evelyn and His Times* (1970)

Everdingen, Allart van 1621–75
Dutch landscape painter and etcher
Born in Alkmaar, he visited Scandinavia in the 1640s and was inspired by mountain torrents there, as in *A Saw-Mill by a Torrent* (National Gallery, London). He thus inspired the waterfalls of JACOB VAN RUÏSDAEL. As an etcher, he is best known for *Reynard the Fox*. His brother, Caesar van Everdingen (1606–79), was a historical and portrait painter, whose *Portrait of a Dutch Commander* is in the National Gallery, London. He also helped to decorate the royal Huis ten Bosch at The Hague, for example with *Four Muses with Pegasus* (c.1650).

Everest, Sir George 1790–1866
Welsh military engineer
Born in Gwernvale, Brecknockshire, he was Surveyor-General of India from 1830. He completed the trigonometrical survey of the Indian sub-continent in 1841. He was knighted in 1861 and Mount Everest was named after him in 1865.

Everett, Alexander Hill 1790–1847
US diplomat
Born in Boston, he was appointed minister at The Hague (1818–24) and Madrid (1825–29). Proprietor and editor of the *North American Review* (1829–35), and elected to the Massachusetts legislature, in 1840 he was appointed US agent in Cuba, and in 1845 commissioner to China.

Everett, Edward 1794–1865
US politician and scholar
Born in Dorchester, Massachusetts, he studied at Harvard and in 1815 was elected professor of Greek there. In 1820 he became editor of the *North American Review*, and in 1824 a member of the US Congress. From 1835 to 1838 he was four times governor of Massachusetts, and from 1841 to 1845 minister at the court of St James's. He was president of Harvard (1846–49), in 1852 succeeded DANIEL WEBSTER as secretary of state, and in 1853 was returned to the US Senate. He wrote *Defence of Christianity* (1814), poems and *Orations and Speeches* (1836–59). He was the brother of ALEXANDER EVERETT.

Evers, Medgar (Wiley) 1925–63
US civil rights activist
Born in Decatur, Mississippi, he was an army veteran and an insurance salesman when he became (1954) first field secretary of the National Association for the Advancement of Colored People (NAACP) in Mississippi, working to recruit new members and organizing voter registration drives and economic boycotts. In 1963 he was shot and killed in an ambush in front of his home. The case attracted national attention, and Evers became a martyr to the cause of civil rights. His murderer was finally convicted in 1994, 30 years after the original trial. His brother Charles Evers (1922–) was appointed to his NAACP position, successfully continuing voter registration campaigns and promoting African-American candidates for local elective offices. His widow, Myrlie Evers-Williams (1933–), chaired the NAACP from 1995 to 1998, bringing with her the same drive and integrity her late husband exhibited.

Evert, Chris(tine) Marie 1954–
US tennis player
She was born in Fort Lauderdale, Florida. Renowned for her two-handed backhand, she was extremely cool on the courts and her success helped popularize women's tennis in the USA and Europe. She won 157 professional titles and was undefeated on clay from August 1973 until May 1979. She won 18 singles grand slam titles: the Australian Open twice (1982, 1984), the French Open seven times (1974–75, 1979–80, 1983, 1985–86), Wimbledon three times (1974, 1976, 1981) and the US Open six times (1975–78, 1980, 1982). She was married for a time to the English tennis player John Lloyd, and was co-author with him of *Lloyd on Lloyd* (1985). She retired in 1989, after reaching the quarter-finals of the US Open, to become a mother and a television commentator.

Everts, Jan *See* JOHANNES SECUNDUS

Evita *See* PERÓN, EVA DUARTE DE

Evoe *See* KNOX, EDMUND GEORGE VALPY

Évremond, Seigneur de Saint *See* SAINT-ÉVREMOND, CHARLES SEIGNEUR DE

Ewald, Johannes 1743–81
Danish Romantic poet and dramatist
Born in Copenhagen, he ran away from home at the age of 15 to fight in the Seven Years' War (1756–63), then turned to writing. He was one of the first Danish poets to use national legends and myths as material, as in his biblical drama *Adam og Eva* (1769), the historical drama *Rolf Krage* (1770) and the lyrical drama *Balders Död* (1773). He also wrote an operetta, *Fiskerne* (1779, 'The Fishermen'), which contains the song 'King Christian stood by the lofty mast', now the Danish national anthem. 🕮 L Labe, *Johannes Ewald* (1943)

Ewart, James Cossar 1851–1933
Scottish zoologist
Born in Penicuik, Midlothian, he became professor of natural history at the universities of Aberdeen (1879–82) and Edinburgh (1882–1927), carried out notable experiments in animal breeding and hybridization, and disproved the theory of telegony (the transmitted influence of a previous mate on the offspring of a female by a later mate).

Ewart, William 1798–1869
English politician and reformer
Born in Liverpool, he was Liberal MP (1828–68) for Bletchingly, Liverpool, Wigan, and the Dumfries Burghs. He played a leading part in humanitarian reforms, including the abolition of capital punishment for minor offences and of hanging prisoners in chains. He carried a free libraries bill in 1850.

Ewell, Richard Stoddart 1817–72
US soldier
Born in Georgetown, Washington, DC, he served in Mexico and against the Apaches. However in the Civil War (1861–65) he resigned from the army to join the Confederates (1861), and served under THOMAS JACKSON and ROBERT E LEE. He fought at Gettysburg and the Wilderness, and commanded the defences of Richmond. He was eventually captured with his entire force at Sailor's Creek in 1865.

Ewing, Sir (James) Alfred 1855–1935
Scottish engineer and physicist
Born in Dundee, he was educated at Edinburgh University. He became professor of engineering at Tokyo (1878–83) and Dundee (1883–90), professor of mechanism at Cambridge (1890–1903), director of Naval Education (1903–16) and principal of Edinburgh University (1916–29). During World War I he was the head of the department of the Admiralty which worked on the deciphering of intercepted messages. His works include *Magnetic Induction in Iron and Other Metals* (1891) and *Thermodynamics for Engineers* (1920). He was knighted in 1911.

Ewing, Juliana Horatia, *née* **Gatty** 1841–85
English children's writer
Born in Ecclesfield, Yorkshire, she was the daughter of Margaret Gatty (1809–73), also a children's writer. She soon began to compose nursery plays. These are said to have prompted her mother to start *Aunt Judy's Magazine* (1866), which Juliana later edited, publishing in it many of her charming stories, such as *Jackanapes*. Her numerous books included *A Flat Iron for a Farthing* (1870), *Lab-lie-by-the-Fire* (1873) and *Daddy Darwin's Dovecot* (1881). Her *The Brownies and Other Tales* (1870) provided the name by which the junior section of the Girl Guide movement is known. 🕮 G Avery, *Mrs Ewing* (1961)

Ewing, (William) Maurice 1906–74
US marine geologist
Born in Lockney, Texas, he became a research associate at the Woods Hole Oceanographic Institution, where he studied sound transmission in sea water. In 1944 he joined the geology department at Columbia University and established the Lamont Geological Observatory, becoming director there in 1949. In 1972 he continued his work at the University of Texas. He pioneered marine seismic techniques which he used to show that the ocean crust is much thinner than the continental crust, and discovered the global extent of mid-ocean ridges. He also discovered the deep central rift in the Mid-Atlantic Ridge (1957). His discovery that the ocean sediment thickness increases with distance from the mid-ocean ridges lent support to the plate tectonics theory. He also published papers on seismology, the effects of nuclear explosions, heat flow, petrology and palaeontology.

Ewing, Winnie (Winifred Margaret) 1929–
Scottish Nationalist politician
Born in Glasgow, she was educated at Queen's Park School, Glasgow, and Glasgow University. She was a lawyer and president of the Glasgow Bar Association, and her victory at the Hamilton by-election (1967) established the Scottish National Party (SNP) as a major political force. Although ousted from there in 1970, she won the Moray and Nairn seat in 1974. After losing this position in 1979 she was elected to the European Parliament in the same year, representing the Highlands and Islands, and re-elected in 1984, 1989 and 1994. She became SNP president in 1987, holding the position until 2005. From 1999 to 2003 she was a member of the Scottish Parliament, representing the Highlands and Islands. One of the best-known figures in the SNP, she is known as 'Madame Écosse' because of her work in Europe.

Ewins, Arthur James 1882–1957
English chemist
Born in Norwood, London, he was educated at Chelsea Polytechnic. In 1914, working with HENRY DALE, he isolated the neurotransmitter acetylcholine. Moving to the pharmaceutical firm of May and Baker he conducted the research which resulted in the preparation of sulphapyridine, which opened a new era of sulphonamide drug treatment, effective against a series of previously intractable diseases. Related drugs were produced in the USA (sulfadiazine, sulfasoxazole). The finding that sulphonamides lower blood-sugar levels led to the discovery of tolbutamide and carbutamide for the control of blood-sugar levels in diabetes. Ewins was elected FRS in 1943.

Eworth, Hans c.1520–after 1573
Flemish painter
He was recorded in the Antwerp Guild in 1540, but was active chiefly in England, being based in London from c.1545 for about 20 years. His surviving paintings are mainly portraits, but he is known also to have undertaken work for masques and pageants. In their careful technique and delicate rendering of detail his portraits owe much to HANS HOLBEIN, the Younger, but in style and imagery they are more closely related to the sophisticated Mannerism fashionable in contemporary European court circles. Among his most elaborate allegorical portraits is *Sir John Lutterell* (1550).

Ewry, Ray(mond Clarence) 1873–1937
US athlete
After suffering poliomyelitis as a child, he used calisthenic exercises to strengthen his legs, which helped him to a record ten track-and-field Olympic gold medals between 1900 and 1908. The three gold medals he won in one day at the Paris Olympics at the age of 26 are still a record for track-and-field athletics, although the events in which he competed are now disbanded: standing high jump, standing long jump and standing triple jump.

Exekias or **Execias** fl. late 6th century BC
Greek potter and vase painter
He worked in the 'black figure' style. The most famous of his vessels – on which is inscribed 'Exekias made and decorated me' – is in the Vatican Museum, Rome, and depicts Achilles and Ajax playing dice.

Exmouth, Edward Pellew, 1st Viscount 1757–1833
English naval commander
Born in Dover, he joined the navy at the age of 13 and took part in the battle on Lake Champlain (1776). He was captured at Saratoga in 1777. In 1798 he was sent to the French coast, where he had many successes. He was appointed commander-in-chief in India (1804) and then in the North Sea and in the Mediterranean. Promoted to admiral in 1814, he was sent to Algiers (1816) to enforce the treaty abolishing Christian slavery. With English and Dutch vessels he inflicted such immense damage on the city that the Dey consented to every demand, and Pellew was honoured with the title of Viscount Exmouth.

Eyadéma, (Etienne) Gnassingbé 1937–2005
Togolese politician and general
Born in Pya, Lama Kara district, he joined the French army in 1953 and served in Africa for several years. In 1965 he became army chief of staff in Togo. In 1967 he led a bloodless coup to oust President Nicolas Grunitzky, and as president of Togo he banned all political activity until 1969, when he founded the Assembly of the Togolese People (RPT) as the only legal party. Surviving several attempts to assassinate him, he was re-elected in 1993, 1998 and, after a constitutional change, again in 2003. In 1980–81 he chaired the West African customs union (ECOWAS), and in 2000 he became chairman of the Organization of African Unity. He was succeeded by his son, Fauré Gnassingbé (1966–).

Eyck, Jan van c.1389–1441
Flemish painter
He was born near Maastricht, and nothing is known of his training. He was successively in the service of John of Bavaria, Count of Holland, and PHILIP, THE GOOD, of Burgundy, for whom he undertook diplomatic missions in Spain and Portugal. From 1431 he lived in Bruges. All the works which can be definitely attributed to him date from the last ten years of his life. During this period there is evidence of his increasing wealth and importance as court painter, diplomat and city official. His style is created from a meticulous attention to detail, accuracy in rendering textures and realistic light effects, and his oil technique attained near-perfection. There are three works by him in the National Gallery, London, including the *Man in a Red Turban* (1433), which some have thought to be a self-portrait, and the mysterious Arnolfini marriage portrait. His most famous work is possibly the altarpiece *The Adoration of the Holy Lamb* (1432) in the church of Saint Bavon, Ghent, which consists of 24 panels. He is regarded as the greatest Flemish artist of the 15th century.

Eyde, Samuel 1866–1940
Norwegian engineer
Born in Arendal, he was educated in Germany, where he worked as a structural engineer for some time. He became increasingly interested in the potential in his native land for electrochemical industries, and with KRISTIAN BIRKELAND developed an

economic electric arc process for the fixation of nitrogen, using Norway's abundant hydroelectric power.

Eyre, Edward John 1815–1901
English explorer and colonist
Born in Hornsea, Yorkshire, the son of a clergyman, he emigrated to Australia at the age of 17, settled on the Lower Murray as a sheep farmer, and was appointed a magistrate. In 1840–41 he explored the region between South and Western Australia, and discovered Lake Eyre. In 1847 he became governor of New Zealand, in 1854 of St Vincent, and in 1862 of Jamaica. In 1865 he suppressed a native rebellion at Morant Bay with the utmost severity, and the alleged ringleader (a wealthy Baptist mulatto who was also a member of the Jamaica House of Assembly) was court-martialled and hanged. Eyre was recalled to England and prosecuted amidst great public controversy, but was cleared. 🕮 Geoffrey Dutton, *The Hero as Murderer: The Life of Edward John Eyre* (1967)

Eyre, Sir Richard Charles Hastings 1943–
English stage director
He was born in Barnstaple, Devon, and was educated at Cambridge, beginning his career in 1965 at the Phoenix, Leicester. He became associate director of the Lyceum Theatre, Edinburgh (1967), and director of productions (1970–72). He was artistic director of the Nottingham Playhouse (1973–78), and afterwards producer of the BBC Television *Play for Today* series (1978–81). Other television plays include *Tumbledown* (1988), a Falklands War drama. He has made a number of films, including *The Ploughman's Lunch* (1983) and *Iris* (2001). He became associate director of the National Theatre, London (1981), and in 1988 was appointed director, taking over from Sir PETER HALL. His achievements there included opening up the National Theatre to young directors such as DEBORAH WARNER (*The Good Person of Setzuan*, 1989; *King Lear*, 1990) and increasing the performance of multicultural work and children's drama. In 1996 he directed productions of IBSEN's *John Gabriel Borkman* and *The Prince's Play*, translated by TONY HARRISON from the VICTOR HUGO play *Le Roi s'amuse* (1832). He left in 1997 and was replaced by TREVOR NUNN. He was knighted in 1997.

Eyring, Henry 1901–81
US physical chemist
Born in Chihuahua, Mexico, he studied chemistry at the University of California, Berkeley, from 1927 to 1929 was an instructor at the University of Wisconsin, and in 1929–30 held a research fellowship at the Kaiser Wilhelm Institute for Physical Chemistry in Berlin. From 1931 to 1946 he was on the chemistry faculty at Princeton, and in 1946 moved to the University of Utah as professor of chemistry and graduate dean. His many honours and awards included the Debye award of the American Chemical Society (1964), and he was president of the society in 1965. Eyring's interest in chemical kinetics was further stimulated in Berlin by MICHAEL POLANYI, with whom he pioneered the quantum-mechanical technique used to calculate the rate of chemical reactions from the forces between the atomic nuclei and electrons of reactants and products. He continued to make major contributions to such transition state theories for many years. He also worked extensively on isotope effects, bioluminescence, and liquid structures, and wrote some influential books.

Eysenck, Hans Jürgen 1916–97
British psychologist
Born in Berlin, he left Germany in 1934 and studied psychology at London University under Sir CYRIL BURT. He began his career in the field of clinical psychology, which led to psychometric research into the normal variations of human personality and intelligence. He was a prolific and gifted writer, and a merciless critic of psychoanalysis in its various forms. He frequently championed the view that genetic factors play a large part in determining the psychological differences between people, and often held controversial views, particularly with his study of racial differences in intelligence in *Race, Intelligence and Education* (1971). From 1955 to 1983 he was professor of psychology at the Institute of Psychiatry, London University, then emeritus. He received the American Psychological Association's Distinguished Scientific award in 1988. His other publications include *Uses and Abuses of Psychology* (1953), *Know Your Own IQ* (1962) and the autobiographical *Rebel with a Cause* (1990). 🕮 H B Gibson, *Hans Eysenck* (1981)

Eyskens, Gaston 1905–88
Belgian economist and politician
After studying in Leuven and the USA, he became professor of economics at Leuven (1934–75). In 1939 he was elected MP for the Christian People's Party (Belgium), and in 1965 became a senator in the Upper House. He was minister of finance (1945, 1947–49), and from 1949 to 1950 was prime minister for the first time. In the mid-1950s he was minister for economic affairs, and led the government again in 1958–61. Appointed minister for finance (1965–66), he became prime minister twice more (1968–72, 1972–73). He led coalitions with both left and right, and was one of the pivotal figures of postwar Belgian politics, playing a key role in the negotiations which led to the abdication of LEOPOLD III, the debate on education funding, and the decolonization of the Congo.

Eyvindur, *known as* **Skáldaspillir ('the Plagiarist')**, *properly* **Eyvindur Jónsson** d.c.990
Norwegian court poet of the Viking Age
Born of a noble family, he was a devoted follower of King HAAKON I, the Good, of Norway, whom he eulogized in his *Hákonarmál*. He later wrote a eulogy in praise of Earl Haakon of Norway (*Haleygjatal*), and an *íslendingadrápa* about Icelanders.

Ezekiel c.6th century BC
Old Testament prophet
He was the successor to ISAIAH and JEREMIAH. According to the Book of Ezekiel, he was carried captive to Mesopotamia by NEBUCHADNEZZAR in 597 BC. The prophecies were composed during the Babylonian captivity, and looked forward to a new Jerusalem after the destruction of the old.

Ezra, the Scribe 4th century–5th century BC
Old Testament reformer
He was living in Babylon either during the reign of ARTAXERXES I, Longimanus (465–425 BC) or during that of ARTAXERXES II (404–359 BC). He was commissioned to lead a band of his fellow countrymen from Babylon to Jerusalem (458 or 397 BC) to reorganize the returned Jews there. He is believed to have arranged the books of the Mosaic law (the Pentateuch) as they are now. The Book of Ezra records the return of the Jews after the Babylonian captivity in c.537 BC, and the rebuilding of the Temple.

F

Faber, Frederick William 1814–63
English hymn writer
Born in Calverley, Yorkshire, he graduated from Oxford, where he won the Newdigate prize for poetry (1836). He took Anglican orders, but under the influence of Cardinal JOHN NEWMAN he turned Roman Catholic and founded in 1845 a lay community of converts (the 'Wilfridians'). He wrote many theological works, and is remembered for his *Hymns* (1861), such as 'My God, how wonderful Thou art' and 'Hark, hark my soul'.

Fabergé, Peter Carl, *properly* **Karl Gustavovich Fabergé** 1846–1920
Russian goldsmith and jeweller
He was born in St Petersburg, of Huguenot descent, and educated in Germany, Italy, France and England. He inherited his father's establishment in 1870, and moved from the design and manufacture of conventional jewellery to the creation of more elaborate objects, such as the celebrated imperial Easter eggs, first commissioned by ALEXANDER III for his tsarina in 1884. Fabergé's skilled artists and craftsmen produced exceptionally delicate and imaginative flowers, animals, groups of figures, etc, much prized by Russian, European and Asian royalty. He died in exile in Lausanne after his business had been destroyed during the Russian Revolution. 🕮 G Hill et al (eds), *Fabergé and the Russian Master Goldsmiths* (1989)

Fabius, Caius, *also called* **Pictor ('Painter')** fl.304 BC
Roman general
He earned his surname by decorating the temple of Salus in Rome with the earliest known Roman paintings (304 BC).

Fabius, Laurent 1946–
French socialist statesman
The son of a wealthy art dealer in Paris, he had a brilliant academic career there at the École Normale Supérieure and the École Nationale d'Administration. He joined the Council of State as an auditor in 1973 and became economic adviser to the Socialist Party (PS) leader, FRANÇOIS MITTERRAND, in 1976. Elected to the National Assembly in 1978, representing the Seine-Maritime constituency, he was appointed budget minister when the PS gained power in 1981, and minister for research and industry in 1983. In 1984, aged 37, he was appointed prime minister in an effort to revive the PS's sagging fortunes. He introduced a more free-market economic programme, which had some success, but resigned following his party's electoral defeat in 1986. He was president from 1988 to 1992, thereafter being appointed first secretary of the PS from 1992 to 1993, and was also re-elected to the National Assembly the same year. He was finance minister from 2000 until 2002. In 2005, he led the 'no' vote that defeated the adoption of the European Union constitution by France; this split his party. He sought the PS nomination as candidate for the 2007 presidentail election.

Fabius, Quintus Fabius Maximus Verrucosus, *also called* **Cunctator ('Delayer')** d.203 BC
Roman soldier
He was five times consul and twice censor. In the Second Punic War (218–202 BC) he was elected dictator (217 BC) after the Roman defeat at Lake Trasimene, and became known by his defensive tactics as Cunctator ('Delayer'). Avoiding direct encounters, he carried on guerrilla warfare and allowed Rome to muster her forces. The derisive nickname took on an honourable connotation after the disastrous Roman defeat at Cannae (216 BC), and the 'Fabian' tactics were resumed. He recovered Tarentum in 209 BC and was made consul for the fifth time. He died just before the successful conclusion of the war.

Fabius Quintus Fabius Rullianus 4th century BC
Roman general
He fought in the Second Samnite War. He was dictator (315 BC), censor (304 BC) and six times consul.

Fabre, Jean Henri 1823–1915
French entomologist
Born in St Léon, Aveyron, he taught in schools at Carpentras, Ajaccio and Avignon before retiring to Sérignan in Valcluse. He is remembered for his detailed and carefully observed accounts of insect behaviour and natural history, which resulted in the *Souvenirs entomologiques* (10 vols, 1879–1907). These dealt with the activities of insects such as scarab beetles, ant lions and parasitic wasps, from observations of which he deduced that much of the wasp's behaviour is inherited and not learned. 🕮 G V Legros, *Fabre* (1971)

Fabre d'Églantine, Philippe François Nazaire 1750–94
French dramatist, poet and revolutionist
Born in Carcassonne, he wrote *Le Philinte de Molière* (1790), a sequel to MOLIÈRE's *Le Misanthrope*. A member of the National Convention, he devised some of the new names of months for the Revolutionary Calendar, but, having fallen out of favour with ROBESPIERRE, was guillotined. 🕮 L Jacob, *Fabre d'Églantine, chef des Fripons* (1946)

Fabriano, Gentile da, *properly* **Niccolò di Giovanni di Massio** c.1370–1427
Italian painter
Born in Fabriano in the Marches, along with LORENZO GHIBERTI he was the major exponent in Italy of the International Gothic Style. He first achieved fame with his decorations for the doge's palace in Venice (all now lost) and then went on to work throughout Italy's main centres before reaching Rome, where he executed frescoes in the church of S Giovanni in Laterano (also lost). His greatest surviving work is the *Adoration of the Magi*, now in the Uffizi Gallery, Florence, showing all the facets of his opulent style: complex lighting effects, rich use of colour and gilding, and careful attention to detail. The overall impression is intensely decorative. Gentile's style is often considered old-fashioned for the period, but in comparison with that of his contemporary MASACCIO, Gentile's work was thought advanced in his own day.

Fabrici, Girolamo *See* FABRICIUS AB AQUAPENDENTE, HIERONYMUS

Fabricius, David 1564–1617
German astronomer and clergyman
Born in Esens, he was a skilled observer and his observations (1602–04) of the positions of Mars (together with those made by TYCHO BRAHE) were used by his friend JOHANNES KEPLER in his analysis of planetary orbits. Fabricius discovered the first known variable star (Mira, in the constellation Cetus) in 1596. He was pastor at Resterhaave and Osteel in East Friesland, where he was murdered by one of his parishioners.

Fabricius, Johann Christian 1745–1808
Danish entomologist
Born in Tondern in Schleswig, he became professor of natural history at Kiel University in 1775. His classification of insects was based on the structure of the mouth. He was one of the founders of entomological taxonomy.

Fabricius, Johannes 1587–c.1615
Dutch astronomer and physician
He was born in Resterhaave, the son of DAVID FABRICIUS. He made pioneering observations of sunspots, whose discovery was announced publicly in 1611.

Fabricius ab Aquapendente, Hieronymus, *Italian name* **Girolamo Fabrici** 1537–1619
Italian anatomist
Born in Acquapendente, he studied at Padua under GABRIELE FALLOPPIUS and succeeded him as professor of anatomy there (1562). One of his pupils was WILLIAM HARVEY. A remarkable anatomist of his time, and a pioneer of modern embryology, he studied foetal development, the function of the larynx as a vocal organ and the changing size of the pupil in the eye.

Fabritius, Carel 1622–54
Dutch painter
Born in Beemster, he worked under REMBRANDT around 1641 and lived mainly at Delft, where he was killed in an explosion. He is important for the influence of his sensitive experiments in composition and the painting of light (as in the tiny *View of Delft*, 1652, in the National Gallery, London) upon his pupil JAN VERMEER. Some of his paintings have been attributed to his brother Barent Fabritius (1624–73), also a pupil of Rembrandt.

Fabry, (Marie Paul Auguste) Charles 1867–1945
French physicist
Born in Paris, he graduated from the École Polytechnique, Paris, became professor at Marseilles (1904) and the Sorbonne, Paris (1920), and was appointed the first director of the latter's Institute of Optics. Inventor of the 'Fabry–Perot interferometer', he is also known for his researches into light in connection with astronomical phenomena, and he confirmed experimentally the DOPPLER effect for light in the laboratory. Previously, such measurements had been made using stellar sources. He was also interested in ways of increasing the public's scientific understanding.

Fadeyev, Aleksandr Aleksandrovich, *pseudonym* **Bulgya** 1901–56
Russian novelist
Born in Kimry, near Tver, he was educated in Vladivostock. He was deeply influenced by LEO TOLSTOY, and wrote *Razgrom* (1926, Eng trans *The Rout*, 1926), set in the Russian Civil War, and *Molodaya gvardiya* (1945, Eng trans *The Young Guard*, 1962), portraying Russian resistance against the Germans in World War II. A Socialist Realist and general-secretary of the Soviet Writers' Union (1946–55), he mercilessly exposed any literary 'deviationism' from the party line. However, he later became a target himself and, compelled to revise *Molodaya gvardiya*, took to drink and finally shot himself. 🕮 V M Ozerov, *Aleksandr Aleksandrovich Fadeyev* (1960)

Faed, John 1819–1902
Scottish painter
Born in Burley Mill, Kirkcudbrightshire, he studied at the Edinburgh School of Design from 1841. He became a noted painter of miniatures in London, and also painted figure subjects like *The Cottar's Saturday Night* (1854). He was the brother of THOMAS FAED.

Faed, Thomas 1826–1900
Scottish painter
Born in Burley Mill, Kirkcudbrightshire, he studied at the Edinburgh School of Design. He was elected an associate of the Royal Scottish Academy in 1849, when he produced *Scott and His Friends at Abbotsford*, engraved by his brother, JOHN FAED. He went to London in 1852 and made his name with paintings of humble incidents in Scottish life. Elected to the Royal Academy in 1864, he resigned in 1893.

Fagan, Garth 1940–
Jamaican dancer, choreographer and artistic director
Born in Kingston, he toured Latin America as a teenager with Ivy Baxter and Rex Nettleford's Jamaican National Dance Company. He later attended college in the USA and danced with, and choreographed for, several Detroit-based companies. Soon after joining the faculty of the State University of New York, Brockport (1970), he began teaching untrained urban youths at nearby Rochester. The fruit of these classes was The Bottom of the Bucket But... Dance Theatre, shortened to Bucket Dance Theatre a decade later, and now called Garth Fagan Dance. He fashions his pupils into a disciplined professional ensemble who expertly convey the Fagan style, a fusion of modern and jazz dance with influences of both Afro-Caribbean and classical ballet movement. He occasionally choreographs dances for other companies and directs stage shows.

Faggin, Federico 1941–
Italian–American computer scientist
Born in Vicenza, Italy, he studied at the University of Padua. He emigrated to the USA in 1968 to work for the Fairchild Semiconductor Company, and in 1970 joined Intel Corporation, where he pioneered the design of the world's first microprocessor, the 4004, with TED HOFF and STANLEY MAZOR. Faggin co-founded Zilog, Inc. in 1974, where he supervised the design of the Z80 microprocessor, and in 1986 co-founded Synaptics, Inc., which specialized in intelligent machines. He was given the European Inventor of the Year Lifetime Achievement Award in 2006.

Fahd (ibn Abd al-Aziz al-Saud) 1923–2005
King of Saudi Arabia
Born in Riyadh, he was the eleventh of 42 sons born to IBN SAUD; his mother, Hassa bint Ahmad Al-Sudeiri, was said to be Ibn Saud's favourite wife. Fahd and his six full brothers – collectively known as the Sudeiri Seven – were to become a powerful alliance within the Saudi royal family. He served as minister of education (1953) and minister of the interior (1962–75) before becoming first deputy prime minister and effective ruler in 1975 on the assassination of his half-brother FAISAL. He officially became king in 1982, following the death of his other half-brother KHALID. As ruler, he helped to shape Saudi Arabia's foreign policy during the boom period of the 1970s and 1980s, using his economic power to influence the US government's approach to the Arab–Israeli conflict, and countering Soviet influence through financial assistance to moderate Arab states such as Egypt. As his kingdom's fortunes began to decline during the 1980s, his influence waned. The 1990–91 Gulf War, when he permitted the deployment of US, British and other forces on his territory in order to contain Iraqi expansionism, was an important turning point that led observers to question the changing nature of the relationship between Saudi Arabia and the West. His ability to manage the situation to his country's advantage was called into question, and the excesses of his lifestyle were widely criticized. He introduced political reforms during the early 1990s in an attempt to appease his critics, but his health was failing. Following a debilitating stroke in 1995, he delegated the management of government affairs to his half-brother Crown Prince ABDULLAH.

Fahrenheit, (Gabriel) Daniel 1686–1736
German instrument-maker and physicist
Born in Danzig (now Gdansk, Poland), he was sent (1701) to Amsterdam, where he learned the trade of instrument-maker. He produced high-quality meteorological instruments, devising an accurate alcohol thermometer (1709) and a commercially successful mercury thermometer (1714). Adopting what he believed to be OLAUS ROEMER's practice of taking thermometric fixed points as the temperatures of melting ice and of the human body, Fahrenheit eventually devised a temperature scale with these points calibrated at 32 and 96 degrees, and zero fixed at the freezing point of ice and salt. He was the first to show that the boiling point of liquids varies at different atmospheric pressures, and suggested this as a principle for the construction of barometers.

Fa Hsien *See* FA XIAN

Faidherbe, Louis Léon César 1818–89
French general and colonial administrator
He was born in Lille. As governor of Senegal (1854–61, 1863–65) he greatly extended the frontiers of his province, laying the foundation of France's empire in Africa. In the Franco-Prussian War (1870–71) he commanded the army of the north, but was defeated near St Quentin (1871). He was twice elected as a deputy (1871, 1879). He wrote on Numidian and Phoenician inscriptions (1870–74), the anthropology of Algiers and the French Sudan (1874–84), a work on Senegal (1889), and treatises on the Fula (or Poul) and Berber languages (1875–77), besides *Campagne de l'armée du nord* (1871, 'Campaign of the Army of the North').

Fairbairn, Sir William 1789–1874
Scottish engineer
Born in Kelso, in the Scottish Borders, he was apprenticed in 1804 to an engine-wright at North Shields, where he also studied mathematics and met GEORGE STEPHENSON. Moving to London in 1811 he invented a steam excavator and a sausage-making machine, neither of them much of a commercial success. By 1817, however, he had established an engineering works in Manchester making machinery for water wheels and cotton-mills, and within a few years he had gained a reputation as one of the most capable engineers in the country. From about 1840 until his death the Manchester works also built over 400 locomotives. In 1830 he took a lead in the building of iron boats, and his works at Millwall, London (1835–49), turned out hundreds of vessels. He developed the rectangular wrought-iron tubes for Stephenson's railway bridge over the Menai Strait (1850), the two main spans of which measured almost 460 feet (140m) and were not surpassed for the next 25 years. He also aided JAMES JOULE and William Thomson, 1st Baron KELVIN in geological investigations from 1851, and guided the experiments of a government committee (1861–65) on the use of iron for defensive purposes. He was elected FRS in 1850 and made a baronet in 1869.

Fairbanks, Douglas Elton, Snr, *originally* **Julius Ullman** 1883–1939
US film actor
Born in Denver, Colorado, he first appeared in stage plays (from 1901), but in 1915 went into films and specialized in swashbuckling hero parts, as in *The Three Musketeers* (1921), *Robin Hood* (1922) and *The Thief of Baghdad* (1924), in which he did all his own stunts. He was a founder of United Pictures. In 1920 he married MARY PICKFORD; they divorced in 1935. His son DOUGLAS FAIRBANKS, JNR followed in his footsteps.

Fairbanks, Douglas Elton Ullman, Jnr 1909–2000
US film actor
He was born in New York City, the son of DOUGLAS FAIRBANKS, SNR. In his youth he made Hollywood movies in his father's style, including *Catherine the Great* (1934), *The Prisoner of Zenda* (1937) and *Sinbad the Sailor* (1947), and also gained a reputation as a producer. He later became interested in international affairs, and made a name for himself as a diplomat. He distinguished himself in World War II and was created an honorary KBE in 1949. He published two volumes of autobiography, *The Salad Days* (1988) and *A Hell of a War* (1993).

Fairey, Sir (Charles) Richard 1887–1956
English aeronautical inventor and industrialist
He was born in Hendon, London, and studied electrical engineering at Finsbury Technical College. He was also a skilled model-aircraft builder, and became chief engineer to aircraft manufacturers Short Brothers in 1913. He formed Fairey Aviation Company in 1915, starting by building Short designs, and by 1925 half the aircraft in the RAF were of Fairey origin. Famous types from his factory include Hendon, Fantome, Swordfish, Barracuda and Firefly. Following World War II the company worked on guided weapons and helicopters, and in 1956 the Fairey 'Delta' became the first aircraft to fly at over 1,000mph (1,609kph). In 1927 he took up yachting, designing advanced hulls and winning many races.

Fairfax, John 1804–77
Australian newspaper proprietor
He was born in Warwick, Warwickshire, England, and was apprenticed to a printer at the age of twelve. In 1828 he founded a newspaper in Leamington, and in 1835 became part-owner of another. After twice successfully defending a libel action he was unable to meet his costs, was declared insolvent and with his family went to Sydney in 1838. Three years later he and a partner bought, on credit, the established daily newspaper *The Sydney Herald*, which in 1842 became *The Sydney Morning Herald*. For the first few years the two partners performed every function, writing, editing and printing, and their success was such that in 1851 Fairfax returned to Leamington and repaid all his creditors in full. He also purchased a steam printing press which on its arrival in Sydney (1853) became the first of its kind to print a newspaper in Australia.

Fairfax (of Cameron), Thomas Fairfax, 3rd Baron 1612–71
English general
Born in Denton, Yorkshire, he was the son of Ferdinando, Lord Fairfax. From 1629 he served in the Netherlands, under Sir Horace, 1st Baron Vere, whose daughter Anne he married (1637). In the Civil War (from 1642) he was general of Parliamentary horse and after distinguished action at Marston Moor (1644) was appointed to succeed the 3rd Earl of ESSEX in the supreme command in 1645, and defeated CHARLES I at the decisive Battle of Naseby (1645). In 1650, on Fairfax's refusal to march against the Scots, who had proclaimed CHARLES II king, CROMWELL was appointed commander-in-chief, and Fairfax withdrew into private life. After Cromwell's death he assisted GEORGE MONK, 1st Duke of Albermarle, against JOHN LAMBERT and was head of the commission dispatched to The Hague in 1660 to arrange for the return of Charles II.

Fairweather, Ian 1891–1974
Australian painter
Born in Bridge of Allan, Stirlingshire, Scotland, he served in the army in World War I then studied forestry in London and Edinburgh. He later attended the Slade School of Art, London, from 1920, where he developed an interest in Oriental art. He eventually became a student of Chinese and his abstract painting was very much influenced by the art of non-European cultures. From 1924 he travelled extensively, living and working in Germany, Canada, China, Japan, India and Australia. His *Bathing Scene, Bali* was acquired by the Tate Gallery, London, in 1934. In 1940 he served in the British army in India until, invalided out in 1943, he returned to settle in Australia. In 1952 he attempted to sail from Darwin to Indonesia in a home-made raft. Although he eventually landed, he had been presumed lost at sea and an obituary had already appeared in the Australian press. After several more adventures, he returned to Australia in 1953 and lived and worked in a hut he built on Bribie Island off the Queensland coast. He exercised considerable influence over the younger generation of artists in Sydney during the 1960s as his work became more abstract, as in *Monastery* (1961, Rudy Komon Gallery, Sydney).

Faisal, *in full* **Faisal ibn Abd al-Aziz** 1905–75
King of Saudi Arabia
He was born in Riyadh, and was declared crown prince and foreign minister on the accession of his brother SAUD in 1953. He was given full executive powers during the economic crisis of 1958, which he retained until 1960, and was made viceroy in 1964, succeeding to the throne when Saud abdicated later in the year. He showed himself to be an able and energetic ruler, especially in financial affairs. His foreign policy was cautious, although he joined the Arab states in the Arab–Israeli War of 1967. He was shot dead in the royal palace by his nephew.

Faisal I 1885–1933
King of the Hejaz
Born in Ta'if, he was the son of HUSSEIN IBN ALI. He played a prominent role in the Arab revolt against Turkey (1916–18) and became King of Iraq (1921). He negotiated with Great Britain a treaty (1930) that gave Iraq independence and League of Nations membership (1932). 🕮 Vincent Sheean, *Faisal, the King and his Kingdom* (1975)

Faisal II, *in full* **Faisal ibn Ghazi ibn Faisal el Hashim** 1935–58
King of Iraq
Born in Baghdad, the great-grandson of HUSSEIN IBN ALI and cousin of King HUSSEIN of Jordan, he succeeded his father, King Ghazi, who was killed in an accident in 1939. After an education at Harrow he was installed (1953) as the third King of modern Iraq, thus ending the regency of his uncle, Emir Abdul Illah. He paid a state visit to Great Britain in 1956. Although, in the aftermath of the Suez intervention (1956), he formally declared that Iraq would continue to stand by Egypt, rivalry later grew between the two incipient Arab blocs. In 1958 he therefore concluded (with King Hussein of Jordan) a federation of the two countries in opposition to the United Arab Republic of Egypt and Syria. In July that year, he and his entire household were assassinated during a military coup d'état and Iraq became a republic.

Faithfull, Emily 1835–95
English publisher and feminist
Born at Headley Rectory, Surrey, she founded in London a printing house with women compositors in 1860, and was appointed printer and publisher-in-ordinary to Queen VICTORIA. In 1863 she started *Victoria Magazine*, which she edited until 1880, advocating the claims of women to renumerative employment. In 1865 she founded a penny weekly, *Women and Work*, and she published *Change upon Change*, a novel, in 1868.

Faithfull, Marianne Evelyn 1946–
English singer, songwriter and film actress
Born in Hampstead, London, she was 'discovered' by the manager of the ROLLING STONES and at the age of 18 had a hit with 'As Tears Go By' (1964). As MICK JAGGER's girlfriend, she received headline attention when the Stones were arrested on drugs charges. Her acting career included *Girl on a Motorcycle* (1968). Her singing career seemed to be over in the 1970s, but the extraordinary *Broken English* (1979) revived her fortunes. She has since built a strong reputation as a cabaret performer and interpreter of BRECHT and WEILL songs, and continues to act on stage, film and television. Her autobiography, *Faithfull*, was published in 1994.

Faithorne, William 1616–91
English engraver
Born in London, he fought as a Royalist, and having been banished for refusing allegiance to CROMWELL, he spent several years in Paris, where he made engravings of prints from the vast collection of the Abbé de Villeloin. Allowed home in 1650, he achieved fame as a portraitist and also engraved Newcourt's maps of London and Westminster, and of Virginia and Maryland. He published *The Art of Graving and Etching* in 1662.

Fajans, Kasimir 1887–1975
US physical chemist
Born in Warsaw, Poland, he was educated at the universities of Leipzig and Heidelberg, obtaining his doctorate in 1909. He

later carried out research at Zurich and with the physicist ERNEST RUTHERFORD at Manchester (1910–11). From 1911 to 1917 he was on the staff of the Technische Hochschule, Karlsruhe, and from 1917 to 1935 he worked at the University of Munich as director of the Institute for Physical Chemistry (1932–35). From 1936 until his retirement in 1957 he was professor of chemistry at the University of Michigan, Ann Arbor. Among his numerous awards and honours was honorary membership of the Royal Institution. In 1912 he discovered the radioactive displacement law at around the same time as FREDERICK SODDY and Alexander Smith Russell. Later he pioneered the use of adsorption indicators in precipitation titrations. He also formulated the factors that govern whether an element tends to form ionic or covalent compounds in terms of ideas which became known as Fajans's rules (1924). He also contributed extensively to thermochemistry and photochemistry.

Falco, Louis 1942–93
US modern dancer and choreographer
Born in New York City, he studied with JOSÉ LIMÓN, MARTHA GRAHAM and CHARLES WEIDMAN, joining the Limón company in 1960. In his ten years with them he performed in Limón's *The Demon*, *Missa Brevis*, *The Winged* and *The Exiles and Psalms*. In 1967 he formed his own company and began to choreograph. His works, popular with audiences, have since been included in the repertoires of many of the world's major contemporary dance companies, including Boston Ballet, Rambert Dance Company and Netherlands Dance Theater. His film work includes the dance element of the successful theatre-school story, *Fame* (1980).

Falcone, Aniello 1600–56
Italian artist
He founded a school of battle painters in Naples, and was the teacher of SALVATOR ROSA.

Falconer, Hugh 1808–65
Scottish botanist and palaeontologist
Born in Forres, Grampian, he studied medicine at Aberdeen and Edinburgh, then went to India as assistant surgeon at the Bengal Medical Establishment (1830). He then became superintendent at the botanic gardens at Saharanpur in 1832 and discovered many extinct Lower Pliocene fossil vertebrates in the Siwalik Hills. He also conducted the first experiments on growing tea in India. He later returned to Great Britain (1842) and wrote on Indian botany and palaeontology, arranged Indian fossils in the British Museum and East India House, and prepared his great work *Fauna Antiqua Sivalensis* (1846–49). He returned to India in 1848 as superintendent of the botanic garden and professor of botany at the medical college in Calcutta. He retired from the Indian Service in 1855, returning once again to England where he undertook studies of the Pleistocene faunas of Great Britain, Sicily, France and Gibraltar.

Falconer, Ion Keith or **Ion Keith-Falconer** 1856–87
Irish Orientalist, missionary and athlete
He was the third son of the Earl of Kintore. While studying at Cambridge he began evangelistic work, which he continued at Mile End in London. A keen cyclist, he defeated the then fastest cyclist in the world (1878), and cycled from Land's End to John o' Groats. Appointed to the largely nominal post of professor of Arabic at Cambridge, he settled at Sheikh Othman near Aden as a Free Church missionary, shortly before he died of fever. In 1885 he translated the Fables of Bidpai.

Falconet, Étienne Maurice 1716–91
French sculptor
He was born in Paris, became a pupil of FRANÇOIS LEMOYNE, and was director of sculpture at the Sèvres porcelain factory from 1757 to 1766. His figures of *Venus*, bathers and similar subjects (in the Louvre) epitomize the Rococo style of the period of LOUIS XV and were very popular with patrons such as Madame de POMPADOUR. It was through the influence of DENIS DIDEROT that CATHERINE II, the Great, invited him to Russia in 1766 to execute what is his most impressive work, a bronze equestrian monument to PETER I, the Great, in St Petersburg (1767–78). After suffering a stroke in 1783, he turned to writing art theory, nine volumes of which had been published by 1787.

Faldo, Nick (Nicholas Alexander) 1957–
English golfer
He was born in Welwyn Garden City, Hertfordshire. Within seven years of turning professional he was the European top player. His early successes included winning the Professional Golfers' Association (PGA) championships in 1978, 1980 and 1981. However he was unhappy with his performance and spent two years reworking his swing with golf instructor David Leadbetter. This resulted in six major victories: the Open championship (1987, 1990, 1996) and the Masters (1989, 1990, 1996). His eleven appearances in the Ryder Cup are a record, as is his points total of 25. His greatest victory was perhaps the 1996 Masters, when he overcame a six-stroke deficit to win the competition by five shots.

Falguière, Jean Alexandre Joseph 1831–1900
French sculptor and painter
Born in Toulouse, he was celebrated more for his portrait statues than his larger compositions. Several sculptures and paintings are now in the Luxembourg Palace in Paris, and his statue of the Marquis de LAFAYETTE stands in Washington, DC.

Faliero, Marino c.1274–1355
Doge of Venice
He defeated the Hungarians at Zara (1346), captured Capo d'Istria, was ambassador to Rome and Genoa, and became doge in 1354. After conspiring unsuccessfully to overthrow the oligarchs, he was arrested and beheaded. His fate is the theme of tragedies by BYRON and ALGERNON SWINBURNE, and of a painting by EUGÈNE DELACROIX.

Falk, Johann Daniel 1768–1826
German writer and philanthropist
Born in Danzig, he founded the 'company of friends in need' for helping destitute children, and established the Falk Institute at Weimar. Of his writings the best known are his satirical works, such as *Der Mensch* (1795), and a study of GOETHE.

Falkberget, Johann Petter, *originally* **Johann Petter Lillebakken** 1879–1967
Norwegian novelist
Born in Nordre-Rugel, he was a miner from the age of eight, and wrote realistic novels of working-class life in his area. His first novel was *Svarte Fjelde* (1907, 'Black Mountains'). He also wrote *Den fjerde nattevakt* (1923, 'The Fourth Night-Watch') and two trilogies, *Christianus Sextus* (1927–35) and *Nattens brød* (1940–59, 'Night's Bread').

Falkender, Marcia Matilda Falkender, Baroness, *originally* **Marcia Williams** 1932–
English political worker
She took a history degree at Queen Mary College, London, then worked at Labour Party headquarters before becoming private and political secretary to HAROLD WILSON (1956–83). Her background influence during the 1964–70 Labour government is chronicled in her book *Inside No. 10* (1972). She was given a life peerage in 1974.

Falkenhayn, Erich von 1861–1922
German soldier
Following a varied military career, he succeeded HELMUTH VON MOLTKE as chief of the German general staff in 1914. He decided against a German retreat in the West, despite the French success at the first Battle of the Marne (1914) and in 1916 he launched the offensive at the Battle of Verdun. His failure led to his replacement by PAUL VON HINDENBURG and ERICH LUDENDORFF in 1917. He brilliantly commanded the German forces in the occupation of Romania when it entered the war, and continued to serve successfully as a field commander in Palestine and Lithuania.

Falla, Manuel de 1876–1946
Spanish composer
Born in Cadiz, he played the piano as a child, and after two years studying under the composer Felipe Pedrell (1841–1922) won prizes both for his piano-playing and for his opera *La Vida Breve* ('Short Life') in 1905. During his seven years in Paris, up to the outbreak of World War I, he composed in a less exclusively national style, but after his return to Spain in 1914 his music returned to his original colourful Spanish idiom, of which the most famous piece was the ballet *El Sombrero de Tres Picos* (1919, 'The Three-Cornered Hat'). His other works include the opera *El Retablo de Maese Pedro* (1919–22, 'Master Peter's Puppet Show'), the ballet *El Amor Brujo* (1914–15, 'Love, the Magician') and the piano and orchestra suite *Noches en los Jardines de España* (1909–16, 'Nights in the Gardens of Spain'). With the outbreak of the Spanish Civil War, he settled in Argentina. 🕮 G Chase and A Budwig, *Manuel de Falla* (1986)

Fallada, Hans, *pseudonym of* **Rudolf Ditzen** 1893–1947
German writer
Born in Greifswald, he achieved international fame with his novel of German social problems, *Kleiner Mann, Was Nun?* (1932, Eng trans *Little Man, What Now?*, 1969), in which a devoted young couple struggle against the hardship of

rampant inflation and unemployment. *Wolf unter Wölfen* (1937, Eng trans *Wolf Among Wolves*, 1938) is a tragic novel of post-World War I Germany. Several important works appeared posthumously, including *Der Trinker* (1950, Eng trans *The Drinker*, 1952). 🕮 Hans Schueler, *Hans Fallada, Humanist and Social Critic* (1970)

Fallersleben, Hoffmann von *See* HOFFMANN VON FALLERSLEBEN

Fallopio, Gabriello *See* FALLOPPIUS, GABRIELE

Fallopius, Gabriele, *Italian* **Gabriello Fallopio** or **Fallopia** 1523–62
Italian anatomist
He was born in Modena, and became professor of anatomy at Pisa (1548) and Padua (1551). He particularly studied bones and the reproductive organs, and the Fallopian tube connecting the ovaries with the uterus is named after him.

Falls, Cyril Bentham 1888–1971
English military historian
Educated at Bradfield College, Portora Royal School, Enniskillen, and London University, he served as a staff officer in World War I and won the Croix de Guerre. He was military correspondent of *The Times* (1939–53) and Chichele Professor of the History of War at Oxford (1946–53). He wrote the official history of the British campaigns in Egypt, Palestine, Macedonia and France, studies of RUDYARD KIPLING and FERDINAND FOCH, *A Short History of the Second World War* (1948), *The First World War* (1960) and other works.

Faludi, Susan 1959–
US journalist and writer
Born at Yorktown Heights, New York, and educated at Harvard University, she has been a staff member of the *New York Times* and worked for the San Francisco bureau of the *Wall Street Journal*. In 1991 she was awarded the Pulitzer Prize for her investigative journalism as well as the 1991 National Book Critics Award for non-fiction for *Backlash* (1991), which argues that, despite appearances, women are still controlled and repressed in contemporary society. In 2000 she published *Stiffed: The Betrayal of Modern Man*.

Falwell, Jerry 1933–
US evangelist
Born in Lynchburg, Virginia, he studied engineering there, but after a religious conversion graduated from Baptist Bible College, Springfield, Missouri. In 1956 he founded and became pastor of Thomas Road Baptist Church, Lynchburg. There he inaugurated the television 'Old-Time Gospel Hour', and founded Liberty Baptist College. In 1979 he established Moral Majority Inc., which formed a rallying point for conservative opinion in the 1980 and 1984 presidential election campaigns, and in 1982 an influential publication listed him among the 20 most prominent people in the USA. He wrote *Listen, America!* (1980), *The Fundamentalist Phenomenon* (1981), *Wisdom for Living* (1984) and the autobiographical *Strength for the Journey* (1987).

Faneuil, Peter 1700–43
US merchant and philanthropist
Born in New Rochelle, New York, he made a fortune in Boston, where he built the Faneuil Hall (1742), which would later become known as 'the cradle of American liberty' (1742), and presented it to the town.

Fanfani, Amintore 1908–99
Italian politician
He was born in Pieve Santo Stefano. A former professor of political economics, he was prime minister six times (1954, 1958–59, 1960–63 (twice), 1982–83, 1987). Nominated a life senator in 1972, he was president of the Italian Senate (1968–73, 1976–82). He was a member (and former secretary and chairman) of the Christian Democratic Party, and was both minister of the interior (1953, 1987–88) and budget minister (1988–1989).

Fangio, Juan Manuel 1911–95
Argentine racing driver
Born in Balcarce, of Italian descent, he served his racing apprenticeship first as a mechanic and then by driving a car he had built himself in South American events. He first took part in European grand prix racing in 1949, and in 1951 won the first of his five world championships; he was world champion again for four consecutive years from 1954 to 1957. His record of 24 grand prix wins was only bettered ten years later by JIM CLARK. Fangio retired in 1958 and became an executive for Mercedes-Benz. 🕮 Denis Jenkinson, *Fangio* (1973)

Fan Kuan (Fan K'uan) fl.c.990–1030
Chinese landscape painter
Born in Huayuan, Shaanxi (Shensi) province, he was a representative of the Monumental style of Chinese painting, which began between the fall of the Tang (T'ang) dynasty and the foundation of the Song (Sung) dynasty in 960. The painted silk hanging scroll *Travelling in Streams and Mountains* (Palace Museum, Taiwan), one of the few surviving paintings of the period and possibly the greatest single example of the style, is attributed to him. His work was based on Taoism and the contemplation of nature, in his case the austere grandeur of the Shaanxi mountains, to which he retired.

Fanon, Frantz 1925–61
French–Martinique doctor and revolutionary writer
He was born in Martinique. Educated as a psychiatrist in France and sent to Algeria, he changed sides and joined the rebels. His study of the Algerian revolution, *Les Damnés de la terre* (1961, 'The Wretched of the Earth'), became the inspiration and manifesto for liberation struggles throughout the Third World. He died of leukaemia before seeing the achievement of independence for Algeria.

Fanshawe, Richard 1608–66
English poet, translator and diplomat
Born at Ware Park, Hertfordshire, he attended Jesus College, Cambridge, and went abroad to study languages. In the Civil War he fought for the Royalists, and became an MP on the accession of CHARLES II. In 1648 he became treasurer to the navy under Prince RUPERT, in 1651 he was taken prisoner at Worcester, and on CROMWELL's death he withdrew to the Continent. After the Restoration he was appointed ambassador at the courts of Portugal and Spain. He translated HORACE, GIOVANNI GUARINI's *Il Pastor Fido* and the *Lusiads* (1655) of CAMOËNS. His wife Ann's *Memoirs* were published in 1829.

Fanthorpe, U(rsula) A(skham) 1929–
English poet
Born in Kent, she was educated at Oxford and the University of London Institute of Education, where she obtained a teacher's diploma. In the mid-1970s, however, she started work as an admissions clerk in a Bristol hospital, before turning to writing full time in 1989. Her style, evident in her first collection, *Side Effects* (1978), is discreetly gossipy, and her ironically polite evasions echo PHILIP LARKIN and JOHN BETJEMAN. In writing of the natural or the wider human scene, she is quizzical, but capable of genuine wonder. Later volumes are *Four Dogs* (1980), *Standing To* (1982), *Voices Off* (1984), *Safe as Houses* (1995), *Consequences* (2000) and *Queuing for the Sun* (2003). She was awarded the CBE in 2001 and the Queen's Gold Medal for poetry in 2003.

Fantin-Latour, (Ignace) Henri Joseph Théodore 1836–1904
French painter and printmaker
Born in Grenoble, he studied at the École des Beaux-Arts under GUSTAVE COURBET and was a regular exhibitor at the French Salon from 1861 to 1899. Despite his academic background he also showed work at the controversial Salon des Refusés of 1863, and became friendly with some of the most advanced painters of his day, such as ÉDOUARD MANET, JAMES WHISTLER and Courbet. He made several visits to London and exhibited at the Royal Academy. His subject matter was varied: in France he was particularly admired for his portrait groups, in England for his still lifes, especially of flowers. He was a devotee of Romantic composers such as HECTOR BERLIOZ and (especially) RICHARD WAGNER, and made a series of lithographs illustrating their music. 🕮 J J Leveque, *Henri Fantin-Latour* (1996)

Fanu, Sheridan Le *See* LE FANU, (JOSEPH) SHERIDAN

Farabi, Abu Nasr al-, *Latin* **Alfarabius** 878–c.950
Islamic philosopher
Born in Farab, he studied at Baghdad and published commentaries on ARISTOTLE and PORPHYRY. He was much influenced by PLATO's *Republic* and can be regarded as the first Islamic Neoplatonist. He also published a utopian political philosophy of his own, known under the title *The Perfect City*.

Faraday, Michael 1791–1867
English chemist and physicist, creator of classical field theory
Born in Newington Butts near London, the son of a blacksmith, he was apprenticed to a bookbinder, whose books sparked his interest in science. In 1813, after applying to HUMPHRY DAVY for a job, he was taken on as his temporary assistant, accompanying him on a European tour during which he met many top scientists and gained an unconventional but invaluable

scientific education. In 1827 he succeeded to Davy's chair of chemistry at the Royal Institution, in that year publishing his *Chemical Manipulation*. His early publications on physical science include papers on the condensation of gases, limits of vaporization and optical deceptions. He was the first to isolate benzene, and he synthesized the first chlorocarbons. His great life work, however, was the series of *Experimental Researches on Electricity* published over 40 years in *Philosophical Transactions*, in which he described his many discoveries, including electromagnetic induction (1831), the laws of electrolysis (1833) and the rotation of polarized light by magnetism (1845). He received a pension in 1835 and in 1858 was given a house in Hampton Court. As adviser to Trinity House in 1862 he advocated the use of electric lights in lighthouses. Greatly influential on later physics, he nevertheless had no pupils and worked with only one assistant. He is generally considered the greatest of all experimental physicists. 🕮 L Pearce, *Michael Faraday* (1987)

Farborough, Lord *See* MAY, SIR THOMAS ERSKINE

Farel, Guillaume 1489–1565
French reformer
Born in Gap in Dauphiné, he became a convert to Protestantism in 1521. He fled to Basel, and in 1524 supported 39 Protestant theses. He moved to Geneva in 1532 and, after being twice compelled to leave, settled there in 1534. In 1535 the town council proclaimed the Reformation, but people reacted against the sudden severity of the ecclesiastical discipline imposed by JOHN CALVIN, and in 1538 the two reformers were expelled from the city. He became a pastor in Neuchâtel in 1538, and worked there for the rest of his life.

Farge, John La *See* LA FARGE, JOHN

Farhi, Nicole 1946–
British fashion designer
Born in Nice, France, she worked there as a freelance designer before moving to London to work with Stephen Marks on French Connection and the Stephen Marks label. Launching her own company in 1983, she has become known for her comfortable, uncomplicated clothes, which feature soft structure and subtle colouring. She has won numerous British Fashion Awards. She married the playwright Sir DAVID HARE in 1992.

Faria y Sousa, Manuel de 1590–1649
Portuguese poet
Born near Pombeiro, he went to Madrid in c.1613, and from 1631 to 1634 was secretary to the Spanish embassy in Rome. He wrote on Portuguese history and on CAMOËNS, and left around 200 Portuguese sonnets, twelve eclogues, and three treatises on poetry.

Farina, Battista, *nicknamed* **Pinin** 1893–1966
Italian car designer
Born in Turin, he worked at the Fiat factory early in his career in the 1920s, and visited the USA, where he studied Ford's production methods, before setting up his own bodywork establishment in Turin (1930). Although always associated with classic designs for the prestigious Italian makers like Ferrari, Lancia and Alfa Romeo, he also designed for mass production. Among his firm's successful popular cars were Austin's innovative A40 'hatchback' of 1958, and the 1100 model (actually designed by his son Sergio), which appeared under a number of BMC names after 1963. His nickname, Pinin, was adopted in the company name – Pininfarina – in 1961.

Farina, Giuseppe La *See* LA FARINA, GIUSEPPE

Farina, Johann Maria 1685–1766
Italian perfumier
Born in Novara, he settled in Cologne in 1709, and was the inventor of eau-de-Cologne.

Farinacci, Roberto 1892–1945
Italian politician
Born in Isernia, he became Fascist Party secretary (1924–26), a member of the Fascist grand council (1935) and minister of state (1938). An ardent racist and anti-Semite, notorious for his extremism and pro-Nazi tendencies, he edited the *Regime Fascista*, the party organ. He was ultimately captured and shot, on the same day and by the same band of partisans as BENITO MUSSOLINI, while attempting to flee to Switzerland.

Farinelli *See* BROSCHI, CARLO

Farington, Joseph 1747–1821
English painter, draughtsman and diarist
Born in Leigh, Lancashire, he studied in London under RICHARD WILSON. In 1785 he became a member of the Royal Academy, where he exerted great influence. As an artist he is noted for his topographical sketches, particularly of the Lake District and the Thames, some of which were engraved and published in book form. Above all, however, he is remembered for his diaries (1793–1821). These are a valuable source of information on the London art scene of the time, and provide a fascinating glimpse into the day-to-day running of the Royal Academy.

Farini, Luigi Carlo, *nicknamed* **Cavour's Shadow** 1812–66
Italian statesman and revolutionary
Born near Ravenna, he was involved in the Bologna uprising against papal rule in 1831 and expelled from the Papal States in 1843, then summoned back to Rome by PIUS IX, who appointed him under-secretary of state. When Pius fled to Gaeta after the murder of Count Pellegrino Rossi (1787–1848), Farini followed, but he was subsequently dismissed and exiled because of his liberal sympathies. He settled in Turin and collaborated with the Conte di CAVOUR on *Il Risorgimento*. He became a minister in the D'AZEGLIO government and supported Cavour during the 1850s. In 1859 he was appointed as commissioner extraordinary in Modena and the following year was recognized as 'dictator' in Parma and the Papal Legations. In 1860 he orchestrated their transfer by plebiscite to the new united Italy. After the annexation of the Kingdom of the Two Sicilies, he was made lieutenant-general of Naples. He became prime minister on the resignation of URBANO RATTAZZI (1862), but resigned himself due to ill health in 1863. His admiration for and close co-operation with Cavour earned him his nickname.

Farjeon, Eleanor 1881–1965
English writer
Born in Hampstead, London, she wrote fantasies and children's stories, beginning with her successful first novel, *Martin Pippin in the Apple Orchard* (1921). She collaborated with her brother Herbert on *Kings and Queens* (1932) and the play *The Glass Slipper* (1944). Her childhood is described in her autobiographical *A Nursery in the Nineties* (1935). There is an annual Eleanor Farjeon award for outstanding service to children's literature. 🕮 D Blakelock, *Eleanor: Portrait of a Farjeon* (1966)

Farman, Henri 1874–1958
French pioneer aviator and aircraft manufacturer
With his brother Maurice (1878–1964) he made the first flight in a Voisin biplane (1908) which they had built. In 1912 they established a factory at Boulogne-sur-Seine to manufacture the Farman biplane, and built the first long-distance passenger plane, the *Goliath*, in 1917.

Farmer, Fannie Merritt 1857–1915
US cookery expert
Born in Boston, she suffered a stroke at the age of 16 and was unable to attend college, so she turned to cooking at home and then attended the Boston Cooking School. After graduation (1889), she became a director there (1891–1902), during which time she edited the *Boston Cooking School Cook Book* (1896). In 1902 she opened Miss Farmer's School of Cookery in Boston, the first to offer courses designed for housewives and nurses rather than servants or teachers, and her insistence on precise measurements in her recipes was innovatory. She also wrote for the *Woman's Home Companion* for ten years.

Farnaby, Giles c.1563–1640
English composer
Born probably in Truro, Cornwall, he spent most of his active life in London. His works include madrigals and settings of the psalms in verse paraphrases for East's Psalter, but he is best remembered for his keyboard music.

Farnese, Alessandro 1546–92
Spanish soldier
Born in Rome, he was the son of the 2nd Duke of Parma and the illegitimate daughter of the emperor CHARLES V, and nephew of PHILIP II of Spain. He distinguished himself under his uncle, JOHN OF AUSTRIA, at the sea battle of Lepanto (1571), and became one of the great land-force commanders of his era as well as a gifted diplomat. He joined his uncle in the Spanish Netherlands in 1577, then in 1578 defeated the rebellious Dutch at Gembloux and captured Maastricht. As Governor-General himself he captured Antwerp in 1585. He prepared forces for the invasion of England in concert with the Great Armada in 1588. In 1590 he compelled HENRY IV of France to raise the Siege of Paris.

Farouk I 1920–65
King of Egypt
Born in Cairo, he was educated privately in England. On ascending the throne, he dismissed the premier, Nahas Pasha, and for a while devoted himself to schemes of economic development and land reform. In 1942, with Axis troops threatening Egypt, Great Britain insisted on the re-appointment of Nahas Pasha. After the war, Farouk's lifestyle became increasingly flamboyant, and he alienated the armed forces, especially after defeat by Israel (1948). In 1948 he dissolved his first marriage with Princess Farida, and he married Narriman Sadek (1951). General NEGUIB's coup d'état (1952) forced Farouk to abdicate. He was exiled to Italy and in 1959 he became a citizen of Monaco. 🕮 Barrie St Clair McBride, *Farouk of Egypt: A Biography* (1968)

Farquhar, George c.1677–1707
Irish playwright
He was born in Londonderry, possibly in 1677 (but he is said to have fought at the Boyne). Educated at Trinity College, Dublin, he became an actor in a Dublin theatre, but the accidental wounding of a fellow actor so shocked him that he quitted the boards, and shortly after received a commission in a regiment stationed in Ireland. His first comedy, *Love and a Bottle* (1698), proved a success, and the *Constant Couple* (1699) met with an enthusiastic reception. In 1703 he produced *The Inconstant*, founded on JOHN FLETCHER's *Wild Goose Chase*, and in 1706 *The Recruiting Officer*. He wrote the best of his plays, *The Beaux' Stratagem* (1707), during an illness but died before he could enjoy its success. He is one of the best of the comic dramatists. 🕮 E Rothenstein, *George Farquhar* (1967)

Farragut, David Glasgow 1801–70
US naval commander
He was born near Knoxville, Tennessee, of Spanish origin, and after being adopted by Captain DAVID PORTER and made a midshipman in the navy at the age of nine, he joined the navy in 1810 and served against the British (1812), and against pirates (1820). In the American Civil War he served with the Federal forces and commanded the ships fitted out for the capture of New Orleans (1862). He took part in the siege and capture of Vicksburg (1863) and helped establish Union control of the Mississippi River. His most famous victory occurred at Mobile Bay (1864), into which he sailed his fleet despite floating mines (he cried 'Damn the torpedoes!'), defeating the Confederate flotilla and bringing about the town's surrender. He was made vice-admiral, the rank being created for him by special act of Congress, as was also that of admiral (1866).

Farrakhan, Louis, *originally* **Louis Eugene Wolcott**, *formerly known as* **Louis X** 1933–
US leader of the Nation of Islam
He was born in New York City and his tough upbringing led him to join MALCOLM X's Black Muslim movement. The sect was plagued by factionalism and in 1978 Farrakhan was excommunicated by the World Community of Islam and revived the Nation of Islam, which promotes self-reliance, healthy eating and abstinence from drugs. More radical than the leaders of the civil rights movement, he has been widely criticised for his anti-Jewish rhetoric, but the growing influence among African-Americans of his message of self-respect was demonstrated in the 1995 Million Man March in Washington, DC. In 1996 *Time* magazine included him in its list of the 25 most influential people in the USA.

Farrar, Frederic William 1831–1903
English clergyman and writer
Born in Bombay, he was ordained in 1854, taught at Harrow, became headmaster of Marlborough (1871–76), honorary chaplain to Queen VICTORIA (1869–73), and later became a chaplain-in-ordinary. He was made a canon of Westminster and rector of St Margaret's in 1876, archdeacon of Westminster in 1883, chaplain to the House of Commons in 1890, and dean of Canterbury in 1895. His theological writings were many, but he is chiefly remembered for the bestseller *Eric, or Little by Little* (1858), one of several school stories that he wrote. 🕮 *My Object in Life* (1883)

Farrar, Geraldine 1882–1967
US soprano
Born in Melrose, Maine, she studied in Boston, Paris and Berlin, making her professional debut in CHARLES GOUNOD's *Faust* in Germany. Her first role in the USA came five years later, again in Gounod's work, as Juliet. She retired from the opera stage in 1922, but continued giving recitals until the early 1930s. Many of her finest roles, including Cio-Cio San and Carmen, were recorded. She wrote her autobiography, *The Story of an American Singer*, in 1916, later revised as *Such Sweet Compulsion*.

Farrell, J(ames) G(ordon) 1935–79
British author
Born in Liverpool, he worked as a preparatory-school teacher in Dublin and as a labourer and clerk in the Canadian Arctic before studying at Brasenose College, Oxford. He published six novels during a short writing career, among them *Troubles* (1970), set in 1920s Ireland, *The Siege of Krishnapur* (1973), the story of the Sepoy uprising of 1857, which won the Booker Prize, and *The Singapore Grip* (1978), an account of the surrender of British forces to the Japanese in World War II. He drowned in an accident in Ireland, aged 44. 🕮 Lavinia Greacen, *J.G. Farrell: The Making of a Writer* (2001)

Farrell, James T(homas) 1904–79
US novelist, short-story writer, critic and essayist
Born in Chicago, he paid for his own education at the University of Chicago (1925–29) and lived in Paris in the early 1930s. His first novel was *Young Lonigan* (1932), which began the *Studs Lonigan* trilogy of life on Chicago's South Side, realistically and graphically portrayed. A lapsed Catholic and a naturalist in the mould of ÉMILE ZOLA, he owes much to the style of SHERWOOD ANDERSON. The other volumes were *The Young Manhood of Studs Lonigan* (1934) and *Judgement Day* (1935). An accomplished study of defeat (the hero dies aged 29), it was a landmark in US fiction. This was followed by a five-novel sequence centred on Danny O'Neill (1936–53), and another trilogy, on Bernard Clare (1946–52). He published more than 50 novels in all. 🕮 A M Wald, *Farrell: The Revolutionary Socialist Years* (1978)

Farrell, Suzanne, *originally* **Roberta Sue Ficker** 1945–
US ballerina
Born in Cincinnati, Ohio, she graduated from the School of American Ballet at the age of 16. From there, she went to the New York City Ballet (NYCB), where she became an inspiration to the choreographer-artistic director GEORGE BALANCHINE. She and her then husband, dancer Paul Majia, left the company to join MAURICE BÉJART's Ballet of the 20th Century (1971–75). Upon her return to NYCB in 1975, she formed a fruitful onstage partnership with dancer PETER MARTINS. Tall, strong and supple, with great musical sensitivity, she is the ideal Balanchine dancer. She retired as a dancer in 1989 but has continued to teach and to stage Balanchine ballets. She was awarded the National Medal of the Arts in 2003.

Farren-Price, Ronald William 1930–
Australian pianist
Born in Brisbane, Queensland, he was educated at Melbourne University, then studied in Germany and, under CLAUDIO ARRAU, in London. From 1967 he toured extensively in the USA, England and Europe, and was the first Australian pianist to tour the USSR. A regular broadcaster and recitalist, he performed as a soloist with many major orchestras, and has recorded widely. In 1955 he joined the Melbourne Conservatorium of Music (now the faculty of music at Melbourne University), where he is currently principal fellow.

Farrer, Reginald John 1880–1920
English botanist, plant-collector and writer
Born in Clapham, Yorkshire, he was educated at home before going to Balliol College, Oxford. He travelled extensively in Europe, Japan, China (1914–16) and Upper Burma (1919–20) in search of plants. Farrer introduced many species into cultivation, and his herbarium collection is distinguished by the expressiveness and detail of his field notes. A prolific author, he wrote five horticultural works, among them *Alpines and Bog-Plants* (1908) and *The Rock-Garden* (1912), and six travel books. From his student days he had an interest in politics, in 1911 standing unsuccessfully as Liberal candidate for Ashford, Kent.

Farrer, William James 1845–1906
English agriculturist
Born in Docker, Westmorland (Cumbria), he studied medicine at Cambridge, but tuberculosis forced him to give up and emigrate to Australia in 1870. He found work as a surveyor, but in 1886 he settled on his own property near Tharwa, New South Wales, where an early interest in grasses led him to systematic experiments with various varieties of wheat. He crossbred over 200 strains each year in an endeavour to find one which would be resistant to diseases such as rust yet would give good baking qualities and be suitable for Australian climatic conditions and farming methods. A pioneer of scientific wheat-breeding, he introduced many valuable varieties for stock and for commer-

cial use, culminating in his 'Federation' strain of 1901. Farrer's work was almost solely responsible for the growth and success of the Australian wheat industry.

Farrow, Mia, *originally* **Maria de Lourdes Villiers-Farrow** 1945–
US actress
She was born in Los Angeles, the daughter of the film director John Farrow (1904–63) and the actress Maureen O'Sullivan (1911–98). She made her Broadway debut in 1963 and first came to notice in *Peyton Place* on television in 1964. Her films include *Rosemary's Baby* (1968), *The Great Gatsby* (1974) and a number of WOODY ALLEN films, notably *Hannah and Her Sisters* (1986). Her high-profile marriages to FRANK SINATRA (1966–68) and ANDRÉ PREVIN (1970–79), and her subsequent relationship with Woody Allen, which ended in court in 1992, have attracted significant media attention. She published a memoir, *What Falls Away*, in 1997, and has served as a UNICEF Goodwill Ambassador, travelling to Darfur in 2004 and 2006.

Farson, James Negley 1890–1960
US writer
Born in Plainfield, New Jersey, he trained as a civil engineer but moved to England and went from there to Russia, where he had an export business and where he witnessed the 1917 Revolution. From then on he led an adventurous life as airman, sailor and journalist, which is reflected in his varied works. These include *Sailing Across Europe* (1926), *Seeing Red* (1930), *Bomber's Moon* (1941) and *A Mirror for Narcissus* (1957). 🕮 *The Way of a Transgressor* (1935)

Fasch, Johann Friedrich 1688–1758
German composer
Born in Buttelstedt, Weimar, he was educated at the Thomasschule, Leipzig, and founded the *Collegium Musicum* there, the forerunner of the *Gewandhaus* concerts. In 1722 he was appointed kapellmeister at Zerbst. He wrote overtures in the style of GEORG TELEMANN, orchestral suites admired by J S BACH, three operas (since lost), and also several masses, a requiem, trios and sonatas. His son, Carl Friedrich Christian (1736–1800) was a harpsichordist and composer, and was appointed accompanist (1756) to FREDERICK II, THE GREAT, who played the flute. He was twice visited by BEETHOVEN (1796).

Fassbinder, Rainer Werner 1946–82
German film director
Born in Bad Wörishofen, he began his career as an actor in fringe theatre in Munich, founding his own 'anti-theatre' company, for whom he wrote original works and adapted classical pieces. Moving into films (1969), he was much influenced by JEAN-LUC GODARD, believing that films should have a social purpose. His first film to gain international recognition was *Warum läuft Herr R. Amok?* (1970, *Why Does Herr R. Run Amok?*). He made over 40 films, usually politically committed criticisms of contemporary Germany, contrasting personal failure and frustration with the country's superficial economic success, and illustrating the misuse of power and social oppression. Notable among these were *Die bitteren Tränen der Petra von Kant* (1972, *The Bitter Tears of Petra von Kant*), *Effi Briest* (1974, based on a classic novel of the 1890s by THEODOR FONTANE), and *Die Ehe der Maria Braun* (1979, *The Marriage of Maria Braun*), an allegory of postwar Germany, which won the first prize at the 1979 Berlin Film Festival. Before his death he had completed *Lili Marleen* and *Lola*, two of a planned series of films dealing with recent German history as seen through the eyes of women. 🕮 R Katz, *Love is Colder than Death* (1987)

Fassett, Kaffe 1937–
US textile designer
Born in San Francisco, he was brought up in Big Sur, California, and the community there remains the biggest influence on his work, although his career has been made in the UK. Originally a painter, he learned to knit after moving to the UK in 1964. His colourful, highly individual designs and the sources of many of his ideas are seen in such books as *Glorious Knitting* (1985), *Glorious Needlepoint* (1987), *Glorious Interiors* (1995) and *Passionate Patchwork* (2001). He has also designed sets and costumes for stage productions, including *As You Like It* (2000) for the Royal Shakespeare Company.

Fast, Howard Melvin, *pseudonym* **E V Cunningham** 1914–2003
US novelist, playwright and political commentator
Born in New York City, he came of age during the radical 1930s and wrote on this time in a sequence of historical novels, *The Unvanquished* (1942), *Citizen Tom Paine* (1943) and *Freedom Road* (1944), whose contemporary relevance was transparently obvious. His allegiance to Popular Front Communism eventually led to his being imprisoned for 'contempt of Congress' in 1947 and to his blacklisting by Hollywood, but he later recanted in a much-quoted account of writers' dealings with the party, called *The Naked God* (1957). A prolific writer, he wrote *Spartacus* (1951), which owed its success to the absence of ideological speeches, and to a powerful Hollywood adaptation. With slightly ironic timing, he was awarded the Stalin Peace Prize in 1953.

Fastolf, Sir John 1378–1459
English soldier
Born in Caister, Norfolk, he distinguished himself at Agincourt (1415) and still more at the 'Battle of the Herrings' (1429). He was less successful against JOAN OF ARC, and at Patay, according to the chronicler Monstrelet (c.1390–1453), displayed such cowardice that the Duke of BEDFORD stripped him of his Garter. This, however, is doubtful, since on his return to Norfolk in 1440, he was granted a pension of £20 'for notable and praiseworthy service and good counsel'. His Norfolk life is recorded in the *Paston Letters*. His identification with 'Sir John Falstaff' is unlikely, for Sir JOHN OLDCASTLE was certainly the prototype used by SHAKESPEARE.

Fateh Singh, Sant 1911–72
Sikh religious leader
Born in the Punjab, India, he was a campaigner for Sikh rights and was involved in religious and educational activity in Rajasthan, founding many schools and colleges there. In 1942 he joined the Quit India Movement, and was imprisoned for his political activities. During the 1950s he agitated for a Punjabi-speaking state, which was achieved once Haryana was created as a separate state in 1966.

Fatima c.605–33
Arab religious figure
Born in Mecca, Arabia, she was the youngest daughter of MUHAMMAD and wife of the fourth Muslim Caliph, 'ALI. Their descendants were the Fatimids, a radical Shiite movement, who ruled over Egypt and North Africa (909–1171) and later over Syria and Palestine.

Faulkner, (Arthur) Brian (Deane) Faulkner, Baron 1921–77
Northern Ireland politician
Born in Helen's Bay, County Down, he was educated at the College of St Columba, Rathfarnham, and served as Unionist MP for East Down (1949–73) and South Down (1973–75). He became a government chief whip and parliamentary secretary to the minister of finance (1956–59) and later minister of home affairs (1959–63), commerce (1963–69) and development (1969–71). A right-wing unionist, he became prime minister of the Stormont Parliament in 1971, but a year later direct rule from Westminster was reinstated. His subsequent participation in a short-lived power-sharing executive lost him the support of many Unionists. He was made a baron in 1977 and died soon after in a hunting accident. His *Memoirs of a Statesman* appeared posthumously in 1978.

Faulkner, William 1897–1962
US novelist and Nobel Prize winner
Born near Oxford, Mississippi, he became a pilot in the Canadian Flying Corps in World War I, and later attended Mississippi University. He took various jobs, and while working in New Orleans met SHERWOOD ANDERSON, who offered to recommend his first novel, *Soldiers' Pay* (1926), to a publisher on condition that he did not have to read it. In 1929 Faulkner took a job as a coal-heaver and while on night work at a local power station apparently wrote *As I Lay Dying* (1930) in just six weeks, working between midnight and 4am. *Sanctuary* (1931) was intended as a pot-boiler and was more successful commercially, but had a profound impact on JEAN-PAUL SARTRE and ALBERT CAMUS. However, it is the lyrical style of novels like *The Sound and the Fury* (1929), *Light in August* (1932), *Absalom, Absalom!* (1936), *The Hamlet* (1940) and *Intruder in the Dust* (1948) that account for his reputation as one of the modern masters of the novel. Other titles include *Sartoris* (1929), *The Town* (1957) and *The Mansion* (1959), set, like most of the earlier books, in the imaginary Yoknapatawpha County, and *A Fable* (1954), an ambitious reworking of Christ's Passion, set on the Western Front. He received the 1949 Nobel Prize in literature. 🕮 J Blotner, *Faulkner: A Biography* (2 vols, 1974)

Faulks, Sebastian Charles 1953–
English author and journalist
Born in Newbury, Berkshire, he studied at Emmanuel College, Cambridge. He has worked extensively as a journalist and

columnist for various newspapers, becoming deputy editor and later associate editor of *The Independent on Sunday* (1989–91). His fourth novel, *Birdsong* (1993), is his best known. Interweaving the story of a World War I soldier with that of his granddaughter in the 1970s, it became a bestseller. His other novels include *The Girl at the Lion d'Or* (1989), *Charlotte Gray* (1998, filmed 2002), *On Green Dolphin Street* (2001) and *Human Traces* (2005). *The Fatal Englishman* (1996) is a triple biography of the painter CHRISTOPHER WOOD, the fighter-pilot Richard Hillary and the spy Jeremy Wolfenden. He was awarded the CBE in 2002.

Faure, Edgar Jean 1908–88
French politician
Born in Béziers, he trained as a lawyer in Paris, entered politics as a Radical-Socialist, and was minister of finance and economic affairs (1950, 1951, 1954, 1958). He served as prime minister (1952, 1955–56), was professor of law at Dijon University (1962–66), and became minister of agriculture (1966), minister of education (1968), minister of state for social affairs (1969) and president of the national assembly (1973–78). He was a member of the European Parliament from 1979. He also published several detective novels under the pseudonym Edgar Sanday.

Fauré, Gabriel Urbain 1845–1924
French composer
Born in Pamiers, he became organist (1896) at La Madeleine, Paris, and director of the Conservatoire (1905–20). Though he is chiefly remembered for his songs, including 'Après un rêve' (c.1865, 'After a Dream'), he also wrote operas and orchestral pieces, such as *Masques et bergamasques* (1919, 'Masks and Bergamasks'), and a requiem (1887–90).

Faust, Frederick Schiller *See* BRAND, MAX

Fautrier, Jean 1898–1964
French painter and printmaker
Born in Paris, he went to England in 1909 and studied at the Royal Academy and Slade schools, London, returning to Paris in 1917. He depicted animal and human flesh in thick impasto so undefined that he was considered the forerunner of postwar abstraction. Early examples are *The Flayed Wild Boar* (1927, Pompidou Centre, Paris) and his lithographs to DANTE's *Inferno* (1928). In 1943 he exhibited his series *Otages* ('Hostages'), based on the mass deportations of World War II. In 1946 he exhibited at the Salon des Réalités Nouvelles. His *Femme Douce* (1946, 'Gentle Woman', Pompidou Centre, Paris) belongs to this period. From 1950 he became a pioneer of printmaking. He won the Grand Prix at the 1960 Venice Biennale.

Favart, Charles Simon 1710–92
French dramatist
He was born in Paris, and had his first success with the comic opera *Deux jumelles* (1734, 'The Twin Girls'). He went on to direct the Opéra-Comique, and in 1745 married the actress Marie Justine Benoîte Duronceray (1727–72), with whom he pioneered a new realism in costume. At the end of 1745 the Favarts went to Flanders with a company of actors attached to Marshal de Saxe. The marshal attempted to make Madame Favart his mistress, and when she fled from him took out a lettre de cachet against her husband. Favart had to remain in hiding until the marshal's death in 1750, when he was finally able to return to Paris. Among his best comic operas are *Les amours de Bastien et Bastienne* (co-written with his wife, 1753, 'The Loves of Bastien and Bastienne') and *Les Trois sultanes* (1776, 'The Three Sultans' Wives'). 🕮 E Maddelen, *Goldoni e Favart* (1889)

Fawcett, Henry 1833–84
English political economist and reformer
Born in Salisbury, he was blinded in a shooting accident in 1858. He became professor of political economy at Cambridge in 1863 and was elected Liberal MP in 1865. He advocated women's suffrage and helped pass the Reform Act of 1867. As Postmaster-General from 1880 he introduced the parcel post, postal orders and sixpenny telegrams. He was the husband of MILLICENT GARRETT FAWCETT.

Fawcett, Dame Millicent, *née* **Garrett** 1847–1929
English suffragette and educational reformer
Born in Aldeburgh, Suffolk, the wife of HENRY FAWCETT (m.1867) and younger sister of ELIZABETH GARRETT ANDERSON, she opposed the militancy of the Pankhursts, but campaigned for women's suffrage and higher education for women. She was a founder of Newnham College, Cambridge (1871), and was president of the National Union of Women's Suffrage Societies (1897–1919). She wrote *Political Economy for Beginners* (1870) and *The Women's Victory–and After* (1920). 🕮 David Rubinstein, *A Different World for Women: The Life of Millicent Garrett Fawcett* (1991)

Fawcett, Percy Harrison 1867–1925
English explorer
Born in Torquay, Devon, he joined the army at the age of 19, rose to become lieutenant-colonel, and after service in Ceylon (Sri Lanka), Hong Kong and elsewhere was in 1906 given a border delimitation assignment on behalf of the Bolivian government. This led to several hazardous expeditions in the Mato Grosso area in search of traces of ancient civilizations. In 1925 he disappeared near the Xingú River.

Fawkes, Guy 1570–1606
English conspirator
Born in York of Protestant parentage, he developed his fervent Catholicism while still a schoolboy, having been taught about HENRY VIII's ruthless subjugation of the Catholics 40 years earlier, and appalled by the persecution of his Catholic friends. In 1592, he fought with the Spanish in the Netherlands, and in 1603 rode to Spain in a fruitless attempt to persuade the king to raise an army against his Protestant homeland. The following year, Fawkes secretly returned to London to join the small group of conspirators, led by ROBERT CATESBY, who devised a plan to blow up the House of Lords during the State Opening. The plot was supposedly discovered with only hours to spare, and Fawkes and seven other conspirators were hanged, drawn and quartered. There is strong evidence, however, to suggest that they were merely pawns in an elaborate hoax, engineered by the state to discredit Rome. 🕮 Henry Garnett, *Portrait of Guy Fawkes* (1962)

Fawkner, John Pascoe 1792–1869
Australian pioneer
Born in Cripplegate, London, he moved with his family to the colony of Port Phillip in 1803 after his father was sentenced to transportation. When the colony was abandoned, the convicts and settlers were shipped across to Van Diemen's Land (Tasmania), where the Fawkner family secured a land grant. He chartered a ship (1835) to explore Western Port and Port Phillip Bay on the mainland of Australia, and made camp at the mouth of the Yarra River, the future site of the city of Melbourne. Fawkner's camp was found by another party of settlers, led by JOHN BATMAN, who had previously 'purchased' land from the local Aboriginals. The new town prospered and Fawkner became a member of its council. Later, when the new colony was separated from New South Wales, he became a member of the first legislative council for Victoria.

Fa Xian (Fa Hsien) fl.400 AD
Chinese Buddhist monk and traveller
Born at Shanxi (Shansi), at the beginning of the 5th century AD, he made a pilgrimage to India across the Takla Makan Desert and Pamirs, following the upper Indus River south to Sri Lanka in search of holy texts. He returned by sea through south-east Asia.

Fay, András 1786–1864
Hungarian poet, playwright and novelist
He lived in Budapest, and was a pioneer of the social novel. He also wrote a set of fables in the manner of AESOP, which achieved great success.

Fay, Sir (Humphrey) Michael Gerard 1949–
New Zealand businessman
Born in Auckland and educated at Victoria University, Wellington, he was the co-founder (with David Richwhite) of the merchant bank Fay, Richwhite. He was chairman of the Australia/New Zealand Bicentennial Committee in 1988, and chairman of three New Zealand challenges for the America's Cup in 1987, 1988 and 1992. He was knighted in 1990.

Fayed, Mohamed al- 1933–
Egyptian businessman
Born in Alexandria, he made a fortune there through his diverse shipping, property, oil and construction interests before settling in the UK in the 1970s. In 1979 he became owner of the Ritz Hotel, Paris, and in 1985 he became chairman of Harrods Limited in London. His desire to win British nationality has remained unfulfilled, and his name has frequently been associated with widely publicized court battles and political controversies. In 1997 he bought the London football team Fulham FC and financed its rise to the English Premier League. That same year, he was once again in the public spotlight when his son Dodi al-Fayed was killed alongside DIANA, PRINCESS OF WALES in a car crash in Paris. Since then, he has been outspoken in his belief that the crash was the result of a conspiracy.

Fayette, Comtesse de la *See* LA FAYETTE, MARIE MADELEINE PIOCHE DE LAVERGNE, COMTESSE DE

Fazy, Jean James 1794–1878
Swiss journalist and politician
Born in Geneva, he founded the *Revue de Genève*, became the leading spirit in the Radical movement (1846), and until 1862 was the real ruler of Geneva, which he modernized. He wrote *History of Geneva* (1838–40) and also wrote on constitutional law. He was deposed in 1862 and fled to Paris, where he edited *La France Nouvelle*. He later returned to Geneva and became professor of international law there (1871).

Feather, Vic(tor Grayson Hardie Feather), Baron 1908–76
British trade-union leader
Educated at Hanson Grammar School, Bradford, he began work at the age of 14, and joined the Shopworkers' Union. Shop steward at 15 and chairman of his branch committee at 21, he was a stirring speaker and in 1937 joined the staff of the TUC. He travelled widely as assistant secretary (1947–60), reorganizing trade unions in Europe after World War II, and in India and Pakistan in 1957. In 1969 he succeeded GEORGE WOODCOCK as general secretary, and achieved success in restoring industrial peace following the economic crisis despite opposition from the TUC's left wing. He fought the Conservative government's anti-union Industrial Relations Bill and when this became law in 1972 he joined representatives of British industry to establish an independent advisory organization to settle labour disputes. He retired in 1973, becoming president of the European Trade Union until 1974, when he became a life peer. 🕮 Eric Silver, *Victor Feather, TUC* (1973)

Fechner, Gustav Theodor 1801–87
German physicist, psychologist and philosopher
Born in Gross-Särchen, near Halle, he studied medicine at the University of Leipzig but took up physics as a career and became professor of physics at Leipzig in 1834. He worked mainly on galvanism (the original term for current electricity), electromagnetism and colour. He then became interested in the connections between physiology and psychology, which he explored in his *Elemente der Psychophysik* (1860, *Elements of Psychophysics*), and helped to formulate the WEBER–Fechner law relating stimuli to sensations. He also published *Das Büchlein vom Leben nach dem Tode* (1836, *The Little Book of Life After Death*) and *Vorschule der Aesthetik* (1876, *Introduction to Aesthetics*). His psychophysics later evolved into experimental psychology through WILHELM MAX WUNDT and others.

Fedden, Sir (Albert Hubert) Roy 1885–1973
English aero-engine designer
Born in Bristol, he trained as an engineer at Bristol Merchant Venturers Technical College. He joined Brazil Straker and Co. in Bristol (1906) and produced Rolls-Royce aero-engines during World War I. Taking his aero-engine design 'Jupiter' to form the engine department of the Bristol Aeroplane Company in 1920, he was chief engineer there until 1942. Initiating a famous range of piston engines – Mercury, Pegasus, Perseus, Taurus, Hercules and Centaurus – he was also notable for his unique development of the sleeve-valve engine. He held a variety of governmental and international posts until 1960, and was president of the Royal Aeronautical Society in 1938, 1939 and 1945.

Federer, Roger 1981–
Swiss tennis player
Born in Basel, he was a talented young sportsman and was encouraged to take up tennis by his parents. He won his first ATP tournament in 2001, and achieved his debut grand slam singles title at Wimbledon in 2003; he went on to win Wimbledon again in 2004, 2005 and 2006. Since 2004 he has been peerless, becoming the only male tennis player to have won eight grand slam singles titles in three years (2004–06), and often winning tournaments without dropping a set. His fast serve, powerful and accurate ground strokes and speed around the court make him a formidable opponent.

Feigan, Li *See* BA JIN

Feininger, Lyonel Charles Adrian 1871–1956
US artist and cartoonist
Born in New York City of German immigrant parents, he studied music there and then in Germany, where he turned to art, and studied in Berlin and Hamburg, and then worked as a newspaper strip cartoonist. From 1907 he devoted himself to painting, working in a style reminiscent of Cubism. After World War I he taught at the Bauhaus at Weimar (1919–24) and Dessau (1925–33). When the Nazis came to power he returned to the USA where, with WALTER GROPIUS and LUDWIG MIES VAN DER ROHE, he founded the Chicago Bauhaus.

Feinstein, Dianne, *née* **Goldman** 1933–
US politician
Born in San Francisco, California, and educated at Stanford University, she was on the San Francisco Board of Supervisors (1969–78), served as board president (1970–72, 1974–76, 1978), then became mayor of San Francisco in 1978 following the assassination of George Mascone. She was elected mayor in 1979 and re-elected in 1983, remaining in the position until 1988. She became senator for California for two years in 1992, and was re-elected in 1994, 2000 and 2006.

Feith, Rhijnvis 1753–1824
Dutch poet
Born in Zwolle, he became mayor there in 1780. He wrote some sentimental love novels, and the lyrical *Oden en Gedichten* (1796–1810, 'Odes and Poems'). Of his tragedies, the best known are *Thirza* (1784), *Johanna Gray* (1791) and *Ines de Castro* (1793). He also published a collection of criticism, *Brieven* (1784–94, 'Letters').

Feld, Eliot 1942–
US dancer and choreographer
Born in Brooklyn, New York, he trained in both the classical and modern idioms at the School of American Ballet. He appeared in the 1957 Broadway and 1961 Hollywood versions of *West Side Story* before joining American Ballet Theater (ABT) in 1963, where he quickly rose to the status of soloist, especially in character roles. Thanks to the support of JEROME ROBBINS, he made his choreographic debut in 1967 with *Harbinger* and *At Midnight*, for which he was hailed as Robbins's natural successor. He left ABT to found the short-lived American Ballet Company (1969–71), rejoined ABT for a few seasons and formed Eliot Feld Ballet in 1974. In 1978 he started the New Ballet School (now Ballet Tech), an organization offering inner-city children the chance to become dance professionals. He is a prolific choreographer with a gift for setting neo-classical, folk-influenced and even gymnastic movement to a wide range of music. His works include *Papillon* (1979), *The Jig is Up* (1984), *Charmed Life* (1990) and *Paper Tiger* (1996). In 2004 he established the Mandance Project, a new company associated with the Ballet Tech school.

Felix *See* SULLA, LUCIUS CORNELIUS

Felix II d.365 AD
The first antipope
He was consecrated when Liberius was banished (AD 355) for refusing to condemn ATHANASIUS. When Liberius was restored in AD 357, Felix retired, but he was ultimately regarded as a saint and martyr.

Felix V *See* AMADEUS VIII

Fell, Dame Honor Bridget 1900–86
British cell biologist
Educated at the University of Edinburgh, she became the director of Strangeways Research Laboratory in Cambridge (1929–70), was Foulerton Research Fellow of the Royal Society from 1941 to 1967, and Royal Society Research Professor from 1963 to 1967. She greatly advanced biochemical study through her investigations using the organ culture method, which demonstrated that excess vitamin A could destroy intercellular material, and which led to the use of such organ cultures in studies of the physiological effects of vitamins and hormones. In later life she investigated the pathogenesis of arthritis. Elected FRS in 1952, she was made a DBE in 1963.

Fell, John 1625–86
Anglican divine
He was born in Longworth, Berkshire. With three others he contrived to maintain the Church of England services during the Commonwealth, and after the Restoration he was made dean of Christ Church, Oxford, royal chaplain and doctor of divinity. He governed the college strictly, restored its buildings, was liberal to poor scholars, and did much to promote learning. In 1676 he became Bishop of Oxford. He rebuilt the episcopal palace at Cuddesdon. 'I do not love thee, Dr Fell' is ascribed to THOMAS BROWN.

Feller, William 1906–70
US mathematician
Born in Zagreb, Croatia, he studied at the universities of Zurich and Göttingen, and after teaching at Kiel University left Germany in 1933 for Stockholm. In 1939 he emigrated to the

USA, holding chairs at the universities of Brown (1939–45), Cornell (1945–50) and Princeton (1950–70). His work in probability theory introduced new rigour without losing sight of practical applicability, and his textbook *Introduction to Probability Theory and Its Applications* (1950) is an enormously influential classic, unique as a textbook starting from first principles, yet containing original research often leading to surprising results, and packed with practical examples.

Fellini, Federico 1920–93
Italian film director
Born in Rimini, and educated at Bologna University, he started as a cartoonist, journalist and scriptwriter, before becoming an assistant film director (1942). His highly individual films, always from his own scripts, include *I Vitelloni* (1953, *The Young and the Passionate*), *La Strada* (1954, 'The Road'), which won an Academy Award for Best Foreign Film (1957), *Le Notte di Cabiria* (1957, *The Nights of Cabiria*), which also won an Academy Award (1958), *Giulietta degli Spiriti* (1964, *Juliet of the Spirits*), *Satyricon* (1969), *Fellini's Roma* (1972), *Amarcord* (1974, 'I Remember'), *Casanova* (1976), *Orchestra Rehearsal* (1979), *Città delle Donne* (1980, 'City of Women'), *The Ship Sails On* (1983) and *Ginger and Fred* (1986). His most famous and controversial work, *La Dolce Vita* (1960, 'The Sweet Life', Cannes Festival prize winner), was a cynical evocation of modern Roman high life. *Otto e Mezzo* (1963, *8 ½*) is his most obviously autobiographical work, juxtaposing the dreams and fantasies of its film director hero against the Baroque settings of the film world. In 1943 he married the actress GIULIETTA MASINA, star of several of his films.

Fellowes, Edmund Horace 1870–1951
English musicologist
Born in London, he was a minor canon at St George's, Windsor, from 1900. He edited *The English Madrigal School* (36 vols, 1912–24) and *The English School of Lutenist Songwriters* (31 vols, 1920–28).

Fellows, Sir Charles 1799–1860
English archaeologist
In 1838 he discovered in Turkey the ruins of Xanthus, ancient capital of Lycia, and those of Tlos, and in 1839 the ruins of 13 cities. From these he selected marbles, casts, and other artefacts for the British Museum, London.

Felltham, Owen c.1602–68
English writer
Born in Suffolk, he lived in Great Billing, Northamptonshire, and was the author of a series of moral essays, *Resolves, Divine, Morall, Politicall* (1620–28).

Felsenfeld, Gary 1929–
US molecular biologist
Born in New York City, he studied at Harvard and the California Institute of Technology, then was a postgraduate National Science Foundation Fellow at Oxford. Since 1961 he has been chief of the physical chemistry section of the molecular biology laboratory at the National Institute for Digestive and Kidney Diseases in Washington, DC. Felsenfeld's best-known work has been on the association of regulatory protein molecules with chromatin, using DNA footprinting to investigate the precise binding location and the interaction between protein molecules which regulate the activity of the globin genes.

Fender, (Clarence) Leo(nidas) 1909–91
US guitar designer
Born on a ranch near Anaheim in California, he began his career repairing radios before setting up the Fender Electrical Instrument Company in 1946. Prompted by repair requests from guitar-playing customers, he was the first to design and successfully mass-produce a solid-body electric guitar, the Broadcaster (1948), later renamed the Telecaster. In 1951 he created the Precision Bass (with frets, unlike the double bass), followed in 1954 by his most famous instrument, the Stratocaster (the favourite of JIMI HENDRIX, ERIC CLAPTON and many other rock guitarists), which is still in production. Although unable to play the guitar himself, he created instruments which revolutionized popular music. 🕮 Richard R Smith, *Fender* (2000)

Fénelon, François de Salignac de la Mothe 1651–1715
French Catholic prelate and writer
Born in Fénelon, Périgord, he studied at the Saint-Sulpice Seminary in Paris. He was ordained in 1675, and became director of an institution for women converts to the Catholic faith in 1678. Here he wrote *Traité de l'éducation des filles* (1678, Eng trans *The Education of Young Gentlewomen*, 1699), urging a more liberal education for women and criticizing the coercion of Huguenot converts. From 1689 to 1699 he was tutor to LOUIS XIV's grandson, the young Duke of Burgundy, and wrote *Fables* (1690), *Les Dialogues des morts* (1690, 'Dialogues of the Dead'), *History of the Ancient Philosophers* and *Les Aventures de Télémaque* (1699, 'The Adventures of Telemachus'), which displeased the king because of its alleged political satire on the court. As Archbishop of Cambrai from 1695, he wrote a defence (*Explication des maximes des saints sur la vie intérieure*, 'Explanation of the Sayings of the Saints on the Interior Life', 1697) of the doctrines of the celebrated quietist mystic Madame GUYON. After a fierce controversy the pope condemned the book. 🕮 P Janet, *Fénelon, une biographie* (1892)

Feng Guozhang (Feng Kuo-chang) 1859–1919
Chinese militarist
He trained at the Beiyang Military Academy, one of the military schools established during the last decades of the Qing (Ch'ing) dynasty. On graduating, he entered the service of YUAN SHIKAI, commander of the Beiyang army, China's first modern army. After the creation of a republic in 1912 he became one of a number of influential militarists known as the 'Beiyang Clique', and served as a provincial military governor before becoming acting president of the Chinese Republic (1917–18). During his one year in office China declared war on Germany.

Feng Youlan (Fung or Feng Yu-lan) 1895–1990
Chinese philosopher
Born in Tanghe County, Henan (Honan) province, he is best known for his *History of Chinese Philosophy* (2 vols, 1931–33, with a supplement in 1936). He held academic posts in many universities, including Pennsylvania (1946–47). Denounced as a counter-revolutionary in 1968 during the Cultural Revolution, he did not reappear until 1973. He was also a leader in the movement to revive neo-Confucianism.

Feng Yuxiang (Feng Yü-hsiang), *known as* **the Christian General** 1882–1948
Chinese warlord
Born in Hebei (Hopeh) province, he rose through the ranks to command an independent force. In 1924 he took Beijing (Peking), and set up a government which included members of the Nationalist Party. He supported the Nationalist government in 1927, but became apprehensive of the growing personal power of CHIANG KAI-SHEK, and joined in two successive revolts, both of which failed. He left China in 1947 to visit the USA, and died in a ship fire on his return journey.

Fenley, Molissa 1954–
US dancer and choreographer
Born in Las Vegas, she studied dance at Mills College, California, before moving to New York, where she made her choreographic debut in 1978. Although she has created ensemble pieces for her own now-defunct group and other companies, her reputation rests on physically demanding, high-energy solos like *Eureka* (1982), *State of Darkness* (1988) and *Regions* (1995).

Fenn, John B(ennett) 1917–
US chemist and Nobel Prize winner
Born in New York City, he spent the first eleven years of his life in suburban Hackensack, New Jersey. The Great Depression took his family to Berea, Kentucky, where he studied chemistry. He then pursued research at Yale before abandoning academia to work for Monsanto. Various jobs in industry led him full circle, first to a professorship at Princeton in 1952 and eventually back to Yale in 1967. In 2002, he was awarded the Nobel Prize in chemistry for developing mass spectrometry of biological macromolecules. He shared the prize with KOICHI TANAKA and KURT WÜTHRICH.

Fenning, Frederick William 1919–88
British nuclear physicist
He was educated at Clacton County High School before graduating from Cambridge in 1940, when he joined the team at the Cavendish Laboratory which investigated neutron diffusion problems associated with the possibilities for an atomic bomb. Later in World War II he played a major role in starting up the ZEEP reactor at Chalk River, Canada, and after the War returned to the new research establishment at Harwell, where he was closely concerned with the design of early nuclear reactors in Great Britain. As chief physicist and then director of reactor technology at Risley, he worked on the advanced gas-cooled reactor (AGR) which led to the operation of the Windscale (Sellafield) AGR. He returned to Harwell as deputy director in 1966 and from 1979 to 1984 was the deputy director of the Atomic Energy Research Establishment.

Fenton, James 1949–
English poet
He was born in Lincoln. A highly regarded, intellectual poet, who has deliberately set himself apart from the mainstream, he publishes little. Mainly a political and satirical rather than a 'personal' poet, he wrote some sharply satirical poems in collaboration with John Fuller in *Partingtime Hall* (1987). His own collections include *Terminal Moraine* (1972), *The Memory of War* (1982), *Children in Exile* (1983) and *Out of Danger* (1993, Whitbread Poetry Award). His non-fiction books include *An Introduction to English Poetry* (2002). He was professor of poetry at Oxford from 1994 to 1999.

Fenton, Roger 1819–69
English photographer
Born in Lancashire, he studied painting in Paris and exhibited at the Royal Academy, London (1849–51). He photographed in Russia in 1852 and was a founder and the first honorary secretary of the Photographic (later Royal Photographic) Society in 1853. Queen VICTORIA became its patron, and Fenton photographed the royal family at Balmoral and Windsor. In 1855 he went to the Crimea as the world's first accredited war photographer, using the large cameras and wet plates of the period to record both the men and the campaign conditions. It is for this work that he is best known. He subsequently travelled widely throughout Great Britain, producing fine architectural and landscape studies, but gave up photography in 1862 to become a lawyer.

Ferard, Elizabeth Catherine fl.1858–73
English deaconess
She went to stay at the Lutheran Kaiserwerth community in Germany in 1858. Here, the deaconess order or diaconate, comprising an order of nurses, had been revived by Theodor Fliedner (1800–64) in 1836, the same time as the first Protestant hospital was established. Inspired by the work of the order, she offered to promote it in London, but under the auspices of the Church of England. Ferard and two companions undertook a common rule of life in 1861 in a house near Kings Cross, and she was 'set apart' as a deaconess the following year by ARCHIBALD CAMPBELL TAIT, Bishop of London. She resigned as leader in 1873, due to ill health, but by that time the idea had spread to other dioceses and the bishops had drawn up guidelines for deaconesses in the Church at large.

Ferber, Edna 1885–1968
US writer
Born in Kalamazoo, Michigan, she became a journalist in Wisconsin at the age of 17. She was the author of numerous novels and short stories, including *Dawn O'Hara* (1911), *Gigolo* (1922), *So Big* (1924, Pulitzer Prize), *Cimarron* (1929) and *Saratoga Trunk* (1941). Her work gives a lively, though sometimes sentimental, account of 1920s and 1930s US life, and she is probably best remembered as the writer of *Show Boat* (1926), which inspired the musical play of that name. She also wrote plays with GEORGE KAUFMAN, such as *Dinner at Eight* (1932) and *Stage Door* (1936). 🕮 J G Gilbert, *Edna Ferber: A Biography* (1978)

Ferdinand I 1861–1948
Prince and first King of modern Bulgaria
Born in Vienna, Austria, the youngest son of Prince Augustus I of Saxe-Coburg and Princess Clementine of Orléans, he served in the Austrian army. On the abdication of Prince Alexander of Battenberg, he accepted the crown, as prince (1887). Dominated at first by the premier, Stephan Stambolov, he later took increasing control of the government. After proclaiming Bulgaria independent of the Ottoman Empire (1908), he took the title of king. Territorially ambitious, he joined the Balkan League against Turkey (1912) and, allying himself with the Central Powers, invaded Serbia (1915). His armies routed, he abdicated in 1918, to be succeeded by his son, Boris III (1894–1943). He retired to live in Coburg.

Ferdinand III c.1200–52
King of Castile and of Leon
The son of Alfonso IX of Leon, he attacked from 1224 the weakened Almohad caliphate in Andalusia. After capturing Córdoba (1236), he went on to take Jaen (1246), Seville (1248), Cádiz (1249) and the surrounding territories, settling his conquests with Christian inhabitants. By his death he had annexed more Muslim territory than any other Spanish king, and reduced the remaining Muslim states, now confined to Granada, to vassal kingdoms of Castile. He was canonized in 1671, and his feast day is 30 May.

Ferdinand I 1503–64
Holy Roman Emperor
Born in Alcalá de Henares, Spain, he was the second son of PHILIP I, THE HANDSOME (briefly King of Castile) and younger brother (and successor) of Emperor CHARLES V. In 1521 Charles recognized Ferdinand as ruler of the family's hereditary possessions in Austria and in the same year Ferdinand married Anna, daughter of Ladislas II of Bohemia. He was elected King of Bohemia (1526), but failed to secure Hungary, where John Zapolya (1487–1540) was made king (1527), although an eventual compromise maintained the integrity of the HABSBURG possessions in both nations. Left to rule the empire during Charles's frequent absences, Ferdinand was elected King of the Romans (1531) and recognized as the heir to the imperial throne (1551). The main threats to the empire were twofold: the external threat posed by the expansionist policy of the Ottoman Sultan SÜLEYMAN, THE MAGNIFICENT, and the internal threat from the religious divisions between Catholics and Lutherans. Unable to prevent Süleyman's attacks on Hungary, the Imperial forces under Charles V successfully relieved Vienna (1529), but the Austrian lands were again threatened by the Turks (1532, 1541). Philip of Hesse, the political leader of the Lutheran princes, seized Württemberg from Habsburg control (1534), and Ferdinand supported the emperor (1546–47) in his campaign to crush the Protestant Schmalkaldic League. His appraisal of the religious situation was more realistic than his brother's and it was Ferdinand who was principally responsible for the religious compromise at Augsburg (1555) that brought the religious wars to an end. The abdication (1556) of Charles V became effective on his death in 1558, when Ferdinand succeeded as Holy Roman Emperor. An admirer of ERASMUS (who dedicated the second edition of *Handbook of the Christian Prince* to Ferdinand), he strove to emulate the Erasmian virtues of compromise and reconciliation.

Ferdinand II 1578–1637
King of Bohemia and of Hungary, and Holy Roman Emperor
The grandson of FERDINAND I, he was born in Graz, Austria, and educated at the Jesuit University of Ingolstadt (1590–95). Privately genial and kind-hearted, he was ruthless in enforcing absolutism and religious orthodoxy as King of Bohemia (1617–27) and of Hungary (1618–26) and Holy Roman Emperor from 1619. He instigated the Thirty Years' War (1618–48) by compelling the Protestant subjects on his Austrian lands to choose between conversion and exile. Threatened by the election of the Protestant Elector Palatine, FREDERICK V, as King of Bohemia, and of the Protestant Prince of Transylvania, BETHLEN GÁBOR, as King of Hungary, he assembled a formidable pan-Catholic force. Troops from Spain and Bavaria overran the Palatinate, while the forces of the Catholic League routed the Bohemian Protestants at the White Mountain, near Prague (1620), and Polish forces under SIGISMUND III forced Gabor to renounce his throne. An alliance of Protestant nations was defeated by the Catholic League and the Imperial army under ALBRECHT VON WALLENSTEIN, resulting in the Peace of Lübeck (1629). The Protestants found GUSTAV II ADOLF of Sweden a more effective leader, while Cardinal RICHELIEU of France provided financial support for the German Protestants. Although the Battle of Lützen (1632) was a Protestant victory, Gustav Adolf was killed and the Swedish army was defeated at Nördlingen (1634). The Edict of Restitution (1629) ordered the restoration within the empire of all church lands, secularized by the Protestants since 1552, but Ferdinand failed to extirpate Protestantism. The compromise Peace of Prague (1635) was primarily effected by his son, the future FERDINAND III.

Ferdinand III 1608–57
King of Hungary and of Bohemia, and Holy Roman Emperor
The son of Emperor FERDINAND II, he was born in Graz, Austria. Although scholarly, shy and artistic, he ruled with vigour and skill as ruler of Hungary from 1626, of Bohemia from 1627 and Holy Roman Emperor from 1637. He conspired in the overthrow of ALBRECHT VON WALLENSTEIN and succeeded him as commander of the Imperial armies. As emperor he continued the struggle against the Protestants but opened negotiations at Münster (1644), and signed the Peace of Westphalia (1648), which ended the Thirty Years' War.

Ferdinand I 1751–1825
King of the Two Sicilies
He was born in Naples, the third son of CHARLES III of Spain. When Charles ascended the Spanish throne (1759) he succeeded him as Ferdinand IV of Naples (1759–99, 1799–1806, 1815–16) and as Ferdinand III of Sicily (1759–1816). After his marriage (1768) to Maria Carolina, daughter of MARIA THERESA, he fell completely under her influence, and lost his popularity. He joined England

and Austria against France (1793), but was forced to make a treaty with NAPOLEON I (1801). A violation of this treaty compelled him to take refuge in Sicily (1806). The French took possession of Naples, but Ferdinand was reinstated by the Congress of Vienna (1815), and in 1816 united his two states into the Kingdom of the Two Sicilies. Despite the demands for a constitutional government, he maintained a harsh absolutism. He was succeeded by his son, Francis I.

Ferdinand II 1810–59
King of the Two Sicilies
Born in Palermo, he was the son of Francis I, whom he succeeded in 1830. In 1836, the year his first wife died, he gave himself up to Austrian counsels and his state became one of the most reactionary in Europe. He granted a constitution in 1848, but the Sicilians mistrusted him and declared that he had forfeited the Sicilian Crown. He subdued the revolt in Sicily by bombarding its chief cities, thus earning himself the epithet Bomba. He then set aside the constitution, while all who had taken part in reforms were subjected to those persecutions which were brought to international light by WILLIAM GLADSTONE. On his death he was succeeded by his son Francis II (1836–94), just before his kingdom was incorporated into the new kingdom of Italy (1860).

Ferdinand, the Catholic, *also known as* **Ferdinand V of Castile** (from 1474), **Ferdinand II of Aragon and Sicily (from 1479)**, and **Ferdinand III of Naples** (from 1503) 1452–1516
The first monarch of all Spain
Born at Sos, Aragon, he was the son of John II of Navarre and Aragon, and married (1469) ISABELLA OF CASTILE, sister of Henry IV of Castile, ruling Castile jointly with her after Henry's death (1474). When his own father died (1479), the crowns of Aragon and Castile were united to form the basis of modern Spain. During their reign Ferdinand and Isabella suppressed local bandits by forming a *santa hermandad* ('holy brotherhood') of militia police, and also introduced the Inquisition (1478). They completed the reconquest of Granada (1482–92) and expelled the Jews from Spain (1492). He and Isabella sponsored the voyage of COLUMBUS to the New World (1492), giving Spain the resources for foreign expansionism. In 1495 he formed a Holy League to help the pope drive the French from Naples, for which he gained the title of 'the Catholic', and Naples became a Spanish possession (1503). When Isabella died (1504), Ferdinand became regent in Castile for their insane daughter, the Infanta JUANA. In 1505 he married Germaine de Foix, a niece of LOUIS XII of France. He conquered Oran, North Africa (1509), and also Navarre (1512), thus becoming monarch of all Spain from the Pyrenees to Gibraltar. He was succeeded by his grandson, the Holy Roman Emperor CHARLES V.

Ferdinand VI 1713–59
King of Spain
He was born in Madrid, the son of PHILIP V, whom he succeeded in 1746. Gloomy and mediocre, he did appoint very capable ministers, and was a patron of art and scholarship. He did his best to keep Spain neutral in European conflicts following the disadvantageous Treaty of Aix-la-Chapelle (1748). He became acutely depressed during the last years of his life.

Ferdinand VII 1784–1833
King of Spain
He was born in Escorial, near Madrid, the eldest son of CHARLES IV and Marie Luisa of Parma, who banished him from Madrid (1807). When NAPOLEON I invaded Spain (1808), Charles abdicated in favour of Ferdinand, but he was replaced by Napoleon's brother JOSEPH BONAPARTE. For six years he lived in exile on the estate of the French foreign minister, TALLEYRAND, at Valençay, where the treaty was signed with Napoleon (1813) that restored him to the throne. In 1820 a revolution obliged him to recognize Napoleon's liberal Constitution of Cadiz (1812) but repressive absolutism was reinstated three years later and lasted until his death (1833), which signalled the outbreak of the first Carlist war (1833–39). By 1826 all the Spanish possessions in the USA had gained their independence.

Ferdinand III 1769–1824
Grand Duke of Tuscany and Archduke of Austria
Born in Florence, he succeeded his father LEOPOLD II (1790). He was the first to recognize the French Republic (1792). Russia and Great Britain constrained him to become a passive member of the coalition against France, but on the French occupation of Piedmont (1795) he resumed friendly relations with France. In 1797 he concluded an unfavourable treaty with NAPOLEON I but was driven into an Austrian alliance. In 1799 he retired to Vienna, and at the Peace of Lunéville (1801) renounced all claim on Tuscany. However, he was reinstated by the Peace of Paris (1814). At home he continued his father's liberal economic and social reforms, and stood out among Italian princes for his enlightened moderation.

Ferdusi *See* FIRDAUSI

Ferguson, Adam 1723–1816
Scottish philosopher and historian
Born in Logierait, Perthshire, he studied at St Andrews University, and served as a Black Watch chaplain before settling in Edinburgh, where he became professor of natural philosophy (1759) and then of moral philosophy (1764). He travelled to Philadelphia, America, as secretary to the 1778–79 commission sent by Lord NORTH to negotiate with the American colonists. A member of the Scottish 'Common Sense' school of philosophy, together with THOMAS REID and DUGALD STEWART, his works include *The History of the Progress and Termination of the Roman Republic* (1783) and *Principles of Moral and Political Science* (1792). His *Essay on the History of Civil Society* (1767) was a major contribution to political thought. Underlining the necessity and fact of conflict in society, it influenced HEGEL, SCHILLER and KARL MARX. It has been credited with an influence on the Greek revival, with planting the seed of sociology, and with articulating decisively the problem called 'alienation'.

Ferguson, Sir Alex(ander) Chapman 1941–
Scottish football manager
Born in Govan, Glasgow, he was a schoolboy international who became one of football's most successful managers. He began his managerial career at East Stirling in 1974, but after three months he left to manage St Mirren, whom he took to the Second Division in his first season with them. As manager of Aberdeen (1978–86), he won the Scottish League Championship three times, the Scottish Cup four times, and the Scottish League Cup once with the European Cup Winners' Cup and Super Cup in 1983. With Manchester United he won the FA Cup (1990), the Cup Winners' Cup (1991), the League Cup (1992), the League Championship (1993) and the double (the League Championship and the FA Cup) in 1994 and 1996, becoming the first team to win the double twice. In 1999, he surpassed this achievement by leading his team to the treble (the League Championship, FA Cup and European Championship). In November 2006 he celebrated his 20th year in charge at the club.

Ferguson, Henry George, *known as* **Harry** 1884–1960
Irish engineer and inventor
Born in Hillsborough, County Down, he started a garage business in Belfast at the age of 16, and while working with his brother on the repair of cars and cycles built his own aeroplane, which made the first flight from Irish soil in 1909. Over many years he developed the famous 'Ferguson farm tractor' with a hydraulic linkage which controlled the depth of ploughing and made the tractor itself more stable and efficient. These machines played a large part in the mechanization of British agriculture during and after World War II.

Ferguson, James 1710–76
Scottish astronomer
He was born in Keith, Banffshire. The starry sky which he observed on clear winter's nights as a shepherd inspired him to study the movements of the Moon and planets, and to demonstrate these movements by mechanical models. He was eventually able to make a living from writing and lecturing. His books and his 'machines', many of which survive, aroused in the general public a widespread interest in astronomy. According to CAROLINE HERSCHEL, Ferguson's books were among those which influenced WILLIAM HERSCHEL to take up the study of astronomy.

Ferguson, Patrick 1744–80
Scottish soldier and inventor
He was born in Pitfour, Aberdeenshire. He served in the army in Germany and Tobago. In 1776 he invented a breech-loading rifle, firing seven shots a minute and sighted for ranges of from 100 to 500 yards. With it he armed a corps of Loyalists, who helped win the Battle of Brandywine in the American colony of Pennsylvania (1777). He was killed at the Battle of King's Mountain, South Carolina.

Ferguson, Robert, *also called* **the Plotter** c.1637–1714
Scottish conspirator
He was born near Alford, Aberdeenshire. In 1662 he was ousted as a Presbyterian from the vicarage of Godmersham in Kent. For ten years he played a leading part in every treasonable scheme against the last two Stuart kings, and twice had to leave the country. However after the Revolution of 1688 (of which he

published a history in 1706), he conspired as busily for the Jacobite cause. He was arrested for treason in 1704, but not tried.

Ferguson, Sir Samuel 1810–86
Irish poet and Celtic scholar
Born in Belfast, he was called to the Irish Bar in 1838, and in 1867 he was appointed the first deputy keeper of Irish Records. As president of the Royal Irish Academy he gave a powerful impetus to the study of early Irish art. His spirited poems were published as *Lays of the Western Gael* (1865), *Congal* (1872), *Poems* (1880) and *The Forging of the Anchor* (1883). He wrote a preface to the *Leabhar Breac* ('The Speckled Book'), which appeared in 1876, and his *Ogham Inscriptions* was published in 1887. 🕮 A Dearing, *Sir Samuel Ferguson, Poet and Antiquarian* (1931)

Ferguson, Sarah *See* YORK, DUCHESS OF

Fergusson, Bernard Edward, Baron Ballantrae 1911–80
Scottish soldier and military historian
Born in London, of Scottish parentage, he was commissioned into the Black Watch in 1931, an experience which caused him to write *The Black Watch and the King's Enemies* (1950). During World War II he served with the Chindit forces in Burma, whose successes were a great boost to British morale in the war against Japan. After the War Fergusson became assistant inspector-general of the Palestine Police and took part in anti-terrorist operations during the last days of the British mandate and the civil war between Arabs and Zionists. He was promoted to brigadier in 1956 and became Governor-General of New Zealand (1962–67) and chairman of the British Council (1972–76). He wrote about his wartime experiences in *Beyond the Chindwin* (1945) and *The Trumpet in the Hall* (1970). He was granted a life peerage in 1972.

Fergusson, John Duncan 1874–1961
Scottish painter
Born in Perthshire, he took up painting after a medical training. Along with SAMUEL JOHN PEPLOE and FRANCIS CADELL, he emphasized colour rather than line. Trips to North Africa, Spain (1897) and Paris (which he made his home before and after World War I) brought him into contact with Mediterranean light and landscape, and with the painting of the Post-Impressionists and Fauves. He is best known for his series of World War I paintings of naval dockyards and his female nudes.

Fergusson, Robert 1750–74
Scottish poet
Born in Edinburgh, he was educated at the high schools of Edinburgh and Dundee, and at St Andrews University. He was employed in the commissary office in Edinburgh, contributing poems to *Weekly Magazine* from 1771, which gained him local fame. A religious interest, inspired by the minister John Brown (1722–81), was followed by deep depression, and he became insane after a fall downstairs, and died in a public asylum. He was a major influence on ROBERT BURNS, who placed a headstone on his grave in 1789. He left 33 poems in Scots and 50 poems in English. Essentially an Edinburgh poet, he is most famous for *Auld Reekie* (1773), tracing a day in the life of the city. Other well-known poems are *Elegy on the Death of Scots Music*, *The Daft Days* (his first published poem), *Hallow Fair*, *To the Tron Kirk Bell*, *Leith Races* and the satirical *The Rising of the Session*. 🕮 A Law, *Robert Fergusson and the Edinburgh of his Time* (1974)

Ferishtah or **Firishtah** c.1550–c.1615
Persian historian
Born in Astrabad, he went as a child to India, became captain in the bodyguard of the prince of Ahmednagar, and on his deposition went to Bijapur (1589). He wrote a great history of the Muhammadan power in India (1609, Eng trans 1831–32).

Ferlinghetti, Lawrence 1919–
US poet and publisher
Born in Yonkers, New York, he studied at the University of North Carolina, Columbia University and the Sorbonne in Paris. In 1951 he moved to San Francisco, where he contributed to the so-called 'San Francisco Renaissance'. He was co-founder of the City Lights Bookstore, which acted as a cultural forum and publishing house for radical poets. His work made a major contribution to Beat poetry and beyond, beginning with *Pictures of the Gone World* (1955) and *A Coney Island of the Mind* (1958). He has published many books of poetry, including *Endless Life: The Selected Poems* (1981), *When I Look at Pictures* (1990) and *A Far Rockaway of the Heart* (1997), two novels and a number of plays. In 1994, a street in San Francisco was named after him; he became the city's first Poet Laureate in 1998. In 2006 he was made Commandeur, l'Ordre des Arts et des Lettres. 🕮 N Cherkassky, *Ferlinghetti: A Biography* (1979)

Fermat, Pierre de 1601–65
French mathematician
Born in Beaumont, he studied law at Toulouse University, where he became a councillor of parliament. His passion was mathematics, most of his work being communicated in letters to friends containing results without proof. His correspondence with BLAISE PASCAL marks the foundation of probability theory. He studied maximum and minimum values of functions in advance of the differential calculus, but is best known for his work in number theory, the proofs of many of his discoveries being first published by LEONHARD EULER a hundred years later. His 'last theorem' was the most famous unsolved problem in mathematics, stating that there are no positive integers x, y, and z with $x^n+y^n=z^n$ if n is greater than 2. Its solution was finally published in 1995. In optics, Fermat's principle was the first statement of a variational principle in physics, saying that the path taken by a ray of light between two given points is the one in which the light takes the least time. 🕮 Michael S Mahoney, *The Mathematical Career of Pierre de Fermat 1601–1665* (1973)

Fermi, Enrico 1901–54
US nuclear physicist and Nobel Prize winner
Born in Rome, Italy, he studied at Pisa University, at Göttingen University under MAX BORN, and at the University of Leyden. He became professor of theoretical physics at Rome University in 1927. Between 1927 and 1933 he expanded upon the work of WOLFGANG PAULI, and published his semiquantitative method of calculating atomic particles. In 1934 he and his colleagues split the nuclei of uranium atoms by bombarding them with neutrons, thus producing artificial radioactive substances. This led to the discovery that slow neutrons are much more efficient than high-energy neutrons in initiating nuclear reactions, which proved an important step in the development of nuclear power and weapons. He was awarded the 1938 Nobel Prize in physics. Fearing for the safety of his Jewish wife in the light of Italy's anti-Semitic legislation, he went straight from the prize presentation in Stockholm to the USA, where he became professor at Columbia University (1939). He played a prominent part in interesting the US Government in atomic energy, constructed the first US nuclear reactor at Chicago (1942), and produced the first controlled chain reaction. The element fermium is named after him. 🕮 Emilio Segrè, *Enrico Fermi: Physicist* (1970)

Fermor, Sir Patrick (Michael) Leigh 1915–
English travel writer
He was born in London of English and Irish descent. Expelled from King's School, Canterbury, he set out in 1933 on a leisurely walk from Rotterdam to Constantinople (Istanbul). *A Time of Gifts* (1977) recounted the journey as far as Hungary, and *Between the Woods and the Water* (1986) as far as the Danube. Both have been praised for their incisive grasp of the mood of pre-war Europe. The third volume of the planned trilogy, as far as Constantinople, has yet to appear. He spent World War II in Albania, Greece and Crete, where, disguised as a shepherd, he lived for two years organizing the Resistance and the capture and evacuation of the German commander General Kreipe, an incident which was the basis for the film *Ill Met by Moonlight* (1956). Among his other books are *The Traveller's Tree* (1950), about the West Indies, *Mani* (1958), about Greece, and *Three Letters from the Andes* (1991), vivid accounts of a journey in the early 1970s. An anthology of his work, *Words of Mercury*, was published in 2003. He was knighted in 2004. 🕮 *A Time to Keep Silent* (1953)

Fernandel, *pseudonym of* **Fernand Joseph Désiré Contandin** 1903–71
French film comedian
Born in Marseilles, he worked in a bank and a soap factory before his stage debut in 1922. From 1930 he appeared in over 100 films, interrupted only by military service and Nazi occupation. He established himself internationally with his moving portrayal of the naive country priest in *The Little World of Don Camillo* (1953) and with his versatile handling of six separate roles in *The Sheep Has Five Legs* (1953), which gave full rein to his memorable facial mobility.

Fernandes de Queirós, Pedro *See* QUEIRÓS, PEDRO FERNANDES DE

Fernández, Emilio, *originally* **Emilio Fernández Romo** 1904–86
Mexican film actor and director
Born in Coahuila, Mexico, of a Native American mother, he was nicknamed 'El Indio' and as a young man took part in Mexico's

revolutionary struggles. While in exile in Hollywood in the 1920s and 1930s he started a career as a film actor and learned the basics of filmmaking before returning to Mexico in 1933, working initially as an actor and screenwriter. He was often typecast in both Mexican and US films as a villain, most famously in SAM PECKINPAH's *The Wild Bunch* (1969). He emerged as a leading director in the 1940s with such films as *Flor Silvestre* (1943), *Maria Candelaria* (1943) and *The Pearl* (1945), based on JOHN STEINBECK's novel, which became the first Mexican film to be distributed internationally. His private life was often the source of scandal: in 1976 he was convicted of manslaughter for killing a farm labourer – done, he claimed, in self-defence.

Fernández, Juan c.1536–c.1604
Spanish navigator
In 1563 he discovered the Pacific islands named after him. He also discovered San Felix and San Ambrosio Islands.

Fernández de Lizardi, José Joaquín 1776–1827
Mexican writer
Born in Mexico City, he became a radical journalist and a leading figure in the national liberation movement. He was known as 'El Pensador Mexicano' ('the Mexican Thinker') after a journal he founded and edited, and when his anticlerical and anti-absolutist articles and poems were censored by the government, he turned to fiction. His picaresque satire *El periquillo sarniento* (1816, 'The Itching Parrot'), considered the first Latin American novel, is a tale of adventure in the Spanish tradition, mined with Lizardi's explosive assessments of colonial society in Mexico. 🕮 J R Spell, *The Life and Works of José Fernández de Lizardi* (1931)

Fernel, Jean François 1497–1558
French physician
Born in Montdidier, he turned to medicine only after several years studying philosophy, mathematics and astrology. He soon became a popular medical teacher and his reputation as a physician soared when he saved the life of the mistress of the Dauphin (later HENRY II). Despite his essential adherence to GALENism, he was an astute observer, whose many writings synthesized 16th-century medical orthodoxy and rejected magic and astrology. He coined the Latin words which became 'physiology' and 'pathology'. His magnum opus, the *Universa medicina* (1567), was edited by a disciple after his death.

Ferrabosco, Alfonso 1543–88
Italian composer
Born in Bologna, the son of DOMENICO MARIA FERRABOSCO, he went to England before 1562, and was for some time in the service of ELIZABETH I. Leaving England in 1578, he entered the service of the Duke of Savoy. His musical works include madrigals, motets and compositions for viols.

Ferrabosco, Alfonso c.1575–1628
English composer
Born in Greenwich, London, the son of ALFONSO FERRABOSCO, he was in the service of JAMES VI AND I and CHARLES I. He wrote music for masques, songs and, most notably, for viol consorts, showing his impressive grasp of counterpoint and invention. His sons Alfonso (c.1610–c.1660), Henry (c.1615–c.1658) and John (1626–82) all held court appointments.

Ferrabosco, Domenico Maria 1513–74
Italian composer
Born in Bologna, he composed madrigals and motets. He was also a singer and became maestro di cappella of San Petronio in Bologna. He was the father of ALFONSO FERRABOSCO (1543–88).

Ferranti, Sebastian Ziani de 1864–1930
English electrical engineer and inventor
Born in Liverpool, of Italian extraction, he was educated in a Roman Catholic college at Ramsgate and at evening classes at University College London. From his early experiments with dynamos and alternators he conceived the idea of the large-scale generation and distribution of electricity at high voltages, and in 1887 he was appointed chief electrician to the London Electric Supply Corporation, which planned to provide power to the whole of London north of the Thames from a power station at Deptford. This scheme was temporarily frustrated by the Electricity Lighting Act of 1888, but it nevertheless contained all the elements of the national electricity grid system which came into being some 40 years later. From 1882 to 1927 he took out 176 patents, and founded the firm of Ferranti Ltd in 1905. 🕮 J F Wilson, *Ferranti and the British Electrical Industry, 1864–1930* (1988)

Ferrar, Nicholas 1592–1637
English theologian and mystic
He was born in London. An Anglican deacon, he founded a Utopian religious community (1625) at Little Gidding in Huntingdonshire (Cambridgeshire). The 30 adherents held constant services and occupied themselves with fine bookbinding. They printed and published the first edition of GEORGE HERBERT's *The Temple* (1633). The community was not broken up by the Puritans until 1647.

Ferrara, Andrea fl. 16th century
Italian broadsword maker
Born probably in Ferrara, he was famous, with his brother, as an armourer in Belluno in 1585. It is said that he tempered sword blades by the method employed by the smiths of Damascus.

Ferrari, Enzo 1898–1988
Italian car manufacturer
Born in Modena, he became a racing-car driver for Alfa Romeo in 1920, and in 1929 formed his own racing team, Scuderia Ferrari. The first car built to his own design was for Alfa Romeo in 1937, and he left the company in 1939 to form Ferrari SpA, remaining there as president until 1977. Ferrari's cars became known for their technological superiority and speed, winning numerous Formula One grand prix races and other championships from the 1950s awards. The luxury cars of the marque are likewise known for speed, elegance and precision. 🕮 Richard Williams, *Enzo Ferrari: A Life* (2001)

Ferrari, Paolo 1822–89
Italian dramatist
Born in Modena, he wrote many comedies, including *Goldoni* (1852) and *Parini e la satira* (1857, 'Parini and the Lampoon'). He became professor of history at Modena (1860) and afterwards at Milan. 🕮 N de Belli, *Il Teatro di Paolo Ferrari* (1922)

Ferraro, Geraldine Anne 1935–
US Democrat politician
Born in Newburgh, New York, the daughter of Italian immigrants, she was educated at Marymount College, Fordham University and New York Law School before establishing a successful law practice (1961–74). She served as assistant district attorney for the Queens district of New York between 1974 and 1978 and worked at the Supreme Court from 1978, heading a special bureau for victims of violent crime, before being elected to the House of Representatives in 1981. In Congress, she gained a reputation as an effective, liberal-minded politician and was selected in 1984 by WALTER F MONDALE to be the first female vice-presidential candidate of a major party. After the Democrats' convincing defeat she returned to law practice, and in 1992 and 1998 unsuccessfully sought the New York Democratic nomination for US senator. In 1994 and 1995 she served as US representative on the UN Human Rights Commission.

Ferreira, Antonio, *known as* **the Portuguese Horace** 1528–69
Portuguese poet
Born in Lisbon, he studied law at Coimbra, and became a judge in Lisbon, where he spent his life. Having little time for the popular Iberian subjects of commerce and war, he turned to classical models for his inspiration, and introduced a classical style into Portuguese verse and drama, earning the title 'the Portuguese HORACE'. His best-known work is the two-act historical tragedy on classical lines, *Inês de Castro* (1587). 🕮 A Roig, *Antonio Ferreira, études sur sa vie et son œuvre* (1970)

Ferrel, William 1817–91
US mathematician
Born in Bedford County, Pennsylvania, he attended Marshall College, Pennsylvania, and Bethany College, West Virginia. He taught in Missouri and Kentucky before obtaining a scientific post at the American Nautical Almanac in 1858. In 1867 he joined the US Coast Survey and in 1882 became professor in the US army's signal service. He was elected a member of the US National Academy of Sciences in 1868. He gave the first mathematical formulation of atmospheric motions on a rotating Earth and applied his theory to the general circulation of both the atmosphere and the oceans (1859–60). He produced models of three-dimensional motion in a cyclone and also indicated that the general circulation in each hemisphere could be considered on similar lines. He derived the concept of the thermal wind which gives the relationship between horizontal temperature gradient and the change of wind with height. He also dealt with tidal theory, and in 1880 he derived a mechanical tide predictor.

Ferrier, James Frederick 1808–64
Scottish philosopher
Born in Edinburgh, he became professor of history at Edinburgh (1842) and professor of moral philosophy at St Andrews (1845). His book *The Institutes of Metaphysic* (1854) was the first important work of the British Idealist (neo-HEGELian) movement. He introduced the term 'epistemology' into English and propounded also an 'agnoiology', or theory of ignorance.

Ferrier, Kathleen 1912–53
English contralto
Born in Higher Walton, Lancashire, she was an accomplished amateur pianist. After winning a prize for singing at a local music festival, she was encouraged to study seriously (1940). The range and richness of her voice, together with her technical control, rapidly won her great respect. In 1946 she sang Lucrezia in BENJAMIN BRITTEN's *The Rape of Lucrezia* and Orpheus in GLUCK's *Orfeo* at Glyndebourne, and thereafter was in great demand throughout Europe and the USA. Her greatest success, perhaps, was in MAHLER's *Das Lied von der Erde* ('The Song of the Earth') at the first Edinburgh Festival (1947) and at Salzburg (1949). 🕮 Winifred Ferrier, *Kathleen Ferrier* (1955)

Ferrier, Susan Edmonstone 1782–1854
Scottish novelist
She was born in Edinburgh, the tenth child of a lawyer who became principal clerk to the Court of Session along with Sir WALTER SCOTT. On the death of her mother in 1797 she took over the running of the house, and she looked after her father until his death in 1829. Her first work, *Marriage* (1818), a novel of provincial social manners, was followed by *The Inheritance* (1824) and *Destiny* (1831), a Highland romance. She enjoyed a close friendship with Scott, who was for a time credited by some with the authorship of her books. Following the publication of these works she was converted to evangelical Christianity, and became a member of the Free Church, concentrating on charitable works rather than on writing. Towards the end of her life she lived in relative seclusion, her eyesight failing badly. 🕮 A Grant, *Susan Ferrier of Edinburgh* (1957)

Ferry, Jules François Camille 1832–93
French statesman
Born at Saint Dié in the Vosges, he studied law and was admitted to the Paris Bar (1854), but became well known as a critic, supporting the opponents of the empire. He was elected (1869) to the Corps Législatif, where he voted against the war with Prussia, and during the Siege of Paris (1870–71) he was mayor of the city. As minister of public instruction (1879) he brought forward a bill excluding Jesuits from the schools. It was rejected, but the expulsion of the Jesuits was effected by decrees founded on obsolete laws, which brought about the dissolution of the ministry in 1880. Ferry then formed a cabinet, which lasted until later the following year. His last ministry (1883–85) fell through his policy of 'colonial expansion', involving war in Madagascar and Indo-China.

Fersen, Frederik Axel, Count von 1719–94
Swedish field marshal and politician
He was born in Stockholm. A descendant of the Scottish Macphersons, he served successively in the French and Swedish armies, and was made a field marshal in 1770. He became leader of the anti-Royalist opposition and was ultimately assassinated in Stockholm.

Fersen, Hans Axel von 1755–1810
Swedish soldier and politician
The son of Count FREDERIK AXEL VON FERSEN, he fought as a volunteer with the French army in America during the Revolution (1775–83). On his return, he served at the French court, where he became closely attached to Queen MARIE ANTOINETTE. In 1791, disguised as a coachman, he drove the royal family on their flight to Varennes. He returned to Sweden (1799) and in 1801 was appointed earl marshal. He rode in the funeral procession of Christian August of Augustenburg, the recently-elected heir to the Swedish throne, and was murdered by a mob who suspected him of having poisoned the prince.

Fessenden, Reginald Aubrey 1866–1932
US radio engineer and inventor
Born in East Bolton, Quebec, and educated in Canada, he moved first to Bermuda, where he developed an interest in science while acting as principal of the Whitney Institute, and then to New York (1886), where he met THOMAS EDISON and became the chief chemist in his research laboratories in New Jersey. By 1892 he had returned to academic life, first at Purdue University and then as professor of electrical engineering at the University of Pittsburgh (1893–1900). Of his many patents (over 500), the one of most fundamental importance was his invention of amplitude modulation. On Christmas Eve, 1906, he used this to broadcast what was probably the first US radio programme from the transmitter he had built at Brant Rock, Massachusetts. Another of his discoveries was the heterodyne effect, which soon developed into the superheterodyne circuit that rapidly became an integral part of the design of radio receivers. Among his other patents were the sonic depth finder, the loop-antenna radio compass and submarine signalling devices.

Fessenden, William Pitt 1806–69
US politician
Born in Boscawen, New Hampshire, he was admitted to the Maine Bar in 1827, and rose in the Whig Party. His antislavery sympathies won him his election to the US Senate as a Republican in 1854, his maiden speech being an attack on the Kansas-Nebraska bill, which sought to make slavery optional for those territories. ABRAHAM LINCOLN made him Secretary of the Treasury in 1864 and he returned to the Senate in 1865. Lincoln's successor, ANDREW JOHNSON, a Democrat, convinced Fessenden that the Republican Party was being endangered by a judicious presidential amnesty to former Confederates who would then swamp the House of Representatives and perhaps imperil the Union war debt or legalize the Confederate debt. Thus Fessenden, as chairman of the Joint House and Senate Committee of Fifteen, framed in the Fourteenth Amendment to the US Constitution (adopted 1868) a measure which would specifically avert either and protect the rights of emancipated slaves. Historians now realize that it was largely Fessenden, and not more radical figures, who set the tone.

Festinger, Leon 1919–89
US psychologist
Born in New York City, he was educated at the University of Iowa. Between 1943 and 1955 he taught successively at Rochester University, the Massachusetts Institute of Technology (MIT), and Michigan and Minnesota universities. He then moved to Stanford University (1955–68) and later to the New School for Social Research in New York (from 1968). His contribution to postwar social psychology has centred on the introduction and development of the deceptively simple concept of 'cognitive dissonance'. According to the theory, people are unable to tolerate conflicting cognitions (beliefs, thoughts, perceptions) for any length of time, and have to resolve such internal conflicts by rejecting or devaluing one or more of the cognitions. The theory has proved useful in the understanding of a variety of psychological phenomena, and led to certain counter-intuitive predictions that were successfully borne out experimentally. He received the Distinguished Scientist award of the American Psychological Association in 1959.

Fétis, François Joseph 1784–1871
Belgian writer on music
He was born in Mons in the Austrian Netherlands (now Belgium). He was professor at the Paris Conservatoire (1821) and director of the Brussels Conservatory (1833). He produced a *Universal Biography of Musicians* (1835–44) and *General History of Music* (1868–76).

Fettes, Sir William 1750–1836
Scottish merchant and philanthropist
He made a fortune from tea and wine, was twice Lord Provost of Edinburgh and left £166,000 to found Fettes College there (1870), designed by DAVID BRYCE.

Feuchtwanger, Lion 1884–1958
German writer
Born in Munich, he studied literature and philology there and at Berlin universities. He won a reputation in Europe with the 18th-century historical novel *Jud Süss* (1925, Eng trans *Jew Süss*, 1926), presenting an elaborately detailed picture of the lives, sufferings and weaknesses of central European Jewry. The 14th-century tale *Die hässliche Herzogin* (1923), translated as *The Ugly Duchess* (1927), was a great success in Great Britain. During World War I he was interned in Tunis. His thinly disguised satire on HITLER's Munich putsch, *Erfolg* (1930, 'Success'), earned him the hatred of the Nazis. In 1933 he fled to France, where in 1940 he was interned by the German army, but escaped to the USA. He also wrote numerous dramas, and collaborated with BRECHT in a translation of CHRISTOPHER MARLOWE's *Edward II*. His later works included detailed part-biographies

of GOYA (1952) and JEAN JACQUES ROUSSEAU (1954). 🕮 L Boettche and P G Krohn, *Lion Feuchtwanger* (1960)

Feuerbach, Ludwig Andreas 1804–72
German philosopher
Born in Landshut, Bavaria, the son of the jurist Paul Feuerbach (1775–1833), he was a pupil of HEGEL at Berlin but reacted against his Idealism. His best-known work, *Das Wesen des Christentums* (1841), which was translated by Mary Ann Evans (GEORGE ELIOT) as *The Essence of Christianity* (1854), claims that religion rises from one's alienation from oneself, and is 'the dream of the human mind', projecting ideal qualities onto a fictitious supreme 'other'. His ideas strongly influenced KARL MARX and FRIEDRICH ENGELS. 🕮 C A Wilson, *Feuerbach and the Search for Otherness* (1989)

Féval, Paul Henri Corentin 1817–87
French novelist
He was born in Rennes. His many novels include *Les Mystères de Londres* (1844, 'The Mysteries of London') and *Le Bossu* (1858, 'The Hunchback'). A number of them were dramatized with great success. 🕮 A Delaigue, *Un homme de lettres* (1898)

Feydeau, Ernest Aimé 1821–73
French novelist
He was a stockbroker and an archaeologist, and achieved notorious success with his novel *Fanny* (1858). His writing depicts the worst features of society in the time of the Empire. *Sylvie* (1861) is particularly powerful.

Feydeau, Georges Léon Jules Marie 1862–1921
French dramatist
Born in Paris, the son of ERNEST AIMÉ FEYDEAU and a prostitute, he wrote his first play, *Le Tailleur pour dames* (1886, Eng trans *A Gown for his Mistress*, 1969), when he was 24 and subsequently maintained a prolific output. His name is synonymous with French bedroom farce. His characters are Parisian bourgeois couples seeking diversion from each other, and his farces rely on the twin themes of adultery and the chase. Among his plays are such enduring classics as *Le Dindon* (1896, Eng trans *Paying the Piper*, 1972), *L'Hôtel du libre échange* (1899, Eng trans *Hotel Paradiso*, 1957) and *Une Puce à l'oreille* (1907), produced as *A Flea in Her Ear* (trans by JOHN MORTIMER) at the National Theatre, London, in 1965. 🕮 A Shenkan, *Georges Feydeau* (1972)

Feynman, Richard Phillips 1918–88
US physicist and Nobel Prize winner
Born in New York City, he studied at the Massachusetts Institute of Technology (MIT) and Princeton, where he received his PhD. Overcoming moral doubts, he worked on the Manhattan atomic bomb project at Los Alamos and after World War II he was appointed professor at Cornell University. There he worked with HANS BETHE on quantum electrodynamics, the application of quantum theory to interactions between electromagnetic radiation and particles. He devised his own pictorial way of describing quantum processes, the 'path integral approach', which has proved to be a very powerful theoretical tool. Using this he further developed quantum electrodynamics and introduced 'Feynman diagrams', which provide a pictorial representation of particle interactions. For his work on quantum electrodynamics he was awarded the Nobel Prize in physics in 1965 together with SIN-ITIRO TOMONAGA and JULIAN SCHWINGER. The most successful and accurate physical theory ever developed, quantum electrodynamics is the model on which other quantum field theories are based. Working with MURRAY GELL-MANN at the California Institute of Technology (Caltech), he created the V–A model of weak interactions which can describe parity conservation violation. He also studied how deep inelastic scattering can reveal the structure of protons and investigated the properties of liquid helium. 🕮 James Gleick, *Genius: The Life and Science of Richard Feynman* (1992)

Fiacre or **Fiachrach, St** d.670
Irish hermit
He founded a monastery in France, on the site of the village of Saint-Fiacre-en-Brie, near Paris. In 1640 Nicholas Sauvage, a hirer of hackney carriages, lived at the Hôtel St Fiacre in the Rue St Martin, Paris; hence 'fiacre', meaning a horse-drawn carriage. Fiacre is the patron saint of cab-drivers and gardeners, and his feast day is 30 August.

Fiammingo, Dionisio *See* CALVAERT, DENYS

Fibich, Zdeněk (Antonin Václav) 1850–1900
Czech composer
Born in Seboric, he wrote operas, symphonies and works for solo piano, and was kapellmeister in Prague from 1878. One of his melodies, *Poème*, from the symphonic poem *Vpodvečer* (1893, 'At Twilight'), has remained popular.

Fibiger, Johannes Andreas Grib 1867–1928
Danish pathologist and Nobel Prize winner
Born in Silkeborg, he studied in Berlin under ROBERT KOCH and EMIL VON BEHRING, and became professor and head of the Institute of Pathological Anatomy at Copenhagen in 1900. The first to induce cancer experimentally, feeding rats with cockroaches carrying the parasite *Spiroptera neoplastica*, he won the Nobel Prize in physiology or medicine in 1926.

Fibonacci, Leonardo, *also called* **Leonardo of Pisa** c.1170–c.1250
Italian mathematician
He popularized the modern Arabic system of numerals, which originated in India. His main work *Liber abaci* (1202, 'The Book of Calculation') illustrated the virtues of the new numeric system, showing how it can be used to simplify highly complex calculations. The book also includes work on geometry, the theory of proportion and techniques for determining the roots of equations. His greatest work, the *Liber quadratorum* (1225, 'The Book of Square Numbers') contains remarkably advanced contributions to number theory and is dedicated to his patron, Holy Roman Emperor FREDERICK II, of Germany. He discovered the 'Fibonacci sequence' of integers in which each number is equal to the sum of the preceding two (1,1,2,3,5,8,...). He was the first outstanding mathematician of the Middle Ages. 🕮 Joseph and Frances Gies, *Leonardo of Pisa and the New Mathematics of the Middle Ages* (1969)

Fichte, Johann Gottlieb 1762–1814
German philosopher
Born in Rammenau, Saxony, he studied at the University of Jena and made a precarious living for some years as an itinerant tutor in philosophy, in the course of which he met KANT at Königsberg and became a devoted disciple. He was appointed professor of philosophy at Jena in 1794. His *Wissenschaftslehre* (1785, 'The Science of Knowledge') modified Kant's doctrine of the 'thing-in-itself' as the absolute reality, substituting the 'ego', a more subjective reality, affirming itself in the act of consciousness and constructing the external world (the 'non-ego') as its field of action. *Grundlage des Naturrechts* (1796, Eng trans *The Science of Rights*, 1869, 1889) and *System der Sittenlehre* (1798, Eng trans *The Science of Ethics*, 1897) elaborate his system of thought. He went on to teach at Berlin (1799) after an accusation of atheism, and became professor of philosophy at Erlangen (1805), where he published *Grundzüge des gegenwärtigen Zeitalters* (1806, Eng trans *The Characteristics of the Present Age*, 1844) and *Anweisung zum seligen Leben und Religionslehre* (1806, Eng trans *The Way Towards the Blessed Life*, 1844). He delivered a famous series of patriotic lectures, *Reden an die Deutsche Nation* (1807–08, 'Addresses to the German Nation'), in which he tried to foster German nationalism in resistance to NAPOLEON I. In this context Fichte's metaphysical 'ego' became the German nation, an idea that was later perverted into the Nazi concept of the *Herrenvolk*. In 1810 he became the first rector of the new University of Berlin, whose constitution he had drawn up. His son Immanuel Hermann von Fichte (1797–1879) also became a professor of philosophy (at Bonn, then Tübingen) and was ennobled in 1867. 🕮 Robert Adamson, *Fichte* (1881)

Ficino, Marsilio 1433–99
Italian philosopher
He was born in Figline, Florence. COSIMO DE' MEDICI appointed him head of the Platonic Academy in Florence, and commissioned from him translations (into Latin) from and commentaries on PLATO, PLOTINUS and the *Corpus Hermeticum*. He was ordained a priest in 1473, and became rector of two churches and canon of the cathedral in Florence. He retired to the country when the Medici were expelled from Florence in 1494. He was a major influence in the Renaissance revival of Platonism and his own rather eclectic system was largely an attempt to reconcile Platonism with Christianity.

Fick, Adolph Eugen 1829–1901
German physiologist
He was professor at the universities of Zurich and Würzburg. A law of diffusion in liquids was named after him when he discovered that the mass of solute diffusing through unit area per second is proportional to the concentration gradient.

Fick, August 1833–1916
German philologist
Born in Petershagen, he was a professor at Göttingen (1876) and Breslau (1887), and pioneered the comparative study of

Indo-European vocabulary with his Indo-Germanic dictionary (1870). He also wrote works on Greek personal names and the original language of the *Iliad*.

Fiedler, Arthur 1894–1979
US conductor
Born in Boston, he studied music in Berlin and joined the Boston Symphony Orchestra as a violinist. In 1930 he founded the Boston Pops Orchestra, which gave free outdoor concerts that blended both classical and popular music. He served as its director for nearly 50 years until his death.

Field, Cyrus West 1819–92
US merchant
Born in Stockbridge, Massachusetts, the younger brother of DAVID DUDLEY FIELD and STEPHEN JOHNSON FIELD, he made a small fortune in the paper business, then conceived the idea of a transatlantic telegraph cable. He organized companies in England and the USA, and after repeated attempts he had a brief success (1858). During the three weeks before the cable failed, Queen VICTORIA used it to send a message to President JAMES BUCHANAN. Field laid a new transatlantic cable in 1866, and later promoted other oceanic cables.

Field, David Dudley 1805–94
US jurist
Born in Haddam, Connecticut, he was educated at Williams College, Williamstown, Massachusetts. He was admitted to the New York Bar in 1828, and worked to reform the judiciary system. An advocate of codification, he was appointed by the state in 1857 to prepare penal, political and civil codes, of which the first was adopted by New York, and all by other states. He made great contributions to international law and to law reform, and his *Outlines of an International Code* (1872) was translated into several languages. He was the brother of CYRUS WEST FIELD and STEPHEN JOHNSON FIELD.

Field, Eugene 1850–95
US writer
Born in St Louis, Missouri, he became a journalist at the age of 23, and from 1883 was a columnist with the *Chicago Morning News*, achieving a reputation as humorist and poet with his column 'Sharps and Flats'. He wrote the well-known nursery lullaby 'Wynken, Blynken, and Nod' and the sentimental 'Little Boy Blue', and published several books of children's verse. 🕮 S Thompson, *The Life of Eugene Field* (1927)

Field, John 1782–1837
Irish pianist and composer
Born in Dublin, he was an infant prodigy, and was the apprentice of MUZIO CLEMENTI, who used him to demonstrate the capabilities of his pianos. He accompanied Clementi in 1802 to Paris, Vienna and St Petersburg, where he settled in 1804 as a music teacher, returning to London in 1832. His 19 nocturnes and other keyboard music influenced CHOPIN.

Field, Marshall 1834–1906
US merchant
Born in Conway, Massachusetts, he worked as a clerk before moving to Chicago (1856), where he became founder of the Chicago department store known from 1881 as Marshall Field and Company, one of the world's largest and most progressive emporiums.

Field, Nathan 1587–c.1620
English actor and dramatist
He was born in London and educated there at St Paul's School. In 1600 he became one of the children of the Queen's Chapel, and subsequently one of the comedians of the Queen's Revels (1604–13) and various other troupes. As a playwright he collaborated with FRANCIS BEAUMONT and JOHN FLETCHER, and with PHILIP MASSINGER in the latter's *The Fatal Dowry* (1632). He also wrote two comedies, *A Woman is a Weathercocke* (1612) and *Amends for Ladies* (1618). 🕮 R F Brinkley, *Nathaniel Field, Actor-Playwright* (1928)

Field, Sally Margaret 1946–
US film actress
Born in Pasadena, California, she studied at the Actors Studio in California and gained popularity as the star of lightweight television series like *Gidget* (1965) and *The Flying Nun* (1966–70). She later proved her credentials as a dramatic actress, winning an Emmy for the mini-series *Sybill* (1976) and Academy Awards for *Norma Rae* (1979) and *Places in the Heart* (1984). Her notable films include *Absence of Malice* (1981), *Steel Magnolias* (1989), *Mrs Doubtfire* (1993) and *Forrest Gump* (1994).

Field, Stephen Johnson 1816–99
US judge
Born in Haddam, Connecticut, he practised law in New York City before moving to California in 1849. He helped to draw up the California state codes and became chief justice there in 1859, serving as a judge of the US Supreme Court from 1863 to 1897. He was the brother of CYRUS WEST FIELD and DAVID DUDLEY FIELD.

Fielding, Helen 1958–
English author
Born in Morley, Yorkshire, she studied at St Anne's College, Oxford, and worked as a television producer and newspaper columnist before achieving fame as the creator of *Bridget Jones's Diary*. This humorous newspaper column parodying contemporary cosmopolitan society through the confusions and neuroses of a discontented single young woman first appeared in *The Independent on Sunday* in 1995 and was later taken up by *The Daily Telegraph*. It was also published in book form as *Bridget Jones's Diary* (1999) and *Bridget Jones: The Edge of Reason* (2000). The novel *Olivia Joules and the Overactive Imagination* appeared in 2003.

Fielding, Henry 1707–54
English novelist
Born at Sharpham Park, near Glastonbury, Somerset, he was educated at Eton. He went to London and in 1728 published a satirical poem, *The Masquerade*, and a comedy, *Love in Several Masques*. Thereafter he studied at the University of Leyden (1728–29), before returning to London, and in the space of eight years he wrote 25 dramatic pieces: light comedies, adaptations of MOLIÈRE, farces, ballad operas, burlesques (including *Tom Thumb*) and a series of satires attacking Sir ROBERT WALPOLE and his government. This last prompted the introduction of the Theatrical Licensing Act of 1737 and effectively ended his career as a playwright and theatre manager (he had formed his own company, and was running the Little Theatre, Haymarket). He turned to the law, was admitted as a student at the Middle Temple, and was called to the Bar in 1740, but was hampered by his disabling gout. As a student he turned to journalism and edited *The Champion* (1739–41). Incensed by the publication of SAMUEL RICHARDSON's prudish *Pamela*, he ridiculed it in a pseudonymous parody, *An Apology for the Life of Mrs Shamela Andrews* (1741). In 1742 came *The Adventures of Joseph Andrews and His Friend, Mr Abraham Adams*. The three volumes of *Miscellanies* (including *The Life of Jonathan Wild the Great*) followed in 1743. In the interim he caused a scandal by marrying Mary Daniel, the maid of his first wife, Mary Craddock (d.1744). He was made a justice of the peace for Westminster and Middlesex in 1748 and campaigned vigorously against legal corruption, helping his half-brother, Sir John Fielding (1721–80), to found the Bow Street Runners as an embryo detective force. In 1749 *The History of Tom Jones, a Foundling* was published to public acclaim, though its reception by some literary luminaries was unenthusiastic. Dr JOHNSON called it vicious and there were those who held it responsible for two earth tremors that shook London shortly after its publication. However, it has endured as one of the great comic and picaresque novels in the English language, and COLERIDGE thought the plot one of the three most perfect ever planned. He followed it with *Amelia* in 1751. In 1752 he was heavily involved with *The Covent Garden Journal*, which contains some of his most acerbic satire. During his last years, however, illness overtook him. He was still ardent in his fight against corruption but at the age of 45 he could not move without the help of crutches. 🕮 I P Watt, *The Rise of the Novel* (1957); F H Dudden, *Henry Fielding* (2 vols, 1952)

Fields, Dorothy 1904–74
US lyricist
Born in Allenhurst, New Jersey, the daughter of the comedian Lew Fields (1867–1941), she is best known for her successful partnership with Jimmy McHugh (1894–1969), with whom she wrote 'I Can't Give You Anything But Love, Baby' for the Cotton Club revue *Blackbirds of 1928*. Their *International Revue* (1930) included 'On the Sunny Side of the Street'. Fields also wrote numbers for *Annie Get Your Gun* (1946), *A Tree Grows in Brooklyn* (1951) and *Sweet Charity* (1966); her best-know song in the last of these is 'Big Spender'.

Fields, Dame Gracie, *originally* **Grace Stansfield** 1898–1979
English variety artist and singer
Born in Rochdale, Lancashire, she first appeared on stage at the age of ten, making her London debut in 1915. She became one of the country's top music-hall attractions. Affectionately known as 'Our Gracie', she had a chirpy, natural talent and was adept at both comic songs and sentimental ballads. Her long career

spanned radio, recordings, television and films like *Sally in Our Alley* (1931), *Sing As We Go* (1934) and *Holy Matrimony* (1943). In semi-retirement from the 1950s, she won a Silvania TV award for her performance in *The Old Lady Shows Her Medals* (1956) and, in 1960, published her autobiography *Sing As We Go*. A royal favourite, she appeared in ten command performances between 1928 and 1978, the year she was created a DBE. 🕮 David Bret, *Gracie Fields: The Authorized Biography* (1995)

Fields, J(ohn) C(harles) 1863–1932
Canadian mathematician who established the Fields Medal
He was born in Hamilton and studied at the University of Toronto, graduating in 1884. In 1887 he was awarded a PhD by Johns Hopkins University, Baltimore. He taught there and in Pennsylvania before moving in 1891 to Europe, where he studied with many influential mathematicians of the time. He finally returned to the University of Toronto in 1902 and remained there throughout the rest of his career, doing much to promote mathematical research. He was appointed to the fellowships of the Royal Societies of both Canada (1909) and London (1913), and served as president of the Royal Canadian Institute (1919–25).

Fields, W C, *originally* **William Claude Dukenfield** 1880–1946
US comedian
Born in Philadelphia, he was a carnival juggler as a teenager. He moved on to vaudeville, appearing all over the USA and Europe before settling as the star attraction at the *Ziegfeld Follies* (1915–21). He made his film debut in *Pool Sharks* (1915) and appeared in many short comedies during the silent era. A bulbous nose and gravelly voice enhanced his creation of a tippling, child-hating misanthrope, continually at odds with the world. The writer and performer of several classic comedies like *It's a Gift* (1934), *The Bank Dick* (1940), *My Little Chickadee* (1940) and *Never Give a Sucker an Even Break* (1941), he also played Micawber in *David Copperfield* (1935). Illness and a reputation for being difficult restricted later creative opportunities, and his final appearance was as a guest artist in *Sensations of 1945*. 🕮 Simon Louvish, *The Man on the Flying Trapeze – the Life & Times of W C Fields* (1997)

Fiennes, Celia 1662–1741
English writer
Born at Newton Toney, near Salisbury, into a Puritan, anti-monarchist family, she travelled extensively throughout England and Scotland, on horseback and by coach, staying at inns or with relatives, and recorded vivid descriptions of her journeys. These journeys, supposedly for her health, were mostly undertaken between 1685 and 1703; during her 'Great Journey' of 1698 she travelled over 1,000 miles. Her travel diaries were first published in 1888 under the title *Through England on a Side Saddle in the time of William and Mary*, and in them she comments on towns, roads, inns, religious practices and particularly on local trade and industry. She admitted that her journeys were inspired by curiosity.

Fiennes, Ralph Nathaniel 1962–
English actor
Born in Ipswich, Suffolk, he trained at RADA and has worked with the National Theatre and the Royal Shakespeare Company, winning a Tony award for the Broadway run of the Almeida Theatre's 1995 production of *Hamlet*. His first cinema role, as Heathcliff in *Wuthering Heights* (1992), established a brooding, troubled screen presence that has been used to greater effect in his best work, such as *Schindler's List* (1993, BAFTA award), *The English Patient* (1996) and *The Constant Gardener* (2005). He is the elder brother of the film-maker Martha Fiennes and the actor Joseph Fiennes, and a cousin of the explorer SIR RANULPH FIENNES.

Fiennes, Sir Ranulph Twisleton-Wykeham 1944–
English explorer
Born in Windsor, Berkshire, he was educated at Eton, served with the Royal Scots Greys and the SAS, and fought with the Sultan of Oman's armed forces. He was the leader of six major expeditions between 1969 and 1986, including a journey up the White Nile by hovercraft, parachuting onto the Jostedal glacier in Norway (1970), travelling 4,000 miles (6,440km) up rivers in northern Canada and Alaska (1971), and journeying overland towards the North Pole (1976–78). Between 1979 and 1982 he organized the Transglobe Expedition which traced the Greenwich Meridian crossing both Poles. Since then he has made several attempts to reach the North Pole unsupported, reaching the record 88° 58′ N in 1990. In 1993 he and Dr Michael Stroud successfully completed the first-ever unsupported crossing of the Antarctic on foot. This involved walking 1,350 miles (2,172km) in 88 days, dragging sleds of supplies behind them. In 2003, shortly after undergoing heart surgery, he raised money for the British Heart Foundation by running seven marathons in seven days on seven continents, again accompanied by Stroud. His published works include the autobiography *Living Dangerously* (1987), *The Feather Men* (1991) and *The Sett* (1995). He was awarded the OBE in 1993.

Fierlinger, Zdenek 1891–1976
Czechoslovak diplomat and politician
He was appointed ambassador in Moscow in 1937 and therefore played an important role in maintaining a liaison between EDUARD BENEŠ and STALIN before, during and after the Munich Agreement and again following the Soviet entry into World War II. A Social Democrat by persuasion, he inclined increasingly to the Communist point of view, was prime minister in the interim postwar government (1945–46) and then minister of industry in KLEMENT GOTTWALD's coalition government (1946–48). In 1948 he played a crucial role in persuading most of the Social Democrats to join the Communists in taking over power and putting an end to traditional Czechoslovak democracy for more than 40 years. His influence declined particularly after Gottwald's death in 1953, but he remained useful for propaganda purposes.

Fierstein, Harvey Forbes 1954–
US playwright and actor
Born in Brooklyn, New York, he studied art at the Pratt Institute, and then entered show business as a female impersonator in gay nightclubs. A gravelly-voiced, overweight figure at this time, he made his dramatic debut as an asthmatic lesbian cleaning woman in the ANDY WARHOL play *Pork* (1971). His own plays include *In Search of the Cobra Jewels* (1973) and *Flatbush Tosca* (1975), a transvestite version of the opera. In 1976 he wrote and acted in *The International Stud*, the first of three bittersweet, semi-autobiographical plays covering the life of sardonic, incurably romantic New York drag queen Arnold Beckoff. Premiered on Broadway as *Torch Song Trilogy* (1982), it won Tony awards for Best Play and Best Actor; Fierstein also wrote and starred in the film adaptation (1988). He won a further Tony for the book of the long-running Broadway musical *La Cage Aux Folles* (1983). Later plays include *Spookhouse* (1984) and *Legs Diamond* (1989). In 2003 he won another Tony award for his performance in *Hairspray* (based on the 1988 film by John Waters); in 2005–06 he played Tevye in *Fiddler on the Roof*.

Fieschi, Count Giovanni Luigi de' c.1523–1547
Italian nobleman
He was born into an illustrious Genoese family, hereditarily at feud with the family of Admiral ANDREA DORIA, who had restored Republican government in Genoa. Fieschi, with his three brothers and others, organized a plot to overthrow Doria and establish an oligarchy. The gates of the city were forced in 1547, the fleet captured, and Doria put to flight. But Fieschi, stepping from one galley to another at night, fell overboard, and was drowned in the harbour. The scheme ended there, and Doria returned to take his revenge on the other plotters. The conspiracy is dealt with in a drama by SCHILLER.

Fieschi, Joseph 1790–1836
Corsican conspirator
Dismissed from a minor government post for fraud, with several accomplices he constructed and fired a mechanism of 25 guns at King LOUIS PHILIPPE in 1835. Eighteen people were killed, but the king escaped almost unhurt, and Fieschi was tried and executed.

Figes, Eva, *née* **Unger** 1932–
British feminist writer
Born in Berlin, she escaped from Nazi Germany and went to England in 1939, taking British nationality. She was educated at Queen Mary College, London University. Her first novel, *Equinox*, was published in 1966. Her other works include the feminist classic *Patriarchal Attitudes: Women in Society* (1970), the radio play *The True Tale of Margery Kempe* (1985), a highly acclaimed work written in 17th-century prose entitled *The Tree of Knowledge* (1990), the novel *The Tenancy* (1993) and *Tales of Innocence and Experience* (2003), about the relationship between a grandmother and her granddaughter.

Figo, Luis Filipe Madeira Caeiro 1972–
Portuguese footballer
Born in Lisbon, he played for Sporting Lisbon (1990–96) before joining Barcelona (1996–2000). An outstanding winger in the mould of ALFREDO DI STEFANO, he won numerous honours at Barcelona, including (1996) the triple of the Spanish Cup, the

Super Cup and the European Cup Winners' Cup and (as captain in 1998) the Spanish League, the cup double and the European Super Cup. In 2000 he was the subject of a world record transfer fee when he moved to Real Madrid for $56 million. He also emerged as a star player for Portugal, earning 127 caps and scoring 32 goals in internationals. He was FIFA World Player of the Year in 2001.

Figueres Ferrer, José Don Pepe 1906–90
Costa Rican politician
In 1948 he led a civilian rising against an attempt to annul the legal election of Otilio Ulate. Figueres headed a junta for 18 months, during which time he carried through fundamental reforms of a social democratic nature, including the abolition of the armed forces, nationalizing the banking system, creating an electoral law and another law promoting rural co-operatives, and the modernization of the educational and social security systems. The constitution of 1949 embodied these reforms. He was president twice (1953–58, 1970–74), and was commonly known as the person who created a regime which was strong enough to survive the buffeting of civil war in neighbouring Nicaragua and El Salvador. His son, José Maria Figueres Olsen, became president of Costa Rica in 1994.

Figuero, Ana 1908–70
Chilean feminist and political activist
Born in Santiago, she studied at the University of Chile and became a teacher. During World War II she studied at Columbia University and Colorado State College. On returning to Chile, she campaigned for women's suffrage, directed the national school system, and headed the Woman's Bureau in the Ministry of foreign affairs. Having become Chile's special envoy to the United Nations in 1951, she went on to become the first woman head of a UN committee of the General Assembly, the first woman member of the Security Committee, and the first woman assistant director-general of the International Labor Organization.

Figueroa, Leonardo de c.1650–1730
Spanish architect
Born in Seville, he was an innovative exponent of Hispanic Baroque. He was interested in surface complexity and was the first to use exposed brickwork in Seville at the Hospital de los Venerables Sacerdotes (1687–97). In the Magdalena Church in Seville (1691–1709) he used the undulant cornice for the first time in Spain in this rebuilding of a mudéjar building. His most influential and important work, which presents a glittering assembly of Figueroa's most distinctive forms, is the San Telmo doorway, Seville (1724–34), where balcony walls part in many layers to reveal a Borrominesque window (see FRANCESCO BORROMINI) beneath an oval medallion.

Filaret *See* PHILARET

Filarete, Antonio, *originally* **Antonio di Pietro Averlino** c.1400–c.1469
Florentine sculptor, architect and theorist
Born possibly in Florence, he may have trained with LORENZO GHIBERTI, though the bronze doors of Old St Peter's, Rome (c.1433–1445), his earliest surviving work, are more archaic in style than those of the Florentine Baptistry. Banished from Rome for the alleged theft of a relic, he travelled north and in 1450 settled in Milan, where he worked for FRANCESCO SFORZA (1451–65). His major project there was the Ospedale Maggiore (begun 1457), a vast enterprise never completed to his design, which introduced the concept of the centrally planned building and other Renaissance ideas to Lombardy. His remarkable *Trattato d'Architettura* (1460–64) includes a scheme for an ideal city built to a symmetrical plan, called Sforzinda.

Filchner, Wilhelm 1877–1957
German geographer and explorer
Born in Munich, he studied cartography and geography at Munich University and later worked with the Berlin Earth-Magnetic Institute and the Potsdam Astrophysics Institute. In 1910 he led the second German Antarctic expedition, and during a preparatory trip crossed and mapped Vestspitsbergen. In the ship *Deutschland* (1910–12), the expedition travelled to Vahsel Bay, the furthest south yet reached in that sector of the Antarctic. There they became stuck in the ice of the Weddell Sea, drifting for 700 miles (1,127km) northwards before escaping nine months later, having carried out useful observations of ice drift and disproving the theory of a second Antarctic continent. Filchner had travelled to Tibet (1903–05), and returned there twice more (1926–28, 1934–38), traversing the length of the region and exploring the upper Hwang Ho. He also undertook a magnetic survey of Nepal (1939–40) and established magnetic stations in China and Tibet. He lived in India during World War II, as his anti-Nazi feelings were well known, and then returned to Zurich to write.

Fildes, Sir (Samuel) Luke 1844–1927
English painter
Born in Liverpool, he became known as a woodcut designer for magazines such as *The Graphic*, the first issue of which (1869) included Fildes's illustration of homeless people. He also illustrated DICKENS's *Edwin Drood* (1870), and painted many subject pictures, such as *The Doctor* (c.1891, Tate Britain, London), which showed the reality of Victorian England. He also painted romantic scenes, for example *An Al Fresco Toilette* (1889, Leven Gallery, Port Sunlight).

Filicaia, Vincenzo da 1642–1707
Italian lyric poet
Born in Florence, he studied there and at Pisa, and held a post under the Grand Duke of Tuscany. He is remembered for his patriotic sonnets and his ode on the liberation of Vienna from the Turks (1684). 🕮 G Caponi, *Filicaia e son opere* (1901)

Fillan, St d.777
Irish churchman
He was the son of a Munster prince. He became abbot of the monastery on the Holy Loch in Argyll, Scotland, but withdrew to Upper Glendochart (Strathfillan). In 1318 ROBERT BRUCE re-established an Augustinian priory there. His square-shaped bronze bell and the quigrich, or bronze head, of his pastoral staff are in the Museum of Antiquities in Edinburgh. St Fillans, on Loch Earn, is associated with an earlier saint called 'the leper'.

Fillmore, Millard 1800–74
13th president of the USA
Born in Summer Hill, New York, the son of a farmer, he grew up in poverty but educated himself and became a lawyer. He entered New York state politics, then served in the US House of Representatives (1833–35, 1837–43), first as a member of the Anti-Masonic Party and then as a Whig. He was elected vice-president under ZACHARY TAYLOR in 1848 and became president (1850) on Taylor's death. A moderate on the slavery issue, he signed the Compromise of 1850 and tried to enforce the Fugitive Slave Act. His efforts to purge the Whig Party of radicalism alienated many in the party and led to his being passed over for the presidential nomination in 1852. Four years later he ran unsuccessfully for the presidency as the candidate of the nativist Know-Nothing (American) Party.

Filmer, Sir Robert c.1590–1653
English writer
Born in East Sutton, Kent, he was an extreme advocate of the divine right of kings in his *Patriarcha* (1680). He also strenuously opposed witch-hunting.

Finch, Alfred William 1854–1930
Finnish painter and ceramic artist
Born in Brussels, of Belgian and British parentage, he worked with GEORGES SEURAT, and was an exponent of Pointillism. He abandoned painting for ceramics and moved to Finland in 1897, where he was head of the Iris pottery at Porvoo, and served to link Finnish and European arts and crafts. He later resumed painting, in an Impressionist style.

Finch, (Frederick George) Peter Ingle 1916–77
British actor
Born in London, of Australian parents, he moved to Australia permanently during the Depression and worked in vaudeville and the newly established Australian film industry. A popular radio actor who formed his own theatre group, he was encouraged to move back to Great Britain by LAURENCE OLIVIER. Rugged and authoritative, with an off-screen reputation as a hellraiser, he gained international fame in a wide variety of film roles, including *The Nun's Story* (1959), *Far from the Madding Crowd* (1967), *Sunday, Bloody Sunday* (1971) and *Network* (1976), for which he received the first ever posthumous Academy Award.

Findlater, Andrew 1810–85
Scottish editor
Born near New Aberdour, Aberdeenshire, he graduated from Aberdeen University, and from 1842 to 1849 was headmaster of Gordon's Hospital there. He went to Edinburgh (1853) to supervise for Messrs WILLIAM and ROBERT CHAMBERS a new edition of the *Information for the People* (1857). He also edited the first edition of *Chambers' Encyclopaedia* (1860–68), and wrote manuals on astronomy, philology and physical geography.

Findlater, Jane 1866–1946
Scottish novelist
She was born in Lochearnhead, Perthshire, the daughter of a Free Church minister and sister of MARY FINDLATER. She had a great success with her first novel, *The Green Graves of Balgowrie* (1896), an 18th-century story based on family papers. It was followed by *A Daughter of Strife* (1897), *Rachel* (1899), *The Story of a Mother* (1902) and *The Ladder to the Stars* (1906). In collaboration with her sister she wrote the novel *Crossriggs* (1908) and other works. 🕮 E MacKenzie, *The Findlater Sisters* (1964)

Findlater, Mary 1865–1963
Scottish novelist
She was born in Lochearnhead, Perthshire, the sister of JANE FINDLATER. She wrote several novels of her own, including *Betty Musgrave* (1899) and *The Rose of Joy* (1903), a volume of *Songs and Sonnets* (1895), and collaborated with her sister on the novel *Crossriggs* (1908) and other works. 🕮 E Mackenzie, *The Findlater Sisters* (1964)

Fine, Anne 1947–
English novelist
She was born in Leicester and educated at Warwick University. Primarily a writer for children and teenagers, she started with such titles as *The Summer-House Loon* (1978), but made her reputation with *Goggle Eyes* (1989, published in the USA as *My War with Goggle Eyes*), a moving but witty account of a young girl coming to terms with her divorced mother's new boyfriend. This won the Carnegie Medal, as did *Flour Babies* (1993), while *Madame Doubtfire* (1987, published in the USA as *Alias Madame Doubtfire*, 1988) was turned into a successful Hollywood movie (1994, *Mrs Doubtfire*). A two-edged writer, whose characters often combine wisdom with a faint degree of malice, Fine has also written adult novels, including *The Killjoy* (1986), about obsessive love, the blackly comic *Taking the Devil's Advice* (1990) and *In Cold Domain* (1994). She was named the second Children's Laureate (2001–03) and awarded the OBE in 2003.

Finger, Godfrey, *originally* **Gottfried Finger** fl.1685–1717
Czech composer
Born in Olomuc, he went (c.1685) to England where he became a musician at the court of JAMES VII AND II. He wrote a number of instrumental works for flute and violin, and composed incidental music for the plays of WILLIAM CONGREVE and others. He left England in 1701 because of xenophobic prejudice against his work, and became a chamber musician to Queen Sophia Charlotte of Prussia (1668–1705).

Fini, Thommaso di Cristoforo *See* MASOLINO DA PANICALE

Fink, Albert 1827–97
US structural engineer
Born in Lauterbach, Germany, and educated in engineering and architecture at Darmstadt, he emigrated to the USA in 1849. He invented the Fink truss bridge (1852), which became widely used on US and other railways. Fink also carried out pioneering studies of transportation costs, which inaugurated the science of railway economics.

Finlay, Ian Hamilton 1925–2006
Scottish artist, poet and writer
Born in Nassau, the Bahamas, to Scottish parents, who returned to Scotland when he was a child, he spent a brief period at Glasgow School of Art before World War II. In the 1950s he began his career as a writer, and his writings of the early 1960s played a leading part in the foundation of the 'concrete poetry' movement. Thereafter the major theme of his art was the relationship between words and images. In 1966 he moved with his wife to a farmhouse near Dunsyre in the Pentland Hills south of Edinburgh, later named Little Sparta, and set about transforming the grounds into his personal conception of a classical garden, with sculptures and stone inscriptions carefully placed within the landscape. Like his prints, posters and other works, these were produced in collaboration with a number of skilled craftsmen. His use of Nazi symbols in his art led to accusations of far-right sympathies, which were never proved. He was awarded a CBE in 2002.

Finlayson, James 1772–1852
Scottish industrialist and philanthropist
He was born probably in Penicuik, and little is known of his early life. He is credited with having effectively founded the city of Tampere in Finland, and with setting in motion that country's industrial revolution. His travels took him from Scotland to Imperial Russia, where he became a master machinist in St Petersburg. In 1820 Tsar ALEXANDER I helped him set up a textile factory in Tammerfors (now Tampere) in the Grand Duchy of Finland. The company, now called Oy Finlayson Ab, remains Scandinavia's largest textile manufacturer. Finlayson was led by his Quaker principles to undertake philanthropic works too, for which he is remembered. Forced by ill health to sell out, he returned to Scotland in 1838. 🕮 Brian Denoon, monograph in *Aberdeen University Review*, Vol LIV, 2; No.186 (Autumn 1991)

Finley, James 1762–1828
US civil engineer
Born in Pennsylvania, he was a judge and justice of the peace when he conceived the idea of building a bridge on the suspension principle, with masonry towers and wrought-iron chains. His first bridge of 70ft (21m) span was completed in 1801, one of the earliest of its type anywhere in the world, and in 1810 a similar bridge of 244ft (73m) span was built at Newburyport on the Merrimack River. His bridges had particularly substantial decks and, unlike those of some other builders, there is no record of a Finley bridge having been blown down by strong winds.

Finnbogadóttir, Vígdis 1930–
Icelandic stateswoman
She was born in Reykjavík, and studied French language and literature at the University of Grenoble and the Sorbonne, Paris (1949–53). She returned to Iceland to work for the National Theatre. From 1962 to 1972 she taught French in senior school in Reykjavík, and French drama and theatre history at the university there. In 1980 she was persuaded to stand for the non-political office of president of Iceland, winning a narrow victory against three male candidates and becoming the first woman in history to be elected head of any state. She was returned unopposed in 1984, was re-elected in 1988 and retired in 1996. She is a UNESCO goodwill ambassador, promoting women's rights, linguistic diversity and education.

Finney, Albert 1936–
English actor
Born in Salford, Lancashire, he was a student at RADA, before making his stage debut at Birmingham in *Julius Caesar* (1956) and his London debut in *The Party* (1958). At Stratford in 1959 he appeared in *King Lear*, *Othello* and *A Midsummer Night's Dream*. He made his film debut in *The Entertainer* (1960) but it was his definitive portrayal of the working-class rebel in *Saturday Night and Sunday Morning* (1960) that established him as a star. On stage he appeared in *Billy Liar* (1960) and *Luther* (1961), joining the National Theatre in 1965 and serving as associate artistic director of the Royal Court Theatre (1972–75). On film he directed *Charlie Bubbles* (1967) and received Academy Award nominations for his appearances in *Tom Jones* (1963), *Murder on the Orient Express* (1974), *The Dresser* (1983), *Under the Volcano* (1984) and *Erin Brockovich* (2000). Other films include *Miller's Crossing* (1990) and *Big Fish* (2003). His television work includes the series *The Green Man* (1990), the DENNIS POTTER plays *Karaoke* (1996) and *Cold Lazarus* (1996), and *The Gathering Storm* (2002), for which he won BAFTA, Emmy and Golden Globe awards. 🕮 Quentin Falk, *Albert Finney: In Character* (1998)

Finney, Sir Tom (Thomas) 1922–
English footballer
Born in Preston, Lancashire, he was regarded as one of the greatest wingers ever to play football. More direct than his contemporary, Sir STANLEY MATTHEWS, he gained 76 England caps. He played for Preston North End all his footballing life, and was knighted in 1998.

Finniston, Monty, *properly* **Sir Harold Montague Finniston** 1912–91
Scottish engineer and industrialist
Born in Glasgow, he studied at Allan Glen's School in Glasgow, and went on to Glasgow University and the Royal College of Science and Technology (now Strathclyde University), where he lectured in metallurgy (1933–35). He entered the steel industry, then served in the Royal Navy Scientific Service from 1940 to 1946, and in Canada until 1947. He was chief metallurgist at the UK Atomic Energy Authority in Harwell (1948–58), then returned to industry, serving on many advisory committees. He was on the planning committee which set up the British Steel Corporation, of which he was made chief executive (1971) and later chairman (1973–76). He served on a wide range of public, educational and industry bodies, including the Policy Studies Institute (1968–84) and the Prison Reform Trust (1981–88).

Finsch, Friedrich Hermann Otto 1839–1917
German naturalist and traveller
Born in Silesia, he became assistant curator at the Dutch National Museum in Leyden, before becoming curator of the

Bremen Museum (1864–78). He travelled all over the world and published accounts of the birds in every quarter of the globe, particularly East Africa and Polynesia, but is best remembered as an expert on the parrots of the world (*Die Papageien*, 1867). In 1884 he was appointed BISMARCK's imperial commissioner to New Guinea, which led to the formation of German protectorates in the area (Kaiser Wilhelm's Land and the Bismarck Archipelago). From 1905 he was head of the ethnographical department of the Municipal Museum in Brunswick. Finsch's Wheatear was named in his honour. He was one of the greatest ornithological explorers of his age.

Finsen, Niels Ryberg 1860–1904
Danish physician, scientist and Nobel Prize winner
Born in the Faroe Islands, he studied medicine at the University of Copenhagen and was appointed demonstrator in anatomy, but soon abandoned academic medicine to pursue an interest in the therapeutic uses of light. Founding the science of phototherapy, he showed that the light-induced inflammation of the skin occurring in patients with smallpox was caused by the blue and ultraviolet parts of the spectrum, but that red and infrared rays promoted healing. An institute for the study of phototherapy was formed in Copenhagen in 1896 and placed under his direction. For many years he suffered restrictive pericarditis and he died aged 44, shortly after he was awarded the 1903 Nobel Prize in physiology or medicine.

Finzi, Gerald Raphael 1901–56
English composer
Born in London, he was introspective by nature, and was attracted to the countryside and the folk idiom, and from 1922 to 1925 he lived and worked in isolation in Gloucestershire. He then took a course in counterpoint in London, meeting GUSTAV HOLST and RALPH VAUGHAN WILLIAMS, and from 1930 to 1933 taught composition at the Royal Academy of Music. A lover of literature, he is best known for his songs, setting to music many poems by THOMAS HARDY and the metaphysical poets, sonnets by MILTON, and WORDSWORTH's ode on the *Intimations of Immortality*, which was first performed at the 1950 Three Choirs Festival. Among his orchestral compositions are the *Grand Fantasia and Toccata* (1953), and his church music includes *Lo, the Full Final Sacrifice* (1946). He did considerable research into 18th-century English music, and his fine collection of music of this period is housed at St Andrews University.

Fiorelli, Giuseppe 1823–96
Italian archaeologist
Born in Naples, he became professor of archaeology at Naples University and director of excavations from 1860 to 1875. His work at Pompeii helped preserve the ancient city. He made the first layer-by-layer excavation, working on a large scale to reveal complete buildings and blocks of the city, and devised a method for making plaster casts of the humans and animals who had been buried by the volcanic ash which covered Pompeii in AD 79. He founded a training school to teach archaeological technique, and made a particular study of the materials and building methods used in the city. Director of the National Museum at Naples from 1863, he was director-general of Italian antiquities and fine arts (1875–96).

Firbank, (Arthur Annesley) Ronald 1886–1926
English novelist
Born in London, he was educated at Cambridge, where he converted to Roman Catholicism, but left university without taking a degree and travelled extensively in Spain, Italy, the Middle East and North Africa. Sunstroke as a child left him delicate, and he was by nature solitary. He cultivated various eccentricities, such as growing a palm tree in his apartment and employing a gardener to water it twice a day. In 1905 he published two short stories in a volume entitled *Odette d'Antrevernes*, and several novels followed, among them *Vainglory* (1915), *Valmouth* (1919) and *Prancing Nigger* (1924), inspired by a visit to Haiti. His novels (written on piles of blue postcards) are slight, but witty and innovative, anticipating EVELYN WAUGH, ANTHONY POWELL and IVY COMPTON-BURNETT, and he was championed by EDITH, OSBERT and SACHEVERELL SITWELL. His last complete work before his premature death from a lung disease was *Concerning the Eccentricities of Cardinal Pirelli* (1926), in which the hero meets his end while in ardent pursuit of a choir boy. 🕮 M Berkowitz, *Ronald Firbank* (1970)

Firdausi or **Firdousi**, *pseudonym of* **Abú Al-Qásim Mansúr** c.935–c.1020
Persian poet
Born near Tús, Khorasan, he spent some years when he was about 60 at the court of MAHMUD OF GHAZNI, where he wrote his masterpiece the *Shahnáma* (1010, 'Book of Kings'), based on actual events from the annals of Persia. He also wrote a number of shorter pieces, kasidas and ghazals. His *Yusuf u Zulaykha* is based on the story of JOSEPH and Potiphar's wife. 🕮 H T Anklescriz, *Firdausi* (1934)

Fire, Andrew Zachary 1959–
US molecular biologist and Nobel Prize winner
Born in Palo Alto, California, he studied at the University of California, Berkeley, and the Massachusetts Institute of Technology. After a short stay in Cambridge, England, he joined the Carnegie Institution's Department of Embryology in Baltimore. In 2006 he shared the Nobel Prize in physiology or medicine with CRAIG MELLO for their work on RNA interference (RNAi), first published in 1998. Their discovery that some RNA molecules can be used to 'switch off' specific genes has been hailed as revolutionary, with huge potential benefits for the fight against disease. He is currently professor of pathology and genetics at Stanford University, California.

Firenzuola, Agnolo 1493–1548
Italian writer
Born in Florence, he became abbot of Prato, where he wrote the rather worldly tales in *Ragionamenti* (1525), and paraphrased the *Metamorphoses* of LUCIUS APULEIUS. He was absolved of his vows in 1526 and spent eleven years in silence, but returned to writing in the last decade of his life, including religious works.

Firestone, Harvey Samuel 1868–1938
US industrialist
Born in Columbiana, Ohio, he started by selling solid rubber carriage tyres in Chicago and in 1900 he founded the Firestone Tire and Rubber Company in Akron, Ohio, with a $10,000 investment which gave him a half interest. The company grew to be one of the biggest industrial corporations in the USA. He pioneered the pneumatic tyre for the Ford Model T, non-skid treads, and tyres for farm tractors and motor trucks. To break the monopolistic power of rubber growers in South-East Asia he started rubber plantations in Liberia in 1924. 🕮 Alfred Lief, *Harvey Firestone* (1951)

Firth, John Rupert 1890–1960
English linguist
Born in Keighley, Yorkshire, he was professor of English at the University of the Punjab, Lahore, in India from 1919 to 1928. He was senior lecturer in phonetics at University College London, (1928–38), becoming a senior lecturer in the School of Oriental and African Studies (1938) and head of the department of phonetics and linguistics there in 1941. In 1944 he was appointed professor of general linguistics at London University, the first such chair in Great Britain. In contrast to, for example, LEONARD BLOOMFIELD, he insisted that meaning was central to the study of language. He is particularly remembered for his development of prosodic phonology and the contextual theory of meaning. He wrote many articles but only two books, *Speech* (1930) and *The Tongues of Men* (1937), both deliberately written as popular works.

Firth, Mark 1819–80
English industrialist and philanthropist
He was born in Sheffield, and in 1849 with his father and brother he established there the great Norfolk steelworks. He was a munificent benefactor to Sheffield, his gifts including almshouses, a park and the Firth College (1879), now part of the university.

Firth, Sir Raymond William 1901–2002
English social anthropologist
Born and educated in Auckland, New Zealand, he studied under BRONISLAW MALINOWSKI at the London School of Economics (LSE) and carried out fieldwork (1928–29) on the island of Tikopia in the Solomon Islands. He spent two years at Sydney University before returning to England in 1932 to take up a lectureship at the LSE, becoming reader in 1935 and professor from 1944 to 1968. His major contributions were in the fields of economic anthropology, social change and anthropological theory (especially social organization). Among his monographs are *We, the Tikopia* (1936), *Primitive Polynesian Economy* (1939) and *Social Change in Tikopia* (1959). Other significant contributions include studies of Malay peasant fishermen, kinship in London, and a major work on symbolism entitled *Symbols: Public and Private* (1973). The later *Religion: a Humanist Interpretation* (1996) is a cross-cultural survey of religion as 'art', which looks at a variety of religious features (eg prayer, spirit possession and sacrifice) and examines the use of religion as a tool for economic and political manipulation.

Fischart, Johann c.1545–90
German satirist
He was born in Strasbourg. His RABELAISian works attack with inexhaustible humour the corruptions of the clergy, astrological fancies and other follies of the time. *Flöhhatz, Weibertratz* (1573) is outrageously comic and original. Essentially different are *Das glückhafft Schiff von Zürich* (in verse, 1576, 'The Lucky Ship of Zurich'), a narrative poem, and his spiritual songs. 🕮 A Hauffer, *Fischart* (1921)

Fischer, Bobby (Robert James) 1943–
US chess player
Born in Chicago, he became the first Western player to make a living solely by playing chess and was world champion from 1972 to 1975. Early in his career he won both the US junior and senior chess titles (aged 14), and dictated terms of finance and playing conditions to tournament organizers. He had many phobias, including hidden cameras, shiny chess pieces, glaring lights, restless opponents and bugged seating, but his brilliance over the board led to his achieving the highest results rating (Elo 2,785) in the history of chess. In 1972 he won the world championship title in an acrimonious battle with BORIS SPASSKY in Reykjavík, Iceland, and thereafter withdrew from competitive chess. Failure to agree terms and conditions in 1975 for a defence of his title against ANATOLI KARPOV resulted in FIDE (Fédération Internationale des Échecs) stripping him of it by default. For the next two decades Fischer lived in virtual seclusion, but in 1992 he beat Spassky in an exhibition match in Yugoslavia, violating US economic sanctions against that nation and prompting US officials to issue a warrant for his arrest. He was unable to return home, but eventually found refuge in Iceland, where he has so far evaded the US government's attempts to extradite him. 🕮 Max Euwe, *Bobby Fischer – The Greatest?* (1979)

Fischer, Edmond Henri 1920–
US biochemist and Nobel Prize winner
Born in Shanghai, China, he was educated at the universities of Geneva, Montpellier and Basel, and moved to the USA in 1953. In 1961 he became professor at the University of Washington, Seattle, where he has been professor emeritus since 1990. He studied the enzyme phosphorylase and, with EDWIN KREBS, he showed in 1955 that conversions to and from compounds of phosphorus are involved in activating glycogen phosphorylase. This fundamental mechanism controls a wide variety of processes from muscle contraction to the expression of genes, and for this work they were jointly awarded the 1992 Nobel Prize in physiology or medicine.

Fischer, Emil Hermann 1852–1919
German chemist and Nobel Prize winner
Born in Euskirchen, Prussia, he studied chemistry in Bonn. He worked with JOHANN VON BAEYER in Strassburg and Munich. In 1882 he became professor in Erlangen, then in Würzburg (1882) and finally he succeeded AUGUST VON HOFMANN in Berlin (1892). He made important studies of the chemistry of sugars. After his discovery of phenylhydrazine in 1875, he found that it reacted with aldehydes to give phenylhydrazones. By a series of related reactions, phenylhydrazine reacts with a simple sugar to give an osazone and this permits the interconversion of simple sugars. This, together with studies of optical activity, led to the elucidation of the structures of the 16 possible aldohexoses (which include glucose). Textbook diagrams of the 16 isomers are known as Fischer projections. The frequent use of phenylhydrazine impaired his health and probably shortened his life, but it was for this work that he was awarded the Nobel Prize in chemistry in 1902. With his cousin Otto Fischer he elucidated the structure of rosaniline dyes. He also made significant discoveries concerning the structures of caffeine and related compounds. From 1899 he turned his attention to proteins and later to tannins. 🕮 Edward Farber (ed), *Great Chemists* (1961)

Fischer, Ernst Otto 1918–
German organic chemist and Nobel Prize winner
Born in Solln, near Munich, he was educated at the Munich Institute of Technology, where from 1964 he held the chair of inorganic chemistry. In 1951, independently of Sir GEOFFREY WILKINSON, with whom he shared the Nobel Prize in chemistry in 1973, he deduced the structure of the synthetic compound ferrocene. Concluding that its molecule consists of a sandwich of two carbon rings with an iron atom centrally placed between them, he confirmed his theory by X-ray crystal analysis. This novel and peculiar class of organometallic sandwich compounds now numbers thousands. Fischer himself synthesized compounds from arenes, olefins, carbenes and carbonyls.

Fischer, Hans 1881–1945
German chemist and Nobel Prize winner
Born in Frankfurt am Main, he gained a PhD in chemistry from Marburg University and qualified in medicine from Munich University. Medical work in Munich was followed by chemical research in Berlin at EMIL FISCHER's institute. From Berlin he moved to Innsbruck (1916) to become professor of medical chemistry and then back to Munich as professor of organic chemistry in 1921. His most important research concerned the structure of the naturally occurring pigments haemin and chlorophyll. He was awarded the Nobel Prize in chemistry in 1930 for the synthesis of haemin.

Fischer-Dieskau, Dietrich 1925–
German baritone
Born in Berlin, he made his professional debut at Freiburg in 1947 then joined the Berlin Municipal Opera as a principal baritone, but he soon became one of the foremost interpreters of German lieder, particularly the song cycles of SCHUBERT. In 1990 he was made a Chevalier of the French Legion of Honour. 🕮 Kenneth S Whitton, *Dietrich Fischer-Dieskau* (1981)

Fischer von Erlach, Johann Bernhard 1656–1723
Austrian architect
Born in Graz, he was the founder and a principal exponent of the Austrian Baroque style. He trained in Rome under GIAN BERNINI and moved to Vienna as architect to the Habsburg court in 1687. His major works there are the Karlskirche (1716) and Hofbibliothek (1723). He also designed the Kollegienkirche in Salzburg (1707) and several palaces like the Schönbrunn Palace in Vienna (1711). He wrote a history of architecture in 1721. 🕮 H Sedlmayr, *Johann Bernhard Fischer von Erlach* (1956)

Fish, Hamilton 1808–93
US politician
Born in New York City, he graduated from Columbia College and was admitted to the Bar in 1830. After serving as a senator from New York (1851–57), he negotiated treatment and exchanges of prisoners in the Civil War. As secretary of state (1869–77) under ULYSSES S GRANT he proved himself an exceptionally skilful and far-sighted diplomat, partially redeeming an otherwise lacklustre administration. He improved relations between the USA and Great Britain, negotiating the Treaty of Washington (1871) and resolving the *Alabama* claims. He also sought to limit US expansionism and to ensure neutrality towards Cuba, and when Spanish authorities executed US sailors aboard a Cuban-owned ship, he prevented the incident from escalating into war.

Fishbein, Morris 1889–1976
US physician, writer and editor
He was born in St Louis, Missouri. Soon after receiving his medical degree from Rush Medical College, Chicago, he joined the staff of the *Journal of the American Medical Association*, where, as assistant editor (1913–24) and editor (1924–49), he gradually acquired enormous influence in US medical politics. For decades he was known as the 'voice of the AMA'. He campaigned against government involvement in medical practice and in favour of the traditional contractual fee-for-service structure. He castigated unorthodox medical practitioners and sought to increase health consciousness among lay people through his syndicated newspaper column and his *Modern Home Medical Adviser* (1935) and many other popular books.

Fisher, Allison 1968–
English snooker player
Born in Peacehaven, Sussex, she began playing snooker at the age of eight. She played on her first full-size table aged twelve, and joined the ladies' professional circuit shortly after her 15th birthday. With over 80 titles to her credit, she has won a record seven ladies' world titles, five UK titles, four British Opens, three world mixed doubles (with partner STEVE DAVIS) and a World Masters' ladies doubles with her chief rival, Stacey Hillyard. The greatest-ever female competitor in the sport, she boasts a top break of 144 and a competition best break of 133, and was also the first woman to make a televised century. In 1995 she moved to the USA, where she has enjoyed great success as a professional pool player.

Fisher, Andrew 1862–1928
Australian politician
He was born in Crosshouse, Ayrshire, Scotland, where he was a coal-miner from the age of 12, and emigrated to Queensland in 1885. From mining, he gradually moved into trade-union activity and politics, entering the Queensland state assembly in 1893 and the first federal parliament in 1901. He became

leader of the Australian Labor Party (ALP) in 1907 and then prime minister (1908–09, 1910–13, 1914–15). At the start of World War I he made the dramatic promise to support the war effort 'to the last man and the last shilling'. He was Australian High Commissioner in London (1916–21).

Fisher, Bud, *originally* **Harry Conway** 1885–1954
US strip cartoonist
Born in Chicago, he left university early to become staff cartoonist of the *San Francisco Chronicle* (1905). He introduced a regular strip, *A.Mutt*, illustrating the racing tips of a gambler named Mr A Mutt, and involving Mutt's family and cat (1907). Fisher moved to the *San Francisco Examiner*, where Jeff, Mutt's partner, was introduced in 1908, but the title did not change to *Mutt and Jeff* until 1915. In the 1920s he was the highest paid cartoonist in the world, and he later set up an animation studio and produced a weekly *Mutt and Jeff* cartoon.

Fisher, Doris
US businesswoman
She founded The Gap Inc. with her husband Donald, a San Francisco real estate developer, in 1969, because they had had enough of jeans stores that did not cater for them. The name 'Gap' refers to the generation gap of the time. Originally selling records and jeans from a small shop on the USA's west coast, Gap Inc. now has around 3,800 shops worldwide, comprising Gap, Gapkids, babyGap (sic), Banana Republic Brands and Old Navy Clothing Co. Jeans, t-shirts, khaki trousers and checked shirts are the staple stock, continuing the original idea of selling the world the affordable US lifestyle.

Fisher (of Lambeth), Geoffrey Francis Fisher, Baron 1887–1972
English prelate and Archbishop of Canterbury
Born in Higham-on-the-Hill, near Nuneaton, Warwick, and educated at Marlborough and Oxford, he was ordained in 1912 and was from 1914 to 1932 headmaster of Repton School. He was 45 when he took up his first ecclesiastical appointment as Bishop of Chester (1932). In 1939 he became Bishop of London. As Archbishop of Canterbury (1945–61) he crowned Queen ELIZABETH II in Westminster Abbey in 1953. He was created a life peer in 1961.

Fisher, Irving 1867–1947
US economist
Born in Saugerties, New York, the son of a Congregational minister, he earned a PhD in mathematics from Yale in 1891 and joined the faculty, soon switching from mathematics to political economics and remaining at the university until his retirement in 1935. He helped to make economics a more rigorously statistical science, but his interest was always in its practical applications, and much of his work was on the problem of monetary stability. He examined the relation of money supply to prices and clarified the forces of inflation. He proposed the 'compensated dollar', suggesting that by reducing or increasing the amount of gold behind the dollar in proportion to fluctuating prices, the purchasing power of the dollar could be kept virtually constant. He also devised the 'index number', an important tool for measurement in the study of price trends. His publications include *Stabilizing the Dollar* (1920) and *The Making of Index Numbers* (1922).

Fisher, St John 1469–1535
English prelate and humanist
Born in Beverley, Yorkshire, he was educated at Michaelhouse, Cambridge, of which he became Master (1497). He was made chaplain to Margaret, Countess of Richmond, HENRY VII's mother, in 1502. In 1503 he was appointed first Lady Margaret Professor of Divinity, and in 1504 chancellor of Cambridge University and Bishop of Rochester. He zealously promoted the New Learning, and advocated reformation from within. He resisted the LUTHERan schism, and in 1527 firmly pronounced against HENRY VIII's divorce from CATHERINE OF ARAGON. In 1534 he was accused of treason and, for refusing the Oath of Succession, was sent with Sir THOMAS MORE to the Tower. In May 1535 Pope PAUL III made him a cardinal, and on 17 June he was tried for refusing to recognize Henry as head of the Church of England. On 22 June he was beheaded on Tower Hill, London. He was canonized in 1935, and his feast day is 9 July.

Fisher (of Kilverstone), John Arbuthnot Fisher, 1st Baron 1841–1920
English naval commander
Born in Ceylon (Sri Lanka), he joined the navy in 1854, and served in the China Wars (1859–60) and the Egyptian War (1882). A Lord of the Admiralty from 1892 to 1897, he became commander-in-chief on the North American and West Indies station (1897–99). He was appointed First Sea Lord in 1904. He effected great improvements in naval training, and introduced Dreadnought battleships and 'Invincible' battle cruisers in preparation for war against Germany. He resigned in 1915 in protest against the Dardanelles expedition.

Fisher, M(ary) F(rances) K(ennedy), *née* **Kennedy** 1908–92
US cookery writer
Born in Albion, Michigan, and educated in California and Illinois, she moved with her first husband to California in 1935, where she took a part-time job and spent time in a library containing old cookery books, some dating from Elizabethan times, writing about what she had read. Her first published book, *Serve It Forth*, appeared in 1937, published under her initials to conceal the fact she was a woman (at the time only men wrote about food). She also translated *The Physiology of Taste* by ANTHELME BRILLAT-SAVARIN, whose philosophy she admired. Compared sometimes to that of ELIZABETH DAVID, her writing is not so much about cookery itself, but a collection of culinary essays celebrating US regional food and offering anecdotes and reflections. Her books include the wartime *How to Cook a Wolf* (1942), *The Art of Eating* (1976) and *With Bold Knife and Fork* (1979). She later became a Hollywood screenwriter and joined the American civil rights movement.

Fisher, Sir Ronald Aylmer 1890–1962
English statistician and geneticist
Born in East Finchley, London, he was educated at Harrow and Cambridge. In 1919 he became statistician at the Rothamsted Agricultural Research Institute, where he developed techniques for the design and analysis of experiments. These were expounded in his classic work *Statistical Methods for Research Workers* (1925), and have become standard in medical and biological research. The leading figure in biological and agricultural statistics in the first half of the 20th century, he also worked on genetics and evolution, and studied the genetics of human blood groups, elucidating the rhesus factor. He became professor of eugenics at University College London (1933–43) and of genetics at Cambridge (1943–57). He moved to Australia after his retirement.

Fisk, Sir Ernest Thomas 1886–1965
English pioneer of radio
Born in Sunbury-on-Thames, Middlesex, he was trained by the Marconi company as a ship's radio operator. He arrived in Australia in 1910 to demonstrate the company's equipment and became resident engineer the following year. In 1918 he successfully received a morse-code signal in Sydney from GUGLIELMO MARCONI's transmitter at Caernarvon, North Wales, the first direct radio signal between the two countries. He made the first human voice contact between Australia and England in 1924 when he spoke to Marconi in England. He had already established the Amalgamated Wireless (Australasia) Company, becoming its managing director in 1916 and chairman in 1932. He was knighted in 1937, and in 1944 resigned from AWA to return to England as managing director of EMI. He returned to Sydney on his retirement in 1951.

Fisk, James 1834–72
US financial speculator
He was born in Bennington, Vermont, and led an uncertain existence as a pedlar, waiter and circus hand before discovering the trick of success as a stockbroker in the 1860s. With Daniel Drew (1797–1879) and JAY GOULD he took part in the struggle for control of the Erie Railroad in 1868, making millions by manipulating Erie stock. A year later he and Gould attempted to corner the gold market, a scheme that was foiled by the government but which caused a disastrous drop in the market on 'Black Friday' (24 September 1869). These speculations made Fisk one of the most notorious of the robber barons, and his life of dishonourable luxury ended abruptly when he was shot by a rival in a quarrel over his mistress.

Fitch, Val Logsdon 1923–
US physicist and Nobel Prize winner
Born in Merriman, Nebraska, he was originally interested in chemistry, but after working on the Manhattan atomic bomb project at Los Alamos his interests switched to physics. He was educated at McGill and Columbia universities, and in 1954 moved to Princeton University, where he became professor in 1960 and James S McDonnell Distinguished University Professor of Physics in 1984. Using the Nevis cyclotron, Fitch and JAMES RAINWATER studied muonic atoms. These are atoms where an orbital electron is replaced by its heavier relative, the muon. From observations of one of the spectral lines (the K-line) they

deduced that the nuclear radius was smaller than had previously been believed, which was later verified in the experiments of ROBERT HOFSTADTER. In 1964, together with JAMES CRONIN and others, Fitch observed the non-conservation of the combined symmetry of parity and charge conjugation in the weak decays of neutral kaons. For this work Fitch and Cronin shared the 1980 Nobel Prize in physics. His later research has addressed the proposed existence of the so-called H-particle or hexaquark, a theoretically new state of matter.

Fitt, Gerry (Gerard) Fitt, Baron 1926–2005
Northern Ireland politician
Born in Belfast, he was a merchant seaman (1941–53) before entering local politics in 1958. He represented the Dock Division of Belfast as a Republican Labour MP in the Northern Ireland parliament from 1966 to 1972, then founded and led the Social Democratic and Labour Party (SDLP). He was an SDLP MP for nine years, resigning the leadership in 1979 to sit as an Independent Socialist. He had earlier been a member of the Northern Ireland Executive (1973–75), and was its deputy chief executive in 1974. An opponent of sectarian violence, he endured the animosity of both Republican and Loyalist extremists. He lost his Belfast seat in the 1983 general election, and the same year was made a life peer.

Fittig, Rudolf 1835–1910
German scientist
Professor of organic chemistry at Tübingen (1869) and at Strassburg (1876), he was famous for his work on organic compounds. His name is associated with the 'Wurtz–Fittig reaction' with CHARLES ADOLPHE WURTZ.

Fittipaldi, Emerson 1946–
Brazilian racing driver
Born in São Paulo, he started his career racing motorbikes and karts in his native country before moving to Europe to join the Lotus Formula One team in 1970. In only his second full season of F1 he became, at 25, the youngest-ever winner of the Drivers' Championship. He won his second title in 1974, this time with McLaren, and was runner-up a year later. After racing unsuccessfully for his brother's team, he left F1 and raced in the CART championship in the USA, winning the title in 1989.

Fitton, Mary c.1578–1647
English courtier
She became maid of honour to Queen ELIZABETH I. She was the mistress of WILLIAM HERBERT, Earl of Pembroke, in 1600, and has been identified by some as the 'dark lady' of SHAKESPEARE's Sonnets cxxvii–cliv.

Fitzball, Edward, *originally* **Edward Ball** 1792–1873
English popular dramatist
He won outstanding popularity in the 1820s for his countless fantastically staged and highly intricate melodramas. He looted his material where he chose and took wild liberties with originals, such as *The Flying Dutchman* (1827), derived from John Howison's *The Pilot*, from JAMES FENIMORE COOPER's *The Red Rover* (1829) and from EDWARD BULWER LYTTON's *Paul Clifford* (1835). His *Jonathan Bradford* (1833), based on a famous murder case, ran for 260 nights at the Surrey Theatre. He wrote a vivid autobiography, *Thirty-Five Years of a Dramatic Author's Life* (1859), which is an invaluable source for 19th-century English theatre history.

Fitzgerald, Barry, *stage name of* **William Joseph Shields** 1888–1961
Irish actor
Born in Dublin and educated at Merchant Taylor's School there, he joined the Irish civil service (1911) and, after a period of amateur acting, played in the Abbey Theatre out of office hours (1916–29) under a stage name, in conformity with civil service requirements. He became a full-time actor, toured the USA and was acclaimed as Fluther Good and Captain Boyle in SEAN O'CASEY's *The Plough and the Stars* and *Juno and the Paycock* respectively, both on stage and screen. He moved to Hollywood (1937) and made over 40 films, notably *The Long Voyage Home* (1940) and *And Then There Were None* (1945), as well as the phenomenally successful *Going My Way* (1944) and the police thriller *Naked City* (1948). He returned to Ireland to film *The Quiet Man* (1952) and *Happy Ever After* (1954), and moved back permanently in 1959.

Fitzgerald, Lord Edward 1763–98
Irish nationalist politician
Born in Carton House, County Kildare, he was a younger son of the Duke of Leinster. He served in the American Revolution (1775–83), was MP for Athy in the Irish parliament and was drawn to Paris in 1792 by the Revolution. There he renounced his title and married. He returned to Ireland in 1793 to plunge into political conspiracy. He joined the United Irishmen in 1796, and went to France to arrange for a French invasion of Ireland. The plot was betrayed and Fitzgerald, with a price of £1,000 on his head, was seized and fatally wounded in Dublin.

FitzGerald, Edward 1809–83
English scholar and poet
Born near Woodbridge, Suffolk, he was educated at Trinity College, Cambridge, where he developed close literary friendships with THACKERAY, THOMAS CARLYLE and TENNYSON. He wrote poetry, and in 1851 published *Euphranor: A Dialogue on Youth* (a comment on English education), followed by a book of aphorisms, *Polonius: A Collection of Wise Saws and Modern Instances* (1852). After studying Spanish, he published blank-verse translations in 1853 of six plays by PEDRO CALDERÓN DE LA BARCA, but he is best known for publishing (1859, anonymously at first) his free poetic translation of the *Rubáiyát of Omar Khayyám* (4th revision, 1879). He also translated AESCHYLUS and SOPHOCLES and two more plays by Calderón, and left letters, which were edited and published after his death. 🕮 J Richardson, *Edward FitzGerald* (1960)

Fitzgerald, Ella *See panel p549*

Fitzgerald, F(rancis) Scott (Key) 1896–1940
US novelist
Born in St Paul, Minnesota, he was educated at Newman School, New Jersey, and Princeton, where one of his contemporaries was EDMUND WILSON. He enlisted in the US army in World War I but never left the USA. He married Zelda Fitzgerald (*née* Sayre, 1900–47), and in 1920 published his first novel, *This Side of Paradise*, based on his experience at Princeton. He captured the spirit of the 1920s ('The Jazz Age'), especially in *The Great Gatsby* (1925), his best-known book. Other novels include *The Beautiful and Damned* (1922) and *Tender is the Night* (1934). His short stories were equally notable, published in *Flappers and Philosophers* (1920), *Tales of the Jazz Age* (1922), *All the Sad Young Men* (1926) and *Taps at Reveille* (1936). In keeping with his fiction, which revealed both a fascination with the rich and a moral dismay at the aridity of their lives, he led the strenuous life of a playboy in Europe and the USA, exhausting both his financial and emotional resources and exacerbating his wife's mental illness. He described his own problems – and those of his generation – in an influential essay, 'The Crack Up' (1935). Driven by debts and alcoholism himself, he wrote short stories for popular journals, notably the *Saturday Evening Post*, and in the same spirit went to Hollywood in 1937 as a scriptwriter, where he wrote a final, unfinished novel, *The Last Tycoon* (1941). He was largely dismissed at his death as the darling of a fatuous decade, but the durable grace and purity of his best prose have since won him a place in the canon of major American writers. 🕮 M Bruccoli, *Some Sort of Epic Grandeur: a Biography of Fitzgerald* (1981); A Mizener, *The Far Side of Paradise* (1951, rev edn 1965)

FitzGerald, Dr Garret Michael 1926–
Irish politician
He was born in London, the son of Desmond Fitzgerald, who was minister for external affairs in the Irish Free State (1922–27) and for defence (1927–32). He was educated at Belvedere College, University College and King's Inns, Dublin, became a barrister, lectured in political economy at University College, Dublin (1959–73), and was elected Fine Gael member of the Irish parliament for Dublin South-East in 1969. Minister for foreign affairs (1973–77), he then became leader of the Fine Gael Party (1977–87), and prime minister (1981–82, 1983–87). In 1985 he took part in the formulation and signing of the Anglo-Irish Agreement. In 1995 he became a Commander of the French Legion of Honour. His autobiography, *All in a Life*, was published in 1991. 🕮 Raymond Smith, *Garret: The Enigma of Dr Garret Fitzgerald* (1985)

Fitzgerald, George Francis 1851–1901
Irish physicist
He was born in Dublin and educated at home by the sister of the mathematician GEORGE BOOLE, before going to Trinity College, Dublin, to study mathematics and experimental science. In 1881 he became professor of natural and experimental philosophy, a post which he held until his death. One of the first physicists to take JAMES MAXWELL's electromagnetic theory seriously, he made important discoveries in this field and also in electrolysis and cathode rays, but his name is associated with the 'Fitzgerald–LORENTZ contraction', suggested to account

Fitzgerald, Ella (Jane) 1917–96
US jazz and popular singer

Ella Fitzgerald was born in Newport News, Virginia, and raised in New York City by her mother and stepfather. She was briefly in an orphanage after her mother's death in 1932, and even lived on the streets for a short time. She participated in talent contests in Harlem, then began her professional career with the Tiny Bradshaw Band, before moving to the Chick Webb Orchestra, where she recorded her first substantial body of songs. She made her first record in 1935 (and her last in 1992, giving her one of the longest recording histories of any artist), and had her first hit with the novelty song 'A Tisket, A Tasket' in 1938. She became the nominal leader of the band after Webb's death in 1939, and continued in that capacity until 1942.

She embarked on her solo career in earnest at that point, and worked with both swing-based musicians and the emerging bebop generation in the 1940s. In 1948, her first husband, the bass player Ray Brown, persuaded her to come onstage at one of Norman Granz's famous Jazz At The Philharmonic concerts, and by 1950 she was a regular feature on the JATP bills. Granz, initially sceptical, became the major influence on her career, and added a more commercial facet to her mastery of jazz phrasing, rhythm and scat singing, notably in the series of *Songbook* recordings of great US songwriters, which began in 1956, and brought her to a new mass audience. It is one mark of her greatness that she was able to encompass both aspects of her work throughout her long career, moving comfortably between an overtly jazz approach and a more mainstream pop vein as the occasion demanded, and often transcending throwaway material in the process.

She sang with orchestras in the later part of her career, initially at the invitation of Arthur Fielder of the famous Boston Pops, but remained equally at home with a jazz trio, and worked with some of the finest piano accompanists in jazz, including Tommy Flanagan, Jimmy Rowles and Hank Jones. The only idiom to elude her light vocal timbre and expressive singing was the blues, and she rarely ventured into that area. She appeared in cameo roles in a handful of films, including a memorable singing part in *Pete Kelly's Blues* (1955). Only LOUIS ARMSTRONG has succeeded in emerging from jazz to achieve a similar level of global recognition and popularity, and she remained a major influence on jazz and popular singing throughout her lengthy performing career, which was halted by declining health in 1992.

♫ Her copious discography includes a number of landmark records. Her early work with Chick Webb and as a soloist for the Decca label (1935–56) is now available in collected editions. From 1956, she recorded for Norman Granz's Verve label, beginning with the *Cole Porter Songbook*, the first of an important series. She recorded with DUKE ELLINGTON, COUNT BASIE, LOUIS ARMSTRONG, Nelson Riddle, and her Verve co-stars OSCAR PETERSON and Joe Pass, among many others.

🕮 S Nicholson, *Ella Fitzgerald* (1994).

> In his book *Jazz Singing*, Will Friedwald pays tribute to Fitzgerald's exceptional musical and improvisational abilities: 'There are enough sultry saloon singers and balladeers in this world; we don't need to cry all the time. We need singers like Fitzgerald to remind us that our great songwriters wrote music as well as words.'

for the negative result of the MICHELSON–MORLEY experiment. It was one of the steps that eventually led to EINSTEIN's theory of relativity, which provided a new physical description of the contraction of bodies when moving at high speed relative to an observer. Elected Fellow of the Royal Society in 1883, he was awarded the Royal Society's Royal Medal in 1889.

Fitzgerald, Gerald, 8th Earl of Kildare, *known as the* **Great Earl** d.1513
Irish political leader
He succeeded to the title in 1477, and was appointed Lord Deputy by EDWARD IV in 1481 and retained by RICHARD III and, for a time, by HENRY VII. He was suspected of plotting against the Crown and was ousted from his command, convicted of treason before a parliament in Drogheda (1494), and sent to the Tower while Sir EDWARD POYNINGS was Deputy. He was pardoned two years later and made Deputy again, and presided over the first Irish parliament held under Poynings's Act in 1498. He defeated Southern chieftains at Knockdoe, County Galway, in 1505, but died of wounds during a campaign against Gaelic rebels.

Fitzgerald, Gerald, 9th Earl of Kildare, *known as* **the Young** 1487–1534
Irish political leader
The son of GERALD FITZGERALD, 8th Earl, he was educated in England as a hostage for his father, whose return to full trust was symbolized by his own return to Ireland in 1504 and appointment as Lord High Treasurer. He succeeded his father as earl and Lord Deputy in 1513. He fell foul of THOMAS WOLSEY, but survived this and other attempts at his overthrow in 1519 and 1526. He was wounded in battle and became vulnerable to a second group of enemies, the Butlers of Ormond, relatives of the new Queen ANNE BOLEYN. On their instigation he was summoned to London, where he died in the Tower.

Fitzgerald, Penelope Mary, *née* **Knox** 1916–2000
English writer
Born in Lincoln, the daughter of *Punch* editor Edward Knox, she was educated at Oxford and worked for the BBC during World War II. Her literary career began at age 59 with her biography of EDWARD BURNE-JONES (1975). Her first novel, *The Golden Child* (1977), was followed by *The Bookshop* (1978), short-listed for the Booker Prize, and *Offshore* (1979), which won that prize. Other novels include *Human Voices* (1980), *Innocence* (1986) and *The Blue Flower*, which won the National Book Critics Circle Prize in the USA. She also published biographies of her own father and uncles (*The Knox Brothers*, 1977) and of the British poet Charlotte Mew (1984).

Fitzgerald, Thomas, 10th Earl of Kildare, *known as* **Silken Thomas** 1513–37
Irish political leader
Son of GERALD FITZGERALD, 9th Earl, he was made acting Deputy by his father on the latter's final summons to England in 1534. On hearing rumours that his father had been executed in London, he renounced his allegiance to HENRY VIII, attacked Dublin Castle unsuccessfully, lost his base at Maynooth and surrendered on a guarantee of personal safety from the English commander. He was imprisoned in the Tower and hanged, drawn and quartered with his five uncles at Tyburn.

Fitzgibbon, John, 1st Earl of Clare 1749–1802
Irish Unionist politician
Born near Donnybrook, Dublin, he studied at Trinity College, Dublin, and Christ Church, Oxford, and was called to the Irish Bar in 1772. He entered the Irish House of Commons in 1778 and became Irish Attorney-General in 1783. In 1789 he was appointed the first native to be Lord Chancellor of Ireland for almost a century, raised to the peerage as Baron Fitzgibbon and later promoted, receiving his earldom in 1795 and a British peerage as Lord Fitzgibbon of Sidbury (Devonshire) in 1799. He resisted concessions to Irish Catholic sentiment, played a part in the ousting of Lord Lieutenant Fitzwilliam in 1795, and was a prominent supporter of the Act of Union of the British and Irish parliaments (1800). At his funeral in Dublin his coffin was pelted with dead cats.

Fitzherbert, Mrs Maria Anne, *née* **Smythe** 1756–1837
English wife of George IV
Born into a Roman Catholic family in Hampshire, she was widowed for the second time in 1781 and secretly married the Prince of Wales, later GEORGE IV (1785). This marriage, contracted without King GEORGE III's consent, was invalid under the Royal Marriage Act (1772) and the prince afterwards denied that there had been a marriage at all. On his marriage to Princess CAROLINE OF BRUNSWICK (1795) the connection was interrupted, but it was later resumed with the pope's consent, and finally broken off in 1803.

Fitzjames, James *See* BERWICK, 1ST DUKE OF

Fitz-John *See* WINTHROP, JOHN

Fitzpatrick, Sean (Brian Thomas) 1963–
New Zealand rugby union player
Born in Auckland, he is New Zealand's most capped player, with a total of 128 caps. From 1986 he was a mainstay of the All Black front row, becoming the world's most capped hooker, and his ability to avoid injury enabled him to set a world record of 63

consecutive caps (1986–95). He first captained New Zealand in 1992 and went on to play a total of 51 caps as captain (1992–97). At one time he was considered to be the world's best lineout thrower and he was the first hooker to play over 100 times for his home team, Auckland, since his debut in 1984. Since retirement from playing, he has worked as a television commentator on the game and has coached New Zealand Colts sides.

Fitzroy, Sir Charles Augustus 1796–1858
English administrator
Born in Shipley Hall, Derbyshire, the second son of the 3rd Duke of Grafton, he married a daughter of the 4th Duke of Richmond. He secured rapid preferment via his many ducal connections, first in 1837 as lieutenant-governor of Prince Edward Island and then from 1841 to 1845 as lieutenant-governor of the Leeward Islands in the Caribbean. He was appointed governor-in-chief of New South Wales in 1846. He was soon faced with disputes between the various Australian colonies and he recommended to the British parliament that some superior post should be established in Australia to which such matters could be referred. In 1851 he received the commission of 'Governor-General of All Her Majesty's Australian Possessions', thus paving the way for the federation of Australian colonies 50 years later. His period of office was marked by a number of key constitutional innovations: the separation from New South Wales of the new colony of Victoria, the establishment of legislative councils there, in Tasmania, and in South and Western Australia, and a constitution conferring responsible government upon New South Wales.

Fitzroy, Robert 1805–65
English naval officer and meteorologist
Born at Ampton Hall, Suffolk, he was educated at Royal Naval College (1819–28), and as commander of the *Beagle* he surveyed the coasts of South America (1828–30). In 1831 he circumnavigated the globe in the *Beagle* accompanied by CHARLES DARWIN, with whom he collaborated in publishing *Narrative of the Surveying Voyages of HMS Adventure and Beagle* (1839). He was made governor of New Zealand (1843–45) and was elected FRS in 1851. In 1854 he was attached to the meteorological department of the Board of Trade and became the first director of the Meteorological Office (1855). He set up a network of telegraph stations for the rapid collection of meteorological observations and was a pioneer in making weather charts. For these he introduced a set of symbols for wind speed and direction, pressure and temperature, and he invented the term 'synoptic chart'. Using these charts he began a system of gale warnings for shipping. He went on to produce weather forecasts for the press, but these attracted considerable opposition. He wrote *The Weather Book* (1863), which contains pictures of storms remarkably like present-day satellite pictures. He analysed the famous Royal Charter storm of 1859. He also invented the 'Fitzroy barometer' and was awarded the gold medal of the Royal Geographical Society.

Fitzwilliam (of Meryon), Richard, 7th Viscount 1745–1816
Irish peer
He was founder by bequest of the Fitzwilliam Museum in Cambridge.

Five, Kaci Kullmann 1951–
Norwegian politician
Born in Oslo, she was deputy chairman of the Conservative Party from 1977 to 1981, when she first entered the Storting, and vice-chair of the parliamentary party until her appointment as minister of trade and shipping (1989) in the right-wing coalition that collapsed in 1990. In 1991 she was elected leader, in the expectation that she would breathe new life into the main opposition party after five years of decline under three elderly male leaders; however, she resigned as party leader in 1994, and left politics in 1997. She subsequently worked as a public affairs advisor, and a board director for the petroleum company Statoil.

Fizeau, Armand Hippolyte Louis 1819–96
French physicist
Born in Paris, he cut short his medical studies because of poor health and moved into the physical sciences, being greatly influenced by the lectures of FRANÇOIS ARAGO. He collaborated with JEAN FOUCAULT to obtain the first detailed photographic image of the Sun (1845). In 1849 Fizeau was the first to measure the velocity of light by a laboratory experiment in which a ray of light was cut by a toothed wheel, producing intermittent flashes. His estimate was not as accurate as that produced by astronomical calculations, but he showed the practicability of this approach. He also demonstrated the use of the shift in light frequency (the 'red-shift') in determining a star's velocity, although, unknown to him, CHRISTIAN DOPPLER had already published this effect.

Flaccus, Aulus Persius *See* PERSIUS

Flagstad, Kirsten 1895–1962
Norwegian soprano
Born in Hamar, she studied in Stockholm and Oslo, where she made her operatic debut in 1913. She distinguished herself in WAGNERian roles such as Sieglinde at Bayreuth (1934) and Isolde in New York (1935), and was acclaimed in most of the world's major opera houses. In 1958 she was made director of the Norwegian State Opera. 🕮 Edwin McArthur, *Flagstad: A Personal Memoir* (1965)

Flahaut de la Billarderie, Auguste Charles Joseph, Comte de 1785–1870
French soldier and diplomat
Believed to be the illegitimate son of TALLEYRAND, he fought under NAPOLEON I. He was the lover of Napoleon's sister, Caroline Murat, and of Napoleon's stepdaughter, HORTENSE DE BEAUHARNAIS, whose son by him became the Duc de MORNY. In exile after Waterloo, he married the Baroness Keith and Nairne (1788–1867). After 1830 he returned to France, was ambassador at Vienna (1842–48) and London (1860–62), and was Grand Chancellor of the Legion of Honour.

Flaherty, Robert Joseph 1884–1951
US pioneer documentary film-maker and explorer
Born in Iron Mountain, Michigan, and brought up in Canada, he trained as a mining prospector. He took a movie camera on his expeditions to Hudson Bay in 1913, and made the silent *Nanook of the North* (1922, the story of an Inuit family), followed by a documentary about the South Seas, *Moana* (1926), and *Tabu* (1931, with F W Murnau). His last great success was *Louisiana Story* (1948). He also produced *Man of Aran* in Ireland (1932–34) and *Elephant Boy* (1937). 🕮 Francis H Flaherty, *The Odyssey of a Film-maker: Robert Flaherty's Story* (1953)

Flambard, Rannulf or **Ralph** d.1128
Norman ecclesiastic and Justiciar of England under William II
He was Bishop of Durham in 1099. He raised money to fund King WILLIAM II's vices and extravagances by oppressive extortion of the people.

Flaminius, Gaius d.217 BC
Roman general
Consul in 223 BC, he distributed the Ager Gallicus tribal lands left uninhabited since 283 BC. He was the first Roman commander to cross the Po when he defeated the Insubres at the Addua (223 BC). He extended his road, the Via Flaminia, from Rome to Ariminum (Rimini) in 220 BC, and built the Circus Flaminius (the biggest arena for chariot-racing in Republican times). Consul again in 217 BC, he tried to stem HANNIBAL's invasion of Etruria but was defeated and killed at Lake Trasimene.

Flammarion, Nicolas Camille 1842–1925
French astronomer
Born in Montigny-le-Roi, Haute-Marne, he became an apprentice astronomer at the age of 16 at the Paris Observatoire. He left in 1882 to establish *L'Astronomie*, a monthly magazine. He founded the observatory of Juvisy-sur-Orge in 1883 and the French Astronomical Society in 1887. He is also remembered as a popularizer of astronomy. Among his many books, *L'Astronomie populaire* (1879, Eng trans *Popular Astronomy*, 1907) is the best known and was translated into many languages. He was convinced that there were many life forms in the universe, a proposition that he developed in his first book, *La Pluralité des mondes habités* (1862).

Flamsteed, John 1646–1719
English astronomer
Born in Denby, near Derby, he was the only son of a maltster. Following early astronomical studies pursued privately and a spell at Cambridge (1671–74), he was appointed to a commission concerned with finding longitude at sea. The commission's report induced King CHARLES II to found a national observatory at Greenwich, which was built in 1675–76 with Flamsteed as director and first Astronomer Royal. With a salary of only £100, no assistant and imperfect instruments assembled at his own expense, he was in a difficult position until his private financial circumstances improved in the 1680s. He then acquired from an instrument-maker, Abraham Sharp, a mural arc with which he started an immense programme of stellar positional observations. Aiming at the

highest possible accuracy, he was slow with the reductions of his observations, much to the annoyance of ISAAC NEWTON, who claimed that he needed them for the perfection of his lunar theory. After much commotion, the *Historia Coelestis*, embodying the first Greenwich star catalogue, was printed in 1712 under the editorship of EDMOND HALLEY. Flamsteed, denouncing the production as surreptitious, burnt 300 copies of it. He pressed for an adequate publication of his work, but died before its 1725 completion as the *Historia Coelestis Britannica*. Its three volumes were supplemented by the *Atlas Coelestis*, published by Abraham Sharp and Flamsteed's assistant Joseph Crosthwait in 1729. 🕮 Francis Baily, *An Account of the Rev John Flamsteed and Supplement to the Account* (1935)

Flanagan, Barry 1941–
British sculptor
Born in Prestatyn, North Wales, he worked gilding picture frames in London before training at St Martin's School of Art. He at first reacted against the then vogue for steel, experimenting instead with stuffed hessian, as in *aaing j gni aa* (1965), and sand poured into tubes of cloth, as in *Four Casb* (1967). After 1975, however, he returned to stone and gilded bronze carving. He was a prize-winner at the Venice Biennale in 1982. He demonstrated an impish humour and an affinity with animals in works like *A Nose in Repose* (Tate, London), his *Leaping Hare* series of the 1980s, the *Unicorn and Oak Tree* (1991, Royal Academy) and his *Field Day* horses of 1996. He became a member of the Royal Academy in 1991 and was awarded an OBE the same year.

Flanders, Michael 1922–75
English entertainer and writer
Born in London, he was confined to a wheelchair by polio from 1943. He contributed words and lyrics to a number of London revues during the 1950s, including *Penny Plain* (1951) and *Airs on a Shoestring* (1953), and co-translated STRAVINSKY's *The Soldier's Tale* for the Edinburgh Festival (1954). In 1956 he wrote the words and lyrics, and DONALD SWANN the music, for *At the Drop of a Hat* in which they both made their names. It was followed by *At the Drop of Another Hat* (1963).

Flandrin, Jean Hippolyte 1809–64
French painter
Born in Lyons, he won the Prix de Rome in 1830, and in 1842 began frescoes in the church of St Germain-des-Prés, Paris. He also executed many fine portraits.

Flanner, Janet, *pseudonym* **Genêt** 1892–1978
US journalist and novelist
Born in Indianapolis, Indiana, she settled in Paris in 1922, and for half a century (1925–75) she served as the Paris correspondent for *The New Yorker*, reporting on French life and culture in her bi-weekly 'Letter from Paris'. She was a leading member of the influential coterie of (mostly) homosexual women which included NATALIE BARNEY and DJUNA BARNES. She wrote pieces from elsewhere in Europe as well as profiles of famous people, and her journalism is of lasting historical value, providing a social and political anatomy of her era enlivened by her insight into human character and her novelistic eye for detail. Her writings are collected in books such as *An American in Paris* (1940), *Paris Journal, 1944–1965* (1965) and *Janet Flanner's World* (1979). 🕮 S Weinstock, *Women of the Left Bank* (1986); I Drutman (ed), *Janet Flanner's World: Uncollected Writings, 1932–1975* (1979)

Flather (of Windsor), Shreela Flather, Baroness, *née* **Rai** 1938–
British politician
Born in Lahore, India (now in Pakistan), she attended University College London, and was called to the Bar in 1962. After working as a teacher, she entered politics in 1976 as the first female member of an ethnic minority in Great Britain to be elected a councillor, and has since served on numerous advisory committees concerned with prison reform, housing, social services and ethnic rights. She was a member of the Commission for Racial Equality from 1980 to 1986, in which year she was elected mayor of Windsor and Maidenhead. In 1987, she was chosen as UK delegate to the European Community's economic and social committee. She became Britain's first Asian woman life peer in 1990.

Flatt and **Scruggs**, *in full* **Lester Flatt** 1914–79 and **Earl (Eugene) Scruggs** 1924–
US bluegrass and country music artists
Guitarist Flatt was born in Overton County, Tennessee, and banjo virtuoso Scruggs was born in Cleveland County, North Carolina. They met as members of BILL MONROE's Bluegrass Boys in 1945, and went on to be a hugely influential partnership in both bluegrass and country music from 1948. They evolved a more commercial approach to bluegrass music in the 1950s, and found a substantial new audience on the folk and college circuits in the 1960s. They parted company in 1969, with Flatt continuing in bluegrass, and Scruggs forming his more rock-oriented Earl Scruggs Revue.

Flaubert, Gustave 1821–80
French novelist
Born in Rouen, the son of a doctor, he reluctantly studied law at Paris, where his friendship with VICTOR HUGO, the writer Maxime du Camp (1822–94) and the poet Louise Colet (1810–76), his lover from 1846 to 1854, stimulated his already apparent talent for writing. As a young man he was afflicted by a nervous disease, which may to some extent account for the morbidity and pessimism which characterize much of his work. This, together with a violent contempt for bourgeois society, is revealed in his best-known novel, *Madame Bovary* (1857, Eng trans 1881). The book achieved a succès de scandale after it had been condemned as immoral and its author prosecuted (unsuccessfully), but it has held its place among the classics. His second work, *Salammbô* (1862, Eng trans 1886), was followed by *L'Éducation sentimentale* (1869, Eng trans *Sentimental Education*, 1896) and *La Tentation de St Antoine* (1874, Eng trans *The Temptation of St Anthony*, 1895), a masterpiece of its kind. *Trois contes: Un Cœur simple, La Légende de Saint Julien l'Hospitalier, Hérodias* (1877, Eng trans *Stories*, 1903) reveals his mastery of the short story and foreshadows the work of GUY DE MAUPASSANT. *Bouvard et Pécuchet* (1881, Eng trans *Bouvard and Pecuchet*, 1896) and his correspondence with GEORGE SAND (1884) were published posthumously. He brought to the novel a new awareness of form, structure and aesthetic detachment. 🕮 Frederick Brown, *Flaubert: A Life* (2006)

Flavell, Richard Anthony 1945–
British molecular biologist
Educated at the University of Hull, he was appointed Royal Society European Fellow at the University of Amsterdam, and Postdoctoral Fellow at the University of Zurich. During 1973–79 he worked at the University of Amsterdam, and he subsequently became head of the Laboratory of Gene Structure and Expression at the National Institutes of Medical Research, Mill Hill, London (1979–82). He was the president of Biogen Corporation (1982–88), and since 1988 has been professor at Yale University School of Medicine. He was elected FRS in 1984. He is best known for his examinations of the structure of the human globin genes, particularly with regard to genetic defects for different groups of anaemias. Work of this kind on naturally occurring mutations has been invaluable in identifying DNA sequences which regulate globin gene control, and has been used to prove the role of precise DNA elements and thus allow the introduction of gene therapy as a treatment for these anaemias. He has also conducted groundbreaking research into the systems which regulate normal cell death. He was awarded the Colworth Medal in 1990 by the American Association of Immunologists, and elected to the National Academy of Science in 2002.

Flavin, Dan 1933–96
US artist
Born in New York City, he attended the US Air Force Meteorological Technician Training School, Maryland University and the New York School of Social Research, but had no art education. In 1961 he began to make his 'electric light icons', fluorescent tubes hung on walls or set up as free-standing 'proposals' (he preferred this term to 'sculptures'). His work has been described by some critics as 'Luminism', and has obvious links with Minimalism, for example his *Monument for V Tatlin* (1966–69). In 1969 he exhibited in Ottawa, Canada. He continued to create his mystical and serene light sculptures for three decades. In 1983 he established the Dan Flavin Art Institute in New York.

Flaxman, John 1755–1826
English sculptor and draughtsman
Born in York, he displayed an early talent for drawing and modelling, and in 1769 became a student at the Royal Academy of Art, London. His style was neoclassical, and he worked for twelve years, from 1775, as a designer for JOSIAH WEDGWOOD. He then directed the Wedgwood studio in Rome (1787–94), where he also executed several classical groups and began his drawings for the *Iliad* and *Odyssey* (published in 1793), the tragedies of AESCHYLUS (1795) and DANTE's *Divine Comedy* (1787). In 1810 he was appointed the first professor of sculpture at the Royal Academy. His sculptures include monuments to the Earl of Mansfield (1795–1801, Westminster Abbey, London), to the

Fleming, Sir Alexander 1881–1955

Scottish bacteriologist, and the discoverer in 1928 of penicillin

Alexander Fleming was born near Darvel, Ayrshire, and educated in Kilmarnock. He worked as a shipping clerk in London for five years before embarking on a brilliant medical studentship, qualifying as a specialist surgeon at St Mary's Hospital, Paddington (1909), where he spent the rest of his career. It was only by his expert marksmanship in the college rifle team, however, that he managed to find a place in Sir ALMROTH WRIGHT's bacteriological laboratory there.

In his research he became the first to use anti-typhoid vaccines on human beings, and pioneered the use of salvarsan against syphilis (see PAUL EHRLICH). During World War I he served as a medical officer in France and continued researching antibiotics, and in 1922, while trying unsuccessfully to isolate the organism responsible for the common cold, he discovered lysozyme, an enzyme present in tears and mucus that kills some bacteria without harming normal tissues. While this was not an important antibiotic in itself, as most of the bacteria killed were non-pathogenic, it inspired Fleming's search for other antibacterial substances.

In 1928 by chance exposure of a culture of *staphylococci* he noticed a curious mould, penicillin, which he found to have unsurpassed antibiotic powers. Unheeded by colleagues and without sufficient chemical knowledge, he had to wait eleven years before two brilliant experimentalists at the William Dunn School of Pathology at Oxford, HOWARD FLOREY and ERNST CHAIN, with whom he shared the 1945 Nobel Prize in physiology or medicine, perfected a method of producing the volatile drug. Fleming was appointed professor of bacteriology at London in 1938, elected FRS in 1943 and knighted in 1944.

📖 John Malkin, *Sir Alexander Fleming* (1985); Gwyn MacFarlane, *Alexander Fleming* (1985); André Maurois, *The Life of Sir Alexander Fleming* (trans 1959); John Rowland, *The Penicillin Man* (1957).

poet WILLIAM COLLINS (1795, Chichester Cathedral), to the poet THOMAS CHATTERTON (St Mary Redcliffe, Bristol) and to Lord NELSON (1808–18, St Paul's Cathedral, London). He also created statues of ROBERT BURNS (1822, National Portrait Gallery, Edinburgh) and JOHN KEMBLE (1823, Westminster Abbey).

Fleck, Alexander Fleck, Baron 1889–1968

Scottish physical and industrial chemist

Born in Glasgow, he attended Glasgow University and lectured there for two years before working on radium with FREDERICK SODDY. In 1917 he was appointed chief chemist to the Castner–Kellner Co. at Wallsend-on-Tyne. In 1937 he became chairman of the Billingham division of Imperial Chemical Industries and in 1953 chairman of the whole company; he retired from ICI in 1960. He was also chairman of Scottish Agricultural Industries (1947–51) and deputy chairman of African Explosives and Chemical Industries Ltd (1953–60). He was a prominent member of many government committees and chaired the committee which investigated the nationalized coal industry from 1953 to 1955. Elected FRS and knighted in 1955, he was created a baron in 1961.

Flecker, James Elroy 1884–1915

English poet

Born in Lewisham, London, he was educated at Uppingham, and studied Oriental languages at Trinity College, Cambridge, then entered the consular service. He was posted first to Constantinople (Istanbul) and then to Beirut. He wrote two posthumously published verse dramas, *Hassan* (staged 1923) and *Don Juan* (1925), and published several volumes of verse, *The Bridge of Fire* (1907), *The Golden Journey to Samarkand* (1913) and *Old Ships* (1915). His *Collected Poems* appeared in 1947. 📖 G E Hodgson, *James Elroy Flecker* (1925)

Flecknoe, Richard c.1600–c.1678

Irish poet

After travelling (1640–50) in Europe, Asia, Africa and Brazil, he went to London, where he wrote five plays, and published his *Short Discourse on the English Stage* (1664). This provoked DRYDEN to caricature him as 'MacFlecknoe' in his satire on THOMAS SHADWELL, and inspired a good-humoured lampoon by ANDREW MARVELL.

Fleetwood, Charles c.1618–1692

English soldier

He was born in Northamptonshire. After commanding a cavalry regiment at the Battle of Naseby (1645), he was elected MP for Marlborough (1646). He commanded the Parliamentary forces in England before the Battle of Worcester (1651) and became commander-in-chief in Ireland (1652–55). He married CROMWELL's daughter, the widow of HENRY IRETON, in 1652. He was commander-in-chief in 1659, but had to give way to GEORGE MONK, Duke of Albermarle, and was deprived of office at the Restoration.

Fleetwood Mac

British–US pop group

Originally an English cult blues group, Fleetwood Mac gradually transformed itself into a British–US rock band. Early line-ups reflected the blues purism of English founder members drummer Mick Fleetwood (1942–) and guitarist Peter Green (1946–). Green's haunting lines made the instrumental 'Albatross' (1968) a hit at a time when the group seemed to be drifting towards a middle-of-the-road pop approach. After 'Man of the World' (1969), 'Oh Well' (1969) and the proto-heavy-metal surrealism of 'Green Manalishi (With the Two-Pronged Crown)' (1970), Green left and was replaced by former Chicken Shack vocalist Christine McVie (1945– , born Christine Perfect, wife of the group's bass player). Various personnel changes took place and during the early 1970s the group became Americanized, hiring Lindsay Buckingham (1947–) and singer Stevie Nicks (1948–), who helped create the smooth, high-finish rock of *Fleetwood Mac* (1975) and then *Rumours* (1976), which topped the charts in the UK and USA. Legal, contractual and 'relationship' problems abounded (there were at one point two Fleetwood Macs, moving obscurely amid a blizzard of writs) and the music became progressively tamer. Their early material is still highly rated. Mick Fleetwood published *Fleetwood* in 1990.

Fleischer, Max 1883–1972

US cartoonist, inventor and animated-film producer

Born in Vienna, Austria, he was taken to New York City at the age of four. Joining the staff of *Brooklyn Eagle* (1900) as errand boy, he soon moved to the art department. As art editor of *Popular Science* (1914) he developed an inventive talent, and his invention, the rotoscope (patented 1917), is still used for transferring live-action film into animated cartoon via tracing. With his brother Dave (1894–1979) he produced many *Out Of The Inkwell* films, which combined live action with animation. The brothers also created the 'bouncing-ball' singalong cartoons, silent but synchronized to the cinema orchestras. Having made the first experimental sound-on-film cartoons in the mid-1920s, Max went on to produce the *Betty Boop Talkartoons* (1930) and his best-remembered series, *Popeye the Sailor* (1933), from the strips by EZIE CRISLER SEGAR, followed by the feature-length cartoons *Gulliver's Travels* (1939) and *Mr Bug Goes to Town* (1941).

Flémalle, Master of *See* CAMPIN, ROBERT

Fleming, Sir Alexander *See panel above*

Fleming, Amalia, *née* Coutsouris 1909–86

Greek–British bacteriologist and politician

Born in Constantinople (now Istanbul) to Greek parents, she studied medicine at Athens University. During World War II she joined the Resistance, was captured, sentenced to death, and rescued by the Allied advance. After the War she went to London, where she worked at the Wright–Fleming Institute with Sir ALEXANDER FLEMING, whom she married in 1953. After his death, she continued her research as a bacteriologist. Returning to Greece in 1967, she protested against the military regime which had seized power. Arrested in 1971, she was deported to London. She returned to Greece in 1973, becoming an MP, a European member of parliament, leader of the Greek committee of Amnesty International and a member of the European Human Rights Commission.

Fleming, Ian Lancaster 1908–64

English novelist

Born in London, he was educated at Eton and Sandhurst, studied languages at Munich and Geneva universities, then worked as a foreign correspondent with Reuters in Moscow (1929–33) and as a banker and stockbroker (1933–39). He was a senior naval intelligence officer during World War II, and then

became the foreign manager of *The Sunday Times* (1945–59). His varied career gave him the background for a series of twelve novels and seven short stories featuring Commander James Bond, the archetypal, suave British Secret Service agent 007, starting with *Casino Royale* (1953) and including *From Russia with Love* (1957), *Dr No* (1958), *Goldfinger* (1959), *Thunderball* (1961) and *The Man with the Golden Gun* (1965). They sold millions of copies worldwide, and have been turned into highly successful films. He was the brother of PETER FLEMING. 🕮 J Pearson, *The Life of Ian Fleming* (1966)

Fleming, Sir John Ambrose 1849–1945
English physicist and electrical engineer
Born in Lancaster, he won an entrance exhibition to St John's College, Cambridge, where he studied under JAMES CLERK MAXWELL. After three years at University College, Nottingham, he was appointed as a consultant to the Edison Electric Light Company, and he also served for 26 years as consultant to the Marconi Wireless Telegraph Company. During his tenure of the chair of electrical engineering at University College London (1885–1926), he invented in 1904 the thermionic rectifier or 'Fleming valve', which for half a century was a vital part of radio, television and early computer circuitry, until superseded by the transistor diode in the early 1950s. He was also a pioneer in the application of electricity to lighting and heating on a large scale. He was elected FRS in 1892, and knighted in 1929. 🕮 J T MacGregor-Morris, *The Inventor of the Valve* (1954)

Fleming, Paul 1609–40
German lyric poet
Born in Hartenstein, he was the first German to use the sonnet form, and is best known for his lyrical and religious poetry in *Teutsche Poemata* (1642, 'German Poems') and *Geist- und weltliche Poemata* (1651, 'Spiritual and Worldly Poems'). His love poems, inspired by Elsabe Niehusen, are for their time unusually sincere and direct in feeling and expression.

Fleming, Peggy 1948–
US figure skater, winner of the only gold medal won by the USA in the 1968 Olympics
Born in San José, California, she became the youngest woman ever to win the women's national senior championships in 1963, a victory that was to be the first of five consecutive wins. Three years later she won the world figure-skating championship, the first American woman to win the competition in more than a decade, and successfully defended her title for the next two years. After retiring from amateur competition in 1968, she launched a successful commercial career.

Fleming, (Robert) Peter 1907–71
English travel writer and journalist
He was born in London. Educated at Eton and Christ Church, Oxford, he took a stop-gap job in the Economic Advisory Council before being appointed assistant literary editor of *The Spectator*. In 1932 he read an advert in *The Times* for members to make up an expedition to explore rivers in central Brazil and ascertain the fate of PERCY FAWCETT, who had disappeared without trace in 1925. It provided the colourful copy which surfaced in *Brazilian Adventure* (1933), a landmark in travel literature and an immediate bestseller. In a similar vein are *One's Company* (1934) and *News From Tartary* (1936), an account of 'an undeservedly successful attempt' to travel overland from Peking to Kashmir. He was the brother of IAN FLEMING. 🕮 D Hart-Davis, *Peter Fleming: A Biography* (1986)

Fleming, Sir Sandford 1827–1915
Canadian railway engineer
Born in Kirkcaldy, Scotland, he went to Canada in 1845, and became chief engineer of the Inter-colonial Railway (1867–76) and of the Canadian Pacific Railway (1872–80). He surveyed such famous routes as Yellowhead and Kicking Horse passes, and in 1884 devised the internationally adopted system of standard time or 'time zones'.

Fleming, Tom 1927–
Scottish actor, director and poet
Born in Edinburgh, he made his first speaking appearance as Bruce McRae in EMLYN WILLIAMS's *The Late Christopher Bean* during a tour of India in 1945. He co-founded the Gateway Theatre, Edinburgh (1953), and until 1962 appeared in and directed many productions there. He joined the Royal Shakespeare Company (1962), appearing in the title role in *Cymbeline*, and the following year returned to Stratford-upon-Avon to play Prospero in *The Tempest*. In 1965 he was appointed the first director of the Edinburgh Civic Theatre Trust, and founded a new company at the Royal Lyceum Theatre in the city. He revived DAVID LYNDSAY's *Ane Satyre of the Thrie Estaitis* for the Edinburgh Festival (1984, 1991). He has subsequently appeared as an actor and director in many Scottish theatres. His books of poetry include *So That Was Spring* (1954) and *Sax Roses for a Luve Frae Hame* (1961). He has also been a radio and television commentator since 1952, specializing in state and royal events. He was awarded the OBE in 1980.

Fleming, Williamina Paton, *née* **Stevens** 1857–1911
US astronomer
Born in Dundee, Scotland, she emigrated to Boston and after her marriage failed took up domestic work for the director of the Harvard College observatory, EDWARD PICKERING. She joined the research team at the observatory in 1881 and frequently collaborated with Pickering; some feel the discovery of the duplicity of Beta Lyrae has been wrongly accredited to Pickering rather than to Fleming. Her technique, known as the Pickering–Fleming technique, involved the study of many thousands of celestial photographs. She also discovered new stars and variables, investigated stellar spectra, including ten of the 24 novae recorded up until 1911, and categorized 10,351 stars in the Draper Catalogue of Stellar Spectra (1890). In 1906 she became the first US woman to be elected to the Royal Astronomical Society.

Flemming, Walther 1843–1905
German biologist
Born in Sachsenberg, he studied medicine in five German universities, going on to become professor of anatomy at Kiel University. Flemming is renowned for his investigations of cell division (mitosis), in which chromosomes divide lengthwise, the indistinguishable halves move to opposite sides of the cell, and the cell then divides, giving two daughter cells. Flemming provided a superb account of the process in 1882. He also made significant advances in microscope techniques.

Fletcher (of Saltoun), Andrew 1655–1716
Scottish patriot
He sat in the Scots parliament in 1681, and opposed Stuart policy so consistently that twice he had to flee to Holland. Joining William of Orange (WILLIAM III), he returned to Scotland at the Glorious Revolution of 1688. He was the first patron of WILLIAM PATERSON, the projector of the Darien expedition, and the bitterness caused in Scotland by the treatment of the Darien colonists empowered Fletcher and the nationalist party in the struggle against the inevitable union with England. His famous 'limitations' aimed at constructing a federative instead of an incorporating union. After the Union, Fletcher retired in disgust from public life to promote agriculture; he introduced fanners and the mill for pot-barley. His writings were reprinted in London in 1732.

Fletcher, John 1579–1625
English dramatist
He was born in Rye, Sussex. All that we know of him, apart from his work for the theatre, is that he entered Benet (now Corpus) College, Cambridge, and that he died of the plague in 1625. Much of his writing was achieved in collaboration with FRANCIS BEAUMONT, PHILIP MASSINGER, WILLIAM ROWLEY and WILLIAM SHAKESPEARE. The best of his own plays are *The Faithful Shepherdess*, which as a pastoral ranks with BEN JONSON's *Sad Shepherd* and MILTON's *Comus*, *The Humorous Lieutenant*, acted in 1619, and *Rule a Wife and Have a Wife* (1624), on the favourite theme of conjugal mastery. The ten or so plays on which he collaborated with Beaumont include the romantic comedy *Philaster* (1610), *A King and No King* (1611) and *The Maid's Tragedy* (1611), generally considered their best work. Collaboration with Shakespeare probably resulted in *The Two Noble Kinsmen* (c.1613), a melodramatic version of CHAUCER's *Knight's Tale*, and *Henry VIII* (or insertions therein). A vein of tender poetry in Fletcher and his relaxed type of versification are useful evidence in disentangling his various collaborations. He was the nephew of Giles Fletcher, the Elder (1546–1611), and the cousin of the SPENSERian poets Giles Fletcher (c.1588–1623) and Phineas Fletcher (1582–1650).

Fletcher, John Gould 1886–1950
US poet and essayist
Born in Little Rock, Arkansas, he followed the Imagists while living in London and Paris (1908–33). He later turned to American subjects and became a leading spirit of the Southern Agrarian movement, contributing to *I'll Take My Stand* (1930). He won the Pulitzer Prize in 1939 for his *Selected Poems. South Star* (1941) contains a verse history of his native state. He published his autobiographical *Life Is My Song* in 1937. 🕮 E B Stephens, *John Gould Fletcher* (1967)

Fleury or **Flory, André-Hercule de** 1653–1743
French prelate and politician
He was born in Lodève. As a young priest, he entered court service (1679), became almoner to LOUIS XIV (1683), and Bishop of Fréjus (1698). Tutor to the future LOUIS XV from 1715, he replaced the Duc de BOURBON as chief minister (1726) and was made a cardinal, effectively controlling the government of Louis XV until 1743. Through skilful diplomacy he limited the involvement of the French in the War of the Polish Succession (1733–38), restoring the country's prestige as a mediator. His moderation gave France the stability her finances needed, and he carried out legal and economic reforms that stimulated trade.

Fleury-Husson, Jules *See* CHAMPFLEURY

Flexner, Simon 1863–1946
US microbiologist and medical administrator
He was born in Louisville, Kentucky. His passion for medical research was awakened by the pathologist William Henry Welch (1850–1943) at Johns Hopkins University, and after another year's study in Europe he joined Welch's department of pathology before moving to Pennsylvania University (1899–1903) and then to the newly established Rockefeller Institute for Medical Research, New York City, as director of laboratories (1903–35). Among important contributions to bacteriology, virology and immunology he isolated the dysentery bacillus (1900), developed a serum for cerebrospinal meningitis (1907), and led the team that determined the cause of poliomyelitis. Equally importantly, he shaped the Rockefeller Institute into a powerful and productive centre of medical research. He encouraged both JOHN DAVISON ROCKEFELLER and his son, John Davison II, to establish research fellowships in the natural sciences, and edited (1905–46) the outstanding US periodical of medical research *Journal of Experimental Medicine*.

Flieg, Helmut *See* HEYM, STEFAN

Flinck, Govaert 1615–60
Dutch painter
Born in Kleve (now in Germany), he studied under REMBRANDT, whose influence is evident in his early work. His style then acquired an elegance which won him many portrait commissions, and it is as a portraitist that he was most successful, although he also painted large-scale historical, biblical and allegorical subjects. In 1659 he was asked to decorate the interior of the new town hall in Amsterdam with twelve large historical scenes; however, he died shortly afterwards, and the work was shared out among other artists, including Rembrandt.

Flinders, Matthew 1774–1814
English explorer
Born in Donington, Lincolnshire, he became a naval officer and hydrographer. From 1795 to 1800 he surveyed the coast of New South Wales and the strait between Australia and Tasmania with GEORGE BASS, and from 1801 to 1803 was commissioned to circumnavigate Australia. On the return voyage he was wrecked, and detained by the French governor of Mauritius until 1810. The Flinders River in Queensland and the Flinders Ranges in South Australia are named after him. 🕮 J D Mack, *Matthew Flinders* (1966)

Flint, Frank Stewart 1885–1960
English poet and translator
Born in London, he became a civil servant in the Ministry of Labour, and made important contributions to the Imagist movement in *Cadences* (1915). His poetry in *In the Net of Stars* (1909) and *Otherworld* (1920) is more lyrical and romantic. A talented linguist, he also produced many translations.

Flint, Sir William Russell 1880–1969
Scottish artist and illustrator
Born in Edinburgh, he settled in London in 1900, where he painted many watercolours to illustrate books (such as CHAUCER and MATTHEW ARNOLD) and paintings of Scottish and foreign subjects. He wrote *Models of Propriety* (1951).

Flintoff, Andrew, *also known as* **Freddie** 1977–
English cricketer
Born in Preston, Lancashire, he first appeared for his home county in 1995, and made his England debut three years later. His early career was modest, but his fitness improved and his performances for England became markedly more impressive in 2003. He made a significant contribution to England's Ashes triumph in 2005, taking 24 wickets and scoring 402 runs. With other members of the England Ashes team, he was awarded the MBE; in 2006 he became England captain in the absence of Michael Vaughan.

Flitcroft, Henry 1679–1769
English architect
He was born in Hampton Court, London, where his father was the king's gardener. The Earl of BURLINGTON became his patron, and he held various official appointments, becoming comptroller of the works in 1758. He designed the London churches of St Giles in the Fields and St John at Hampstead, and he rebuilt parts of Wentworth House in Yorkshire and Woburn Abbey.

Flodoard of Rheims c.893–966
French annalist and divine
He was canon of Rheims, which had become a major centre of learning during the Carolingian Empire, and taught there in the library. Flodoard's annals, which cover the years 919–66, are an important historical source for information on western Europe in the period, and are particularly vivid in their account of the Norse invasions of the northern French coasts.

Flo-Jo *See* GRIFFITH-JOYNER, FLORENCE

Flood, Henry 1723–91
Irish politician
He became a leader in the popular party in the Irish parliament after his election in 1759. He became vice-treasurer of Ireland in 1775, but he was removed in 1781 as a strong nationalist. Considering HENRY GRATTAN's reform bills inadequate, Flood strove without success to carry a more sweeping measure, and became involved in a bitter quarrel with his former friend. In 1783 he was returned as MP for Winchester, and in 1785 for Seaford, but he failed to make a great mark at Westminster.

Florence of Worcester fl.1100
English chronicler
He was a monk at the abbey of Worcester and was the first in a series of English monastic historians in the 12th and 13th centuries. His Latin *Chronicle* is an important historical source for late Saxon and early Norman England, and drew heavily on the *Anglo-Saxon Chronicle*, a version of which was kept at Worcester.

Flores, Juan José 1801–64
Ecuadorean statesman
Born in Puerto Cabello, Venezuela, he became one of SIMÓN BOLÍVAR's principal aides, fought in the Spanish-American Wars of Independence and became the first president of Ecuador (1830–35, 1839–43) following the collapse of Gran Colombia. Illiterate and capricious, he imposed an autocratic constitution in 1830. As the representative for conservative Quito, he alternated in government with his Liberal opponent, Vicente Rocafuerte (1835–39), returning in 1839 and retaining power until 1845. He eventually sided with Gabriel García Moreno (1821–75) against the Liberals of Guayaquil under Guillermo Franco to create a conservative state in 1860.

Florey, Howard Walter *See panel p555*

Florio, John c.1533–1625
English lexicographer
Born in London, of Italian Protestant parentage, he became a tutor in foreign languages at Oxford (c.1576), and in 1578 published his *First Fruits*, accompanied by *A Perfect Induction to the Italian and English Tongues*. *Second Fruits* (1591) included some 6,000 Italian proverbs. His Italian and English dictionary, entitled *A World of Words*, was published in 1598. In 1603 Florio was appointed reader in Italian to Queen ANNE and in 1604 groom of the privy-chamber. His famous translation of MONTAIGNE (1603) has appeared in several modern editions.

Floris, Cornelis, *originally* **de Vriendt** c.1514 or 1520–1575
Dutch sculptor, ornamentalist and architect
He was born in Antwerp and studied sculpture under Giambologna (1529–1608), visiting Rome in c.1538. He brought Italian and French Renaissance details to Flanders and diffused his style through a book of engravings, *Veelderleij niewe inventien van antycksche sepulturen* (1556–57). His works were published later in Hans Vredeman de Vries's *Architectura*. Most remarkable among his works were the Town Hall, Antwerp (1561–66), and the marble reredos at Tournai Cathedral (1572).

Flory, André-Hercule de *See* FLEURY, ANDRÉ-HERCULE DE

Flory, Paul John 1910–85
US physical chemist and Nobel Prize winner
Born in Sterling, Illinois, he was educated at Ohio State University and in 1934 obtained a research post under WALLACE HUME CAROTHERS at Du Pont, Wilmington. In 1938 he moved to a

Florey (of Adelaide and of Marston in the City of Oxford), Howard Walter Florey, Baron 1898–1968
Australian pathologist, developer of the antibiotic penicillin

Howard Florey was born in Adelaide, the son of an immigrant footwear manufacturer. He went to Oxford in 1922 as a Rhodes Scholar to study physiology, and later did postgraduate research in pathology at Cambridge and in the USA, where he made contacts that in due course were to prove invaluable.

Returning to Oxford as professor of pathology in 1935, he worked with the biochemist ERNST CHAIN in purifying the antibiotic penicillin, which had been discovered in 1928 by ALEXANDER FLEMING. Florey supervised clinical testing of the drug in the USA, where it was put into mass production; by 1943 it was readily available, and by the end of World War II had already saved many lives. Florey was knighted in 1944 and he, Chain and Fleming were jointly awarded the Nobel Prize in physiology or medicine in 1945. Florey became the first Australian president of the Royal Society in 1960, and was awarded a life peerage in 1965. He retired from his chair in 1962 to become provost of Queen's College, Oxford, and was chancellor of the Australian National University, Canberra (1965–67).

📖 Florey jointly authored *Antibiotics* (1949), edited and contributed to *General Pathology* (3rd edn 1962), and wrote for scientific journals on physiological and pathological subjects. See also Gwyn MacFarlane, *Howard Florey: The Making of a Great Scientist* (1980).

> 'Science has made the world too healthy. There are too many people, and the quality of human life is going to suffer ... in the future.'
>
> – From his installation speech as chancellor of the Australian National University, Canberra, 1965.

basic science research laboratory at the University of Cincinnati, but in 1940 returned to industry at the Linden laboratory of Standard Oil. In 1943 he became leader of the Goodyear fundamental research group, professor at Cornell University (after giving the Baker Lectures there) in 1948 and executive director of the Mellon Institute in 1957. From 1961 until his retirement in 1976 he held chairs at Stanford University. He was awarded the Nobel Prize in chemistry in 1974. His many other honours and awards included the Debye award (1969) and Priestley Medal (1974) of the American Chemical Society. His main research area was the physical chemistry of polymers. From the 1950s he also worked on liquid crystal behaviour.

Flotow, Friedrich, Freiherr von 1812–83
German composer
Born in Teutendorf, he made his reputation with *Le Naufrage de la Méduse* (1839, *The Shipwreck of the Medusa*), *Alessandro Stradella* (1844) and *Martha* (1847). From 1856 to 1863 he was director of the theatre at Schwerin.

Flourens, Pierre Jean Marie 1794–1867
French physiologist
He became secretary of the Academy of Sciences (1833) and professor at the Collège de France (1835). Elected to the Chamber of Deputies in 1838, he was made a peer of France in 1846. He wrote on neurophysiology and on animal instinct, and was the first to demonstrate the functions of the different parts of the brain. He was the father of Gustave Flourens (1838–71), who as an ardent republican took part in the Cretan insurrection against the Turks (1866), wrote such books as *La Science de l'homme* (1865), and fell fighting for the Paris Commune.

Flower, Sir William Henry 1831–99
English anatomist and zoologist
Born in Stratford-upon-Avon, Warwickshire, he studied medicine at University College London and the Middlesex Hospital. After serving as a surgeon in the Crimean War, he was appointed as a demonstrator in anatomy, and later curator of the museum, at the Middlesex Hospital. In 1861 he became conservator of the Hunterian Museum in London, and in 1870 was appointed Hunterian Professor of Comparative Anatomy and Physiology. He was the first director of natural history at the British Museum (1884–98), where he revolutionized museum displays, making them accessible to both scholars and the public alike. He was knighted in 1892.

Floyd, Keith 1943–
English chef and cookery writer
Born in Somerset and educated at Wellington, he began his career as a journalist and broadcaster. As a chef he is best known for the flamboyant style of his television programmes, demystifying cooking from around the world, including Australia, Spain, Italy and Africa. He has produced more than 20 books, including *A Splash and A Dash* and *Floyd's Thai Food* (both 2006), and numerous television series. His autobiography, *Out of the Frying Pan*, was published in 2000.

Fludd, Robert 1574–1637
English physician, mystic and pantheistic theosophist
Born in Bearsted, Kent, he studied at St John's College, Oxford. Influenced by PARACELSUS, he recognized the three cosmic elements of God (archetypus), world (macrocosmos) and man (microcosmos). He wrote a treatise in defence of Rosicrucians (1616).

Flynn, Errol, *originally* **Leslie Thomson Flynn** 1909–59
US film actor
Born in Hobart, Tasmania, Australia, he attended various Australian and English schools and worked briefly as a shipping clerk, and had other more adventurous occupations such as searching for gold in New Guinea. After his first film role as FLETCHER CHRISTIAN in the Australian film *In the Wake of the Bounty* (1933), he moved to England to gain acting experience with the Northampton Repertory Company. A part in a film led to a Hollywood contract. His first US film, *Captain Blood* (1935), established him as a hero of historical adventure films, and his good looks and athleticism confirmed him as the greatest Hollywood swashbuckler, in such films as *The Charge of the Light Brigade* (1936), *The Adventures of Robin Hood* (1938) and *The Sea Hawk* (1940). His legendary reputation for drinking, drug-taking and womanizing eventually affected his career, which was briefly revived by his acclaimed performance as a drunken wastrel in *The Sun Also Rises* (1957). His last, unsuccessful film, was *The Cuban Rebel Girls* (1959), a semi-documentary which he wrote, co-produced and narrated, in tribute to FIDEL CASTRO. 📖 P Valenti, *Errol Flynn* (1984)

Fo, Dario 1926–
Italian dramatist, actor and Nobel Prize winner
Born in San Giano, Lombardy, he began his career as a stage designer and author of comic monologues, and from 1959 to 1968 ran a small theatre company in Milan with his wife, the actress Franca Rame. His reputation as a comic author was established before the abolition of stage censorship in 1962 allowed him to align himself openly with the political left in plays attacking government corruption and bureaucracy. His international fame rests primarily upon *Morte accidentale di un anarchico* (1970, Eng trans *Accidental Death of an Anarchist*, 1979), in which a political prisoner falls from a window while in police custody, and the frenetic *Non si paya, no si paya* (1974, Eng trans *Can't Pay, Won't Pay*, 1981), a protest against taxation which achieved popularity in Great Britain during the heated debate over the poll tax. Both use traditional techniques of farce in order to propound a socialist point of view. He was awarded the Nobel Prize in literature in 1997. In 2005 his play *Peace Mom*, about anti-war protestor Cindy Sheehan, was performed at a peace conference in London. In 2006 he stood unsuccessfully for mayor of Milan. 📖 Tony Mitchell, *Dario Fo* (1984)

Foch, Ferdinand 1851–1929
French marshal
He was born in Tarbes. He taught at the École de Guerre, proved himself a great strategist at the Battle of the Marne, Ypres (both 1914), and other World War I battles, and became Allied commander-in-chief in 1918. He quarrelled with the French prime minister, GEORGES CLEMENCEAU, about the peace settlement, regarding it as not providing adequately for French security. He wrote *Principles of War* (Eng trans 1919) and his *Memoirs* (1931). 📖 Basil H Liddell-Hart, *Foch: The Man of Orleans* (1931)

Fock, Vladimir Aleksandrovich 1898–1974
Soviet theoretical physicist
Born in St Petersburg, he graduated from the State Optical Institute of the university there in 1922, and became professor there in 1932. His most important work was in quantum mechanics. In the 1920s he generalized ERWIN SCHRÖDINGER's wave equation to the relativistic case to produce the Klein–Fock equation, and he later developed DOUGLAS HARTREE's approach to the quantum mechanics of multi-particle systems (1930) to

solve the wave equation for multi-electron atoms (the Hartree–Fock technique). Fock also studied general relativity and demonstrated that ISAAC NEWTON's equations and the law of universal gravity follow directly from the general theory of gravity for finite masses. He received many awards, including the Lenin prize (1960).

Fogel, Robert W(illiam) 1926–
US economic historian and Nobel Prize winner
Born in New York City and educated at Cornell, Columbia, Cambridge, Harvard and Johns Hopkins universities, he has held professorships at both Chicago and Harvard. He shared the 1993 Nobel Prize in economics with DOUGLASS C NORTH for their work in economic history. His publications include *Railroads and American Economic Growth* (1972), *Ten Lectures on the New Economic History* (1977) and *The Escape from Hunger and Premature Death, 1700–2100: Europe, America and the Third World* (2004).

Fokine, Michel, *originally* **Mikhail Mikhailovich Fokine** 1880–1942
US dancer and choreographer
Born in St Petersburg, he trained at the Imperial Ballet there. After teaching at his old school, he joined SERGEI DIAGHILEV'S Ballets Russes in 1909 as a choreographer. On leaving the company he worked in Europe, teaching and choreographing for both theatre and ballet. He is credited with the creation of a more expressive approach to the ballet than the artificial, stylized mode prevalent at the turn of the century. He settled in New York City from 1923. 🕮 Cyril W Beaumont, *Michel Fokine and his Ballets* (1935)

Fokker, Anthony (Anton Herman Gerard) 1890–1939
US aircraft engineer
Born in Kediri, Java, of Dutch parentage, he taught himself to fly and built his first plane in 1911. In 1913 he founded the Fokker aircraft factory at Schwerin in Germany, which made warplanes for the German air force in World war I. He also developed the apparatus allowing machine guns to shoot through revolving propeller blades. After the War he set up a factory in the Netherlands. He emigrated to the USA in 1922, where he became president of the Fokker Aircraft Corporation of America. He published his autobiography, *The Flying Dutchman*, in 1931. 🕮 Henri Hegener, *Fokker, the Man and the Aircraft* (1961)

Foley, John Henry 1818–74
Irish sculptor
Born and trained in Dublin, he went to London in 1834, and executed many statues of public figures in a lively and natural style, notably the gilded bronze seated figure of ALBERT, Prince Consort, for the Albert Memorial, London (1874). Other major commissions were statues of EDMUND BURKE (1868) and OLIVER GOLDSMITH (1864) at Trinity College, Dublin, HENRY GRATTAN on College Green, Dublin, and in London, SIDNEY HERBERT on the Crimean War Memorial, London (1867) and JOHN HAMPDEN (1850) and JOHN SELDEN in the House of Commons. He also made the design for the DANIEL O'CONNELL Monument in Dublin (1866–83), and the group *Asia* on the Albert Memorial in London.

Folkers, Karl August 1906–97
US biochemist
Born in Decatur, Illinois, he studied at the universities of Illinois, Wisconsin and Yale, and later directed research at Merck and Co., at the Stanford Research Institute and at Texas University. Folkers worked on the synthesis and structure of a range of antibiotics, but is remembered for leading the Merck teams which isolated the antipernicious anaemia factor, cyanocobalamin (vitamin B_{12}) in 1948, isolated mevalonic acid in 1956 from a commercial yeast by-product, and discovered in 1970 the structure of porcine thyrotrophin-releasing hormone. In 1990 he was awarded the Presidential National Medal of Science.

Follete, Robert Marion la *See* LA FOLLETTE, ROBERT MARION

Fonda, Henry Jaynes 1905–82
US actor
Born in Grand Island, Nebraska, he became involved with the Omaha Community Playhouse and enjoyed some success on Broadway, before moving to Hollywood (1935). His Hollywood debut in *A Farmer Takes A Wife* (1935) was followed by over 100 films, notably *Young Mr. Lincoln* (1939), *The Grapes of Wrath* (1940), *The Lady Eve* (1941) and *The Oxbow Incident* (1943), which established him in the role of the honest US folk hero. Later films include *Twelve Angry Men* (1957) and *On Golden Pond* (1981), for which he won an Academy Award. A frequent stage performer, he enjoyed long runs with *Mister Roberts* (1948–51), *Two for the Seesaw* (1958) and *Clarence Darrow* (1974–75). He was married five times, and his children include actors JANE FONDA and Peter (1939–).

Fonda, Jane Seymour 1937–
US actress
Born in New York City, she made her stage debut, with her father HENRY FONDA, in *The Country Girl* (1954). A student at the Actors Studio and part-time model, she made her film debut in *Tall Story* (1960). She worked in Europe and married director Roger Vadim (1928–2000), with whom she made *La Ronde* (1964) and *Barbarella* (1968). Later her 'sex kitten' image receded and she became established as a versatile dramatic actress of considerable emotional depth and sensitivity in such films as *Klute* (1971, Academy Award), *Julia* (1977, BAFTA award), *Coming Home* (1978, Academy Award), *The China Syndrome* (1978, BAFTA award), *On Golden Pond* (1981), *The Dollmaker* (1983, Emmy award) and *Stanley and Iris* (1990), after which she retired from the cinema. Noted for her anti-nuclear and feminist activities, as well as the anti-war stance which earned her the name of 'Hanoi Jane' during the Vietnam War, in the 1980s she also became involved with women's health and fitness, through bestselling videos and books. She was married to TED TURNER, owner of CNN, from 1991 to 2001. In 2005 she made a return to the screen in *Monster-In-Law* and published a memoir, *My Life So Far*.

Fonsesca, Juan *See* MARSÉ, JUAN

Fontaine, Jean de la *See* LA FONTAINE, JEAN DE

Fontaine, Joan, *originally* **Joan De Beauvoir de Havilland** 1917–
US actress
Born in Tokyo, Japan, to English parents, she and her sister OLIVIA DE HAVILLAND were raised in California. Small film roles, B-movie leads and more substantial stage parts filled the early part of her career until *Gunga Din* (1939). Often typecast as an innocent, genteel English rose, she rose above such limitations in *Rebecca* (1940), *Suspicion* (1941), for which she won a Best Actress Academy Award, *Jane Eyre* (1943) and *Letter from an Unknown Woman* (1948). Later roles saw her add a darker streak to her characters, but a lack of suitable film parts led her to concentrate on theatre and television. She became a US citizen in 1943. 🕮 Charles Higham, *Sisters: The Story of Olivia de Havilland and Joan Fontaine* (1984)

Fontana, Carlo 1634 or 1638–1714
Italian architect
Born in Switzerland, he was a pupil of GIAN BERNINI. He worked as papal architect in Rome, where he designed many major works, including the fountain in the Piazza di San Pietro and the tombs of popes CLEMENT XI and INNOCENT XII and Queen CHRISTINA of Sweden in St Peter's. He designed Loyola College in Spain and the Palazzo Durazzo at Genoa.

Fontana, Domenico 1543–1607
Italian architect
He was born in Melide, near Lugano, Switzerland. He was papal architect in Rome, and worked on the Lateran Palace and the Vatican library. He was afterwards royal architect in Naples.

Fontana, Lucio 1899–1968
Italian artist
Born in Rosario, Argentina, he was six years old when his family returned to Italy. He signed the first Manifesto of Italian Abstract Artists in 1935. After World War II, he made his name as the inventor of *Spazialismo* (Spatialism) and as a pioneer of 'environmental art'. He is best known for his bare or monochrome canvases, holed or slashed to create what he called *Attese*. These in turn looked forward to the 'gesture' or 'performance' art of the 1960s.

Fontane, Theodor 1819–98
German poet and novelist
Born in Neuruppin, he worked in the family chemist's business until in 1849 he turned to literature in Berlin. Periods of residence in Great Britain as a newspaper correspondent (1855–59) led to ballads such as 'Archibald Douglas' and 'Die Brücke am Tay' ('The Tay Bridge'). He was a war correspondent in 1866 and 1870–71, and became secretary of the Prussian Royal Academy of Arts. He wrote his first novel, *Vor dem Sturm* (1878, 'Before the Storm'), at the age of 56. It is set against the events of the Franco-Prussian War in 1812–13, and is considered by many to be his best. *L'Adultera* (1882, Eng trans *The Woman Taken in Adultery*, 1979) and *Effi Briest* (1895, Eng trans 1967) focused on the position of women in German society, and

he extended his appraisal of social mores into the realms of politics and power in *Die Poggenpuhls* (1896, Eng trans *The Poggenpuhl Family*, 1979) and *Der Stechlin* (1898). His novels influenced THOMAS MANN. 🕮 A R Robinson, *Fontane: An Introduction to the Man and his Work* (1976)

Fontenelle, Bernard le Bovier de 1657–1757
French writer
Born in Rouen, he was a nephew of PIERRE CORNEILLE, and began his literary career in Paris. In the great quarrel of Moderns versus Ancients, he sided with the Moderns, assailing the Greeks and their French imitators, and receiving in return the satiric attacks of NICOLAS BOILEAU, RACINE, JEAN JACQUES ROUSSEAU and JEAN DE LA BRUYÈRE. After the failure on the stage of his *Aspar*, he produced an imitation of LUCIAN, *Nouveaux dialogues des morts* (1682, Eng trans *New Dialogues of the Dead*, 1684–85) and the 'precious' *Lettres diverses de Monsieur le Chevalier d'Her...* (1687, Eng trans *Letters of Gallantry*, 1715). In 1697 he was made secretary to the French Academy of Sciences, of which he was later president. He attempted almost every form of literature – idylls, satires, dialogues, tragedies, histories and critical essays – but his *Entretiens sur la pluralité des mondes* (1686, Eng trans *A Plurality of Worlds*, 1688) and *Histoire des oracles* (1686, Eng trans *A History of the Oracles and the Cheats of the Pagan Priests*, 1688) are considered his best works.

Fonteyn, Dame Margot, *in full* **Margot Fonteyn de Arias**, *née* **Margaret Hookham** 1919–91
English ballerina
Born in Reigate, Surrey, she studied dance in Hong Kong and in London under NIKOLAI LEGAT and NINETTE DE VALOIS among others, then joined the Vic-Wells Ballet, which later became Sadler's Wells Ballet and finally the Royal Ballet, with which she spent her entire career. She created many roles under the choreography of Ninette de Valois and Sir FREDERICK ASHTON, among them her first solo appearance, *The Haunted Ballroom* (1939), *Symphonic Variations* (1946) and *The Fairy Queen* (1946). She rose in the Royal Ballet to become one of the most impressive technicians of the 20th century. Her career was extended and enhanced in the 1960s by her acclaimed partnership with RUDOLPH NUREYEV. She performed work by ROLAND PETIT and KENNETH MACMILLAN, and also wrote and introduced a six-part television series, *The Magic of Dance* (1979). Her publications include an autobiography (1975) and a study of ANNA PAVLOVA. She married Roberto Emilio Arias (1918–90), then Panamanian ambassador to the Court of St James in London, in 1955. 🕮 Keith Money, *Fonteyn: The Making of a Legend* (1973)

Foot, Sir Dingle Mackintosh 1905–78
English lawyer and politician
He was educated at Oxford, where he was president of the Liberal Club (1927) and of the Union (1928). He was Liberal MP for Dundee (1931–45), joined the Labour Party in 1956 and was Labour MP for Ipswich (1957–70), and Solicitor-General (1964–67). He was made QC in 1954, and was knighted in 1964. He published *British Political Crises* in 1976.

Foot, Hugh Mackintosh, Baron Caradon 1907–90
English administrator
The son of ISAAC FOOT, he was educated at Cambridge and was president of the Union in 1929. He held several government administrative posts abroad, in Palestine, Transjordan, Cyprus, Jamaica and Nigeria, and from 1961 his work was mainly in connection with the United Nations (permanent representative 1964–70) and as a consultant to the UN development programme. He was awarded a life peerage in 1964.

Foot, Isaac 1880–1960
English politician
He was a solicitor in Plymouth and Liberal MP for Bodmin (1922–24, 1929–35), and was the father of DINGLE, HUGH and MICHAEL FOOT.

Foot, Michael Mackintosh 1913–
English Labour politician and journalist
Born in Plymouth, Devon, the son of ISAAC FOOT, he was educated at Oxford, where he was president of the Union (1933). He was assistant editor of *Tribune* (1937–38), then joint editor (1948–52) and editor (1955–60). He was also acting editor of the *Evening Standard* (1942–44), a political columnist on the *Daily Herald* (1944–64) and Labour MP for Ebbw Vale (1960–83) and Blaenau Gwent (1983–92). He was secretary of state for employment (1974–76), deputy leader of the Labour Party (1976–80) and leader of the House of Commons (1976–79). In 1980 he became leader of the Labour Party, replacing JAMES CALLAGHAN. A man of undoubted political integrity, he was known as a master of rhetoric in parliamentary debates, but proved no match for MARGARET THATCHER in the media-dominated election of 1983, in which his party was heavily defeated. He was replaced that year by NEIL KINNOCK, and retired from Parliament in 1992. A prominent figure on the left of the Labour Party and a pacifist, he has long been a supporter of the Campaign for Nuclear Disarmament (CND). His books include the influential *Guilty Men*, written with colleagues and published in 1940, a two-volume biography of ANEURIN BEVAN (1962, 1973) and a biography of H G WELLS (whom he had known), entitled *HG: The History of Mr Wells* (1995). 🕮 Mervyn Jones, *Michael Foot* (1994)

Foote, Andrew Hull 1806–63
US naval officer
Born in New Haven, Connecticut, he joined the navy in 1822, and was promoted to captain in 1849. He helped to abolish the liquor ration in the US navy (1862). In 1856 at Canton he stormed four Chinese forts, which had fired on him. In the Civil War he organized the western flotilla, and in 1862 attacked Fort Henry. Shortly afterwards he was wounded and resigned as rear admiral.

Foote, Horton 1916–
US dramatist
Born in Wharton, Texas, he studied acting at the Pasadena Playhouse in California and in New York City, then began to write plays. His work is characterized by a fascination with family relationships and with the act of storytelling, and he is best known for a series of plays about rural Texas called the Orphans' Home Cycle, including *The Widow Claire*, *Valentine's Day* and *1918*. His screenplays for *To Kill a Mockingbird* (1962) and *Tender Mercies* (1983) won Academy Awards, and his play *Young Man from Atlanta* (1995) won the Pulitzer Prize.

Foote, Shelby 1916–2005
US novelist and historian
Born in Greenville, Mississippi, he established his name with his second novel, *Follow Me Down* (1950), which gives a multiple view of a violent murder. *Shiloh* (1952) is a historical novel, dealing with the Civil War. He is now better known for his detailed three-volume history *The Civil War: A Narrative* (1958–74) than for his novels; he also appeared in a television history of the Civil War during the 1980s.

Foppa, Vincenzo c.1427–c.1515
Italian painter
He was the leader of the Lombard school of painting which lasted until the time of LEONARDO DA VINCI.

Forbes, Bryan, *originally* **John Theobald Clarke** 1926–
English actor, screenwriter, director and producer
He was born in London and studied at the Royal Academy of Dramatic Arts. After a number of years in acting, he founded Beaver Films with Sir RICHARD ATTENBOROUGH in 1959. He won a Best Screenplay BAFTA award for *The Angry Silence* (1960), then turned to directing, with films including *Whistle Down the Wind* (1961), *The L-Shaped Room* (1962), *The Stepford Wives* (1975) and *International Velvet* (1978). Married to the actress Nanette Newman (1939–) since 1958, he was chief of production and managing director of Associated British (EMI) at Elstree Studios from 1969 to 1971. He has written several novels, two volumes of autobiography and *Ned's Girl* (1977), a biography of EDITH EVANS. He was awarded the CBE in 2004.

Forbes, Edward 1815–54
British naturalist
Born in Douglas, Isle of Man, he studied medicine at the University of Edinburgh, but in 1836 he gave up medicine altogether to devote himself completely to the natural sciences. In 1841 he joined the crew of the *Beacon* as naturalist during the survey around parts of Asia Minor. He later became professor of botany at King's College London (1843), and shortly afterwards was appointed curator of the museum of the Geological Society of London. In 1844 he became the first palaeontologist to HM Geological Survey, was made professor of natural history at the Royal School of Mines (1851), and in 1854 was appointed Regius Professor of Natural History at Edinburgh University. A versatile natural historian, he undertook important studies of quaternary changes in molluscan faunas and relict floras, and made formative observations in oceanography, and effectively laid the foundations for the sciences of biogeography and palaeoecology.

Forbes, George 1849–1936
Scottish physicist and engineer
He was born in Edinburgh, where his father, JAMES DAVID FORBES, was professor of natural philosophy. He was educated at St

Andrews and Cambridge universities, and had a varied life as an astronomer, inventor, traveller and war correspondent. He was for some years professor of experimental philosophy at Anderson's College, Glasgow, and while there took charge of one of the British Transit of Venus expeditions of 1874, to Hawaii. In his later life he worked on dynamos and invented the carbon brush. He made improvements in the method of measuring the velocity of light (with JAMES YOUNG) and in the field of range-finding. He forecast the existence of Pluto in 1880.

Forbes, James David 1809–68
Scottish physicist and glaciologist
Born in Edinburgh, he was privately educated until the age of 16, when he went to Edinburgh University. Here, despite an early interest in science, he pursued legal studies at the request of his father, GEORGE FORBES. On his father's death (1828) he received a modest inheritance, and abandoned law and returned to science. He became professor at Edinburgh University (1833–60) and principal of St Andrews College (1860–68). In 1834, using instruments employed by Macedonio Melloni (1798–1854), he carried out work which contributed to the concept of a continuous radiation spectrum. After 1840 his interests turned to geology and to glaciers. He visited the Alps with JEAN AGASSIZ in 1841, later causing a lifelong controversy with him by claiming priority in noting that the surface of a glacier moves faster than the ice beneath it, and that glacier velocity is directly related to the steepness of the slope. Forbes fought successfully for reforms in Scottish higher education, including the instigation of degree-level examinations.

Forbes, Malcolm Stevenson 1919–90
US publisher
He was born in Brooklyn, New York City, where his father, a Scot, founded *Forbes* (1917), then the only business magazine in the USA. For the first dozen years the magazine prospered but in the 1930s its circumstances – and those of the family – changed when rivals like *Fortune* and *Business Week* appeared on the scene. It was nevertheless kept alive and he became its editor-in-chief and publisher in 1957, from when circulation and profits escalated, making its owner the talk of gossip columns and a multi-millionaire. Notorious for his extravagance, he had a passionate interest in ballooning as well as FABERGÉ eggs, of which he had one of the world's foremost collections.

Forbes, (Joan) Rosita 1893–1967
English writer and traveller
She was born in Swinderby, Lincolnshire. Having visited almost every country in the world and particularly Arabia and North Africa, she used her experiences as the raw material for exciting travel books, including *The Secret of the Sahara-Kufara* (1922), *From Red Sea to Blue Nile* (1928), *The Prodigious Caribbean* (1940), *Appointment in the Sun* (1949) and *Islands in the Sun* (1950). 🕮 *Gypsy in the Sun* (1967)

Forbes-Robertson, Sir Johnston 1853–1937
English actor
Born in London, he made his debut in 1874 and soon established himself as a West End favourite. In 1895 he became actor-manager of the London Lyceum and crowned his productions there with *Hamlet* (1897). In later years he had great success in *The Passing of the Third Floor Back* (1913). He married Gertrude Elliot (1900), a US actress who often partnered him. A daughter, Jean (1905–62), carried on the tradition and became actress-manager in *The Lady of the Camellias* (1934).

Forchhammer, Johann Georg 1794–1865
Danish chemical océanographer
Born in Husum, he entered Kiel University in 1815 to study physics and chemistry, and moved (1818) to Copenhagen, where he attended lectures by HANS OERSTED and became director of the Polytechnic Institute. In 1831 he was appointed professor of mineralogy and geology at the University of Copenhagen. He determined the major components of sea-water and found their relative concentrations to be almost constant, allowing the salinity of any sample to be determined by measurement of any single major component. In his *On the Components of Sea-water* (1859) he postulated the idea of a geochemical balance related to a sedimentary cycle of material washed into the sea by rivers, the balance being inversely proportional to the time the organo-chemical particles spend in the soluble state. His *Danmarks Geognostiske Forhold* (1835) was the first work on the structural geology of Denmark, for which he was termed 'the father of Danish geology'.

Ford, Betty (Elizabeth) Anne, *née* **Bloomer** 1918–
US health administrator and First Lady as the wife of president Gerald Ford
Born in Chicago, Illinois, she was originally a dancer and toured with the MARTHA GRAHAM Concert Group. In 1948 she married GERALD FORD, who later became president of the USA (1974–77). During her time as First Lady, her public battle with breast cancer raised awareness of health problems for women. Her struggle with substance abuse led her to found the Betty Ford Center, of which she is president of the board of directors. She has written two autobiographies, *The Times of My Life* (1979) and *Betty: A Glad Awakening* (1987).

Ford, Edmund Brisco 1901–88
English geneticist
Born in Papcastle, Cumberland, he studied and then taught at Oxford throughout his career, becoming professor of ecological genetics and director of the Genetics Laboratory. He was stimulated by JULIAN HUXLEY, his tutor at Oxford, with whom he carried out pioneering work on gene action rates. He wrote *Mendelism and Evolution* (1931), the first major published work leading to the neo-Darwinian synthesis. With Sir RONALD FISHER he studied microevolution in Lepidoptera, and was responsible for the first experimental evidence of modifying dominance of an interested trait, confirming Fisher's theory of the evolution of dominance. He showed that the appearance of a specific trait in successive generations was under genetic control, and that selection could change its inheritance in the direction of either dominance or recessivity. He also demonstrated that the maintenance of different inherited forms of a character in the same population often resulted from natural selection. Ford's New Naturalist books on *Butterflies* (1945) and *Moths* (1955) were influential, and he was elected FRS in 1946.

Ford, Ford Madox, *originally* **Ford Hermann Hueffer** 1873–1939
English novelist, editor and poet
He was born in Merton, Surrey, the son of FRANCIS HUEFFER, the music critic of *The Times*, and grandson of the Pre-Raphaelite painter FORD MADOX BROWN. Brought up in Pre-Raphaelite circles, he published his first book when he was only 18, a fairy story entitled *The Brown Owl* (1891), and a novel, *The Shifting of the Fire*, appeared the following year. In 1894 he eloped with and married Elsie Martindale, presaging a life of emotional upheaval. He met JOSEPH CONRAD in 1898 and they co-authored various works, including *The Inheritors* (1901) and *Romance* (1903). In 1908 he founded the *English Review*, which he edited for 15 months and in which he published THOMAS HARDY, H G WELLS, D H LAWRENCE and WYNDHAM LEWIS among others. In 1924, while living in Paris, he was founder-editor of the *Transatlantic Review*, which gave space to JAMES JOYCE, EZRA POUND, GERTRUDE STEIN and the young ERNEST HEMINGWAY. He wrote almost 80 books in a hectic career but is best remembered for three novels: *The Fifth Queen* (1906), *The Good Soldier* (1915) and *Parade's End*, the title he gave to what is often known as the 'Tietjens war' tetralogy: *Some Do Not* (1924), *No More Parades* (1925), *A Man Could Stand Up* (1926) and *Last Post* (1928). 🕮 Max Saunders, *Ford Madox Ford: A Dual Life* (1996)

Ford, Gerald R(udolph), *originally* **Leslie Lynch King, Jnr** 1913–2006
38th president of the USA
Born in Omaha, Nebraska, he attended the University of Michigan on a football scholarship, studied law at Yale and served in the US navy during World War II. From 1949 to 1973 he was a Republican member of the House of Representatives, becoming minority leader in 1965. On the resignation of SPIRO AGNEW in 1973 he was appointed vice-president, becoming president in 1974 when RICHARD NIXON resigned as a result of the Watergate scandal. Ford assumed the presidency during a time of economic difficulties and was faced with a resurgent, Democrat-dominated Congress which firmly resisted his domestic and external policy initiatives. His relations with Congress were made worse by his controversial decision to grant a full pardon to Nixon in September 1974. In the 1976 presidential election he was defeated by JIMMY CARTER. His publications include *Humor and the Presidency* (1987). 🕮 Charles Mercer, *Gerald Ford* (1975)

Ford, Harrison 1942–
US film actor
Born in Chicago, he appeared in summer stock theatre before making his film debut in *Dead Heat on a Merry-Go-Round* (1966). He made small appearances in films and television and pursued a secondary career as a carpenter, before achieving fame as

Han Solo in *Star Wars* (1977) and its two sequels. Cast as resourceful, swashbuckling heroes, he found great popularity as an archaeologist adventurer in *Raiders of the Lost Ark* (1981) and its sequels *Indiana Jones and the Temple of Doom* (1984) and *Indiana Jones and the Last Crusade* (1989). His other successes include *Blade Runner* (1982), *Witness* (1985, Academy Award nomination), *The Mosquito Coast* (1986), *Presumed Innocent* (1990), *The Fugitive* (1993) and *What Lies Beneath* (2000).

Ford, Henry 1863–1947
US car engineer and manufacturer
Born near Dearborn, Michigan, and apprenticed to a machinist in Detroit at the age of 15, he produced his first petrol-driven motor car in 1893. In 1899 he became chief engineer of the Detroit Automobile Company and in 1903 founded the Ford Motor Company. He pioneered the modern 'assembly line' mass-production techniques for his famous Model T (1908–09), 15 million of which were produced up to 1928. He also branched out into aircraft and tractor manufacture. An eccentric who once declared that 'history is bunk', he espoused pacificism during World War I and tried to negotiate a European peace in 1915 by chartering a 'peace ship' to Europe. He paid his employees far more than the standard rate, advancing the influential argument that decently paid industrial workers themselves provided a market for the product they were manufacturing, and his refusal to abandon this policy led to violent disagreements with the code laid down in the FRANKLIN D ROOSEVELT recovery programme in 1931. Autocratic and paternalistic in his administration of the company, he tenaciously opposed the establishment of labour unions. In 1919 Ford was succeeded by his son Edsel Bryant Ford (1893–1943) and in 1945 by his grandson HENRY FORD, II, despite his stubborn attempts, at 82, to regain absolute control of the ailing company. His philanthropies included the establishment of the Ford Foundation. 🕮 Roger Burlingame, *Henry Ford: A Great Life in Brief* (1955)

Ford, Henry, II 1917–87
US car manufacturer
Born in Detroit, he was educated at Hotchkiss School, Connecticut and Yale. After the death of his father, Edsel Bryant Ford (1893–1943), he seized control of the Ford Motor Company from his grandfather, HENRY FORD, in 1945. The company was in difficulties, but he reorganized it and rebuilt the management teams. He stepped down as chief executive officer in 1979 and as chairman in 1980, but stayed as a member of the board of directors.

Ford, John c.1586–c.1640
English dramatist
Born in Ilsington, Devon, he studied for a year at Oxford and entered the Middle Temple in 1602. He was expelled for debt but readmitted. He was greatly influenced by ROBERT BURTON, whose *Anatomy of Melancholy* (1621) turned Ford's dramatic gifts towards stage presentation of the melancholy, the unnatural and the horrible in *The Lover's Melancholy* (1629), *'Tis Pity She's a Whore* (1633), *The Lady's Trial* (1639) and others. He also wrote a masterful chronicle play, *Perkin Warbeck* (1634). Ford often collaborated with THOMAS DEKKER, WILLIAM ROWLEY and JOHN WEBSTER. 🕮 D Anderson, *John Ford* (1972)

Ford, John, *originally* **Sean Aloysius O'Fearna** 1895–1973
US film director
Born in Cape Elizabeth, Maine, of Irish immigrant parents, he went to Hollywood in 1913, where he worked as a stunt man, actor and assistant director, before directing his first Western, *The Tornado* (1917). An affectionate chronicler of American history in films like *The Iron Horse* (1924), *Young Mr. Lincoln* (1939) and *My Darling Clementine* (1946), he enjoyed a long association with actor JOHN WAYNE, which resulted in such classics as *Stagecoach* (1939), *The Searchers* (1956) and *The Man Who Shot Liberty Valance* (1962). He frequently explored his Irish roots, as in *The Informer* (1935, Academy Award), but became identified with the Western genre, chronicling its rugged heroes, pioneering families and sense of male camaraderie. His other Academy Awards were for *The Grapes of Wrath* (1940), *How Green Was My Valley* (1941) and *The Quiet Man* (1952). He also received the first American Film Institute Life Achievement award in 1973, and co-directed the first film in Cinerama, *How the West Was Won* (1962). 🕮 Andrew Sinclair, *John Ford* (1979)

Ford, Richard 1796–1858
English travel-writer
Born in Winchester, he studied at Trinity College, Oxford, and was called to the Bar, but never practised. He spent the years 1830–34 on riding tours in Spain, and wrote the popular and characterful *Handbook for Travellers in Spain* (1845), followed by *Gatherings from Spain* (1846). He introduced the British public to the works of VELÁZQUEZ. 🕮 B Ford, *Richard Ford en Sevilla* (1963)

Forde, Daryll 1902–73
English anthropologist
Born in Tottenham, Middlesex, he studied geography at University College London, and taught there (1923–28) and later at the University of Wales (1930–45), before returning to University College as professor of anthropology (1945–69). He carried out fieldwork in Arizona and New Mexico (1928–29), Nigeria (1935, 1939) and the Gambia (1945). He made extensive contributions to the anthropology of Africa, and was director of the African Institute, London, from the end of World War II until his death. In his major works, which include *Habitat, Economy and Society* (1934), *Marriage and the Family among the Yakö* (1941) and *The Context of Belief* (1958), he explored patterns of kinship and marriage, relations between environment, economy and social organization, and the role of anthropology as practised by indigenous scholars.

Forel, Auguste Henri 1848–1931
Swiss psychologist and entomologist
He was born in La-Gracieuse, near Morges, and studied at the University of Zurich before moving to Vienna to specialize in neuroanatomy. An authority on the psychology of ants, he was professor of psychiatry at Zurich (1879–98) and made notable contributions in the fields of the anatomy of the brain and nerves, hypnotism and forensic psychiatry. He was also a pioneer in sex hygiene and social reforms relating to the prevention of mental illness caused by syphilis and alcoholism.

Foreman, George 1949–
US boxer
Born in Marshall, Texas, he grew up in troubled circumstances in Houston and won a gold medal at the 1968 Olympics in Mexico City after only 18 amateur fights. He turned professional in 1969, and defeated JOE FRAZIER to win the world heavyweight championship in 1973. In 1974 he lost the title to MUHAMMAD ALI in one of the most famous fights of all time – the 'Rumble in the Jungle' – and, following a religious conversion in 1977, he was ordained and gave up boxing for ten years. In 1987, short of funds for the youth and community centre he founded in Houston, he decided to return to boxing. His age and excessive weight led to much scepticism about his comeback, but in 1994, aged 45, he knocked out reigning heavyweight champion Michael Moorer to regain the title, becoming the oldest boxing champion ever in any weight division. Since retiring from boxing, he has toured the world promoting the cooking device known as the George Foreman Grill, or the Lean Mean Grilling Machine.

Forest, Lee De *See* DE FOREST, LEE

Forester, C(ecil) S(cott) 1899–1966
British writer
Born in Cairo, of British parents, he studied medicine at Guy's Hospital, London, but turned to writing full time after the success of his first novel, *Payment Deferred* (1926). He also wrote *The African Queen* (1935, filmed 1951), *The General* (1936) and *The Ship* (1943). He is best known for his creation of Horatio Hornblower, a British naval officer in the Napoleonic era, whose career he chronicled in a series of popular novels, starting with *The Happy Return* (1937) and *Ship of the Line* (1938, James Tait Black Memorial Prize). He also wrote biographical and travel books and collaborated with C E Bechhofer Roberts on a play about EDITH CAVELL. 🕮 C Parkinson, *The Life and Times of Hornblower* (1970)

Forgan, Dame Liz (Elizabeth Anne Lucy) 1944–
British journalist and broadcaster
She was born in Calcutta, where her Scottish father was posted in the army, and attended Benenden School in England, then Oxford. She began her career with the *Hampstead and Highgate Express* (1969–74) in London, and as chief leader-writer on the *Evening Standard* (1974–78). In 1978 she was appointed women's editor of *The Guardian*, where she developed a strong feminist commitment. In 1981 she was asked to join Channel 4 as commissioning editor of factual output. She introduced programmes such as *Right to Reply* and by 1988 had become director of programmes and the most powerful woman in British television. From 1993 to 1996 she was managing director of BBC Network Radio, and since 1998 she has been director of Most Media Ltd and Guardian Media Group. She became chair of the Heritage Lottery Fund in 2001 and of the Scott Trust

media group in 2003. She was awarded the OBE in 1999 and created DBE in 2006.

Forman, Miloš (Jan Tomáš) 1932–
US film director
Born in Caslav, Czechoslovakia, to parents who later died at Auschwitz, he received international recognition for two feature films, *Lásky jedné plavovlásky* (1965, 'A Blonde in Love') and *Hoří, má panenko!* (1967, 'The Fireman's Ball'), made in Prague. He moved to the USA in 1968 and made his English-language debut with *Taking Off* (1971). He received Best Director Academy Awards for *One Flew Over the Cuckoo's Nest* (1975) and *Amadeus* (1984). His other films include *Ragtime* (1981), *The People Vs Larry Flynt* (1996) and *Man on the Moon* (1999). He has published an autobiography, *Turnaround* (1994), and is director of Columbia University's film programme.

Forman, Simon 1552–1611
English astrologer and quack-doctor
Born in Quidhampton, Wiltshire, he studied at Magdalen College, Oxford. He set up a lucrative practice in 1583 in London, particularly in love potions for ladies of the court, and was constantly prosecuted by the Church and the College of Physicians. He left in manuscript form a *Booke of Plaies* containing the earliest accounts of the performances of some of SHAKESPEARE's plays.

Formby, George 1904–61
English entertainer
Born in Wigan, Greater Manchester, the son of a North Country comedian, he briefly pursued a career as a jockey before following in his father's footsteps. He developed an act in music halls throughout England that was subsequently transferred to film. In a series of low-budget, slapstick comedies he portrayed a shy young man with an irrepressible grin and ever-ready ukelele to accompany his risqué songs. From *Boots Boots* (1934) to *George in Civvy Street* (1946) he was one of Great Britain's most popular film stars. Falling out of favour with postwar cinema audiences, he returned to the stage. Latterly dogged by ill health he was long dominated by his formidable wife Beryl, who died in 1960.

Forrest, Edwin 1806–72
US actor
He was born in Philadelphia, where he made his debut (1820). At the age of 20 he appeared as Othello in New York with great success. He had favourable seasons in London (1836–37), but in 1845 his Macbeth was hissed by the audience. A resentment which prompted him to hiss WILLIAM MACREADY's performance in Edinburgh destroyed his reputation in Great Britain. The hissing of Macready's Macbeth by Forrest's sympathizers in New York in 1849 led to a riot which cost 22 lives. He retired temporarily in 1853, but returned to the stage (1860) and made his last appearance as Cardinal RICHELIEU in Boston (1871). 🕮 Richard Moody, *Edwin Forrest, First Star of the American Stage* (1960)

Forrest, George 1873–1932
Scottish plant collector and botanist
Born in Falkirk, he was employed in the Royal Botanic Garden of Edinburgh by Sir ISAAC BAYLEY BALFOUR. His first expedition was to Yunnan and Tibet (1904–06) and he returned to the area several times between 1910 and 1930. He sent home several hundred pounds (weight) of seed from each trip. His explorations in Upper Burma and China resulted in the discovery and introduction of many plants, two of his most significant introductions being *Pieris formosa* variety *forrestii* and the widely grown *Gentiana sino-ornata*. Plants named after him include *Rhododendron forrestii* and *Gentiana forrestii*.

Forrest (of Bunbury), John Forrest, 1st Baron 1847–1918
Australian explorer and politician
He was born in Bunbury, Western Australia, and from 1864 was a colonial surveyor. In 1869 he penetrated inland from Perth as far east as 123°, and the next year reached South Australia from the west along the south coast. With his brother Alexander (1849–1901) he made an eastward journey in 1874. Surveyor-General for the colony from 1883, he was the first premier of Western Australia (1890–1901), and later minister for defence, minister for home affairs, and treasurer. He died at sea (off Sierra Leone) on his way to London, where he was due to receive a peerage, the first given to an Australian.

Forrestal, James 1892–1949
US politician
Born in Beacon, New York, he entered US government service in 1940 after a business career. From 1944 to 1947 he was secretary of the navy and, until his resignation shortly before he committed suicide, defense secretary.

Forrester, Jay Wright 1918–
US computer engineer
Born in Anselmo, Nebraska, and educated at Nebraska University, he became a pioneer in the development of computer storage devices. He supervised the building in 1944–51 of the Whirlwind computer at the Massachusetts Institute of Technology (MIT), during the course of which (1949) he devised the first magnetic core store (memory) for an electronic digital computer, the forerunner of RAM. From 1951 to 1956 he was a founder and director of the Digital Computer Laboratory. Since 1956 he has been Germeshausen Professor (now emeritus) at MIT's school of management, where he has developed computer simulations to analyse complex urban, social and industrial cycles. This research is reflected in several books, including *Industrial Dynamics* (1961), *Principles of Systems* (1968) and *World Dynamics* (1971).

Forssman, Werner 1904–79
German physician, surgeon and Nobel Prize winner
Born in Berlin, he studied at university there, served as an army doctor until 1945, then practised urological surgery at various places, including Bad Kreuznach and Düsseldorf. He became known for his pioneering work in the late 1920s on cardiac catheterization, in which he carried out dangerous experiments on himself. He abandoned them in the face of criticism, but was awarded the 1956 Nobel Prize in physiology or medicine jointly with ANDRÉ COURNAND and DICKINSON RICHARDS, who had extended Forssman's original techniques and demonstrated their clinical and experimental usefulness. By then, however, it was too late for Forssman to catch up with subsequent advances in cardiology and to contribute further to the procedure he had pioneered. His autobiography was published in 1974.

Forster, E(dward) M(organ) 1879–1970
English novelist and critic
Born in London, he was educated at Tonbridge School and King's College, Cambridge, where he revelled in the 'Bloomsbury circle' of G E MOORE, G M TREVELYAN and Lowes Dickinson (1862–1932), with whom he founded the *Independent Review* in 1903. In his novels he examined with subtle insight the pre-1914 English middle-class ethos and its custodians the civil service, the Church and the public schools. Early titles include *Where Angels Fear to Tread* (1905), *The Longest Journey* (1907), *A Room with a View* (1908) and *Howards End* (1910). He became secretary to the Maharajah of Dewas Senior in India in 1921, and in 1924 published his masterpiece, *A Passage to India*, in which he puts English values and Indian susceptibilities under his finest scrutiny. It was awarded the James Tait Black Memorial and Femina Vie Heureuse prizes in 1925. He also wrote short stories, essays, the Cambridge Clark lectures *Aspects of the Novel* (1927) and biographies of Lowes Dickinson (1934) and Marianne Thornton (1958), and in 1951 he collaborated with Eric Crozier on the libretto of BENJAMIN BRITTEN's opera, *Billy Budd*. He was elected a Fellow of King's College, Cambridge, in 1946. His novel *Maurice* (written 1913–14), on the theme of homosexuality, was published posthumously in 1971. 🕮 N Beauman, *Morgan: A Biography of E M Forster* (1993); J Beer, *The Achievement of E M Forster* (1962)

Förster, Johann Reinhold 1729–98
German naturalist and clergyman
Born in Dirschau (now Tczew) of parents of Scottish extraction (Forrester), he studied theology at Halle and became a country minister near Danzig. He left the church in 1765 and began a survey of new German colonies on the Volga, in south-west Russia. A teacher at the Dissenter's Academy in Warrington, Lancashire (1766–69), he (and his son, Johann Georg Adam Förster, 1754–94) accompanied JAMES COOK as naturalist on his second world voyage on the *Resolution* (1772–75). A pioneer ornithologist of Antarctica, New Zealand and the Pacific, he was appointed professor of natural history at Halle in 1780. He wrote a *Catalogue of the Animals of North America* (1771), although he never went there, and *Observations Made During a Voyage Round the World* (1778), about his expedition with Cook. Förster's tern is named after him.

Forster, John 1812–76
English biographer, historian and journalist
Born in Newcastle upon Tyne, he was educated for the Bar, but in 1833 began to write political articles in the *Examiner*. He went on to edit the *Foreign Quarterly Review*, the *Daily News* and the

Examiner (1847–56). He was the author of many biographical and historical essays and an admirable series dealing with the Commonwealth – *Lives of the Statesmen of the Commonwealth* (1836–39), *Debates on the Grand Remonstrance* (1860), *Arrest of the Five Members* (1860) and *Sir John Eliot, a Biography* (1864). He is, however, best remembered for his *Life and Times of Goldsmith* (1848), *Landor* (1868), *Life of Dickens* (1871–74) and volume one of a *Life of Swift* (1875).

Forster, William Edward 1819–86
English politician
Born of Quaker parentage in Bradpole, Dorset, he abandoned the Bar for the wool industry. During the Irish famine of 1845 he visited the distressed districts as almoner of a Quaker relief fund. In 1850 he married Jane, the daughter of Dr THOMAS ARNOLD. In 1861 he became Liberal MP for Bradford, rose to Cabinet rank and in 1870 carried the Elementary Education Act. Under the GLADSTONE administration of 1880 he was chief secretary for Ireland. He was attacked unceasingly in parliament by the Irish members, and his life was threatened by the 'Invincibles' for his measures of coercion. A strong opponent of Home Rule, he was a severe critic of CHARLES STEWART PARNELL and, determined to re-establish law and order, had him and other Irish leaders arrested. When in 1882 a majority of the Cabinet determined to release the 'suspects', Forster and Lord Cowper (the Lord Lieutenant) resigned.

Forsyth, Alexander John 1769–1843
Scottish inventor and clergyman
Born in Belhelvie, Aberdeenshire, he succeeded his father as Presbyterian minister there (1791). In 1807 he patented his improved detonating mechanism for firearms, which resulted in the adoption of the percussion-cap by the British forces. NAPOLEON I offered him £20,000 for the secret of his invention, but he patriotically refused. The first instalment of the pension belatedly awarded to him by the British government arrived on the day of his death.

Forsyth, Bill (William David) 1946–
Scottish director and screenwriter
Born in Glasgow, he entered the film industry in 1963, initially making short films and documentaries. He dropped out of the National Film School after a year (1971), but his first feature, *That Sinking Feeling*, a comedy using actors from the Glasgow Youth Theatre, was warmly received at the 1979 Edinburgh Film Festival. His other feature films include the adolescent romance *Gregory's Girl* (1980) and *Local Hero* (1983), which focused on the impact of the oil business on a remote Scottish community. His charming, whimsical style has also taken more melancholic turns, as in *Comfort and Joy* (1984) and *Housekeeping* (1987), his first US film. The ambitious *Being Human* (1994) was unsuccessful, and he has since directed only one film, *Gregory's Two Girls* (1999).

Forsyth, Bruce, *originally* **Bruce Joseph Forsyth-Johnson** 1928–
English entertainer
Born in Edmonton, London, he trained as a dancer, making his debut as 'Boy Bruce – The Mighty Atom' at the Theatre Royal, Bilston (1942). His vast showbusiness experience includes a spell as the resident comedian at the Windmill Theatre (1949–51) as well as innumerable appearances in cabaret and music hall. He made his television debut in *Music Hall* in 1954 but gained national popularity as the compere of *Sunday Night at the London Palladium* (1958–60). An all-round song'n'dance man and comic with a jaunty manner, catchphrases and deftness at audience participation, he has won affection as the host of game shows like *The Generation Game* (1971–78, 1990–95), *Play Your Cards Right* (1980–87) and the chat show *Bruce's Guest Night* (1992–93). His musical talents have been seen in television specials and on stage in one-man shows and productions like *Little Me* (1964), *Birds on the Wing* (1969), *The Travelling Music Show* (1978) and *Bruce Forsyth on Broadway* (1979). A perennial royal command performer and charity golfer, he has appeared in a few films including *Star!* (1968) and *Bedknobs and Broomsticks* (1971). He was awarded the OBE in 1998.

Forsyth, Frederick 1938–
English writer
Born in Ashford, Kent, he was educated at Tonbridge School, Kent. He served in the RAF and later became a journalist. His reputation rests on three taut suspense thrillers, *The Day of the Jackal* (1971, filmed 1973), *The Odessa File* (1972) and *The Dogs of War* (1974), meticulously researched and precisely plotted. Others include *The Fourth Protocol* (1984, filmed 1987), *The Fist of God* (1993), *Icon* (1996), *The Phantom of Manhattan* (1999), *Avenger* (2003) and *The Afghan* (2006). He was awarded the CBE in 1997.

Forsyth, Gordon Mitchell 1879–1953
Scottish ceramic designer and teacher
Born in Fraserburgh, Aberdeenshire, he trained in Aberdeen and at the Royal College of Art, London, winning a travelling scholarship to Italy in 1902. From 1902 to 1905 he was art director of Minton, Hollins & Co. before moving in 1906 to Pilkington Tile & Pottery Co., where he specialized in lustre ware. He frequently made use of lettering and mottoes as titles to his work. He encouraged throwers to produce individual decorative designs and to sign and date their own work. He served as a designer to the RAF (1916–19), before his appointment as superintendent of art instruction at the Stoke-on-Trent School of Art. CLARICE CLIFF was among his many pupils there. He was art adviser to the British Pottery Manufacturers Federation and was noted for his knowledge of art education and aspects of design, and his awareness of the demands of industry. His publications include *The Art and Craft of the Potter* (1934) and *20th Century Ceramics* (1936).

Forsyth (of Drumlean), Michael Bruce Forsyth, Baron 1954–
Scottish Conservative politician
Born in Montrose and educated at the University of St Andrews, he entered politics as a student and was a prominent member of the Federation of Conservative Students. As Conservative MP for Stirling (1983–97), he held several posts in the Scottish Office, including a difficult year as chairman of the Scottish Conservative Party (1989–90). His closeness to MARGARET THATCHER helped his early political career, but made him many enemies in Scotland, where her free-market policies were unpopular. Nevertheless, under JOHN MAJOR he proved to be an effective secretary of state for Scotland (1995–97). He lost his seat in the 1997 general election when Labour came to power, and was created a life peer in 1999. He is the author of the 2006 Conservative Party commission on tax simplification.

Forsyth, Peter Taylor 1848–1921
Scottish Congregational theologian and preacher
He was born in Aberdeen. Influenced in his student days by ALBRECHT RITSCHL at Göttingen, he rejected theological liberalism in the early 1880s, and came to a deep belief in God's holiness and the realities of sin and grace. As principal of Hackney Theological College, Hampstead, London (1901–21), he championed a high doctrine of church, ministry, sacrament and preaching in the Congregational Church. His *The Cruciality of the Cross* (1909), *The Person and the Place of Jesus Christ* (1909) and *The Work of Christ* (1910), in some ways anticipating the neo-orthodoxy of KARL BARTH and EMIL BRUNNER, have enjoyed renewed popularity since World War II.

Forsythe, William 1949–
US dancer, choreographer and artistic director
Born in New York City, he trained at the Joffrey Ballet School before dancing with the company (1971–73). JOHN CRANKO invited him to the Stuttgart Ballet in 1973. His first ballet, *Urlicht* (1976), led to an appointment as resident choreographer there. He was artistic director of Frankfurt Ballet from 1984 until 2004, establishing himself as a leading figure of European contemporary dance theatre by extending the classical ballet vocabulary into his own distinctive language. In 2004 he established his own ensemble, The Forsythe Company. His works, including *Say Bye Bye* (1980), *Artifact* (1984), *The Loss of Small Detail* (1991), *Eidos: Telos* (1995) and *Kammer/Kammer* (2000), frequently use spoken text and stage mechanics to enhance the steps.

Fort, Charles Hoy 1874–1932
US philosopher, writer and researcher into paranormal phenomena
Born in Albany, New York, he worked briefly as a journalist in New York City before struggling for some years to earn a living as a writer of short stories. A modest inheritance eventually gave him the freedom to concentrate fully on philosophy and research. A shy man, described by his friend THEODORE DREISER as 'the Hermit of the Bronx', he had a passionate interest in unexplained events and mysteries such as poltergeists and UFOs. His work in this area led to the development of a complex philosophy known as 'forteanism', which has inspired a diverse group of disciples with little allegiance to any form of orthodoxy. His publications include *The Book of the Damned* (1919), *New Lands* (1921) and *Lo!* (1931). The journal *Fortean Times*, which was founded in 1973, is named after him.

Fort, Paul 1872–1960
French poet
Born in Reims, he settled in Paris, where in 1890 he founded the Théâtre des Arts to present a wide range of European drama and recitals of Symbolist poetry. He is best known for his popular *Ballades françaises* (1st vol 1897, 'French Ballads'), which eventually numbered 17 volumes, and in which he brought poetry closer to the rhythms of everyday speech. He also wrote several plays, founded and edited the literary magazine *Vers et Prose* (1905–14), and wrote *Histoire de la poésie française depuis 1850* (1927, 'History of French Poetry since 1850'). 🕮 A Lowell, *Six French Poets* (1915)

Forte, Charles Forte, Baron 1908–
Scottish catering and hotel magnate
Born in Italy, he was educated there and at Alloa Academy and Dumfries College. He entered the catering trade via the family ice-cream business, and then became proprietor of the first milk bar in London (1933). He built up a successful catering network, and diversified into hotels and other business interests. A merger created Trusthouse Forte in 1970, and he won a boardroom battle to be chief executive of the new company from 1971 to 1978. He was executive chairman until 1981, and became chairman in 1982. Ten years later the chairmanship passed to his son Rocco Forte (1945–) and Forte became life president. He was made a life peer in 1982.

Fortes, Meyer 1906–83
British social anthropologist
Born in Britstown, Cape Province, South Africa, he was educated in Cape Town, and trained in psychology before studying anthropology at the London School of Economics under CHARLES SELIGMAN, BRONISLAW MALINOWSKI and RAYMOND FIRTH. In 1946 he became reader at Oxford, and from 1950 to 1973 he was professor of social anthropology at Cambridge. During the 1930s he carried out fieldwork in West Africa among the Tallensi and the Ashanti, which resulted in several classic monographs, including *The Web of Kinship among the Tallensi* (1949) and *Time and Social Structure* (1970). These studies laid the foundations for the theory of descent, a cornerstone of the 'structural-functionalism' dominating the social anthropology of the 1950s and 1960s. His most complete theoretical statement is in *Kinship and the Social Order* (1969), where he argues that kinship relations have an irreducible moral content. His early and enduring interest in psychology is particularly apparent in his studies of ancestor worship, as in *Oedipus and Job in West African Religion* (1959). His last work, *Rules and the Emergence of Society* (1983), a critique of sociobiological theories of human kinship and social organization, remained incomplete at his death.

Fortescue, Sir John c.1385–c.1479
English judge and jurist
Born in Somerset, and educated at Exeter College, Oxford, he was called to the Bar, then became Lord Chief Justice of the King's Bench in 1442. He sided with the Lancastrians, fled with MARGARET OF ANJOU and her son to Scotland, and in 1463 embarked with them for Holland. During his exile he wrote his *De Laudibus Legum Angliae* (published 1537, 'In Praise of the Laws of England') for the instruction of Prince Edward, a work which came to be of great value to later jurists. After the defeat of the Lancastrians at the Battle of Tewkesbury (1471), he surrendered to EDWARD IV. He also wrote *The Governance of England*, which was not published until 1714.

Fortescue, Sir John William 1859–1933
English military historian
Born in Madeira, he was brought up near Barnstaple, Devon. He became private secretary to the governor of the Windward Islands and from 1886 to 1890 was private secretary to the governor of New Zealand. He was also librarian of Windsor Castle (1905–26). As well as his monumental *History of the British Army* (13 vols, 1899–1930), his writings include *Statesmen of the Great War 1793–1814* (1911), *County Lieutenancies and the Army, 1803–1814* (1925), *Wellington* (1925) and, in a different vein, *The Story of a Red Deer* (1897).

Fortesque-Brickdale, Mary Eleanor 1872–1945
English painter and illustrator
Born in Surrey, she trained at the Crystal Palace School of Art and then at the Royal Academy Schools, London. She began exhibiting at the Royal Academy in 1896, and in 1897 won a prize for the RA dining-room design. She illustrated many books of poetry and prose, and taught at the Byam Shaw School of Art, London, before travelling extensively through Italy and the south of France. She designed posters for the government during World War I, after which her stained-glass window designs were in great demand. She continued to work into the 1940s, and was the first woman to be elected a member of the Royal Institute of Oil Painters and to be an associate member of the Royal Society of Painters in Water Colour.

Fortin, Jean Nicolas 1750–1831
French scientific instrument-maker
Born in Mouchy-la-Ville, he worked for many eminent scientists, including ANTOINE LAVOISIER, JOSEPH GAY-LUSSAC, PIERRE DULONG and FRANÇOIS ARAGO. He was notable for precision-balances, dividing engines and comparators, but especially for an improved barometer to which his name is given. Although he did not invent the leather bag, the ivory point or the glass tube in the cistern, he appears to have been the first to use all three together in 1797 in a sensitive portable barometer.

Fortune, Robert 1813–80
Scottish horticulturist and plant collector
Born in Kelloe, Berwickshire, he gained horticultural training in Berwickshire, at Moredun, near Edinburgh, and at Edinburgh's Royal Botanic Garden. In 1840 he was employed by the Horticultural Society at Chiswick, which sent him to China in 1842 to collect plants. In 1848 the East India Company asked him to help in expanding tea production in India's north-west provinces. This entailed a second three-year expedition to China, collecting tea seeds and plants, quickly followed by a third in search of black tea, and a fourth (1858–59) for the US Patent Office. His last journey (1861–62) was to Japan and northern China. From his many expeditions, Fortune introduced several well-known plants to British gardens, including the Japanese anemone, the Chinese fan palm (*Trachycarpus fortunei*), the Japanese golden-rayed lily (*Lilium auratum*), the winter jasmine and the Chusan daisy, progenitor of today's pompom chrysanthemums. His travel notes were published as *Three Years' Wanderings in the Northern Provinces of China* (1847), *Two Visits to the Tea Mountains of China* (2 vols, 1853), *A Residence Among the Chinese* (1857) and *Yedo and Peking* (1863).

Fortuny y Carbo, Mariano 1839–74
Spanish painter
Born in Reus, Tarragona, he followed the Spanish army in the war against Morocco and filled his portfolios with studies of Eastern life. The best of his Rococo pictures are *The Spanish Marriage, Book-Lover in the Library of Richelieu* and *Academicians Choosing a Model.*

Fortuny (y de Madrazo), Mariano 1871–1949
Spanish artist and designer
Born in Granada, the son of a painter, he was raised by his mother in Paris after his father's early death. As a young man, he travelled widely throughout Europe, developing a remarkable range of artistic skills, including painting, sculpture, photography, bookbinding and theatrical design. In 1907 he designed the iconic Delphos gown, a style inspired by Greek sculpture and made from distinctive pleated fabric. Textile design subsequently became the focus of his career, and he is best remembered for the intricate, innovative production processes he devised and the fabrics he created. 🕮 Guillermo de Osma, *Fortuny: His Life and Work* (1985)

Fosbury, Dick (Richard) 1947–
US athlete
He was born in Portland, Oregon. He pioneered a new technique in high jumping which revolutionized this event after he won the Olympic gold medal at Mexico City in 1968 with a jump of 2.24m (7ft 4¼in), using what came to be known as the 'Fosbury Flop'. This cut across conventional athletics coaching in that the bar was jumped head first and backwards.

Foscari, Francesco 1373–1457
Doge of Venice
He was doge from 1423, and his warlike policies on the Italian mainland, especially against Milan, were vital to the creation of a territorial state under Venetian rule. However, the losses of territory to the Turks, his princely style of government and his promotion of the interests of his family resulted in his deposition, and led to his death from rage and grief soon afterwards. His career is the subject of a play by BYRON.

Foscolo, Ugo 1778–1827
Italian writer
Born in Zante, he was educated at Spalato (now Split) and Venice. After Venice was ceded to Austria he wrote the *Lettere di Jacopo Ortis* (1802, Eng trans *Letters of Ortis*, 1818), and published his best poem, *I Sepolcri* (1807, Eng trans *The*

Foster (of Thames Bank), Norman Robert Foster, Baron 1935–
English architect

Norman Foster was born in Manchester, and trained there and at Yale. A major early influence was the US architect BUCKMINSTER FULLER, with whom he collaborated on a number of projects in the 1960s, and Foster also founded, with RICHARD ROGERS and their wives, the Team 4 practice before founding Foster Associates (later Foster and Partners) in 1967. Foster went on to explore the technological limits of steel-framed glass, producing notable early designs such as the Willis Faber Dumas Building, Ipswich (1975), and the Sainsbury Centre at the University of East Anglia (1978), the latter making explicit use of Fuller's 'space-frame' concept and winning international acclaim as a highly serviced single pure space. His Hong Kong and Shanghai Bank, Hong Kong (1979–85), represented an important stylistic development, with its boldly expressive structure and immaculate detailing, and was also widely praised. Among numerous commissions in Japan, the Century Tower, Tokyo, was completed in 1991. Other 1991 commissions included a new terminal at Stansted Airport, in England, a communications tower for the 1992 Barcelona Olympics, and the ITN headquarters and a remodelling of the Royal Academy in London. He designed the world's largest airport at Chek Lap Kok, Hong Kong, in 1998, and in 1999 won the Pritzker Architecture prize in Berlin, the city where he had redesigned the Reichstag, home of the German parliament. His initially troubled Millennium Bridge and his Great Court of the British Museum were both completed in London in 2000. He was made Officier, l'Ordre des Arts et des Lettres in 1994 and created a life peer in 1999, and is recognized as a leading exponent of the 'Hi-Tech' movement in architecture.

📖 Malcolm Quantrill, *The Norman Foster Studio* (2000)

'More with Less.'

– Book title (1979)

Sepulchres, 1820). He translated LAURENCE STERNE's *Sentimental Journey*, and wrote two tragedies, *Ajace* and *Ricciarda*. In 1809 he was for a few months professor of eloquence in Pavia. After 1814, when the Austrians entered Milan, he sought refuge in London, where he published his *Saggi sul Petrarca* (1847, 'Essays on Petrarch'), his commentaries on BOCCACCIO's *Decameron*, DANTE and PETRARCH, and various papers in the *Quarterly Review* and *Edinburgh Review*. He left a long poem, *Le Grazie* (1848, 'The Graces'), incomplete on his death. 📖 L Fabiani, *Ugo Foscolo* (1972)

Fosdick, Harry Emerson 1878–1969
US Baptist minister
Born in Buffalo, New York, and ordained in 1903, he was a professor at Union Theological Seminary, New York, from 1915, and pastor of the interdenominational Riverside Church in New York from 1926 to 1946. An outstanding preacher, he was a leading 'modernist' in the controversy on fundamentalism in the 1920s. His publications include *The Manhood of the Master* (1913), *The Secret of Victorious Living* (1934), *On Being a Real Person* (1943), *A Faith for Tough Times* (1952) and *The Living of These Days*, an autobiography (1956).

Foss, Lukas, *originally* **Lukas Fuchs** 1922–
US composer
Born in Berlin, Germany, he settled in the USA in 1937. He studied under PAUL HINDEMITH and first attracted attention with his cantata *The Prairie* (1941). His numerous works include *A Parable of Death* (1953), for soloist, narrator, choir and orchestra, and the operas *The Jumping Frog of Calaveras County* (1950) and *Griffelkin* (1955), as well as symphonies, concertos and chamber music. His later music is in aleatory style and also includes radical reworkings of Renaissance Baroque music, for example in his *Renaissance Concerto* (1986). Professor of music composition at Boston University since 1992, he has been a guest conductor with many US and European orchestras.

Fosse, Bob (Robert Louis) 1927–87
US theatre and film choreographer and director
Born in Chicago, the son of a vaudeville entertainer, he started performing on stage at the age of 13. He made his Broadway debut in the revue *Dance Me a Song* (1950), but it was his contribution to the musical *The Pajama Game*, a witty number called 'Steam Heat', which established him as a choreographer. During his long career he choreographed eleven Broadway shows, including *Damn Yankees* (1955), *Red Head* (1959), *Little Me* (1963), *Sweet Charity* (1966), *Pippin* (1973) and *Dancin'* (1978), and won six Tony awards. Moving into film, he was both director and choreographer of *Cabaret* (1972, Best Director Academy Award), and continued his success with *All That Jazz* (1979), which he directed and choreographed, and for which he supplied the screenplay.

Fossett, Steve 1944–
US adventurer and investment banker
Born in Jackson, Tennessee, he was educated in California and became a successful stockbroker and investment consultant, but is best known for having achieved more than 100 world records, many of which remain unbroken, in various fields of endeavour, including speed sailing, solo ballooning and solo aviation. He was the first person to fly a solo balloon around the world (2002), the fastest to sail around the world (2004) and the first to complete a solo non-stop circumnavigation of the world in a single-engine jet aircraft (2005, in the custom-built Virgin Atlantic GlobalFlyer).

Fossey, Dian 1932–85
US zoologist
She was born in San Francisco, and in 1963 went to Africa, where she met the anthropologists LOUIS and MARY LEAKEY, and first encountered gorillas in the Virunga mountain range of central Africa. In 1966, encouraged by the Leakeys, she returned to Tanzania and set up the Karisoke Research Centre in Rwanda in order to study the gorilla population. Her 18-year study is documented in her 1983 book *Gorillas in the Mist* (filmed 1988). Fossey advocated 'active conservation', rallying international opposition to the threats posed to the gorillas by poaching and local farming methods. In 1985 she was murdered at the centre.

Foster, (Myles) Birket 1825–99
English artist
Born in North Shields, Tyne and Wear, he produced (1841–46) several designs for wood-engravings, many of them for the *Illustrated London News*. After 1859 he devoted himself primarily to watercolours, mainly of rustic scenes.

Foster, Jodie, *originally* **Alicia Christian Foster** 1962–
US film actress
She was born in Los Angeles, and started her career as a toddler in commercials. She made her film debut in *Napoleon and Samantha* (1972), and progressed to playing streetwise adolescent characters in films such as *Alice Doesn't Live Here Any More* (1974) and *Taxi Driver* (1976). A graduate of Yale University, she has maintained her success and popularity into adulthood, with films including *The Hotel New Hampshire* (1984), *The Accused* (1988, Best Actress Academy Award), *The Silence of the Lambs* (1991, Best Actress Academy Award and BAFTA award), *Sommersby* (1992), *Nell* (1995), *Contact* (1997) and *Panic Room* (2002). She made her directorial debut in 1991 with *Little Man Tate*, and followed it with *Home for the Holidays* (1996).

Foster, Sir Michael 1689–1763
English judge and writer
Born in Marlborough, Wiltshire, he was educated at Exeter College, Oxford. He became justice of the King's Bench (1745), and was a widely respected judge who held a deep concern for personal liberty. He published *Examination of the Scheme of Church Power* (1735), setting out the superiority of parliament and the common law over the claims asserted by the High Church faction of the Church of England. His major work was *Crown Cases and Discourses upon a Few Branches of the Crown Law* (1762), a collection of reports, largely of his own criminal cases, and of commentaries on major problems of legal principle such as treason and homicide. It had a great influence on the development of modern criminal law.

Foster, Sir Michael 1836–1907
English physiologist
Born in Huntingdon, Huntingdonshire, he was educated there and at University College London, where he taught physiology until 1870. He then moved to Cambridge, where he became professor in 1883. He was MP for London University (1900–06). His *Textbook of Physiology* (1877) became a standard work.

Foster, Norman, Baron *See panel above*

Foster, Stephen Collins 1826–64
US songwriter
Born in Pittsburgh, he was a largely self-taught musician who began his career as a bookkeeper in Cincinnati and spent his spare time writing songs inspired by African-American life and the South. Himself a white Northerner, he published *Foster's Ethiopian Melodies* in 1849, the same year his song 'O Susannah' became the popular favourite of the migrants to the California Gold Rush. Of his 125 compositions the best known are 'The Old Folks at Home', 'Nelly Bly', 'Camptown Races', 'Beautiful Dreamer', 'Jeannie with the Light Brown Hair' and 'Old Kentucky Home'. He wrote both words and music for his songs, which vary in tone from the compelling simplicity of folk music to the sentimentality of 19th-century popular music. The EDWIN P CHRISTY minstrel troupe helped make his work widely known, but by the time of his death in New York City he was in debt and living in poverty.

Foucauld, Charles Eugène, Vicomte de, *known as* **Brother Charles of Jesus** 1858–1916
French soldier, explorer, monk and mystic
Born in Strasbourg, he achieved fame through his exploration of Morocco (1883–84), then in 1886 turned his attention to Catholicism, embarking on a life-long spiritual journey. He felt called to imitate JESUS CHRIST in a life of personal poverty in small contemplative communities financed solely by their own manual labour. He spent time as a Trappist monk in France and Syria, a hermit in Nazareth, a garrison priest at Beni-Abbès, Algeria, and a nomadic hermit among the Tuareg around Tamanrasset. He was murdered, but his ideals survived in the foundation of the Little Brothers (1933) and Little Sisters (1939) of Jesus, now active worldwide.

Foucault, Jean Bernard Léon 1819–68
French physicist
Born in Paris, he began a career as a physician but gave up as he detested the sight of blood. Turning to experimental physics, he determined the velocity of light by the revolving mirror method originally proposed by FRANÇOIS ARAGO, and proved that light travels more slowly in water than in air (1850), showing the inverse relation between the speeds in the two media and their refractive indices. This was convincing evidence of the wave nature of light and earned Foucault his doctorate. In 1851, by means of a freely suspended pendulum, he convincingly demonstrated the rotation of the Earth. In 1852 he constructed the first gyroscope, in 1857 the Foucault prism and in 1858 he improved the mirrors of reflecting telescopes.

Foucault, Michel 1926–84
French philosopher and historian of ideas
Born in Poitiers, he was a student of the Marxist philosopher LOUIS ALTHUSSER and became professor of history of systems of thought at the Collège de France, Paris (1970). He wrote a series of very influential and provocative books, including *Histoire de la folie* (1961, Eng trans *Madness and Civilization*, 1971), *Les Mots et les choses* (1966, Eng trans *The Order of Things*, 1970), *L'Archéologie du savoir* (1969, Eng trans *The Archaeology of Knowledge*, 1972) and *Histoire de la sexualité* (1976, Eng trans *The History of Sexuality*, 1984). His basic thesis in tracing the changing historical assumptions about what counts as 'knowledge' at any one time was both relativistic and cynical. Prevailing social attitudes are manipulated by those in power, both to define such categories as insanity, illness, sexuality and criminality, and to use these in turn to identify and oppress the 'deviants'.

Fouché, Joseph, Duc d'Otrante 1763–1829
French revolutionary politician
Born in Nantes, he was a member of a Catholic teaching order before 1789, then was elected to the National Convention (1792), becoming an extreme revolutionary. He was noted for his zealous support of attacks on the Christian religion, and for his part in the bloody suppression of opposition at Lyons. He then turned against ROBESPIERRE, being one of the main organizers of the Thermidor coup. Appointed chief of police in 1799, he helped to bring NAPOLEON I to power, and retained the post until 1815, surviving all the rapid changes of 1814–15. The First Empire gave him his titles of nobility and great wealth. He was banished in 1816. 🕮 Hubert Cole, *Fouché, the Unprincipled Patriot* (1971)

Foucquet, Nicolas *See* FOUQUET, NICOLAS

Foulds, John 1880–1939
English composer
Born in Manchester and largely self-taught, he played cello in the Hallé Orchestra under HANS RICHTER, who premiered his cello concerto (1911). A tone poem, *Epithalamium*, was conducted by Sir HENRY WOOD in London (1906). Known mainly for light music during his lifetime, Foulds had an innovative style, the value of which was long overlooked. From 1915 he became fascinated with oriental (especially Indian) music, and fused these in his works. His major works include *A World Requiem* (1921), the tone poem *April-England* (1926–32), *Mantras* for orchestra (1930), *Quartetto Intimo* (1932, his ninth string quartet) and other chamber, orchestral, vocal and piano pieces. He emigrated to India in 1935.

Fouqué, Friedrich Heinrich Karl de la Motte, Baron 1777–1843
German writer
Born in Brandenburg, he served as a Prussian cavalry officer in 1794 and 1813. Between campaigns he devoted himself to literary pursuits, and the rest of his life was spent in Paris, on his estate at Nennhausen and, after 1830, in Halle. He published a long series of romances based on Norse legend and Old French poetry, the best known of which is the fairy romance *Undine* (1811).

Fouquet, Jean c.1420–c.1480
French painter
Born in Tours, he visited Rome between 1445 and 1448 when Pope EUGENIUS IV commissioned a portrait from him. Returning to Tours, he opened a prosperous workshop. In 1475 he received the official title of King's Painter. A copy of FLAVIUS JOSEPHUS's *Antiquities of the Jews* contains paintings which have been attributed to him. To him also are attributed the *Hours of Étienne Chevalier*, at Chantilly, and several panel portraits, including that of CHARLES VII, and AGNÈS SOREL as the Virgin. In his miniatures he combined Italian influences such as architectural perspectives and ornamental detail, with the more northern traits of realistic and unidealized portrayal.

Fouquet or **Foucquet, Nicolas, Vicomte de Melun et de Vaux** and **Marquis de Belle-Isle** 1615–80
French statesman
Born in Paris, he was made Procureur-Général to the parliament of Paris by Cardinal MAZARIN (1650) and superintendent of finance (1653). He became very rich, and was ambitious to succeed Mazarin as chief minister, but LOUIS XIV himself took over the position on Mazarin's death, and Fouquet was arrested for embezzlement (1661) and sentenced to life imprisonment in the fortress of Pignerol, where he died.

Fouquier-Tinville, Antoine Quentin 1747–95
French Revolutionary politician
Born in Herouël, he was public prosecutor to the Revolutionary tribunal from 1793. He superintended all the political executions during the Reign of Terror until July 1794, when he sent his friends, among them ROBESPIERRE, DANTON and HÉBERT, to execution. He himself was guillotined.

Fourcroy, Antoine François, Comte de 1755–1809
French chemist
Born in Paris, he studied medicine, qualifying in 1780. He became professor at the Jardins des Plantes in 1784, and from 1786 onwards promulgated the revolutionary chemical theories of ANTOINE LAVOISIER, both in the classroom and in print. He improved methods of analysing mineral waters, discovered the double salts of ammonia and magnesia, and studied the physiology of muscles. With NICOLAS-LOUIS VAUQUELIN he discovered iridium and made extensive chemical investigations of animal organs and fluids, isolating urea in 1808. Before the Revolution he was one of the leaders of the scientific community and one of the founders of the influential journal *Annales de chimie*. He also helped Lavoisier, Baron LOUIS BERNARD GUYTON DE MORVEAU and MARCELLIN BERTHELOT to develop a new system of chemical nomenclature. During the Revolution he was a member of the Committee of Public Instruction and the Committee of Public Safety, working to reorganize higher education and munitions manufacture, and helping to establish the Institut National des Sciences et des Arts. In 1802 NAPOLEON I appointed him director-general of public instruction and in 1808 made him a Count of the Empire.

Fourdrinier, Henry 1766–1854 and **Sealy** d.1847
English paper-makers and inventors
With the assistance of BRYAN DONKIN, in 1806 the brothers patented an improved design of a paper-making machine, capable of producing a continuous sheet of paper. The liquid pulp was fed on to a wire-mesh belted through which the water drained away, and the resulting damp web of paper was first heated and then passed between heavy rollers, which gave it

the required smooth finish. The same basic type of machine, with further improvements, is still in use today.

Fourier, (François Marie) Charles 1772–1837
French social theorist
Born in Besançon, he worked for some years as a commercial traveller but became repelled and obsessed by the abuses of civilization. After the Revolution (in which he was imprisoned, and only just escaped the guillotine) he published a number of Utopian socialist works, *Théorie des quatre mouvements et des destinées générales* (1808, Eng trans *The Social Destiny of Man*, 1857), *Traité d'association domestique agricole* (1822, 'A Treatise on Domestic Agricultural Association') and *Le Nouveau monde industriel et sociétaire* (1829, 'The Industrial New World'). In these he advocated a reorganization of society into self-sufficient units (*phalanstères*, 'phalanxes') which would be scientifically planned to offer a maximum of both co-operation and self-fulfilment to their members. Conventional living arrangements, property ownership and marriage would all be radically redesigned. Several experimental 'phalanxes' were founded in France and the USA, and although these failed, his ideas attracted great popular interest and many adherents.

Fourier, (Jean Baptiste) Joseph, Baron de 1768–1830
French mathematician
Born in Auxerre, he joined the staff (1795) of the École Normale in Paris, where his success led to the offer of the chair of analysis at the École Polytechnique. He accompanied NAPOLEONI to Egypt in 1798, and on his return in 1802 was made prefect of Isère in Grenoble, and later baron (1808). He was later made a member of the Academy of Sciences of Paris (1817). Fourier introduced the expansion of functions in trigonometric series, now known as Fourier series, which proposed that almost any function of a real variable can be expressed as a sum of the sines and cosines of integral multiples of the variable. This method has become an essential tool in mathematical physics and a major theme of analysis. His *Théorie analytique de la chaleur* (1822, 'Analytical Theory of Heat') applied the technique to the solution of partial differential equations to describe heat conduction in a solid body. He also discovered an important theorem on the roots of algebraic equations. 🕮 I Grattan-Guiness, *Joseph Fourier, 1768–1830* (1972)

Fourneyron, Benoît 1802–67
French engineer and inventor
Born in St-Étienne, Loire, he was educated at the École des Mines. In the early 19th century traditional water wheels were still an important source of power in many industries, and Fourneyron determined to improve on their very low efficiency by 20 per cent. He developed a prototype outward-flow radial turbine in 1827, and by 1833 he had built a larger 50 horse-power turbine with an efficiency of about 75 per cent. In 1895 Fourneyron turbines were installed in the Niagara Falls hydro-electric generating station, but their inherent drawback of a poor part-load performance led to their being replaced after a few years by FRANCIS-type machines.

Fournier, Alain- *See* ALAIN-FOURNIER

Fournier, Henri-Alban *See* ALAIN-FOURNIER

Fou Ts'ong 1934–
Chinese pianist
Born in Shanghai, he studied under the Italian pianist and founder of the Shanghai Symphony Orchestra, Mario Paci. He won third prize in the International Chopin Competition in Warsaw (1955). He is a distinguished interpreter of MOZART and CHOPIN, and, basing himself in London since 1958, has performed extensively on the international circuit.

Fowke, Francis 1823–65
British engineer and architect
Born in Belfast, he obtained a commission in the Royal Engineers on the strength of his drawing and in 1856 he was appointed architect and engineer to the government Department of Science and Art. The designer of the original plans for several major museums in Great Britain, he planned the Albert Hall in London, produced the original designs for the Victoria and Albert Museum in London (completed by Sir ASTON WEBB), and planned the Royal Scottish Museum in Edinburgh.

Fowler, Henry Watson 1858–1933
English lexicographer
Born in Tonbridge, Kent, he was educated at Rugby and Balliol College, Oxford, became a schoolmaster at Sedbergh (1882–99), then went to London to try journalism. After the failure of his *Collected Essays*, published in 1903 at his own expense, he went to Guernsey, where his brother Frank George Fowler (1871–1918) was a tomato-grower. Together they produced *The King's English* (1906) and the *Concise Oxford Dictionary* (1911). After the death of his brother, Fowler produced the *Pocket Oxford Dictionary* (1924) and his immensely successful, if mannered, *Dictionary of Modern English Usage* (1926). The US counterpart is Margaret Nicholson's *A Dictionary of American English Usage, Based on Fowler*. 🕮 Ernest Gowers, *H W Fowler* (1957)

Fowler, Sir John 1817–98
English civil engineer
Born in Wadsley Hall, Sheffield, he constructed railways from an early age. These included the London Metropolitan Railway, the original London Underground and Victoria Station, London. River improvement and dock construction also occupied his attention. He was consulting engineer to ISMAIL PASHA, the Khedive of Egypt (1871–79). He designed the Pimlico Railway Bridge (1860) and, with Sir BENJAMIN BAKER, the Forth Railway Bridge (1882–90).

Fowler, Sir (Edward) Michael Coulson 1929–
New Zealand architect, writer and politician
Born in Marton, near Wanganui, he was educated at Christ's College, Christchurch, and Auckland University. After working in architectural practices in New Zealand and in the London offices of OVE ARUP (1955–56), he became a partner (1959) in a Wellington practice which has designed several major Wellington buildings. He was elected to Wellington City Council (1968–74), and was mayor from 1974 to 1983. Widely travelled, he has written a number of popular architectural books, including *The Architecture and Planning of Moscow* (1980), *Wellington Wellington – a History* (1981) and *University of Auckland* (1993). These books are illustrated with his own sketches, which themselves have been the subject of several one-man exhibitions. He was knighted in 1981.

Fowler, William Alfred 1911–95
US physicist and Nobel Prize winner
Born in Pittsburgh, Pennsylvania, he studied at Ohio State University, obtained his PhD from the California Institute of Technology (Caltech, 1936) for work on radioactive nuclides, and became professor there in 1946. He made detailed measurements of nuclear reactions at low energies and extrapolated to obtain a better idea of what occurs at higher stellar energies. Fowler established the existence of the excited helium state predicted by Sir FRED HOYLE, which proved a crucial link in the stellar evolution theory which he developed with Hoyle and GEOFFREY and MARGARET BURBIDGE to explain the synthesis of heavy elements in stellar cores. Fowler continued to work on the details of stellar nucleosynthesis, including solar neutrino flux calculations. In 1974 he won the US National Medal of Science, and for his work on stellar evolution and nucleosynthesis he shared the 1983 Nobel Prize in physics with SUBRAHMANYAN CHANDRASEKHAR.

Fowles, John Robert 1926–2005
English novelist
Born in Leigh-on-Sea, Essex, he was educated at Bedford School, Edinburgh University and New College, Oxford, where he studied French. He served in the Royal Marines (1945–46), and thereafter taught in schools in France, Greece and London. An allusive and richly descriptive writer, he wrote his first novel, and still perhaps his most sensational, *The Collector*, in 1963. However, *The Magus* (1965, rev edn 1977) is the book which made his name. Drawing on his own experience, it is set in the 1960s on a remote Greek island. It is a disturbing and much-imitated tale about an English schoolteacher, his bizarre experiences and his involvement with a master trickster. *The French Lieutenant's Woman* (1969), however, exceeded it in popularity, in large part due to the film version with MERYL STREEP in the title role. He moved to Lyme Regis, scene of the latter book, in 1968. Later books – *Daniel Martin* (1977), *Mantissa* (1982) and *A Maggot* (1985) – suffered a critical backlash but underlined his willingness to experiment. He also produced a collection of short stories, *The Ebony Tower* (1974). He spent his later years publishing non-fiction, including his journals (2003 and 2006). 🕮 Thomas C Foster, *Understanding John Fowles* (1994)

Fox, Sir Charles 1810–74
English civil engineer
Born in Derby, he built the Crystal Palace in London for the Great Exhibition (1851). He also did much railway construction with his two sons, Sir Charles Douglas Fox (1840–1921) and Sir Francis Fox (1844–1927), themselves both eminent engineers.

Fox, Charles James 1749–1806
English politician
Born in London, he was the third son of the 1st Lord Holland. Educated at Eton and Hertford College, Oxford, he became the MP for Midhurst at the age of 19. He later became a supporter of Lord NORTH and a Lord of the Admiralty. In 1772 he resigned, but the next year was named a commissioner of the Treasury. North dismissed him in 1775 after a quarrel. During the American War Fox was the most formidable opponent of the coercive measures of government. After the downfall of North (1782), he was a secretary of state. In 1783 the North and Fox coalition was formed, and Fox resumed his former office, but the rejection of his India Bill by the Lords led to the resignation of his government. When WILLIAM PITT, the Younger, came to power, the long contest between him and Fox began. The regency, the trial of WARREN HASTINGS and the French Revolution afforded scope to his talents, and he employed his influence to modify and counteract the policy of his rival. He was a strenuous opponent of the war with France, and an advocate of non-intervention. After Pitt's death in 1806, Fox, recalled to office, set in motion negotiations for a peace with France. He was on the point of introducing a bill for the abolition of the slave trade when he died. Although Fox was addicted to gambling and drinking, EDMUND BURKE called him 'the greatest debater the world ever saw'. He was buried, near Pitt, in Westminster Abbey, London. 🕮 John W Derry, *Charles James Fox* (1972)

Fox, George 1624–91
English religious leader, and founder of the Society of Friends, or 'Quakers'
Born in Fenny Drayton, Leicestershire, he seems to have received little formal education and was apprenticed to a cobbler. A Puritan by upbringing, at the age of 19 he rebelled against the formalism of the established Church and the state's control of it. He travelled around the country, attracting many followers and often interrupting services to expound his own teaching. He inveighed against sacerdotalism and formalism, and was equally vehement against social convention. In 1646 he had a divine revelation that inspired him to preach a gospel of brotherly love and call his society the 'Friends of Truth'. His life is a record of insults, persecutions and imprisonments. In 1656, the year after he and his followers refused to take the Oath of Abjuration, nearly 1,000 of them were in prison. He went to Barbados, Jamaica, America, Holland and Germany, latterly accompanied by WILLIAM PENN, ROBERT BARCLAY and other Quaker leaders. His preaching and writings were often turgid, incoherent and mystical, but as a writer he will be remembered for his *Journal*, published posthumously in 1694. 🕮 Vernon Noble, *The Man in Leather Breeches* (1953)

Fox, Henry Richard *See* HOLLAND, 3RD BARON

Fox, Richard *See* FOXE, RICHARD

Fox, Richard 1960–
English canoeist
The first man to be five times world champion in singles kayak, he was also a member of the British team who won the title five times during the 1980s. Kayaking was not an Olympic event between 1972 and 1992, denying this talented paddler an Olympic title, and in the kayak slalom singles in the 1992 Barcelona Olympics he finished a disappointing fourth. However, the following year he won the world championship title for the fifth time. In 1998 he moved to Australia, where he has since been appointed to a number of senior coaching positions.

Foxe, John 1516–87
English martyrologist
Born in Boston, Lincolnshire, he entered Brasenose College, Oxford, at the age of 16, and became a Fellow of Magdalen College (1538–45). During the reign of MARY I, TUDOR, he lived on the Continent, where he met JOHN KNOX, Edmund Grindal (1519–83) and Whittingham. On ELIZABETH I's accession he received a pension and a prebend of Salisbury (1563), but lived chiefly in London. He published numerous controversial treatises and sermons, besides an apocalyptic Latin mystery play called *Christus Triumphans* (1556). His best known work is *History of the Acts and Monuments of the Church*, popularly known as *Foxe's Book of Martyrs*, the first part of which was published in Latin at Strasbourg in 1554 (trans 1563).

Foxe or **Fox, Richard** c.1448–1528
English prelate
Born near Grantham, Lincolnshire, he studied at Oxford, Cambridge and Paris, and latterly became bishop successively of Exeter, Bath and Wells, Durham and Winchester. He founded Corpus Christi College, Oxford, in 1517.

Fox Quesada, Vicente 1942–
Mexican politician
Born in Guanajuato in central Mexico, he was educated at the Universidad Iberoamericana, Mexico City, and at Harvard. Having risen from salesman to president of the Mexican subsidiary of the Coca-Cola Group, he joined the centre-right National Action Party (PAN) and was elected a federal deputy in 1988. He became governor of Guanajuato in 1995 and was elected president of Mexico in December 2000, ending 71 years of uninterrupted rule by the Institutional Revolutionary Party (PRI) and promising to fight corruption and promote economic growth. A conservative free-marketeer, he was accused by opposition critics of betraying the Estrada Doctrine with his attempts to improve relations with the USA, particularly over emigration, and with his criticism of Cuba, a long-standing ally. Constitutionally barred from seeking a second term, he was succeeded in 2006 by Felipe Calderón (1962–).

Foyt, A(nthony) J(oseph), Jnr 1935–
US racing driver
He was born in Houston, Texas, and became America's most successful driver. He was the first to win the prestigious Indianapolis 500 (the 500-mile, 200-lap race in the USA, started in 1911) four times (1961, 1964, 1967, 1977). He also won the equally famous Le Mans 24-hour race in 1967. The only racing driver to have won seven national championships, he retired in 1993. He also breeds and trains racehorses. 🕮 *A.J.: The Life of America's Race Car Driver* (1983)

Fra Angelico *See* ANGELICO, FRA

Fra Bartolommeo *See* BARTOLOMMEO, FRA

Fracastoro, Girolamo 1483–1553
Italian scholar and physician
He was born in Verona. In 1502 he became professor of philosophy at Padua, but he also practised successfully as a physician at Verona, and excelled as an astronomer, geographer and mathematician. He wrote on the theory of music and left a Latin poem on the 'new' venereal disease, *Syphilis sive morbus Gallicus* (*Syphilis, or the French Disease*, 1530), from which the word 'syphilis' is derived. His works on contagion developed the older notions of the 'seeds of disease' and pointed to the importance of *fomites* (clothes, bedding etc) in the spread of certain diseases.

Fra Diavolo, *properly* **Michele Pezza** 1760–1806
Italian brigand and renegade monk
Born in Itri, he headed a band of desperados in the Calabrian mountains for years and evaded capture by skilful guerrilla warfare. In 1806 he attempted to excite Calabria against France, but was taken prisoner and executed at Naples.

Fraenkel-Conrat, Heinz 1910–99
US biochemist
Born in Breslau, Germany (now Wrocław, Poland), he studied medicine there and biochemistry in Edinburgh before moving to the USA in 1936. He returned to work in Europe before joining the staff of the University of California at Berkeley in 1952, becoming professor of virology in 1958 and later professor of molecular biology. Working with viruses, he showed that an active virus could be reconstituted from its inactive protein and nucleic acid components, and that it was a 'living chemical' and a basic unit in the new science of molecular biology (1955). Later he studied methods for the sequence analysis of RNA and chemical modification in relation to protein–RNA interactions.

Fraga Iribarne, Manuel 1922–
Spanish politician and academic
As minister of information and tourism under General FRANCO (1962–69), he liberalized the regime, above all through the Press Law of 1966. By contrast, he was a hardline minister of the interior (1975–76). In 1976 he founded Alianza Popular (AP, Popular Alliance), which became the main opposition party to the Spanish Socialist Workers Party (PSOE) in 1982 and was renamed the PP in 1988. A conservative of authoritarian temperament, he was a dynamic, if abrasive, leader of the AP (1979–86) and was elected again in 1989. In 1989 he was elected president of the regional government of Galicia, his home region, a position he held until 2005.

Fragonard, Jean Honoré 1732–1806
French painter and engraver
Born in Grasse, he studied under FRANÇOIS BOUCHER and JEAN CHARDIN in Paris, and gained the Prix de Rome in 1752. He painted, with

luscious colouring and a loose touch, genre pictures of contemporary life, the amours of the French court (notably *The Progress of Love*, 1770, for Madame DU BARRY), and landscapes foreshadowing Impressionism. His *Bacchante endormie* ('The Sleeping Bacchante'), *La Chemise enlevée* ('The Shift Withdrawn') and other works are in the Louvre, Paris, and he is also represented in the Wallace Collection, London. The French Revolution ruined his career. 🕮 Jean-Pierre Cuzin, *Fragonard* (1988)

Frame, Janet Paterson 1924–2004
New Zealand novelist and short-story writer
She was born in Dunedin, and educated at Otago University and Dunedin Teachers' Training College. Her first book was a collection of short stories, *The Lagoon: Stories* (1951), which she followed five years later with a novel, *Owls Do Cry*. She spent much time in psychiatric hospitals after severe mental breakdowns, and her novels describe an existence in which the looming threat of disorder both attracts and frightens. She was applauded in her homeland, but only belatedly received international recognition with her key books *Scented Gardens for the Blind* (1963), *A State of Siege* (1966), *Intensive Care* (1970) and *Living in the Maniototo* (1979). Her short stories have been collected in *The Reservoir and Other Stories* (1966) and *You Are Now Entering the Human Heart* (1983), and some early verse was published as *The Pocket Mirror* (1967). The background to her work is implicit in three volumes of autobiography, *To the Island* (1982), *An Angel at My Table* (1984, filmed 1990) and *The Envoy from Mirror City* (1985). Her final novel, *The Carpathians*, was published in 1988, a few years before she suffered two strokes. She was awarded the CBE in 1983 and the Order of New Zealand in 1990. 🕮 Michael King, *Wrestling with the Angel: A Life of Janet Frame* (2000)

Frampton, Sir George James 1860–1928
English sculptor
He was born in London, and studied at Lambeth School of Art under the painter WILLIAM FRITH. With Sir ALFRED GILBERT and HAMO THORNYCROFT he produced work in a naturalistic and sensitive style, notably a bronze *Peter Pan* in Kensington Gardens, London (1912), the group of QUINTIN HOGG and boys at the London polytechnic at Langham Place (1906) and the tinted marble and bronze *Dame Alice Owen* (1897, Potters Bar, London). He also produced the EDITH CAVELL memorial in London (1920) and the Lions at the British Museum.

Franca, Celia 1921–2007
English dancer
Born in London, she trained under MARIE RAMBERT, ANTONY TUDOR and Vera Volkova, performing with Ballet Rambert (1937–40), and moving to Sadler's Wells Royal Ballet in 1941, where she created roles in ROBERT HELPMANN's *Hamlet* (1942) and *Miracle in the Gorbals* (1944). Soon after returning to Ballet Rambert in 1950 she was invited by a group of dance patrons in Toronto to set up a new ballet company for Canada. In 1951 the National Ballet of Canada was founded under her directorship, and until her retirement in 1974 she built up a repertoire strong on Russian classics and work from British choreographers like FREDERICK ASHTON and Antony Tudor.

France, Anatole, *pseudonym of* **Anatole François Thibault** 1844–1924
French writer and Nobel Prize winner
Born in Paris, he began his literary career as a publisher's reader, 'blurb' writer and critic, and published his first volume of stories, *Jocaste et le chat maigre* ('Jocasta and the Thin Cat'), in 1879, followed by his first novel, *Le Crime de Sylvestre Bonnard* (1881). Under the literary patronage of Madame de Caillavet, whose love affair with him brought about his divorce (1893), he poured out a number of graceful, lively novels, critical studies and the like, such as the Parnassian *Le Livre de mon ami* (1885, 'My Friend's Book'), a picture of childhood happiness, which stands in strong contrast to later satirical, solipsistic and sceptical works such as *Les Opinions de Jérôme Coignard* (1893). The DREYFUS case (1896) stirred him into politics as an opponent of Church and State and champion of internationalism. His *Île des pingouins* (1908, 'Isle of Penguins'), in which the evolution of mankind is satirically treated, was followed by *Les Dieux ont soif* (1912, 'The Gods are Thirsty'), a fable about the Terror, and *La Révolte des anges* (1914, 'The Angels' Revolt'), a satire on Christianity and theology. He was awarded the Nobel Prize in literature in 1921. 🕮 R Virtanen, *Anatole France* (1968); J Roujon, *La vie et les opinions d'Anatole France* (1925)

Francesca, Maria *See* CABRINI, ST FRANCESCA XAVIER

Francesca, Piero Della *See* PIERO DELLA FRANCESCA

Francesca da Rimini d.c.1285
Italian noblewoman
She was the daughter of Guido da Polenta, Lord of Ravenna. She was married to Giovanni, Lord of Rimini, but she already loved Paolo, Giovanni's brother, and Giovanni, catching the lovers together, murdered them both. Her story was immortalized in DANTE's *Inferno*, and was the subject of an opera by RACHMANINOV.

Francesco di Giorgio 1439–1501 or 1502
Italian painter, sculptor and architect
He was born in Siena. Most of his paintings were executed in his early career, and now he is best known as an architect and architectural theorist. By 1477 he was working in Urbino where, as a military engineer, he designed the city's fortifications and, it is generally accepted, exploded the first land mine (1495) at a siege of Naples. He wrote a treatise on architecture and town planning, and LEONARDO DA VINCI, who knew him, owned one of his architectural manuscripts. He was appointed chief architect of Siena Cathedral in 1498.

Francesco di Paula, San *See* FRANCIS OF PAOLA, ST

Franchet d'Espérey, Louis Félix Marie François 1856–1942
French marshal
Born in Algeria, he had a varied military career and was made commanding general of the French 5th Army in 1914, gaining success at the Battle of the Marne. In 1918 GEORGES CLEMENCEAU appointed him commander-in-chief of Allied armies in Macedonia, where from Salonika he overthrew Bulgaria and advanced as far as Budapest. Only the end of the war prevented his dash for Berlin. He was made Marshal of France in 1922. He had some links to the French extreme right but refused to support PHILIPPE PÉTAIN and the Vichy State in 1940.

Francheville or **Franqueville, Pierre** 1548–1616
French sculptor, painter and architect
Born in Cambrai, he was long domiciled in Italy, where he studied under GIOVANNI BOLOGNA. He executed the two colossal statues of Jupiter and Janus in the courtyard of the GRIMALDI Palace, Genoa, and five statues in the Nicolini Chapel in Florence. Recalled to France by HENRY IV in 1604, he made the marble statue of David in the Louvre, Paris, and *Saturn Carrying Off Cybele* in the Tuileries Gardens.

Francia, *properly* **Francesco di Marco di Giacomo Raibolini** 1450–1517
Italian goldsmith and painter
Born in Bologna, he achieved fame as a craftsman in metal and niello, and he designed the first italic type for ALDUS MANUTIUS. As a painter in oils or in fresco he is noted for his madonnas. His sons, Giacomo (c.1486–1557) and Giulio (1487–1543), were also painters.

Francia, José Gaspar Rodriguez de 1756–1840
Dictator of Paraguay
Born near Asunción, he studied theology, was a professor of divinity, and practised law for 30 years with a high reputation. He assumed a prominent role in Paraguay's movement for independence and held absolute power from 1814 until his death, adopting a policy of isolating Paraguay from the outside world. Frugal and honest, but intensely cruel, he banned foreign trade, attempted national self-sufficiency through agricultural and industrial reform, and abolished noble privileges, together with the Inquisition. 🕮 José Antonio Vazquez, *El doctor Francia, visto y oido por sus contemporaneos* (1975)

Franciabigio, *also known as* **Francesco di Cristofano** 1482–1525
Florentine painter
Born possibly in Florence, he worked in collaboration with ANDREA DEL SARTO on the church of the Annunziata and the Chiostro dello Scalzo, and was much influenced by him and RAPHAEL. His *Madonna del Pozzo* (c.1508) was long thought to be by Raphael. His *Portrait of a Knight of Rhodes* is in the National Gallery, London.

Francis I 1494–1547
King of France
Born in Cognac, he was the son of Charles, Count of Angoulême, and nephew and son-in-law of LOUIS XII, whom he succeeded (1515) when France's rivalry with the Austrian Habsburg dynasty was at its most intense. His military reputation was established when he gained control of Milan at Marignano (1515). On the death of Emperor MAXIMILIAN I (1519) he became a

candidate for Holy Roman Emperor, but lost the election to Charles I of Spain (Emperor CHARLES V). In 1520 he met HENRY VIII of England at the Field of the Cloth of Gold, near Calais, a costly and portentous occasion intended to woo England away from its alliance with Charles, and he subsequently waged intermittent war against the emperor. A number of reverses followed, including Francis's capture at Pavia (1525), the price of his release (1526) being Flanders, Artois, Burgundy and all his Italian possessions. He joined the Holy League with the pope, England and Venice to check Charles's growing power, but once again lost Italy in the ensuing Treaty of Cambrai (1529). In a final peace at Crépy (1544) he abandoned all his Italian claims. In religious affairs he won control over the French Church through the Concordat of Bologna (1516) and in general he tried to act the part of a peacemaker. However, in the later years of his reign he became increasingly hostile to Protestants, allowing the persecution of heretics (1534) and becoming involved in the massacre of the Vaudois (Provençal peasants) in 1545. A notable patron of the Renaissance, he extended protection to humanist scholars like ERASMUS and the French humanists of the Cercle de Meaux. Brilliant, flamboyant and cultured, he fostered learning and the arts, and created the Palace of Fontainebleau.

Francis II 1544–60
King of France
He was the eldest son of HENRY II and CATHERINE DE MÉDICIS. As the Dauphin of France, in 1558 he married MARY, QUEEN OF SCOTS. He was a sickly boy, and his short reign (1559–60) was dominated by the Guise family in their struggle against the Protestants. 🕮 Marie-Thérèse de Martel, *Catalogue des actes de François II* (1991)

Francis I 1708–65
Holy Roman Emperor
Born in Nancy, Lorraine, the eldest son of Leopold, Duke of Lorraine and Grand Duke of Tuscany, he married MARIA THERESA of Austria in 1736 and became emperor in 1745. Capable but easy-going, he was overshadowed by his wife, and had little influence on government, except in economic matters.

Francis II of the Holy Roman Empire and **I of Austria** 1768–1835
Holy Roman Emperor, King of Hungary and of Bohemia
Born in Florence, he succeeded his father, LEOPOLD II, as Holy Roman Emperor (1792). In Austria's wars against France, it lost the Netherlands and Lombardy in return for Venice, Dalmatia and Istria (1797), and after defeats at Ulm and Austerlitz and the capture of Vienna (1805), Francis renounced the title of Holy Roman Emperor, and retained that of Emperor of Austria (Francis I), which he had assumed in 1804. In 1809 Austria lost Salzburg, Carinthia, Trieste, part of Croatia, Dalmatia and Galicia. After a short alliance with France he allied with the Russians and Prussians, assailed NAPOLEON I and helped to win the Battle of Leipzig (1813). Through the Treaty of Vienna (1815) he recovered, thanks to Prince CLEMENS METTERNICH, Lombardy, Venetia and Galicia. He was the King of Hungary until 1830, and of Bohemia until his death. His policy was conservative and anti-liberal, but personally he was an urbane and popular ruler, introducing railways and steamships on the Danube. 🕮 Victor Bibl, *Kaiser Franz* (1938)

Francis II Rákóczi *See* RÁKÓCZI, FRANCIS II

Francis of Assisi, St, *baptized* **Giovanni**, *originally* **Francesco di Pietro di Bernardone** c.1181–1226
Italian founder of the Franciscan Order
Born in Assisi, the son of a wealthy merchant, he was highly sociable and fond of good living. In c.1205, however, he joined a military expedition, then, halted by a dream, returned to live as a hermit and devoted himself to the care of the poor and the sick. By 1210 he had a brotherhood of eleven, for which he drew up a rule repudiating all property, which was originally approved by Pope INNOCENT III. In 1212 he also founded the 'Poor Clares', a Franciscan order for women. At the first general assembly in 1219, 5,000 members were present, and 500 more were claimants for admission. Francis went to Egypt (1223) and preached in the presence of the sultan, who promised better treatment for his Christian prisoners, and gave to the Franciscan order the privilege they have since enjoyed as guardians of the Holy Sepulchre. On his return to Italy he is said to have received, while praying, the stigmata of the wounds of JESUS CHRIST (1224). His works consist of letters, sermons, ascetic treatises, proverbs and hymns, including the well-known *Canticle of the Sun*. He was canonized by Pope GREGORY IX in 1228, and in 1980 was designated patron saint of ecology. His feast day is 4 October. 🕮 Thomas of Celano, *First and Second Life of St Francis with Selections from Treatises on the Miracles of Blessed Francis* (1963)

Francis of Paola, St, *Italian* **San Francesco di Paula** 1416–1507
Italian Franciscan monk
He was born in Paola, Calabria. He went to live in a cave at the age of 14 and was soon joined by others. He founded his order of Minim friars in 1436. Communities were established throughout Europe, but not in the British Isles. LOUIS XI of France summoned Francesco to his deathbed, and CHARLES VIII and LOUIS XII built him convents at Plessis-les-Tours and Amboise. He died at Plessis on Good Friday, and was canonized in 1519. His feast day is 2 April.

Francis of Sales, St 1567–1622
French Roman Catholic prelate and writer
Born in Sales, Savoy, he was educated by the Jesuits in Paris. He studied civil law at Padua, took orders and became a distinguished preacher. He successfully converted the Calvinistic population of Chablais, and in 1599 was appointed Bishop of Nicopolis. In 1602 in Paris he was invited to preach at the Louvre and his lectures had so much influence in converting several Huguenot nobles that the king offered him a French bishopric, which he declined. The same year, he became Bishop of Geneva. He established a congregation of nuns of the Order of the Visitation under the direction of Madame de Chantal. His *Introduction to a Devout Life* (1608) was the first manual of piety addressed to those living in society. In 1665 he was canonized by ALEXANDER VII. He is the patron saint of writers and his feast day is 24 January. 🕮 A J M Hamon, *Life of St Francis de Sales* (2 vols, 1925–29)

Francis, Clare Mary, *née* **Norman** 1946–
English yachtswoman and writer
Born in Surbiton, she was educated at the Royal Ballet School and London University. The first woman to make a single-handed crossing of the Atlantic (1973), she was the first woman home in *The Observer* Singlehanded Transatlantic Race, and holds the women's record for 1976. She was also the first woman to captain a boat in the Whitbread Round the World Race (1977–78). She now writes both fiction and non-fiction. She was awarded the MBE in 1978.

Francis, Connie, *originally* **Concetta Rosa Maria Franconero** 1938–
US pop singer and film actress
Born in Newark, New Jersey, she was discovered on a television talent show aged eleven, and had her first hit with 'Who's Sorry Now' (1957). In the late 1950s, she rivalled fellow Newarkian FRANK SINATRA for records sold, and capitalized on the new pop boom with songs like 'Lipstick on Your Collar'. Her first film appearance was in *Where the Boys Are* (1961), and she became known for appearances on military bases and for charity work. Her records continue to sell in large numbers, and she still performs.

Francis, Dick (Richard Stanley) 1920–
English jockey and writer
Born in Surrey, he became a professional jockey at the age of 28, and was on the point of winning the 1956 Grand National when his horse Devon Loch collapsed. He retired the following year and became a racing correspondent with the *Daily Express*. He also began writing popular thrillers with a racing background, and in 1980 he won the Golden Dagger Award of the American Crime Writers' Association. He has written a biography of LESTER PIGGOTT (1986) and over 30 novels, latterly *Shattered* (2000) and *Under Orders* (2006). 🕮 *The Sport of Queens* (1957)

Francis, James Bicheno 1815–92
US engineer and inventor
Born in South Leigh, Oxfordshire, England, in 1833 he emigrated to the USA, working first on railroad construction. By 1837 he had been appointed chief engineer to the 'Proprietors of the Locks and Canals on the Merrimack River', and when they decided to develop the river's power potential in 1845 he began to work on the design of an inward-flow turbine that now bears his name. He is also remembered for the 'Francis formula', describing the flow of water over weirs.

Francis, Sir Philip 1740–1818
British civil servant
Born in Dublin and educated at St Paul's School, London, he became a member of the Council of Bengal in 1773. In 1780 he fought a duel with WARREN HASTINGS, with whom he was always

Franco, Francisco, *in full* **Francisco Paulino Hermenegildo Teódulo Franco Bahamonde** 1892–1975
Spanish general and dictator

Franco was born in El Ferrol, Galicia, and graduated from Toledo military academy in 1910. He rose rapidly through the ranks in Spanish Morocco to become Europe's youngest general (1926). He oversaw the repression of the Asturias miners' revolt (1934), and during 1935 served as chief of staff. In 1936, at the last moment, he joined the conspiracy against the newly elected Popular Front government, which was launched on 17–18 July; the rebellion led to the Spanish Civil War.

Franco's leadership of the vital Army of Africa, and his close relations with the rebels' Italian and German allies, led to his becoming (September 1936) *generalíssimo* of the rebel forces and chief of the Nationalist state. Between October 1936 and April 1939 he led the Nationalists to victory, and presided over the construction of an authoritarian regime that endured until his death. During World War II, he wanted to join Germany and Italy, but HITLER was not prepared to pay his price of France's North African territories. Franco therefore kept Spain out of the war, but sent the Blue Division to fight in the USSR, and provided Germany with logistical and intelligence support.

In 1947, Franco was declared head of state for life by the reconstituted parliament (Cortes). During the 1950s, his anti-communist stand made possible a rapprochement with the Western powers, the 1953 Bases Agreement with the USA providing Franco with his breakthrough. The greatest paradox of Franco was that he oversaw the modernization of the Spanish economy in the 1950s and 1960s, which undermined the political foundations of his police state and prepared it for the transition to democracy. In 1969 he announced that on his death the monarchy would return in the person of JUAN CARLOS I, grandson of Spain's last ruling king. Franco died in Madrid, and within two years almost every vestige of his dictatorship had disappeared.

🕮 Paul Preston, *Franco: A Biography* (1993); J W D Trythall, *El Caudillo: A Political Biography of Franco* (1970); Brian Crozier, *Franco: A Biographical History* (1967).

arguing, and was seriously wounded. In 1781 he returned home with a fortune gained at whist. He entered parliament in 1784. He was energetic in the proceedings against Hastings, wrote many pamphlets, and was made a KCB in 1806. He was devoted to the prince regent, supported WILLIAM WILBERFORCE against the slave trade and founded the Friends of the People. In 1814 he married a second wife, who believed that he was the author of the Letters of Junius, printed in the *Public Advertiser* (1769–72).

Francis, Sam 1923–94
US abstract painter
Born in San Mateo, California, he began as a medical student but in 1945 turned to painting, studying at the California School of Fine Arts, San Francisco. He visited Paris in 1950 and had his first one-man show there in 1952. He also visited Japan, and his technique, applying thinned paint in small irregular blots, which he allowed to trickle down the surface to create an all-over pattern, reflects both US Action Painting of the late 1940s and early 1950s and traditional oriental calligraphy, as in *The Over Yellow* (1957–58, Stuttgart) and *In Lovely Blueness* (1957, Pompidou Centre). His later work created a sense of space by the use of white canvas with blots of colour, as in *Untitled L.A.* (1982).

Francis Xavier, St, *known as* **the Apostle of the Indies** 1506–52
Spanish missionary
Born at Xavier near Sanguesa, in the Basque country, he was the youngest son of Juan de Jasso, Privy Councillor to the King of Navarre. He studied, then lectured, at Paris, becoming acquainted with IGNATIUS LOYOLA, with whom he founded the Jesuit Society (1534). Ordained priest in 1537, he lived in Rome, and was sent in 1542 by John III of Portugal as a missionary to Goa, where he worked among both the native population and the Europeans. He visited Malacca, the Banda Islands, Amboyna, the Moluccas and Ceylon, where he converted the King of Kandy and many of his people. In 1548 he founded a mission in Japan, which flourished for 100 years. He returned to Goa (1552) to organize a mission to China, but died in the effort. He was canonized in 1622, and his only literary remains are *Letters* (1631) and a catechism, with some short ascetic treatises. His feast day is 3 December.

Franck, César Auguste 1822–90
French composer
Born in Liège, Belgium, of German parents, he studied at the Liège Conservatory and later in Paris, where he acquired French nationality. His early compositions were considered rather bizarre in France, but were given a better reception in Germany, where they were sponsored by FRANZ LISZT. In 1848 he settled in Paris as a teacher and organist, composing in his spare time, and in 1872 he was made organ professor at the Conservatory. Much of his considerable output was undistinguished, and his reputation rests on a few great works all written after the age of 50, the best known being his String Quartet (composed in the year of his death), his Symphony in D minor (1886–88), his Violin Sonata (1886), his *Variations symphoniques* for piano and orchestra (1885) and his tone poem *Le Chasseur maudit* (1881–82, 'The Accursed Hunter'). Some of his organ music is also performed. 🕮 Vincent d'Indy, *César Franck* (1906)

Franck, James 1882–1964
US physicist and Nobel Prize winner
Born in Hamburg, Germany, he was educated in Heidelberg and Berlin, and became professor of physics at Göttingen University (1920). He left Germany in 1933 in protest against Nazi policies and eventually settled in the USA, where he became professor of physical chemistry at the University of Chicago (1938–49). He worked with GUSTAV HERTZ in researching the laws governing energy transfer between molecules, for which they were jointly awarded the Nobel Prize in physics in 1925. They showed that atoms would only absorb a fixed amount of energy, thus demonstrating the quantized nature of the atom's electron energy levels. Franck was also one of the formulators of the Franck–Condon principle of vibrational transitions, and later worked on the development of the nuclear bomb in World War II at Los Alamos, although he headed the Franck Committee of scientists who urged that the bomb should not be used.

Franco, Francisco *See panel above*

François II *See* FRANCIS II

François, Mary Joseph *See* GARNIER, FRANCIS

Francome, John 1952–
English jockey, television commentator and author
Born in Swindon, he first rode a winning horse in 1969. Between then and his retirement in 1985, he established a then National Hunt record of 1,138 wins, his best season being 1983–84, with 131 wins. He was champion jockey seven times. Resourceful and adaptable, he has since continued his involvement with the sport as a trainer, a commentator for Channel 4 television, and as a writer. *Born Lucky*, his autobiography, was published in 1985, and he has since written several novels set in the racing world. He was awarded the MBE in 1986.

Franjiyeh, Suleyman 1910–92
Lebanese politician
President of Lebanon (and thus a Maronite) from 1970 to 1976, he began his presidency at a particularly tense period, when Palestinian guerrillas ejected from Jordan (1970–71) began conducting their operations from Palestinian refugee camps in Lebanon. He was president when civil war broke out in 1975 and left office in 1976, the year of the Syrian invasion. He was, however, still active in Maronite politics in 1978 when, as a result of his pro-Syrian stance (which lasted until 1984), a split occurred in Maronite ranks and Phalangist militia murdered his son, Tony Franjiyeh, and other members of his family.

Frank, Anne *See panel p570*

Frank, Bruno 1887–1945
German writer
Born in Stuttgart, he wrote historical novels, such as *Die Fürstin* (1915, 'The Princess'), *Aus vielen Jahren* (1937, 'From Many Years') and *Die Tochter* (1943, 'The Daughter'), in a style reminiscent of THOMAS MANN. His lyric poetry is also noteworthy. Of Jewish descent, he fled the Nazi regime and went to Beverly Hills, California, USA. His *Der Reisepass* (1937, 'The Travel Pass') was directed against National Socialism.

Frank, Anne 1929–45
German Jewish diarist

Anne Frank was born in Frankfurt am Main, the second daughter of Otto Frank, a member of a banking family who took his family to Holland in 1933 to establish a pharmaceutical company in Amsterdam. After the Nazi occupation of Holland, Anne hid with her family and four others in a specially prepared hiding-place in the two upper floors of an office building used by Frank's firm. There, supported with essential supplies by their friends (especially Miep Gies, who later wrote a memoir of her), they lived from July 1942 to August 1944, when they were betrayed. Anne was sent to Auschwitz and later Bergen-Belsen concentration camps, and died along with the other members of her family except for her father, who devoted the rest of his life to promoting the message of his daughter's diary.

The lively, moving diary she kept from 14 June 1942 and during her concealment was published in 1947 as *Het Achterhuis*, and was translated into English as *The Diary of Anne Frank* in 1952. It has since been published in over 50 languages, and has been dramatized and filmed. Anne Frank's name was given to villages and schools for refugee children throughout western Europe. In 1989 further entries from the diary, previously suppressed, were also published; these afford moving insights into Anne's repressed sexual feelings. A more recent edition is *The Diary of a Young Girl: The Definitive Edition* (1997).

📖 M Gies, *Anne Frank Remembered* (1987); E Schnabel, *The Footsteps of Anne Frank* (1959).

> 'I want to go on living after my death. And therefore I am grateful to God for giving me this gift ... of expressing all that is in me.'

Frank, Hans 1900–46
German Nazi politician
He was born in Karlsruhe and studied at the universities of Munich, Vienna and Kiel. He was minister of justice in Bavaria (1933), president of the German Law Academy (1934) and in 1939 became Governor-General of Poland, where he established concentration camps and conducted a policy of persecution and extermination. He was condemned as a war criminal and hanged.

Frank, Ilya Mikhailovich 1908–90
Soviet physicist and Nobel Prize winner
Born in Leningrad (now St Petersburg), he was educated at Moscow State University, and in 1944 was appointed professor of physics there, after working for four years at the State Optical Institute. By 1937, working with PAVEL CHERENKOV and IGOR TAMM, he and his colleagues were able to explain the 'Cherenkov effect', which arises when a charged particle traverses a medium when moving at a speed greater than the speed of light in that medium. The effect is dramatically visible in the blue glow in a uranium reactor core containing heavy water. Cherenkov, Frank and Tamm shared the Nobel Prize in physics in 1958.

Frank, Johann Peter 1745–1821
German physician, medical reformer and author
Born in Rotalben in the Palatinate, he studied medicine at several German and French universities. He held various university, hospital, court and administrative positions in Italy, Austria, Germany and Russia. One of his patrons was JOSEPH II of Austria. He wrote many medical works, most notably the multi-volume *System of a Complete Medical Policy*, published between 1779 and 1825, in which he described a comprehensive system of medical care, which, in combining preventative and curative medical services, was an early vision of the welfare state.

Frank, Leonhard 1882–1961
German novelist
Born in Würzburg, he published (1914) the novel *Die Räuberbande* ('The Gang of Robbers'), which describes the adventures of a gang of roguish boys. After fighting in World War I he conceived a horror of war which led to his strongly pacifist *Der Mensch ist gut* (1917, 'Man is Good'). *Die Ursache* (1915, 'The Cause') attacked the repressive educational system in Germany, and *Der Bürger* (1924, 'The Citizen') is about the deadening effect of bourgeois society on the spirit. His *Karl und Anna* (1926, 'Carl and Anna'), also a war story, was successfully turned into a play. He left Germany and went to the USA to live in Hollywood, where he wrote several books, including *Von drei Millionen drei* (1932, 'From Three Million and Three') and the autobiographical novel *Links, wo das Herz ist* (1952, 'On the Left, Where the Heart Is'). 📖 C French and H Jobs, *Leonhard Frank: 1882–1961* (1962)

Frank, Robert 1924–
Swiss–US photographer and film-maker
He was born in Zurich and was an industrial photographer during his early twenties before joining *Harper's Bazaar* magazine in Paris. He worked in fashion photography until 1948 and then travelled in the USA, South America and Europe. During the mid-1950s in the USA he created a series of photographs which were to establish him as one of the most influential photographers of his time. Bold images of US culture, capturing often shocking pictures of everyday trivia, they were published, with text by JACK KEROUAC, as *The Americans* (1959) and exemplified Frank's eye for bold composition and his often ironical point of view. He subsequently made films, including *Pull My Daisy* (1959, screenplay by Kerouac) about the authors of the Beat generation.

Frank, Waldo David 1889–1967
US novelist and journalist
Born in Long Branch, New Jersey, he co-edited *The Seven Arts* (1916–17), and later wrote novels and other works coloured by mysticism and Expressionism. Titles include *The Unwelcome Man* (1917), *City Block* (1922), *The Rediscovery of America* (1929) and *New Year's Eve* (1939, a play). 📖 P J Carter, *Waldo Frank* (1967)

Frankau, Gilbert 1884–1953
English novelist
He was born in London, the son of Julia Frankau (who wrote under the name of 'Frank Danby'). His early works were great successes and he continued as a professional writer, with a flair for anticipating popular taste. Of his many bestsellers, the most notable are *One of Us* (1912), *Peter Jackson, Cigar Merchant* (1919), *Men, Maids and Mustard-Pots* (1923) and *World without End* (1943). He was the father of PAMELA FRANKAU. 📖 *Gilbert Frankau's Self-Portrait: A Novel of His Own Life* (1940)

Frankau, Pamela 1908–67
English novelist
She was the daughter of GILBERT FRANKAU. In her first novel, *The Marriage of Harlequin* (1927), and her other early novels, she epitomized the era of the 'bright young things'. Her later novels were more serious in intent, and include *The Willow Cabin* (1949) and *A Wreath for the Enemy* (1954). *The Offshore Light* (1952) was written under the pseudonym 'Eliot Naylor'. 📖 *I Find Four People* (1935)

Frankenthaler, Helen 1928–
US abstract painter
Born in New York City, she studied under the Mexican painter RUFINO TAMAYO and at Bennington College, Vermont. Influenced by HANS HOFMANN, with whom she studied briefly at the Art Students' League in New York (1950), and JACKSON POLLOCK, she developed a technique of applying very thin paint to unprimed canvas, allowing it to soak in and create atmospheric stains and blots on the surface. Her best-known picture is *Mountains and Sea* (1952). She was married to the artist ROBERT MOTHERWELL from 1958 to 1971. In 1985 the Royal Ballet production of *Number Three*, with sets and costumes designed by her, opened at Covent Garden.

Frankfurter, Felix 1882–1965
US law teacher and judge
Born in Vienna, he emigrated to the USA as a child, and was educated at the College of the City of New York and at Harvard. He taught at Harvard Law School (1914–39) and served as an associate justice of the US Supreme Court (1939–62). He was a noted supporter of civil liberties and founded the American Civil Liberties Union, though in court he advised judicial restraint in opposing legislative and executive policy. In constitutional cases he claimed that judges should consider whether legislators could reasonably have enacted such a law. His major works are *The Business of the Supreme Court*

Franklin, Benjamin, *pseudonym* **Richard Saunders** 1706–90
US statesman, diplomat, printer, publisher, inventor and scientist

Benjamin Franklin was born in Boston, the youngest son of a chandler and the 15th of 17 children. He was apprenticed at the age of twelve to his brother James, a printer, who started a newspaper, the *New England Courant*, in 1721. The two later fell out and Benjamin drifted to Philadelphia, where he secured work as a printer. During 1724–26 he worked for 18 months in London, before returning to Philadelphia to establish his own successful printing house, and in 1729 he purchased the *Pennsylvania Gazette*. A year later, he married Deborah Read, by whom he had two children, a son, who died young, and a daughter, Sally. He also had an illegitimate son, William (later a Loyalist and the last royal governor of New Jersey).

In 1732 Franklin commenced the publication of *Poor Richard's Almanac*, which became popular for its witty aphorisms and attained an unprecedented circulation. He was an energetic citizen of Philadelphia, taking the lead in founding its first subscription library, paid police force, hospital and volunteer fire department, as well as its academy (later the University of Pennsylvania). He was appointed Clerk of the Assembly (1736), Postmaster of Philadelphia (1737) and then deputy Postmaster-General for the colonies (1753), being elected and re-elected a member of the assembly almost uninterruptedly until his first mission to England.

His invention of the Franklin stove and its commercial success encouraged him to turn from printing to the natural sciences in the 1740s, and in 1746 he commenced his famous researches in electricity. He brought out fully the distinction between positive and negative electricity, proved that lightning and electricity are identical, and suggested that buildings could be protected by lightning-conductors. Furthermore, he discovered the course of storms over the North American continent, the course of the Gulf Stream, its high temperature, and the use of the thermometer in navigating it; and the various powers of different colours to absorb solar heat.

A staunch advocate of colonial rights, he proposed to the Albany Congress a Plan of Union for the colonies in 1754, and in 1757 he was sent to England where he successfully insisted upon the right of the province to tax the proprietors of land held under the PENN charter for the cost of defending it from the French and the Native Americans. In 1764 he was again sent to England to contest the pretensions of parliament to tax the American colonies without representation. The differences, however, between the British government and the colonies became too grave to be reconciled by negotiation, and in 1775 Franklin returned to the USA, where he helped draft the Declaration of Independence.

To secure foreign assistance in the war, Franklin was sent to Paris in 1776. His skill as a negotiator and his personal popularity, reinforced by the antipathy of the French and the English, favoured his mission, and in February 1778 a treaty of alliance was signed, while munitions of war and money were sent from France that made possible the American victory in the Revolutionary War. He helped negotiate the Treaty of Paris (1783), ending the war with Great Britain, and remained US minister in Paris till 1785, when he returned to Philadelphia.

In 1787, frail and elderly, he was a delegate to the convention which framed the constitution of the USA. He retired from public life in 1788, but his mind remained active, and at the age of 83 he invented bifocal eyeglasses. His classic *Autobiography*, not published in its entirety until 1868, reflects the wide-ranging interests and passion for self-improvement that generated his achievements, although it reveals little of the irreverant temperament that makes Franklin one of the most appealing of the US founding fathers.

📖 E Wright, *Benjamin Franklin: His Life As He Wrote It* (1990); T Fleming, *The Man Who Dared the Lightning* (1964); Benjamin Franklin, *Autobiography of Benjamin Franklin*, ed L Larabee et al (1964).

> As an important negotiator and mediator in getting individuals to work together to establish an independent USA, Franklin warned his colleagues, on signing the Declaration of Independence: 'We must indeed all hang together or, most assuredly, we shall surely all hang separately.' (4 July 1776).

(1927, with J M Landis) and *The Public and Its Government* (1930).

Frankl, Ludwig, Ritter von Hochwart 1810–93
Austrian poet
Of Jewish origin, he became professor of aesthetics at the Vienna Conservatory (1851), and established the first Jewish school in Jerusalem (1856). He wrote epics, ballads and satirical poems, many of which have been translated. 📖 Biographical note in *Moderne Klassiker* (1852)

Frankland, Sir Edward 1825–99
English chemist
Born in Churchtown, Lancashire, he was attracted to chemistry while apprenticed to a pharmacist, and later studied under LYON PLAYFAIR in London, ROBERT WILHELM BUNSEN in Marburg and JUSTUS VON LIEBIG in Giessen. From 1847 to 1851 he was science master at Queenwood School, Hampshire, and he then became the first professor of chemistry at the newly founded Owen's College, Manchester. He returned to London in 1857 to lecture at St Bartholomew's Hospital, and from 1863 to 1865 was professor of chemistry at the Royal Institution in succession to MICHAEL FARADAY. In 1865 he followed AUGUST WILHELM VON HOFMANN at the Royal School of Mines, where he remained for 20 years. His pioneering work in organometallic chemistry around 1850 led to his development of the theory of valency, which underlies all structural chemistry. With Sir NORMAN LOCKYER he studied the solar spectrum and in 1868 they jointly discovered helium in the Sun's atmosphere. In applied chemistry Frankland did important work on water supply and sanitation. He was elected a Fellow of the Royal Society in 1853, received its Copley Medal in 1894 and was knighted in 1897. 📖 Colin Archibald Russell, *Lancastrian Chemist: The Early Years of Sir Edward Frankland* (1986)

Franklin, Aretha 1942–
US soul singer and pianist
Born in Memphis, Tennessee, the daughter of a well-known Detroit preacher and gospel singer, she established her name on the gospel circuit touring with the choir of his New Bethel Baptist Church before JOHN HAMMOND signed her to Columbia Records (1960). Although she spent six years with that label and recorded several successful albums, it was only after moving to Atlantic Records in 1967 that her full potential was realized. Producer Jerry Wexler capitalized on both her piano-playing skills and her gospel roots, most notably on *I Never Loved a Man the Way I Love You* (1967) and *Lady Soul* (1968). In 1972 she returned to the church with her album *Amazing Grace*, a two-record set of gospel songs recorded live in Los Angeles. Not content to rest on her soul laurels, she has frequently collaborated with pop artists. Duets with ANNIE LENNOX and GEORGE MICHAEL both topped the charts in the mid-1980s, and she won praise for her work with contemporary R&B artists on *A Rose Is Still a Rose* (1998). Known as the 'Queen of Soul', she has had more million-selling singles than any other female recording artist. 📖 Mark Bego, *Aretha Franklin, Queen of Soul* (2nd edn, 2001)

Franklin, Benjamin *See panel above*

Franklin, Frederic 1914–
English dancer, ballet director and teacher
He was born in Liverpool, and worked in cabarets and casinos in London and Paris, until ANTON DOLIN invited him to join the MARKOVA-Dolin Ballet (1935–37). He consolidated his international status as a member of Ballets Russes de Monte Carlo (1938–49, 1954–56), originating roles in such ballets as LÉONIDE MASSINE's *Gaîté Parisienne* (1938, 'Parisian Gaiety') and AGNES DE MILLE's *Rodeo* (1942, as the Champion Roper). He became company ballet master in 1944. Later he worked with various companies, including his own Slavenska-Franklin Ballet (founded 1951), National Ballet of Washington (artistic director, 1962–74), Pittsburgh Ballet Theatre (co-director) and Chicago Ballet.

Franklin, Lady Jane, *née* **Griffin** 1792–1875
English traveller and expedition benefactor
Born in England, she travelled widely with her father before marrying the explorer Sir JOHN FRANKLIN in 1828. She accompanied him on his tours through Syria, Turkey and Egypt, and

whilst he was governor of Van Diemen's Land (Tasmania) she campaigned vociferously for the rights of women prisoners. When her husband disappeared on a voyage in search of the North-west Passage, she financed a series of search expeditions, some of them in co-operation with the navy. After ten years her husband's diaries were recovered, showing he had proved the existence of the North-west Passage. She was awarded the Royal Geographical Society's Founder's Medal for her contribution to the exploration of the Canadian Arctic, becoming the first woman to be thus honoured.

Franklin, Sir John 1786–1847
English explorer
Born in Spilsby, Lincolnshire, he joined the navy at the age of 14 and was present at the battles of Copenhagen (1801) and Trafalgar (1805). From 1818 he made extensive land journeys along the Coppermine River and the Canadian Arctic coast, including the Mackenzie River (1819–22, 1825–27). He was governor of Van Diemen's Land (Tasmania) from 1834 to 1845. In 1845 he commanded the *Erebus* and *Terror* in an attempt to discover the Northwest Passage. Leaving Baffin Bay via Lancaster Sound, they wintered at Beechey Island, then worked along the coast of the North American mainland, but were beleaguered by thick ice in the Victoria Strait (1846). Franklin died during the following year. The 105 survivors under Captain Crozier attempted to walk to Back's River, but died of starvation and scurvy. One of the numerous relief expeditions sent out found a record of the expedition to April 1848, with definite proof that Franklin had discovered the Northwest Passage. Franklin's Gull is named after him. 🕮 Paul Nanton, *Arctic Breakthrough: Franklin's Expeditions, 1819–1847* (1970)

Franklin, John Hope 1915–
US historian
Born in Rentiesville, Oklahoma, the son of an attorney, he was educated at Fisk University and Harvard. He taught at several historically black institutions, joining Howard University in 1947 when he published his survey of the African-American historical experience, *From Slavery to Freedom: A History of American Negroes* (1947). In 1956 he became chairman of the department of history at Brooklyn College, and published *The Militant South*. His *Reconstruction after the Civil War* (1961) laid a judicious foundation for a reappraisal of the post-Civil War era from the African-American standpoint, and his *The Emancipation Proclamation* appeared in 1963. He was professor of American history at Chicago University (1964–82), James B Duke Professor of History at Duke University (1982–85), then emeritus, and was the first black president of the American Historical Association (1978–79). He also wrote *Racial Equality in America* (1976) and *The Color Line: Legacy for the 21st Century* (1993). He was awarded the Presidential Medal of Freedom in 1995, and his autobiography, *Mirror to America*, was published in 2005.

Franklin, (Stella Marian Sarah) Miles, *pseudonym* **Brent of Bin** 1879–1954
Australian novelist
Born in Talbingo, near Tumut, New South Wales, she spent her first ten years at a farm in the bush country, described in *Childhood at Brindabella* (1963). Later the family moved 'downmarket' to the district fictionalized in *My Brilliant Career* (1901) as Possum Gully, and eventually settled in a Sydney suburb. She briefly took up nursing, then turned to journalism, became involved in the feminist movement, and in 1906 emigrated to the USA, where she worked as secretary to the Women's Trade Union League. Moving to England in 1915, she helped with the war effort, serving with the Scottish Women's Hospital at Ostrovo, Macedonia. In 1932 she returned permanently to Australia, and began the 'Brent of Bin' series, starting with *Up the Country* (1928). Her best work appeared under her own name, including the early autobiographical novels *All That Swagger* (1936) and *My Career Goes Bung* (1946), and a collection of essays on Australian literature, *Laughter, Not for a Cage* (1956). The Miles Franklin awards are among Australia's most prestigious literary prizes. The popularity of her novels has tended to obscure the considerable contribution which she made to the social and professional development of Australian women. 🕮 M F Barnard, *Miles Franklin* (1967)

Franklin, Rosalind Elsie 1920–58
English X-ray crystallographer
Born in London, she studied physical chemistry at Cambridge and held a research post at the British Coal Utilization Research Association (1942–46), where her work was important in establishing carbon fibre technology. At the Central Government Laboratory for Chemistry in Paris (1947–50) she became experienced in X-ray diffraction techniques. She returned to London in 1951 to work on DNA at King's College. She produced X-ray diffraction pictures of DNA, which were published in the same issue of *Nature* (1953) in which JAMES WATSON and FRANCIS CRICK proposed their double-helical model of DNA. Finding it difficult to co-operate with MAURICE WILKINS, who was also working on DNA at King's College, Franklin left to join JOHN BERNAL's laboratory at Birkbeck College, London, to work on tobacco mosaic virus. She died four years before she could be awarded the 1962 Nobel Prize in physiology or medicine jointly with Watson, Crick and Wilkins for the determination of the structure of DNA. 🕮 Brenda Maddox, *Rosalind Franklin: The Dark Lady of DNA* (2002)

Franqueville, Pierre *See* FRANCHEVILLE, PIERRE

Franzen, Jonathan 1959–
US writer
Born in Western Springs, Illinois, he was educated at Swarthmore College. His debut novel *The Twenty-Seventh City* (1988) was widely acclaimed for its imaginative depiction of a fictional version of the city of St Louis. It was followed by *Strong Motion* (1992) and the bestselling *The Corrections* (2001), winner of the National Book Award and finalist for the Pulitzer Prize. It was chosen by OPRAH WINFREY for her book club; Franzen then provoked controversy by publicly criticizing Winfrey's literary tastes and her book club. His other books include *How to Be Alone: Essays* (2002) and a memoir, *The Discomfort Zone* (2006). He is a frequent contributor to *The New Yorker*.

Franz Ferdinand 1863–1914
Archduke of Austria
Born in Graz, he was the nephew and heir apparent (from 1896) of Emperor FRANZ JOSEPH. On a visit to Sarajevo (now in Bosnia) in 1914 he and his wife Sophie were assassinated by a group of young Serbian nationalists led by GAVRILO PRINCIP. Austria used the incident as a pretext for attacking Serbia, which precipitated World War I.

Franz Joseph, *properly* **Franz Joseph I** 1830–1916
Emperor of Austria, and King of Hungary
Born at the Schönbrunn Palace, Vienna, he was the son of the Archduke Francis (Emperor FRANCIS I's son) and the nephew of Ferdinand I (1793–1875), whom he succeeded (1848). He reigned longer than any other European monarch. His first task was to subdue the Hungarian revolt and pacify Lombardy. Having accomplished this, the aspirations of the various nationalities of the empire were rigorously suppressed, and a determined effort made to fuse them into one state. The emperor reasserted his claim to rule as an absolute sovereign, he reverted to a policy of bureaucratic centralization, and a close alliance was entered into with the Church to combat liberal progress. In 1859 Lombardy was wrested from Austria by Sardinia. Through the war with Prussia (1866) Austria was ostracized by Germany, and compelled to surrender Venetia to Sardinia, Prussia's ally. Hungary was granted autonomy in the Compromise of 1867, and Franz Joseph took the additional title of King of Hungary. The emperor then adopted a more conciliatory policy towards the various national groups within the empire. His annexation of Bosnia-Herzegovina (1908) agitated Europe and his attack on Serbia (1914) precipitated World War I. By the suicide at Mayerling of his son Rudolf (1858–89) and the murder at Sarajevo of his heir apparent, FRANZ FERDINAND, eldest son of the emperor's brother Charles Louis (1833–96), the crown passed to CHARLES. Elizabeth of Bavaria (1837–98), Franz Joseph's wife, was fatally stabbed in Geneva by an anarchist.

Franzos, Karl Emil 1848–1904
Austrian novelist
He was born in Podolia on the Austro-Russian border, of Jewish parentage, and his novels take their themes and settings from Galicia, the Bukovina, south Russia and Romania. They present vivid pictures of life among the Jews and peasants, and include *Aus Halbasien* (1876, 'From Asia Minor'), *Die Juden von Barnow* (1877, 'The Jews of Barnow'), *Ein Kampf ums Recht* (1882, 'A Struggle over the Law') and *Der Pojaz* (1905, 'The Pojaz').

Frasch, Hermann 1851–1914
US industrial chemist
Born in Gailsdorf, Württemberg, Germany, he emigrated to the USA in 1868 and worked in Philadelphia, Cleveland and London, Ontario, as a chemist and oil worker. In the 1880s he developed

a process for removing sulphur from petroleum, afterwards known as the Frasch process. In 1891 he patented a method (also known as the Frasch process) for extracting sulphur from deep deposits using superheated steam. He founded the Union Sulphur Company, which became the largest sulphur mining company in the world, and was subsequently also director of the International Sulphur Refineries of Marseilles.

Fraser, Lady Antonia, *née* **Pakenham** 1932–
English writer
Born in London, the daughter of the 7th Earl of Longford, she was educated at St Mary's Convent, Ascot, and Lady Margaret Hall, Oxford. She has written many historical biographies, including *Mary Queen of Scots* (1969, James Tait Black Memorial Prize), *Cromwell Our Chief of Men* (1973), *King James VI and I* (1974), *King Charles II* (1979), *Kings and Queens of England* (1975, reissued 1988), *The Six Wives of Henry VIII* (1992), *Marie Antoinette* (2001) and *Love and Louis XIV* (2006). *The Weaker Vessel* (1983) focuses on women in the 17th century. She has also written mystery stories, including *Quiet As A Nun* (1977), *Have A Nice Death* (1983) and *Political Death* (1994), which feature the detective Jemima Shore. She was married to politician Hugh Fraser from 1956–77, and married HAROLD PINTER in 1980. She was awarded the CBE in 1999.

Fraser (of North Cape), Bruce Austin Fraser, 1st Baron 1888–1981
English naval officer
Educated at Bradfield College, he joined the navy in 1902 and became a gunnery specialist. He served at sea in World War I and was chief of staff Mediterranean fleet (1938–39). In World War II he was first controller of the navy (1939–42) and then commander-in-chief home fleet (1943–44), Eastern fleet (1944) and British Pacific fleet (1945–46). He was a British signatory at the Tokyo Bay Peace Ceremony (1945). He was First Sea Lord from 1948 to 1951.

Fraser, Dawn 1937–
Australian swimmer
She was born in Balmain, Sydney, and her talent was discovered as a schoolgirl. In her swimming career she broke 27 world records and won 29 Australian championships. Her outstanding achievement was in winning gold medals at three successive Olympic Games: Melbourne (1956), Rome (1960) and Tokyo (1964), in each case setting a new Olympic record. At the Rome Olympic Games she broke three world records within one hour. In 1964 she became the first woman to break the 'magic minute' for the 100 metres with a time of 58.9 seconds, a record which was to stand for 20 years. She was often in conflict with the swimming authorities, but was awarded the MBE in 1967.

Fraser, George MacDonald 1925–
English historical novelist
Born in Carlisle, he grew up there and in Glasgow. Trained as a journalist, he became deputy editor of the *Glasgow Herald* (1968–69), but following the success of his first novel *Flashman* (1969) he left to become a full-time writer. He is best known for this and subsequent novels, starting with *Royal Flash* (1970), in which he turned the bully of THOMAS HUGHES's *Tom Brown's Schooldays* into a representative figure of the English caste system and of imperial values. Other books include a parallel sequence of novels with the more down-to-earth hero McAuslan, as in *McAuslan in the Rough* (1974). He also wrote the screenplays for the James Bond film *Octopussy* (1983) and a 1987 adaptation of the life of CASANOVA. His war experiences fuelled the surprisingly lyrical and elegiac *Quartered Safe Out Here* (1992). More recently he published *Flashman and the Tiger* (1999) and *Flashman on the March* (2005). He was awarded the OBE in 1999.

Fraser, (John) Malcolm 1930–
Australian politician
Born in Melbourne, he was educated at Melbourne Grammar School and at Oxford. In 1955 he became the youngest MP in the House of Representatives and was minister for the army (1966–68), minister for defence (1969–71), and minister for education and science (1968–69, 1971–72). He succeeded Billy Snedden as leader of the Liberal Party in 1975. After the constitutional crisis of November 1975 he was asked to lead a caretaker government until the elections in December, in which the Liberal-National Country coalition he was leading was returned to power. He remained prime minister until his party's defeat in the elections of 1983 by the Labor Party (for which it was only the second victory in 33 years). Soon after, he resigned his parliamentary seat. Since then he has worked as a member of the Commonwealth Group of Eminent Persons, formed to encourage reform in South Africa (1985–86), and was briefly special envoy to Africa for the HOWARD Goverment (1996). He was president of the aid organizations CARE International (1990–95) and CARE Australia (1987–2002). 🕮 Phillip Ayres, *Malcolm Fraser: A Biography* (1987)

Fraser, Marjory Kennedy 1857–1930
Scottish singer and folk-song collector
Born into a large musical family in Perth, she trained in Paris as a concert singer. In 1882 she started studying Gaelic music, took lessons in Gaelic, and began collecting Hebridean folk-songs, to which she gave modern harmonic settings. In 1909 she published *Songs of the Hebrides*. She also wrote the libretto of GRANVILLE BANTOCK's opera *The Seal Woman* (1924).

Fraser, Peter 1884–1950
New Zealand politician
He was born in Fearn, Ross and Cromarty, Scotland, and emigrated to New Zealand (1910), and became involved in trade-union organization. A founder member of the New Zealand Labour Party (1916), he was imprisoned during World War I for opposing conscription. He entered parliament in 1918, became deputy party leader in 1933, and leader and prime minister in 1940, holding office until 1949, when his government was defeated.

Fraser, Simon *See* LOVAT, LORD

Fraser, Simon 1776–1862
Canadian fur-trader and explorer
Born in Bennington, New York (now in Vermont), USA, he settled in Cornwall, Ontario, after the death of his Scottish father, who was killed fighting in the American Revolution. Working as a clerk in the North West Company, he was promoted to partner in 1801, and was sent in 1805 to establish the first trading posts in the Rocky Mountains. Following ALEXANDER MACKENZIE's route, he opened up a vast area, which he called New Caledonia, between the plains and the Pacific Ocean, and in 1808 followed the Fraser River, named after him, to its mouth. He headed the Red River department of the North West Company during conflict with settlers of the rival Hudson's Bay Company, before his retirement in 1818.

Fraser, Sir William 1816–98
Scottish archivist
A deputy keeper of records of Scotland (1880–92), he issued a series of sumptuous family histories with original charters, which were valuable as sources for Scottish history. By his will he endowed the Edinburgh chair of Scottish history, financed the *Scottish Peerage*, and founded the Fraser Homes.

Fraser Darling, Sir Frank 1903–79
English ecologist and conservationist
Born in Chesterfield, Derbyshire, he attended agricultural college at Sutton Bonnington and obtained a doctorate from the department of animal genetics at the University of Edinburgh. From 1930 to 1934 he studied the ecology of the red deer, publishing *A Herd of Red Deer* (1937), and subsequently carried out research on sea birds, showing how to improve the breeding of colonial birds by stimulating other members of the species, a phenomenon now known as the 'Fraser Darling effect'. He became convinced of the importance of living in ecological balance with the environment, and was one of the early champions of conservation. He was director of the West Highland Survey (1944–50), a senior lecturer in ecology and conservation at Edinburgh (1953–58) and vice-president of the Conservation Foundation, Washington, DC (1959–72). He wrote many books, carried out official ecological surveys and advised several government bodies. He also served as a member on the Royal Commission on Environmental Pollution (1970–72). He was knighted in 1970.

Fraunhofer, Joseph von 1787–1826
German physicist
Born in Straubing, Bavaria, he went in 1806 to the optical workshop of the Munich Philosophical Instrument Company, where his skill in glass-making and scientific knowledge enabled him to transform the firm's fortunes, becoming a director of the company by 1811. In 1823 he was appointed director of the Physics Museum of the Bavarian Academy of Sciences. Fraunhofer advanced the design of achromatic doublet lenses, showing how to minimize their spherical aberration, and using these improved designs he developed the prism spectrometer to discover the dark lines in the Sun's spectrum which now bear his name (1814–17). He invented the transmission diffraction grating in 1821, and subsequently the

reflection grating. Diffraction phenomena observed at very large distances from the diffracting aperture are known as Fraunhofer diffraction. His work laid the foundation for Germany's subsequent supremacy in the design and manufacture of optical instruments.

Frayn, Michael 1933–
English dramatist, journalist and humorist
He was born in London. A journalist by training, he has published a number of comic novels, among them *The Tin Men* (1965) and *Towards the End of the Morning* (1967), about the newspaper business. Other novels are *The Trick of It* (1989), *Now You Know* (1992) and *Headlong* (1999). His stage plays include *Alphabetical Order* (1975), set in the library of a provincial newspaper, *Clouds* (1976), about two rival journalists in Cuba, *Make and Break* (1980), a satirical look at the lives of salesmen at a foreign trade fair, *Noises Off* (1982), a frenetic farce about putting on a frenetic farce, *Benefactors* (1984), a piece about middle-class mores, and *Look Look* (1990). *Copenhagen* (1998), centring on the development of the atomic bomb, enjoyed success in the UK and won a Tony award (2000) on Broadway; *Democracy* (2003) explored the Cold War in Germany. He also wrote the script for the film *Clockwise* (1986), and is a translator of CHEKHOV. He is married to the biographer CLAIRE TOMALIN.

Frazer, Sir James George 1854–1941
Scottish social anthropologist, classicist and folklorist
Born in Glasgow, he was educated at Larchfield Academy in Helensburgh, Glasgow University and Trinity College, Cambridge, where he became a classics Fellow. His interest in anthropology, in combination with his classical studies, produced his major work, *The Golden Bough: A Study in Comparative Religion* (1890, rewritten in 12 vols, 1911–15). In addition to other anthropological works he published an edition of SALLUST (1884) and a translation of PAUSANIAS's *Description of Greece* (1898). He was professor of social anthropology at Liverpool (1907–08) and at Cambridge (from 1908). 🕮 Robert Ackerman, *J G Frazer: His Life and Work* (1987)

Frazier, Joe (Joseph William) 1944–
US boxer
Born in Beaufort, South Carolina, he came to prominence at the 1964 Olympic Games, where he won gold in the heavyweight division. As a professional, 'Smokin' Joe' was undisputed world heavyweight champion for several years, until his defeat in 1973 by GEORGE FOREMAN. He was the first man to beat MUHAMMAD ALI professionally (1971), but Ali went on to defeat him – first in 1974, and again the following year in the memorable bout known as the 'Thrilla in Manila', when Frazier was unable to answer the bell in the final round.

Frears, Stephen Arthur 1941–
English director
He was born in Leicester, and studied law at Cambridge University. After making his directorial debut with the 30-minute drama *The Burning* in 1967, he directed the feature-length *Gumshoe* (1971) and worked extensively for television over the next decade with such feature-length plays as *A Day Out* (1972) and *Walter* (1982). He returned to the big screen with *The Hit* (1984) and went on to direct the feature films *My Beautiful Laundrette* (1985), *Prick Up Your Ears* (1987), *Dangerous Liaisons* (1988) and *The Grifters* (1990). Throughout his career, he has moved with ease between film and television work, and across genres. More recent work includes *The Van* (1996), *High Fidelity* (2000), *Dirty Pretty Things* (2002), *Mrs Henderson Presents* (2005) and *The Queen* (2006, Academy Award nomination)

Frece, Lady de *See* TILLEY, VESTA

Fréchette, Louis Honoré 1839–1908
Canadian poet
Born in Lévis, Quebec, he was called to the Bar, and elected to the Dominion parliament in 1874. He published prose works and plays, and his poems *Mes loisirs* (1863), *La voix d'un exil* (1867, 'The Voice of an Exile'), which attacked Canadian politics, and others such as *Les Oiseaux de Neige* (1879, 'The Snow Birds') were highly acclaimed by the Académie Française. 🕮 M Dugas, *Un romantique canadien* (1934)

Fredegond, *also spelt* **Fredegund** or **Frédégonde** d.598
Frankish queen
She was first mistress, then wife, of Chilperic, King of Neustria. Monstrously cruel, she waged a relentless feud with her rival BRUNHILDE, wife of Sigebert, King of Austrasia, and sister of Chilperic of Neustria's first wife, a feud which was intensified by the rivalry between the two kingdoms.

Frederic, Harold 1856–98
US novelist
He was born in Utica, New York. After a poverty-stricken youth, he became a journalist and was in 1884 appointed European correspondent of the *New York Times*. He wrote *Seth's Brother's Wife* (1887), *The Return of the O'Mahony* (1892) and other novels depicting his own background, but his best work is *The Damnation of Theron Ware* (1896), about the intellectual awakening of a young minister. 🕮 A Briggs, *The Novels of Harold Frederic* (1969)

Frédérick *See* LEMAÎTRE, ANTOINE LOUIS PROSPER

Frederick I 1471–1533
King of Denmark and Norway
The son of CHRISTIAN I and uncle of CHRISTIAN II, he was Duke of Holstein before being chosen king (1523) when Christian II, who had just lost Sweden to GUSTAV I VASA, was dethroned by a rebellion in Denmark. An invasion of Norway (1531–32) by the ex-king failed. Frederick died soon afterwards, on the verge of accepting Lutheranism, and was succeeded by his son CHRISTIAN III.

Frederick II 1534–88
King of Denmark and Norway
Born in Hadenslev, he succeeded his father, CHRISTIAN III (1559) and soon became involved in a seven-year war against Sweden and its deranged king, ERIK XIV, which ended with the inconclusive Treaty of Stettin (1570). The remainder of his reign was a period of peace and prosperity, in which he rebuilt Denmark's economy and defences, imposing a toll on all ships passing through the Sound. He built the magnificent Renaissance castle of Kronborg at Elsinore, to which he brought English musicians to provide entertainment, and was a patron of the astronomer TYCHO BRAHE and other scientists. He was succeeded by his young son, CHRISTIAN IV. His daughter, ANNE OF DENMARK, married King JAMES VI AND I of Scotland and England.

Frederick III 1609–70
King of Denmark and Norway
The son and successor of CHRISTIAN IV, he was born at Haderslev. The first half of his reign (1648–70) was taken up with costly wars against Sweden, but after the peace settlement of 1660 he established absolute hereditary monarchy over Denmark, Norway and Iceland, embodied in the Royal Law (*Kongelov*) of 1665. He was an enlightened patron of scientific and antiquarian studies, and founded the Royal Library in Copenhagen. Under him the bourgeoisie was able to increase its hold over the government and former crown lands.

Frederick VI 1768–1839
King of Denmark and Norway
Born at Kristiansborg Castle, the son of CHRISTIAN VII, he was appointed regent (1784) when his father was declared insane, and became king of both Denmark and Norway in 1808. He abolished serfdom, amended the criminal code, prohibited the slave trade in Danish colonies, and promoted free trade and industrial development. During the Napoleonic Wars, the Danish fleet was destroyed off Copenhagen by NELSON (1801), and in 1807, despite Danish neutrality, Copenhagen was bombarded for three days. This forced Denmark into the arms of NAPOLEON I, and with the overthrow of Napoleon's empire (1814), she lost Norway to Sweden. Under Frederick's rule the Danish economy recovered from bankruptcy. He granted a new constitution with four consultative provincial assemblies (1834), which was the start of parliamentary democracy in Denmark. He was succeeded by his son, CHRISTIAN VIII.

Frederick VII 1808–63
King of Denmark
Born at Amalienborg Castle, the son and successor (1848) of CHRISTIAN VIII, he was the last of the Oldenburg line. In 1849 he promulgated a new and liberal constitution abolishing monarchical absolutism. He died childless, and was succeeded by CHRISTIAN IX.

Frederick VIII 1843–1912
King of Denmark
Born in Copenhagen, he was the son and successor (1906) of CHRISTIAN IX, and brother of Queen ALEXANDRA of Great Britain. In 1907 he made a state visit to Iceland to celebrate the granting of home rule there (1904). He married Princess Louise of Sweden, and was well liked for his simple lifestyle. His second son, Prince Carl, became King HAAKON VII of Norway. He was succeeded by his eldest son, CHRISTIAN X.

Frederick II, *known as* **Frederick the Great** 1712–86
King of Prussia

Frederick was born in Berlin, the son of FREDERICK WILLIAM I and Sophia-Dorothea, daughter of GEORGE I of Great Britain. His early years were devoted to military training and a rigid system of education, against which he initially rebelled to no avail. In 1733 he dutifully accepted as his bride Princess Elizabeth of Brunswick-Wolfenbüttel (1715–97), and he was restored to favour.

From 1734 Frederick resided at Rheinsberg, where he avidly studied music and French literature. He achieved a high level of proficiency on the flute, and some of his music is still played. He corresponded with VOLTAIRE, who in 1750 visited Berlin, and studied his work. On 31 May 1740 Frederick became king; and in October the accession of MARIA THERESA separated the crown of Austria from the imperial diadem. Frederick, in possession of a fine army and a well-filled treasury, seized the opportunity. He entered Silesia (December 1740), defeated the Austrians at Mollwitz (1741) and Chotusitz (1742), and, after concluding an alliance for 15 years with France, forced Maria Theresa to yield him Upper and Lower Silesia by the Treaty of Breslau (1742).

The second Silesian War (1744–45) left Frederick with increased territories and a reputation as one of the finest military commanders of the day. The next eleven years were years of peace; but Frederick's energetic internal reforms were coloured by the expectation of renewed war. In 1756 the third Silesian War, the 'Seven Years' War', began. Frederick anticipated attack by himself taking the offensive, and during all this momentous struggle displayed great courage and military genius.

In 1772 he shared in the first partition of Poland, by which he acquired Polish Prussia and a portion of Great Poland. In 1778 he completed the acquisition of the Franconian duchies. One of his last political actions was the formation of the 'Fürstenbund', which marked the emergence of Prussia as a rival to Austria for the lead in Germany.

Frederick was an able administrator, and contrived to carry on his wars without incurring any debt. He regarded himself as the first servant of the state, and he governed Prussia as one huge camp. With a view to providing treasure for future wars he fostered woollen and other manufactures by a high protective tariff, but he made himself unpopular by the introduction of the French excise system.

During Frederick's reign the country rapidly recovered from the ravages of war, while the army was raised to a strength of 200,000 men. By the end of his reign the area of Prussia had doubled, and, despite a temporary eclipse under NAPOLEON I, the foundation of Prussia's greatness was laid. Frederick was essentially a just, if somewhat austere man, and the administration of justice under his rule was pure; the press enjoyed comparative freedom, and freedom of conscience was promoted.

🕮 Frederick was a prolific writer on political, historical and military subjects. He wrote wholly in French, and his works were published by the Berlin Academy (31 vols, 1846–57), as was his *Political Correspondence* (1879 onward). See also R B Asprey, *Frederick the Great* (1988); E Simon, *The Making of Frederick the Great* (1974); THOMAS CARLYLE, *The History of Friedrich II of Prussia, Called Frederick the Great* (6 vols, 1858–65, reprinted 8 vols, 1974).

> 'Troops always ready to act, my well-filled treasury, and the liveliness of my disposition – these were my reasons for making war on Maria Theresa.'
>
> – From a letter to Voltaire (1741).

Frederick IX 1899–1972
King of Denmark
Born at Sorgenfri Castle, near Copenhagen, he was the son and successor (1947) of CHRISTIAN X. A naval officer (rising to rear admiral in 1946), he was crown prince of Denmark from 1912. In 1935 he married Ingrid, daughter of King GUSTAV VI of Sweden. During World War II he assisted his father in resistance to the German occupation, and was held under house arrest (1943–45). He was crowned in 1947 and was a popular monarch. He granted home rule to the Faroe Islands (1948), and in 1953 a new constitution provided for female succession to the throne. His eldest daughter became crown princess and succeeded him as Queen MARGRETHE II (1972). His youngest daughter, Anne-Marie, married ex-King CONSTANTINE II of Greece (1964).

Frederick I 1657–1713
King of Prussia and Elector of Brandenburg
Born in Königsberg, Prussia (now Kaliningrad, Russia), the second son of FREDERICK WILLIAM, the Great Elector, he married (1684) Sophia Charlotte (1668–1705), sister of GEORGE I of Great Britain, and succeeded his father as Frederick III, Elector of Brandenburg (1688). In return for military aid to Emperor LEOPOLD I in the War of the Spanish Succession (1701–14), he was made the first King of Prussia (1701). He reclaimed land, doubled Prussian revenues, and encouraged the influx of Huguenots to create new industries. He maintained a large court, and was a great patron of the arts and of learning, especially of GOTTFRIED LEIBNIZ. During his reign the Academy of Sciences at Berlin and the University of Halle were founded. 🕮 Linda and Marsha Frey, *Frederick I, the Man and His Times* (1984)

Frederick II *See panel above*

Frederick III 1831–88
King of Prussia and German emperor
The only son of WILHELM I, he was born in Potsdam. In 1858 he married VICTORIA, Princess Royal of England. As crown prince of Prussia (from 1861) he protested against BISMARCK's reactionary policy in relation to constitutional questions and the press. In the Franco-Prussian War he commanded the third army and was made field marshal (1870). He became crown prince of the German Empire (1871) and in 1878, when Emperor Wilhelm I was wounded by an assassin, he was appointed provisional regent. He became Emperor Frederick III on Wilhelm's death (1888), but he died at Potsdam three months later, of cancer of the throat. He had a great horror of war and of autocratic ideas, and he sought to liberalize German institutions.

Frederick I 1676–1751
King of Sweden
Born in Kassel, Germany, he fought for England in the War of the Spanish Succession (1701–13). As Prince Frederick of Hesse-Kassel, he married (1715) ULRIKA ELEONORA, the younger sister of King CHARLES XII and future Queen of Sweden. In 1720 his wife abdicated the throne in his favour, under a new constitution which deprived the Crown of most of its authority. He spent most of his time on hunting and love affairs, leaving the government to his chancellor, Arvid Horn. He died childless, and was succeeded by ADOLF FREDERICK.

Frederick I, Barbarossa c.1123–1190
Holy Roman Emperor and King of Germany and Italy
Of the HOHENSTAUFEN family, he was the son of Frederick, Duke of Swabia. He succeeded his uncle CONRAD III as Emperor in 1152. Earnest and distinguished, he channelled his intelligence and enthusiasm into establishing German predominance in western Europe. In 1162 his conquest of Milan subdued the rebellious Italian states, but his failure to defeat the pope led to revolt in Lombardy. After his defeat at Legnano (1176) he won Lombard support by more lenient rule, and in 1177 he acknowledged ALEXANDER III as pope, and finally achieved peace (1183). In Germany, Frederick increased the authority of his strongest rebels and checked the weaker by supporting their municipal communities. Duke Ladislas of Bohemia became a king, Austria became a duchy, and Brunswick and Lüneburg went to the GUELF princes. He subdued HENRY THE LION of Bavaria, and gained authority over Poland, Hungary, Denmark and Burgundy. In 1189 he led the Third Crusade against SALADIN, defeating the Muslims at Philomelium and Iconium, but drowned at Cilicia. His son, HENRY VI, succeeded him.

Frederick II 1194–1250
Holy Roman Emperor and King of Germany
The last great ruler of the HOHENSTAUFENS, he was born in Jesi, near Ancona, the grandson of FREDERICK I, BARBAROSSA and son of Emperor HENRY VI. He inherited Sicily from his mother (1198). In 1212 he took the imperial crown from OTTO IV, gaining Pope INNOCENT III's sanction (1215) for his coronation in 1220. Frederick consolidated his power in Italy by reducing the pope's, organizing his Italian territories, supporting the arts and education, and creating a legal code for Germany and Italy. During his crusade (1228–29) he captured Bethlehem and

Nazareth, and crowned himself King of Jerusalem, but when he returned to Italy he experienced difficulties with the papacy, and was temporarily deposed. In 1235 he married the daughter of King JOHN of England and sister of HENRY III. Frederick tolerated Jews and Muslims, encouraged free trade, recognized popular representation by parliaments, and anticipated the humanistic movement, but persecuted heretics, and upheld absolute sovereignty. He wrote poetry and a book on falconry. A complex figure of sharp contradictions, he was named *stupor mundi* ('the amazement of the world'). However his claim of imperial pre-eminence coincided with the development of separate nation states. 🕮 Thomas Curtis Van Cleve, *The Emperor Frederick II of Hohenstaufen, immutator mundi* (1972)

Frederick III 1415–93
Holy Roman Emperor and King of Germany
Born in Innsbruck, Austria, the son of Duke Ernest of Austria, he was elected King of Germany as Frederick IV (1440) and crowned emperor (1452). His reign was one of anarchy, wars raging on the frontiers of the empire, and disorders within. During its course Frederick lost his hold upon Switzerland, purchased peace from his brother Albert in Upper Austria, allowed FRANCESCO SFORZA to take Milan, George of Podiebrad (1420–71) to take the throne of Bohemia, and MATTHIAS I HUNYADI that of Hungary, and failed to oppose two Turkish invasions (1469, 1475). Nevertheless, by the marriage (1477) of his son, MAXIMILIAN I, to Mary, daughter of CHARLES, THE BOLD, of Burgundy, he laid the foundation of the subsequent greatness of the HABSBURG dynasty. Although he neglected government for alchemy, astrology and botany, he lost no opportunity to aggrandize his own family, and from his time the Holy Roman Empire was almost exclusively ruled by the House of Austria.

Frederick V, *known as* **the Winter King** 1596–1632
Elector Palatine and King of Bohemia
The son of Elector Frederick IV, he was born in Amberg, Upper Palatinate, and educated at the Huguenot academy at Sedan. He became Elector Palatine (1610–23) and in 1613 married ELIZABETH, daughter of JAMES VI AND I of Scotland and England. Their daughter SOPHIA became the mother of GEORGE I of Great Britain. Under the refined young couple, Heidelberg, the capital of the Palatinate, became known for its artistic and cultural life. During his father's reign, the Protestant Union had been formed under Palatine leadership (1608), and when in 1619 the crown of Bohemia was offered to Frederick his Calvinist ministers urged him to accept. His regal power lasted only one winter (1619–20), hence his nickname, and the Bohemian Protestants were routed by imperial forces at the White Mountain, near Prague (1620). He also lost his hereditary lands, which passed to his Catholic cousin, MAXIMILIAN I of Bavaria. Frederick died while in exile in The Hague with his wife and young family, dependent on English and Dutch aid. His son, Charles Louis, recovered his electorate at the Peace of Westphalia (1648).

Frederick Augustus, Duke of York and Albany 1763–1827
English nobleman
Born at St James's Palace, London, the second son of GEORGE III of Great Britain, he was a soldier by profession, but was unsuccessful both in the field in the Netherlands (1793–99) and as British commander-in-chief (1798–1809), and earned the nickname of the 'grand old Duke of York' in the nursery rhyme. However, his painstaking reform of the army proved of lasting benefit, especially to the Duke of WELLINGTON. He founded the Duke of York's School in London, and is commemorated by the Duke of York's column in Waterloo Place, London.

Frederick Charles, Prince, *called* **the Iron Prince** or **the Red Prince** 1828–85
Prussian field marshal
Born in Berlin, he was the nephew of the emperor WILHELM I. He served in the Schleswig-Holstein War (1848), commanded the right wing in the Danish War (1864), and in the Seven Weeks' War of 1866 against Austria helped to win the victory of Königgrätz. In the Franco-German War (1870–71) he commanded the second army, drove Marshal ACHILLE BAZAINE into Metz, which capitulated, and, promoted to field marshal, then captured Orléans, broke up the army of the Loire, and scattered Antoine Chanzy (1823–83) and his troops at Le Mans.

Frederick Louis 1707–51
Prince of Wales
Born in Hanover, he was the eldest son of GEORGE II and his queen CAROLINE OF ANSBACH, and father of GEORGE III. He quarrelled with his father over his allowance. He married Princess Augusta of Saxe-Gotha (1736). In 1737 he joined the parliamentary opposition, which was centred on his new home, Leicester House, and was banished from court.

Frederick William I 1688–1740
King of Prussia
Born in Berlin, he succeeded his father, FREDERICK I, in 1713. Boorishly contemptuous of art and learning, but thrifty and practical, he had a passion for soldiering which brought him Swedish Pomerania, with Stettin. He laid the foundation of the future power of Prussia by establishing a centralized hierarchy of administrative offices and an efficient army, which he increased to 80,000 men. He encouraged native industries, particularly wool (to clothe the army), did away with vestiges of the old feudal system, introduced compulsory primary education, resettled his eastern provinces, and pursued a policy of religious toleration. He was succeeded by his son FREDERICK II, THE GREAT.

Frederick William II 1744–97
King of Prussia
Born in Berlin, he was the nephew and successor in 1786 of FREDERICK II, THE GREAT. The abolition of some of his predecessor's oppressive measures, including the coffee and tobacco duties, made him very popular, but he replaced them by increasing the excise duty on beer and sugar. He soon lost the regard of his subjects by his predilection for unworthy favourites, and his abrogation of the freedom of the press and religion (1788). He dissipated the fortune his uncle left in the treasury in a useless war with Holland. He acquired large areas of Polish Prussia and Silesia by the partitions of Poland (1793, 1795), and also Ansbach, Bayreuth and Danzig. He presided over a flourishing Berlin culture; he played the cello, and MOZART and BEETHOVEN dedicated chamber music to him.

Frederick William III 1770–1840
King of Prussia
Born in Potsdam, he succeeded his father, FREDERICK WILLIAM II, in 1797. At first he was neutral towards NAPOLEON I but eventually declared war against him in 1806. After defeat at Jena and Auerstädt, he fled into East Prussia, and by the Treaty of Tilsit (1807) lost all his territories west of the Elbe. Although defeated at Lützen and Bautzen, Prussia was finally victorious at Leipzig (1813). The territories west of the Elbe were returned at the Treaty of Vienna (1815) and Prussia also gained Pomerania and parts of Saxony and Westphalia, but gave up most of her Polish acquisitions. The latter part of his reign was one of reaction. The democratic movements of 1819 and 1830 were rigorously suppressed, and the freedom of the press curtailed. Nevertheless, provincial diets were established (1823), the finances were situated on a better footing, education was encouraged, and the *Zollverein*, or customs union, was established. 🕮 Thomas Stamm, *Konig in Preussens grosser Zeit: Friedrich Wilhelm III* (1992)

Frederick William IV 1795–1861
King of Prussia
Born in Cölln, near Berlin, he succeeded his father, FREDERICK WILLIAM III, in 1840, and began his reign by granting minor reforms and promising, but never fulfilling, radical changes. He was possessed by vague ideas of the divine right of kings, and by a mystic pietism. He refused the Imperial Crown offered to him by the liberal Frankfurt Diet (1849), and opposed the popular movement of 1848, but was forced to grant a representative parliament (1850). In 1857, having become insane, he resigned the administration to his brother, who from 1858 acted as regent until his accession as WILHELM I.

Frederick William, *known as* **the Great Elector** 1620–88
Elector of Brandenburg
He was born near Berlin, and his childhood was greatly affected by the Thirty Years' War (1618–48). He lived in Holland (1634–38), where he studied briefly at the University of Leiden, and gained an appreciation of Dutch art, architecture and technology. After his accession in 1640 he was responsible for rebuilding the war-ravaged and sparsely populated electorate, adding to the Hohenzollern territories, trebling his revenues, establishing an effective standing army, crushing the Estates, and reorganizing the privy council and civil service. He supported Sweden, then Poland in the First Northern War (1655–60), switched from the anti-French alliance of 1674 to support for LOUIS XIV in 1679, and returned to his anti-French stance in the 1680s. Tolerant over religion, he granted asylum by the Edict of Potsdam (1685) to Huguenots expelled from France following Louis's revocation of the Edict of Nantes, recognizing their economic potential. A discriminating patron

of the arts and education, he established the Royal Library and Art Gallery in Berlin, and founded the University of Duisberg. 🕮 Ferdinand Schevill, *The Great Elector* (1947)

Fredriksson, Gert 1919–2006
Swedish canoeist
Born in Nyköping, he won eight Olympic medals (1948–60), including six golds, and 13 world titles, all in either kayak singles or pairs. His winning margin of 6.7 seconds in the 1948 Olympic singles final was the biggest for any kayak race other than the 10,000 metres.

Freedman, Barnet 1901–58
English painter and lithographer
He was born in Stepney, London, the son of Russian Jewish immigrants, and was a pioneer in the revival of colour lithography. His first one-man show (1929) was held at the Literary Bookshop. He designed posters, book illustrations and book covers. He was visiting instructor at the Royal College of Art from 1928, and at the Ruskin School in Oxford. He worked for London Transport, Shell-Mex, BP Ltd, the BBC and the General Post Office. In 1935 his design was selected for the GEORGE V jubilee stamp. In 1940 he was appointed official war artist to the Admiralty and painted coastal defences, naval portraits and studies of battleships and submarines.

Freeman, Cathy 1973–
Australian athlete
Born in Mackay, Queensland, she won a gold medal in the 4 × 100-metres relay at the 1990 Commonwealth Games and in 1992 became the first Australian Aboriginal to compete in the Olympic Games. She won gold medals in the 400 metres and 200 metres at the 1994 Commonwealth Games, took silver in the 400 metres at the 1996 Olympic Games and was victorious in the same event at the 1997 world championships. A controversial defender of Aboriginal rights, she was chosen to light the Olympic flame at the 2000 Sydney Olympics and went on to win the 400-metres gold medal. She retired from competitive running in 2003.

Freeman, John 1880–1929
English poet
Born in London, he rose from clerk to become secretary and director of an insurance company (1927). His *Stone Trees* (1916) and other volumes of poetry established his reputation. He won the Hawthornden prize with *Poems New and Old* in 1920 and wrote studies of GEORGE MOORE (1922) and HERMAN MELVILLE (1926). 🕮 G Freeman and Sir John Squires (eds), *John Freeman's Letters* (1936)

Freeman, Morgan 1937–
US actor
He was born in Memphis, Tennessee. After serving in the US air force, he worked at various jobs whilst pursuing an acting career. He made his Broadway debut in *Hello, Dolly!* (1967) and starred as Easy Reader in the children's television series *The Electric Company* (1971–76). As a theatre actor, he won the Clarence Derwent award for *The Mighty Gents* (1978) and Obie awards for *Coriolanus* (1980), *Mother Courage* (1980) and *The Gospel at Colonus* (1984). After small and infrequent film roles, he received an Academy Award nomination for his performance as a vicious pimp in *Street Smart* (1987). He was nominated again, recreating his stage performance as the patient, compassionate chauffeur in *Driving Miss Daisy* (1989). He has subsequently established himself as a versatile character actor, bringing distinction to such popular films as *Glory* (1989), *Robin Hood: Prince of Thieves* (1991), *Unforgiven* (1992), *The Shawshank Redemption* (1994, Academy Award nomination), *Seven* (1995), *Bruce Almighty* (2003) and *Million Dollar Baby* (2004, Best Supporting Actor Academy Award). He has also directed the film *Bopha!* (1993) and narrated the documentary *March of the Penguins* (2005). 🕮 Kathleen Tracy, *Morgan Freeman: A Biography* (2006)

Freeman, Sir Ralph 1880–1950
English civil engineer
Born in London, he was educated at the City and Guilds of London Institute. In 1901 he joined the firm of consulting engineers which in 1938 became Freeman, Fox & Partners, specializing in the design of steel bridges. His first notable design was for Sydney Harbour Bridge, a construction of 1,670ft (501m) span (1932). He was later involved with his partner Sir GILBERT ROBERTS in the design of the long-span suspension bridges over the estuaries of the Forth, Severn and Humber rivers, though he did not live to see any of them built. He was knighted in 1947.

Freeman, Walter 1895–1972
US neurologist
He was born in Philadelphia, and was a leading expert on neurosurgery, developing the operation of prefrontal lobotomy, used in some specific mental illnesses but now largely discredited.

Frege, (Friedrich Ludwig) Gottlob 1848–1925
German logician, mathematician and philosopher
Born in Wismar, he was educated at the University of Jena, where he spent his whole professional career, becoming professor in 1879. His particular contribution to logic was the theory of quantification. His main works are *Begriffschrift* (1879, Eng trans *Concept Script*), *Die Grundlagen der Arithmetik* (1884, Eng trans *Basic Laws of Arithmetic*, 1950), and *Die Grundgesetze der Arithmetik* (2 vols, 1893, 1903). These have all been translated into English, as has a collection of his still influential philosophical essays analysing such basic logical concepts as meaning, sense and reference. He also attempted to derive the whole of arithmetic from logic. He is now regarded as the founding father of modern mathematical logic and the philosophy of language. 🕮 Michael Dummett, *Frege: Philosophy of Language* (1974)

Frei (Montalva), Eduardo 1911–82
Chilean politician
He became one of the leaders of the Social-Christian Falange Party in the late 1930s, and of the new Christian Democratic Party after 1957. His presidency (1964–70) saw an ambitious programme of social reform, which brought Chile substantial international support. His initial scepticism of the PINOCHET regime turned into outright opposition. By the time of his death, he was widely seen as the father of opposition to the dictatorship.

Freiligrath, Ferdinand 1810–76
German poet and politician
Born in Detmold, he abandoned commerce for literature and became an upholder of German democracy, his writings becoming increasingly political. He was forced to seek refuge in Belgium and Great Britain for his *Glaubensbekenntnis* (1844, 'Confession of Beliefs'). He returned to Germany in 1848 and became leader of the Democratic Party. He was again expelled for his poem *Die Toten an die Lebenden* (1848, 'The Dead to the Living'), and returned to London in 1851. He translated many English classics into German. He lived in Stuttgart from 1868, and published his *Neue Gedichte* ('New Poems') in 1870. 🕮 H Eulenberg, *Ferdinand Freiligrath* (1948)

Frelinghuysen, Frederick 1753–1804
US politician
He raised a corps of artillery, fought in the American Revolution (1775–83), and was a member of the Continental Congress (1778, 1782–83) and a US senator from 1793 to 1796.

Frémont, John Charles 1813–90
US explorer and politician
Born in Savannah, Georgia, he became a teacher of mathematics in the navy and in 1838 started surveying. In 1842 he crossed the Rocky Mountains (where a peak is named after him), and demonstrated the feasibility of an overland route across the continent. In 1843 he explored the Great Salt Lake, advancing to the mouth of the Columbia River, and in 1845 examined the continental watershed. After participating in the annexation of Upper California in 1847, he started (1848) upon a fourth expedition along the upper Rio Grande. In 1849 he crossed over to California, where he settled, and the next year became senator of the new state. In 1853 he conducted a fifth expedition. He was the Republican and anti-slavery candidate for the presidency in 1856 but was defeated by JAMES BUCHANAN. Nominated again in 1864, he withdrew in favour of ABRAHAM LINCOLN. He served in the regular army as major-general (1861–62), but resigned rather than serve under General JOHN POPE. In 1873 the French authorities sentenced him in absence to imprisonment for fraud in connection with the Southern Pacific railway scheme. He was governor of Arizona from 1878 to 1882.

Frémy, Edmond 1814–94
French chemist
Born in Versailles, he became professor of chemistry at the École Polytechnique and later at the Museum of Natural History. He is chiefly remembered for his work on fluorine, which he attempted to isolate, also preparing anhydrous hydrogen fluoride and many of its salts. He wrote on the synthesis of rubies and worked on the ferrates, the colouring of flowers and the saponification of fats.

French, Annie 1872–1965
Scottish artist and illustrator
Born in Glasgow, she studied at the Glasgow School of Art, where she was a contemporary of JESSIE MARION KING, and exhibited first at the Brussels Salon (1903). She married the artist George Woolliscroft Rhead (1854–1920) in 1914. Her watercolours have a Pre-Raphaelite feel and are Romantic in subject matter, drawing parallels with the work of SIR EDWARD BURNE-JONES and, although less sinister, AUBREY BEARDSLEY. She illustrated a number of fairy tales and poems and designed a highly decorative series of postcards and posters. She exhibited regularly at the Royal Academy, Royal Glasgow Institute of Artists and Royal Scottish Academy and settled in Jersey in the late 1950s.

French, Daniel Chester 1850–1931
US sculptor
Born in Exeter, New Hampshire, he studied sculpture in New York and in 1873–74 produced *The Minuteman* monument to the American Revolution for the town of Concord, Massachusetts. Its good notices brought him numerous commissions for public monuments, such as the bronze figure of JOHN HARVARD (1884) at Harvard University. Following a period in Florence, he studied at the École des Beaux-Arts in Paris from 1886 to 1888. He produced a 60-foot (18.3m) high *Statue of the Republic* for the 1893 Chicago World's Fair and the seated figure of ABRAHAM LINCOLN for the Lincoln Memorial in Washington, DC (1918–22).

French, Dawn 1957–
Welsh comedienne and actress
Born in Holyhead, she trained at the Central School of Speech and Drama, where she met JENNIFER SAUNDERS. Starting at the Comedy Store in London, they created a double act that took them to the forefront of the 'alternative' comedy of the time, and in 1980 they joined the new Comic Strip club. After appearing in *The Comic Strip Presents...* films on television (1982–93), the duo were given their own successful BBC series, *French and Saunders* (1987–). They also wrote and starred in *Girls on Top* (1985–86). Outside the partnership, she has appeared on television in *Murder Most Horrid* (1991–99) and *The Vicar of Dibley* (1994–2006). She has also starred on stage in Sharman Macdonald's *When I Was a Girl I Used to Scream and Shout* and BEN ELTON's *Silly Cow*, and was in the films *The Supergrass* (1985) and *The Strike* (1988). She married comedian LENNY HENRY in 1984. She declined the OBE in 2001.

French, Sir John Denton Pinkstone, 1st Earl of Ypres 1852–1925
English field marshal
He was born in Ripple, Kent. He joined the navy in 1866, but transferred to the army in 1874. He was with the 19th Hussars in Sudan (1884–85), and was cavalry commander in South Africa in the Second Boer War (1899–1901). Chief of the Imperial General Staff from 1911–14, he was promoted to field marshal in 1913 and took command of the British Expeditionary Force in France in 1914. He was superseded by General HAIG and became commander-in-chief of the home forces in 1915. He was Lord Lieutenant of Ireland (1918–21) during the Anglo-Irish War.

Freneau, Philip Morin 1752–1832
US sailor and poet
Born in New York City, he wrote satirical verse in the pre-Revolutionary period, commanded a privateer in the American Revolution and was captured by the British. He wrote *The British Prison Ship* (1781) and a number of shorter poems, including 'The Indian Burying Ground' and 'The Wild Honeysuckle'. 🕮 P M Marsh, *Freneau: Poet and Journalist* (1967)

Freni, Mirella 1936–
Italian soprano
She was born in Modena, where her mother worked in the same cigarette factory as the mother of LUCIANO PAVAROTTI – later to be her operatic partner in many productions. Freni trained locally and made her first public appearance aged eleven. By the age of 20 she had appeared with the Modena Opera as Micaela in *Carmen*. International success followed quickly with, among others, Netherlands Opera (1959), Glyndebourne (1960), Covent Garden (1961) and La Scala (1962). In 1963 she played Mimi in HERBERT VON KARAJAN's film of *La Bohème*. She frequently gave concerts with her husband, the Bulgarian bass Nicolai Ghiaurov (1929–2004).

Frenssen, Gustav 1863–1945
German novelist
Born in Barlt, Holstein, he studied for the Church but turned to writing and attracted attention with his *Jörn Uhl* (1901), a novel of peasant life. *Hilligenlei* (1906, 'Holy Land'), a life of JESUS CHRIST set in a Germanic background, aroused much controversy. 🕮 W Johnson, *Gustav Frenssen. Art und Ahnen* (1934)

Frere, Sir Henry Bartle Edward 1815–84
Welsh colonial administrator
Born in Clybach, Brecknock, as chief commissioner of Sind, India (now in Pakistan) he kept order during the Mutiny. He was governor of Bombay from 1862 to 1867. In 1872 he signed a treaty with the Sultan of Zanzibar abolishing the slave trade. In 1877 he was appointed governor of the Cape and High Commissioner in South Africa, where his actions led to the onset of the Zulu War (1879). He was recalled in 1880.

Frescobaldi, Girolamo 1583–1643
Italian composer
Born in Rome, he studied the organ at Ferrara Cathedral, and became organist at Santa Maria in Trastevere, Rome. From 1608 until his death he was organist at St Peter's in Rome. He composed chiefly organ works and madrigals.

Fresenius, Karl Remigius 1818–97
German chemist
He was a professor at the Agricultural Institute from 1845. His revised tables for qualitative and quantitative analysis are still in use.

Fresnaye, Roger de la 1885–1925
French artist
Born in Le Mans, he studied in Paris and was influenced by CÉZANNE, ROBERT DELAUNAY and the Cubists from 1912, as in *L'Homme assis* (1913–14, 'The Seated Man', Pompidou Centre) and *The Conquest of the Air* (1913, Museum of Modern Art, New York). Whilst serving in World War I, he developed chronic tuberculosis, and his output was curtailed. Later work was linear and decorative, and no longer abstract.

Fresnel, Augustin Jean 1788–1827
French physicist
Born in Broglie, he was head of the department of public works in Paris. His intensive study of the problem of projecting well-defined beams of light led to the celebrated multi-faceted lighthouse lens (the 'Fresnel lens'). His experimental and theoretical investigations into the interference, diffraction and polarization of light, coupled with his facility with new mathematical ideas, contributed greatly to the establishment of the undulatory theory of light. He also invented a special prism ('Fresnel's rhomb') to produce circularly polarized light. His most brilliant papers were a series published in 1818–21 relating polarization phenomena to THOMAS YOUNG's hypothesis of transverse waves, and his *Œuvres Complètes* ('Complete Works'), published in three volumes in the 1860s, contain practically everything that was known in optics up to the time of his death.

Freud, Anna 1895–1982
British psychoanalyst
Born in Vienna, Austria, the youngest daughter of SIGMUND FREUD, she taught at the Cottage Lyceum there, and emigrated (1938) with her father to London, where she organized (1940–45) a residential war nursery for homeless children. A pioneer of child psychoanalysis, she founded the Hampstead Child Therapy Clinic. Her works include *The Ego and the Mechanism of Defence* (1937) and *Beyond the Best Interests of the Child* (1973). 🕮 U H Peters, *Anna Freud* (1985)

Freud, Lucian 1922–
British painter
Born in Berlin, Germany, he is the grandson of SIGMUND FREUD. After moving to Great Britain in 1931, he studied at the Central School of Arts and Crafts in London (1938–39) and the East Anglian School of Painting and Drawing, Dedham (1939–42). His first sketch (a self-portrait) was published when he was 17. In his early years he was one of the neo-Romantic group of English painters along with GRAHAM SUTHERLAND and JOHN PIPER, but since the mid-1940s he has developed a linear, realistic style. This is seen best in his acutely observed portraits, self-portraits and nude studies, such as *Girl with a White Dog* (1951–52, Tate, London). From about 1958 he developed a freer style, painting his figures from disconcerting angles, as in *Standing by the Rags* (1988–89, Tate Britain). In the 1980s he began to include more complex, multi-figure compositions in his output, and in the early 1990s he painted a series of nudes of the performance artist Leigh Bowery. He became a British citizen in 1939, was made a Companion of Honour in 1983 and was appointed to the Order of Merit in 1993. 🕮 William Feaver, *Lucian Freud* (2002)

Freud, Sigmund 1856–1939
Austrian neurologist, the founder of psychoanalysis

Freud was born in Freiburg, Moravia. He studied medicine at Vienna and joined the staff of the Vienna General Hospital in 1882, specializing in neurology. He collaborated with the Austrian neurologist Joseph Breuer in the treatment of hysteria by the recall of painful experiences under hypnosis, then moved to Paris in 1885 to study under JEAN MARTIN CHARCOT; it was there that he changed from neurology to psychopathology. Returning to Vienna, he developed the technique of conversational 'free association' in place of hypnosis and refined psychoanalysis as a method of treatment.

In 1895 he published, with Joseph Breuer, *Studien über Hysterie* (Eng trans *Studies on Hysteria*, 1995), but two years later their friendship ended as a result of Freud's theories of infantile sexuality. He developed his revolutionary thinking despite opposition from friends, patients and medical colleagues, and in 1900 he published his seminal work, *Die Traumdeutung* (Eng trans *Interpretation of Dreams*, 1913), arguing that dreams, like neuroses, are disguised manifestations of repressed sexual desires. He was appointed extraordinary professor of neuropathology at the University of Vienna in 1902; there he began to hold weekly seminars in his home with kindred minds like ALFRED ADLER, and produced the further crucial works *Zur Psychopathologie des Alltagslebens* (1904, Eng trans *The Psychopathology of Everyday Life*, 1914), and *Drei Abhandlungen zur Sexualtheorie* (1905, Eng trans *Three Essays on the Theory of Sexuality*, 1910), which met with intense and uncomprehending opposition. In 1908 these weekly meetings became those of the Vienna Psychoanalytical Society, and, in 1910, the International Psychoanalytical Association, with CARL JUNG as its first president.

Both Adler (1911) and Jung (1913) broke with Freud to develop their own theories. Undeterred, Freud produced *Totem und Tabu* (1913, Eng trans *Totem and Taboo*, 1918), *Jenzeits des Lustprinzips* (1920, Eng trans *Beyond the Pleasure Principle*, 1922) and *Das Ich und Das Es* (1923, Eng trans *The Ego and the Id*, 1927), elaborating his theories of the division of the unconscious mind into the 'id', the 'ego' and the 'super-ego'. In 1927 he published a controversial view of religion, *Die Zukunft einer Illusion* (Eng trans *The Future of an Illusion*, 1928). He was awarded the prestigious Goethe prize in 1930, and in 1933 published *Warum Krieg?* (Eng trans *Why War?*, 1933), a correspondence between Freud and ALBERT EINSTEIN. Under the Nazi regime psychoanalysis was banned, and in 1938, after the annexation of Austria, Freud was extricated from Vienna and brought to London with his family. He made his home in Hampstead, but died of cancer the following year.

🕮 H S Decker, *Freud, Dora and Vienna 1900* (1990); E M Thornton, *Freud and Cocaine: The Freudian Fallacy* (1983); Lionel Trilling and Stephen Marcus, *The Life and Works of Sigmund Freud* (1961).

> 'The more the fruits of knowledge become accessible to men, the more widespread is the decline of religious belief.'
>
> – From *The Future of an Illusion* (1927).

Freud, Sigmund *See panel above*

Freund, Wilhelm 1806–94
German philologist and lexicographer
Born in Kempen in Posen, he compiled the *Wörterbuch der lateinischen Sprache* (1834–45), on which most English–Latin dictionaries are based.

Freyberg, Bernard, 1st Baron Freyberg 1889–1963
New Zealand soldier
Born in London, he was educated at Wellington College, New Zealand. At the outbreak of World War I he enlisted in England and served in Gallipoli and France, winning the VC at Beaumont Hamel. In World War II he was given command of the New Zealand forces in the Middle East. He commanded Commonwealth forces in ill-fated operations in Greece and Crete (1941) and in the Sahara. He commanded the New Zealand Corps in Italy (1944–45), and was Governor-General of New Zealand (1946–52) and lieutenant governor of Windsor Castle (1956–63).

Freyre, Gilberto de Mello 1900–87
Brazilian writer and intellectual
Born in Recife, he was educated in Rio de Janeiro and in Texas and New York City. After working as a journalist in his native city (1927–30), he switched to an academic career. A prolific author, he came to prominence with a large-scale historical work, *Casa-grande & Senzala* (1933, Eng trans *The Masters and the Slaves*, 1946), which altered previous thinking about colonial Brazil and its relations with Europe. The book won him the Felippe d'Oliveira award (1934), the first of many prestigious prizes and honorary doctorates. He represented Brazil in the UN General Assembly in 1949. 🕮 D de Melo Menezes, *Gilberto Freyre* (1944, in Spanish)

Freyssinet, Marie Eugène Léon 1879–1962
French civil engineer
Born in Objat, Corrèze, he graduated from both the École Polytechnique and the École des Ponts et Chaussées in Paris. His intuitive rather than analytical approach to reinforced concrete design reached its height in his airship hangars at Orly (1916–24, destroyed 1944), where he used corrugated parabolic arches over 200ft (61m) high yet only 3in (9cm) thick. Realizing that concrete's great weakness is its lack of strength in tension, he sought ways of putting concrete structures into a state of permanent compression even under load, and succeeded in developing practical techniques for pre-stressing concrete by the use of stretched steel tendons. From 1930 he was one of the leading exponents of this virtually new structural material, employing it to full advantage in bridges, foundations, a dam in Algeria, the airport runway at Orly and a water tower at Orleans.

Freytag, Gustav 1816–95
German novelist and playwright
He was born in Kreuzburg, Silesia, and from 1839 to 1847 he was *Privatdozent* (lecturer) of German at Breslau University. A deputy to the North German Diet, he attended the Prussian crown prince in the Franco-German campaign (1870). His comedies and other plays, such as *Die Valentine* (1846) and *Die Journalisten* (1853, Eng trans *The Journalists*), proved brilliant successes, but his greatest achievement is *Soll und Haben* (1855, Eng trans *Debit and Credit*, 1857), a realistic novel of German commercial life. It was followed by *Die verlorene Handschrift* (1864, Eng trans *The Lost Manuscript*, 1865) and the series called *Die Ahnen*, (1872–81, 'The Ancestors'). He set down his dramatic theories in *Technik des Dramas* (1863, 'Technique of Drama'). 🕮 H Lindau, *Gustav Freytag* (1907)

Frey-Wyssling, Albert Friedrich 1900–88
Swiss botanist
Born in Küsnacht, he studied in Zurich, Jena and Paris and became professor of botany in Zurich in 1938. He did much to establish ultrastructural studies on plant cells by the use of polarization microscopy, in the period before about 1940. Later, X-ray diffraction and electron microscopy techniques became available to confirm and extend his results by these more direct methods.

Frick, Henry Clay 1849–1919
US industrialist and philanthropist
Born in West Overton, Pennsylvania, he received little education, but capitalized on post-Civil War expansion by forming a company to supply the Pittsburgh steel mills with coke, and was a millionaire at 30. ANDREW CARNEGIE was associated with Frick from 1884, and invited him to become chairman of the Carnegie steel company in 1889. Frick reorganized the company and made a highly profitable investment for the firm in iron ore at Lake Superior. He was a hard and ruthless employer, unsuccessfully using 200 hired Pinkerton guards in pitched battle to dislodge strikers at the Carnegie Steel Plant at Homestead, Pennsylvania (1892) and, on their failure, calling in the Pennsylvania National Guard. The strike was broken, but Frick was shot and stabbed by Alexander Berkman, an associate of the anarchist EMMA GOLDMAN, although he ultimately recovered. He broke with Carnegie in 1900, and became director of JOHN PIERPONT MORGAN's United States Steel (1901). He built up the distinguished Frick Collection of fine art, now a museum in New York City. He also endowed hospitals, schools and a large park in Pittsburgh. 🕮 G B M Harvey, *Henry Clay Frick, the Man* (1928)

Frick, Wilhelm 1877–1946
German Nazi politician
Born in Alsenz, he participated in HITLER's Munich putsch (1923), led the Nazi faction in the Reichstag from 1924, and as

minister of the interior from 1933 banned trade unionism and freedom of the press, and encouraged anti-Semitism. Ousted by HEINRICH HIMMLER in 1943, he became 'Protector' of Bohemia and Moravia. He was found guilty of war crimes at Nuremberg and executed.

Fricker, Peter Racine 1920–90
English composer
Born in London, he studied at the Royal College of Music, was musical director of Morley College, London (1952–64), and then moved to the University of California, Santa Barbara (1964). The influence of BÉLA BARTÓK and ARNOLD SCHOENBERG is apparent in such works as the String Quartet in One Movement (1948), the First Symphony (1948–49) and the Sonata for Violin and Piano (1950). Later works include symphonies, a cello sonata (1956), an oratorio, *The Vision of Judgement* (1957–58), and other chamber, choral and keyboard works.

Friday, Nancy 1937–
US feminist author
She was born in Pittsburgh, Pennsylvania, the daughter of a financier, and was educated at Wellesley College. She worked as a journalist before the publication of her best-known work, *My Secret Garden* (1973), which exploded the myths surrounding women's sexual fantasies and sold over 1.5 million copies worldwide. A sequel, *Forbidden Flowers*, appeared in 1975. In 1980 she published *Men In Love*, an exploration of men and their sexual fantasies. *Women on Top* (1991) re-examines modern women in the context of feminism and renewed sexual freedom, and documents the manner in which women appear to have incorporated male pornography into their own sexual fantasies. *The Power of Beauty*, her most recent work to date, appeared in 1996.

Frideswide, St d.c.735
Anglo-Saxon abbess and patron saint of Oxford
The daughter of Didanus, an ealdorman, she founded a nunnery at Oxford on the site of what is now Christ Church. She was canonized in 1481. Her feast day is 19 October.

Fried, Alfred Hermann 1864–1921
Austrian pacifist and Nobel Prize winner
He was born in Vienna, and founded the *Deutsche Friedensgesellschaft* (German Society for Peace) in Berlin in 1892. In World War I he lived in Switzerland, and on its conclusion he protested against the terms of the Treaty of Versailles, while maintaining his pacifist stance. He shared the Nobel Prize in peace with TOBIAS ASSER in 1911.

Friedan, Betty (Elizabeth Naomi), *née* **Goldstein** 1921–2006
US feminist and writer
Born in Peoria, Illinois, she was educated at Smith College. She wrote a bestselling book, *The Feminine Mystique* (1963), which analyzed the role of women in US society and articulated their frustrations. She was founder and first president of the National Association for Women (1966), and headed the National Women's Strike for Equality (1970). In *The Second Stage* (1981) she emphasized the importance of both new and traditional female roles. She also wrote *It Changed My Life* (1977) and *The Fountain of Age* (1993), which explores the virtues and possibilities of old age. Her autobiography, *Life So Far*, was published in 2000.

Friedel, Charles 1832–99
French chemist
Latterly professor of organic chemistry at the Sorbonne, Paris, he worked on the production of artificial minerals (diamonds). He and the US chemist James Mason Crafts (1839–1917) gave their names to the Friedel–Crafts reaction for the synthesis of benzene homologues.

Friedlander, Lee Norman 1934–
US photographer
Born in Aberdeen, Washington, he began his photographic career with photographs of jazz musicians, including JOHN COLTRANE and RAY CHARLES. From the 1960s he became preoccupied with his vision of the 'American social landscape', which he has photographed for more than four decades: the city streets, industrial complexes, half-forgotten monuments and working people of the USA. His images often employ reflection, shadow and fracturing of the field of view to great effect.

Friedman, Herbert 1916–2000
US astrophysicist
Born in New York City and educated at Brooklyn College and Johns Hopkins University, he spent his career at the US Naval Research Laboratory in Washington. He carried out pioneering work on the use of rockets in astronomy and in the study of astronomical X-ray sources. From the 1940s he initiated the use of rockets carrying detectors to study X-rays from space. In 1949 he began investigations of the X-ray activity of the Sun, producing the first X-ray and ultraviolet photographs of the Sun in 1960. Following BRUNO ROSSI's discovery in 1962 of the first non-solar X-ray source, Friedman showed that one such source in the constellation Taurus coincided with the remnant of a luminous supernova in the Crab nebula (1964). After this early work, X-ray astronomy developed as an important area of astrophysics, as has the use of rockets to transport astronomical instruments above the absorbing layer of the Earth's atmosphere.

Friedman, Jerome Isaac 1930–
US physicist and Nobel Prize winner
Born in Chicago, he was educated and worked at the university there, then moved to Stanford University and the Massachusetts Institute of Technology (MIT), where he became professor in 1967. He became director of the Laboratory of Nuclear Science (1980–83) then head of the physics department (1983–88). In the 1960s, with HENRY KENDALL and RICHARD TAYLOR, he led a group at the Stanford linear accelerator investigating electron scattering from nucleons (protons and neutrons). They studied the properties of quarks, establishing that quarks have spin and fractional charges of $+\frac{2}{3}$ and $-\frac{1}{3}$ times electronic charge, as had been postulated by MURRAY GELL-MANN and others. The supreme achievement of the group was in providing the first incontrovertible evidence for quarks as real entities rather than abstract mathematical concepts. For this work they won the 1990 Nobel Prize in physics.

Friedman, Milton 1912–2006
US economist and Nobel Prize winner
He was born in Brooklyn, New York City, and educated at Rutgers University in New Jersey and the University of Chicago. After eight years at the National Bureau of Economic Research (1937–45) he became professor of economics at Chicago (1946–83), where he gained a reputation as the foremost exponent of monetarism. In such works as *A Monetary History of the United States, 1867–1960* (1963) and *Inflation: Causes and Consequences* (1963) he argued that a country's economy can be controlled through its money supply. One of the leading economic thinkers of the 20th century, he was awarded the 1976 Nobel Prize in economics, and was a policy adviser to the REAGAN administration (1981–88). His ideas were applied in Great Britain with almost messianic zeal by the Conservative government of MARGARET THATCHER after the 1979 general election. He was a staunch libertarian, supporting the legalization of drugs and generally opposing state intervention in most aspects of human life. His joint autobiography, *Two Lucky People*, written with his wife Rose, was published in 1998.

Friedrich, Caspar David 1774–1840
German painter
Born in Pomerania, he studied at the Academy of Copenhagen from 1794 to 1798 then spent the rest of his life in Dresden. His work won the approval of GOETHE, and in 1805 he won a Weimar Art Society prize. His paintings from c.1808 were highly controversial in their treatment of landscape as vast and desolate expanses in which man – often a solitary figure – is depicted as a melancholy spectator of Nature's awesome power. Such works helped to establish the notion of the sublime as a central concern of the Romantic movement. He taught at the Dresden Academy from 1816 and became a professor in 1824.

Friel, Brian 1929–
Northern Irish playwright and short-story writer
He was born in Omagh, County Tyrone, and studied for the priesthood in Maynooth, Ireland, choosing not to enter it upon graduation in 1948. He returned to Northern Ireland and taught for ten years in Londonderry, during which time he started to write. His first short stories appeared in *The New Yorker*. His first play, *This Doubtful Paradise* (1959), was produced in Belfast. His first major success was *Philadelphia, Here I Come!* (1964), a play about emigration and the relationship between a man and his son. Friel's writing is poetic, sometimes ironic, always compassionate and poignant. He often concentrates upon the relation between people, language, custom and the land, these forming the principal theme of the plays *Translations* (1980) and *Dancing at Lughnasa* (1990), both of which are set in County Donegal. With actor Stephen Rea, Friel co-founded the Field Day Theatre Company (1980). His short-story collections include *A Saucer of Larks* (1962) and *The Diviner: Brian Friel's Best Short Stories* (1983). In 1995 a critically

acclaimed revival of *Translations* was staged at the Plymouth Theater in New York. He has adapted several of CHEKHOV's plays, including *Three Sisters* (1981) and *The Bear* (2002). In 2006 he was elected a Saoi of Aosdána, an Irish honour held by only a handful of people. 🕮 U Dantanus, *Brian Friel* (1988)

Friel, George 1910–75
Scottish novelist
Born in Glasgow, he was educated at St Mungo's Academy and Glasgow University, then trained as a teacher at Jordanhill College, Glasgow. He served in the Royal Army Ordnance Corps during World War II, then went back to teaching, a profession he grew to loathe and distrust, although he always retained his concern for children. His teaching experiences are at the heart of his popular novel *Mr Alfred M.A.* (1972), which describes the disillusionment and downfall of a teacher betrayed by one of his female pupils. Other novels include *The Bank of Time* (1959), *The Boy Who Wanted Peace* (1964), *Grace and Miss Partridge* (1969) and *An Empty House* (1975).

Friend, Charlotte 1921–87
US oncologist and medical microbiologist
Born in New York City, she attended Hunter College before serving in the US navy during World War II. The GI Bill of Rights enabled her to enrol at Yale, from which she gained a PhD (1950). She joined the Sloan-Kettering Institute for Cancer Research, and was associate professor of microbiology there until 1966, when she was appointed professor at the Mount Sinai School of Medicine, where she remained until her death. Her discovery that a fatal leukaemia could be induced in experimental animals by a virus, now known as the Friend Leukaemia Virus (FLV), was initially received with hostility, but colleagues soon recognized that some viruses were able to produce cancers. She received numerous honours worldwide and was elected to the National Academy of Sciences in 1976.

Fries, Elias Magnus 1794–1878
Swedish botanist
He was professor at Uppsala University, and keeper of the botanic garden there. He wrote on fungi, lichens and the flora of Scandinavia, and introduced a new classificatory system.

Friese-Greene, William, *originally* **William Edward Green** 1855–1921
English photographer and inventor
Born in Bristol, he designed a camera in the 1880s to take a sequence of photographs for projection as a moving image by lantern slides. He is thus claimed by some as the English inventor of cinematography. However, he did not in fact propose perforated strips of film for either photography or projection. A version of his life was the basis for the 1951 film *The Magic Box* . 🕮 Ray Allister, *Friese-Greene: Close-up of an Inventor* (1948)

Friesz, (Émile) Othon 1879–1949
French painter
Born in Le Havre, where he attended the École des Beaux-Arts, he went to Paris in 1898 and painted in the Fauve style until 1908, when his work became more traditional. In 1935 he designed a Gobelins tapestry, *Peace*.

Friml, (Charles) Rudolf 1879–1972
US pianist and composer
Born in Prague, he studied at the Prague Conservatory under ANTONÍN DVOŘÁK, and settled in the USA in 1906. He wrote a piano concerto, film music for Hollywood, piano pieces and many operettas, including the popular *Rose Marie* (1924) and *The Vagabond King* (1925). His songs include 'The Donkey Serenade' (1937).

Frink, Dame Elisabeth 1930–93
English sculptor
Born in Thurlow, Suffolk, she entered Guildford Art School in 1947, then trained at Chelsea School of Art under Bernard Meadows (1915–2005), himself influenced by HENRY MOORE. She taught there for ten years and at Central St Martins College of Art, London, and was visiting lecturer at the Royal College. She was appointed a trustee of the British Museum in 1977. Her work displays a combination of sensuality, strength and vulnerability, seen particularly in her series of horse-and-rider sculptures. She has exhibited in many places, including the Tate Gallery, London, and the Museum of Modern Art, New York. She undertook many major public commissions and worked in France (1967–73) before returning to live and work in Dorset. She was appointed DBE in 1982.

Frisch, Karl von 1886–1982
Austrian ethologist, zoologist and Nobel Prize winner
Born in Vienna, he studied medicine there before abandoning it for zoology, which he studied at the universities of Munich and Trieste. After teaching at several universities he settled at Munich, where he established the Zoological Institute in 1932. He was a key figure in developing ethology using field observation of animals combined with ingenious experiments. His early work showed that fish perceive colours and that their visual acuity is superior to that of humans, but he is mainly remembered for his later work on honey bees. He demonstrated that bees are able to distinguish odours, tastes and colours, and that the honey bee's visual spectrum allows it to see ultraviolet light, and described how hive bees communicate the location of a source of food by means of coded dances. In 1949 he further showed that bees can navigate even on cloudy days by making use of the pattern of polarized light in the sky. In 1973 he shared the Nobel Prize in physiology or medicine with other pioneers of ethology, KONRAD LORENZ and NIKOLAAS TINBERGEN. His books include *Aus dem Leben der Bienen* (1927, Eng trans *The Dancing Bees*, 1954) and *Animal Architecture* (1974).

Frisch, Max Rudolph 1911–91
Swiss novelist and playwright
Born in Zurich, he was forced by economic circumstances to abandon the study of German literature at Zurich University (1933), and became a journalist, then trained as an architect. *Blätter aus dem Brotsack* (1940, Eng trans *Leaves from a Knapsack*, 1942) was published while he was serving with the Swiss frontier guard. In 1958 he became the first foreigner to be awarded the Büchner prize of the German Academy for Language and Poetry. As a novelist he is chiefly known outside German-speaking Europe for the novels *Stiller* (1954, Eng trans *I'm Not Stiller*, 1958), *Homo Faber* (1957, Eng trans 1959) and *Der Mensch erscheint im Holozän* (1979, Eng trans *Man in the Holocene*, 1980). As a playwright, he was a disciple of BERTOLT BRECHT in the 1940s, and his *Biedermann und die Brandstifter* (1953, Eng trans *The Fire Raisers*, 1962) and *Andorra* (1961, Eng trans 1962) have become modern stage classics. 🕮 U Weisstein, *Frisch* (1967)

Frisch, Otto Robert 1904–79
British physicist
Born in Vienna, Austria, and educated at Vienna University, he became assistant to OTTO STERN in 1930 and worked with him and EMILIO SEGRÈ on diffraction experiments. In 1933, under the Nazi racial laws, Frisch left Germany to work with PATRICK BLACKETT at Imperial College, London, before moving to NIELS BOHR's institute in Copenhagen. In 1939, with LISE MEITNER (his aunt), he correctly interpreted and later confirmed that OTTO HAHN's observation of uranium splitting was due to nuclear fission. During World War II he worked at Birmingham University, where he and Sir RUDOLF PEIERLS studied the possibility of nuclear chain reactions. This work led to his involvement in the British and US atom bomb projects, and he worked for a time at Los Alamos on the Manhattan Project. After the war he returned to England to become head of the nuclear physics division of the Atomic Energy Research Establishment at Harwell, and later accepted a chair at Cambridge. He received an OBE in 1948 and was elected FRS in the same year. 🕮 *What Little I Remember (1979)*

Frisch, Ragnar Anton Kittil 1895–1973
Norwegian economist and Nobel Prize winner
Born in Oslo, he studied there, and was professor of economics at Oslo University from 1931 to 1965, and editor of *Econometrica* (1933–55). He was a pioneer of econometrics, the application of statistics to economic planning. He shared the first Nobel Prize in economics in 1969 with JAN TINBERGEN.

Frith, Francis 1822–98
English topographical photographer
Born in Chesterfield, Derbyshire, he became interested in photography while working with a printing firm. Between 1856 and 1859 he travelled extensively in Egypt and the Near East, using the large 40 × 50cm cameras and complicated wet-plate process of the period to produce the first photographic traveller's records to be seen in Great Britain. From 1864 he toured throughout Britain and established a nationwide service of photographs of local scenes as prints and postcards, a business which by the end of his life had extended into Europe and survived commercially until 1971.

Frith, John 1503–33
English Protestant religious
Born in Westerham, Kent, he was educated at Eton and King's College, Cambridge. From there THOMAS WOLSEY summoned

him to his new foundation at Oxford in 1525. A year later suspicion of heresy drove him to Marburg, where he befriended WILLIAM TYNDALE and PATRICK HAMILTON, and wrote several Protestant treatises. Returning in 1532, he was burned at Smithfield.

Frith, Mary, *known as* **Moll Cutpurse** 1584–1659
English highwaywoman, pickpocket and receiver of stolen goods
Born in London, she proved inept and uninterested in all the traditional feminine virtues and joined the groups of pickpockets who frequented the crowded markets and fairs of the city, adopting masculine clothing to consolidate her equality among them. A long period of highway robbery followed this apprenticeship, when she gained her nickname from her use of a sharp knife to cut the belts on which travellers carried their purses. She became notorious and rich. A declared Royalist, she asserted that she would only rob the king's enemies. By the end of her life she was running a brothel. She left instructions that she was to be buried face down, so that she would remain as preposterous in death as in life.

Frith, William Powell 1819–1909
English painter
Born in Aldfield, he made himself the wealthiest artist of his time by selling both paintings and their copyright. The Pre-Raphaelites criticized the vulgarity of his historical and genre works, but he took a new direction with his huge canvases of Victorian scenes, *Ramsgate Sands* (1854, bought by Queen VICTORIA for Buckingham Palace), *Derby Day* (1858, Tate Britain, London) and *The Railway Station* (1862, Holloway College), which achieved huge popular success and were hailed by JOHN RUSKIN as the art of the future.

Fritsch, Elizabeth 1940–
English potter
Born in Whitchurch, Shropshire, she studied harp and piano at the Royal Academy of Music before attending the Royal College of Art, London. One of the most talented contemporary potters of her generation, she is sometimes inspired by music. Her hand-built vessels use coiling spires and geometric patterns in coloured slips with a matt texture akin to ivory frescoes. She was influenced by HANS COPER and LUCIE RIE. She was awarded the CBE in 1995.

Frobenius, Ferdinand Georg 1849–1917
German mathematician
Born in Berlin, he studied at the universities of Göttingen and Berlin, where he gained a PhD, and from 1875 to 1892 taught at the university of Zurich, before returning to Berlin as professor. After early work on the theory of differential equations, he founded the theory of group representations, using it both to clarify the notion of an abstract group and to derive the properties of groups inaccessible by more direct methods. Representation theory later became essential in quantum mechanics and a major theme in the mathematics of the 20th century.

Froberger, Johann Jakob 1616–67
German composer
Born in Stuttgart, he was a pupil of GIROLAMO FRESCOBALDI. Court organist at Vienna (1637–57), he made concert tours to Italy, Paris, London and Brussels. Of his many compositions, the best remembered are his suites for harpsichord.

Frobisher, Sir Martin c.1535–1594
English sailor
Born in Altofts, near Wakefield, Yorkshire, he was sent to sea as a boy. In 1576, with the *Gabriel* and the *Michael*, he set off in search of a Northwest Passage to Cathay. The *Michael* was abandoned, but Frobisher reached Labrador and discovered Frobisher Bay. From two expeditions (1577, 1578) he brought back 'black earth', which was supposed to be gold from Frobisher Bay. He commanded a vessel in 1585 in FRANCIS DRAKE's expedition to the West Indies, and was knighted for his services against the Armada in command of the *Triumph*. He was mortally wounded at the siege of Crozon, near Brest, France.

Fröding, Gustaf 1860–1911
Swedish poet
Born in Alstern, near Karlstad, he studied at Uppsala, and became a schoolmaster and journalist, but suffered from mental illness. He is considered the greatest Swedish lyric poet, often compared to ROBERT BURNS, combining dialect and folksong rhythm in his portrayal of local characters, as in *Guitarr och dragharmonika* (1891, 'Guitar and Concertina'), *Nya dikter* (1894, 'New Poems') and *Räggler å paschaser* (1896, 'Drops and Fragments'). 🕮 J Landquist, *Gustaf Fröding, en biografi* (1956)

Froebel, Friedrich Wilhelm August 1782–1852
German educationalist and founder of the kindergarten system
Born in Oberweissbach, he studied at Jena, Göttingen and Berlin, and in 1805 began teaching at Frankfurt am Main. In 1816 he put into practice his educational system at a school which he founded at Griesheim. He expounded its aim (to help the child's mind to grow naturally and spontaneously) in *Die Menschenerziehung* (1826, Eng trans *The Education of Man*, 1885). Catholic opposition foiled his attempts to establish a school near Lucerne (1831). After starting an orphanage at Burgdorf in Bern, where he began to train teachers for educational work, he opened his first kindergarten school at Blankenburg (1836). 🕮 Irene M Lilley, *Friedrich Froebel: A Selection from His Writings* (1967)

Frohschammer, Jakob 1821–93
German Catholic theologian and philosopher
Born near Ratisbon (now Regensburg), he became widely known for his history of dogma (1850), which was banned by the pope. In another work he championed freedom of science from the church. He founded the first liberal Catholic paper, *Athenä*, in which he gave an account of DARWIN's theory. He was excommunicated in 1871.

Froissart, Jean c.1333–c.1404
French chronicler and poet
Born in Valenciennes, Hainault, he was educated for the Church, but at the age of 19 began to write the history of the wars of his time. He served PHILIPPA OF HAINAULT, the wife of EDWARD III of England (1361–69), and travelled in Scotland, France and Italy. Returning to Hainault, he resumed work on his *Chroniques* (Eng trans *Chronicles*, 1523–25), which cover European history from 1325 to 1400. Mainly occupied with France, England, Scotland and Flanders during the Hundred Years' War (1337–1453), he also supplies valuable information about Germany, Italy and Spain. He wrote poems for noble patrons and became private chaplain to Guy of Châtillon.

Froment, Nicolas fl.1450–90
French painter
His work exemplifies the late Gothic style, containing features surprisingly Flemish in appearance. He was court painter to King René, whose portrait is incorporated in his masterpiece, a triptych in the cathedral of Aix-en-Provence, having as its centrepiece MOSES and the burning bush.

Fromentin, Eugène 1820–76
French novelist and painter
He was born in La Rochelle, and visits to Algeria and the Near East provided him with abundant material for his paintings, which betray the influence of EUGÈNE DELACROIX. His three travel books also provide vivid pictures of Algeria. However, he is best known as the author of *Dominique* (1862, Eng trans 1932), a nostalgic autobiographical novel, and *Les Maîtres d'autrefois* (1876, Eng trans *Masters of Past Time*, 1948), which was written during a tour of Belgian and Dutch art galleries and contains some impressive art criticism. 🕮 A R Evans, *The Literary Art of Eugène Fromentin* (1964)

Fromm, Erich 1900–80
US psychoanalyst and social philosopher
Born in Frankfurt am Main, Germany, he was educated at the universities of Frankfurt, Heidelberg and Munich, and at the Berlin Institute of Psychoanalysis. He emigrated to the USA in 1934, and after holding various university appointments became professor at New York (1962). He emphasized social and economic and cultural factors on human behaviour. His works include *Man for Himself* (1947), *Psychoanalysis and Religion* (1951), *Sigmund Freud's Mission* (1959) and *The Heart of Man* (1964).

Frontenac, Louis de Buade, Comte de 1622–98
French-Canadian politician
He served in the army, and in 1672 was appointed governor of the French possessions in North America. He was recalled for misgovernment in 1682, but had gained the confidence of the settlers and the respect of the Native Indians, and in 1689 was sent out again. He extended the boundaries of New France down the Mississippi, launched attacks on New England villages, repulsed the British siege of Quebec (1690) and defeated the Iroquois.

Frost, Robert Lee 1874–1963
US lyric poet

Robert Frost was born in San Francisco, the son of a New England father and Scottish mother. He studied at Dartmouth and Harvard but did not graduate and as a teacher, cobbler and New Hampshire farmer he wrote poetry that he was unable to get published. From 1912 to 1915 he lived in Great Britain, where, encouraged by RUPERT BROOKE and others, he published *A Boy's Will* (1913) and *North of Boston* (1914), which brought him an international reputation.

Returning in glory to the USA, he became professor of English at Amherst (1916), and continued to write lyric and narrative poetry which draws its characters, background and imagery from New England. His choice of rural subjects and use of traditional verse forms has contributed perhaps to the misperception of Frost as a homely and comfortable poet, but the dark and ambiguous vision that underlies his work is in no way conventional.

His volumes of poetry include *West-Running Brook* (1928), *A Witness Tree* (1942), *Steeple Bush* (1947) and *In the Clearing* (1962). He was awarded the Pulitzer Prize in 1924, 1931, 1937 and 1943, and he was professor of poetry at Harvard from 1939 to 1943 before returning to Amherst (1949–63). Recognized as a major US poet, he read his poem 'The Gift Outright' at President JOHN F KENNEDY's inauguration in 1961. His *Complete Poems* appeared in 1967.

📖 J Meyers, *Robert Frost: A Biography* (1996); E C Latham, editor, *Robert Frost's Poetry and Prose* (1984); L Thompson and R H Winnick *Robert Frost: A Biography*, edited by E C Latham (1981).

> 'I shall be telling this with a sigh
> Somewhere ages and ages hence:
> Two roads diverged in a wood, and I –
> I took the one less travelled by,
> And that has made all the difference.'
>
> – From 'The Road Not Taken' (1916).

> 'He is a poet of the minor theme, the casual approach, and the discreetly eccentric attitude.'
>
> – Yvor Winters in *Robert Frost: A Collection of Critical Essays*, edited by J Cox (1982).

Frontinus, Sextus Julius c.40–103 AD
Roman soldier and writer
He was appointed Roman governor of Britain in AD 75, and established the legionary fortress at Isca (Caerleon on the Usk). In AD 97 he was made superintendent of the waterworks at Rome. He wrote the *Strategematica*, a treatise on war in four volumes, and the *De Aquis Urbis Romae*, a detailed account of the Roman water system, which also contains important information on the history of architecture.

Fronto, Marcus Cornelius c.100–c.176 AD
Roman orator
Born in Cirta, Numidia (North Africa), he was entrusted by ANTONINUS PIUS with the education of MARCUS AURELIUS and Lucius Verus. In AD 143 he was consul with HERODES ATTICUS. Two series of his letters to Marcus Aurelius were discovered in Milan in 1815. He was a champion of the early Latin stylists.

Frost, Sir David Paradine 1939–
English broadcaster and businessman
Born in Tenterden, Kent, and educated at Cambridge, he entered television in 1961. He hosted *That Was The Week That Was* (1962–63), a late-night revue show with topical satire and an irreverent attitude to authority. Shows in Great Britain and the USA include *The Frost Report* (1966–67), *Frost on Friday* (1968–70), *The David Frost Show* (1969–72) and *Breakfast with Frost* (1993–2005). His shows on US television include *The Spitting Image Movie Awards* (1987) and *The Spectacular World of Guinness Records* (1987–88), and he has been a diligent interviewer of world leaders in *The Nixon Interviews* (1976–77) and *The Shah Speaks* (1980). A producer of films like *The Slipper and the Rose* (1976), he was also a co-founder and presenter of Britain's *TV–am* (1983–92). His many international honours include the Golden Rose of Montreux (1967) and the Emmy (1970, 1971). His publications include *How to Live Under Labour* (1964), *I Gave Them a Sword* (1978) and *The World's Shortest Books* (1987). His first volume of autobiography, *From Congregations to America*, was published in 1993, the same year he was knighted. In 2005 he received a BAFTA fellowship, and accepted a post with the Arabic broadcaster Al-Jazeera English.

Frost, John d.1877
Welsh political leader
Born in Newport, he was a prosperous tailor and draper, and became mayor of Newport (1836–37). In 1839 he led a Chartist insurrection designed to seize control of Newport, which was repulsed by troops with heavy loss of Chartist lives. He was sentenced to be hanged, drawn and quartered, but the sentence was commuted to transportation for life to Tasmania. Given an unconditional pardon in 1856, he returned to a triumphant welcome in Newport.

Frost, Robert Lee *See panel above*

Frost, Sir Terry (Terence Ernest Manitou) 1915–2003
English painter
Born in Leamington Spa, Warwickshire, he was taken prisoner in Crete in 1941 and spent World War II in prisoner-of-war camps. After the War, he attended evening classes at Birmingham Art College and Camberwell School of Art, where he studied under VICTOR PASMORE (1947–50). He then moved to St Ives, Cornwall, where he worked as BARBARA HEPWORTH's assistant, and settled in nearby Newlyn. His first abstract paintings date from 1949 and typically consist of segments of colour, as in *Green, Black and White Movement* (1951). He held teaching posts in both Britain and California, including being professor of painting at the University of Reading (1977–81), then emeritus. He became an RA in 1992 and was knighted in 1998. In 2000 the Royal Academy held a major retrospective, 'Terry Frost, Six Decades'.

Froude, James Anthony 1818–94
English writer and historian
Born in Dartington, Devon, he was educated at Westminster and Oriel College, Oxford. In 1842 he was elected a Fellow of Exeter College, Oxford. His early controversial novels *Shadows of the Clouds* (1847) and *The Nemesis of Faith* (1848) cost him both his fellowship and an educational post in Tasmania. For the next few years he wrote for *Fraser's Magazine* (which he edited for a while) and the *Westminster Review*, and produced his *History of England from the Fall of Wolsey to the Spanish Armada* (12 vols, 1856–69). His essays include *English in Ireland in the Eighteenth Century* (1871–74) and *Caesar* (1879). As literary executor of THOMAS CARLYLE he edited his *Reminiscences* (1881) and JANE WELSH CARLYLE's *Letters* (1882), and wrote Carlyle's biography (1882–84). Other works are *Two Lectures on South Africa* (1880), *Oceana* (1886), *The English in the West Indies* (1888), *The Earl of Beaconsfield* (1890), *The Spanish Story of the Armada* (1892) and *Lectures on the Council of Trent* (1896). He later became Rector of St Andrews (1869) and professor of Modern History at Oxford (1892). He was the brother of RICHARD HURRELL FROUDE and WILLIAM FROUDE.

Froude, Richard Hurrell 1803–36
English tractarian
Born in Dartington, Devon, he became Fellow and tutor of Oriel College, Oxford, in 1827. With JOHN HENRY NEWMAN and JOHN KEBLE he helped to initiate the 'Oxford Movement', which favoured the early and medieval church, and wrote Tracts 9 and 63. His diaries, posthumously published as *Remains* (1838–39), betrayed hostility to the leaders of the Reformation and encouraged the development of Anglo-Catholicism. He was the brother of JAMES ANTHONY FROUDE and WILLIAM FROUDE.

Froude, William 1810–79
English engineer and applied mathematician
Born in Dartington, Devon, in 1827 he became an assistant to ISAMBARD KINGDOM BRUNEL. Retiring in 1846 from professional work, he devoted himself to investigating the conditions of naval construction. He was the brother of JAMES ANTHONY FROUDE and RICHARD HURRELL FROUDE.

Frundsberg, Georg von 1473–1528
German soldier
Founder and leader of German *Landsknechte* during the Italian wars of MAXIMILIAN I and CHARLES V, he was largely responsible for winning the Battle of Pavia (1525).

Frunze, Mikhail Vasilevich 1885–1925
Russian revolutionary and professional soldier
A Bolshevik from 1904, active in both the 1905 and 1917 revolutions, he rose to prominence during the Russian Civil War with successful commands on the eastern and southern fronts. He exercised profound influence upon Soviet military doctrine but was soon engaged in debate with LEON TROTSKY, Commissar for War, about creating a Red Army fit for the future. In 1925 he displaced Trotsky but died during an operation, often claimed to have been a medical murder.

Fry, C(harles) B(urgess) 1872–1956
English sportsman, writer and journalist
Born in West Croydon, Surrey, he was educated at Oxford, where he excelled in various sports. The epitome of amateur sportsmanship, he played football at a high level, appearing for Southampton in an FA Cup final and for England in one match. He also set a long-jump world record and represented the Barbarians at rugby union. However, it was on the cricket pitch that he truly excelled: his batting for Sussex earned him 26 England appearances (six as captain), in which he scored two centuries. When his sporting career ended he became a journalist and writer, and was a deputy for the Indian delegation to the League of Nations. In the early 1920s he was offered the throne of Albania, but declined. 🕮 Iain Wilton, *C B Fry: An English Hero* (1999)

Fry, Christopher Harris 1907–2005
English dramatist
Born in Bristol, and educated at Bedford Modern School, he was a schoolmaster before being appointed director of Tunbridge Wells Repertory Players (1932–36). In 1940 he became director of the Playhouse at Oxford, having in the meantime written two pageant plays, *Thursday's Child* and *The Tower* (both 1939), and also *The Boy with a Cart* (1938), a rustic play on the subject of the Sussex saint, Cuthman. After service in the Non-Combatant Corps during World War II he began a series of outstanding plays in free verse, often with religious and mystic undertones, including *A Phoenix Too Frequent* (1946), *The Lady's Not for Burning* (1949), *Venus Observed* (1950), *A Sleep of Prisoners* (1951), *The Dark is Light Enough* (1954), *Curtmantle* (1962) and *A Yard of Sun* (1970). Following a period of prominence during the 1940s and 1950s, he fell from favour as dramatic styles changed. He also produced highly successful translations of JEAN ANOUILH and JEAN GIRAUDOUX, and Hollywood screenplays including *The Bible: In the Beginning* (1966) and (as uncredited co-writer) *Ben-Hur* (1959). 🕮 D Stanford, *Christopher Fry* (1954)

Fry, Elizabeth, *née* **Gurney** 1780–1845
English Quaker prison reformer
Born in Norwich, Norfolk, she became a preacher for the Society of Friends in 1810. Visiting Newgate Prison for women in 1813 she found 300 women, with their children, in terrible conditions, and thereafter devoted her life to prison and asylum reform at home and abroad. She also founded hostels for the homeless, as well as charitable societies, despite her husband's bankruptcy in 1828. She was the sister of JOSEPH JOHN GURNEY. 🕮 June Rose, *Elizabeth Fry* (1980)

Fry, Joseph 1728–87
English Quaker businessman and type-founder
Born in Sutton Benger, Wiltshire, he settled in Bristol as a doctor but later went into a pottery enterprise. He founded the chocolate business that bears his name. From 1764 onwards he became eminent as a type-founder, founding types that were similar to those of WILLIAM CASLON. He also brought out a five-volume version of the Bible (1774–76).

Fry, Laura Ann 1857–1943
US woodcarver, ceramicist, designer and sculptor
The daughter of the woodcarver William Henry Fry, she studied at the Cincinnati School of Design, in Trenton, New Jersey, and in France and England. A founder member of the Cincinnati Art Pottery Club in 1879, she became the first employee of the Rookwood Pottery in 1881. In 1884 she introduced the use of the atomizer for applying slips to moist pots, and due to her work with underglazing techniques, 'Standard' Rookwood ware became the best-known feature of the firm's Arts and Crafts pottery. After leaving Rookwood in 1887, she was a professor of industrial art (1891) and worked at the Lonhuda Pottery in Steubenville, Ohio (1891–94).

Fry, Roger Eliot 1866–1934
English artist and art critic
He was born in London and was educated at Cambridge. A landscape painter himself, he became a champion of modern artists, particularly CÉZANNE, and organized the first London exhibition of Post-Impressionists in 1910. He wrote extensively on art and aesthetics, propounding a theory of 'significant form' and colour, rather than content, as the only criteria for great art. He founded the Omega Workshops in London (1913–21), in association with VANESSA BELL and DUNCAN GRANT and others of the Bloomsbury Group, to design textiles, pottery and furniture. His writings include *Vision and Design* (1920), *Transformations* (1926), *Cézanne* (1927), *Henri Matisse* (1930), *French Art* (1932) and *Reflections on British Painting* (1934).

Fry, Stephen John 1957–
English actor and writer
Born in London, he studied at Queen's College, Cambridge, during which time he appeared in more than 30 plays. He wrote his first play *Latin* (1980), which won a Fringe First at the Edinburgh Festival of that year, and appeared with the Cambridge Footlights revue. He also wrote the book for the long-running West End musical *Me and My Girl* (1984). Frequently partnered by his Cambridge Footlights compatriot HUGH LAURIE, he has appeared with him in *A Bit of Fry & Laurie* (1989–95), *Jeeves and Wooster* (1990–93) and the film *Peter's Friends* (1992). He was also on television in *Stalag Luft* (1993) and *Cold Comfort Farm* (1995). His stage appearances include *Forty Years On* (1984), *The Common Pursuit* (1988) and *Look Look* (1990). He was in the films *A Handful of Dust* (1988), *A Fish Called Wanda* (1988), and the OSCAR WILDE biopic *Wilde* (1996). His novels include *The Liar* (1991) and *Making History* (1996). He caused a media sensation in 1995 when he walked out of the SIMON GRAY play *Cell Mates* (1995), shortly before its opening in London's West End, and disappeared for a time; he later attributed these events to a bipolar disorder, which he explored in a BBC2 documentary (2006). In 2003 he launched the panel quiz programme *QI*. 🕮 *Moab Is My Washpot* (1997)

Frye, (Herman) Northrop 1912–91
Canadian literary critic
Born in Sherbrooke, Quebec, he graduated from the University of Toronto and later earned a master's degree in English from Oxford. He joined the faculty at Toronto in 1940 and remained at the university for half a century. Two early works established him as one of the most eminent literary critics of his generation: *Fearful Symmetry* (1947), a study of the writings of WILLIAM BLAKE; and *Anatomy of Criticism* (1957), an examination of literary archetypes and of the social needs satisfied by myths and symbols. Subsequent writings include *The Educated Imagination* (1964), *Secular Scripture* (1976) and *The Great Code* (1982).

Fuad I 1868–1936
Egyptian ruler
Born in Cairo, the son of Khedive ISMAIL PASHA and father of FAROUK I, he was Sultan of Egypt from 1917 and king from 1922, when the British protectorate was terminated. His reign was a period of uneasy relations with Egyptian nationalists, represented by the Wafd Party.

Fuchs, (Emil) Klaus (Julius) 1912–88
British spy and physicist
Born in Rüsselsheim, Germany, he escaped from Nazi persecution to the UK in 1933, was interned during World War II, then naturalized in 1942. From 1943 he worked in the USA on the atom bomb, and in 1946 became head of the theoretical physics division at Harwell, UK. He was sentenced in 1950 to 14 years' imprisonment for disclosing nuclear secrets to the Russians, but was released (1959) and worked in the nuclear research centre of East Germany until 1979. 🕮 Robert Chadwell Williams, *Klaus Fuchs, Atom Spy* (1987)

Fuchs, Leonhard 1501–66
German botanist
He was professor at Tübingen University, a pioneer of German botany, and wrote *Historia stirpium* (1542). The genus Fuchsia was named after him.

Fuchs, Sir Vivian Ernest 1908–99
English explorer and scientist
Born in Freshwater, Isle of Wight, the son of a farmer of German origin, he was educated at Brighton College and St John's, Cambridge. After four geological expeditions in East Africa (1930–38), he served in West Africa and Germany during World War II. As director of the Falkland Islands Dependencies Survey (1947) he set up scientific bases on the Graham Land peninsula, and, while marooned there for a year, conceived the plan for an overland crossing of Antarctica, which materialized in 1955 when he was appointed leader of the Commonwealth expedition. With a party of ten he set out by snow tractor from Shackleton Base, Weddell Sea, on 24 Novembèr 1957, reached

the South Pole on 19 January 1958 and, continuing via Depot 700 with the assistance of Sir EDMUND HILLARY and his New Zealand party, reached Scott Base, Victoria Land, on 2 March. He was awarded the gold medal of the Royal Geographical Society (1951), and its Polar medal (1953) and clasp (1958). His publications include his autobiography *A Time to Speak* (1990).

Fucini, Renato, *pseudonym* **Neri Tanfucio** 1843–1921
Italian writer
Born in Monterotondo, near Pisa, he studied agriculture and engineering in Pisa, and became city engineer in Florence. He had a bright wit which found an outlet in dialect verse, published as *Cento Sonetti* (1872, 'A Hundred Sonnets'). When Florence ceased to be a capital city he lost his post and retired to the country. *Le veglie di Neri* (1884, 'The Vigils of Neri'), a collection of tales, is his best-known work. *All'aria aperta* (1897, 'In the Open') is considered the best modern collection of Italian humorous novellas. He also wrote books for children and personal anecdotes. 🕮 *Renato Fucini* (1943)

Fuentes, Carlos 1928–
Mexican novelist and playwright
Born in Panama City, the son of a diplomat, he was educated at the Colegio Francés Morelos, then at the National University of Mexico and the Institut des Hautes Études Internationales in Geneva, which led to a career in international affairs. He eventually became cultural attaché to the Mexican Embassy in Geneva (1950–52) and press secretary to the United Nations Information Centre, Mexico City. He served as the Mexican ambassador to France (1975–77), and has held a variety of teaching posts. An energetic cultural promoter, writer of articles and reviewer, he has published prolifically since his first collection of fantastic, myth-inspired short stories, *Los días enmascarados* ('The Masked Days') in 1954. Many of his novels have been published in English, among them *Terra nostra* (1975, Eng trans 1976), regarded as his masterpiece, the culmination and synthesis of his novel-writing technique and his ideas on the identity and destiny of Spain and Latin America. His novel *Gringo viejo* (1985, Eng trans *The Old Gringo*), concerning the final days of US writer AMBROSE BIERCE, was filmed in 1989. Further publications include *Los años con Laura Díaz* (1999, Eng trans *The Years with Laura Díaz*, 2001), *Instinto de Inez* (2001, Eng trans *Inez*, 2003) and *La silla del águila* (2003, Eng trans *The Eagle's Throne*, 2006). 🕮 Raymond Leslie Williams, *The Writings of Carlos Fuentes* (1996)

Fugard, (Harold) Athol (Lannigan) 1932–
South African dramatist and theatre director
He was born in Middelburg, Cape Province, and educated at Port Elizabeth Technical College and Cape Town University. He worked as a seaman and journalist before settling firmly into a theatrical career in 1959 as actor, director and playwright. In 1965 he became director of the Serpent Players in Port Elizabeth, and in 1972 he co-founded the Space Experimental Theatre, Cape Town. His plays are mostly set in contemporary South Africa, but his presentation of the bleakness and frustration of life for those especially on the fringes of society raises them to the level of universal human tragedy. His work met with official opposition: *The Blood Knot* (1960), about two coloured brothers, one light- and one dark-skinned, was censored, and some of his work has only been published and produced abroad. His plays include *Statements After an Arrest under the Immorality Act* (1972), *A Lesson from Aloes* (1979), *Master Harold ... and the Boys* (1982), *The Road to Mecca* (1984) and *A Place with the Pigs* (1987), which was inspired by a newspaper story about a Red Army deserter who hid in a pigsty for over 40 years. He has also written film scripts and a novel, *Tsotsi* (1980), which was adapted into an Academy Award-winning film in 2006. *The Road to Mecca* opened in the Promenade Theater in New York in 1988, gaining much praise for Fugard's direction, writing ability and acting in his role as a Dutch Reformed pastor.

Fugger
South German family of bankers and merchants
In the early 16th century the family founded lines of counts and princes. Johannes (1348–1409) was a master-weaver, who settled in Augsburg (1368). His second son, Jakob (d.1469), was extremely successful in his business, and three of his sons were even more successful, married into noble families, and were themselves ennobled by Emperor MAXIMILIAN I, who mortgaged to them for 10,000 gold gülden the county of Kirchberg and the lordship of Weissenhorn. The family attained the height of its prosperity and influence under CHARLES V, its chief members being the sons of George (d.1506), founders of the two chief lines of the House of Fugger. The brothers were zealous Catholics, opponents of MARTIN LUTHER. Charles V then made them counts, invested them with the still-mortgaged properties of Kirchberg and Weissenhorn, and gave them the rights of princes. The Fuggers continued in business, increased their immense wealth, and were appointed to the highest posts in the empire. They owned great libraries and art collections, maintained painters and musicians, and encouraged art and science.

Fujii, Shozo 1950–
Japanese judo fighter
World middleweight champion four times (1971–79), he did not make selection to the Japanese Olympic team in 1972 and 1976, and Japan boycotted the Moscow Olympics in 1980. However, despite the lack of an Olympic title, he gained international appreciation due to his style of attack. His first three title wins came after he beat Japanese finalists, but the fourth was against Bernard Tchoullouyan of France (1979). Fujii mastered a special double-handed shoulder throw; he curled below his opponent, ran two steps, and then threw his opponent onto the mat. He would then land on top of his opponent, victorious.

Fujimori, Alberto Kenyo 1939–
Peruvian politician
He was born in Lima. He founded and led the conservative Cambio '90 (Change 90) Party, and, promising reform, succeeded PEREZ ALAN GARCÍA as president (1990–2000). His administration was marked throughout by violence from the Maoist 'Shining Path' guerilla group. He swiftly dismantled the existing order in Peru by dismissing Congress (1992), sacking senior judges, imposing order through an 'Emergency National Reconstruction Government', and changing the constitution. Although he won the controversial 2000 election, he left Peru in 2000 amid allegations of corruption and went into exile in Japan. The Peruvian legislature subsequently declared him 'morally unfit', formally voted him out of office and imposed a ten-year political ban on him; despite this, he declared his intention to run for office in 2006, and travelled to Chile, where he was detained. Peru then requested his extradition on human rights and corruption charges.

Fukui, Kenichi 1918–98
Japanese chemist and Nobel Prize winner
Born in Nara prefecture, he graduated in industrial chemistry at Kyoto University in 1941, and worked (1941–45) in the Army Fuel Laboratory. In 1943 he joined the staff of Kyoto University and obtained a PhD in engineering. He was made professor of hydrocarbon physical chemistry in 1951. Initially he studied a diverse set of topics, but gradually his interest in the way atomic structure affects the course of a chemical reaction eclipsed all his other interests. He published his conclusions in highly mathematical terms and it was not until ROBERT WOODWARD and ROALD HOFFMANN produced their rules for the conservation of orbital symmetry that the value of Fukui's approach was appreciated. His frontier orbital theory has been widely used in rationalizing organic reactivity and preceded sophisticated computer calculations. Fukui shared the Nobel Prize in chemistry with Hoffmann in 1981. The recipient of many honours, he was president of the Kyoto Institute of Technology (1982–88), president of the Japanese Chemical Society (1983–84) and became director of the Institute for Fundamental Chemistry in Kyoto in 1988.

Fulbright, J(ames) William 1905–95
US politician
Born in Sumner, Missouri, and educated at the University of Arkansas and George Washington University Law School, he was a Rhodes scholar at Oxford, and taught law in Washington and Arkansas. He was elected to the US House of Representatives as a Democrat in 1942, where in 1943 he introduced a resolution advocating the creation of the United Nations, and was elected to the Senate in 1944. He sponsored the Fulbright Act (1946), which established an exchange scholarship system for students and teachers between the USA and other countries. He distinguished himself in 1954 by his opposition to JOSEPH MCCARTHY. As chairman of the Senate Foreign Relations Committee, he became a major critic of the escalation of the Vietnam War. He lost his Senate seat in 1974. He wrote *Old Myths and New Realities* (1965) and *The Arrogance of Power* (1967). He was made an honorary KBE in 1975. 🕮 E J Brown, *William Fulbright* (1985)

Fuller, (Richard) Buckminster 1895–1983
US engineer and architect
Born in Milton, Massachusetts, he studied at Harvard and the US Naval Academy, Annapolis, Maryland. In 1917 he discovered

energetic-synergetic geometry, and he later devised a structural system known as tensegrity structures. Following the machine aesthetic, he experimented with structural designs aimed at economical, efficient, trouble-free living (developed from systems of aircraft and chassis construction) and intended for mass production. Dymaxion House (1927) embodied these practical ideas. After 1945 he designed geodesic domes, great space-frame enclosures based on polyhedra. The largest design was realized at the Union Tank Car Repair Shop, Louisiana (1958), and the best known at the US Pavilion, Montreal Exhibition (1967). 🕮 Hugh Kenner, *Bucky* (1973)

Fuller, Charles H, Jnr 1939–
US playwright
Born in Philadelphia, he is noted for his unbiased, sensitive exploration of relationships, especially those between blacks and whites, and between blacks and a white-dominated bureaucracy. His successful plays include *The Brownsville Raid* (1976), based upon a true incident in 1906, in which an entire US army regiment was honourably discharged after none of the 167 black soldiers admitted inciting a riot in Brownsville, Texas. His Pulitzer Prize-winning *A Soldier's Play* (1981), also set in the army, centres on the murder of an unpopular sergeant; it was filmed as *A Soldier's Story* (1984). He was co-founder of the Afro-American Arts Theater, Philadelphia.

Fuller, John Frederick Charles 1878–1966
English soldier
He was born in Chichester, West Sussex. He served in the Second Boer War (1899–1902), and during World War I he advocated the armour-cum-fighter-plane war of movement as subsequently exploited by HITLER's *Reichswehr* (army). He retired in 1933 and became renowned for his writings on the theory of war, particularly relating to mobile and armoured forces, including *Reformation of War* (1923), *Foundations of the Science of War* (1926), *Memoirs of an Unconventional Soldier* (1936) and *Decisive Battles* (3 vols, 1956).

Fuller, Loie, *originally* **Marie Louise Fuller** 1862–1928
US dancer, choreographer and producer
Born in Fullersburg, Illinois, she began her career in vaudeville and as a circus artist (1865–91). She was a pioneer in the field of performance art, and her exotic solo skirt-dance, using multi-directional coloured lights on the yards of swirling silk she wore, created a sensation in 1891, especially in Europe. Her Paris debut in 1892 was met with great acclaim and in 1900 she appeared at the Paris World Fair. Group pieces also figured among her (more than 100) dances. She founded a dance school in 1908, and was a model for TOULOUSE-LAUTREC, AUGUSTE RODIN and many other prominent artists.

Fuller, (Sarah) Margaret, Marchioness Ossoli 1810–50
US feminist, writer and revolutionary
Born in Cambridgeport, Massachusetts, she was educated by her father before attending the local school at the age of 14. She went on to teach in Boston (1836–37) and Providence (1837–39). There she assumed an important role in the transcendentalist circle that centred around RALPH WALDO EMERSON. From 1840 to 1842 she was editor of *The Dial*, the transcendentalist journal, and in 1844 went to New York where she became literary critic for the *New York Tribune*. Moving to Italy in 1847, she worked as a foreign correspondent and there met and married Marquis Giovanni Ossoli, an Italian nobleman and republican. After becoming involved in the unsuccessful Revolution of 1848, she sailed for New York with her husband and infant son, but the ship was wrecked off Fire Island and all aboard were drowned. Her publications include *Summer on the Lakes* (1844) and *Woman in the 19th Century* (1855), the earliest major piece of US feminist writing. 🕮 Paula Blanchard, *Margaret Fuller* (1978)

Fuller, Melville Weston 1833–1910
US jurist
Born in Augusta, Maine, he graduated from Bowdoin College in 1853 and briefly attended Harvard Law School. He practised law in Chicago from 1856 and became active in the Democratic Party, befriending GROVER CLEVELAND, who in 1888 appointed Fuller chief justice of the Supreme Court. Although he lacked a national reputation at the time of his appointment, he soon won praise for his skilful leadership of the court and his ability to engineer compromises. He sought to protect traditional civil liberties and tended towards a strict construction of the Constitution, and in 1895 he wrote two important decisions weakening the Sherman Antitrust Act and striking down the first personal income tax passed by Congress. He remained chief justice until his death, and from 1900 he also served as a member of the Permanent Court of Arbitration at The Hague.

Fuller, Roy Broadbent 1912–91
English poet and novelist
Born in Oldham, Lancashire, he went to school in Blackpool, trained as a solicitor, and worked as a solicitor with building societies. His first collection of poetry, *Poems*, which appeared in 1939, was strongly influenced by W H AUDEN. His experience of war in the Royal Navy (1941–45) prompted *The Middle of a War* (1942) and *A Lost Season* (1944). His traditionalist attitude kept him apart from the neo-Romantic revival initiated by DYLAN THOMAS after the war, but his *Brutus's Orchard* (1957) and *Collected Poems* (1962) established him as a major poet. His later poetic works include *Buff* (1965), *Song Cycle from a Record Sleeve* (1972), *Retreads* (1979) and *Available for Dreams* (1989), and his novels include *Second Curtain* (1953), *The Ruined Boys* (1959), *The Carnal Island* (1970) and *Stares* (1990). He was professor of poetry at Oxford (1968–73), and collected his lectures in *Owl and Artificers* (1971). He also published the autobiographical *Souvenirs* (1980), *Vamp Till Ready* (1982), *The Strange and the Good* (1989) and *Spanner and Pen* (1991). 🕮 A E Austin, *Roy Fuller* (1979)

Fuller, Thomas 1608–61
English clergyman and writer
Born in Aldwinkle St Peter's, Northamptonshire, he studied at Sidney Sussex College, Cambridge, and became prebendary of Salisbury in 1631 and rector of Broadwindsor, Dorset, in 1634. His first ambitious work, *The History of the Holy War* (1639), was about the Crusades. Just before the outbreak of the Civil War he was appointed preacher to the Chapel Royal at the Savoy in London, and during the war he was chaplain to the Royalist commander, Ralph Hopton (1598–1652). He compiled a collection of miscellanies in *The Holy State and The Profane State* (1642), and wrote tracts for the troops, *Good Thoughts in Bad Times* (1645), *Good Thoughts in Worse Times* (1647) and *The Cause and Cure of a Troubled Conscience* (1647), and a satire directed at OLIVER CROMWELL called *Andronicus, or the Unfortunate Politician* (1646). In 1649 he was given the curacy of Waltham Abbey, and in 1655 he brought out his long-projected *Church History of Britain*, to which was appended his *History of Cambridge University*. With the Restoration he published *Mixt Contemplations in Better Times* (1660) and was appointed chaplain-extraordinary to CHARLES II. He did not live to complete his most famous work, *History of the Worthies of Britain*, an encyclopaedic miscellany about the counties of Great Britain and their notable men. It was published the year after his death.

Fulton, Rikki 1924–2004
Scottish actor and comedian
Born in Glasgow, he began his broadcasting career there in drama, features, children's and religious programmes for the BBC. He also appeared at several Scottish repertory theatres and from 1951 to 1955 presented various weekly programmes. He starred in the *Five past Eight* variety shows in Edinburgh and Glasgow, and from the 1950s regularly appeared in pantomime in both cities, recognized as one of the great pantomime dames. He also had a stage double-act with Jack Milroy (1915–2001) in which they appeared as the teddy boys Francie and Josie. On television, he appeared in his own comedy sketch series, *Scotch and Wry*, *Rab C Nesbitt's Seasonal Greet* (1988) and played MacPhail in *The Tales of Para Handy* (1994–95). He also acted in the film *The Girl in the Picture* (1985). In 1985 he adapted and starred in *A Wee Touch of Class*, a successful transposition of MOLIÈRE's *Le Bourgeois Gentilhomme* from 17th-century France to 19th-century Edinburgh. 🕮 *Is It That Time Already?* (1999)

Fulton, Robert 1765–1815
US engineer
Born in Lancaster County, Pennsylvania, of Irish parents, he painted miniature portraits and landscapes in Philadelphia from 1782, and in 1786 went to London to study under the painter BENJAMIN WEST. However, he began to apply his energies wholly to mechanical engineering, and in 1794 patented a double-inclined plane to supersede canal locks, and invented a mill for sawing and polishing marble. In 1797 he went to Paris, where he developed a submarine torpedo boat, and made two experiments on the Seine with small steamboats (1803). He returned to the USA, to New York, in 1806, and the next year launched on the Hudson River a steam vessel, the *Clermont*, which accomplished a voyage of nearly 150 miles (241.4km) to Albany in 32 hours. Although he was not the first person to apply steam to inland navigation, he was the first to do so successfully. He was employed by the US government on canals and other works, and in constructing (1814) the world's first

steam warship, *Fulton the First*. 🕮 H W Dickinson, *Robert Fulton, Engineer and Artist* (1913)

Fung Yu-lan *See* FENG YOULAN

Funk, Casimir 1884–1967
US biochemist
Born in Warsaw, Poland, he studied in Berlin and Bern, and worked as a research assistant at the Lister Institute, London (1910–13), where he attempted to isolate vitamin B_1, a cure for the dietary disease beri-beri. He suggested the general name 'vitamine', later altered to 'vitamin'. Funk became head of the biochemical department at the Cancer Hospital Research Institute (1913–15), emigrated to the USA in 1915, and later headed research institutes in Warsaw (1923–27) and Paris (1928–39). He achieved a crude extract of the male sex hormone androsterone from human urine in 1929.

Funk, Walther 1890–1960
German Nazi politician
One of HITLER's chief advisers, he succeeded HJALMAR SCHACHT as minister of economics and president of the Reichsbank, and played a leading part in planning the economic aspects of the attack on Russia, and in the exploitation of occupied territories. Captured in 1945, he was sentenced to life imprisonment as a war criminal, but was released in 1957 on account of illness.

Furchgott, Robert F(rancis) 1916–
US pharmacologist and Nobel Prize winner
Born in Charleston, South Carolina, he was educated at the University of North Carolina and at the Northwestern University before joining the staff of Cornell University (1940). He moved to the medical school at Washington University in 1949, becoming an associate professor there in 1952. In 1956 he became chairman and professor at the department of pharmacology of what became the SUNY Health Science Center at Brooklyn, where he continued his studies on the biochemistry and pharmacology of the heart and blood vessels. Having conducted pioneering research into cell communication and signalling, he shared the 1998 Nobel Prize in physiology or medicine with LOUIS J IGNARRO and FERID MURAD for their discovery that nitric oxide operates as a signal in the cardiovascular system. This had an important impact on the treatment of heart disease, and also led to the development of the drug Viagra.

Furetière, Antoine 1619–88
French scholar and lexicographer
The Abbé of Chalivoy and a writer of comic verse and fables, he compiled a massive *Dictionnaire universel*, only to be expelled from the Académie, which claimed a monopoly on its collections (1674). It was eventually published in Rotterdam in 1690.

Furness, Christopher Furness, 1st Baron 1852–1912
English shipowner
Born in West Hartlepool, Teeside, he became a shipbroker in 1876 and soon afterwards established the Furness Line. He went into partnership with Edward Withy in 1885, which marked the beginning of a huge shipbuilding and engineering business. A Liberal MP, he was one of the first to initiate a co-partnership scheme among his employees. He was knighted in 1895 and created baron in 1910. He was succeeded by his son, Marmaduke (1883–1940), who was created a viscount in 1918.

Furness, Horace Howard 1833–1912
US Shakespearean scholar
Born in Philadelphia, he became a lawyer by profession. He devoted his life to his *Variorum* edition of SHAKESPEARE, starting with *Romeo and Juliet* in 1871. The work was later continued by his son Horace Howard II (1865–1930).

Furniss, Harry 1854–1925
Irish caricaturist
Born in Wexford, of an English father, he went to London in 1873, and worked as a caricaturist on the *Illustrated London News* (1876–84) and *Punch* (1884–94). He made the illustrations for LEWIS CARROLL's *Sylvie and Bruno* and editions of DICKENS and THACKERAY. He edited and published his own cartoon magazine, *Like Joka* (1894), and wrote *Confessions of a Caricaturist*. He also worked in the film industry with THOMAS ALVA EDISON (1912–13), acted in films, and was a pioneer of the animated cartoon film (1914).

Furnivall, Frederick James 1825–1910
English philologist
Born in Egham, the son of a doctor, he studied at London and Cambridge universities, won fame as an oarsman and racing-boat designer, and was called to the Bar. Influenced by FREDERICK DENISON MAURICE and Christian socialism, he helped to found the Working Men's College in London. It was, however, as a philologist and editor of English texts that he became famous, giving a great impulse to Early English scholarship. He founded the Early English Text Society, the CHAUCER, Ballad, New SHAKESPEARE, JOHN WYCLIFFE and SHELLEY Societies, and edited many texts, including Chaucer and the THOMAS PERCY *Ballads*, ROBERT MANNYNG's *Handlyng Synne*, WILLIAM HARRISON's *Description of England*, JOHN STUBBES's *Anatomy of Abuses*, and Hoccleve (c.1368–1426), besides writing the introduction to the 'Leopold' Shakespeare. He also edited (from 1861) the Philological Society's dictionary, which later became the *Oxford English Dictionary*.

Furphy, Joseph 1843–1912
Australian writer
Born in Yering, Yarra Valley, Victoria, of Irish immigrant parents, he described himself as 'half bushman and half bookworm'. From 1883 he worked at an iron foundry in Shepparton, Victoria, and contributed, under the name 'Tom Collins', a series of articles to the *Bulletin* magazine. He also wrote a 1,220-page manuscript, *Such is Life: Being Certain Extracts from the Diary of Tom Collins*, which was eventually published, after much revision and abridgment, in 1903. Some excised sections were published after his death as *Rigby's Romance* (1921, rev edn 1946) and *The Buln-Buln and the Brolga* (1948). His major work, it was in 'temper, democratic; bias, offensively Australian', and marked a move away from the common romantic concept of Australia's pioneering days. *The Poems of Joseph Furphy* was published posthumously in 1916. 🕮 M Franklin, *Joseph Furphy* (1944)

Furtseva, Yekaterina Alekseyevna 1910–74
Soviet politician
She had a technical education, then became a party worker and rose to be district secretary in Moscow (1942) and a member of the Central Committee (1956). A supporter of NIKITA KHRUSHCHEV, she was brought into the politburo in 1957 in the aftermath of the Anti-Party Plot (the name given by Khrushchev to the attempt made by senior opponents to oust him from his position as first secretary of the Communist Party). She was not considered a major political figure, however, and was pushed out in 1961. Nevertheless, from 1960 until her death she was minister of culture and apparently had no difficulty in insisting on ever greater conformity.

Furtwängler, (Gustav Heinrich Ernst Martin) Wilhelm 1886–1954
German conductor
Born in Berlin, he was the son of Adolf Furtwängler (1853–1907), the celebrated classical archaeologist. He succeeded ARTHUR NIKISCH in 1922 as conductor of the Gewandhaus concerts in Leipzig and of the Berlin Philharmonic. His reputation was established by international tours, though his highly subjective interpretations of the standard German repertoire aroused controversy. His apparently ambivalent attitude to the HITLER regime caused him some unpopularity outside Germany, but after World War II he quickly re-established himself.

Fuseli, Henry, *originally* **Johann Heinrich Füssli** 1741–1825
British painter and art critic
Born in Zurich, Switzerland, he studied theology at the Collegium Carolinum there. He settled in England in 1764, and was encouraged by Sir JOSHUA REYNOLDS to go to Italy (1770–78). He became professor of painting at the Royal Academy, and keeper in 1804. His 200 paintings include *The Nightmare* (1781) and two series to illustrate SHAKESPEARE's and MILTON's works, for which he is chiefly known. An edition of his literary works, with a biography, was published by Knowles (1831).

Fust, Johann c.1400–1466
German printer and goldsmith
He was born in Mainz. In 1450 and 1452 he made loans to the printer JOHANNES GUTENBERG to help complete the printing of his Bible. When the loans were not repaid he sued for the debt, receiving, in lieu of payment, Gutenberg's printing plant, with which he started his own business, taking PETER SCHÖFFER, his son-in-law, as partner. They published the Gutenberg Bible in 1465.

Futabatei Shimei 1864–1909
Japanese novelist
Born in Edo (Tokyo), he was the first writer of Japanese fiction to attempt to make the written word as intelligible as the spoken, in contrast to his predecessors, who wrote in a form of

literary Japanese far removed from everyday speech. *Ukigumo* (1887, 'Drifting Clouds') broke new ground in being written in the vernacular. He was also the first translator into Japanese of the works of NIKOLAI GOGOL and IVAN TURGENEV, again employing vernacular language. 🕮 M G Ryan, *Japan's First Modern Novel* (1967)

Fyfe, Sir David Patrick Maxwell *See* KILMUIR, 1ST EARL OF

Fyffe, Will(iam) 1885–1947
Scottish comedian, singer and actor
Born in Dundee, he made his stage debut as a child, playing 'Little Willie' in his father's repertory version of *East Lynne*, and by the age of 15 was playing Polonius in *Hamlet*. He wrote several character sketches for HARRY LAUDER, but when they were rejected decided to perform them himself. Making his London debut at the Middlesex Theatre in 1916, by 1921 he was topping the bill at the Palladium. He appeared in the Royal Variety Performance (1922), the first of four, and made his film debut in *Elstree Calling* (1930), in which he sang his popular serenade to Scotch, 'Twelve and a Tanner a Bottle'. His character studies included a ship's engineer 'Sailing Up the Clyde', and his most popular song was 'I Belong to Glasgow'. He was King Rat of the Water Rats for six years, and acted engagingly in over 20 films, both British and American, such as *Annie Laurie* (1936), *Owd Bob* (1937), *Rulers of the Sea* (1939) and *They Came By Night* (1940).

Fysh, Sir (Wilmot) Hudson 1895–1974
Australian civil aviation pioneer
Born in Launceston, Tasmania, he was educated at Launceston Grammar and Geelong Grammar schools. He served with the Australian Imperial Forces at Gallipoli in World War I and later, having transferred to the Australian Flying Corps, was awarded the Distinguished Flying Cross. He surveyed a route between Darwin and Longreach, Queensland, for the 1919 Britain–Australia air race, and in the following year, with the backing of local pastoralists, he established the Queensland and Northern Territory Aerial Services Limited, now known as QANTAS. In 1931 he was involved in the pioneering Australia–England airmail flights, which led to the formation of Qantas Empire Airways as a joint venture with Imperial Airways of the UK. In 1947 Qantas was acquired by the Australian government. Fysh became managing director, was knighted in 1953, and retired as chairman in 1966. He was a notable aviation historian, and wrote books on the subject.

G

Gabain, Ethel Leontine 1883–1950
English artist and printmaker
Born in Le Havre, France, she studied at the Slade School of Art and the Central School of Arts and Crafts in London, and in Paris. She became known for her many female portraits, such as FLORA ROBSON in the role of Lady Audley, purchased by Manchester City Art Gallery, which won the De Laszlo Silver Medal in 1933. In 1940 she was appointed an official war artist, painting the departing evacuees before turning to the depiction of women in traditionally male occupations. A remarkable draughtsperson, she was elected to membership of both the Royal Society of British Artists and the Royal Institute of Oil Painters.

Gabelsberger, Franz Xaver 1789–1848
German bureaucrat
Born in Munich, in 1809 he entered the Bavarian civil service. He was the inventor of the chief German system of shorthand.

Gabin, Jean, *originally* **Jean Alexis Moncorgé** 1904–76
French actor
Born in Paris into a show-business family, he worked in the Folies-Bergère and the Moulin Rouge, before making his film debut in *Chacun sa chance* (1930). In subsequent films, such as *La Grande illusion* (1937, *Grand Illusion*) and *Le Jour se lève* (1939, *Daybreak*), his world-weary anti-heroes seem to embody the pessimistic spirit of pre-war France. He escaped to the USA during World War II, later joining the Free French navy. Returning to France, he continued to dominate the French film scene until his death. Later films include *Touchez pas au grisbi* (1954, *Grisbi*) and *Le Chat* (1971, *The Cat*).

Gable, Christopher 1940–98
English dancer
Born in London, he studied at the Royal Ballet School there, and was soon dancing solo roles as a principal and partner to LYNN SEYMOUR. He retired as a dancer in 1967, having created roles in KENNETH MACMILLAN's *Images of Love* (1964) and FREDERICK ASHTON's *The Two Pigeons* (1961). He was chosen to play the lead in Macmillan's new *Romeo and Juliet* with Seymour, but they were replaced in the première at the last minute by RUDOLF NUREYEV and MARGOT FONTEYN. He was the founder and artistic director (1982–98) of the Central School of Ballet, and in 1987 became director of the Northern Ballet Theatre. His innovative approach was evident in his staging of *Swan Lake* in 1992, which was set during a coup in 1870s Russia and ended in massacre. As an actor he had roles in films such as KEN RUSSELL's *The Boy Friend* (1972). In 1987 he danced again, in *A Simple Man*, based on the life of the artist L S LOWRY.

Gable, (William) Clark 1901–60
US film actor
He was born in Cadiz, Ohio, and his early stage experience was intermingled with casual labour and work as an extra in silent films. A concentrated assault on Hollywood stardom resulted in a role in *The Painted Desert* and eleven other film appearances in 1931. He won an Academy Award for *It Happened One Night* (1934), and was voted 'King of Hollywood' in 1937. His sympathetic, ruggedly masculine and humorous persona made him the perfect Rhett Butler in *Gone with the Wind* (1939). He returned to the cinema after World War II army service and remained in demand as a sparring partner in films like *Mogambo* (1953) and *Teacher's Pet* (1958), and as an ageing cowboy in his last film, *The Misfits* (1961). Married five times, his third wife was the actress CAROLE LOMBARD. 🕮 Warren G Harris, *Clark Gable: A Biography* (2003)

Gabo, Naum, *originally* **Naum Neemia Pevsner** 1890–1977
US constructivist sculptor
Born in Bryansk, Russia, he first studied medicine and engineering, then art in Munich (1911–12). With his brother, ANTOINE PEVSNER, and VLADIMIR TATLIN and KASIMIR MALEVICH, he was associated with the Moscow Suprematist Group (1913), and in 1920 he broke away with his brother and Tatlin to form the group of Russian Constructivists, who have had considerable influence on 20th-century architecture and design. In 1920 they published their *Realistic Manifesto*. As their theories did not coincide with those of official Russian art circles, he was forced into exile, and lived in Berlin (1923–33), Paris (1933–35) and England (1936–45), before going to the USA in 1946. He was naturalized in 1952. There are several examples of his completely non-figurative geometrical 'constructions in space', mainly made in transparent plastics, in the Museum of Modern Art, New York.

Gabor, Dennis 1900–79
British physicist and Nobel Prize winner
Born in Budapest, he received a doctorate in engineering in Berlin (1927), and worked there as a research engineer, but left Germany in 1933. After spending some years with the British Thompson Houston Company in Rugby – during which time he wrote the first book on the electron microscope – he was appointed to a readership at Imperial College, London (1948), and later became professor of applied electron physics (1958–67). He is best remembered for conceiving in 1947 the technique of (and the name) holography, a method of photographically recording and reproducing three-dimensional images, for which he was awarded the 1971 Nobel Prize in physics. In the late 1960s he developed an acute interest in the socio-political and environmental questions raised by the Club of Rome, and visited many countries to lecture on economic expansionism and the limitations imposed by the Earth's finite resources.

Gaboriau, Émile 1835–73
French writer
Born in Saujon in Charente-Inférieure, he had already contributed to some of the smaller Parisian papers when he leapt to fame with his crime novel *L'Affaire Lerouge* (1866, 'The Lerouge Affair'), featuring his detective Lecoq. It was followed by *Le Dossier 113* (1867), *Monsieur Lecoq* (1869), *Les Esclaves de Paris* (1869, 'Slaves of Paris'), *La Corde au cou* (1873, 'Rope around the Neck'), and several others.

Gabriel, Jacques Ange 1698–1782
French architect
Born in Paris, he was a court architect to LOUIS XV. He planned a number of additions to Versailles and other palaces, and designed the Petit Trianon (1768). He also laid out the Place de la Concorde (1753).

Gabriel, Peter Brian 1950–
English rock singer and songwriter
Born in Woking, Surrey, he co-founded the rock band Genesis in 1966, recording such albums as *Selling England by the Pound* (1973) and *The Lamb Lies Down on Broadway* (1974) and earning a reputation as an elaborately theatrical frontman. He left Genesis in 1975 and released four untitled solo albums, from which came such hit singles as 'Solsbury Hill' (1977), 'Biko' (1980) and 'Shock the Monkey' (1982). *So* (1986) brought him international success, and awards for the video of the hit 'Sledgehammer'. He is known for performing innovative multi-media live shows, such as *Secret World Live* (1994) and *Ovo*, the centrepiece of London's Millennium Dome in 2000. A leading proponent of world music, in 1982 he established the WOMAD (World of Music, Arts and Dance) concerts, and his Real World record label issues recordings featuring artists from many countries. 🕮 Dave Thompson, *Turn It On Again: Peter Gabriel, Phil Collins and Genesis* (2004)

Gabrieli, Andrea c.1533–1586
Italian composer
Born in Venice, he studied under ADRIAN WILLAERT, and was later appointed organist of St Mark's Church. He wrote masses and other choral works, and his organ pieces include toccatas and ricercare, the latter foreshadowing the fugue.

Gabrieli, Giovanni c.1555–1612
Italian composer
Born in Venice, he composed choral and instrumental works in which he exploited the acoustics of St Mark's in Venice with unusual antiphonal and echo effects, using double choirs,

double ensembles of wind instruments and other devices. He published much of the music of his uncle, ANDREA GABRIELI, and became a renowned teacher.

Gadamer, Hans-Georg 1900–2002
German philosopher
He was born in Marburg, Hesse, and was a pupil of MARTIN HEIDEGGER, before becoming rector at Leipzig and professor at Frankfurt am Main (1947) and Heidelberg (1949–68, then emeritus). His major work is *Wahrheit und Methode* (1960, Eng trans *Truth and Method*, 1975), and he is known particularly for his theory of hermeneutics, which has been useful both in philosophy and in related subjects in explaining the nature of understanding and interpretation.

Gaddafi or **Qaddafi, Muammar (Muhammad al-)** 1942–
Libyan soldier and political leader
Born into a nomadic family, he abandoned university studies to attend a military academy in 1963. He formed the Free Officers Movement, which overthrew the regime of King Idris in 1969. He then became chairman of the Revolutionary Command Council, promoted himself to colonel (the highest rank in the revolutionary army) and took over as the commander-in-chief of the Libyan armed forces. As effective head of state, he set about eradicating colonialism by expelling foreigners and closing down British and US bases. He also encouraged a religious revival and a return to the fundamental principles of Islam. A somewhat unpredictable figure, he has been president of Libya since 1977 and has openly supported violent revolutionaries in other parts of the world while following a unique blend of democratic and autocratic government at home, ruthlessly pursuing Libyan dissidents both at home and abroad. He has waged a war in Chad, and in 1988 saw his territory bombed by the USA. He declared his unqualified support of Iraq's invasion of Kuwait in 1990, and found himself increasingly isolated after the UN's announcement of sanctions in relation to Libya's involvement in the 1988 Lockerbie bombing. The sanctions lasted from 1992 to 1999, when a deal was brokered by NELSON MANDELA. More recently, Gaddafi has attempted to improve his image in the West, notably by allowing UN weapons inspectors into Libya. This pragmatism was rewarded in 2006 with the restoration of full diplomatic relations between Libya and the USA. 🕮 David Blundy, *Qaddafi: A Biography* (1987)

Gaddi, Agnolo c.1333–1396
Florentine painter and architect
The son of TADDEO GADDI, he painted the frescoes of the *Discovery of the Cross* in S Croce, Florence, and of the *Legends of the Holy Girdle* in the cathedral at Prato. His work shows the influence of GIOTTO.

Gaddi, Gaddo c.1260–1332
Italian painter
The founder of the Gaddi family, he worked in mosaic in Rome and Florence.

Gaddi, Taddeo c.1300–1366
Italian painter
The son of GADDO GADDI, he was GIOTTO's best pupil and also his godson. His finest work is seen in the frescoes of the *Life of the Virgin* in the Baroncelli Chapel of S Croce, Florence. Though he was the best known of Giotto's followers, he deviated from the style of his master, whom he did not match in figure painting, but excelled in architectural perspective.

Gaddis, William 1922–98
US novelist
Born in New York City, and educated at Harvard, he worked for *The New Yorker* (1946–47), and lived and travelled abroad. He then freelanced as a speech and filmscript writer from 1956 until the 1970s. He wrote four novels: *The Recognitions* (1955), a densely allusive post-Christian epic about art, forgery, money and magic, followed by *JR* (1976), about an eleven-year-old 'ragged capitalist' operating from pay phones, *Carpenter's Gothic* (1985), in which a Vietnam War veteran works as a media consultant for a fundamentalist preacher, and *A Frolic of His Own* (1994), a story of litigiousness and greed in US society. An ambitious satirist, he was one of the USA's most prominent contemporary novelists. He won the National Book award in 1976 and 1994. 🕮 Harold Bloom, *William Gaddis (Modern Critical Views)* (2004)

Gade, Niels Wilhelm 1817–90
Danish composer
Born in Copenhagen, he studied at Leipzig and became a friend of SCHUMANN and MENDELSSOHN, from whom he took over the Gewandhaus Orchestra in 1847. He composed eight symphonies, a violin concerto, several choral works and smaller pieces. The Scandinavian element in his music distinguishes him from the Leipzig school.

Gades, Antonio 1936–2004
Spanish dancer, choreographer and teacher
Born in Alicante, he made his debut in cabaret as a teenager, then joined Pilar Lopez's company for nine years. In the early 1960s he worked mainly in Italy, collaborating with ANTON DOLIN and staging dances at La Scala, Milan. The company he formed for the New York World's Fair of 1964 has since toured the world. He appeared in various films, the most acclaimed being the flamenco trilogy directed by Carlos Saura: *Blood Wedding* (1981), *Carmen* (1983) and *El Amor Brujo* (1986).

Gadolin, Johan 1760–1852
Finnish chemist
Born in Turku, he studied in Uppsala, Sweden, becoming professor of chemistry there from 1797 to 1822. Travels on the Continent put him in touch with some of the leading scientists of the day, and he soon accepted ANTOINE LAVOISIER's discoveries about combustion and his system of chemical nomenclature. He is remembered for his investigations of the rare-earth elements, analysing a new black mineral from Ytterby, Sweden, and isolating from it a rare-earth mineral, yttria, in 1794. This was an important step towards identifying the remaining undiscovered elements. Over the next century yttria was found to contain the oxides of nine new rare-earth elements, leading eventually to the establishment of the whole series. Around 30 years after Gadolin's death, one of these was discovered by Jean Charles Galissard de Marignac and PAUL EMILE LECOQ DE BOISBAUDRAN, who named it gadolinium in his honour.

Gadsden, Christopher 1724–1805
American Revolutionary leader
Born in Charleston, South Carolina, he was a member of the first Continental Congress (1774), became a brigadier-general in the Continental army during the Revolution, and was lieutenant-governor of South Carolina.

Gadsden, James 1788–1858
US soldier and diplomat
Born in Charleston, South Carolina, he served in the War of 1812 and against the Seminoles. He spent a decade as a railroad company executive and was a continuing advocate of a transcontinental railroad along a southern route. In 1853 he was appointed minister to Mexico, and negotiated the purchase (the 'Gadsden Purchase') of part of Arizona and New Mexico for railway construction.

Gaetano *See* CAJETAN

Gaffky, Georg Theodor August 1850–1918
German bacteriologist
Born in Hanover, he was educated at the University of Berlin, where he graduated in medicine. He served as ROBERT KOCH's assistant from 1880 to 1885, and after holding the chair of hygiene at the University of Giessen (1888–1904), he became director of the institute which was renamed the Koch Institute in 1912. He isolated and obtained a pure culture of the typhoid bacillus for the first time (1884), and during trips to Egypt and India (1883–84), he and Koch discovered the *Vibrio* responsible for cholera. He made a further visit to Egypt in 1897 to work on the bubonic plague.

Gagarin, Yuri Alekseyevich 1934–68
Soviet cosmonaut
Born near Gzhatsk, he joined the Soviet air force in 1957, and in 1961 became the first man to travel in space, completing a circuit of the Earth in the *Vostok* spaceship satellite. Nominated a Hero of the Soviet Union, he shared the Galabert Astronautical prize with JOHN GLENN in 1963. He was killed in a plane accident while training. 🕮 Piers Bizony and Jamie Doran, *Starman: The Truth behind the Legend of Yuri Gagarin* (1998)

Gage, Matilda Joslyn, *née* **Joslyn** 1826–98
US feminist and women's rights activist
Born in Cicero, New York, she developed a radical feminist perspective and incisive analysis of the nature of patriarchal society, working with the more conservative reformers SUSAN B ANTHONY and ELIZABETH CADY STANTON to launch the first wave of the American suffrage movement. With them, she later compiled the four-volume *History of Woman Suffrage* (1881–1906). She joined the National Woman Suffrage Association (NWSA) in 1869 and became president of both the national and New York State organizations. However, she withdrew in protest at the union between NWSA and the conservative Women's Christian

Temperance Union. Believing that Church and State colluded to oppress women, she founded the Women's National Liberal Union (1890), whose aim was to separate Church and State. She expressed her ideas in her *Woman, Church and State: the Original Exposé of Male Collaboration against the Female Sex* (1893).

Gage, Thomas 1721–87
English soldier
He was born in Firle, Sussex. He became military governor of Montreal in 1760, commander-in-chief of the British forces in America (1763–72) and governor of Massachusetts (1774). In April 1775 he sent a force to seize arms from the colonists at Concord, and the next day the skirmish at Lexington took place which began the American Revolution. After the Battle of Bunker Hill (June 1775) he was relieved by WILLIAM HOWE.

Gahn, Johan Gottlieb 1745–1818
Swedish chemist and mineralogist
Born in Voxna, Gävleborg, he studied at Uppsala, and after some years as a laboratory assistant there he was sent by the College of Mining to the famous copper mine at Falun. Here he so improved smelting methods and the use of by-products that industrialists and scholars flocked to learn from him. He isolated metallic manganese, developing a way to prepare it on a larger scale. He also discovered selenium, and in conjunction with CARL WILHELM SCHEELE found phosphoric acid in bones. The mineral gahnite (zinc aluminium oxide) is named after him.

Gainsborough, Thomas 1727–88
English landscape and portrait painter
Born in Sudbury, Suffolk, he copied Dutch landscapes in his youth and at the age of 14 was sent to London, where he learned the art of Rococo decoration under Hubert Gravelot and FRANCIS HAYMAN. *The Charterhouse* (1748) marks the end of his apprenticeship. He settled as a portrait painter at Ipswich in 1745. *Mr and Mrs Andrews* (1748) and several 'chimney-piece' paintings belong to this time, his Suffolk period. In 1760 he moved to Bath, where he established himself with his portrait of *Earl Nugent* (1760). His portraits combine the elegance of VAN DYCK with his own characteristic informality, although in his later work he increasingly tends towards fashionable artificialities. Among his early masterpieces are *Lord and Lady Howe*, *Mrs Portman* (Tate, London) and *Blue Boy* (Huntington Collection, Pasadena), and the great landscapes *The Harvest Wagon* (1767, Barber Institute, Birmingham) and *The Watering Place* (1777, Tate), in which RUBENS's influence is discernible. He became a foundation member of the Royal Academy in 1768, and exhibited there annually until, somewhat discontented with the place assigned to *The King's Daughters* in 1784, he retired. He moved to London in 1774. To this last period belong the character study *Mr Truman*, the luxuriant *Mrs Graham* (1777, Edinburgh), *George III* and *Queen Charlotte* (1781, Windsor Castle) and *Mrs Siddons* (1785). Landscapes include *Cottage Door* (1780, Pasadena), *The Morning Walk* (1780), which is closer to his 'fancy pieces' based on BARTOLOMÉ MURILLO's paintings than to nature, and *Cattle Crossing a Bridge* (1781), the most Rococo of all his work. 🕮 Isabelle Worman, *Thomas Gainsborough: A Biography* (1987)

Gairy, Sir Eric Matthew 1922–97
Grenadian politician
In 1950 he founded the country's first political party, the left-of-centre Grenada United Labour Party (GULP) and was soon a dominant figure in Caribbean politics. He held the posts of chief minister in the Federation of the West Indies (1957–62), premier of Grenada (1967–74) and, at independence in 1974, prime minister. He was ousted by the left-wing leader MAURICE BISHOP in 1979.

Gaiseric or **Genseric** c.390–477 AD
King of the Vandals and Alans
The son of the Vandal leader Godigisel, he succeeded his half-brother Gunderic in AD 427. Invited by Bonifacius, the Roman governor of Africa, Gaiseric entered Numidia (AD 429), captured and sacked Hippo (AD 430), and seized Carthage (AD 439). He established a formidable maritime power, ranging as far as the Peloponnese. An Arian, he ferociously persecuted Catholics. Eudoxia, the widow of VALENTINIAN III, invited Gaiseric to Rome to destroy her husband's murderer Maximus. Gaiseric's fleet took and sacked the city (AD 455), and one of Eudoxia's daughters married his son and successor, Huneric. Fleets sent against the Vandals (AD 457, 468) were defeated.

Gaisford, Thomas 1780–1855
English Greek scholar
He became Regius Professor of Greek at Oxford in 1812 and in 1831 was made dean of Christ Church. He produced editions of HERODOTUS, Hephaestion, JOHANNES STOBAEUS and Suidas. The Gaisford prizes were founded in his memory.

Gaitskell, Hugh Todd Naylor 1906–63
English Labour politician
Born in London, he was educated at Winchester and at New College, Oxford, becoming a socialist during the 1926 general strike. On leaving Oxford he became a Workers' Educational Association lecturer in economics in the Nottinghamshire coalfield. In 1938 he became reader in political economy at the University of London. Elected MP for Leeds South in 1945, he became parliamentary secretary to the Ministry of Fuel and Power in 1946 and minister in 1947. Appointed minister of state for economic affairs in 1950, he became (1950–51) the youngest Chancellor of the Exchequer since ARTHUR BALFOUR. His introduction of National Health Service charges led to the resignation of ANEURIN BEVAN as minister of health and to a long feud with Bevan and the hostile left wing of the Labour Party. However, his ascendancy in the party grew steadily and in 1955 he was elected leader of the opposition by a large majority over Bevan, succeeding CLEMENT ATTLEE. He bitterly opposed ANTHONY EDEN's Suez action (1956), attempted to modify Labour policy from total nationalization to the development of a shareholder state, and refused to accept a narrow conference vote for unilateral disarmament (1960). This caused a crisis of leadership, in which he retained the loyalty of most Labour MPs. Gaitskell was also a keen European, and in his final years in office strongly supported Great Britain's entry into the EEC. He wrote *Money and Everyday Life* (1939). 🕮 Brian Brivati, *Hugh Gaitskell: A Biography* (1996)

Gaius fl.130–180 AD
Roman jurist
His *Institutes* formed the basis for those of JUSTINIAN and are the only substantial texts of classical Roman law that have survived. His other works were largely used in the compilation of the *Digest*. The *Institutes*, lost until Barthold Niebuhr (1776–1861) discovered a manuscript at Verona in 1816, have been repeatedly edited, and a fragment of an older manuscript was printed in *Oxyrhynchus Papyri* (vol 17, 1928).

Gaj, Ljudevit 1809–72
Croatian nationalist
Inspired in his youth by the romantic nationalism of writers such as JAN KOLLÁR and Pavel Šafařík (1795–1861), he believed in the common nationality of the South Slavs (whom he referred to as Illyrians), which led him to formulate a standard South Slav literary language and found a Croatian newspaper. He became increasingly involved in opposition to Hungarian and German political and cultural influence in Croatia, founding the Illyrian National Party (1841), which espoused the ideas of the Illyrian Movement and championed Croatian state-right. Ever hopeful for the support of Vienna against the Hungarian nationalists, he concluded a pact with the Hungarian conservatives in a move designed to gain the confidence of Prince CLEMENS METTERNICH (1845). Under the government of Count Josip Jelačić (1801–59) Gaj led a delegation to Vienna in 1848 and presented the emperor with the Croats' requests for the reorganization of the HABSBURG monarchy as a federation. Later that year, he was elected to the Croatian *sabor* (parliament) but shortly afterwards he was forced to leave political life after his apparent involvement in a financial scandal with the Serbian prince Miloš Obrenović.

Gajdusek, Daniel Carleton 1923–
US virologist, paediatrician and Nobel Prize winner
Born in Yonkers, New York, he studied physics at Rochester and medicine at Harvard. He spent much time in Papua New Guinea, studying the origin and dissemination of infectious diseases amongst the Fore people, especially a slowly developing lethal viral disease called kuru, which he showed was spread by cannibalism. He identified the causative agent as a 'slow virus', now implicated in many other diseases, which may take years to induce symptoms. He shared the 1976 Nobel Prize in physiology or medicine with BARUCH BLUMBERG for his work on slow-virus infections, which cause such diseases as Creutzfeldt–Jakob disease. He was head of virological and neurological research at the US National Institutes for Health from 1958 to 1997, when a conviction for child molestation clouded his medical reputation.

Gál, Hans 1890–1987
Austrian composer and writer on music
Born in Brunn, near Vienna, he studied at Vienna University, and subsequently taught there (1919–29) and in Mainz (1933). He returned as a conductor to Vienna, but the Anschluss

drove him out and, at DONALD TOVEY's suggestion, he settled in Edinburgh, where he became a university lecturer (1945), remaining in Scotland for the rest of his life. A writer and lecturer of perception and wit, he was a composer of exquisite craftsmanship, whose musical style remained that of late Romanticism. He wrote five operas, four symphonies, other orchestral music, part songs, four string quartets, and many other chamber and piano works.

Galawdewos d.1559
Emperor of Ethiopia
Emperor from 1540, with Portuguese aid he defeated the Muslims who, under AHMAD IBN IBRAHIM AL-GHAZI, had dominated Ethiopia in the early years of the century. He strengthened the monarchy and reformed the cultural and religious institutions of the empire. Towards the end of his reign he was preoccupied with the migration of Galla tribesmen but, despite having various successes in battle (1554–55), was unable permanently to check their advance.

Galba, Servius Sulpicius 3 BC–AD 69
Roman emperor
He became consul (AD 33), and administered Aquitania, Germany, Africa and Hispania Tarraconensis with competence and integrity. In AD 68 the Gallic legions rose against NERO, and proclaimed Galba emperor. However, he soon made himself unpopular by favouritism, ill-timed severity and avarice, and was assassinated by the praetorians in Rome.

Galbraith, John Kenneth 1908–2006
US economist
Born in Ontario, Canada, and educated at the universities of Toronto, California and Cambridge, he emigrated to the USA in 1931. In 1939 he became assistant professor of economics at Princeton University and held various administrative posts before becoming Paul M Warburg Professor of Economics at Harvard from 1949 to 1975. He was US ambassador to India (1961–63). A Keynesian economist, he advocated government spending to stimulate the economy, and he criticized the US mania for consumer goods, arguing that a greater portion of wealth should be spent on infrastructure, education and other improvements shared by the public. His written works include *American Capitalism: The Concept of Countervailing Power* (1952), *The Great Crash* (1955), *The Affluent Society* (1958), *The Liberal Hour* (1960), *The New Industrial State* (1967), *The Age of Uncertainty* (1977), which was made into a BBC television series, *The Anatomy of Power* (1983), *The Culture of Contentment* (1992) and *The Good Society* (1996). He also wrote his autobiography, *A Life in Our Times* (1981). He was awarded the Presidential Medal of Freedom twice, in 1946 and 2000. 🕮 Richard Parker, *John Kenneth Galbraith: His Life, His Politics, His Economics* (2005)

Galdós *See* PÉREZ GALDÓS

Gale, Zona 1874–1938
US novelist, story writer and dramatist
Born in Portage, Wisconsin, she began writing sentimental romances, as in her first novel, *Romance Island* (1906). She was scorned and disliked for her increasing pacifism and feminism, but gained some recognition for her novel *Birth* (1918), which was dramatized in 1924 as *Mr Pitt*. However, she found fame with her novel *Miss Lulu Bett* (1920), and her dramatization of it won her a Pulitzer Prize (1921). She later turned to the mysticism of GEORGEI GURDJIEFF, which strengthened her work, as in the autobiographical *Portage, Wisconsin* (1928), the story collection *Yellow Gentians and Blue* (1927) and the novel *Papa le Fleur* (1933). She became an avid supporter of ROBERT LA FOLLETTE's Progressive Party. The title of the biography of her by her fellow Wisconsin author August Derleth (1909–71) is singularly appropriate: *Still, Small Voice* (1940).

Galen, *properly* **Claudius Galenus** c.130–c.201 AD
Greek physician
Born in Pergamum in Mysia, Asia Minor, he studied medicine there and at Smyrna, Corinth and Alexandria. He was chief physician to the gladiators in Pergamum from AD 157, then moved to Rome and became friend and physician to the emperor MARCUS AURELIUS. He was also physician to emperors LUCIUS AURELIUS COMMODUS and LUCIUS SEPTIMIUS SEVERUS. He was a voluminous writer on medical and philosophical subjects, and collated all the medical knowledge of his time, especially promoting the work of HIPPOCRATES. An active experimentalist and dissector of animals, he elaborated a physiological system whereby the body's three principal organs – heart, liver and brain – were central to living processes, and he was the first to use the pulse as a diagnostic aid. Although not a Christian, he was a monotheist and thus his work was easily assimilated into Christian orthodoxy in the centuries after his death. His *De usu partium* ('The Uses of the Parts') was in essence a hymn to the creator, whereby the organs of the body were seen as perfectly adapted to the functions which they served. He was long venerated as the standard authority on medical matters. 🕮 G Sarton, *Galen of Pergamon* (1954)

Galerius, *properly* **Galus Galerius Valerius Maximianus**
d.311 AD
Roman emperor
Born near Serdica, Dacia, he rose to a high rank in the army. He was made Caesar by DIOCLETIAN (AD 293), and on Diocletian's abdication (AD 305) became, with CONSTANTIUS CHLORUS, joint ruler of the Roman Empire, Galerius taking the eastern half. When Constantius died in York (AD 306) the troops in Britain and Gaul transferred their allegiance to his son, CONSTANTINE I, THE GREAT, but Galerius retained the east until his death. Christian tradition presented him as a persecutor of their faith, though in his last year he granted full toleration throughout the empire.

Galgacus *See* CALGACUS

Galileo *See panel p593*

Galindo, Beatriz, *also known as* **La Latina** 1465/75–1535
Spanish humanist and scholar
She was born probably in Salamanca, and may have been educated in Italy. A famous classical scholar, she became tutor to Queen ISABELLA OF CASTILE and her daughters, and married Francisco Ramirez, secretary to Isabella's husband FERDINAND, THE CATHOLIC. Her position of teacher at the University of Salamanca was rare for a woman of her time. She also founded schools and hospitals throughout Spain, notably the hospital in Madrid where she was buried. A commentary on ARISTOTLE and some Latin poems have been attributed to her.

Galitzin, Dimitri Augustine *See* GALLITZIN, DIMITRI AUGUSTINE

Gall, St c.550–645
Irish monk
He was one of the twelve who followed St COLUMBAN to the Continent in c.585. In 614 he fixed his cell at a point on the Steinach river in Switzerland, around which grew up a great Benedictine abbey and the town of St Gall. His feast day is 16 October.

Gall, Franz Joseph 1758–1828
German physician, founder of phrenology
Born in Tiefenbrunn, Baden, he settled in Vienna as a physician in 1785. He gradually evolved theories by which he traced talents and other qualities to the functions of particular areas of the brain and the shape of the skull. His lectures on phrenology were a popular success, but were suppressed in 1802 as being subversive of religion.

Gallacher, Willie (William) 1881–1966
Scottish Communist politician
Born in Paisley, Strathclyde, he attended Camphill School then worked as a brassfounder. Involved with the revolutionary Socialist Labour Party before 1914, he was a leader of the militant shop stewards' movement during the wartime unrest on Clydeside. Arrested and deported in 1916, he met LENIN in Moscow after the Russian Revolution, and helped found the Communist Party of Great Britain. He was MP for Fife West from 1935 to 1951, making him the longest-serving Communist MP in British history. He steadfastly advocated the Communist line, although in private he disapproved of the Nazi–Soviet pact. After losing his seat he wrote several volumes of autobiography.

Gallagher, Noel 1967– and **Liam** 1972–
English rock musicians
They grew up in Manchester, where in 1991 they formed the band Oasis (initially known as The Rain). With Noel as lead guitarist and songwriter and Liam as lead vocalist, Oasis quickly became one of the most popular British rock bands of the 1990s, topping the UK charts with such guitar-based albums as *Definitely Maybe* (1994), *(What's the Story) Morning Glory?* (1995), which produced the number one single 'Wonderwall', *Be Here Now* (1997), *Standing on the Shoulder of Giants* (2000), *Heathen Chemistry* (2002) and *Don't Believe the Truth* (2005). The band's line-up changed frequently over the years, with only the Gallaghers remaining consistent members. They have enjoyed success on both sides of the Atlantic.

Galileo, *properly* **Galileo Galilei** 1564–1642
Italian astronomer, mathematician and natural philosopher

Galileo was born in Pisa, the son of a musician. He matriculated at Pisa University (1581), where he accepted the chair of mathematics in 1589. From watching the movement of a lamp in the cathedral of Pisa, he discovered (1582) the principle of the isochronism of the pendulum (equality in time whatever the range of its swing), which indicated the value of the pendulum as a timekeeper. In his study of falling bodies, Galileo showed that, contrary to the Aristotelian belief that the rate at which a body falls is proportional to its weight, all bodies would fall at the same rate if air resistance were not present. He also showed that a body moving along an inclined plane has a constant acceleration, and demonstrated the parabolic trajectories of projectiles.

In 1592 he moved to the University of Padua, where his lectures attracted pupils from all over Europe. He made his first contribution to astronomy in 1604, when he demonstrated that a bright new star which had appeared in the constellation Ophiuchus was more distant than the planets, confirming TYCHO BRAHE's conclusion that changes take place in the celestial regions beyond the planets. In 1610 he perfected a refracting telescope, which he used in the course of many astounding astronomical revelations published in his *Sidereus Nuncius* (1610, 'Sidereal Messenger'). These included the mountains of the Moon, the multitude of stars in the Milky Way and the existence of Jupiter's four satellites. Galileo was appointed chief mathematician and philosopher by the Grand Duke of Tuscany.

On a visit to Rome in 1611 he was elected a member of the Accademia dei Lincei and fêted by the Jesuit mathematicians of the Roman College. Further discoveries included the phases of Venus, spots on the Sun's disc, the Sun's rotation and Saturn's appendages (though not then recognized as a ring system). These brilliant researches led Galileo to affirm the truth of the COPERNICAN system with the Sun at its centre, which he defended in his *Dialogue on the Two Principal Systems of the World* (1632). Its sale was prohibited by the ecclesiastical authorities; Galileo was brought before the Inquisition and under threat of torture recanted. He was finally allowed to live under house arrest in his own home at Arcetri, near Florence; there he continued his researches and completed his *Discourses on the Two New Sciences* (1638), in many respects his most valuable work, in which he discussed at length the principles of mechanics.

In 1637 he became blind, but he continued working until his death on 8 January 1642. The sentence passed on him by the Inquisition was formally retracted by Pope JOHN PAUL II on 31 October 1992.

📖 Pietro Redondi, *Galileo: Heretic* (1988); Stillman Drake, *Galileo at Work – His Scientific Biography* (1978) and *Discoveries and Opinions of Galileo* (1957); M Allan-Olney, *The Private Life of Galileo* (1970); Georgio de Santillana, *The Crime of Galileo* (1955).

> Legend relates that following his recantation Galileo remarked under his breath: 'Eppur si muove' ('But it [the Earth] does move'), but the story is probably apocryphal.

Galland, Antoine 1646–1715
French Orientalist
Born in Rollot, Picardy, he travelled in Syria and the Levant, and became professor of Arabic at the Collège de France. His translation of the *Arabian Nights* (1704–08) was the first in any Western language.

Gallant, Mavis, *née* **Young** 1922–
Canadian short-story writer and novelist
She was born in Montreal, to an English father and a German–Russian–Breton mother, and attended 17 different schools as a child, which made education 'virtually impossible'. In 1941 she began working at the *Montreal Standard* and for the National Film Board, before travelling abroad. She settled in Paris in 1950 and earned her living entirely by writing, contributing numerous stories to *The New Yorker*. Her fiction often focuses on the lives of exiles and chronicles their alienation with a mixture of satire, sympathy and cool observation. She has written two novels, *Green Water, Green Sky* (1959) and *A Fairly Good Time* (1970), many collections of short stories, including *Home Truths* (1981), *The Moslem Wife* (1994) and *Varieties of Exile* (2003), and a diary of the 1968 street troubles in Paris. *The Selected Stories of Mavis Gallant* appeared in 1996.

Gallatin, Albert 1761–1849
US financier and politician
Born in Geneva, Switzerland, he studied at the university there then went to the USA in 1780. He taught French at Harvard, and bought land in Virginia and Pennyslvania. In 1793 he was elected a senator, in 1795 a member of the House of Representatives, and from 1801 to 1813 was US Secretary of the Treasury. He played an important part in the peace negotiations with Great Britain in 1814, and signed the Treaty of Ghent. He was minister at Paris (1815–23) and at London (1826). He wrote on finance, politics and the Indian peoples. He was a cousin of Madame de STAËL.

Gallaudet, Thomas Hopkins 1787–1851
US educator
Born in Philadelphia, he studied European methods for the instruction of those unable to hear or speak and in 1817 opened the first free US school for deaf children in Hartford, Connecticut. He enlarged the school with state aid and trained teachers who started schools elsewhere in the country. His son Edward Miner Gallaudet (1837–1917) founded a school for deaf people (now Gallaudet University) in Washington, DC.

Gallé, Émile 1846–1904
French designer and glass maker
Born in Nancy, he studied botany, and this influenced much of his work, including the decoration of his father's ceramics. His own interests turned towards glass. By 1874 he was settled in Nancy, running a glass workshop, which grew to employ 300 workers, as well as managing what had been his father's pottery. His distinctive designs for glass, reflecting his experiments with materials and techniques, were generally Art Nouveau in style, as was his furniture. He exhibited work at several major exhibitions, including those in Paris in 1889 and 1900. With Victor Prouvé (1858–1943) and Louis Majorelle (1859–1926) he formed the École de Nancy in 1901.

Galle, Johann Gottfried 1812–1910
German astronomer
Born in Pabsthaus, near Wittenberg, and educated at Berlin University, he graduated in mathematics and physics in 1833. He taught for two years in a school before being invited by JOHANN ENCKE to be his assistant at the newly established Berlin Observatory. After 16 years in this post he became director of the observatory at Breslau (now Wrocław, Poland, 1851–91). He took a special interest in comets, discovered three new ones and for many years computed ephemerides of comets and minor planets for the *Astronomisches Jahrbuch*. His most dramatic discovery, made in Berlin, was of the planet Neptune, whose existence had been theoretically predicted and whose expected position had been calculated by URBAIN LEVERRIER. In 1872 he proposed the use of asteroids rather than regular planets for determinations of the solar parallax, a suggestion which bore fruit in a successful international campaign (1888–89). The method was last used during the closest approach of the minor planet Eros in 1930–31.

Gallegos, Rómulo 1884–1969
Venezuelan politician and novelist
He was born in Caracas. In his country's first democratic elections (1948) Gallegos became president, but his liberalism displeased the military and certain powerful elements in the United States, and he was deposed within a few months. He lived in exile until 1958, when he was welcomed back as an honoured hero. He published a collection of stories in 1913, and in 1920 his first novel, *El último Solar* ('The Last of the Solars'), a lively and pessimistic account of corrupt politicians, failed idealism and decadent artists. His best-known novel is *Doña Bárbara* (1929, Eng trans 1931), about a barbaric cattle rancher and her encroachments on the land of her neighbour. In 1931 he fled Venezuela for a voluntary exile of four years, until the death of the dictator Juan Vicente Goméz (1857–1935). 📖 L Dunham, *Rómulo Gallegos: vida y obra* (1957)

Gallén-Kallela, Akseli Valdemar 1865–1931
Finnish painter
Born in Pori, he studied in Helsinki and worked in Paris from 1884 to 1890, developing a naturalistic style. He was a pioneer of

the Finnish national Romantic style and chose his themes mainly from Finnish mythology, particularly his illustrations in the 1920s for the folk epic *Kalevala*.

Galliano, John, *originally* **Juan Carlos Galliano** 1961–
British fashion designer
Born in Gibraltar of a Gibraltan father and Spanish mother, he moved with his family to England when he was six years old. Trained at the Central St Martin's School of Art and Design, he graduated in 1984 and gained the five-year financial support of Peder Bertelson, a wealthy Danish oil-trader. Noted for the unusual way the fabric is cut – on the bias so that it clings to the body – his designs are inspired by a range of historical and cultural references. He was Designer of the Year in 1987, and showed in Paris in 1990, the first British designer to show in the Louvre tent. In 1992 he found new backing and set up a new workshop in Paris, and in 1995 he replaced HUBERT DE GIVENCHY as designer-in-chief at his eponymous Paris fashion house. After only one year there, however, Galliano left to become designer-in-chief at the House of DIOR in 1996. He was awarded the CBE in 2001.

Galli-Curci, Amelita 1882–1963
Italian soprano
Born in Milan, she was a prize-winning piano student at Milan Conservatorio, but was self-taught as a singer, and first appeared in opera in 1909. Her style was attractive enough to compensate for deficiencies of technique, and in 1916 she joined Chicago Opera Company. From 1919 onwards, she worked principally at the Metropolitan Opera, New York, and was first heard in Great Britain in 1924. She was forced to retire early, following a throat injury.

Galliéni, Joseph Simon 1849–1916
French soldier
He was born in St Béat, Haute Garonne. He served in the Franco-Prussian War of 1870–71, as well as in West Africa and Tonkin, and was governor of Upper Senegal from 1886 and Governor-General of Madagascar from 1897 to 1905. As minister for war, and military governor of Paris from 1914, he saw to the city's fortifications and contributed to the victory of the Marne (1914) by his foresight and planning. He was posthumously created Marshal of France in 1921.

Gallienne, Eva Le *See* LE GALLIENNE, EVA

Gallienne, Richard Le *See* LE GALLIENNE, RICHARD

Gallienus, Publius Licinius c.218–268 AD
Roman emperor
He ruled jointly with his father, VALERIAN, from AD 253 until 260. His authority was constantly challenged (for example, by Postumus in Gaul and Gothic raids into Greece), while the legions frequently proclaimed their commanders Caesars. He abandoned Valerian's persecution of Christians, and developed a formidable force of cavalry. In AD 268, while besieging one of his rivals in Milan, he was murdered by his own officers.

Gallio, Junius Annaeus fl.52 AD
Roman politician
He was proconsul of Achaia under CLAUDIUS I and brother of SENECA, the Younger. He dismissed the charge brought by the Jews against St PAUL at Corinth in AD 52.

Gallitzin or **Galitzin** or **Golitsyn, Dimitri Augustine** 1770–1841
US priest
Born in The Hague, the Netherlands, he was the son of a Russian ambassador and a Prussian-born Catholic mother. He entered the Roman Catholic Church in 1787, and emigrated to the USA in 1792. Ordained a priest in 1795, he was sent as a missionary to Cambria County, Pennsylvania, where he founded the town of Loretto (1799) and became known as 'Father Smith' and 'the Apostle of the Alleghenies'. He was vicar-general for western Pennsylvania, and wrote several tracts, including *Defence of Catholic Principles* (1816), *Letter to a Protestant Friend* (1820) and *Appeal to the Protestant Public* (1834).

Galloway, George 1954–
Scottish politician
Born in Dundee, he embraced left-wing politics as a teenager, becoming the local Labour party organizer in 1977 and Scottish chairman in 1981. In 1983, he was appointed general secretary of the charity War on Want, founded by HAROLD WILSON. Between 1987 and 2003 he held Glasgow Hillhead (later Glasgow Kelvin) for Labour, but he was expelled from the party for public criticism of British participation in the Iraq war. In 2004 he formed a new party, Respect: The Unity Coalition, with allies from the Socialist Alliance, and in 2005 he won the parliamentary seat of Bethnal Green and Bow on an anti-war platform.

Gallup, George Horace 1901–84
US public opinion pollster
Born in Jefferson, Iowa, he became professor of journalism at Drake University (1929–31) and also at Northwestern University (1931–32). He was then director of research for the Young & Rubicam advertising agency in New York (1932–47). In 1935 he founded the American Institute of Public Opinion, and evolved the Gallup polls for testing the state of public opinion, which made their name by correctly predicting the outcome of the 1936 US presidential election. He wrote *Public Opinion in a Democracy* (1939) and *Guide to Public Opinion Polls* (1944, 1948).

Gallus, Gaius Cornelius c.70–26 BC
Roman poet
Born in Forum Julii (now Fréjus) in Gaul, he lived in Rome and was a friend of VIRGIL. Appointed prefect of Egypt by AUGUSTUS, he was recalled and banished, and committed suicide. He was considered the founder of the Roman love elegy, from his four books of elegies upon his mistress 'Lycoris' (in reality the actress Cytheris). Only part of one line of his verse survives. 🕮 J P Boucler, *Gaius Cornelius Gallus* (1966)

Galois, Évariste 1811–32
French mathematician
Born in Bourg-la-Reine, he entered the École Normale Supérieure in 1829, but was expelled in 1830 due to his extreme republican sympathies. He was politically active and was imprisoned twice. His mathematical reputation rests on fewer than 100 pages of work of original genius, which include a memoir on the solubility of equations by radicals, and a mathematical testament giving the essentials of his discoveries on the theory of algebraic equations and Abelian integrals. Some of his results had been independently obtained by NIELS HENRIK ABEL, but Galois put them in a theoretical setting which proved to be very useful to later mathematicians. The brevity and obscurity of his writing delayed the understanding of his work, but it gradually came to be seen as a cornerstone of modern algebra, in which the concept of a group became of central importance.

Galsworthy, John 1867–1933
English novelist, playwright and Nobel Prize winner
Born in Coombe, Surrey, he was educated at Harrow and New College, Oxford, and was called to the Bar in 1890, but chose to travel and set up as a writer. He met JOSEPH CONRAD and they became lifelong friends. He published his first book, a collection of short stories, *From the Four Winds*, in 1897, under the pseudonym John Sinjohn. In 1906 he had a success with his first play, *The Silver Box*, and in the same year published *The Man of Property*, the first in his celebrated *Forsyte Saga* series – the others being *In Chancery* (1920) and *To Let* (1921). In these novels he describes both nostalgically and critically the life of the affluent middle class which ruled England before World War I. The second cycle of the saga, *A Modern Comedy* (1929), includes *The White Monkey* (1924), *The Silver Spoon* (1926) and *Swan Song* (1928), and examines the plight of the postwar generation, whose world has collapsed. Among his other novels are *The Island Pharisees* (1904), *The Country House* (1907), *Fraternity* (1909) and *The Patrician* (1911). A prolific playwright, he produced more than 30 plays for the London stage, including *Strife* (1909), *Justice* (1910), *The Skin Game* (1920), *A Bit o' Love* (1915) and *Loyalties* (1922). They best illustrate his reforming zeal, and also his sentimentality, for while technically first-rate theatre, they are marred (especially the later ones) by the parsimony of his dialogue. He won the Nobel Prize in literature in 1932. 🕮 Harold V Marrot, *The Life and Letters of John Galsworthy* (1973)

Galt, Sir Alexander Tilloch 1817–93
Canadian politician
He was born in London, England. From 1844 to 1855 he was High Commissioner of the British American Land Company, which made huge profits from lands obtained through its influence with the Château Clique and in London. As finance minister in the MACDONALD–CARTIER administration he introduced the high tariffs of 1859 and served in the 'great coalition' of 1864 that negotiated the terms of confederation. In 1880 he became the first Canadian High Commissioner in London.

Galt, John 1779–1839
Scottish novelist and pioneer in Canada
Born in Irvine, Ayrshire, the son of a sea captain, he was educated at Greenock Grammar School, then became a junior

clerk in a local merchant's firm (1796). He moved to London in 1804 and set up in business as a merchant, but the venture was not a success, and from 1809 to 1811 he travelled for his health's sake in the Levant, where he met BYRON. On his return he published *Letters from the Levant* and other accounts of his travels. He later started to write novels for *Blackwood's Magazine*. *The Ayrshire Legatees* appeared in 1820, followed by *The Steam-Boat* in 1821. Its successor, *The Annals of the Parish* (1821), is his masterpiece, and its description of events in the life of a parish minister throws interesting light on contemporary social history. He produced in quick succession *Sir Andrew Wylie* (1822), *The Provost* (1822) and *The Entail* (1823), then in 1826 went to Canada, where he founded the town of Guelph, and played a prominent part in organizing immigration. He returned ruined in 1829, but wrote a new novel, *Lawrie Todd* (1830), followed by *The Member* (1832), on corruption in politics. He also wrote a *Life of Byron* (1830) and an autobiography (1834). In his depiction of life in small towns and villages Galt has few rivals. He possesses rich humour, genuine pathos and a rare mastery of Scottish dialect. 🕮 I Gordon, *John Galt: A Life of a Writer* (1972)

Galtieri, Leopoldo Fortunato 1926–2003
Argentine soldier and statesman
He was born in Caseras, in the province of Buenos Aires, the son of Italian immigrants. After training at the National Military College he was commissioned in 1945 and progressed steadily to the rank of lieutenant-general in 1979, when he joined the junta which had been in power since the military coup which ousted ISABELITA PERÓN in 1976. In 1981 the leader of the junta, General Viola, died of a heart attack and Galtieri succeeded him as president. The state of the Argentine economy worsened and, to counter mounting domestic criticism, in 1982 Galtieri ordered the invasion of the long-disputed Malvinas (Falkland) Islands. Their recovery by Great Britain, after a brief and humiliating war, brought about his downfall. He was court-martialled in 1983 and sentenced to twelve years' imprisonment in 1986 for negligence in starting and losing the Falklands War. He was pardoned by Carlos Menem in 1991. In 2002, new charges were brought against him for his part in the 'Dirty War'; he was placed under house arrest, but died before a case could be brought.

Galton, Sir Francis 1822–1911
English scientist
Born in Birmingham, he studied medicine at the Birmingham Hospital and King's College London and graduated from Trinity College, Cambridge. In 1846 he travelled in North Africa, and in 1850 explored unknown territory in South Africa, publishing *Narrative of an Explorer in Tropical South Africa* and *Art of Travel* (1853). His investigations in meteorology in *Meteorographica* (1863) were the basis for modern weather maps. He supported the evolutionary thinking of his cousin CHARLES DARWIN, and devoted himself to heredity, founding and endowing the study of eugenics (the science of creating superior offspring), and publishing *Hereditary Genius* (1869), *English Men of Science: Their Nature and Nurture* (1874) and *Natural Inheritance* (1889). He also devised the system of fingerprint identification with *Finger Prints* (1892). His researches into colour blindness and mental imagery were also of great value. He was elected FRS in 1856, and knighted in 1909. 🕮 Michael G Bulmer, *Francis Galton: Pioneer of Heredity and Biometry* (2003)

Galuppi, Baldassaro 1706–85
Italian composer of light operas
Born near Venice, he lived in London from 1741 to 1744 and wrote the popular *Il filosofo di campagna* (1754, 'The Country Philosopher'), as well as sacred music and sonatas.

Galvani, Luigi 1737–98
Italian physiologist
Born in Bologna, he became a lecturer in anatomy in 1768, and from 1782 was professor of obstetrics. He is famous for the discovery of animal electricity, inspired by his observation that dead frogs suffered convulsions when fixed to an iron fence to dry. He then showed that paroxysms followed if a frog was part of a circuit involving metals, wrongly believing the current source to be in the material of muscle and nerve. Galvani's name lives on in the word 'galvanized', meaning stimulated as if by electricity, and in the galvanometer, used from 1820 to detect electric current. 🕮 Percy Dunsheath, *Giants of Electricity* (1967)

Galway, Sir James 1939–
Northern Irish flautist and conductor
Born in Belfast, he gained experience playing in flute bands in Northern Ireland, before training at the Royal College and the Guildhall in London. He was an orchestral player, notably as part of the woodwind section of the Berlin Philharmonic Orchestra, before establishing himself as an internationally renowned soloist in his own right from 1975. His repertoire includes not only classical and contemporary music, but a great deal of popular music, which, along with frequent television exposure, helped him to win a mass audience. He plays a 14-carat gold flute, and even in slight, pop-derived material his sound and technique are impeccable. He was knighted in 2001.

Gama, Vasco da c.1469–1525
Portuguese navigator
Born in Sines, Alentejo, he distinguished himself at an early age as a mariner, and was selected by King MANOEL I to discover a route to India round the Cape of Good Hope. The expedition left Lisbon in 1497, and after rounding the Cape, despite hurricanes and mutinies, made Malindi (in East Africa) early in the following year. Here da Gama found a skilful Indian pilot, crossed the Indian Ocean, and arrived at Calicut in 1498, the first Westerner to sail round the Cape to Asia. The ruler of Calicut soon became actively hostile, and da Gama had to fight his way out of the harbour, but he arrived safely back in Lisbon in 1499, and was ennobled. However, 40 other Portuguese left behind were murdered, and to avenge them the king sent out a squadron of 20 ships under da Gama (1502), which founded the colonies of Mozambique and Sofala, bombarded Calicut, and returned to the Tagus with 13 richly laden vessels in 1503. In 1524 da Gama became viceroy of India. 🕮 Larry Nyhoff, Peter N Stearns, Nicholas Schneider and Mark Voit, *Vasco da Gama, Renaissance Crusader* (2004)

Gamage, Albert Walter 1855–1930
English merchant
Born in Hereford, he became a draper's apprentice in London, and in 1878 founded the famous store in Holborn which bore his name.

Gamaliel d.c.50 AD
Palestinian rabbi
He was the teacher of St PAUL. A prominent Pharisee, he taught 'the law' early in the 1st century. Tolerant and peaceful, he seems to have placed Christianity on a par with other sects.

Gambetta, Léon Michel 1838–82
French statesman
Born in Cahors, of Genoese–Jewish extraction, he became a member of the Paris Bar in 1859, attracted attention by his advanced liberal views, and in 1869 was elected parliamentary deputy. After the surrender of NAPOLEON III he was one of the proclaimers of the Republic (September 1870). As minister of the interior in the government of National Defence, he escaped from Paris, which was under siege, by balloon to Tours, and for five months was dictator of France. Despite the surrender of Metz he demanded that the war with Germany should be carried on to the end. After the fall of the Commune he became the chief of the advanced Republicans. When Albert, 4th Duc de Broglie (1821–1901), took office (1877) in the hope of restoring the monarchy, a civil war seemed imminent, but he averted it. He was imprisoned and fined for having declared regarding President MACMAHON 'Il faudra ou se soumettre, ou se démettre' ('Give in or give up'), but two months later he was re-elected for Belleville, and in 1879 MacMahon resigned. In 1880, on the resignation of the FERRY ministry, Gambetta succeeded in forming a cabinet, but when in 1882 the chamber rejected his reform proposal he immediately resigned. He died from appendicitis while recovering from the effects of 'an accidental wound in the hand from a revolver'. 🕮 Harold Stannard, *Gambetta and the Foundation of the Third Republic* (1921)

Gambier, James Gambier, 1st Baron 1756–1833
English naval commander
Born in the Bahamas, he fought with distinction in RICHARD HOWE's action off Ushant (1794), was promoted to rear admiral (1795) and served as lord commissioner of the Admiralty (1795–1801, 1804–06). He was governor of Newfoundland (1802–04). As admiral he commanded the British fleet at the bombardment of Copenhagen in 1807. At the Battle of Aix Roads in 1809 he disregarded signals from THOMAS COCHRANE, but was acquitted by a court-martial. He was made admiral of the fleet in 1830.

Gamble, Josias Christopher 1776–1848
Irish industrialist
Born in Enniskillen, Northern Ireland, he spent a period as a cleric before manufacturing chemicals in Dublin and then in Glasgow, and most profitably in partnership with JAMES MUSPRATT in St Helens, making bleaching powder, soda ash and sulphuric acid.

Gandhi, Mahatma ('Great Soul'), *properly* **Mohandâs Karamchand Gandhi** 1869–1948
Indian leader

Gandhi was born in Porbandar, Kathiawar, the son of a politician. His mother was a devout Hindu, and Gandhi derived much of his pacifist belief from her. He studied law in London, and in 1893 gave up working in a Bombay legal practice to live on £1 a week in South Africa, where he spent over 20 years opposing discriminatory legislation against Indians. He supported the British in the Boer War (1899–1902).

In 1914 he returned to India. While supporting the British in World War I, he took an increasing interest in the home rule movement (*Swaraj*), acquiring control of the Congress Movement, which he reformed. His civil disobedience campaigns of 1919–20 led to violence, notably the massacre at Amritsar, in which several hundred people were killed by British soldiers. From 1922 to 1924 he was imprisoned for conspiracy and in 1930 he led a 200-mile (320km) march to the sea to collect salt in symbolic defiance of the government monopoly. He was rearrested and on his release in 1931 negotiated a truce between Congress and the government and attended the London round-table conference on Indian constitutional reform.

Back in India, he renewed the civil disobedience campaign and was arrested again; this formed the pattern, along with his 'fasts unto death', of his political activity for the next six years. He assisted in the adoption of the constitutional compromise of 1937 under which Congress ministers accepted office in the new provincial legislatures. When war broke out, Gandhi, convinced that only a free India could give Britain effective moral support, urged complete independence more and more strongly. He described the CRIPPS proposal in 1942 for a constituent assembly with the promise of a new constitution after the War as 'a post-dated cheque on a crashing bank'. In August 1942 he was arrested for concurring in civil disobedience to obstruct the war effort, and was released in May 1944.

In 1946 Gandhi negotiated with the British Cabinet Mission, which recommended the new constitutional structure eventually realized in the formation of India and Pakistan. In May 1947 he hailed Britain's decision to grant India independence as 'the noblest act of the British nation'. His last months were darkened by communal strife between Hindu and Muslim; but his fasts to shame the instigators helped to avert deeper tragedy. He was assassinated in Delhi by a Hindu fanatic on 30 January 1948.

In his lifetime Mahatma ('a great soul') Gandhi was venerated as a moral teacher, a reformer who sought an India as free from caste as from materialism, and a dedicated patriot who gave the Swaraj movement a new quality. Critics, however, thought him the victim of a self-delusion which blinded him to the disaster and bloodshed his supposedly non-violent campaigns invoked. In Asia above all he has been regarded as a great influence for peace, whose teaching had a message not only for India but for the world.

📖 His publications include the autobiographical *The Story of My Experiment with Truth* (2 vols, 1927–29; reissued as 1 vol, 1983), his autobiography (1948), and *The Collected Works of Mahatma Gandhi* (90 vols, 1958–84). See also Yogesha Chadha, *Rediscovering Gandhi: The Definitive Biography* (1997); J M Brown, *Gandhi, Prisoner of Hope* (1990); Robert Payne, *The Life and Death of Mahatma Gandhi* (1969); Pyarelal, *Mahatma Gandhi* (2nd edn, 2 vols, 1965–66); Dinanath G Tendulkar, *Mahatma: Life of Mohandas Karamchand Gandhi* (8 vols, 1960–63).

> 'Non-violence is not a garment to be put on and off at will. Its seat is in the heart, and it must be an inseparable part of our very being.'
>
> – From 'War and Peace', in *Young India* (1926).

Gambon, Sir Michael John 1940–
Irish actor
Born in Dublin, he moved to England, where he joined the National Theatre, London (1963). Subsequent performances include ALAN AYCKBOURN's *The Norman Conquests* (1974) and *Just Between Ourselves* (1977), as well as the title role in JOHN DEXTER's production of BERTOLT BRECHT's *The Life of Galileo* (1980). A leading actor in the National Theatre company (1986–87), he has also made several television appearances, notably as DENNIS POTTER's *The Singing Detective* (1986) and as GEORGES SIMENON's *Maigret* (1992). His films include *The Cook, The Thief, His Wife and Her Lover* (1989), *The Wings of the Dove* (1997) and *Sleepy Hollow* (1999). He replaced the late RICHARD HARRIS in the role of Dumbledore in the Harry Potter films, beginning with *Harry Potter and the Prisoner of Azkaban* (2004). He was awarded the CBE in 1990 and knighted in 1998.

Gamelin, Maurice Gustave 1872–1958
French soldier
He was appointed aide-de-camp to JOSEPH JOFFRE in 1906, and became his chef de cabinet in 1911. In 1935 he became chief of staff of the army and a member of the Conseil Supérieur de la Guerre, but his theory that 'To attack is to lose' exposed his poor grasp of strategy. In 1940 his defensive 'solid fronts' crumbled under the German Blitzkrieg. He was replaced by General MAXIME WEYGAND, tried and imprisoned (1943–45).

Gamow, George 1904–68
US physicist
Born in Odessa, Ukraine, he was educated at Leningrad (now St Petersburg) University, where later he was professor of physics (1931–34). After research at the universities of Göttingen, Copenhagen and Cambridge he moved to the USA as professor of physics at George Washington University (1934–55) and Colorado University (1956–68). In 1948, with RALPH ALPHER and HANS BETHE, he suggested an explanation for the universal abundance of chemical elements based on thermonuclear processes in the early universe, and he was a major expounder of the 'Big Bang' theory, still the accepted model for the creation of the universe. In molecular biology he made a major contribution to the problem of how the order of nucleic acid bases in DNA chains governs the synthesis of proteins from amino acids. He realized that short sequences of the bases could form a 'code' capable of carrying information directing the synthesis of proteins, a proposal shown by the mid-1950s to be correct.

Gance, Abel 1889–1981
French film director
He was born in Paris, the illegitimate son of a wealthy doctor, and studied as a lawyer's clerk, but was seduced by the stage, becoming involved in film-making in 1911. His five-hour-long *Napoleon* (1927) was a classic of silent film, but was largely forgotten until its resurrection in the early 1980s. Other films include *Lucrezia Borgia* (1935) and *The Battle of Austerlitz* (1960). He was a pioneer of colour cinematography and widescreen techniques. 📖 Norman King, *Abel Gance: A Politics of Spectacle* (1984)

Gandhi, Indira Priyad Arshini 1917–84
Indian politician
Born in Allahabad, the daughter of JAWAHARLAL NEHRU, she was educated at Visva-Bharati University (Bengal) and Somerville College, Oxford. She was deeply involved in the independence issue, and spent a year in prison. She married Feroze Gandhi (d.1960) in 1942 and had two sons, RAJIV GANDHI and Sanjay (1946–80), who died in an air crash. She became a member of the central committee of Indian Congress (1950), president of the Indian Congress Party (1959–60) and minister of information (1964). She took over as prime minister in 1966 after the death of LAL BAHADOUR SHASTRI. In 1975, after her conviction for election malpractices, she declared a state of emergency in India. Civil liberties were curtailed and strict censorship imposed. These restrictions were lifted in 1977 during the campaign for a general election, in which the Congress Party was defeated and Mrs Gandhi lost her seat. Acquitted after her arrest on charges of corruption, she resigned in 1978 from the Congress Parliamentary Party, and became leader of the new Indian National Congress (I), returning to power as prime minister following the 1980 general election. She was recognized for her work as a leader of the developing nations, but failed to suppress sectarian violence at home. She was assassinated in 1984 by members of her Sikh bodyguard, resentful of her employment of troops to storm the Golden Temple at Amritsar. Her murder provoked a Hindu backlash in Delhi, involving the massacre of 3,000 Sikhs. She was succeeded by her elder son, Rajiv. 📖 Katherine Frank, *Indira: The Life of Indira Nehru Gandhi* (2002)

Gandhi, Mahatma *See panel above*

Gandhi, Rajiv 1944–91
Indian politician
The eldest son of INDIRA GANDHI and the grandson of JAWAHARLAL NEHRU, he was born in Bombay, into a Kashmiri–Brahmin family which had governed India for all but four years since 1947. He was educated at Doon School and Cambridge, where he failed his engineering degree. He married SONIA GANDHI in 1968. In contrast to his younger brother Sanjay (1946–80), he showed little interest in politics and worked as a pilot for Air India (1972–81). Following Sanjay's death in an air crash he inherited his brother's Amethi parliamentary seat in 1981 and was appointed a general-secretary of the Congress (I) Party in 1983. After the assassination of Indira Gandhi in 1984 he became prime minister and secured a record majority in the parliamentary elections later that year. He attempted to cleanse and rejuvenate Congress (I), inducting new technocrats and introducing a more free-market economic programme. Congress (I) suffered heavy losses in the 1989 general election, and he resigned as premier after his party's defeat. He was killed by a bomb hidden in the clothing of a woman who handed him flowers during an election campaign.

Gandhi, Sonia, *originally* **Edvige Antonia Albina Maino** 1946–
Indian politician
Born near Turin, Italy, she met RAJIV GANDHI while attending an English language school in Cambridge, and they married in 1968. The death of his brother Sanjay (1946–80) propelled the couple into the political arena, and she became an Indian citizen in 1983. Following her husband's assassination in 1991, she retired from politics. In 1998, she agreed to campaign in order to boost the Congress Party's popularity, and was elected party leader. Following a surprise victory in the 2004 elections, she turned down the post of prime minister, but chose to remain party leader.

Gangeśa c.1200
Indian philosopher
He founded the *Navya-nyaya* or new *Nyaya* school of Hindu philosophy, in Mithila, Bihar. His approach, emphasizing philosophical logic rather than knowledge of the external world claimed in *Nyaya* philosophy stemming from GAUTAMA, was continued by his son Vardhamana. Later eminent exponents included Pakshadhara (1400–95) and Raghunatha (1477–1547).

Ganivet, Angel 1865–98
Spanish essayist, novelist and thinker
His works include the profoundly argued *Idearium español* (1897, Eng trans *Spain: An Interpretation*, 1946), in which he presents Spain as being sick with *aboulia* – lack of will, chronic apathy, fixed ideology. (The term was coined by MIGUEL DE UNAMUNO, from whom Ganivet gained much of his inspiration and with whom Ganivet conducted an important correspondence, eventually published.) His two semi-autobiographical novels are *La conquista del reino de Maya por el último conquistador español Pío Cid* (1897, 'The Conquest of Maya's Kingdom by the Last Spanish Conquistador Pío Cid') and *Los trabajos del infatigable creador Pío Cid* (1898, 'The Labours of the Indefatigable Creator Pío Cid'). Knowing that he had syphilitic paralysis, he drowned himself in the Dvina in Riga, where he was Spanish consul. 🕮 H Ramsden, *Angel Ganivet's 'Idearium español': A Critical Study* (1967)

Gao Gang (Kao Kang) c.1902–1955
Chinese political leader
In the mid-1930s he was in charge of a small independent Communist area at Baoan, Shaanxi (Shensi), where the Long March led by MAO ZEDONG ended (1935). Mao and Gao Gang became close political allies, and Gao Gang later became chief party secretary of Manchuria (1949). He set the national pace in economic development, but in 1955 was accused of attempting to set up a 'separate kingdom'. He apparently committed suicide.

Gao Xingjian 1940–
Chinese author and Nobel Prize winner
He was born in Ganzhou and began his career as a translator for the Communist magazine *China Reconstructs*, later working as a playwright for the People's Art Troupe. During the Cultural Revolution he spent five years undergoing 're-education' and was unable to publish in China until 1979. He emigrated to France in 1988. His plays include *Bus Stop* (1983) and *The Other Shore* (1986), which show the influences of BRECHT and BECKETT. *Soul Mountain* (2000), a novel about the search for roots in a shattered Communist China, was his first major international success. The autobiographical *One Man's Bible* appeared in 2002, and the story collection *Buying a Fishing Rod for My Grandfather* in 2004. He was awarded the Nobel Prize in literature in 2000. 🕮 Tam Kwok-Kan (ed), *The Soul of Chaos: Critical Perspectives on Gao Xingjian* (2001)

Gapon, Georgi Apollonovich 1870–1906
Ukrainian priest and reformer
In 1902 he became leader of the so-called Union of Russian Factory Workers. Without his knowledge, this seems to have been financed by the Tsarist police as a means of penetrating and controlling the working-class movement. However, with deteriorating economic conditions, its numbers grew and in 1905 Gapon led them in a procession to the Winter Palace in the sincere belief that Tsar NICHOLAS II would accede to their demands. The result was Bloody Sunday. Thereafter, idealists like Gapon could exercise less and less influence on Russian developments.

Garang de Mabior, John 1945–2005
Sudanese rebel leader
Born into a southern Sudanese family, he was educated at Grinnel College, Iowa, and at Iowa State University. He received his military training in the USA before returning to Sudan. In 1983, after travelling to the south of the country to quell a mutiny, he instead founded the Sudan People's Liberation Army, encouraging further mutinies against the Islamic government and leading to the outbreak of Sudan's second civil war. Following two decades of conflict, a 2005 peace accord made him vice-president, a position he held for only three weeks before he was killed in a helicopter accident.

Garbarek, Jan 1947–
Norwegian saxophonist and composer
Born in Mysen, he became interested in jazz through the recordings of JOHN COLTRANE and Albert Ayler, although his own style developed in a contrary direction. Self-taught at first, he was playing at European jazz festivals by 1966 and one year later joined the Scandinavian orchestra led by US avant-garde composer George Russell. He worked with experimental US musicians like KEITH JARRETT and DON CHERRY in the early 1970s, but his own projects have moved increasingly away from jazz in favour of an exploration of influences from Norwegian folk music, and also the ethnic music of India, Pakistan and South America, sometimes with musicians from those traditions. His haunting saxophone sonority has grown more starkly and dramatically etched the further he has moved from the harmonic complexities of jazz.

Garbett, Cyril Foster 1875–1955
English prelate
Born in Tongham, near Aldershot, and educated at Keble College and Cuddesdon College, Oxford, he was Bishop of Southwark from 1919 to 1932 and of Winchester from 1932, until he was appointed Archbishop of York in 1942. He was one of the most outspoken leaders of the Church, a prelate of great pastoral gifts and a humanitarian remembered for his warmth of personality and strength of character. His publications include *The Church and Social Problems* (1939) and a trilogy on Church and State (1947–52).

Garbo, Greta *See panel p598*

Garborg, Arne Evenson 1851–1924
Norwegian writer
Born in Jaeren, he rejected his agricultural upbringing and became a rural schoolmaster, working subsequently as a journalist and junior civil servant. The conflict precipitated his father's suicide. Garborg later lost his government post when he published *Mannfolk* (1886, 'Men'), in which he passionately argued that economic and social pressures drove respectable young Norwegians into the arms of prostitutes. He also wrote a series of realistic novels, such as *Bondestudenter* (1883, 'Peasant Students'), *Fred* (1890, 'Peace') and *Traette Maend* (1891, 'Tired Men'), and a cycle of lyric poems, *Haugtussa* (1895, 'The Hill Innocent'). He was a leader in the movement to establish a new Norwegian literary language (*Landsmål*, 'country language') based on western country dialects (later called *Nynorsk*, 'New Norwegian'), and from 1877 edited the periodical *Fedraheimen*, which provided him with a mouthpiece for his lifelong attack on LUTHERAN theology. 🕮 R Thesen, *Arne Garborg og det Norske Folket* (1944)

Garcia, Jerry (Jerome John) 1942–95
US rock and country guitarist and singer
Born in San Francisco, he began playing in folk and bluegrass bands, before drifting into San Francisco's Haight-Ashbury

Garbo, Greta, *professional name of* **Greta Lovisa Gustafsson** 1905–90
Swedish-born US film actress, a glamorous star of 1930s films

Greta Garbo was born in Stockholm. She became a shop assistant and model, and won a bathing beauty competition at 16, then won a scholarship to the Royal Theatre Dramatic School in Stockholm. She was given a starring role in *Gösta Berling's Saga* (1924) by the Swedish director MAURITZ STILLER; he also gave his star the name Garbo (chosen before he met her), trained her in acting technique, and insisted that she be given a contract at MGM in Hollywood when he moved there in 1925. He co-directed her in *The Temptress* (1926).

She was an actress of remarkable talent and legendary beauty, as her appearances in *Flesh and the Devil* (1927), *Love* (1927) and *A Woman of Affairs* (1928) showed. Her first talking role was in *Anna Christie* (1930), and this was followed by her greatest successes, *Queen Christina* (1933), *Anna Karenina* (1935), *Camille* (1936), *Conquest* (1937), in which she played NAPOLEON I's mistress, and *Ninotchka* (1939), a romantic comedy in which she caricatured her own aloof image and famously laughed. She retired from films in 1941, distressed by the scathing reviews of *Two-Faced Woman*.

She became a US citizen in 1951 but lived in New York as a total recluse for the rest of her life. In 1955 she was awarded an honorary Academy Award for her 'unforgettable screen performances'; the award was accepted for her by Nancy Kelly. Later attempts to persuade her to return to the screen were all unsuccessful.

📖 B Paris, *Garbo* (1995); M A Vieira, *Greta Garbo: A Cinematic Legacy* (2005).

> 'I want to be alone.' The media have frequently attributed these words to Garbo, although she always denied she said them. In the film *Grand Hotel* (1932) Grusinskaya (played by Garbo) says 'I want to be left alone'.

hippie scene of the mid-1960s, which led to the formation of The Grateful Dead in 1967. The band became an institution in US music, with Garcia, Bob Weir and Phil Lesh as its key members. They moved from psychedelia into a more blues and country oriented sound in the early 1970s, but remained famous for their long, improvised live performances, and retained a huge worldwide following – the 'Deadheads' – through every change of pop and rock fashion. Garcia performed in various other contexts, notably with an acoustic bluegrass band. His health, exacerbated by drug addiction, grew fragile, and his death ended an era in US rock music. 📖 W Ruhlmann, *History of The Grateful Dead* (1990)

García, Manuel 1775–1832
Spanish tenor and composer
Born in Seville, he made his reputation as a tenor in Cádiz and Madrid, and from 1808 travelled to Paris, Italy and London. In 1825 he visited New York and Mexico, where he was robbed of all his money, which compelled him to teach singing on his return to Paris. Several of his compositions, such as *Il Califo di Bagdad* ('The Thief of Baghdad'), became popular. His daughter was PAULINE VIARDOT-GARCÍA.

García, Pauline *See* VIARDOT-GARCÍA, PAULINE

García Gutiérrez, Antonio 1813–84
Spanish dramatist
Born in Chiclana de la Frontera, he abandoned his medical studies to become a soldier. His first success, *El trovador* (1836, 'The Troubadour'), provided VERDI with his opera *Il Trovatore* (1853), and he went on to write some 50 plays. His Romantic works include some deliberately sensational writing but at their best, as in *Juan Lorenzo* (1865), are exceedingly skilful, written in a clever combination of prose and verse, and presenting unusually acute portrayals of women. 📖 N B Adams, *The Romantic Drama of García Gutiérrez* (1922)

García Lorca, Federico 1898–1936
Spanish poet and playwright
Born in Fuente Vaqueros, he is best known for his powerful dramatic tragedies, which deal with elemental themes in a striking fashion. The best of these plays are *Bodas de Sangre* (1933, Eng trans *Blood Wedding*, 1947), *Yerma* (1934, Eng trans 1947) and *La Casa de Bernarda Alba* (first performed in 1945, Eng trans *The House of Bernarda Alba*, 1947). His gypsy songs, which include *Canciones* (1927, Eng trans 1976) and *Romancero Gitano* (1928, 1935, Eng trans *Gypsy Ballads*, 1963), reveal a classical control of imagery, rhythm and emotion. The elegiac poems in *Llanto por la muerte de Ignacio Sánchez Mejías* (1935, Eng trans *Lament for the Death of a Bullfighter and Other Poems*, 1937) have been seen as a foreshadowing of his own death. He was assassinated on the orders of the Nationalist civil governor early in the Spanish Civil War at Granada. 📖 Leslie Stainton, *Lorca: A Dream of Life* (1999)

García Márquez, Gabriel *See* MÁRQUEZ, GABRIEL GARCÍA

García Pérez, Alan 1949–
Peruvian politician
He was born in Lima and studied law at the Catholic University there. He continued his studies in Guatemala, Spain and France before returning to his country and winning election to the National Congress as a moderate left-winger (1978). Four years later he was appointed secretary-general, and in 1985 succeeded FERNANDO BELAÚNDE TERRY in the first democratic election of a civilian president. He inherited an ailing economy, which forced him to trim his socialist programme. By 1991 the economy was in tatters, and he became locked into the deepening struggle between the Sendero Luminoso ('Shining Path') guerilla group, the armed forces in the Andes and a conservative congress in Lima. He was succeeded as president by the conservative ALBERTO FUJIMORI and sought political asylum in Colombia in 1992. He returned from exile in 2001 and stood in the presidential elections, but was beaten by ALEJANDRO TOLEDO. He has been leader of the APRA party since 2001, and was elected president for a second time in 2006.

García Robles, Alfonso 1911–91
Mexican diplomat and Nobel Prize winner
After studying law at universities in Mexico and Paris and at the Academy of International Law in the Netherlands, he became a member of the Mexican Foreign Service. From 1964 to 1971 he was under-secretary for foreign affairs. In this capacity he furthered his interest in international nuclear disarmament, and was instrumental in forming the Treaty of Tlateloco (1967), which aimed to abolish nuclear weapons in Latin America. Since 1977 he has been Mexican delegate on the UN Disarmament Committee. His publications include *338 Days of Tlateloco* (1977). He was awarded the 1982 Nobel Peace Prize, jointly with ALVA MYRDAL.

Garcilaso de la Vega 1503–36
Spanish poet and soldier
Born in Toledo, he fought bravely in the wars of CHARLES V, and died in battle of a wound. He introduced the PETRARCHan sonnet into Spain, and wrote odes in imitation of VIRGIL.

Garcilaso de la Vega, *called* **El Inca** c.1540–c.1616
Spanish writer
He was born in Cuzco, Peru, the son of one of the conquerors of Peru and an Inca princess, and at the age of 20 he went to Spain, where he spent the rest of his life. His account of the conquest of Florida by HERNANDO DE SOTO (1605) was followed in 1609–17 by his great *Comentarios*, in which he movingly describes the legends and beliefs of his mother's people (Eng trans by C R Markham, 1869). 📖 D Castanien, *El Inca Garcilaso de la Vega* (1969)

Garden, Mary 1874–1967
Scottish soprano
Born in Aberdeen, she was taken to the USA as a child. She studied singing in Chicago and then in Paris, and her career began sensationally when in 1900 she took over in mid-performance the title role in GUSTAVE CHARPENTIER's new opera *Louise* at the Opéra-Comique, when the singer was taken ill. In 1902 she created the role of Mélisande in DEBUSSY's *Pelléas et Mélisande* at the composer's request, and in 1903 she recorded songs with Debussy. JULES MASSENET and Frédéric d'Erlanger also wrote leading roles for her. She sang at Covent Garden (1902–03), starring in roles such as Thaïs, Salomé, Carmen and Juliet (CHARLES GOUNOD). She made her US debut as Thaïs (1907), and in 1910 she began a 20-year association with Chicago Grand Opera, which she also briefly directed (1921–22). She returned to Scotland in 1939. 📖 Michael T R B Turnbull, *Mary Garden* (1996)

Gardiner, Gerald Austin Gardiner, Baron 1900–90
English jurist and legal reformer
Educated at Harrow and Magdalen College, Oxford, he was called to the Bar in 1925, and his cases included the *Lady*

Chatterley's Lover trial, in which he acted as counsel for the defence. His support for law reform was expressed in *Capital Punishment as a Deterrent* (1956), and he was joint chairman (with Sir VICTOR GOLLANCZ) of the National Campaign for the Abolition of Capital Punishment. In 1964 he was appointed Lord Chancellor during the government of HAROLD WILSON. During his six years in office, capital punishment was abolished, laws regarding abortion and homosexuality were reformed, and the Law Commission was set up. He appointed the first woman judge to the High Court, and introduced a compulsory training programme for justices of the peace. He retired in 1970 when Labour went into opposition, and became chancellor of the Open University in 1973.

Gardiner, Samuel Rawson 1829–1902
English historian
Born in Ropley, Hampshire, he was educated at Winchester and Christ Church, Oxford. For some years he was professor of modern history at King's College London but resigned in 1885 to continue his *History of England from the Accession of James I to the Restoration* at Oxford on an All Souls fellowship. The first instalment appeared in 1863, and at his death he had completed the work to 1656. He also published *The Thirty Years' War* (1874), *Introduction to the Study of English History* (1881), written in conjunction with J Bass Mullinger, and *The Student's History of England* (1890–92).

Gardiner, Stephen c.1483–1555
English prelate
Born in Bury St Edmunds, Suffolk, he received a PhD in civil and canon law at Cambridge (1520–21), and was made master of Trinity Hall, Cambridge (1525–49, 1553–55). He became THOMAS WOLSEY's secretary (1525), then Bishop of Winchester (1531), and was sent to Rome to further HENRY VIII's divorce from CATHERINE OF ARAGON (1527–33). He supported the royal supremacy, but opposed doctrinal reformation, and for this was imprisoned and deprived of his bishopric on EDWARD VI's accession. Released and restored by MARY I, TUDOR (1553), he became a vigorous persecutor of Protestants.

Gardner, Alexander 1821–82
US photographer and journalist
He was born in Paisley, Scotland, and emigrated to the USA in 1856. Employed by MATHEW B BRADY, he became manager of Brady's Washington studio in 1858, but left, following a dispute over copyright, to open his own gallery in Washington (1863). He specialized in documentary projects, the best known of which are his work on the American Civil War (some of it produced while he and his son James were employed in making maps at the headquarters of the army of the Potomac); on the Lincoln Conspiracy (he had earlier made several portraits of ABRAHAM LINCOLN); on the building of the Union Pacific Railroad; and on several Indian peace conferences. His most significant published work is his *Photographic Sketchbook of the War* (1865), which contains fully attributed photographs by other photographers, including TIMOTHY H O'SULLIVAN, in addition to his own original prints.

Gardner, Ava, *originally* **Lucy Johnson** 1922–90
US film actress
Born in North Carolina, she was signed by MGM as a teenager, emerging from the ranks of decorative starlets with her portrayal of a femme fatale in *The Killers* (1946). A green-eyed brunette, once voted the world's most beautiful woman, she remained a leading lady for two decades, portraying an earthy combination of sensuality and cynicism in films like *Mogambo* (1953), *The Barefoot Contessa* (1954) and *Night of the Iguana* (1964). She continued to work as a character actress in films and on television. She was married to MICKEY ROONEY, ARTIE SHAW and FRANK SINATRA. She published an autobiography, *Ava*, in 1990.

Gardner, Erle Stanley 1889–1970
US crime novelist
Born in Malden, Massachusetts, he was educated at Palo Alto High School, California, studied in law offices and was admitted to the Californian Bar, where he became an ingenious lawyer for the defence (1922–38). A hugely prolific writer, he dictated up to six or seven novels simultaneously to a team of secretaries and used a number of pseudonyms. His best-known creation is the lawyer-sleuth Perry Mason, hero of 82 courtroom dramas, who first appeared in *The Case of the Velvet Claws* (1933). With a little help from Della Street, his faithful secretary, and private eye Paul Drake, Mason frequently defied the rulebook in his quest to clear his client's name. With Raymond Burr (1917–93) playing Perry Mason, the books enjoyed enhanced popularity when they were made into a long-running television series. Gardner also wrote a series of detective novels featuring the district attorney Doug Selby ('the DA'). 🕮 Dorothy B Hughes, *Erle Stanley Gardner: The Case of the Real Perry Mason* (1978)

Gardner, George 1812–49
Scottish botanist and explorer
Born in Glasgow, he studied medicine before becoming a botanist under the guidance of Sir WILLIAM HOOKER. His plant-collecting expeditions in the drier provinces of north-eastern Brazil (1836–41) took him northwards from Rio de Janeiro to Ceara and Maranhao, and resulted in substantial collections for the Royal Botanic Gardens at Kew, London. He published a major work on this subject, *Travels in the Interior of Brazil*, in 1846. He went on to become director of the botanical garden at Peradeniya in Ceylon (now Sri Lanka).

Gardner, Isabella 1915–81
US poet
Born in Newton, Massachusetts, she worked in the theatre and was unpublished until after her third marriage in 1947. Her first collection, *Birthdays from the Ocean*, appeared in 1955. Other volumes include *The Looking Glass* (1961), *West of Childhood: Poems 1950–65* (1965) and *That Was Then: New and Selected Poems* (1980). Admired by many, including the poet SYLVIA PLATH, she received the first WALT WHITMAN Citation of Merit in 1981.

Gardner, Isabella Stewart 1840–1924
US art collector
Born in New York City, she married a wealthy Bostonian and led a cultural salon in Boston. She collected art with the advice of connoisseur BERNARD BERENSON and built a gallery on the plan of an Italian villa with an interior garden, living on the fourth floor and opening the remainder to the public as the Isabella Stewart Gardner Museum in 1903. At her death she willed it to the city of Boston with the proviso that nothing should be altered, added, or removed, and its idiosyncratic Victorian arrangement has remained unchanged except for the blank spaces left after 1990, when thieves posing as policemen stole a number of priceless works from the museum, including paintings by REMBRANDT and VERMEER.

Gardner, Peter 1836–1902
Scottish potter
At the age of 30 he took over the family business of Dunmore Pottery. Animals feature a great deal in his work and his pioneering style in applied design and glaze techniques ranged from tiles and teapots to garden seats and umbrella stands. He was encouraged by the Earl and Countess of Dunmore and received royal recognition in 1871, when he was visited by the Prince of Wales (later EDWARD VII). He is generally regarded as one of the principal makers of Art Pottery in the second half of the 19th century.

Garfield, James Abram 1831–81
20th president of the USA
Born near Orange, Ohio, he already added to his widowed mother's income by doing farm work at the age of ten, and despite their poverty managed to graduate from Williams College in 1856. After teaching in a school and serving as a lay preacher, he became a lawyer and was elected to the state senate in 1859. On the outbreak of the Civil War he commanded a regiment of volunteers, seeing action at Shiloh and winning promotion to major-general for gallantry at Chickamauga in 1863. That year he resigned his command to enter Congress as a representative from Ohio, and he kept his seat for 17 years, becoming leader of the Republicans. In 1880 he was elected to the Senate, but he never occupied the seat because a deadlock at the Republican national convention led to his being chosen as the compromise presidential candidate. Elected president by a slim margin, he took office in 1881 and at once alienated ROSCOE CONKLING and the stalwart faction of the Republican Party by asserting the right of the president to make political appointments without regard to party patronage. On the morning of 2 July he was shot by a deranged admirer of the Stalwarts, Charles Guiteau (tagged historically as a 'disappointed office-seeker'). He died on 19 September and was succeeded by Vice-President CHESTER ARTHUR. His speeches were published in 1882. 🕮 Allan Peskin, *Garfield* (1978)

Garfinkel, Harold 1917–
US sociologist
Born in Newark, New Jersey, he was educated at Harvard, where he was a student of TALCOTT PARSONS. He taught briefly at Ohio State University and then at the University of California, Los Angeles, where he is now professor emeritus of sociology. He is the founder of the sociological tradition of ethnomethodology, an approach to social science which focuses on the

practical reasoning processes that ordinary people use in order to understand and act within the social world.

Garibaldi, Giuseppe 1807–82
Italian revolutionary, soldier and politician
He was born in Nice, French Empire (now in France), the son of a sailor. The greatest figure of the Risorgimento, he was a member of Young Italy and took part in an abortive MAZZINIAN insurrection in Genoa in 1834. He subsequently fled to South America, where he fought in defence of the Rio Grande do Sul Republic against the Brazilian Empire and in Uruguay against the Argentine dictator JUAN MANUEL DE ROSAS. He returned to Italy (1848) and offered his services to King Charles Albert (1798–1849) against the Austrians. Rejected, he instead took part in the government and defence of the Roman Republic, before attempting to relieve the Venetian Republic of DANIELE MANIN. After the revolutions of 1848–49 he visited the USA before settling on the island of Caprera. In 1856 he backed the Italian National Society and played a minor but brilliant part in the 1859 campaign against the Austrians. In 1860 he set sail from Genoa with 1,000 volunteers ('Red Shirts') to assist the anti-BOURBON rebellion which had broken out in Sicily. Having seized control of the island, he crossed to the mainland of the Kingdom of the Two Sicilies and overran much of the Mezzogiorno before handing it over to VICTOR EMMANUEL II. In 1862 he attempted to march on Rome but was stopped by Piedmontese troops at Aspromonte. A similar attempt to seize the papal capital was blocked by French forces at Mentana in 1867. He fought with limited success against the Austrians in 1866 and in 1870 he offered his services to the French after the Battle of Sedan. In 1870 he was elected a deputy at the Bordeaux Assembly. He spent his last years as a farmer on Caprera. 🕮 Jasper Ridley, *Garibaldi* (1974)

Garioch, Robert, *pseudonym of* **Robert Garioch Sutherland** 1909–81
Scottish poet
Born in Edinburgh and educated at the Royal High School and University there, he spent most of his professional career as a teacher in Scotland and England. He made his literary debut in 1933 with the surrealistic verse play *The Masque of Edinburgh* (published in expanded form in 1954). His first publications, *Seventeen Poems for Sixpence* (1940), on which he collaborated with SORLEY MACLEAN, and *Chuckies on the Cairn* (1949), were hand-printed. His later work included *Selected Poems* (1966), *The Big Music* (1971), *Dr Faust in Rose Street* (1973) and *Collected Poems* (1977). He wrote in the Scots language in various styles and moods, from the colloquial to the literary. He also translated into Scots works as diverse as PINDAR, HESIOD, GEORGE BUCHANAN's Latin plays *Jephtha* and *Baptistes*, Anglo-Saxon elegies and 19th-century Italian poems. His prose works include *Two Men and a Blanket* (1975), an account of his experience in POW camps during World War II. ROBERT FERGUSSON in particular influenced his poetry, as is most clearly seen in his sonnet on Fergusson's grave 'To Robert Fergusson', and 'The Muir'.

Garland, (Hannibal) Hamlin 1860–1940
US writer
Born in West Salem, Wisconsin, he often interrupted his schooling to help his father farm in Iowa, but in 1884 he went to Boston to teach and finally to write. In short stories, such as the collections *Main Travelled Roads* (1887) and *Prairie Folks* (1892), in verse and in novels, he vividly, often grimly, described the farming life of the Midwest. *Rose of Dutcher's Coolly* (1895) was an important forerunner of the 1920s 'revolt from the village'. *A Daughter of the Middle Border* (1921), the sequel to his autobiographical novel *A Son of the Middle Border* (1917), won the Pulitzer Prize. *Crumbling Idols* (1894) was a collection of essays, setting out Garland's theories of 'veritism'. 🕮 J Holloway, *Hamlin Garland: A Biography* (1960)

Garland, Judy, *originally* **Frances Ethel Gumm** 1922–69
US actress and singer
Born in Grand Rapids, Minnesota, she made stage appearances in vaudeville with her parents and partnered two sisters in an act that led to a film contract. She became a juvenile film star in *Broadway Melody of 1938* and appeared in several fine film musicals, among them *The Wizard of Oz* (1939), *Meet Me in St Louis* (1944) and *Easter Parade* (1948). Personal appearances confirmed the emotional power of her voice, and in *A Star is Born* (1954) she gave an impressive dramatic performance. Despite emotional and medical difficulties and a reputation for unreliability, she achieved the status of a legendary performer and actress. She was married five times, once to director Vincente Minnelli, and her daughters LIZA MINNELLI and Lorna Luft have also become actresses and singers. 🕮 Gerold Frank, *Judy* (1999)

Garner, Errol (Louis) 1921–77
US jazz pianist
Born in Pittsburgh, Pennsylvania, he was performing on radio at the age of ten, and playing professionally as a teenager. He moved to New York City in 1944, where he worked in both the jazz clubs of 52nd Street and the cabaret and cocktail lounge circuit. He never learned to read music, but evolved a distinctive, fearsomely virtuosic piano style which is readily identifiable in almost any setting. His growing popularity, bolstered by successful records like *Concert by the Sea* (1955), saw him lean increasingly towards the lucrative cabaret circuit, although jazz remained the cornerstone of his style. His compositions include the ballad 'Misty', now a jazz standard. 🕮 J Doran, *The Most Happy Piano* (1985)

Garner, Helen 1942–
Australian writer
Born in Geelong, Victoria, she taught in Melbourne schools until she was dismissed for answering pupils' questions on sex. Her adult fiction appeals strongly to adolescents because it examines contemporary problems in a clear-sighted and non-judgemental manner. Her first novel, *Monkey Grip* (1977), dealing with the subculture of drug addiction, won the National Book Council award that year and was filmed in 1981, gaining her instant popularity. Other works include two novellas, *Honour* and *Other People's Children* (both 1980), *The Children's Bach* (1984), and the collections of short stories *Postcards from Surfers* (1985) and *Cosmo Cosmolino* (1993). *First Stone* (1995) drew upon a Melbourne academic *cause célèbre* and attracted strong criticism from parts of the feminist movement. She has also written screenplays, such as *The Last Days of Chez Nous* (1993) for GILLIAN ARMSTRONG. More recent works include *The Feel of Steel* (2001) and *Joe Cinque's Consolation* (2004).

Garner, John Nance 1868–1967
US politician
Born in Red River County, Texas, he served as a Democratic congressman from Texas (1903–33) and became Speaker of the House in 1931. As vice-president (1933–41) under FRANKLIN D ROOSEVELT, Garner steered much New Deal legislation through Congress during his first two terms.

Garnerin, André Jacques 1769–1823
French aeronaut
A former balloon inspector in the French army, he gave the first public demonstration of a descent by parachute from a free-flying balloon in Paris in 1797, and thereafter made exhibition jumps in many countries, including one of 8,000 feet in England (1802). He was assisted in making improvements to the design of his parachutes by his brother, Jean Baptiste Olivier Garnerin (1766–1849).

Garnett, David, *nicknamed* **Bunny** 1892–1981
English novelist
He was born in Brighton, the son of EDWARD GARNETT, and studied botany at the Royal College of Science, London. His first novel, *Lady into Fox* (1922), won both the Hawthornden and the James Tait Black Memorial prizes. *A Man in the Zoo* (1924) and *The Sailor's Return* (1925) were also successful, as were several other novels. Associated with the Bloomsbury Group of artists and writers, he was literary adviser to the Nonesuch Press (1923–32) and literary editor of the *New Statesman* (1932–34). He joined the RAF in 1939, and used this experience for *War in the Air* (1941). 🕮 *The Golden Echo: Memoirs 1892–1914* (1915)

Garnett, Edward 1868–1937
English writer and critic
Born in London, the son of RICHARD GARNETT, as a publisher's reader he fostered the careers of many literary figures, including JOSEPH CONRAD, JOHN GALSWORTHY and D H LAWRENCE. He was the author of the set of critical essays *Friday Nights* (1922). He also wrote plays, including *The Breaking Point* (1907) and *The Trial of Jeanne d'Arc* (1912). His wife Constance (*née* Black, 1862–1946) was a distinguished translator of Russian literature.

Garnett, Eve 1900–91
English children's author and illustrator
Born in Worcestershire, she studied at the Royal Academy of Art and combined life as an author with her work as a professional artist. Her artistry included a commission for murals at Children's House, Bow, London, and an exhibition at the Tate Gallery, London, in 1939. Her name as an author rests upon *The Family from One End Street* (1937, Carnegie Medal),

one of the first attempts to present working-class family life sympathetically in children's fiction. This book and its sequel, *Further Adventures of the Family from One End Street* (1956), remain popular. 🕮 Terrence Molloy, *Eve Garnett: Artist, Illustrator, Author* (2002)

Garnett, Richard 1835–1906
English writer and bibliographer
Born in Lichfield, Staffordshire, he worked as a clerk then became keeper of printed books at the British Museum, London (1890–99). He was the author of verse, critical works and biographies, including *Shelley* (1862), *Carlyle* (1883) and *The Age of Dryden* (1895). His best-known original work is his collection of tales on pagan themes, *Twilight of the Gods* (1888). His son was EDWARD GARNETT. 🕮 H Cordier, *Le Docteur Richard Garnett* (1906)

Garnett, Tony 1936–
English television and film producer
Born in Birmingham, he studied psychology at London University before becoming an actor, appearing in television plays and the film *The Boys* (1962). He joined the BBC drama department (1964) as a script editor working on the Wednesday Play series. As a producer, he enjoyed a long association with director KEN LOACH on such influential television work as *Cathy Come Home* (1966), *Days of Hope* (1975) and *The Price of Coal* (1977). His films, also in collaboration with Loach, include *Kes* (1969), *Family Life* (1971) and *Black Jack* (1979). He made his directorial debut with *Prostitute* (1980), then moved to Los Angeles, where he directed *Handgun* (retitled *Deep in the Heart*, 1983), and produced *Earth Girls Are Easy* (1989) and *Shadowmakers* (1989). His UK production credits include *Beautiful Thing* (1996) and the television series *This Life* (1996) and *Attachments* (2000).

Garnier, Francis, *properly* **Marie Joseph François** 1839–73
French explorer
He was born in St Étienne, and as a naval officer fought in the Chinese War (1860–62). Appointed to a post in Cochin-China (now in Vietnam), he was second-in-command to DOUDART DE LAGRÉE on the Mekong River Expedition (1866–68), during which he mapped 3,100 miles (4,991km) of unknown territory in Cambodia and Yunnan. He aided in the defence of Paris (1870–71), and in the Tonkin War (1873) took Hanoi.

Garnier, Robert 1534–90
French poet and playwright
Born in Maine, France, he was the most distinguished of the predecessors of PIERRE CORNEILLE. His *Œuvres complètes* (2 vols, 1923, 1949, 'Complete Works') include the tragedies *Antigone* (1580) and *Les Juives* (1583, 'The Jewesses'). 🕮 M Mouflard, *Robert Garnier: 1545–1590* (1961)

Garnier, Tony (Antoine) 1869–1948
French architect
Born in Lyons, he studied at the École des Beaux-Arts, Paris. As architect of Lyons he made a major contribution to the forming of 20th-century architectural and urban planning through his Utopian ideal *Une Cité industrielle*, exhibited in 1904 and published in 1917. It combined functionalism with political and social reform, using the latest technology and materials. Through it he produced sophisticated reinforced-concrete buildings at Lyons, including the Grange Blanche Hospital (1911–27) and the Stadium (1913–18), and the Hôtel de Ville at Boulogne-Billancourt (1931–33). His early designs were published in *Les grands travaux de la ville de Lyon* (1920, 'Major Works in the City of Lyons').

Garofalo, *originally* **Benvenuto Tisi** 1481–1559
Italian painter
Born in Ferrara, he was the last and foremost artist of the Ferrarese school. He worked chiefly in the churches and palaces of his native city, in Bologna and in Rome. The church of S Lorenzo, Ferrara, contains his *Adoration of the Magi*, and his *Sacrifice to Ceres* is in the National Gallery, London.

Garrett, Lesley 1955–
English opera singer
Born near Doncaster, Yorkshire, she studied at the Royal Academy of Music and in 1979 won the prestigious Decca-Kathleen Ferrier Competition. In 1984, after stints with the Wexford Festival, Welsh National Opera, Opera North, Buxton Festival and Glyndebourne, she joined English National Opera. She subsequently emerged as contemporary opera's most provocative diva and a popular favourite, including among her roles Susanna in *The Marriage of Figaro*, Musetta in *La Bohème* and the title role in *The Cunning Little Vixen*. She was awarded the CBE in 2002. She has also hosted several television series, and in 2005 made a rare return to the opera stage in Welsh National Opera's *The Merry Widow*. In 2006 she took up the role of the Mother Abbess in a West End production of *The Sound of Music*.

Garrick, David 1717–79
English actor, theatre manager and playwright
He was born in Hereford and educated at Lichfield Grammar School. In 1736 he was sent to study Latin and Greek under Dr JOHNSON at Edial, and in 1737 he set off for London to study law, but became a wine merchant with his eldest brother (1738–40). He then turned to the stage. His first play was performed at Drury Lane in 1740 and in 1741 he made his successful debut as an actor at Ipswich, as Aboan in THOMAS SOUTHERNE's *Oroonoko*. The same year he appeared in London at Goodman's Fields, where his success as Richard III was so great that within a few weeks the two patent theatres were deserted, and crowds flocked to the unfashionable East End playhouse. When Goodman's Fields closed, he played at both Drury Lane and Covent Garden, but ultimately settled at Drury Lane, of which he became joint manager (1747), and from where he dominated the English stage for 30 years. He played continually, his only long rest being a trip to Europe (1763–65) when he thought his popularity was in danger of diminishing. He married Eva Marie Violetti (1724–1822), a Viennese dancer, in 1749. He was buried in Westminster Abbey, London. 🕮 Jean Benedetti, *David Garrick and the Birth of Modern Theatre* (2001)

Garrison, William Lloyd 1805–79
US journalist and anti-slavery campaigner
He was born in Newburyport, Massachusetts. A printer to trade, he became editor of the *Newburyport Herald* (1824) and the *National Philanthropist* (1828). Encouraged by BENJAMIN LUNDY, he denounced slavery so vigorously that he was imprisoned. He was founder-editor of *The Liberator* (1831–65), which argued the case for immediate abolition, visited Great Britain on lecture tours, and in 1833 founded the American Anti-Slavery Society. After the abolition of slavery, he turned his crusading attention to women's suffrage and the plight of the Native American peoples.

Garrod, Sir Archibald Edward 1857–1936
English physician
Born in London, he was educated at Oxford and St Bartholomew's Hospital, London, where he later did important work on arthritis, on an inherited metabolic disorder called alkaptonuria, and on several other rare hereditary conditions, including albinism, cystinuria and pentosuria. His work was an early application of the new MENDELian genetics in the study of human disease, and in *The Inborn Factors in Disease* (1931) he developed his ideas of biochemical individuality. During World War I, he served in Malta as a colonel in the Royal Army Medical Corps, where he developed an interest in classical archaeology. A pioneer of clinical investigation, he succeeded Sir WILLIAM OSLER as Regius Professor of Medicine at Oxford in 1920. 🕮 Alexander G Bearn, *Archibald Garrod and the Individuality of Man* (1993)

Garrod, Dorothy Annie Elizabeth 1892–1968
English archaeologist
Born in London, the daughter of Sir ARCHIBALD GARROD, she studied at Newnham College, Cambridge, directed expeditions to Kurdistan (1928) and Palestine (1929–34), and took part in the excavations in the Lebanon (1958–64). An expert on the Palaeolithic or Old Stone Age, in 1939 she became the first woman to hold a professorial chair at Cambridge.

Garscadden, Kathleen 1897–1991
Scottish broadcaster
Born in Glasgow, she was educated there at Hutchesons' Girls' Grammar School. Her career in broadcasting began when she acted as an all-round announcer, pianist and singer on her father's private broadcasting station. When this was bought by Lord REITH she joined the British Broadcasting Company (later Corporation) as a programme assistant (1923), working mainly on vocal concerts and the *Woman's Hour* series. Involved in the world's earliest experiments in broadcasting to schools, she started to run the early *Children's Hour*. She worked as a presenter, broadcaster, programme organizer and producer throughout the 42-year life of *Children's Hour*, and during World War II was responsible for organizing the broadcasting link between Scottish families and their evacuated children.

Garshin, Vsevolod Mikhailovich 1855–88
Russian writer
Born in Bachmut, he served in the Turkish War, and was wounded and invalided home in 1878. His story about a

wounded soldier, *Chetyre Dnya* (1877, Eng trans *Four Days*, 1912), was a huge success. His work, which is narrow but emotionally intense, was greatly influenced by LEO TOLSTOY, but without his breadth. His other stories include *Krasnyi Tsvetok* (1883, 'The Red Flower'), which is set in a lunatic asylum, and *Signal* (Eng trans 1912, 'The Signal'). He suffered from depression, and eventually committed suicide. 🕮 N Byelyaev, *Garshin* (1938)

Garson, Greer 1903–96
British actress
Born in County Down, Northern Ireland, and educated at the University of London, she worked in an advertising agency and participated in amateur dramatics before making her professional stage debut in 1932 with the Birmingham Repertory Company. In 1934 she moved to London's West End and was seen by Hollywood mogul LOUIS B MAYER in *Old Music* (1938). He signed her to a contract at MGM, and she made her film debut as Mrs Chipping in *Goodbye Mr Chips* (1939). She won a Best Actress Academy Award for her role as the English matriarch in *Mrs Miniver* (1942) and generally portrayed wholesome, independent women in romantic dramas like *Random Harvest* (1942), *Mrs Parkington* (1944) and *That Forsyte Woman* (1949). She played ELEANOR ROOSEVELT in *Sunrise at Campobello* (1960) and made her last film appearance in *The Happiest Millionaire* (1967). Her later stage work included *Auntie Mame* (1958) on Broadway, and she appeared on television as Aunt March in *Little Women* (1978).

Garstin, Sir William Edmund 1849–1925
English engineer
Born in India, he was educated at Cheltenham and King's College London, then became an official in the Indian public works department (1872). Transferred to Egypt in 1885, he was responsible for the plans and building of the Aswan Dam and the barrages of Asyut and Esna, compiled two valuable reports on the hydrography of the Upper Nile, initiated the geological survey of Egypt (1896) and erected the new buildings of the National Museum of Egyptian Antiquities (1902).

Garvey, Marcus Moziah Aurelius 1887–1940
US leader and advocate of black nationalism
Born in St Ann's Bay, Jamaica, he founded the Universal Negro Improvement Association (UNIA) in 1914 to foster worldwide black unity and pride and moved its headquarters from Jamaica to New York City two years later. Rejecting integration, he called for a 'back to Africa' movement, in which people of African descent from the USA and elsewhere would settle in Liberia and build a modern black state. Through his stirring oratory and his newspaper *Negro World* he became the most influential African-American leader of the early 1920s, but in 1924 the Liberian government rejected his plans for resettlement, fearing that he intended to rule the country. After the collapse of his Black Star Steamship Line, which had been financed by the sale of stock to UNIA members, he was convicted of mail fraud (1925) and deported to Jamaica (1927). He eventually died in obscurity in London.

Garvin, James Louis 1868–1947
English journalist
He was born in Birmingham, and after a spell as leader-writer for *The Daily Telegraph*, he became editor of *The Observer* (1908–42). He also edited the 14th edition of the *Encyclopaedia Britannica*, and wrote a biography of JOSEPH CHAMBERLAIN (1932–34).

Gascoigne, George c.1525–1577
English poet and dramatist
Born in Cardington, Bedfordshire, he studied at Trinity College, Cambridge, entered Gray's Inn, wrote poems, and sat in parliament for Bedford (1557–59), but was disinherited for his extravagance. He married NICHOLAS BRETON's widowed mother (to improve his finances), but, still persecuted by creditors, served in Holland under the Prince of Orange (WILLIAM I, THE SILENT) from 1573 to 1575. He collected and published his poems, and translated both prose and verse, from Greek, Latin and Italian. *The Complaynt of Phylomene*, a verse narrative in the style of OVID, was begun in 1563. *The Supposes* is from *I Suppositi* of LUDOVICO ARIOSTO, *Jocasta* (1566, with Francis Kinwelmersh) is practically a translation from Dolce's *Giocasta*, and *The Glasse of Government* (1575) is an original comedy. He also wrote *The Steele Glas*, the earliest blank-verse satire, and *Certayne Notes of Instruction on Making of Verse* (1575), the first significant English essay on the subject. 🕮 Ronald Conant Johnson, *George Gascoigne* (1972)

Gascoigne, Paul John, *known as* **Gazza** 1967–
English footballer
Born in Gateshead, Tyne and Wear, an unpredictable, at times explosive, midfielder, he was voted England's Young Player of the Year in 1988 while still with his first club, Newcastle. Transferred to Tottenham that same year for a then record sum of £2 million, he soon established himself as the creative heart of the English international team. His performances during the 1990 World Cup in Italy brought him to the attention of the Roman club Lazio, for whom he eventually signed for £5.5 million in June 1992, after an injury sustained in the 1991 FA Cup Final had delayed the move. In 1995 he moved from Lazio to Glasgow Rangers, followed by moves to Middlesbrough (1998) and Everton (2000). His spells as coach with Boston United (2004) and Kettering Town (2005) were noted for their brevity.

Gaskell, Mrs Elizabeth Cleghorn, *née* **Stevenson** 1810–65
English novelist
She was born in Cheyne Row, Chelsea, London. Her father was successively a teacher, preacher, farmer, boarding-house keeper, writer and keeper of the records to the Treasury, and she was brought up by an aunt in Knutsford – the Cranford of her stories. In 1832 she married William Gaskell (1805–84), a Unitarian minister in Manchester. There she studied working men and women, and made important contributions to what came to be known as the 'Condition of England' novel. *Mary Barton* was published anonymously in 1848, followed by *The Moorland Cottage* (1850), *Cranford* (1853), *Ruth* (1853), *North and South* (1855), *Round the Sofa* (1859), *Right at Last* (1860), *Sylvia's Lovers* (1863), *Cousin Phillis* (1865) and *Wives and Daughters* (1865). She also wrote *The Life of Charlotte Brontë* (1857). 🕮 Jenny Uglow, *Elizabeth Gaskell: A Habit of Stories* (1999)

Gaskell, Walter Holbrook 1847–1914
English physiologist
He was born in Naples, Italy, and studied physiology at Cambridge, where he came under the influence of Sir MICHAEL FOSTER. He studied with KARL LUDWIG at Leipzig University and returned to Cambridge in 1875. His initial research topic identified by physiological experimentation the nerves which control dilation of the blood vessels, and in the 1880s he turned his attention to the question of the heartbeat. His work provided convincing evidence that the muscles of the heart exhibited inherent rhythmicity, independent of external influences, which supported the 'myogenic' theory of the heart's action. He extensively examined the autonomic nervous system, which his detailed physiological work revealed to consist of two major complementary branches, the sympathetic and the parasympathetic systems. As a result of these studies, Gaskell devoted himself almost completely to the problem of vertebrate evolution for the rest of his life.

Gasperi, Alcide de *See* DE GASPERI, ALCIDE

Gass, William H(oward) 1924–
US novelist
He was born in Fargo, North Dakota, and educated at Ohio Wesleyan University, Delaware, and Cornell University. His novels include *Omensetter's Luck* (1966) and *Willie Masters' Lonesome Wife* (1971), an essay-novella, and his stories are collected as *In the Heart of the Heart of the Country* (1968). A philosopher and literary critic as well as novelist, he is linked with the Symbolists, New Critics and the Structuralists. His works in this area include *The Habitations of the Word* (1985) and *The Writer and Religion* (2000). His aesthetic theories are set out in *Fictions and the Figures of Life* (1970) and in subsequent years he engaged in public debate with fellow novelist John Champlin Gardner, Jnr (1933–82), a defender of 'moral fiction'. His massive autobiographical novel *The Tunnel* (1995) was in progress for more than 20 years. 🕮 A Saltzman, *The Fiction of William Gass: The Consolations of Language* (1986)

Gassendi or **Gassend, Pierre** 1592–1655
French philosopher and scientist
Born in Champtercier, Provence, he was ordained a priest in 1616, and became professor of philosophy at Aix University in 1617 and professor of mathematics at the Collège Royal in Paris in 1645. He was a strong advocate of the experimental approach to science and tried to reconcile an atomic theory of matter with Christian doctrine. He may be best known as an early critic of DESCARTES, but he also wrote on EPICURUS, TYCHO BRAHE and COPERNICUS. His other works include *Exercitationes Paradoxicae adversus Aristoteleos* (1624), *Institutio Astronomica* (1647) and the *Syntagma Philosophicum* ('Philosophical Treatise', published posthumously in 1658).

Gates, Bill (William Henry) 1955–
US computer scientist and businessman

Bill Gates was born in Seattle, Washington, and attended Harvard, but left without graduating. In 1975, at the age of 19, he founded Microsoft Corporation with Paul Allen, and in 1980 they licensed a computer operating system to International Business Machines (IBM) for use in the fledgling personal computer (PC) industry. This system (MS-DOS) was phenomenally successful, and updated versions of its successor, Windows, allowed Gates to maintain Microsoft's PC hegemony. He has made aggressive attempts to expand into new markets, such as his 1995 purchase of the Bettmann Archives to enable the transformation of historical photographs into digital images for use on-line, and his effort in 1996 to win a large stake in the Internet market. Gates became a billionaire by 1986 and by the turn of the century was estimated to be the world's most wealthy private individual. In 2000 Gates stepped down as chief executive officer of Microsoft, taking on the title of chief software architect. His hi-tech, ecologically friendly home on the shore of Lake Washington has been one of his few acts of conspicuous expenditure, though he has set up several charitable foundations, including the Bill & Melinda Foundation, often expressing his intention, like ANDREW CARNEGIE, to give away the vast bulk of his wealth by the time of his death. His bestselling business books include *The Road Ahead* (1995) and *Business @ the Speed of Thought* (1999). In 2006 he announced his intention to move to a part-time role within Microsoft from 2008, and to then devote his time to charity. He was awarded an honorary knighthood in 2005.

> 'How you gather, manage and use information will determine whether you win or lose.'
>
> – From *Business @ the Speed of Thought* (1999)

Gasser, Herbert Spencer 1888–1963
US physiologist and Nobel Prize winner
Born in Plattville, Wisconsin, he graduated in medicine from Johns Hopkins University in 1915, and moved in 1916 to the department of physiology at Washington University in St Louis, to rejoin JOSEPH ERLANGER, an instructor from his student years, thus beginning a fruitful collaboration in neurophysiology. Gasser and Erlanger used powerful new electrical equipment to dissect and analyse the nature and function of the nerve fibres, sharing the Nobel Prize in physiology or medicine in 1944. In 1931 Gasser moved to Cornell University as professor of pharmacology, and in 1935 he was appointed director of the Rockefeller Institute for Medical Research in New York. His personal research continued into nerve trunks and nerve fibres, having an important bearing on understanding the physiology of sensation.

Gasset, José Ortega y *See* ORTEGA Y GASSET, JOSÉ

Gates, Bill *See panel above*

Gates, Henry Louis, Jnr 1950–
US scholar, writer and critic
Born in Keyser, West Virginia, he studied history at Yale and received a PhD from Cambridge. He won a Macarthur 'genius' grant in 1981 and has held professorships at several US universities, including Harvard (1991–). Perhaps the most eminent African-American scholar since W E B DU BOIS, he has written critical works on race and identity and brought to light neglected black fiction and poetry as well as autobiographical texts such as early slave narratives. His works include *The Signifying Monkey* (1988), *Loose Cannons* (1992), *Colored People: A Memoir* (1994) and *Wonders of the African World* (1999). His essays on black life and culture are published regularly in *The New Yorker*.

Gates, Horatio 1728–1806
American Revolutionary general
Born in Maldon, England, he entered the English army, served in America under EDWARD BRADDOCK, escaped from the disaster of the Duguesne expedition (1755) and, on the peace of 1763, purchased an estate in Virginia. In the American Revolution (1775–83) he sided with his adoptive country, and in 1775 was made adjutant-general, and in 1776 commander of the army which had just retreated from Canada. In August 1777 he commanded the northern department, and compelled the surrender of the British army under JOHN BURGOYNE at Saratoga in October. This success gained him a great reputation, and he sought to supplant GEORGE WASHINGTON, the commander-in-chief. In 1780 he commanded the army of the South, but was routed by CHARLES CORNWALLIS near Camden, South Carolina. He retired to Virginia until 1790, emancipated his slaves and settled in New York, where he died. 📖 Samuel White Patterson, *Horatio Gates: Defender of American Liberties* (2005)

Gatling, Richard Jordan 1818–1903
US inventor
He was born in Money's Neck, North Carolina. He studied medicine but never practised, and is known for his invention (1861–62) of the rapid-fire 'Gatling gun', a revolving battery gun with ten parallel barrels, firing 1,200 shots a minute.

Gaudí (i Cornet), Antoni 1852–1926
Spanish architect
Born in Riudoms, Catalonia, he was apprenticed to a blacksmith, then studied architecture at the Escuela Superior de Arquitectura in Barcelona. He became the leading exponent of Catalan Modernism (a branch of the Art Nouveau movement in architecture), inspired by a nationalistic search for a romantic medieval past. Strikingly original and ingenious, he designed a number of highly individualistic and unconventional buildings, such as the Palacio Güell (1886–89) and Parque Güell (1900–14) for his chief patron, Don Basilio Güell; the Casa Batlló (1904–17) and the Casa Milá (1905–09). His most celebrated work, the ornate church of the Sagrada Familia in Barcelona, occupied him from 1884 until his death. It is still under construction. 📖 Gijs Van Hensbergen, *Gaudi: A Biography* (2001)

Gaudier-Brzeska, Henri, *originally* **Henri Gaudier** 1891–1915
French sculptor
He was born in St Jean de Braye, near Orleans. In Paris (1910) he met the Polish artist Sophie Brzeska and from 1911 they both used the hyphenated name. In 1911 they settled in London and met leading members of the British avant-garde. He became a founder member of the London Group (incorporating groups of younger artists) in 1913, and the following year signed the Vorticist manifesto. He drew inspiration from African tribal art, but rapidly developed a personal abstract style exemplified in both carvings and drawings, for example *Red Stone Dancer* (1913, Tate Collection, London), *Crouching Figure* (1913–14, Minneapolis), and *Two Men with a Bowl* (1914, bronze, National Museum of Wales, Cardiff). He was killed in action at Neuville-Saint-Vaast.

Gaudron, Mary Genevieve 1943–
Australian lawyer
She was born in Moree, New South Wales, and trained at Sydney University, where she won the law medal. She was the youngest person ever to be appointed a federal judge when she became deputy president of the Arbitration Commission (1975–80), as well as the youngest-ever Solicitor-General for New South Wales (1981–87). In 1987 she became a judge in the High Court of Australia in Canberra, the first woman to reach that position, and was appointed justice in 1991. After retiring from the High Court in 2002, she joined the International Labor Organization as a judge on the Administrative Tribunal in Geneva in 2003.

Gauguin, Paul *See panel p604*

Gaulle, Charles de *See* DE GAULLE, CHARLES

Gaultier, Jean-Paul 1952–
French fashion designer
He was born in Paris. He worked as an assistant to PIERRE CARDIN before launching his first collection in 1976. He has earned international renown for his fashions for both women and men, and is known for using unconventional models and playing with gender roles. He also designs for ballet and for film (including *The Cook, The Thief, His Wife and Her Lover*, 1989), and launched the first of a successful range of perfumes in 1993.

Gaumont, Léon Ernest 1864–1946
French cinema inventor
He synchronized a projected film with a phonograph in 1901 and was responsible for the first talking pictures, demon-

Gauguin, (Eugène Henri) Paul 1848–1903
French Post-Impressionist painter

Gauguin was born in Paris, the son of a journalist and a half-Peruvian Creole mother. He went to sea at the age of 17, but settled down in Paris in 1871 and became a successful stockbroker with a fondness for painting and for collecting Impressionist paintings. By 1883 he had already exhibited his own work with the help of CAMILLE PISSARRO and determined to devote himself entirely to art. He left his Danish wife and five children, and went to Pont Aven, Brittany, where he became the leader of a group of painters and met the painter and theorist ÉMILE BERNARD.

He travelled to Martinique (1887–88), and gradually evolved his own style, Synthetism, in accordance with his hatred of civilization and identification with the emotional directness of primitive peoples. He moved more permanently to Tahiti in 1891–1901, and from there to the Marquesas Islands. His output developed markedly from the earlier Brittany seascapes – the *Still Life with Three Puppies* (1888, Museum of Modern Art, New York), the stained-glass effects of *The Vision after the Sermon* (1888, National Gallery, Edinburgh) with its echoes of Romanesque, Japanese and Breton folk art, and the tapestry-like canvases, painted in purples, greens, dark reds and browns, of native subjects on Tahiti and at Dominiha on the Marquesas Islands, such as *No Te Aha De Riri (Why are you angry?)* (1896, Chicago), and *Faa Iheihe, decorated with ornaments* (1898, Tate, London), which echoes his great allegorical painting dashed off prior to an unsuccessful suicide attempt, *D'où venons-nous? Que sommes-nous? Où allons-nous?* ('Whence do we come? What are we? Where are we going?', 1898, Boston).

Gauguin also excelled in wood carvings of pagan idols and wrote an autobiographical novel, *Noa-Noa* (1894–1900). He is remembered not only because of the tragic choices he made, and as the subject of many popular novels (particularly SOMERSET MAUGHAM's *The Moon and Sixpence*, 1919), but because he directed attention to primitive art as a valid field of aesthetic exploration and consequently influenced almost every school of 20th-century art.

📖 B Thomson, *Gauguin* (1987).

> 'Some advice: do not paint too much after nature. Art is an abstraction; derive this abstraction from nature while dreaming before it, and think more of the creation which will result than of nature.'
>
> – From a letter to Emile Schuffenecker (1888).

strated at the Académie des Sciences in Paris in 1910, and at the Royal Institute, London, in 1912. Also in 1912, he introduced an early form of coloured cinema-film, using a three-colour separation method with special lenses and projectors.

Gaunt, John of *See* JOHN OF GAUNT

Gauss, (Johann) Carl Friedrich 1777–1855
German mathematician, astronomer and physicist
Born in Brunswick to poor parents, he came to the notice of the Duke of Brunswick, who paid for his education at the Collegium Carolinum, Brunswick, and the University of Göttingen. A notebook kept in Latin by him as a youth and discovered in 1898 showed that, from the age of 15, he had conjectured and often proved many remarkable results, including the prime number theorem. In 1796 he announced that he had found a ruler and compass construction for the 17-sided polygon, and in 1801 published his *Disquisitiones arithmeticae*, containing wholly new advances in number theory. The same year he was the first to rediscover the asteroid Ceres, found by GIUSEPPE PIAZZI in 1800 and since lost behind the Sun. In 1807 he became director of Göttingen Observatory, while studying celestial mechanics (on which he published a treatise in 1809), and statistics, in which he was the first to use the method of least squares. From 1818 to 1825 he directed the geodetic survey of Hanover, and this and his astronomical work involved him in much heavy routine calculation, leading to his study of the theory of errors of observation. He also worked on pure mathematics, including differential equations, the hypergeometric function, the curvature of surfaces, four different proofs of the fundamental theorem of algebra, six of quadratic reciprocity and much else in number theory. In physics he studied the Earth's magnetism and developed the magnetometer in conjunction with WILHELM EDUARD WEBER, and gave a mathematical theory of the optical systems of lenses. Manuscripts unpublished until long after his death show that he had made many other discoveries, including the theory of elliptic functions that had been published independently by NIELS HENRIK ABEL and CARL GUSTAV JACOBI, and had come to accept the possibility of a non-Euclidean geometry of space, first published by JÁNOS BOLYAI and NIKOLAI LOBACHEVSKI in the 1820s. 📖 W K Bühler, *Gauss: A Biographical Study* (1981)

Gautama, *also known as* **Gotama** 1st century AD
Indian philosopher
Born in Bihar, he founded *Nyaya*, one of the six classical systems of Hindu philosophy. His *Nyaya Sutras* are principally concerned with ways of knowing and of reaching valid logical conclusions. They are thought to have been written in the 1st century AD, though tradition maintains Gautama lived in the 3rd century BC. Their claim that one can obtain real knowledge of the external world was disputed by Śriharsha and the *Navya-nyaya* school founded by GANGEŚA.

Gautier, Hubert 1660–1737
French civil engineer
Born in Nîmes, he was one of the first to recognize the importance of applying scientific principles to the design and execution of engineering works. After nearly 30 years as chief government engineer of the province of Languedoc, he was appointed inspector of the newly created Corps des Ponts et Chaussées in 1716, responsible for virtually all public works throughout France. At the time he had just published the two classic textbooks *Traité des chemins* (1715, Eng trans *Treatise on the Constructions of Roads in France*) and *Traité des Ponts* (1716, Eng trans *Treatise on Bridges*), in which he summarized ancient and contemporary engineering practice, emphasizing the importance of strict supervision, careful testing of materials, and observance of the principles of structural mechanics. One of the most important of his recommendations was to reduce the width of bridge piers in order to avoid excessive obstruction of waterways and the creation of dangerously high water levels in times of flood.

Gautier, Théophile 1811–72
French poet and novelist
Born in Tarbes, Gascony, he turned from painting to literature, and became at first an extreme Romantic. In 1830 he published his first long poem, *Albertus*, and in 1832 the *Comédie de la mort* ('The Comedy of Death'). His best remembered collection, *Émaux et camées* (1856, 'Enamels and Cameos'), marked a turning away from Romanticism towards the Parnassian school of poetry. His celebrated novel *Mademoiselle de Maupin*, with its defiant preface, appeared in 1835. He wrote many other novels, short stories, theatrical criticisms, articles on the Salon, and *Ménagerie intime* (1869), a kind of informal autobiography. His daughter Judith Gautier (1845–1917) wrote novels, plays, poems and translations. 📖 Maxime Du Camp, *Theophile Gautier* (2001)

Gavaskar, Sunil Manohar, *nicknamed* **the Little Master** 1949–
Indian cricketer
Born in Bombay and educated at St Xavier's College and Bombay University, he became one of the most prolific run-scorers in Test cricket history. The perfection of his style as well as his short stature earned him his nickname. He played in 125 Test matches for India from 1971 to 1997, and scored 10,122 runs, including a record 34 Test centuries. He was the first player to score more than 10,000 Test runs. His son Rohan (1976–) has represented India in limited-overs cricket.

Gawain Poet, The fl.c.1370
Anonymous English poet
He is the presumed author of *Cleanness*, *Patience*, *Pearl* and *Sir Gawain and the Green Knight*, the Arthurian masterpiece after which he is named. All four poems, written in the same north-of-England dialect, are found together in a single surviving manuscript. Each of the shorter poems has an explicitly religious theme: *Cleanness* discusses spiritual purity with reference to several biblical episodes, *Patience* is the retold tale of JONAH and the whale, and *Pearl* is a dream-poem of the afterlife. *Gawain* itself is a richer, longer, less overtly didactic work: the story of one of King ARTHUR's knights and a threatening stranger who comes to Camelot, it can be read as a straightfor-

ward adventure or as a quest for spiritual knowledge. Either way it is one of the most remarkable works in the history of English poetry.

Gay, John 1685–1732
English poet
Born in Barnstaple, Devon, he was educated at Barnstaple Grammar School, and apprenticed to a silk mercer in London, but soon returned home to write. In 1708 he published his first poem, *Wine*, and in 1711 a pamphlet on the *Present State of Wit*. Appointed secretary to the Duchess of Monmouth (1712), in 1713 he dedicated to POPE the georgic *Rural Sports*. In 1714 he published *The Fan* and *The Shepherd's Week*, and accompanied Lord Clarendon, envoy to Hanover, as secretary. With Pope and JOHN ARBUTHNOT, he wrote the play *Three Hours after Marriage* (1717), and in 1727 he produced the first series of his popular *Fables*. His greatest success was *The Beggar's Opera* (1728), set to music by JOHANN PEPUSCH, the outcome of a suggestion made by JONATHAN SWIFT in 1716. Running for 62 performances, it attained unprecedented popularity. He wrote another opera, *Achilles* (produced posthumously in 1733). He was buried in Westminster Abbey, London. 🕮 David Nokes, *John Gay, a Profession of Friendship: A Critical Biography* (1995)

Gaye, Marvin 1939–84
US soul singer
Born in Washington, DC, the son of a clergyman, he started singing and playing the organ in church and at 15 joined the 'doo-wop' group The Rainbows. Moving to Detroit, he signed a recording contract with the Tamla Motown company in 1961 after the company's founder BERRY GORDY, JNR, had heard him singing at an informal party. Most of his early recordings were in the 'beat ballad' idiom, although there were notable exceptions, including the dance-oriented 'Hitch Hike' and the twelve-bar blues of 'Can I Get A Witness'. 'I Heard It through the Grapevine' (1968) was his last standard Motown recording and from 1970, despite arguments with the company management, he adopted a more independent attitude towards recording. *What's Going On* (1971) was a concept album that showed a fluidity and intelligence far removed from his previous teen ballad hits. Subsequent albums included *Here My Dear* (1979), *In Our Lifetime* (1981) and *Midnight Love* (1982). He was killed by a gunshot during a quarrel with his father.

Gay-Lussac, Joseph Louis 1778–1850
French chemist and physicist
Born in Saint-Léonard, Haute Vienne, he was educated at the École Polytechnique and the École des Ponts et Chaussées. He became assistant to CLAUDE LOUIS BERTHOLLET in 1800 and subsequently held various posts, including professor of chemistry at the École Polytechnique (from 1809), professor of physics at the Sorbonne (1809–32), professor of chemistry at the National Museum of Natural History (from 1832), superintendent of the government gunpowder factory (from 1818) and chief assayer to the Mint (from 1829). He became an Academician (1806), member of the Chamber of Deputies (1831) and member of the Upper House (1839). He was elected an honorary Fellow of the Chemical Society in 1849. His earliest research work was on the expansion of gases with temperature increases, and he discovered independently the law which in Great Britain is commonly known as CHARLES's law. In 1804 he made balloon ascents in association with JEAN BAPTISTE BIOT to make magnetic and atmospheric observations, and he travelled with Baron ALEXANDER VON HUMBOLDT (1805–06), making measurements of terrestrial magnetism. In 1808 he published his important law of gas volumes. This was based on work which he had begun with Humboldt in 1805. From around 1808 Gay-Lussac's work became more purely chemical, and much of it was done in collaboration with LOUIS JACQUES THÉNARD. Their work included the isolation and investigation of sodium, potassium, boron and silicon, extensive studies of the halogens (involving controversy with Sir HUMPHRY DAVY) and the improvement of methods of organic analysis. His last great pure research was on prussic acid and cyanogen and their derivatives. During the later part of his career he did much work as a technical adviser to industry. 🕮 Maurice Crosland, *Gay-Lussac, Scientist and Bourgeois* (1978)

Gaynor, Janet, *originally* **Laura Gainor** 1906–84
US actress
Born in Philadelphia, Pennsylvania, she was educated in San Francisco then moved to Los Angeles, hoping to break into the film industry, and working as a bookkeeper and usherette before securing work as an extra. After various small comedy roles she made her first notable appearance in *The Johnstown Flood* (1926). She then went on to win the first-ever Best Actress Academy Award for a trio of performances in *Sunrise* (1927), *Seventh Heaven* (1927) and *Street Angel* (1928). She became a major star in the 1930s, and her many successes include *State Fair* (1933) and *A Star Is Born* (1937). She retired in 1938, making a one-off return to the screen in *Bernadine* (1957). She occasionally performed on television and the stage, and her later theatre work included *Harold and Maude* (1980) on Broadway.

Gayoom, Maumoon Abdul 1937–
Maldivian politician
Educated at the Al-Azhar ur Cairo, he lectured in Islamic studies at the American University, Cairo (1967–69) and Nigeria University (1969–71). He returned to the Maldives to head the government shipping (1972–73) and telephone (1974) departments, before being appointed special under-secretary to prime minister Ahmed Zaki in 1974. Between 1975 and 1978 he held a variety of diplomatic and ministerial posts, before succeeding Ibrahim Nasir as executive president and minister of defence in 1978. He was re-elected president in 1983 and 1988. Soon after the 1988 re-election a coup led by the exiled businessman Abdullah Luthufi was foiled by Indian paratroops. Gayoom then continued his programme of rural development and non-alignment. In 2003 he was re-elected to his sixth term of office; he gave up the positions of defence and finance minister in 2004.

Gazza *See* GASCOIGNE, PAUL JOHN

Gdlyan, Telman Khorenovich 1940–
Russian lawyer
Of Armenian extraction, with NIKOLAI IVANOV he helped to expose misdemeanours in Uzbekistan involving the late LEONID BREZHNEV's son-in-law. He then proceeded to attack other figures such as YEGOR LIGACHEV but encountered hostility even among MIKHAIL GORBACHEV's supporters. He and Ivanov were very popular with the public, and they certainly undermined Communist credibility. In 1989 he was elected to the new Congress of USSR People's Deputies with the largest majority in the polls. He served as an independent deputy in the Duma (1995–99).

Geber 14th century
Spanish alchemist
Nothing is known about him except his name as the author of books on chemical and alchemical theory and practice. He took the name 'Geber' (Latin for 'Jabir') from ABU MUSA JABIR IBN HAYYAN, a famous Islamic alchemist and physician of the 8th century. It was through Geber's works that the discoveries of the early Arab chemists, along with many basic laboratory techniques, were relayed to Europe. His works, written in Latin, were translated into several languages and continued to be influential until the 16th century. Because of their clarity, and in many respects their accuracy, they helped to make alchemy more respectable.

Gebrselassie, Haile 1973–
Ethiopian athlete
Born in Arsi, he had to run ten kilometres each day to and from school and attracted international attention in 1992 when he won the 5,000-metres and 10,000-metres events at the world junior championship. Subsequently he established himself as the greatest long-distance runner ever, including among his triumphs 15 track world records, four world titles in the 10,000 metres (1993, 1995, 1997 and 1999) and gold medals in the same event at the Olympic Games of 1996 and 2000. He also distinguished himself at shorter distances, winning the 3,000 metres at the world indoor championships in 1997 and the 1,500-metres and 3,000-metres world indoor championships double in 1999. Since leaving track athletics after the 2004 Olympics, he has focused on road races, winning the Berlin Marathon in 2006.

Geddes, Jenny c.1600–c.1660
Scottish vegetable-seller
She is traditionally reputed to have started the riots in St Giles' Cathedral, Edinburgh, when Archbishop LAUD's prayer book was introduced on Sunday, 23 July 1637. According to the popular legend she threw her folding stool at Bishop Lindsay, shouting: 'Thou false thief, dost thou say mass at my lug?' There is no historical evidence of this. Sydserf in 1661 mentions 'the immortal Jenet Geddes' as having burned 'her leather chair of state' in a Restoration bonfire, and the story appears in full detail in EDWARD PHILLIPS's continuation of Sir Richard Baker's *Chronicle* (1660).

Geddes, Norman Bel 1893–1958
US designer and architect
Born in Adrian, Michigan, he first won acclaim for his theatrical designs in New York City, discarding ornamentation in favour of simple, functional sets. He was known for popularizing the concept of 'streamlining', and in the 1930s his sleek, rounded designs for radios and refrigerators as well as for skyscrapers were highly influential.

Geddes, Sir Patrick 1854–1932
Scottish biologist, sociologist and pioneer of town planning
Born in Ballater, Aberdeenshire, he was educated at Perth Academy and University College London (under T H HUXLEY), and became professor of botany at Dundee (1889–1914). Taking the theory of evolution as a basis for ethics, history and sociology, he wrote *The Evolution of Sex* (1889). In 1892 he established the 'world's first sociological laboratory' in the Outlook Tower on Castlehill, Edinburgh, to demonstrate regional differentiation. He also wrote *City Development* (1904) and *Cities in Evolution* (1915), in which he coined the terms 'megalopolis' and 'kakatopia'. After World War I he was professor of civics and sociology at Bombay University (1920–23), and in 1924 moved to France and established an unofficial 'Scots College' at Montpellier.

Geer, Gerhard Jacob de, Baron 1858–1943
Swedish Quaternary geologist
Born in Stockholm, the son of LOUIS GERHARD DE GEER, he was educated at Uppsala. He later worked as professor of geology there (1897–1924), before founding the Geochronological Institute of the University of Stockholm, serving as its first director from 1924. He was an MP from 1900 to 1905. He devised a novel and valuable method for dating deposits by comparing sequences of varves (the annual deposits of sediment under glacial meltwater). He was able to decipher an annual chronology reaching back 15,000 years from the present day. He successfully correlated the Swedish varve sequence with others from elsewhere, demonstrating global climatic events and greatly advancing knowledge of the most recent ice age. The method was eventually enhanced by the use of increasingly sophisticated radioisotope methods.

Geer, Louis Gerhard de 1818–96
Swedish politician
In 1858 he was appointed minister of justice, a post which made him in effect prime minister, and which he held until 1870. He was largely responsible for the replacement in 1866 of the diet of four estates (nobles, clergy, burghers and peasants) with a parliament of two houses, one indirectly elected through county councils and one directly elected on a narrow franchise. He was appointed prime minister (the title being then accepted) in 1876, but resigned four years later after defeat in parliament.

Geertgen Tot Sint Jans c.1460–c.1490
Dutch painter
He was born in Leyden. Little is known about his life. His name means 'little Gerard of the Brethren of St John' and he worked for this religious order in Haarlem. Only about 15 paintings are now attributed to him. These works, mostly fragments of larger altarpieces, and all religious in subject, are characterized by strong colours, convincing landscape and highly individual figures.

Geertz, Clifford James 1926–2006
US cultural anthropologist
Born in San Francisco, he studied at Antioch College and Harvard, and was professor of anthropology at the University of California (1958–60) and at Chicago (1960–70), before becoming professor of social science at Princeton's Institute of Advanced Study (1970). He carried out fieldwork in Java (1952–54) and Bali (1957–58), which resulted in a series of works on environment and economy, social change and religion. These include *The Religion of Java* (1960), *Agricultural Involution* (1963) and *Person, Time and Conflict in Bali* (1966). In the 1960s and 1970s he made several field trips to Morocco, from which he developed a comparative approach to religion, as in *Islam Observed* (1968), and to processes of social change. His eloquent theoretical essays on topics ranging from art and ideology to politics and nationalism, collected in *The Interpretation of Cultures* (1973) and *Local Knowledge* (1983), were particularly influential. In these he advocated an interpretative stance, in which cultures are compared to literary texts. Other publications include *Works and Lives: The Anthropologist as Author* (1988), for which he won the National Book Critics Circle award for criticism, and his memoir, *After the Fact* (1995).

Gegenbaur, Karl 1826–1903
German comparative anatomist
Born in Würzburg, he studied medicine at the university there. He became professor at Jena University in 1856 and at Heidelberg University in 1873. He won a towering contemporary reputation for his knowledge of vertebrate musculature and expertise in comparative anatomy and morphology. On this basis he became one of the leading German advocates of evolutionary theory. His chief work, *Comparative Anatomy* (Eng trans 1878), threw much light on the evolution of the skull from his study of cartilaginous fishes.

Gehlen, Arnold 1904–76
German philosopher and sociologist
He was born in Leipzig. He is particularly associated with 'philosophical anthropology', which tried to connect coherently biological, cultural and philosophical aspects of human nature. His most important works are *Der Mensch: seine Natur und seine Stellung in der Welt* (1940, 'The Nature of Man and His Place in the World'), *Urmensch und Spätkultur* (1956, 'Primeval Man and Modern Culture'), *Die Seele im technischen Zeitalter* (1960, 'The Soul in the Age of Technology') and *Moral und Hypermoral* (1965, 'Morals and Hypermorals').

Ge Hong (Ko Hung) c.280–340 AD
Chinese alchemist
Born near Nanjing (Nanking), he was educated in the literary and philosophical traditions of his country, and became a successful and stern military commander. His most famous book, *Bao-pu zi* ('He Who Holds to Simplicity'), was the result of his travels and study with several teachers. It contains accounts of methods of producing solutions of minerals (including cinnabar and gold) in order to make immortality elixirs. He also describes the apparent production of gold from other metals. Some of his claims can be understood in terms of modern chemistry.

Gehrig, Lou (Henry Louis), *nicknamed* **the Iron Horse** 1903–41
US baseball player
Born in New York City, he earned his nickname through his endurance. His record number of 2,130 consecutive major league games for the New York Yankees (1925–39) stood for 56 years before being beaten by CAL RIPKEN, and he was voted Most Valuable Player (MVP) four times (1927, 1931, 1934, 1936). His career was cut short by motor neurone disease (now also known as Lou Gehrig's disease). The story of his life was told in the film *Pride of the Yankees* (1942). 🕮 R Robinson, *Iron Horse* (1990)

Gehring, Walter Jacob 1939–
Swiss geneticist
Born in Zurich, he was educated at the universities of Zurich and Yale, where he was associate professor of anatomy and molecular biophysics from 1969 to 1972. Since 1972 he has been professor of genetics and developmental biology at the University of Basel. His career has mainly been concerned with the genetics of the fruit fly: in the mid-1980s he discovered the short DNA sequence, called the homeobox, which controls genetic mutation and development in the insect. It was later found that similar control sequences occur in mammals, thus encouraging new lines of research to understand the molecular biology of such major developmental pathways. In 1995 he identified the gene which controls the development of the eye in all animals. He received the Balzan Prize for Developmental Biology in 2002.

Gehry, Frank 1929–
US–Canadian architect
Born in Toronto, Canada, he settled in Los Angeles with his family in 1947, and after studying architecture at the University of Southern California (1954), he studied city planning at the Harvard Graduate School of Design. He established his own firm, Frank O Gehry and Associates, in Los Angeles in 1962, and he soon became known for his playful, almost surreal designs using inexpensive materials such as chain-link fencing, plywood and raw concrete. Despite his irreverent temperament and his penchant for treating buildings as sculpture, he favours the abstraction of modernist architecture over the eclectic borrowings of post-modernism, and incorporates historical references into his work only when they are directly appropriate to their surroundings. Thus his recent ING Office Building (1996) in Prague is topped with twisting stainless-steel globes in homage to the onion-topped domes of that city. Other important works include the Los Angeles Children's Museum (1980), the California Aerospace Museum (1984) in

Los Angeles, the American Center (1994) in Paris, the Guggenheim Museum in Bilbao (1997) and the Walt Disney Concert Hall in Los Angeles (2003).

Geiger, Hans Wilhelm 1882–1945
German physicist
Born in Neustadt-an-der-Haardt, he was educated at the University of Erlangen, where he received his PhD in 1906. He then worked under ERNEST RUTHERFORD at Manchester (1906–12). With Rutherford he devised a means of detecting alpha particles (1908), and subsequently showed that two α-particles are emitted in the radioactive decay of uranium. With J M Nuttall he demonstrated the linear relationship between the logarithm of the range of α-particles and the radioactive time constant of the emitting nucleus, now called the Geiger–Nuttall rule. In 1912 he became head of the Physikalisch-Technische Reichsanstalt in Berlin, and in 1925 professor at Kiel University. There, he and Walther Müller made improvements to the particle counter, resulting in the modern form of the Geiger–Müller counter, which also detects electrons and ionizing radiation.

Geijer, Erik Gustav 1783–1877
Swedish poet and historian
Born in Ransäter, Värmland, he studied at Uppsala, and was appointed professor of history there in 1817. A founder in 1811 of the Gothic Society and its journal, *Iduna*, in which he published much of his best poetry, he had a profound influence on both literature and historiography in Sweden, promoting a Romantic aesthetic. Among his works are *Impressions of England* (1809–10, Eng trans 1932) and a *History of the Swedish People* (1832–36), both of which are included in *Samlade Skrifter* (13 vols, 1849–82). He was also the first person to make a full Swedish translation of a SHAKESPEARE play, *Macbeth* (1815). 🕮 S Stolpe, *Geijer. En essay* (1947)

Geikie, Sir Archibald 1835–1924
Scottish geologist
Born in Edinburgh and educated at the university there, he was appointed to the Geological Survey in Scotland in 1855 and in 1867 he became its director. From 1871 to 1881 he was professor of geology at Edinburgh University. He subsequently became director-general of HM Geological Survey (from 1882) and also head of the Geological Museum of London. He undertook notable work on the Old Red Sandstone, volcanic geology and the scenery of Scotland, and did much to encourage microscopic petrography. He was elected FRS at the young age of 29 and knighted in 1907. His brother James Geikie (1839–1915) was also an accomplished geologist and prehistorian who became professor of geology at Edinburgh University (1882–1914).

Geikie, Walter 1795–1837
Scottish printmaker and painter
Born in Edinburgh, he could neither hear nor speak and was taught to read and write by THOMAS BRAIDWOOD. Best known for his scenes of everyday life, he was influenced by his contemporary DAVID WILKIE, but unlike Wilkie he remained in Edinburgh, and his topographical drawings of the city provide the most vivid image of life there at that time. Although he was a painter, his most notable work is a collection of etchings published posthumously under the title *Sketches of Scottish Life and Character*.

Geisel, Ernesto 1908–96
Brazilian general and dictator
He was born in Rio Grande do Sul. He became prominent in the administrations of JÂNIO DA SILVA QUADROS and HUMBERTO DE ALENCAR CASTELO BRANCO during the 1960s, took part in the coup that overthrew JOÃO GOULART in 1964, and from 1969 to 1974 was director of Petroleo Brasileiro (Petrobras), helping the expansion of the country's oil industry. His ascendancy in 1973–74 was largely due to his brother Orlando's control of the military and saw the re-emergence of Golberi de Couto e Silva, nemesis of the hardliners who believed in an uncompromising dictatorship. While Geisel was president (1974–79), he and Golberi successfully masterminded a return to a regime in which the military acted in their traditional role as a moderating power. His support for the presidential nominee Tancredo Neves (1910–85) in early 1985 was decisive in persuading the army to acquiesce in a return to democratic civilian rule.

Geissler, Heinrich 1814–79
German inventor
Born in Saxony, he became a glass-blower and settled in Bonn in 1854. The 'Geissler tube', by which the passage of electricity through rarefied gases can be seen, and the 'Geissler mercury pump' are among his inventions.

Geitel, Hans Friedrich 1855–1923
German physicist
He was born in Brunswick, and published almost all his work with JULIUS ELSTER. They invented the first practical photoelectric cell, a photometer and a TESLA transformer. Geitel received honorary doctorates from the universities of Göttingen and Brunswick, and after his retirement he was made an honorary professor at Brunswick.

Gelasius I, St 5th century–6th century
African pope
Born in Africa, he was pope from AD 492 to 496, and was one of the earliest bishops of Rome to assert the supremacy of the papal chair. He repressed Pelagianism, renewed the ban against the oriental patriarch, drove out the Manichaeans from Rome, and wrote against the Eutychians and Nestorians.

Gelasius II, *originally* **John of Gaeta** 11th century–12th century
Italian pope
Born in Gaeta, Kingdom of Naples, he was a cardinal and chancellor under URBAN II and Paschal II. On the death of the latter in 1118, he was chosen pope by the party hostile to the Emperor HENRY V. Gelasius fled to Gaeta to escape the advancing imperialists, and excommunicated Henry and Gregory VIII, the antipope Henry had set up. Shortly afterwards he was able to return to Rome, but in the same autumn had to flee to France.

Gelder, Aert de, *also spelt* **Arent de** 1645–1727
Dutch painter
Born in Dordrecht, where he spent most of his life, he was one of the last pupils of REMBRANDT in Amsterdam in the 1660s. A devoted follower of his master, he continued to paint in the broad-brushed late-Rembrandt style for the rest of his life, long after it had gone out of fashion. Most of his output was portraits and religious canvases, such as a series on the Old Testament book Esther (1680–87) and *Jacob's Dream* (1710–15, Dulwich Picture Gallery, London).

Geldof, Bob 1951–
Irish rock musician and philanthropist
Born in Dublin and educated at Black Rock College, he worked in Canada as a pop journalist then returned home in 1975 to form the punk group The Boomtown Rats (1975–86). Moved by television pictures of famine-stricken Ethiopia, he established the pop charity Band Aid Trust in 1984. This raised £8 million for African famine relief through the release of the record 'Do They Know It's Christmas?'. In 1985, simultaneous 'Live Aid' charity concerts were held in London and Philadelphia, which, transmitted by satellite throughout the world, raised a further £48 million. Geldof was awarded an honorary KBE in 1986, as well as a variety of international honours. Further charitable events followed, including the 'Live 8' project (2005), part of the Make Poverty History campaign. From 1986 to 1996 he was married to Paula Yates (1959–2000), with whom he had three daughters.

Gelfand, Izrail Moiseyevich 1913–
Russian mathematician
Born in Krasnye Okny, he studied in Moscow, and became professor at Moscow State University (1940–91). The leader of an important school of Soviet mathematicians, he has worked mainly in BANACH algebras, the representation theory of LIE groups (important in quantum mechanics), and in generalized functions, used in solving the differential equations that arise in mathematical physics. In particular, his work has been used in symmetry theories for fundamental particles. He has also contributed to the life sciences through his mathematical studies of neurophysiology and cell biology. He has been awarded the Order of Lenin three times, and won jointly the first Wolf Prize in mathematics (1978).

Gellert, Christian Fürchtegott 1715–69
German poet and moralist
Born in Hainichen, Saxony, he was educated at Leipzig, and in 1751 became a professor there. He was a prolific writer of stories and fables, and two of his comedies, *Das Los in der Lotterie* (1746, 'The Lottery Ticket') and *Die kranke Frau* (1747, Eng trans *The Sick Wife*, 1928), were popular favourites. His moralistic novel *Leben der schwedischen Gräfin von G* (1747–48, Eng trans *The History of the Swedish Countess of G*, 1757) shows the influence of SAMUEL RICHARDSON. 🕮 L Spriegel, *Der Leipziger Goethe und Gellert* (1934)

Gellhorn, Martha Ellis 1908–98
US journalist and writer
Born in St Louis, Missouri, and educated at Bryn Mawr College, she became a foreign correspondent for *Collier's Weekly*, covering, among other things, the Spanish Civil War. She almost certainly saw more violent action than her first husband, ERNEST HEMINGWAY. Her interest in human conflict remained undimmed and she continued to report on wars in Java (1946), Vietnam (1966), the Middle East (1967) and Central America (1983–85). Her earlier reportage was collected in *The Face of War* (1959). Her novels include *What Mad Pursuit* (1934), *A Stricken Field* (1939), *Liana* (1943) and *The Wine of Astonishment* (1948). The short stories in *The Trouble I've Seen* (1936), *The Honeyed Peace* (1953), *Two by Two* (1958) and *The Weather in Africa* (1978) are marked by acute observation, and contain sympathy for the weak or oppressed and moral straightforwardness. 🕮 Caroline Moorhead (ed), *The Letters of Martha Gellhorn* (2006)

Gellius, Aulus c.123–c.165 AD
Roman writer
Born probably in Rome, where he practised law, he studied philosophy in Athens, and there began to collect the material for *Noctes Atticae* ('Attic Nights'), a collection of dinner-table conversations on literature, history, law, antiquities and miscellaneous subjects. The value of *Noctes Atticae* is chiefly in the numerous quotations it gives from Greek and Roman books which would otherwise be completely unknown.

Gell-Mann, Murray 1929–
US theoretical physicist and Nobel Prize winner
Born in New York City, he went to Yale when he was only 15 years old, and graduated in 1948. He gained his PhD from the Massachusetts Institute of Technology (MIT), spent a year at the Institute of Advanced Studies in Princeton, then joined the Institute for Nuclear Studies at Chicago University, where he worked with ENRICO FERMI. He became professor of theoretical physics at the California Institute of Technology (Caltech) in 1956 then Robert Andrews Professor of Theoretical Physics (1967–93), now emeritus. When he was 24 he made a major contribution to the theory of elementary particles by introducing the concept of 'strangeness', a new quantum number which must be conserved in any so-called 'strong' nuclear interaction event. Gell-Mann and Yuval Ne'eman (independently) used 'strangeness' to group mesons, nucleons (neutrons and protons) and hyperons, and thus they were able to form predictions in the same way that DMITRIMENDELEEV had about chemical elements. The omega-minus particle was predicted by this theory and observed in 1964. Gell-Mann and GEORGE ZWEIG introduced the concept of quarks, which have one-third integral charge and baryon number. (The name 'quark' is an invented word, associated with a line in JAMES JOYCE's *Finnegans Wake*.) Six quarks have been predicted, named Up, Down, Strange, Charmed, Bottom and Top. For this work he was awarded the Nobel Prize in physics in 1969. Since 1984, when he founded the Santa Fe Institute for the purpose, he has concentrated on complexity theory and is a supporter of superstring theory. In 1994 he published *The Quark and the Jaguar*. 🕮 George Johnson, *Strange Beauty: Murray Gell-Mann and the Revolution in 20th Century Physics* (2000)

Gemayel, Amin 1942–
Lebanese politician
Son of PIERRE GEMAYEL and brother of BACHIR GEMAYEL, he trained as a lawyer. He supported Bachir in the 1975–76 civil war, and was his successor to the presidency in 1982. A member of the Kataeb Party and a political moderate, he initially proved no more successful in determining a peaceful settlement of the problems of Lebanese government. In 1988 his presidency came to an end and no obvious Maronite Christian successor, as required by the constitution, was apparent until the appointment of Rene Muawad and then ELIAS HRAWI in 1989. Gemayel left Lebanon and lived abroad for twelve years until 2000, when he returned to organize the opposition to Emile Lahoud and pro-Syrian interests, and founded the Kataeb al-Qaida party. Following the 2006 assassination of his son Pierre (1972–), a Kataeb Party MP, Gemayel stated his belief that a pro-Syrian group had been behind the killing. 🕮 Matthew S Gordon, *The Gemayels* (1988)

Gemayel, Bachir 1947–82
Lebanese army officer and politician
He was the brother of AMIN GEMAYEL and his father was PIERRE GEMAYEL. He joined the militia of his father's Phalangist Party at the age of eleven, and was later appointed the party's political director in the Ashrefieh sector of East Beirut. He was an active leader of the Christian militia in the 1975–76 civil war, and led the military forces of East Beirut. His evident distancing of his party from Israeli support, and wish to expel all foreign influence from Lebanese affairs, effected his election as president in 1982. Having twice escaped assassination, he was killed in a bomb explosion while still president-elect. 🕮 Matthew S Gordon, *The Gemayels* (1988)

Gemayel, Sheikh Pierre 1905–84
Lebanese politician
The father of AMIN GEMAYEL and BACHIR GEMAYEL, he was a member of the Maronite Christian community of Lebanon, and was educated at the University of St Joseph, Beirut, and Cochin Hospital, Paris, where he trained as a pharmacist. In 1936 he founded the Kataeb or Phalangist Party, modelled on the Spanish and German fascist organizations, and in 1937 became its leader. He was twice imprisoned, in 1937 and in 1943, the year in which he organized a general strike. He held various ministerial posts (1960–67), and led the Phalangist militia in the 1975–76 civil war. 🕮 Matthew S Gordon, *The Gemayels* (1988)

Gems, Pam (Iris Pamela), *née* **Price** 1925–
English dramatist
She was born in Bransgore, Hampshire. Among her best-known plays are *Piaf* (1978) and *Camille* (1984), portraying women as victims in worlds ruled by men. She had written several radio and television scripts and stage plays before the mid-1970s, but it was *Dusa, Fish, Stas and Vi*, staged in London in 1975, which brought her widespread recognition. A study of the lives of four contemporary women, it was a courageous piece of feminist drama. Other plays include *The Danton Affair* (1986), dealing with the conflict between DANTON and ROBESPIERRE; a musical stage adaptation of the 1930 film *The Blue Angel* (1991); *Deborah's Daughter* (1994); translations including CHEKHOV's *The Seagull* (1994); and *Stanley* (1996), about the painter STANLEY SPENCER, for which she won an Olivier award.

Geneen, Harold Sydney 1910–97
US accountant and industrialist
Born in Bournemouth, England, he worked as a clerk for a firm of Wall Street stockbrokers (1926–32) while studying at night to obtain a degree from New York University. He became a director of International Telephone and Telegraph (ITT) in 1959, taking on the role of chairman in 1964. He stepped down as chief executive in 1977, having seen the annual sales of the company rise from $766m to $22,000m in a 17-year period. He published his views on management in his book *Managing* (1984).

Genet, Edmond Charles, *known as* **Citizen Genet** 1763–1834
French diplomat
Born in Versailles, the son of a diplomat, he entered the foreign service at a young age. As French Revolutionary Minister to the USA (1793–94), he sought to draw the USA into France's war against Great Britain and Spain. After he outfitted privateers to attack British ships and attempted to raise troops against Spanish Florida, President GEORGE WASHINGTON demanded his recall. Realizing that he faced arrest in the Reign of Terror if he returned to France, Genet chose to stay in the USA as a citizen and farmer.

Genet, Jean 1910–86
French author
Born in Paris, he spent many years in reformatories and prisons, in France and abroad, for theft, male prostitution and other crimes, and began to write in 1942 in Fresnes prison, where he was serving a life sentence. His first novel, *Notre-Dame des fleurs* (1944, Eng trans *Our Lady of the Flowers*, 1949), portraying his world of homosexual men and criminals in a characteristically ceremonial and religious language, created a sensation. Later novels include *Miracle de la rose* (1946, Eng trans *Miracle of the Rose*, 1965) and *Pompes funèbres* (1947, Eng trans *Funeral Rites*, 1969). In 1948 he was granted a pardon by the president after a petition by French intellectuals, and JEAN-PAUL SARTRE's book *Saint Genet* (1952, Eng trans 1963) later spread his fame among the intelligentsia. On release from prison he was associated with revolutionary movements in many countries. Several plays, including *Les Bonnes* (1946, Eng trans *The Maids*, 1954), *Les Nègres* (1958, Eng trans *The Blacks*, 1960) and *Les Paravents* (1961, Eng trans *The Screens*, 1962), and poems, such as 'Les Condamnés à mort' (1942, 'Those Condemned to Death') and 'Chants Secrets' (1947, 'Secret Songs'), share the criminal underworld setting and profoundly pessimistic outlook of the novels. His autobiography, *Le Journal du voleur*, was published in 1949 (Eng trans *Thief's Journal*, 1954). 🕮 Jean-Paul Sartre, *Saint Genet: Actor and Martyr* (1963); Stephen Barber, *Jean Genet* (2004)

Genghis Khan, *also spelt* **Jingis, Chingis, Chinghiz** or **Chingiz**, *originally* **Temujin** c.1162–1227
Mongol warrior and ruler

Genghis Khan was born in Deligun Bulduk on the River Onon, the son of a Mongol chief. He was called at 13 to succeed his father, and faced a long and hard struggle against hostile tribes to establish his authority. Continued success stimulated his ambition, and he spent six years in subjugating the Naimans between Lake Balkhash and the Irtysh, and in conquering Tangut, south of the Gobi Desert. The Turkish Uigurs voluntarily submitted, and from them the Mongols derived their civilization, their alphabet and their laws.

In 1206 he was able to change his name from Temujin to Genghis Khan, 'Universal Ruler'. In 1211 he overran the empire of North China, and in 1217 he conquered and annexed the Kara-Khitai Khanate empire from Lake Balkhash to Tibet. In 1218 he attacked the powerful empire of Khwarezm, bounded by the Jaxartes, Indus, Persian Gulf and Caspian, took Bokhara, Samarkand, Khwarezm and other chief cities, and returned home in 1225. Two of Genghis's lieutenants penetrated northwards from the southern shore of the Caspian through Georgia into southern Russia and the Crimea, everywhere routing and slaying, and returned by way of the Volga.

Meanwhile, in the far east another of his generals had completed the conquest of all northern China (1217–23) except Honan. After a few months' rest Genghis set out to punish the King of Tangut. He brought the country under control, but died on 18 August 1227.

Genghis was not just a warrior and conqueror, but a skilful administrator and ruler. He conquered empires stretching from the Black Sea to the Pacific, and organized them into states of some permanence, on which his successors were able to build.

📖 P Brent, *Genghis Khan* (1976).

> 'Happiness lies in conquering one's enemies, in driving them in front of oneself, in taking their property, in savouring their despair, in outraging their wives and daughters' (c.1210).
>
> – Quoted in Witold Rodzinski, *The Walled Kingdom: A History of China* (1979).

Genêt *See* FLANNER, JANET

Geneviève, St c.422–512 AD
French patron saint of Paris
Born at Nanterre, near Paris, she took the veil from St GERMANUS. She acquired a reputation for sanctity, increased by her assurance that ATTILA and his Huns would not touch Paris in AD 451, and by her expedition for the relief of the starving city during Childeric's Frankish invasion. In AD 460 she built a church over the tomb of St DENIS, where she herself was buried. Her feast day is 3 January.

Genghis Khan *See panel above*

Genlis, Stéphanie Felicité Ducrest de St Aubin, Comtesse de 1746–1830
French writer
She was born in Champcéri, near Autun, and at the age of 16 married the Comte de Genlis. In 1770 she was made lady-in-waiting to the Duchess of Chartres, to whose husband, Louis Philippe D'ORLÉANS 'Égalité', she became mistress. She wrote four volumes of short plays entitled *Théâtre d'éducation* (1779) for her charges, the royal children, including the future King LOUIS PHILIPPE, and nearly a hundred volumes of historical romances and 'improving' works. Her *Mémoires* (1825) contain interesting social comments on the period. 📖 Violet Wyndham, *Madame de Genlis: A biography* (1958)

Gennaro, San *See* JANUARIUS, ST

Gennep, Charles-Arnold Kurr van 1873–1957
French ethnographer and folklorist
Born in Württemberg, Germany, of a Dutch father and French mother, he grew up in France. He worked for the French government in various cultural organizations (1903–10, 1919–21), and also held brief academic appointments at Neuchâtel, Oxford and Cambridge. He became a collector and publisher of folklore materials, including the *Manuel de folklore français contemporaine* (1937–58, 'Guide to Modern French Folklore'), but he is best known for his earlier work, *Les Rites de passage* (1909, 'Rites of Passage'), a comparative study of rituals marking transitions of social status. His other publications include *Religions, mœurs et légendes* (1908–14, 'Religion, Customs and Legends').

Gennes, Pierre-Gilles de *See* DE GENNES, PIERRE-GILLES

Genscher, Hans-Dietrich 1927–
German politician
Born in Reideburg, he was briefly a member of the HITLER Youth like many other children of the period, and fought in the army during World War II. After the war he remained in East Germany, or the German Democratic Republic (GDR), studying law at Leipzig and joining the Liberal-Democratic Party, before fleeing to West Germany (the Federal Republic of Germany) in 1952 as a result of the increasing repression of the GDR's Communist regime. He became secretary-general of the Free Democratic Party (FDP) in 1959 and served as interior minister (1969–74), before being appointed FDP chairman, vice-chancellor and foreign minister in 1974 when the party's leader, WALTER SCHEEL, was elected federal president. Genscher, who served as foreign minister until 1992, emerged as a committed supporter of Ostpolitik and advocate of European co-operation. As FDP Leader, he masterminded the party's switch of allegiance from the Social Democratic Party to the Christian Democratic Union which resulted in the downfall of the SCHMIDT government in 1982. He resigned as FDP Chairman in 1985, but, as foreign minister, remained an influential force, seeking to pursue a new 'second phase' of détente. He resigned in 1992, but remained active in the development of the European Union. 📖 *Erinnerungen* (1995)

Genseric *See* GAISERIC

Genth, Frederick Augustus 1820–93
US mineralogist, chemist and collector
Born in Wächtersbach, near Hanau, Germany, he was educated at Heidelberg, Giessen and the University of Marburg, where he received his PhD. He spent three years as a chemical assistant to ROBERT WILHELM BUNSEN before emigrating to the USA, where he established an analytical laboratory in Philadelphia. He was superintendent of the Washington Mine, North Carolina, from 1849 to 1850 but returned thereafter to his laboratory. He was appointed professor of chemistry at the University of Pennsylvania (1872–88) and was chief chemist and mineralogist to the Second Pennsylvania Geological Survey. He worked in mining geology for much of his life, although he also undertook important research on meteorites, chemistry and rare minerals. He produced an important monograph on the ammonium–cobalt compounds (1856) and discovered 23 new mineral species. The mineral genthite is named in his honour.

Gentile da Fabriano *See* FABRIANO, GENTILE DA

Gentile, Giovanni 1875–1944
Italian philosopher, educationalist and politician
He was born in Castelvetrano, Sicily. He was professor of philosophy successively at Naples (1898–1906), Palermo (1906–14), Pisa (1914–17) and Rome (1917–44). He collaborated with BENEDETTO CROCE in editing the periodical *La Critica* (1903–22) and in developing a distinctive strain of Italian idealism, but they came to disagree both philosophically and politically. Gentile proposed a theory of 'actualism', in which nothing is real except the pure act of thought, the distinctions between theory and practice, subject and object, and past and present being mere mental constructs. He also became an apologist for Fascism and an ideological mouthpiece for MUSSOLINI. He was the Fascist minister of public instruction (1922–24), and presided over two commissions on constitutional reform and over the Supreme Council for Public Education (1926–28). Possibly his most important achievement was to plan the new *Enciclopedia Italiana* (35 vols, 1929–36), which became the main cultural monument of the regime. He was assassinated by anti-Fascist partisans in Florence after Mussolini's overthrow. His main philosophical work was the *Theory of Mind as Pure Act* (1916), and he also wrote a number of works on education.

Gentileschi, Artemisia, *properly* **Artemisia Lomi** c.1597–c.1652
Italian painter
Born in Rome, she was the daughter of ORAZIO GENTILESCHI. She moved to Naples in 1630, and visited her father in England (1638–39), leaving a fine self-portrait at Hampton Court. She often depicted the decapitation of a man by a woman, and her chief work is a *Judith and Holophernes* in the Uffizi, Florence.

Gentileschi, Orazio, *properly* **Orazio Lomi** 1563–1647
Italian painter
Born in Pisa, he settled in England in 1626, the first Italian painter called to England by CHARLESI, having been patronized by the Vatican and the MEDICIS in Genoa. He was responsible for the decoration of the Queen's House at Greenwich (partly transferred to Marlborough House), and painted *Discovery of Moses* (Prado, Madrid), *Flight into Egypt* (Louvre, Paris) and *Joseph and Potiphar's Wife* (Hampton Court, London). His attempt to introduce the Italian style of decoration into England was unsuccessful.

Gentili, Alberico 1552–1608
Italian jurist and writer
Born in Sangenesio in the March of Ancona, he was educated at the University of Perugia. Exiled as a Protestant, he settled in England in 1580 and lectured at Oxford. He was the first true scholar in international law and his works, especially *De Jure Belli* (1598, 'Law of War'), are fundamental.

Gentz, Friedrich von 1764–1832
German publicist and diplomat
Born in Breslau, he entered public service in Prussia in 1786, and in 1802 in Austria. He wrote bitterly against NAPOLEON I. An adherent from 1810 of Prince CLEMENS METTERNICH, he was first secretary at the Congress of Vienna in 1814.

Gény, François 1861–1959
French legal theorist
He was professor of law at Nancy, and his major work is *Méthodes d'interprétation et sources en droit privé positif* (1899, 'Codes in Private Law and Methods of Interpretation Thereof'), in which he contended that lawyers must supplement the norms derived from the codes, case law and doctrine by objective factors such as social data, history and reason, so as to arrive at a decision which takes account of surrounding circumstances. His approach influenced legal thinking in many countries.

Geoffrey of Monmouth, *Latin name* **Gaufridus Monemutensis** c.1100–c.1154
Welsh chronicler and ecclesiastic
Thought to be the son of Breton parents, he studied at Oxford, was archdeacon of Llandaff or Monmouth (c.1140) and was appointed Bishop of St Asaph (1152). He compiled a fictitious history of Great Britain, *Historia Regum Britanniae* (c.1136), which traced the descent of British kings back to the Trojans, and he claimed to have based it on old Welsh chronicles that he alone had seen. Composed before 1147, it brought enduring romance by introducing the legends of King ARTHUR to European literature.

Geoffrin, Marie-Thérèse, *née* **Rodet** 1699–1777
French patron of literature
Born in Paris, she married a rich man at the age of 15 and when he died soon after, he left her an immense fortune. She had a genuine love of learning and art, and her salon became a rendezvous of the men of letters and artists of Paris, especially the *philosophes*.

Geoffroy Saint-Hilaire, Étienne 1772–1844
French zoologist
Born in Étampes, he became professor of zoology at the Museum of Natural History, Paris, in 1793 and began its great zoological collection. In 1798 he was a member of the scientific commission which accompanied NAPOLEON I to Egypt, and in 1809 he was appointed professor of zoology at the Faculty of Sciences in Paris. Comparing embryonic forms, he proposed that organs do not arise or disappear suddenly during evolution but appear gradually, that one organ grows at the expense of another, and that the equivalent organs and structures are to be found in all animals. In *Philosophie anatomique* (2 vols, 1818–20) he greatly enhanced the status of one of his major interests, teratology, the study of animal malformations. He also wrote *L'Histoire naturelle des mammifères* (1820–42, 'Natural History of Mammals'), *Philosophie zoologique* (1830, 'Zoological Philosophy') and *Études progressives d'un naturaliste* (1835, 'Progressive Studies of a Naturalist').

Geoffroy Saint-Hilaire, Isidore 1805–61
French zoologist
He was born in Paris, the son of ÉTIENNE GEOFFROY SAINT-HILAIRE. In 1824 he became assistant naturalist at the National Museum of Natural History, Paris, and later was appointed professor of comparative anatomy (1837) and professor of zoology (1850) at the Faculty of Sciences of Paris. He studied teratology, the analysis of anatomical abnormalities, and published *Histoire générale et particulière des anomalies de l'organisation chez l'homme et les animaux* (4 vols, 1832–37, 'General and Specific History of the Anomalies of the Organization in Man and in Animals'). He was interested in the domestication of animals and the way in which domestic animals adapt to different climates, and his study of alien animals in France appeared in *Domestication et naturalisation des animaux utiles* (1854, 'Domestication and Naturalization of Useful Animals'). In 1852 he published the first volume of his *Histoire naturelle générale des règnes organiques* ('General Natural History of Organic Kingdoms').

Georg, Callisen *See* CALIXTUS

George, St early 4th century AD
English patron of chivalry and guardian saint of England and Portugal
He may have been put to death by DIOCLETIAN at Nicomedia in AD 303, or died at Lydda in Palestine (c.250 AD), where his alleged tomb is exhibited. By many writers, for example EDWARD GIBBON, he has been confused with the Arian George of Cappadocia (d.361AD). St George of the Eastern Church was no doubt a real personage of an earlier date than George of Cappadocia, but beyond this nothing is known of him, and his name was early obscured by fable. The famous story of his fight with the dragon cannot be traced much earlier than JACOBUS DE VORAGINE's *Legenda Aurea*. The crusades gave a great impetus to his cult, many chivalrous orders assumed him as their patron, and he was adopted as guardian saint by England, Aragon and Portugal. In 1348 EDWARD III founded St George's Chapel, Windsor, and in 1344 the Order of the Garter was instituted. His feast day is 23 April.

George I 1660–1727
King of Great Britain and Ireland and Elector of Hanover
He was born in Osnabrück, Hanover, the eldest son of Ernest August, Elector of Hanover, and SOPHIA, daughter of ELIZABETH of Bohemia. Elector of Hanover himself from 1698, he was a great-grandson of JAMES VI AND I of Scotland and England, and succeeded to the British throne in 1714 on the death of Queen ANNE in accordance with the Act of Settlement (1701). He was the first Hanoverian King of Great Britain and Ireland. As a young man he held a military command in the War of Succession against LOUIS XIV of France. He married his cousin, Sophia Dorothea of Zell (1666–1726), in 1682, but divorced her in 1694 for adultery and, although he lived openly with his own mistresses, kept her imprisoned in the castle of Ahlden until her death. The Hanoverian succession was unpopular in England, with widespread demonstrations against the new king on his accession, but Whig support for him was strengthened by the unsuccessful Jacobite rising in 1715 to restore the exiled STUARTS, who were debarred from the throne on account of their Roman Catholicism. The '15 was exploited by the Whigs to discredit the Tories in the light of their lukewarm support for the Hanoverian king, while George's own preference for the Whigs served to give them a monopoly of power which was to last for another 50 years. The Septennial Act of 1716 extended the period between parliamentary elections to seven years and further reduced the level of popular participation in the political affairs of the nation. George never learned English, but although he preferred whenever possible to spend time in Hanover, he was no mere figurehead in the government of Great Britain. His reign saw an unprecedented dominance of the court party over parliament, intensified during the premiership of Sir ROBERT WALPOLE, from 1721 onwards. His relatively low political profile is attributed to the power and cohesion of the alliance between monarch and ruling oligarchy, rather than any evidence of weakness or indifference on the part of the king. 🕮 Jeremy Black and Ragnhild Marie Hatton, *George I* (2001)

George II 1683–1760
King of Great Britain and Ireland and Elector of Hanover
He was born in Herrenhausen, Hanover, the son of GEORGE I, whom he succeeded in 1727. In 1705 he married CAROLINE OF ANSBACH. Despite the personal antipathy that had existed between father and son during most of George's adult life and his opposition to his father's government, he maintained his father's principal minister, Sir ROBERT WALPOLE, in power. Walpole

George III, *in full* **George William Frederick** 1738–1820
King of Great Britain and Ireland and of Hanover

George was born in London, the eldest son of FREDERICK LOUIS, Prince of Wales. In 1760 he succeeded his grandfather, GEORGE II, as King of Great Britain and Ireland and Elector of Hanover (King of Hanover from 1815). He was the first of the House of Hanover to command general respect on becoming sovereign, and at the outset he conciliated all classes of his subjects. In 1761, he married CHARLOTTE SOPHIA, Princess of Mecklenburg-Strelitz, although various affairs and an illegitimate child were rumoured.

George was eager to govern as well as reign, and friction soon arose between him and his people. William Pitt, Earl of CHATHAM, was the popular idol; but the king disliked Pitt and his policy, and for much of his reign appointed others as prime minister. During the two years' administration of GEORGE GRENVILLE, the first attempt to tax the American colonies was made. In Lord NORTH George III found a Minister after his own heart, and North remained at the head of the government from 1770 to 1782. During his administration the American colonies, exasperated at renewed attempts at taxation, declared their independence (4 July 1776) and eventually achieved it by the Treaty of Paris, signed in 1783.

The determination of the king not to grant any concessions to those whom he deemed rebels caused the struggle to be much protracted. Lord North was succeeded by the Marquess of ROCKINGHAM, who died after four months in office. Among his colleagues were CHARLES JAMES FOX, EDMUND BURKE and RICHARD BRINSLEY SHERIDAN, whom George detested, and who, when Lord SHELBURNE took Lord Rockingham's place, refused to serve with him; but he secured WILLIAM PITT, the Younger, as Chancellor of the Exchequer. The friends of Fox and the followers of Lord North overthrew Shelburne in 10 months; and the coalition ministry of WILLIAM CAVENDISH BENTINCK, 3rd Duke of Portland, lasted only eight months (1783). In the interval the king compelled his Ministers to resign, called Pitt to office in December 1783, then dissolved parliament. Pitt remained in office for 18 years. The complete victory of his party at the general election in 1784 was a triumph for the king as much as for Pitt; there was now an end to the supremacy of the old Whig families.

When the union between Ireland and Great Britain was proposed, George III wrote to Pitt characterizing it as one of the most useful measures of his reign; but when the union was effected (1 January 1801), and Pitt proposed carrying out his pledges as to Catholic emancipation, the king refused his assent. Pitt resigned; he later resumed office, but died in 1806.

In 1810 the Princess Amelia, George's favourite child, fell dangerously ill; this preyed on the king's mind, and hastened an attack of mental derangement, not the first he had had. He also lost his sight, and his ailment is now believed to have been caused by porphyria. In 1811 the Prince of Wales was appointed regent, and although the king lived on until January 1820 he did not recover.

📖 John Brooke, *George III* (1972); J Clarke, *The Life and Times of George III* (1972); J Steven Watson, *The Reign of George III* (1960).

> The reign of George III was marked by decisive battles in America, India and Europe, and by many great conquests. Great statesmen, such as the Earl of Chatham, Pitt and Fox, adorned it; as did great captains, such as WELLINGTON and NELSON; and many great names in modern English literature: JOHNSON, GIBBON, BURNS, COWPER, CRABBE, SCOTT, BYRON, COLERIDGE, WORDSWORTH, SOUTHEY, SHELLEY and KEATS.
>
> When George III ascended the throne the national debt stood at £138 million sterling; before his death it was more than £800 million. On the other hand, trade and commerce made gigantic strides: during his reign both imports and exports had increased more than fourfold in monetary value.

dominated British politics until his fall in 1742, and thereafter the system that he had established continued to operate, little altered, under his successors. Walpole's peace policy was breached by war with Spain in 1737 and British participation in the War of Austrian Succession (1742–48). The king, the last British monarch to take part in a battle, took the field as commander of the British army at the Battle of Dettingen (1743), which he won. In 1745 a Jacobite rising in Scotland under the Young Pretender, CHARLES EDWARD STUART, was at first alarmingly successful, but without the hoped-for aid from France the Scots had little real chance against the British army and were savagely cut down at Culloden by George's second son, William Augustus, the Duke of CUMBERLAND. British involvement (1756–57) in the Seven Years' War (1756–63) was largely undertaken in defence of Hanover, but, while Great Britain suffered reverses in Europe, this was more than offset by successes further afield. ROBERT CLIVE's victory at Plassey in 1757 helped to lay the foundations of British India and the capture of Quebec by JAMES WOLFE in 1759 established British supremacy in North America. 📖 John Van Der Kiste, *King George II and Queen Caroline* (1997)

George III *See panel above*

George IV 1762–1830
King of Great Britain and Ireland and of Hanover
Born in London, he was the eldest son of GEORGE III, and owing to his father's insanity he became prince regent (1811), succeeding in 1820. Until the age of 19 he was kept under strict discipline, against which he sometimes rebelled. Secretly, in 1785, he went through the ceremony of marriage with Mrs MARIA FITZHERBERT, a Roman Catholic, which was canonically valid, but not acceptable in English law. In 1795 he married Princess CAROLINE OF BRUNSWICK, but later tried to divorce her, causing a scandal in which the people sympathized with the queen. Though a professed Whig when Prince of Wales (out of antagonism to his father), as George IV he governed, as his father had done, with the aid of the Tories. He was a man of culture and wit, leaving to the nation a valuable collection of books and paintings, and also a patron of the arts, recognizing the genius of JOHN NASH as an architect and town planner, and supporting Wyatville's restoration of Windsor Castle. 📖 Joanna Richardson, *George the Magnificent* (1966)

George V 1865–1936
King of Great Britain and Ireland
Born at Marlborough House, London, he served in the navy, travelled in many parts of the empire, and was created Prince of Wales in 1901. He succeeded his father, EDWARD VII, in 1910. His reign was marked by various important events, such as the Union of South Africa (1910), his visit to India for the Coronation Durbar (1911), World War I (1914–18), the adoption of the surname Windsor (1917), the Sinn Féin Rebellion (1916), the Irish Free State settlement (1922), the first Labour governments (1924, 1929–31), a general strike (1926), Scottish church union (1929), economic crisis and a National government (1931), the Statute of Westminster, defining dominion status (1931), and the Government of India Act (1935). He originated the famous Christmas Day broadcasts to the nation in 1932. In 1893 he married MARY OF TECK. Although he was without intellectual curiosity and suspicious of new ideas, he was responsible for the development of the monarchy as a symbol of national unity, and his Silver Jubilee (1935) was celebrated with genuine popular enthusiasm. He had five sons: EDWARD VIII, GEORGE VI, Prince Henry, Duke of GLOUCESTER, Prince George, Duke of KENT, and Prince John (1905–19), and one daughter, Mary, Princess Royal (1897–1965), who married the 6th Earl of Harewood. 📖 Kenneth Rose, *King George V* (1983)

George VI 1895–1952
King of Great Britain and Northern Ireland
The second son of GEORGE V, and father of ELIZABETH II and Princess MARGARET, he was born at Sandringham House, Norfolk, and educated at Dartmouth and at Trinity College, Cambridge. He served in the Grand Fleet at the Battle of Jutland (1916), and later in the Royal Naval Air Service and the RAF (1917–19). Keenly interested in the human problems of industry, he became president of the Boys' Welfare Association and originated the summer camps for public school and working-class boys. In 1920 he was created Duke of York and he married ELIZABETH (Lady Elizabeth Bowes-Lyon) in 1923. An outstanding tennis player, he played at Wimbledon in the All-England Championships (1926). The following year, he and the duchess toured Australia. On the abdication of his elder brother, EDWARD VIII, he ascended the throne in 1936. During World War II he set a personal example over wartime restrictions, continued to reside in bomb-damaged Buckingham Palace, visited all the

theatres of the war and delivered many broadcasts, for which he overcame a speech impediment. In 1947 he toured South Africa and substituted the title of Head of the Commonwealth for that of Emperor of India when that subcontinent was granted independence by the Labour government. By then his health was rapidly declining, although he persevered with his duties. His last great public occasion was the opening of the Festival of Britain (1951). He died in his sleep on 6 February 1952 and was succeeded by his daughter ELIZABETH II. 🕮 Denis Judd, *King George VI 1895–1952* (1982)

George I 1845–1913
King of Greece
The second son of King CHRISTIAN IX of Denmark, he was born in Copenhagen. He served in the Danish navy and on the deposition of King Otto of Greece (1832–62) he was elected king (1863) by the Greek national assembly. He married (1867) Grand Duchess Olga, niece of Tsar ALEXANDER II of Russia. His reign was a formative period in Greece's emergence as a modern European state. It saw the consolidation of Greek territory in Thessaly and Epirus, and the suppression of a Cretan insurrection (1896–97). Involved in the Balkan War of 1912–13, he was assassinated at Salonika, and succeeded by his son CONSTANTINE I.

George II 1890–1947
King of Greece
The son of CONSTANTINE I and grandson of GEORGE I, he was born in Tatoë, near Athens, and succeeded to the throne on his father's second abdication (1922), but was deposed (1923) by a military junta. Restored to the throne by plebiscite (1935), he worked closely and controversially with his dictatorial prime minister, YANNI METAXAS. When Greece was overrun by the Germans (1941) after successfully resisting the Italian invasion of 1940–41, he withdrew to Crete and then to England. In 1946 he was restored to the throne, again by plebiscite. He was succeeded by his brother PAUL I.

George V 1819–78
Last King of Hanover
Born in Berlin, he became blind through an accident (1833). He ruled from 1851 to 1866. A complete absolutist, by siding with Austria he lost Hanover to Prussia and died an exile in Paris. His son was ERNEST AUGUSTUS, Duke of Cumberland.

George, David Lloyd *See* LLOYD-GEORGE (OF DWYFOR), 1ST EARL

George, Sir Edward Alan John, Baron George of St Tudy 1938–
English banker
He studied economics at Dulwich College and Cambridge University before joining the Bank of England in 1962. He was seconded to Moscow State University, where he studied Russian (1964–65), and to the Bank for International Settlements (1966–69) and the International Monetary Fund (1972–74), but otherwise remained at the Bank of England throughout his career, becoming governor in 1993 and presiding over the bank's independence in setting UK interest rates. He retired in 2003 and was awarded a life peerage in 2004.

George, Henry 1839–97
US economist
Born in Philadelphia, Pennsylvania, he left school at the age of 13, went to sea, and in 1858 arrived in California, where he became a printer. He wrote for several newspapers, and became the owner of the *San Francisco Daily Evening Post* (1871–75). He took an active part in public questions and published *Our Land and Land Policy* in 1870 and *Progress and Poverty* (1877–79). His fundamental remedy for poverty was a 'single tax' levied on the value of land exclusive of improvements, and the abolition of all taxes which fall upon industry and thrift.

George, Mlle, *originally* **Marguerite Joséphine Weimar** 1787–1867
French tragic actress
Born in Bayeux, she was acclaimed at the Comédie-Française, playing in both classical tragedy and the early romantic dramas. In her *Mémoires* she left an account of her liaison with NAPOLEON I.

George, Stefan 1868–1933
German poet
Born in Büdesheim, near Bingen, he edited (1892–1919) *Blätter für die Kunst*, ('Journal for Art'), a journal devoted to the work of a group of advanced poets and writers to which he belonged. He wrote lyric verse in *Hymnen* (1890, 'Hymns'), *Der siebente Ring* (1907, 'The Seventh Ring') and *Der Stern des Bundes* (1914, 'The Federal Star'), which shows the influence of the French Symbolists and the English Pre-Raphaelites. He also translated the works of BAUDELAIRE, SHAKESPEARE and DANTE. In his poems he dispensed with punctuation and capitals. In *Das neue Reich* (1928, 'The New Empire') he advocated a new German culture, not in accord with that of the Nazis. 🕮 Robert E Norton, *Secret Germany: Stefan George and His Circle* (2002)

George-Brown, George Alfred Brown, Baron 1914–85
English Labour politician
Born in Southwark, London, he left school at the age of 15, attended further education classes, and was an official of the Transport and General Workers' Union before entering parliament as MP for Belper division in 1945. After holding minor posts in the Labour Government of 1945–51, he became Opposition spokesman on defence (1958–61), when he supported HUGH GAITSKELL in opposing unilateral disarmament. He unsuccessfully contested the party leadership with HAROLD WILSON in 1963. Vice-chairman and deputy leader of the Labour Party from 1960, he was first secretary of state and secretary of state for economic affairs (1964–66), when he instigated a prices-and-incomes policy which fell victim to the later freeze on wages and prices. He resigned in July 1966, but resumed his post and became foreign secretary in August. A flamboyant, impetuous and controversial figure, Brown finally resigned and returned to the back benches in 1968 during the gold crisis. He lost his seat in the 1970 general election and was created a life peer. 🕮 *In My Way: The Political Memoirs of Lord George-Brown* (1972); Peter Paterson, *Tired and Emotional: a Life of Lord George Brown* (1993)

Gerald of Wales *See* GIRALDUS CAMBRENSIS

Gérard, François Pascal Simon, Baron 1770–1837
French painter
Born in Rome, but brought up in Paris, he became a pupil of JACQUES LOUIS DAVID and a member of the Revolutionary Tribunal in 1793. His full-length portrait of the miniaturist JEAN BAPTISTE ISABEY (1796) and his *Cupid and Psyche* (1798), both in the Louvre, Paris, established his reputation, and leading men and women of the Empire and the Restoration sat for him. He also painted mythological, historical and battle scenes. After the fall of NAPOLEON I in 1815 he became court painter to LOUIS XVIII.

Gerard, John 1545–1612
English herbalist
He was born in Nantwich, Cheshire, and his London garden became famous for its rare plants. For 20 years (1577–98) he was superintendent of WILLIAM CECIL's gardens. He wrote *The Herball, or General Historie of Plantes* (1597).

Gérard, Marguerite 1761–1837
French artist
Born in Grasse, she was the sister-in-law and informal apprentice of the celebrated Rococo painter JEAN HONORÉ FRAGONARD, and moved to Paris to live with the Fragonard family in the 1780s. She achieved success painting genre scenes of Enlightenment women in domestic surroundings, and when the Salon opened to women artists in the 1790s she exhibited regularly until 1824, when she retired from professional painting. She was one of the first French women painters to achieve professional success, and some of her works were bought by NAPOLEON I and LOUIS XVIII.

Gere, Richard Tiffany 1949–
US film actor
Born in Philadelphia, he studied at the University of Massachusetts before gaining extensive experience in the theatre. His stage appearances include *Grease* (1973) in London, *Killer's Head* (1975) off-Broadway and *Bent* (1979–80) on Broadway. He made his film debut in *Report to the Commissioner* (1975) and rose to stardom playing narcissistic loners and rebels in films like *Looking for Mr Goodbar* (1977), *American Gigolo* (1980) and *An Officer and a Gentleman* (1982). His popularity dimmed in the mid-1980s, but he re-asserted himself with a chilling performance as a corrupt policeman in *Internal Affairs* (1990) and showed a deft comic touch in the box-office hit *Pretty Woman* (1990). Subsequent films include *Sommersby* (1993), *First Knight* (1995), *Runaway Bride* (1999), *Chicago* (2002, Golden Globe award) and *The Hoax* (2006). He is a committed Buddhist and spokesman for various Tibetan and humanitarian causes.

Gergiev, Valery Abissalovich 1953–
Russian conductor
Born in Moscow and brought up in North Ossetia, he trained at the Rimsky-Korsakov Conservatory in Leningrad under Ilya Musin. His musical career has been dominated by his work at

the Mariinsky Theatre, formerly known as the Kirov, where he became YURI TEMIRKANOV's assistant in 1977. In 1988 he succeeded Temirkanov as artistic director and transformed the Kirov into an international touring company, reverting the ensemble to its former name, the Mariinsky. A charismatic and forceful character, he is regarded as having set the international standard for the performance of Russian concert and operatic repertoire. 🕮 John Ardoin, *Valery Gergiev and the Kirov* (2001)

Gerhard, Roberto 1896–1970
British composer
Born in Valls, near Tarragona, Spain, of Swiss parentage, he studied piano with ENRIQUE GRANADOS Y CAMPIÑA (1915–16) and composition with ARNOLD SCHOENBERG (1923–28) and Felipe Pedrell (1841–1922) from 1916 to 1922. After the Republican collapse in the Civil War he left Barcelona to settle in England (1939), becoming a British subject in 1960. Most of his music was written in England and was characterized by orchestral, rhythmic and melodic inventiveness. He composed ballets, an opera, *The Duenna* (1945–47), five symphonies, concertos for violin and piano, chamber music, incidental music and some electronic music.

Gerhardie or **Gerhardi, William Alexander** 1895–1977
English novelist
He was born in St Petersburg, Russia, of English parents, and educated there. He then served in the British Embassy at Petrograd (now again St Petersburg) from 1917 to 1918, and later with the military mission in Siberia, before going to Worcester College, Oxford, where he wrote *Futility: A Novel on Russian Themes* (1922) and a lively study of CHEKHOV (1923). In 1925 he published *The Polyglots*, his most celebrated novel, described by ANTHONY POWELL as 'outstanding...particularly in the rare gift of making child characters come alive'. Among his later novels, only *Of Mortal Love* (1936) stands comparison with his early fiction. Other works include *Memoirs of a Polyglot*, his autobiography, published in 1931, a biographical history of *The Romanoffs* (1940), and *God's Fifth Column* (posthumous, 1981), an idiosyncratic account of the years 1890 to 1940. 🕮 D Davies, *William Gerhardie: A Life* (1990)

Gerhardsen, Einar 1897–1987
Norwegian politician
Of working-class origin, he rose to prominence in the Norwegian Labour Party between the wars but was not a member of the Labour government which was in power when the German invasion of Norway took place (1940). This, together with his active participation in the Resistance, made him well qualified to lead the first postwar government in Norway. As prime minister (1945–51, 1955–65), he led Norway into membership of NATO in 1949 and presided over a long period of economic growth and social welfare legislation.

Gerhardt, Charles Frédéric 1816–56
French chemist
Born in Strasbourg, he studied chemistry at the Polytechnicum in Karlsruhe and later attended a commercial college in Leipzig. He refused to join his father in running the family factory and after a violent quarrel joined a regiment of lancers, leaving shortly afterwards to study chemistry with JUSTUS VON LIEBIG (1836–37). After a final but unsuccessful attempt at reconciliation with his father he left for Paris to study with JEAN-BAPTISTE ANDRÉ DUMAS. He then secured a staff appointment (1841) in Montpellier, but resigned in 1851 and returned to the capital. In 1854 he was offered two chairs in Strasbourg, but died two years later. His contribution to chemistry was the 'theory of types', in which he proposed that all organic molecules belong to one of a small number of families or types.

Géricault, (Jean Louis André) Théodore 1791–1824
French painter
Born in Rouen, he became a pupil (1810) of PIERRE GUÉRIN, in whose studio he met and befriended EUGÈNE DELACROIX. A great admirer of the 17th-century Dutch and Flemish schools, Géricault revolted against the current classicism, and his unorthodox approach and bold use of colour incurred the disapproval of his teacher, who advised him to give up painting. His first important exhibition piece was *Officer of Light Horse* at the Salon of 1812, which was followed by other canvases noteworthy for their realism. In his quest for authenticity he spent much time studying the raw material of his pictures, thus achieving the great effectiveness of his masterpiece *The Raft of the Medusa* (1818–19, Louvre, Paris), based on a shipwreck which had shortly before caused a sensation in France. It impressed Delacroix but was harshly criticized and Géricault withdrew to England, where he did a number of paintings of racing scenes and landscapes and came to admire CONSTABLE and RICHARD BONINGTON, whose work he brought to the notice of the French. Towards the end of his life he made five portraits of the insane (1822–23). 🕮 L Eitner and S A Nash, *Théodore Géricault* (1989)

Germain, Sophie 1776–1831
French mathematician
Born in Paris, she was not admitted, as a woman, to the newly established École Polytechnique, but in the guise of a male student she submitted a paper which so impressed JOSEPH DE LAGRANGE that he became her personal tutor. She gave a more generalized proof of PIERRE DE FERMAT's 'last theorem' than had previously been available, developed a mathematical explanation of the figures of ERNST CHLADNI and went on to derive a general mathematical description of the vibrations of curved as well as plane elastic surfaces. Her *Recherches sur la théorie des surfaces élastiques* ('Research on the Theory of Elastic Surfaces') was published in 1821.

German, Sir Edward, *originally* **Edward German Jones** 1862–1936
English composer
Born in Whitchurch, Shropshire, he studied at the Royal Academy of Music, London. In 1888 he was made musical director of the Globe Theatre, London, and became known for his incidental music to SHAKESPEARE. In 1901 he emerged as a light-opera composer when he completed Sir ARTHUR SULLIVAN's *Emerald Isle* after the composer's death. His own works include *Merrie England* (1902), *Tom Jones* (1907), *Fallen Fairies* (1909), several symphonies, suites, chamber music and songs and the *Welsh Rhapsody* (1904). 🕮 Brian Rees, *A Musical Peacemaker: The Life and Work of Sir Edward German* (1986)

Germanicus Caesar 15 BC–AD 19
Roman soldier
Son of Nero Claudius DRUSUS, and of Antonia, daughter of MARK ANTONY and niece of AUGUSTUS, he was adopted by the emperor TIBERIUS. In AD 13 he was appointed to command the eight legions on the Rhine, and two years later he marched to meet ARMINIUS, whom he overthrew in two desperate battles. Tiberius, jealous of his popularity, sent him to the East in AD 17, appointing Calpurnius Piso as viceroy of Syria, in order secretly to counteract him. Germanicus died at Epidaphnae, near Antioch, probably of poison. His wife, AGRIPPINA, the Elder, and two of her sons were eventually put to death, but the third son, CALIGULA, survived to become emperor. The notorious AGRIPPINA, the Younger, was his daughter.

Germanus, St c.378–448 AD
French religious
Born near Augustodunum, Gaul (now Autun, France), he was made Bishop of Auxerre. He was invited to Britain to combat Pelagianism in AD 429, and under him the Christian Britons won the bloodless 'Alleluia Victory' over the Picts and Saxons at Maes Garmon ('Germanus's field') in Flintshire. His feast day is 31 July.

Germer, Lester Halbert 1896–1971
US physicist
He was born in Chicago, and while on the research staff of the Western Electric Co. (1917–53) he worked with CLINTON DAVISSON on experiments that demonstrated the diffraction of electrons by crystals (1927), which confirmed the theories of LOUIS-VICTOR DE BROGLIE.

Geronimo, *Apache name* **Goyathlay ('One Who Yawns')** 1829–1909
Apache leader
Born in Arizona, he became a chief of the Chiricahua Apaches and warred against the Mexicans (who killed his mother, wife and children) as well as the US soldiers and settlers who arrived in the region after Mexico ceded it to the USA in 1848. Confined to a series of reservations outside their ancestral lands, he and his followers escaped repeatedly and led raids against the settlers for more than a decade. On their final surrender in 1886, they were placed under military confinement. Geronimo later became a farmer in Oklahoma with his people and adopted Christianity. He dictated his autobiography, *Geronimo: His Own Story* (1906). 🕮 Alexander B Adams, *Geronimo* (1971)

Gerry, Elbridge 1744–1814
US politician
Born in Marblehead, Massachusetts, he graduated from Harvard in 1762, served in the Continental Congress (1776–81, 1783–85), and was a signer of the Declaration of Indepen-

dence. He was a delegate to the Constitutional Convention (1787), where he opposed a strong central government. Elected governor of Massachusetts in 1810, he signed a bill (1812) creating an oddly shaped electoral district favouring his own Republican Party. The district was caricatured as a salamander in the press and dubbed a 'gerrymander'. Gerry later became vice-president of the USA (1813–14) under JAMES MADISON.

Gershwin, George, *originally* **Jacob Gershvin** 1898–1937
US composer
Born in Brooklyn, New York City, the son of Russian Jewish immigrants, he studied piano as a boy, published his first popular song at the age of 14 and left high school to work for Jerome H Remick and Co., a Tin Pan Alley music-publishing company. In 1920 he had his first hit with 'Swanee', recorded by AL JOLSON, and he began to compose songs for Broadway reviews. In 1924 he wrote his first successful musical comedy, *Lady Be Good*, collaborating with his brother IRA GERSHWIN, a brilliant lyricist who was to be his partner in songwriting until his death. In the 1920s and early 1930s he scored a series of hit musicals, including *Of Thee I Sing* (1931), and in the process produced numerous classics of US popular song, such as 'Someone to Watch Over Me', 'Embraceable You' and 'I Got Rhythm'. He also wrote songs and scores for motion pictures, notably several screen musicals with FRED ASTAIRE and GINGER ROGERS. In 1924 a commission from the conductor PAUL WHITEMAN led to his composition of *Rhapsody in Blue*, a concert work combining Romantic emotionalism and the jazz idiom with unusual success, and this was followed with the *Concerto in F* for piano and orchestra (1925) and *An American in Paris* (1928), exploiting the same forces. His and Ira's opera *Porgy and Bess* (1935) was commercially unsuccessful when it was first staged, but has since won worldwide popularity. At the age of 38, at the height of his powers, he died of a brain tumour. Gershwin, who described jazz as 'a very powerful American folk music', showed genius in his innovation of 'symphonic jazz' and in his blithe dexterity with modern popular song and musical comedy, and he was influential in winning recognition of the legitimacy of US popular music. 🕮 Howard Pollack, *George Gershwin: His Life and Work* (2006)

Gershwin, Ira, *originally* **Israel Gershvin** 1896–1983
US lyricist
Born in Brooklyn, New York City, he was the brother of GEORGE GERSHWIN, with whom he collaborated to produce more than 20 successful Broadway musicals. Ira first wrote under the pseudonym of Arthur Francis, and wrote the lyrics for Vincent Youmans's *Two Little Girls in Blue* (1921), which includes 'Oh Me, Oh My'. Later, under his own name, he wrote lyrics for the *Ziegfeld Follies* (1936) and, most importantly, *Lady in the Dark* (1941, composed by KURT WEILL), which contains 'Jenny' and 'This is New'.

Gerson, Jean de, *originally* **Jean Charlier**, *known as* **Doctor Christianissimus** 1363–1429
French theologian and mystic
Born in Gerson, near Rheims, he was educated in Paris. He was a nominalist, opposed to scholasticism, but a Christian mystic. As chancellor of the University of Paris from 1395 he supported the proposal for putting an end to the Great Schism between Rome and Avignon by the resignation of both the contending pontiffs, especially at the councils of Pisa and Constance (1414). Having provoked the animosity of the Duke of Burgundy for denouncing the murder of the Duc d'Orléans, Gerson prudently retired to Rattenburg in Tirol, where he composed his *De Consolatione Theologiae*. It was only after several years that he was able to return to France and settle in a monastery in Lyons.

Gerstäcker or **Gerstaecker, Friedrich** 1816–72
German writer and traveller
Born in Hamburg, he worked his way through the USA, South America, Polynesia and Australia, and wrote colourful adventure stories, collected in *Mississippi-Bilder* (1847, Eng trans *Western Waters*, 1864). 🕮 *Gerstaecker's Travels* (1854)

Gertler, Mark 1891–1939
British painter
Born in London to Jewish Austrian émigrés, he studied at the Regent Street Polytechnic and was apprenticed at Bell's Stained Glass Works before going to the Slade School of Art, London. His friends included Sir STANLEY SPENCER, EDWARD WADSWORTH, PAUL NASH and DORA CARRINGTON, with whom he had a traumatic affair. He developed a linear primitive style in his best work, such as *The Rabbi and his Grandchild* (1913, Southampton) and *The Merry-Go-Round* (1916, Tate Britain, London). After 1917 his style became more lyrical and he was invited by ROGER FRY to work for the Omega Workshops in 1918. From 1920 he was treated for tuberculosis and during this period he painted sensuous nudes and female portraits, which brought him success without satisfaction. Paintings of the 1930s such as *The Spanish Fan* and *The Red Shawl* (1938) show a return to his flatter, more monumental style. He suffered from depression all his life and committed suicide in his London studio. 🕮 John Woodeson, *Mark Gertler: Biography of a Painter, 1891–1939* (1972)

Gervais, Ricky 1961–
English comic writer and performer
Born in Reading, Berkshire, he studied philosophy at London University, then briefly managed the rock group Suede. In 1997, he became a disc jockey at Xfm radio, where he began his close collaboration with co-writer Stephen Merchant. In 1998 he appeared in the satirical television series *The 11 O'Clock Show* (1999); the following year, the BBC commissioned the first series of Gervais and Merchant's sitcom *The Office*, which aired in 2001, gaining a huge following and a raft of awards. A second series and two Christmas specials followed (2002–03), and the series was subsequently remade for US television. Gervais and Merchant's follow-up was *Extras* (2005–06); they also collaborated on an audio comedy series, *The Ricky Gervais Show*, (2002–), which went on to set a record as the world's most downloaded podcast (2006).

Gervase of Canterbury c.1141–c.1210
English monk and chronicler
He chronicled the reigns of STEPHEN, HENRY II and RICHARD I, and was author of a history of the archbishops of Canterbury.

Gervase of Tilbury c.1150–c.1220
English historical writer
Born probably in Tilbury, Essex, he lectured on canon law at Bologna, and was marshal of the kingdom of Arles, and perhaps provost of the nunnery at Ebsdorf. Of his *Otia Imperialia*, composed about 1212 for the entertainment of the emperor OTTO IV, the first two books consist of an abstract of geography and history, and the third contains a collection of curious beliefs about British sirens, the magnet, etc. He also prepared a *Liber Facetiarum*, or book of anecdotes, for HENRY II's son Henry, which is no longer in existence.

Gesell, Arnold Lucius 1880–1961
US psychologist
He was born in Alma, Wisconsin, and educated at Clark University and at Yale. He was professor of child hygiene at Yale School of Medicine (1915–48) and established the Yale Psychological Clinic (now the Clinic of Child Development of the Yale School of Medicine), of which he was director (1911–48). He was research consultant to the Gesell Institute of Child Development (1950–58). A pioneer in the study of child psychology, he was particularly concerned with early infant development and devised standard scales for measuring its progress. His writings were supplemented by an original and extensive use of film as a medium for scientific and educational communication. His books include *Infant and Child in the Culture of Today* (1943), *The Child from Five to Ten* (1946) and *Child Development* (1949).

Gesner, Conrad, *Latin* **Conradus Gesnerus** 1516–65
Swiss naturalist and physician
Born in Zurich, he became professor of Greek at Lausanne University in 1537, and in 1541 he was appointed professor of philosophy and natural history at Zurich University. He published 72 works, and left 18 others in progress. His *Bibliotheca Universalis* (1545–49) contained the titles of all the books then known in Hebrew, Greek and Latin, with criticisms and summaries of each. His *Historia Animalium* (1551–58) attempted to describe all animals then known. He collected over 500 plants not recorded by the ancients, and his third major work contains beautiful and accurate engraved illustrations, which were reprinted more recently in eight volumes between 1973 and 1980. He also wrote on medicine, mineralogy and philology. He was the first to allude to the concepts of genus and species, and stressed the significance of flowers, fruit and seed in identification and discrimination. He was one of the most versatile and industrious scholars of the 16th century.

Gessner, Salomon 1730–88
Swiss pastoral poet, and landscape painter and engraver
He was born in Zurich, where he became a bookseller. *Daphnis* (1754), a sentimental bucolic collection of poetry, was followed

two years later by a volume of *Idyllen* ('Idylls') and by *Inkel und Yariko* ('Inkle and Yarico'). His *Tod Abels* (1758, 'Abel's Death'), a type of idyllic heroic prose poem, had the greatest success. His landscape paintings are all in the conventional classical style, but his engravings are more impressive. In 1772 he published a second volume of *Idyllen* and a series of letters on landscape painting. 🕮 R Zuerchner, *Salomon Gessner, 1730–1788* (1968)

Gesualdo, Prince Carlo of Venosa c.1561–1613
Italian lutenist and composer
Born in Naples, he wrote many sacred vocal works and published six books of madrigals, remarkable for bold homophonic progressions and the telling use of dissonance. He achieved notoriety for ordering the murder of his unfaithful wife and her lover in 1590.

Getty, Jean Paul 1892–1976
US oil executive, billionaire and art collector
Born in Minneapolis, he studied at the University of California, Berkeley, and Oxford, and then entered the oil business in his early twenties, making $250,000 in his first two years. His father (also a successful oil man) died in 1930, leaving him about $500,000. He merged his father's interests with his own and went on to acquire and control more than 100 companies, making most of the major policy decisions himself. He became one of the richest men in the world and his personal wealth was estimated in 1968 at over $1 billion. Over the years he acquired a huge and extremely valuable art collection. He was married and divorced five times, and developed a legendary reputation for miserliness, installing a pay-telephone for guests in his English mansion. He wrote several books, including a history of the family oil business and two autobiographies, *My Life and Fortunes* (1963) and *As I See It* (1976). 🕮 R Lenzner, *The Great Getty* (1986)

Getz, Stan(ley) 1927–91
US jazz saxophonist
He was born in Philadelphia, Pennsylvania, and educated in New York, where he started playing professionally at the age of 15. While still a teenager he was working under such important bandleaders as STAN KENTON and BENNY GOODMAN. With the WOODY HERMAN Orchestra from 1947 to 1949, he was a member of the 'Four Brothers' saxophone section which gave the band a unique ensemble sound. He later led his own small groups, and during the 1960s he helped to popularize the bossa nova jazz style. With his light tone and articulate phrasing, he was one of the most copied of tenor saxophone stylists.

Geulincx, Arnold, *also known as* **Philaretus** 1624–69
Belgian philosopher
Born in Antwerp, he taught at the Catholic University of Louvain but was expelled for his anti-scholasticism (1658). He later converted to Calvinism and became professor of philosophy at Leyden (1665). He was a leading exponent of DESCARTES' philosophy and is best known for his doctrine of 'Occasionalism': God himself 'occasions' every mental or physical process, while body and mind operate separately, without causal interaction, like two clocks which are perfectly synchronized. His principal works are *Quaestiones Quodlibeticae* (1653, 'Miscellaneous Questions'), re-edited by him as *Saturnalia* (1665), *Logica Restituta* (1662, 'Logic Restated') and *De Virtute* (1665, 'On Virtue'). After his death further works were published under his pseudonym, Philaretus, including six treatises on ethics under the title *Gnothi Seauton* (1675, 'Know Thyself') and *Metaphysica Vera* (1691, 'True Metaphysics').

Geyl, Pieter 1887–1966
Dutch historian and patriot
Born in Dordrecht, he was educated in The Hague, Leyden and Italy. After serving as London correspondent of the *Nieuwe Rotterdamsche Courant* (1913–19), he was appointed the first professor of Dutch studies at London University (1919–36) and professor of modern history at Utrecht (1936–58). During World War II he was imprisoned in Nazi concentration camps. He was a believer in a 'greater Netherlands', and mourned the loss of Dutch-speaking Flanders and Brabant during the Eighty Years' War in the late 16th century. He was a climatologist and environmentalist as a historian, arguing that the outcome of the Dutch revolt against HABSBURG Spain was dictated by movements of rivers and water currents rather than religion or economics. His multi-volume history of the Eighty Years' War and its sequels were published in the 1930s, translated into English as *The Revolt of the Netherlands* and *The Netherlands Divided*, while his struggle against HITLER's domination of Europe is reflected in his *Napoleon, For and Against* (1944). He was also a poet and essayist, debating with numerous living and dead historians, and was the leading interpreter of the Dutch past to his country and the world.

Gezelle, Guido 1830–99
Flemish poet
Born in Bruges, he was ordained in 1854, and for 28 years was a priest in Courtrai. He published many volumes of lyrical verse, wrote on philology and folklore, founded literary magazines, and is regarded as the founder of the West Flemish school. He inaugurated a revival in the use of Flemish as a literary language. 🕮 K de Busschere, *Guido Gezelle* (1959)

Ghazali, al- 1058–1111
Islamic philosopher, theologian and jurist
He was born in Tus, Persia (near the modern Meshed). In 1091 he was appointed to the prestigious position of professor of philosophy at Nizamiyah College, Baghdad, where he exercised great academic and political influence. However, in 1095 he suffered a spiritual crisis which led to a nervous breakdown and a speech impediment that prevented him from lecturing. He abandoned his position for the ascetic life of a mendicant Sufi (mystic), spending his time in meditation and spiritual exercises. Although he taught again briefly, he eventually retired to Tus to found a monastic community. His doctrines represent a reaction against Aristotelianism and an attempt to reconcile philosophy and Islamic dogma. He was a prolific author, and his main works include *The Intentions of the Philosophers*, *The Incoherence of the Philosophers*, *The Deliverance from Error* and the monumental *The Revival of the Religious Sciences*.

Gheeraerts, Marcus, the Younger 1562–1636
British artist
He was born in Flanders, the son of Marcus Gheeraerts, the Elder (c.1510–c.1590). They moved to England in 1568 and Marcus the Younger became court painter to JAMES VI AND I, specializing in portraits. Many pictures attributed to him are of doubtful authenticity, but among the best of those that are certainly his are *Lady Russell* (1625, Woburn Abbey) and *William Camden* and *Sir Henry Savile* (both 1621, Bodleian, Oxford).

Gheorgiu-Dej, Gheorghe 1901–65
Romanian Communist politician
Born in Bîrlad, he became a railway worker, then joined the Romanian Communist Party (RCP) in 1930 and was imprisoned in 1933 for his role in the Grivita railway strike. On his release in 1944, he became secretary-general of the RCP and minister of communications (1944–46). In 1945 he was instrumental in the ousting of the coalition government of Nicolae Radescu (1874–1953) and the establishment of a Communist regime. He then served in a variety of economic posts (1946–52) and as prime minister (1952–55), before becoming state president in 1961. A Stalinist, he nonetheless retained the support of NIKITA KHRUSHCHEV's Moscow, while developing increasingly independent policies during the 1950s and 1960s. 🕮 Dennis Deletant, *Communist Terror in Romania: Gheorgiu-Dej and the Police State 1948–1965* (2001)

Ghiberti, Lorenzo 1378–1455
Italian goldsmith, bronze-caster and sculptor
Born in Florence, he executed frescoes in the palace of Pandolfo Malatesta at Rimini in 1400, and in 1402 won the competition to make a pair of bronze doors for the Florence Baptistery. His chief competitor was FILIPPO BRUNELLESCHI and both the panels they entered for this prestigious competition can be seen today in the Bargello Museum, Florence. Much of Ghiberti's life was spent completing this set of doors, and as soon as they were finished in 1424 he was entrusted with the execution of another set (1425–52), made to emulate the first pair, and dubbed by MICHELANGELO the 'Gates of Paradise'. He was also responsible for the three bronze figures of the saints MATTHEW, STEPHEN and JOHN the Baptist which adorn the exterior of Or San Michele. His large and flourishing workshop was a training ground for a distinguished generation of Florentine artists, including DONATELLO, MICHELOZZO MICHELOZZI and PAOLO UCCELLO. In true Renaissance fashion, he was also a humanist and scholar and wrote *I commentarii*, a wide ranging history of art. 🕮 Richard Krautheimer and Trude Krautheimer-Hess, *Lorenzo Ghiberti* (3rd edn, 1982)

Ghirlandaio, Domenico, *properly* **Domenico di Tommaso Bigordi** 1449–94
Italian painter
Born in Florence, he was apprenticed to a goldsmith, most probably his father. A metal garland-maker or 'ghirlandaio', he

became a painter when he was 31, painting principally frescoes in his native city. Among these are six subjects from the life of St FRANCIS (1485) and an altarpiece, the *Adoration of the Shepherds* (Florentine Academy), for the church of S Trinità, and, in the choir of S Maria Novella, a series illustrating the lives of the Virgin and the Baptist (1490). Between 1482 and 1484 he painted for Pope SIXTUS IV, in the Sistine Chapel, the fresco *Christ Calling Peter and Andrew*. His easel pictures include the *Adoration of the Magi* (1488), in the church of the Innocenti at Florence, and the *Visitation of the Virgin* (1491), in the Louvre, Paris. His mosaics include the *Annunciation* in the cathedral of Florence. The many figures in his religious scenes are beautifully characterized with faces full of expression, but his composition tends to be unimaginative and the grouping formal and repetitive. His work is of great historical value for its detailed portrayal of costume and domestic features. He was assisted by his brothers David (1452–1525) and Benedetto (1458–97).

Giacconi, Ricardo 1931–
US astrophysicist and Nobel Prize winner
Born in Genoa, Italy, he studied at the University of Milan before becoming a research associate at Indiana University, Bloomington, in 1956. In 1958 he moved to Princeton. His career was concerned principally with space X-rays, proposing a new type of space X-ray telescope mirror in 1960, and in 1962 leading a project which discovered the first extrasolar source of X-rays (the star Scorpius X-1), and which also revealed the extragalactic background radiation. Giacconi's group also built the first orbiting X-ray detector, which led to the discovery of a host of X-ray stars. In 1966 Giacconi showed that absorption of X-rays by interstellar gas and dust limited studies at long X-ray wavelengths. For thus laying the foundations of X-ray astronomy, he received the 2002 Nobel Prize in physics, which he shared with RAYMOND DAVIS and MASATOSHI KOSHIBA. He was director of the European Southern Observatory (1993–99) and president of Associated Universities, Inc. (1999–2004). In 2005 he received the National Medal of Science.

Giacometti, Alberto 1901–66
Swiss sculptor and painter
Born in Stampa, he was the son of an artist. He studied at Geneva and worked mainly in Paris, at first under ÉMILE BOURDELLE. He joined the Surrealists in 1930, producing many abstract constructions of a symbolic kind, arriving finally at the characteristic 'thin man' bronzes, long spidery statuettes, rigid in posture yet trembling on the verge of movement, suggesting transience, change and decay, such as *Man Pointing* (1947). A major retrospective of his work was held in 1996 at the Scottish National Galley of Modern Art in Edinburgh and the Royal Academy in London. 🕮 David Sylvester, *Looking at Giacometti* (1994)

Giacosa, Giuseppe 1847–1906
Italian dramatist
He was born in Colleretto-Parella, Piedmont, and wrote many different types of play. His historical dramas and comedies in verse include *Il Conte Rosso* (1880, 'Count Rosso') and *La Contessa di Challant* (1891, 'The Countess of Challant'). *Diritti dell' anima* (1894, 'Rights of the Soul'), *Come le foglie* (1900, 'Like the Leaves') and *Il piu forte* (1904, 'The Strongest') address contemporary social problems, emphasizing the importance of established institutions and bourgeois ideals of decency. With Luigi Illica (1857–1919) he collaborated on the libretti for PUCCINI's *La Bohème*, *Madame Butterfly* and *Tosca*.

Giaever, Ivar 1929–
US physicist and Nobel Prize winner
Born in Bergen, Norway, he studied electrical engineering in Trondheim, served in the Norwegian army (1952–53), then emigrated to Canada in 1954 to work for the General Electric Company. After moving in 1956 to the General Electric Research and Development Center in Schenectady, New York, he examined tunnelling effects in superconductors. Using structures consisting of a sandwich of various different materials, he created a simple technique of measuring superconductor energy gaps, and his subsequent research on current–voltage characteristics led to a significant advance in the understanding of the nature of superconductors. His field of work, of great value in microelectronics, had previously been the subject of related work by LEO ESAKI and was later further developed by BRIAN JOSEPHSON, and all three men shared the Nobel Prize in physics in 1973 for their contributions. Giaever's research interests later shifted to immunology and tissue culture. Since 1988 he has been institute professor (now emeritus) of the physics department at the Rensselaer Polytechnic Institute, Troy, New York. He is also a professor at large of Oslo University.

Giambologna *See* BOLOGNA, GIOVANNI

Giannini, Amadeo Peter 1870–1949
US banker
Born in San Jose, California, the son of Italian immigrants, he made a small fortune in the wholesale produce business, then founded the Bank of Italy in San Francisco in 1904. The bank grew rapidly through his innovative policies, which included making loans to small farmers and businessmen on modest collateral and acquiring branch banks elsewhere in California. Renamed the Bank of America in 1930, it was the largest private bank in the world at the time of Giannini's death.

Giap, Vo Nguyen *See* VO NGUYEN GIAP

Giauque, William Francis 1895–1982
US physical chemist and Nobel Prize winner
Born in Niagara Falls, Ontario, Canada, he received his chemical education at the University of California, Berkeley, where he became professor (1922–62) and emeritus professor from 1962. He was awarded the Nobel Prize in chemistry in 1949. A member of the US National Academy of Sciences, he received the Gibbs Medal of the American Chemical Society in 1951. He developed low-temperature calorimetry and cryogenic apparatus, was the first to use the magnetic method for attaining temperatures to within one degree of absolute zero, and he invented the carbon thermometer for measurements at temperatures in the liquid helium range. He also developed spectroscopic methods for determining entropy values. In 1929 Giauque and Herrick Johnston discovered the isotopes oxygen-17 and -18.

Gibb, Sir Alexander 1872–1958
Scottish civil engineer
Born near Dundee, he was the fifth generation in a line of civil engineers begun by his great-great-grandfather William (1736–91). His great-grandfather John (1776–1850) became THOMAS TELFORD's deputy on bridges and harbour works in Scotland, then turned to contracting. His grandfather Alexander (1804–67) was apprenticed to Telford, worked with ROBERT STEVENSON, and built railways in Scotland and England. His father Easton (1841–1916) built reservoirs, railways and the bridge over the Thames at Kew. Alexander joined the firm of Easton Gibb & Son in 1900, and from 1909 to 1916 worked on the construction of Rosyth naval dockyard, then, after five years in government posts, set up in practice as a consulting engineer. His firm became one of the world's largest, its work at home and abroad including hydroelectric schemes, bridges, docks and harbours, and many other kinds of civil engineering project.

Gibbings, Robert John 1889–1958
Irish illustrator and writer
Born in Cork, he is famous for the engravings and woodcuts with which he illustrated most of his own river-exploration books, such as *Sweet Thames Run Softly* (1940), *Lovely Is the Lee* (1945) and *Sweet Cork of Thee* (1951). He was director of the Golden Cockerel Press from 1924 to 1933, and through it was instrumental in reviving the art of wood-engraving. He travelled widely and was perhaps the first artist to use diving equipment to make underwater drawings.

Gibbon, Edward 1737–94
English historian
Born in Putney, Surrey, he was educated at Westminster and Magdalen College, Oxford. His *Autobiography* contains a scathing attack on the Oxford of his time and also tells of his return to Protestantism and of his forbidden love for Suzanne Curchod, who afterwards became Madame Necker and the mother of Madame de STAËL. On a visit to Rome in 1764 he decided to write *The Decline and Fall of the Roman Empire* (6 vols, 1776–88), the work for which he remains best known. Acclaimed as literature as well as history, and markedly pessimistic in tone, the work has as its chief concept the continuity of the Roman Empire down to the fall of Constantinople (Istanbul). Gibbon entered parliament in 1774, and as a devoted follower of Lord NORTH was made commissioner of trade and plantations. After 1788 he spent much of the remainder of his life with Lord Sheffield, who published his *Miscellaneous Works* (1796). 🕮 Roy Porter, *Gibbon: Making History* (1989)

Gibbon, Lewis Grassic, *pseudonym of* **James Leslie Mitchell** 1901–35
Scottish novelist
Born near Auchterless, Aberdeenshire, he was educated at the local school before attending Mackie Academy, Stonehaven,

which he left after a year to become a newspaper reporter. Stirred by the promise of the Russian Revolution he became a member of the Communist Party. In 1919 he moved to Glasgow, where he was employed on the *Scottish Farmer*, but he was dismissed for fiddling expenses. He attempted suicide, returned home and decided to enlist. He spent three-and-a-half years with the Royal Army Service Corps in Persia, India and Egypt, and then served in the RAF as a clerk until 1929. His first published book was *Hanno, or the Future of Exploration* (1928), followed by *Stained Radiance* (1930), *The Thirteenth Disciple* (1931), *Three Go Back* (1932) and *The Lost Trumpet* (1932). *Sunset Song*, his greatest achievement, was published in 1932, the first of his books to appear under his pseudonym. Written in less than two months, it was published under his mother's name as the first in a projected trilogy of novels, *A Scots Quair*, on the life of a young girl called Chris Guthrie. The second volume, *Cloud Howe*, appeared in 1933 and the third part, *Grey Granite*, in 1934. An unfinished novel, *The Speak of the Mearns*, was published in 1982. He also wrote a biography of the Scottish explorer MUNGO PARK (1934), and published *The Conquest of the Maya* (1934). He died following an operation on a perforated ulcer. 🕮 Peter Whitfield, *Grassic Gibbon and his World* (1996)

Gibbons, Grinling 1648–1721
English sculptor and woodcarver
He was born in Rotterdam, the Netherlands, and had for some time practised his art in England when he was discovered by JOHN EVELYN carving a copy of TINTORETTO's *Crucifixion*. He was appointed by CHARLES II to a place on the Board of Works, and was employed to decorate the king's rooms at Windsor and the choir at St Paul's Cathedral, London. At Chatsworth, Burghley, Hampton Court, Blenheim, and other mansions, he carved, often in lime-wood, and with controlled exuberance, the festoons of fruit and flowers and the cherubs' heads for which he is famous. A ceiling at Petworth, Sussex, is a tour de force. He also produced several fine pieces in marble and bronze, including the statues of Charles II at the Chelsea Hospital, London, and JAMES VII AND II in Trafalgar Square.

Gibbons, James 1834–1921
US prelate
Born in Baltimore, Maryland, he became archbishop of that city in 1877, and a cardinal in 1886. He was largely responsible for the growth of the Roman Catholic Church in the USA. He wrote *The Faith of Our Fathers* (1876), *Our Christian Heritage* (1889), and many other books.

Gibbons, Orlando 1583–1625
English composer
Born in Oxford, he was appointed organist of the Chapel Royal, London, in c.1615. He studied at Cambridge and Oxford, and in 1623 became organist of Westminster Abbey, London. His compositions include the anthems, 'O Clap Your Hands', 'God Is Gone Up', and 'Almighty and Everlasting God'; and the madrigals, 'The Silver Swan', 'O That the Learned Poets' and 'Dainty, Fine Sweet Bird'. Besides these he left hymns, fantasies for viols, and pieces for the virginals. 🕮 John Harley, *Orlando Gibbons and the Gibbons Family of Musicians* (1999)

Gibbons, Stella Dorothea 1902–89
English writer
Born in London, she was educated at North London Collegiate School for Girls and University College London, where she studied journalism. She worked as a journalist and later began a series of successful novels. She also wrote poetry and short stories, but her reputation rests on *Cold Comfort Farm* (1933), a light-hearted satire on the melodramatic rural novels such as those written by MARY WEBB, which won the Femina Vie Heureuse prize, and established itself as a classic of parody.

Gibbs, James 1682–1754
Scottish architect
Born in Aberdeen, he studied in Holland as a protégé of the exiled Earl of MAR, and then in Italy under CARLO FONTANA. A friend and disciple of CHRISTOPHER WREN, he became (1713) one of the commissioners for building new churches in London, but was dismissed in 1715 for his Roman Catholicism. He designed St Mary-le-Strand (1717), the steeple of St Clement Danes (1719), St Peter's, Vere Street (1724), and St Martin-in-the-Fields (1726), the latter being perhaps his most influential and attractive work. He was also responsible for St Bartholomew's Hospital (1730), the circular Radcliffe Camera at Oxford (1737–47) and the Senate House at Cambridge (1730). His *Book of Architecture* (1728) helped to spread the Palladian style and influenced the design of many churches of the colonial period in America.

Gibbs, Josiah Willard 1839–1903
US theoretical physicist
Born in New Haven, Connecticut, he graduated from Yale. A thesis treating the design of gears exhibited his geometrical expertise and earned him the first Yale engineering doctorate (1863). His academic career continued with an (initially) unsalaried appointment to the Yale chair of mathematical physics (1871), which he retained until his death, in spite of more lucrative offers from the new Johns Hopkins University. Thermodynamics was his main topic of scientific inquiry, and his most famous work appeared in the vast memoir *On the Equilibrium of Heterogeneous Substances* (1876–78). This paper introduced the concept of 'chemical potential', which has been a foundation for physical chemistry. Studies of the electromagnetic theory of light, advocacy of the use of vectors and the publication of a book of *Elementary Principles in Statistical Mechanics* (1902) show the diversity of Gibbs's activities. 🕮 Lynde Phelps Wheeler, *Josiah Willard Gibbs* (1970)

Gibbs, William Francis 1886–1967
US naval architect
Born in Philadelphia, Pennsylvania, he was educated at Harvard and Columbia, where he studied law, but became interested in the design of ships, especially from the point of view of safety in the event of a collision. In partnership with his brother Frederick, he designed yachts, luxury liners and, from 1933, US naval vessels and the 'Liberty Ships' of World War II. His most famous design was the 53,330-ton *United States*, which regained the Blue Riband of the North Atlantic for the USA in 1952, making the crossing at an average speed of 35.6 knots, still unbeaten by a passenger liner.

Gibbs-Smith, Charles Harvard 1909–81
English aeronautical historian
Born in Teddington, London, he was educated at Westminster School and Harvard, and in 1932 he joined the Victoria and Albert Museum as an assistant keeper, later becoming director of the photographic collection (1945) and keeper of the public relations and education department (1947–71). He became instructor in aircraft recognition at the Ministry of Information during World War II and developed a keen interest in the history of aeronautics. He wrote the definitive *Aviation – an Historical Survey From Its Origins to the End of World War II* (1960) for the Science Museum, London, *Sir George Cayley's Aeronautics, 1796–1855* (1962) and *The Rebirth of European Aviation* (1974). He took up a research fellowship at the Science Museum in 1976 and in 1978 he became the Smithsonian Institution's first Lindbergh Professor of Aerospace History at the Aerospace Museum in Washington, DC.

Gibran or **Jibran, Kahlil** 1883–1931
Syrian mystical writer, poet and artist
He was born in Bisharri in the Lebanese mountains, but became a permanent resident of New York City from 1912. Early on he discovered a spiritual affinity with WILLIAM BLAKE, especially as expressed in his drawings, and later with the work of NIETZSCHE. Among his earliest works is *al-Ajnihah al-mutakassirah* (1911, Eng trans *Broken Wings*, 1922), in which he liberated Arabic from its archaic, classical roots and replaced it with the language of nature, allegory, metaphor and symbolism. He is best known for *The Prophet* (1923), which was written in English. His books have sold more than 20 million copies worldwide, and his poetry has been translated into more than 20 languages. Later works include *Jesus the Son of Man* (1928) and *The Garden of the Prophets* (1934). 🕮 Suheil Badi Bushrui and Joe Jenkins, *Kahlil Gibran: Man and Poet* (1998)

Gibson, Sir Alexander Drummond 1926–95
Scottish conductor
Born in Motherwell, near Glasgow, he studied the piano at the Royal Scottish Academy of Music, Glasgow, and read music at Glasgow University. In 1948 he won a scholarship to the Royal College of Music, London, and after studying in Salzburg and Siena joined Sadler's Wells Opera as a répétiteur. From 1952 to 1954 he was associate conductor of the BBC Scottish Symphony Orchestra, then returned to Sadler's Wells in 1957 as the company's youngest musical director. In 1959 he moved to Scotland as the first native-born principal conductor and artistic director of the Scottish National Orchestra, bringing many new works to Scotland, often in advance of their London performances. In 1962 he helped to form Scottish Opera and as its artistic director until 1985 he was responsible for many notable successes, such as the first complete performance of

HECTOR BERLIOZ's *Les Troyens* ('The Trojans') in 1969 and, in 1971, the first production in Scotland of RICHARD WAGNER's *Ring* cycle in German. He retired from the Scottish National Orchestra in 1984. 🕮 Conrad Wilson, *Alex: The Authorised Biography of Sir Alexander Gibson* (1993)

Gibson, Charles Dana 1867–1944
US illustrator and cartoonist
Born in Roxbury, Massachusetts, he was an accomplished black-and-white artist who drew society cartoons for various periodicals such as *Life*, *Scribner's*, *Century* and *Harper's*. In his celebrated 'Gibson Girl' drawings, he created the idealized prototype of the beautiful, well-bred US woman.

Gibson, Edmund 1669–1748
English church jurist
He was born in Westmorland, and became Bishop of Lincoln (1716), then of London (1720). He edited the *Anglo-Saxon Chronicle* and translated WILLIAM CAMDEN's *Britannia*, but he is best known for his great *Codex iuris ecclesiastici Anglicani* (1713, 'The Code of English Ecclesiastical Law'). One of his life's ambitions was to reconcile the clergy and universities to the Hanoverian dynasty.

Gibson, Guy 1918–44
English airman
As a wing-commander in the RAF he led the famous 'dambusters' raid on the Möhne and Eder dams in 1943, for which he received the VC. He was killed on a later operation. His experiences are described in *Enemy Coast Ahead* (1946). 🕮 Richard Morris, *Guy Gibson* (1994)

Gibson, James Jerome 1904–79
US psychologist
Born in McConnelsville, Ohio, he was educated at Princeton and Edinburgh universities, and taught psychology at Smith College, Massachusetts (1928–49) and at Cornell University (1949–72). During World War II he served as director of the Research Unit in Aviation Psychology for the US air force, and his later research was partly a result of his wartime studies of such visual skills as those needed to land an aeroplane. He rejected the traditional reductionist approach of the psychological laboratory as inappropriate, and developed the concept of 'direct perception' of 'invariant' attributes of the visual world. His emphasis on the role of vision as the handmaiden for bodily action rather than as a means of achieving awareness of our surroundings has proved increasingly influential in the psychology of perception. He gained the Distinguished Scientist award of the American Psychological Association in 1961, and was elected to the National Academy of Sciences in 1967.

Gibson, John 1790–1866
British sculptor
Born in Gyffin, Gwynedd, Wales, the son of a market gardener, he found a patron in the historian William Roscoe (1753–1831), and from 1817 lived mainly in Rome, where he studied under ANTONIO CANOVA and BERTEL THORVALDSEN. His best works, in a neoclassical style, are *Psyche Borne by Zephyrs*, *Hylas Surprised by Nymphs* and *Venus with the Turtle*. He defended the innovation of tinting his figures, as in his *Venus* (1851–56, Walker Art Gallery, Liverpool), by reference to Greek precedents. Upon his death, all models of his marble works were left to the Royal Academy for the instruction of young sculptors. His public statues include those of WILLIAM HUSKISSON (1936, Pimlico, London), Sir ROBERT PEEL (1852, Westminster Abbey) and Queen VICTORIA (1856, House of Lords).

Gibson, Josh 1911–47
US baseball player
He was born in Buena Vista, Georgia. He was barred from major league baseball because he was black, and could play only in the black league. Playing for the Pittsburgh Homestead Grays and the Pittsburgh Crawfords, he became a legendary hitter. It is estimated that he hit more than 950 home runs in his career. In 1972 he was elected to the National Baseball Hall of Fame.

Gibson, Mel Columcille Gerard 1956–
US film actor and director
Born in Peekskill, New York, he emigrated to Australia in 1968 and studied at the National Institute of Dramatic Arts before making his film debut in *Summer City* (1977). He showed promise in *Tim* (1978) and gained international recognition in *Mad Max* (1979) and its two sequels. His many films include *Lethal Weapon* (1987), *Hamlet* (1990), *Maverick* (1994), *Ransom* (1996), *Chicken Run* (2000) and *Signs* (2002). He acted in and directed *The Man Without a Face* (1993) and *Braveheart* (1995), which won him Academy Awards for Best Director and Best Film. Also as director, his subtitled adaptation of the New Testament, *The Passion of the Christ* (2004), was controversial but successful; the film took over $600 million at the international box office. He followed it with *Apocalypto* (2006).

Gibson, Mike (Cameron Michael Henderson) 1942–
Irish rugby player
He was born in Belfast, Northern Ireland. A brilliant centre three-quarter, he established a worldwide reputation while still at Cambridge. He became one of Ireland's most capped players with a total of 69 caps, 25 of which came at fly half, four on the wing, and the rest as centre. Since retiring from the game, he has worked as a solicitor in Belfast.

Gibson, Richard 1615–90
English painter of miniatures and court dwarf
He was a page to CHARLES I and HENRIETTA MARIA, and the king gave away the bride when he married Anne Shepherd (1620–1709), like himself only 3ft 10in (117 cm) high. He later made several portraits of CROMWELL and was himself painted by Sir PETER LELY.

Gibson, Wilfrid Wilson 1878–1962
English poet and playwright
Born in Hexham, Northumberland, he was educated privately. From 1902 he wrote numerous volumes of verse, starting with *Urlyn the Harper and Other Songs*, on the plight of ordinary people faced with industrial change. Later volumes include *The Island Stag* (1947). He also wrote plays, such as *Daily Bread* (1910), and a collection of verse plays, *Within Four Walls* (1950). A realist, he was concerned with everyday matters, particularly industrial poverty. 🕮 J Gawsworth, *Ten Contemporaries* (1932)

Gide, André Paul Guillaume 1869–1951
French novelist, writer, diarist, and Nobel Prize winner
Born in Paris, the only child of a law professor, he was educated in a Protestant secondary school in Paris, and privately. He embarked on his career by writing essays, then poetry, biography, fiction, drama, criticism, memoirs and translation, and eventually completed more than 50 books. By 1917 he had emerged as the prophet of French youth and his unorthodox views were the subject of much debate. Although he married his cousin in 1892, he was bisexual and strongly attracted to men. His international reputation rests largely on his stylish novels, in which there is a sharp conflict between the spiritual and the physical. They include *L'Immoraliste* (1902, Eng trans *The Immoralist*, 1930), *La Porte étroite* (1909, Eng trans *Strait is the Gate*, 1924), *Les Caves du Vatican* (1914, Eng trans *The Vatican Swindle*, 1925), *La Symphonie pastorale* (1919, Eng trans *Two Symphonies*, 1931) and *Les Faux-monnayeurs* (1926, Eng trans *The Counterfeiters*, 1927, rev edn *The Coiners*, 1950). He was a founder of the magazine *La Nouvelle Revue Française*, and was a critic of French bureaucracy at home and in the African colonies. His *Journals*, covering the years from 1889 to 1949, are an essential supplement to his autobiography, *Si le grain ne meurt* (1920–21, Eng trans *If It Die...*, 1935). He was awarded the Nobel Prize in literature in 1947. 🕮 Alan Sheridan, *André Gide: A Life in the Present* (1999)

Gideon
Biblical Israelite judge
Most eminent of the judges of Israel, he was the son of Joash. He suppressed Baal-worship, and put an end to the seven years' domination of the Midianites by routing them near Mount Gilboa.

Gielgud, Sir John *See panel p619*

Gielgud, Maina 1945–
English dancer, artistic director and teacher
Born in London, she studied with many distinguished teachers prior to her 1961 debut with ROLAND PETIT's company. She performed with such companies as Ballet of the 20th Century (1967–71), London Festival Ballet (1972–75) and the Royal Ballet (1977–78), before working freelance from 1978. She was artistic director of the Australian Ballet (1983–96) and director of the Royal Danish Ballet (1997–99). The actor Sir JOHN GIELGUD was her uncle.

Gierek, Edward 1913–2001
Polish politician
Born in Porabka (Bedzin district), the son of a miner, he lived in France (1923–34) during the PIŁSUDSKI dictatorship, and joined the French Communist Party in 1931. He was deported to Poland in 1934, and lived in Belgium (1937–48), becoming a member of the Belgian Resistance. On his return to Poland in

Gielgud, Sir (Arthur) John 1904–2000
English actor and producer

John Gielgud was born in London and made his debut at the Old Vic Theatre there in 1921. He established his reputation in *The Constant Nymph* (1926), *Hamlet* (1929) and *The Good Companions* (1931), becoming a leading Shakespearean actor in the British theatre and directing many of the Shakespeare Memorial Theatre productions, as well as CHEKHOV's *The Cherry Orchard* (1954) and Enid Bagnold's *The Chalk Garden* (1956) in London. He also appeared in many films, notably as Disraeli in *The Prime Minister* (1940) and as Cassius in *Julius Caesar* (1952). He played Othello at Stratford (1961) and Prospero at the National Theatre (1974). Like LAURENCE OLIVIER, he adapted to changing dramatic styles and to the new wave of plays popularized by the Royal Court Theatre, appearing during the 1960s and 1970s in plays by DAVID STOREY, EDWARD BOND and HAROLD PINTER. He went on to appear increasingly in cameo roles in films, although he won an Academy Award for Best Supporting Actor for *Arthur* (1981), and played the lead role and voiced all the others in PETER GREENAWAY's *Prospero's Books* (1991). Later film appearances include *Shine* (1996) and *Portrait of a Lady* (1996). He also returned to the stage (1988), playing in Hugh Whitemore's *Sir Sydney Cockerell: The Best of Friends*. He was awarded the BAFTA fellowship award for his lifetime contribution to showbusiness (1992). His first autobiography, *Early Stages*, was published as early as 1938 (rev edn 1976); other books include *Stage Directions* (1963), *Distinguished Company* (1972), *Gielgud: An Actor and His Time* (1979, with John Miller and John Powell), *Shakespeare: Hit or Miss* (1991; also published in 1992 as *Acting Shakespeare*) and *Notes from the Gods* (1994). He was knighted in 1953 and was appointed to the Order of Merit in 1996.

📖 Jonathan Croall, *Gielgud: A Theatrical Life 1904–2000* (2001)

> 'Acting is half shame, half glory. Shame at exhibiting yourself, glory when you can forget yourself.'
>
> – Quoted in Ronald Harwood (ed), *The Ages of Gielgud* (1984).

1948, he joined the ruling Polish United Workers' Party (PUWP), being inducted into its politburo in 1956, and was appointed party boss of Silesia. He became PUWP leader in 1970 when WŁADYSŁAW GOMUŁKA resigned after strikes and riots in Gdansk, Gdynia and Szczecin. Head of the party's 'technocrat faction', he embarked on an ambitious industrialization programme. This plunged the country heavily into debt and, following a wave of strikes in Warsaw and Gdansk, spearheaded by the 'Solidarity' free trade-union movement, he was forced to resign in 1980.

Gieseking, Walter 1895–1956
German pianist

Born in Lyons, France, of German parents, he studied in Hanover and made his first public appearance in 1915. After World War I he established an international reputation, especially in the works of DEBUSSY and RAVEL. At his death he was recording the complete piano works of MOZART and BEETHOVEN's piano sonatas.

Giffard, Henri 1825–82
French engineer and inventor

Born in Paris, he studied there at the Collège Bourbon and the École Centrale. In 1852 he built a light three-horsepower steam engine, fitted it with a propeller and succeeded in piloting a balloon, steered by a rudder, over a distance of 17 miles (27.4km). This can be considered as the first powered and controlled flight ever achieved, in a craft which was a primitive example of the dirigible or semi-rigid airship. In 1858 he patented a steam injector, which became widely used in locomotives and other types of steam engine and made him a fortune. He continued with his aeronautical experiments, and bequeathed his money to the state for humanitarian and scientific purposes.

Giffen, Sir Robert 1837–1910
Scottish economist and statistician

He was born in Strathaven, Strathclyde. At first a journalist, he eventually became comptroller-general of the commercial, labour and statistical department of the Board of Trade. His works include *Essays in Finance* (1879–86), *The Growth of Capital* (1890) and *Case against Bimetallism* (1892).

Gifford, Adam 1820–87
Scottish judge

Born in Edinburgh, he was called to the Bar in 1849, and was raised to the bench as Lord Gifford in 1870. In his will he left endowments to Edinburgh, Glasgow, Aberdeen and St Andrews universities for a regular series of lectures on natural theology, which have enabled many leading thinkers to expound their views on society and morals.

Gifford, William 1756–1826
English editor and critic

Born in Ashburton, Devon, the son of a glazier, he went to Exeter College, Oxford, and after graduating travelled on the Continent. His first poem, the *Baviad* (1794), was a satire on the Della Cruscan school of poetry, and the *Maeviad* (1796) attacked corrupt drama. His translation of JUVENAL, with his autobiography, appeared in 1802. He edited PHILIP MASSINGER, JOHN FORD, JAMES SHIRLEY and BEN JONSON, and was the first editor of WALTER SCOTT's *Quarterly Review* (1809–24). He possessed much satirical acerbity, but little merit as a poet, and as a critic was unduly biased.

Gigli, Beniamino 1890–1957
Italian tenor

Born in Recanati, he won a scholarship to the Liceo Musicale in Rome. He made his operatic debut in AMILCARE PONCHIELLI's *La Gioconda* ('The Joyful Girl') in 1914, and by 1929 had a worldwide reputation. A lyric-dramatic tenor of great natural gifts, he compensated for technical deficiencies and weakness as an actor by the vitality of his singing, and was at his best in the works of VERDI and PUCCINI.

Gijsen, Marnix, *pseudonym of* Jan-Albert Goris 1899–1984
Flemish writer and diplomat

Born in Antwerp and regarded as one of the most important authors in the Flemish–Dutch language, he also wrote in English and French. He pursued a dual career as a writer and diplomat, retiring in 1968. He first emerged as a poet, much influenced by the third phase of German Expressionism. His ironic, elegant fiction began to appear after World War II, for example *Het boek van Joachim van Babylon* (1947, Eng trans *The Book of Joachim of Babylon*, 1951) and *Klaaglied om Agnes* (1951, Eng trans *Lament for Agnes*, 1957). In the first he presents the biblical Susanna as a modern wife, and the second is an autobiographical story about the woman whom he loved in his youth. He was a Catholic who turned agnostic, and his revulsion at the intolerance of his church is portrayed in *De leerjaren van Jan-Albert Goris* (1975, 'Jan-Albert Goris's Years of Apprenticeship'). 📖 R P Meijer, *Literature of the Low Countries* (1978); M Gijsen, *Belgian Letters* (1946)

Gilbert of Sempringham, St c.1083–1189
English priest

Born in Sempringham, Lincolnshire, he was educated in Paris. In 1148 he founded, at his birthplace, the Gilbertine Order for both monks and nuns, and lay sisters and brothers. It was dissolved at the Reformation. His feast day is 4 February.

Gilbert, Sir Alfred 1854–1934
English sculptor

Born in London, he studied in France and Italy, where he was influenced by the work of DONATELLO, and executed work of remarkable simplicity and grace, including his aluminium statue of *Eros* (1886–93, Piccadilly Circus, London), his bronze *Icarus* (1884, National Museum of Wales, Cardiff) and *Comedy and Tragedy* (1892, Leeds). He was also a considerable goldsmith. In Windsor he executed the tomb of the Duke of Clarence in the Albert Memorial Chapel (1892–1926, polychrome metal with marble), considered to be his masterpiece. His final work was the Alexandra Memorial (1928–32, London). He was professor at the Royal Academy, London, from 1900 to 1909.

Gilbert, Cass 1859–1934
US architect

Born in Zanesville, Ohio, he was educated at the Massachusetts Institute of Technology (MIT). He is remembered as the designer of the first tower skyscraper, the flamboyant 66-storey Woolworth Building in New York (1912), then the tallest building in the world (not counting the Eiffel Tower). He designed many equally outstanding public buildings, including

the US Customs House in New York City (1907) and the Supreme Court Building in Washington, DC (1935), and the campuses of the universities of Minnesota (Minneapolis) and Texas (Austin).

Gilbert, Grove Karl 1843–1918
US geomorphologist, stratigrapher, structural geologist and cartographer
Born and educated in Rochester, New York, he joined the Ohio Geological Survey (1869–71), working on the 'Wheeler' survey of territories west of the 100th meridian (1874–76). In subsequent survey work in the Henry Mountains (1875–76) he recognized the nature of the intrusions named laccoliths. On joining the US Geological Survey he worked in Utah and studied the ancient lakes of the Great Basin. His *Monograph on Lake Bonneville* (1890) describes the history of the Pleistocene climate and hydrography of the Great Basin, and discusses the subsequent deformation of the old shore levels as throwing light on the problem of isostatic readjustments of the Earth's crust. He also made notable studies in glacial geology, the history of the Niagara River and recession of the falls.

Gilbert, Sir (Joseph) Henry 1817–1901
English agricultural chemist
Born in Hull, he was educated at Glasgow and London. From 1843 he was associated with Sir JOHN BENNET LAWES in the Rothamsted Agricultural Laboratory and in 1884 became professor of rural economy at Oxford. He is particularly noted for his work on nitrogen fertilizers.

Gilbert, Sir Humphrey 1537–83
English navigator
Born in Buxham, he served under Sir HENRY SIDNEY in Ireland (1566–70), was made governor of Munster, then campaigned in the Netherlands (1570–75). In 1578 he led an unsuccessful colonizing expedition to the New World. In a second attempt in 1583 he landed in Newfoundland, claiming it for the Crown, and established a colony at St John's. He was drowned on the homeward journey. He was the half-brother of Sir WALTER RALEIGH.

Gilbert, Walter 1932–
US molecular biologist and Nobel Prize winner
Born in Boston, he studied physics and mathematics at Harvard and Cambridge. From 1959 he taught physics at Harvard, where he was professor of biochemistry (1968–72), professor of molecular biology (1972–81) and Carl M Loeb University Professor since 1987. In 1978 he founded the genetic engineering company Biogen NV and served as its chairman for three years. During the 1960s he isolated a bacterial repressor molecule, which JACQUES MONOD and FRANÇOIS JACOB had suggested to be centrally involved in controlling gene action. Using methods developed by FREDERICK SANGER, he described the nucleotide sequence of DNA to which the repressor molecule binds. For this work he shared the 1980 Nobel Prize in chemistry with Sanger and PAUL BERG. Since the late 1980s he has been a vigorous supporter of the Human Genome Initiative. In 2002 he shared the Biotechnology Heritage Award with his Biogen colleague PHILLIP A SHARP.

Gilbert, William 1544–1603
English physician
Born in Colchester, Essex, he was elected Fellow of St John's College, Cambridge, in 1561 and in 1573 settled in London, where he was appointed physician to Queen ELIZABETH I (1601), and King JAMES VI AND I (1603). In his *De Magnete* (1600) he established the magnetic nature of the Earth and he conjectured that terrestrial magnetism and electricity were two allied emanations of a single force. He was the first to use the terms 'electricity', 'electric force' and 'electric attraction', and to point out that amber is not the only substance which when rubbed attracts light objects. The gilbert unit of magnetomotive power is named after him.

Gilbert, William 1804–89
English novelist
Born in Bishopstoke, Hampshire, he abandoned the East India Company's service for the study of surgery, and that in turn for literature. His 30 works, published from 1858 onwards, include the delightful *King George's Middy* (1869), a biography of LUCREZIA BORGIA, and several novels in the style of DANIEL DEFOE. 🕮 *The Doctor of Beauweir: An Autobiography* (2 vols, 1869)

Gilbert, Sir W(illiam) S(chwenck) 1836–1911
English parodist and librettist
Born in London, he studied at King's College London and became a clerk in the Privy Council Office (1857–62). Called to the Bar in 1864, he failed to attract lucrative briefs and made his living from magazine contributions to *Punch* and *Fun*, for which he wrote much humorous verse under his boyhood nickname 'Bab'. This verse was collected in 1869 as the *Bab Ballads*. He also wrote a Christmas burlesque, *Dulcemara, or The Little Duck and The Great Quack* (1866) and *The Palace of Truth* (1870), which both made a hit on the stage, followed by *Pygmalion and Galatea* (1871). But it is as the librettist of Sir ARTHUR SULLIVAN'S light operas that he is best remembered. Their famous partnership, which began in 1871, scored its first success with *Trial by Jury* under RICHARD D'OYLY CARTE'S able management at the Royalty Theatre, London, in 1875. Jibing, topsy-turvy wit, accentuated by Sullivan's scores, was characteristic of the light operas that followed, from *The Sorcerer* (1877), *HMS Pinafore* (1878) and *The Pirates of Penzance* (1879) to *The Gondoliers* (1889) and *The Grand Duke* (1896). Their works were performed initially at the Opera Comique and from 1881 in the new Savoy Theatre which had been specifically built for them by D'Oyly Carte. It was a carpet in the Savoy, considered too costly by the ever-argumentative Gilbert, that touched off a quarrel between him and Sullivan. They created only three more pieces before Sullivan's death and EDWARD GERMAN'S efforts to fill the gap in *Fallen Fairies* (1909) proved unsuccessful. 🕮 Jane W Stedman, *W S Gilbert: A Classic Victorian and his Theatre* (1996)

Gilbert and **George**, *properly* **Gilbert Proesch** 1943– and **George Passmore** 1942–
English avant-garde artists
Born in the Dolomites in Italy, Gilbert studied at the Academy of Art in Munich and then at St Martin's School of Art, London, where he met Plymouth-born George, who had studied at Dartington Hall and at the Oxford School of Art. They made their name in the late 1960s as performance artists (the 'singing sculptures'), with faces and hands painted gold, holding their poses for hours at a time. Continuing to pose as 'living sculptures', they have also more recently concentrated on photopieces, assembled from a number of separately framed photographs which key together to make a single whole, such as *Death Hope Life Fear* (1984, Tate Collection, London). Many photopieces are concerned with sex and bodily substances, for example *The Naked Shit Pictures* (1995) and *New Horny Pictures* (2001), thus ensuring controversy. They talk and seem to think as one, seldom dropping their act. Their work is exhibited internationally, and they won the Turner Prize in 1986 and have exhibited at the Venice Biennale in 1978, 1979 and 1993 (in the 'Art against AIDS' exhibition). 🕮 Robin Dutt, *Gilbert & George* (2004)

Gilbey, Sir Walter 1831–1914
English wine merchant
Born in Bishop's Stortford, Hertfordshire, he was founder of the well-known wine company, and was also a horse-breeder and agriculturist.

Gilbreth, Frank Bunker 1868–1924
US engineer and efficiency expert
Born in Fairfield, Maine, he began work as an apprentice bricklayer in 1885, and from that time devoted himself to developing time-and-motion studies of industrial processes as a means of increasing efficiency. Later he and his wife Lillian Evelyn (1879–1972) made detailed laboratory studies of the basic elements involved in manual work, which they called 'therbligs', such as search, find, select, grasp, assemble, and so on. With FREDERICK WINSLOW TAYLOR they were the founders of scientific management as it is universally practised today. The Gilbreths had twelve children, two of whom collaborated in writing the popular book and film *Cheaper by the Dozen* (1949–50).

Gilchrist, Percy Carlyle 1851–1935
English metallurgist
Born in Lyme Regis, Dorset, he studied at the Royal School of Mines, London, where he became a Murchison Medallist. He took a post as chemist, first at Cwm Avon ironworks in south Wales and then at Blaenavon ironworks. There he reluctantly agreed to the requests of his cousin, SIDNEY GILCHRIST THOMAS, that he should assist in carrying out the experimental work necessary to test and develop Thomas's ideas on dephosphorization to remove the phosphate impurities in iron ore. The Gilchrist–Thomas process greatly increased the potential steel production of the world by making possible the use of the large European phosphoric iron-ore fields. After Thomas's early death, Gilchrist became active in the steel industry, working hard to promote basic steelmaking both by BESSEMER converter and open-hearth furnace.

Gildas, St c.493–570
Roman–British historian and monk
Born in Strathclyde, he fled the strife that raged in his neighbourhood and went to Wales. After his wife died he became a monk. His famous treatise, *De Excidio et Conquestu Britanniae*, probably written between 516 and 547, is the only extant history of the Celts, and the only contemporary British version of events from the invasion of the Romans to his own time. His feast day is 29 January.

Giles or **Aegidius** or **Egidius, St** d.c.700
Greek hermit
Born in Athens, traditionally of royal descent, he renounced his patrimony, and lived for two years with St Caesarius at Arles. He then retired to a hermitage, where he lived on herbs and the milk of a hind. A Frankish king, hunting the hind, discovered him and was so impressed with his holiness that he built a monastery on the spot and made him its abbot. He is the patron of lepers, beggars and cripples, and his feast day is 1 September.

Giles, *properly* **Carl Ronald Giles** 1916–95
British cartoonist and animator
Born in London, he was a self-taught artist, and worked his way up from film-company office boy (1930) to animator on advertising films, then worked on the *Come On Steve* cartoons (1935). He joined *Reynolds News* in 1938 to draw weekly topical cartoons and a strip, *Young Ernie*, before transferring to the *Daily Express* and *Sunday Express* (1943), where he developed his 'Giles Family' cartoons, dominated by Grandma.

Giles, (William) Ernest (Powell) 1835–97
Australian explorer
Born in Bristol, England, he was educated at Christ's Hospital, London, then emigrated to Adelaide in 1850, where he worked in the Victoria goldfields. From 1861 to 1865 he searched for pastures inland from the Darling River. Under the sponsorship of Sir FERDINAND MUELLER, he was sent to explore areas to the west of the central Overland Telegraph between Adelaide and Darwin, first in 1872, when he discovered Lake Amadeus, and again in 1874, when he penetrated the Gibson Desert, named after a companion of his who died there. He tried again (1875–76), and managed to cross from Port Augusta to Perth, a distance of 2,500 miles (4,025km) in five months, and back along a line just south of the Tropic of Capricorn. This extraordinary feat of endurance is described in his *Australia Twice Traversed* (1889).

Giles, Herbert Allen 1845–1935
English scholar and linguist
Born in Oxford, he had a career in the diplomatic service in China between 1867 and 1892. He returned to Great Britain and from 1897 to 1932 was professor of Chinese at Cambridge. Although interest in the Chinese language was initially small and he had few pupils, he published a great number of books on Chinese language and civilization, which did much to arouse a serious interest in Chinese culture in Great Britain. He modified the romanization system of Sir THOMAS WADE, his predecessor at Cambridge, and his use of this Wade–Giles system (as it came to be known) in his *Chinese–English Dictionary* (1892, 1912) established it as the preferred transliteration system in English-speaking countries for most of the 20th century. Among his other works are a *Chinese Biographical Dictionary* (1898), *A History of Chinese Literature* (1901, 1923) and *An Introduction to the History of Chinese Pictorial Art* (1905, 1918).

Gill, (Louis) André, *pseudonym of* **Louise André Gosset de Guines** 1840–85
French caricaturist
He lampooned the famous of the day by drawing them with outsized heads and dwarfish bodies.

Gill, Sir David 1843–1914
Scottish astronomer
Born in Aberdeen and educated at Marischal College, Aberdeen (1858–60), he was inspired by the teaching of JAMES CLERK MAXWELL. He became a watchmaker and his serious scientific career did not begin until 1872, when he was put in charge of Lord Lindsay's private observatory at Dunecht, Aberdeenshire. He achieved recognition for his high-precision determinations of the solar distance made on expeditions to Mauritius (1874) and Ascension Island (1877). Soon afterwards he was appointed HM Astronomer at the Royal Observatory, Cape of Good Hope (1879–1907). He initiated a photographic survey of the southern sky and became responsible for the immense projects of the *Carte du Ciel* and the *Astrographic Catalogue*; some 22,000 photographs were taken in the Cape's allotted part in this undertaking. Among his other contributions was the geodetic survey of South Africa. He was twice awarded the gold medal of the Royal Astronomical Society (1882, 1908), of which he became president after his retirement (1909–11). He was knighted in 1900.

Gill, (Arthur) Eric (Rowton) 1882–1940
English sculptor, engraver, writer and typographer
Born in Brighton, Sussex, he trained as an architect, but then took up letter-cutting and masonry and later engraving. In 1907 he settled in Ditchling, East Sussex, where he founded an ideal community. His *Mother and Child* (1910–11) is in the National Museum of Wales, Cardiff. Through the influence of AUGUSTUS JOHN he exhibited at the Chenil Galleries, Chelsea, in 1911 (the year he carved *Ecstasy*, in the Tate, London), and from then on he maintained a steady output of stone and wood carvings, as well as engravings (for his own press, St Dominic, and also for the Golden Cockerel Press). He also created type designs, such as Perpetua, Bunyan and Gill Sans-serif, subsequently adopted by Monotype and used all over the world. He also wrote a stream of books dealing with his various crafts, his thoughts and his religious beliefs, including *Art* (1934) and *Autobiography* (1940). His sculptures include the *Stations of the Cross* in Westminster Cathedral, London (1913), war memorials up and down Great Britain after World War I, the gigantic figure *Mankind* (1928, Tate) and *Prospero and Ariel* (1931, Broadcasting House, London). He joined the Fabian movement, but later found the socialist ethic limited and joined the Catholic Church. In 1928 he founded the Order of St Dominic at High Wycombe, Buckinghamshire, in 1930 he executed the League of Nations panels in Geneva, and in 1933 he became a founder member of Artists International, set up to oppose fascism.

Gillespie, Dizzy (John Birks) 1917–93
US jazz trumpeter, composer and bandleader
He was born in Cheraw, South Carolina, and studied musical theory and harmony at Laurinburg Institute, North Carolina. He began his career in swing bands led by Teddy Hill, CAB CALLOWAY, BENNY CARTER and Charlie Barnet. Along with CHARLIE PARKER, THELONIOUS MONK and others, he was involved in informal jam session experiments in New York that produced the bebop style in the 1940s. In 1945 Gillespie formed the first of his several big bands working in the new idiom, and in 1956 he led an orchestra on two international tours as cultural missions for the US State Department. Although Gillespie worked intermittently with large orchestras, he is best known as a leader of small combos and as a virtuoso who extended the working range of the trumpet. 🕮 Tony Gentry, *Dizzy Gillespie: Musician* (1991)

Gillespie, James 1726–97
Scottish snuff and tobacco merchant
Based in Edinburgh, he bought the estate of Spylaw, and left money to found a hospital (designed by William Bush) in 1801–03. This became a school run by the Merchant Taylors' Company, known as James Gillespie's.

Gillette, King Camp 1855–1932
US inventor and businessman
He was born in Fond du Lac, Wisconsin, and educated in Chicago. After working for years as a travelling salesman, he invented a safety razor and disposable blade, which he started marketing in 1901. A Utopian socialist, he set up a 'World Corporation' in Arizona in 1910 to advocate a world planned economy. He wrote on social theories in various publications such as *Gillette's Industrial Solution* (1900) and *The People's Corporation* (1924).

Gilliam, Terry Vance 1940–
British film director, writer, animator and actor
Born in Medicine Lake, Minnesota, USA, he studied at Occidental College, California, and worked in advertising before producing the animated sequences for the Monty Python's Flying Circus television series and films, also co-writing, co-directing and acting in many of them. His films as sole director are often fabulous, eccentric and visually stunning, though not always successful at the box office. They include *Time Bandits* (1981), *Brazil* (1985), *The Fisher King* (1991), *Twelve Monkeys* (1996), *Fear and Loathing in Las Vegas* (1998) and *The Brothers Grimm* (2005). A resident of London since the 1960s, he gave up his US citizenship in 2006. 🕮 Bob McCabe, *Dark Knights and Holy Fools: The Art and Films of Terry Gilliam* (1999)

Gilliatt, Penelope Ann Douglas 1932–93
English film and theatre critic, novelist and screenwriter
She was born in London. She wrote a number of novels, including *The Cutting Edge* (1978), which describes the

relationship between two brothers, as well as six collections of short stories, including *Splendid Lives* (1977), a sympathetic study of a fleet of eccentrics. She was nominated for an Academy Award for her screenplay for *Sunday Bloody Sunday* (1971), based upon her novel *One by One* (1965). Her profiles of film-makers such as JEAN RENOIR and JACQUES TATI, several of which appeared in *The New Yorker*, are considered among the best of their kind.

Gilliéron, Jules 1854–1926
Swiss linguist
Born in Neuveville, he studied under the philologist Gaston Paris (1839–1903) at the École des Hautes Études in Paris, where he himself was professor of romance dialectology (1883–1926). His *Atlas linguistique de la France*, produced in collaboration with Edmond Edmont and published between 1902 and 1912, was a stimulus to, and provided a basic model for, further studies in linguistic geography. Among Gilliéron's other works are *La Généalogie des mots qui désignent l'abeille* (1918, 'The Etymology of Words Relating to the Bee') and *Pathologie et thérapeutique verbales* (1915–21, 'The Pathology and Treatment of Words').

Gillies, Sir Harold Delf 1882–1960
New Zealand plastic surgeon
Born in Dunedin, he was educated at Wanganui College and Cambridge. In 1920 he published his *Plastic Surgery of the Face*, which established this art as a recognized branch of medicine. During World War II he was responsible for setting up plastic surgery units throughout Great Britain and was personally in charge of the largest one at Park Prewett Hospital, Basingstoke. In 1957 he published *The Principles and Art of Plastic Surgery*, which became a standard work on the subject.

Gilligan, Carol 1936–
US psychologist
She was born in New York City and completed her PhD at Harvard before joining the staff there in 1967, becoming professor of gender studies in 1997. In 2002 she was appointed university professor at New York University. Her studies in gender differences in moral development, published in *A Different Voice* (1982), point out the biases in studies that establish male behaviour as normal and female behaviour as different or abnormal. In 1984 she was recognized by *Ms. Magazine* (founded by GLORIA STEINEM) as Woman of the Year, and in 1987 she founded the Harvard Project on Women's Psychology and the Development of Girls. Her other books include *Mapping the Moral Domain: A Contribution of Women's Thinking to Psychological Theory and Education* (1988), *Meeting at the Crossroads: Women's Psychology and Girls' Development* (with Lynn Mikel Brown, 1992) and *The Birth of Pleasure* (2002). She has also written for the stage.

Gillray, James 1757–1815
English caricaturist
Born in Chelsea, London, the son of a Lanark trooper, he first became known as a successful engraver about 1784, and between 1779 and 1811 issued 1,500 caricatures. They are full of humour and satire aimed against the French, NAPOLEON I, GEORGE III, the leading politicians and the social follies of his day. For the last four years of his life he was thought insane.

Gilly, Friedrich 1772–1800
German architect
Born in Berlin, he was the son of an architect. His work displayed considerable geometric control, evidently inspired by that of the French visionary architects in Paris. After a travelling scholarship in 1797, he became professor of optics and perspective at the Academy of Architecture in Berlin (1798). His designs include the Funerary Precinct and Temple to FREDERICK II, THE GREAT of Prussia (1796) and the Prussian National Theatre, Berlin (1798), both severe, classical designs.

Gilman, Alfred Goodman 1941–
US pharmacologist and Nobel Prize winner
Born in New Haven, Connecticut, he studied at Yale and at Case Western Reserve University before accepting research posts in pharmacology at the National Institute of Health, Bethesda, Maryland (1969–71), and at the University of Virginia, Charlottesville (1971–81), becoming a professor of pharmacology there in 1977. He took over the department of pharmacology at the University of Texas, Dallas, in 1981. In 1994 he shared the Nobel Prize in physiology or medicine with MARTIN RODBELL for their discovery of G-proteins that enable cells to respond to signals from other cells or from outside the body. Since 2005 he has been dean of Southwestern Medical School in Dallas.

Gilman, Charlotte (Anna) Perkins, *née* **Perkins**, *first married name* **Stetson** 1860–1935
US feminist and writer
Born in Hartford, Connecticut, she was educated at Rhode Island School of Design. Moving to California, she published her first stories, most memorably 'The Yellow Wall-Paper' (1892), and a collection of poetry, *In This Our World* (1893). She was married to Charles Stetson from 1884 to 1894, and married George Gilman in 1900. She lectured on women's issues, as well as wider social concerns, and in 1898 wrote *Women and Economics*, now recognized as a feminist landmark. She also founded, edited and wrote for the journal *The Forerunner* (1909–16). Her later works include *The Man-made World* (1911) and *His Religion and Hers* (1923). She committed suicide on being told that she was suffering from incurable cancer. 🕮 *The Living of Charlotte Perkins Gilman: An Autobiography* (1935)

Gilman, Harold 1878–1919
English artist
Born in Rode, Somerset, he studied at the Slade School, London, and in Spain. He was associated with the Camden Town Group (1911), and was later the first president of the London Group. Influenced by CAMILLE PISSARRO and VAN GOGH, he used Fauve colouring to paint interiors and portraits, as seen in his *Mrs Mounter* (Tate Britain, London).

Gilmore, Dame Mary Jean 1865–1962
Australian poet and author
She was born in Cotta Walla, near Goulburn, New South Wales. Her early teaching career in the mining town of Broken Hill gave her a lasting interest in the labour movement and she became the first woman member of the Australian Workers' Union. In 1896 she joined WILLIAM LANE's Utopian 'New Australia' settlement in Paraguay, South America. There she married a shearer, William Gilmore, and they returned to Australia (1902) and settled in Sydney (1912). She campaigned for the betterment of the sick and the helpless through the women's column, which she edited for over 20 years, in the *Sydney Worker* newspaper, but also in her poetry. *Marri'd and Other Verses* (1910) was followed by *The Passionate Heart* (1918), *The Wild Swans* (1930) and *Battlefields* (1939), and in her 89th year she published her last collection, *Fourteen Men* (1954). Her memoirs *Old Days: Old Ways* (1934) and *More Recollections* (1935) illustrate her lifelong efforts to preserve early Australian traditions and folklore. She was created DBE in 1937, and WILLIAM DOBELL's controversial portrait of her was unveiled on her 92nd birthday (1957). A collection of tributes to her was published in 1965, and an edition of her letters in 1980. 🕮 W H Wilde, *Three Radicals* (1969)

Gilmour, John Scott Lennox 1906–86
English botanist
Born in London and educated at Uppingham and Clare College, Cambridge, he was curator of the herbarium at Cambridge (1930–31) but then went to Kew (1931–46), becoming assistant director in 1946. From 1946 to 1951 he was director of the Royal Horticultural Society's gardens at Wisley. He then returned to Cambridge, where he was director of the botanic gardens from 1951 to 1973. One of the original proponents of the 'deme' terminology, a flexible classification system, he was one of the founder members of the Classification Society (later Systematics Association) in 1937. Gilmour was a philosopher, poet, musician, bibliophile, athlete and humanist, as well as a botanist. He published many papers on the theory and philosophy of systematics, chaired many committees on horticultural nomenclature, and was influential in the establishment of the International Code of Nomenclature of Cultivated Plants.

Gilpin, Bernard, *known as* **the Apostle of the North** 1517–83
English Anglican clergyman
Born in Kentmere Hall, Westmorland, he studied at Queen's College, Oxford, and at Louvain and Paris, and became archdeacon of Durham in 1556. His honesty with regard to pluralities brought accusations of heresy which, however, were unsuccessful, and on Queen ELIZABETH I's accession in 1558 he was appointed rector of Houghton le Spring. He turned down many lucrative offers, preferring to minister to his parish and to make preaching excursions into the remotest parts of northern England, which earned him his nickname.

Gilpin, John 1930–83
English dancer
Born in Southsea, Hampshire, he was a child actor. He studied at the Rambert School, joining Ballet Rambert in 1945. In 1949 he was a principal with ROLAND PETIT's Ballets de Paris, returning

to Great Britain in 1950 to join London Festival Ballet, where he became artistic director (1962–65). Known for his exacting technique, he created roles in Robin Howard's *The Sailor's Return* (1947), FREDERICK ASHTON'S *Le Rêve de Leonor* (1949) and ANTON DOLIN'S *Variations for Four* (1957).

Gilpin, Laura 1891–1979
US photographer
Born in Colorado, she was given a Kodak 'Brownie' camera in 1903, and made autochromes (the first true colour photographic process to be widely available) in Colorado Springs from 1908. In 1916 she photographed in the Grand Canyon. Also that year, she studied at the Clarence H White School of Photography in New York. She opened a portrait studio in 1918, worked on commercial commissions from the 1920s, and held solo exhibitions from 1924. She undertook public-relations photography for the Boeing Aircraft Company in Wichita, Kansas (1942–45), and in 1945 photographed the Rio Grande from source to mouth, documenting the lifestyle of the Navaho people. She had an important solo exhibition at the Witkin Gallery in New York (1973–74) and a retrospective at the Museum of New Mexico, Santa Fe (1974–75). Her publications include *The Rio Grande: River of Destiny* (1949) and *The Enduring Navaho* (1968).

Gilpin, William 1724–1804
English clergyman, writer and artist
Born in Scaleby, Cumbria, he was educated at Oxford, and in 1777 became vicar of Boldre in Hampshire. A leader of the 18th-century cult of the picturesque, he was the author of works on the scenery of Great Britain, illustrated with his own aquatint engravings. He is satirized by WILLIAM COMBE in *Dr Syntax* (1809). His brother Sawrey Gilpin (1733–1807) was a successful animal painter, especially of horses.

Gil Polo, Gaspar c.1535–1591
Spanish poet
Born in Valencia, he continued JORGE DE MONTEMAYOR'S *Diana* in his *Diana enamorada* (1564, 'Diana in Love'), which was very popular throughout Europe, and was used by both CERVANTES and SHAKESPEARE as a basis for a plot. It marks a stage in the history of the novel.

Gil Robles, José María 1898–1980
Spanish politician and academic
As a young and pugnacious leader of the Spanish Confederation of Autonomous Rightist Groups (CEDA), he was the principal figure of the right during the Second Republic. Effectively dominating the governments of 1933 to 1935, as minister of war he prepared the army for the 1936 uprising which began the Civil War. Exiled as a member of the monarchist opposition to the FRANCO regime (1936–53, 1962–65), he was the founder and first president of the Popular Democratic Federation, and also created the Christian Social Democratic Party. However, in the 1977 general election his party was annihilated.

Gilruth, Robert Rowe 1913–2000
US engineer
Born in Nashwauk, Minnesota, he graduated from the University of Minnesota in aeronautical engineering, and was associated ever after with the design and operation of high speed and supersonic aircraft, guided missiles, and space vehicles. In 1958 he was appointed head of the NASA man-in-space programme, which put the first American, JOHN GLENN, into Earth orbit in 1962. The next objective, known as the Apollo lunar landing project, was achieved under his direction on 20 July 1969, when NEIL ARMSTRONG, on the Apollo 11 mission, became the first man to set foot on the Moon.

Gilson, Étienne 1884–1978
French historian and philosopher
Professor at the Sorbonne (1921–32) and the Collège de France (1932–51), he was founder of the Pontifical Institute of Medieval Studies at Toronto University (1929). He is known especially for his works on medieval Christian philosophy.

Gil Vicente *See* VICENTE, GIL

Gimson, Ernest William 1864–1919
English architect and furniture designer
Born in Leicester, he was recommended by WILLIAM MORRIS to take up articles with J D Sedding in London, where he met Ernest Barnsley (1863–1926) and his brother Sidney (1865–1926). Gimson designed, within the idiom of the Arts and Crafts movement, a number of houses around Leicester, and other buildings. However, he is mainly associated with the design of furniture. After a short-lived furniture-making enterprise, Kenton & Co (1890–92), he and the Barnsley brothers moved in 1895 to the Cotswolds, where they all designed or made furniture. Gimson's own designs included ladder-back chairs and cabinets, mostly in untreated native timbers, as well as metalwork such as sconces and firedogs.

Ginckell or **Ginkel, Godert de, 1st Earl of Athlone** 1630–1703
British soldier
Born in Utrecht, the Netherlands, he accompanied WILLIAM III to England in 1688. He fought in the Battle of the Boyne (1690), and on the king's return to England was left as commander-in-chief in Ireland. He reduced Ballymore and Athlone, defeated St Ruth at Aughrim, and finally captured Limerick (1691). In 1692 he was created Earl of Athlone. He afterwards commanded the Dutch troops under the Duke of MARLBOROUGH (1702).

Giner de los Ríos, Francisco 1839–1915
Spanish educationalist
Born in Ronda, Malaga, he became Spain's leading 20th-century educational philosopher and reformer. After his career as professor of philosophy had twice been interrupted, the second time by imprisonment because of his refusal to grovel to reactionary authority, he founded, with a group of intellectuals, the *Instituto Libre de Enseñanza* in Madrid (1876). This was a kind of free university, through which three generations of distinguished writers and artists passed, such as FEDERICO GARCÍA LORCA, whose generation enjoyed a brief flowering in the Republic (1931–36). Pedagogically ahead of his time, Giner saw education as primarily 'making man' (*formar hombres*). His Instituto rejected textbooks and examinations, and students were encouraged to go to primary sources. Essential activities included visits to factories, farms and the mountains, and workshop discussions. His educational ideas, which owe much to the philosophers Krause and JOHN LOCKE, are set out in *Ensayos sobre educación* (1902).

Gingrich, Newt(on) Leroy 1943–
US politician
Born in Harrisburg, Pennsylvania, and educated at Emory and Tulane universities, he was elected to Congress as a US representative from Georgia in 1978. He became a leader of conservative Republicans and launched scathing attacks on House Democrats, successfully using ethics charges to force the resignation of Speaker Jim Wright. He became House minority whip in 1989 and Speaker of the House in 1995, but his popularity dropped sharply in 1996 as the public tired of his stridency. He was fined $300,000 in 1997 for violating House rules and then misleading the Congressional committee investigating his case. He continued as Speaker of the House until 1999, when he resigned both the speakership and his seat. He is the author of several books, including *Winning the Future* (2005).

Ginkel, Godert de *See* GINCKELL, GODERT DE

Ginsberg, Allen 1926–97
US poet
Born in Newark, New Jersey, he was brought up in a Jewish community and educated at Columbia University. A homosexual and drug experimentalist, he was associated with the Beat movement, coined the phrase 'flower power' and was a friend of JACK KEROUAC, WILLIAM S BURROUGHS and others. *Howl and Other Poems* (1956), his first book, was a succès de scandale. Numerous other poetry collections were published, including *Kaddish and Other Poems* (1961), *White Shroud, Poems 1980–85* (1986), *Snapshot Poetics* (1993) and *Cosmopolitan Greetings: Poems 1986–92* (1994). Despite his initial anti-establishment stance, he gained many honours and awards. His prose *Journals* were published in 1977. 🕮 Barry Miles, *Ginsberg: A Biography* (2000)

Ginsburg, Ruth (Joan) Bader, *née* **Bader** 1933–
US federal judge
Born in Brooklyn, New York City, she was educated at Cornell University and at Harvard and Columbia law schools. She taught law at Rutgers University in the 1960s before becoming professor at the Columbia University School of Law (1972–80). She was US circuit court judge with the US Court of Appeals (1980–93), then was nominated by President BILL CLINTON to the Supreme Court of the USA, the highest court in the country. As well as being the second woman Supreme Court justice (SANDRA DAY O'CONNOR was the first), she was also the second Jewish justice.

Ginzburg, Vitali Lazerevich 1916–
Russian astrophysicist and Nobel Prize winner
Born in Moscow, he studied at the university there, before joining the Physics Institute of the Academy of Sciences, where

he has been head of the subdepartment of theoretical physics since 1940. With ANDREI SAKHAROV he developed the USSR's hydrogen bomb in the 1950s. Later he applied quantum theory to the study of CHERENKOV radiation, subsequently suggesting that the non-thermal radio emission produced in our galaxy is due to radiation produced by electrons gyrating in the galactic magnetic field. He also proposed in 1964 (in a classic book entitled *The Origin of Cosmic Rays*) that all cosmic rays come from within our own galaxy, originating from regions near the galactic nucleus. In the 1970s he developed concepts of superconductivity and superfluidity, for which he shared the 2003 Nobel Prize in physics with ALEXEI ABRIKOSOV and ANTHONY LEGGETT, both of whom built on his theories. Professor at Gorky University from 1945 to 1968, he is now a professor at the Moscow Technical Institute of Physics (1968–). He was awarded the Royal Society Astronomical Society gold medal in 1991.

Gioberti, Vincenzo 1801–52
Italian (Piedmontese) writer and politician
Born in Turin, he was ordained in 1825 and expelled from Piedmont in 1833 because of his outspoken defence of the Polish cause. He wrote extensively on Italian history and politics. His most important work, *Del primato morale e civile degli italiani* ('On the Moral and Civil Primacy of the Italians'), written in exile in Brussels and published in 1843, called for an Italian confederation under papal presidency. His dreams seemed to have been realized with the election of the apparently liberal PIUS IX in 1846 and the outbreak of revolution in 1848. Briefly prime minister of Piedmont (1848–49), he became disillusioned with, and retired from, politics and was condemned by an increasingly reactionary Pius.

Giolitti, Giovanni 1842–1928
Italian politician
Born in Mondovi, he was an astute and unprincipled parliamentary manager. He entered parliament in 1882 as a Liberal and became FRANCESCO CRISPI's minister of finance in 1889. Prime minister from 1892 to 1893, he was brought down by a banking scandal. He returned to politics as interior minister under Roman Zanardelli in 1901, becoming prime minister again from 1903 to 1909, except for a brief spell out of office in 1905–06. As prime minister, he sought to combat leftist strikes and disorders through economic policy rather than confrontation, and in foreign policy he strengthened Italy's ties with Austria and Germany. During his fourth spell as prime minister (1911–14), he brought Italy into the Tripolitanian War, gaining Libya, Rhodes and the Dodecanese. However, the war resulted in unpopular tax increases and a general strike forced him from office in 1914. In opposition, he tried unsuccessfully (1915) to keep Italy neutral during World War I. His fifth ministry (1920–21) failed to cope with postwar disorder and the violence of the squadristi, and he was unable to block MUSSOLINI's ascent to power.

Giordano, Luca 1632–1705
Italian painter
Born in Naples, he was able to work with great speed (hence his nickname 'Luca Fa Presto', 'Luca works quickly') and to imitate the great masters. In Florence he painted the ceiling frescoes in the ballroom of the Palazzo Medici-Riccardi. From 1692 to 1702 he was in Madrid as court painter to CHARLES II of Spain, and embellished the Escorial. His oils and frescoes are in most European collections.

Giordano, Umberto 1867–1948
Italian composer of operas
Born in Foggia, he is remembered especially for *Andrea Chénier* (1896) and *Fedora* (1898). There followed *Siberia* (1903) and other operas, the last being *Il Re* (1929).

Giorgione, *also called* **Giorgio Barbarelli** or **Giorgio del Castelfranco** c.1478–1511
Italian painter
Born near Castelfranco, he probably studied at Venice under GIOVANNI BELLINI, and soon developed a freer and larger manner, characterized by intense poetic feeling and richness of colouring. Several early portraits by him have disappeared, but an *Enthroned Madonna* is an altarpiece at Castelfranco. In Venice he was extensively employed in fresco-painting, but fragments in the Fondaco de'Tedeschi are all that now remain of this work. *The Tempest* at Venice is attributed to him, while *The Family of Giorgione* in Venice, *The Three Philosophers* in Vienna and the *Sleeping Venus* in the Dresden Gallery are genuine. Many of his pictures, such as the *Sleeping Venus* and *The Three Philosophers*, were completed by other painters, including TITIAN. Giorgione was a great innovator; he created the small intimate easel picture with a new treatment of figures in landscape, aimed at private rather than public collections, and his work marks a turning point in Venetian painting. He was the first great Romantic artist.

Giotto (di Bondone) c.1267–1337
Italian painter and architect
Born near Florence, he was the most innovative artist of his time, and is generally regarded as the founder of the Florentine school. At the age of ten, he was supposedly found by GIOVANNI CIMABUÉ tending sheep and drawing a lamb on a flat stone and was taken by him to study art in Florence. His earliest work may have been connected with the making of mosaics for the Florence Baptistery. As a painter he worked in all the major artistic centres of Italy, but his most important works include the frescoes in the Arena Chapel, Padua, the Navicella mosaic in Saint Peter's, Rome (now largely destroyed), frescoes in the Peruzzi Chapel in the church of S Croce, Florence, and the Ognissanti Madonna, now in the Uffizi, Florence. Stylistically he broke with the rigid conventions of Byzantine art typified by the work of Cimabué, and composed simplified and moving dramatic narratives peopled by realistically observed and believable figures. Irrelevant detail is absent and the figures are left to tell the stories for themselves. The repercussions of these innovations can be seen in the work of MASACCIO a century later and ultimately in the work of MICHELANGELO, who studied and made copies of Giotto's compositions. In 1334 Giotto was appointed master of works for the cathedral and city of Florence. Aided by ANDREA PISANO he decorated the façade of the cathedral with statues and designed the campanile himself. It still bears his name, though much altered.

Giovanni di Paolo, *also known as* **Giovanni dal Poggio** c.1403–1482/83
Italian painter
Born in Siena, he may have trained with TADDEO DI BARTOLI, and was certainly influenced by GENTILE DA FABRIANO, who was in Siena from 1424 to 1426. Though little is known of his life, many works by him have survived. Like his contemporary SASSETTA he worked in a style that continued the tradition of Sienese trecento masters. Nevertheless, his narrative abilities and highly personal vision give his paintings considerable charm and appeal.

Gippius or **Hippius, Zinaida Nikolayevna** 1869–1945
Russian poet, novelist and critic
She was born in Belev, Tula. After she went into exile (1919) she spelled her name 'Hippius'. She was married to the poet DMITRI MEREZHKOVSKY. In her capacity as a critic (under the names of 'Anton the Extreme' and 'Comrade Herman') she poured deserved scorn on many now-forgotten writers. She and her husband, weary of the Orthodox Church and its hypocrisy, founded a new mystical faith, a compound of the ideas of DOSTOEVSKY, VLADIMIR SOLOVIEV and others, with which she combined an extreme wit and a mordant sensibility. She had welcomed the February Revolution of 1917, but rejected the Bolsheviks on account of their godlessness. Her memoirs, *Zhivye litsa* (1925, 'Living Faces'), deserve to be read as sober prophecies of the fall of Stalinism. Selections from her diaries have been translated into English as *Between Paris and St Petersburg* (1975). Her best work is, however, her pellucid love lyrics and her religious poetry. *Moi lunny drug* (1925, 'My Moonlight Friend') is the most evocative of all portraits of ALEKSANDR BLOK. There are English translations of her work in *Selected Works of Zinaida Gippius* (1972) and *Intellect and Ideas in Action: Selected Correspondence* (1972). 🕮 V Zlobin, *A Difficult Soul: Zinaida Gippius* (1980); O Maslenikov, *The Frenzied Poets: Andrey Biely and the Russian Symbolists* (1952)

Gipps, Sir George 1791–1847
English colonial administrator
Born in Ringwould, near Deal, Kent, he served in the Royal Engineers and was governor of New South Wales (1838–46). His policy of land-selling by auction instead of the colonial office policy of a fixed price showed him to be an unpopular but far-sighted opponent of land monopoly. Gippsland in Victoria is named after him.

Giraldi, Giambattista, *surnamed* **Cynthius, Cinthio, Centeo** or **Cinzio** 1504–73
Italian writer
Born in Ferrara, he was professor of natural philosophy, then of belles-lettres, at Florence. Later, he held the chair of rhetoric at Pavia. He is the author of nine plays in imitation of SENECA, the Younger, of which *Orbecche* (1541) is regarded as the first

modern tragedy on classical lines to be performed in Italy. His *Ecatommiti* (1565) is a collection of tales that was translated into French and Spanish and gave SHAKESPEARE his plots for *Measure for Measure* and *Othello*. 🕮 P R Horne, *The Tragedies of Giambattista Giraldi* (1962)

Giraldus Cambrensis, *also called* **Girald de Barri** or **Gerald of Wales** c.1146–c.1223
Norman–Welsh chronicler and ecclesiastic
Born in Manorbier Castle, Pembrokeshire, he was educated at the abbey of St Peter, Gloucester, and later studied in Paris. He became archdeacon of St David's, but his nomination for Bishop of St David's (1176) was rejected by King HENRY II of England because he was a Welshman. He was appointed royal chaplain (1184–89), and in 1185 accompanied Prince (later King) JOHN on a military expedition to Ireland. He wrote *Topographia Hibernica* (c.1188), a record of the natural history, inhabitants and folk tales of Ireland, and collected material for his *Expugnatio Hibernica* (c.1189), an account of the conquest of Ireland by Henry II. In 1188 he accompanied Archbishop BALDWIN of Canterbury on a preaching tour of Wales to recruit support for the Third Crusade, and recorded his impressions in *Itinierarium Cambriae* (1191). He wrote an autobiography, *De Rebus a se Gestis*, *Gemma Ecclesiastica*, a handbook for the instruction of the clergy, and *De Principis Instructione*, a manual on the upbringing of a prince. 🕮 Robert Bartlett, *Gerald of Wales 1145–1223* (1982)

Girard, Stephen 1750–1831
US businessman and philanthropist
Born near Bordeaux, France, he was successively cabin boy, mate, captain and part-owner of a US coasting vessel. In 1776 he settled as a trader in Philadelphia, where he established a bank which became the mainstay of the US government during the War of 1812. He was a sceptic, a miser and an exacting master, yet in the yellow-fever epidemic in 1793 he nursed many of the sick in the hospitals, and in public matters his generosity was remarkable. In 1816 he underwrote almost all of the $3 million stock issue to capitalize the Second Bank of the United States. Among other bequests he left $2 million for founding Girard College in Philadelphia for male white orphans, with the stipulation that no minister of any sect was to be allowed on its board or to visit it.

Girardelli, Marc 1963–
Luxembourg skier
Born in Laustenau, Austria, he has won the overall World Cup title a record five times (1985–86, 1989, 1991 and 1993). Regarded as a true competitor and a classic all-rounder, he skis all the disciplines – downhill, slalom, giant slalom and super G. He won the 44th victory of his long career at Kitzbühl, where he won the combined event of downhill and slalom. After a disagreement with his Austrian coaches, he adopted Luxembourgeois nationality to make a one-man team. He was forced to retire due to injury in 1997.

Girardin, Delphine de, *née* **Gay** 1804–55
French writer
Born in Aix-la-Chapelle, she married ÉMILE DE GIRARDIN, and contributed feuilletons to her husband's paper under the pseudonym 'Vicomte Charles de Launay'. She also wrote elegant sketches of society life and some poetry, plays and novels, of which *Le Lorgnon* (1831, 'The Eyeglasses') is probably the best. 🕮 L Séché, *Muses romantiques* (1910)

Girardin, Émile de 1806–81
French journalist
Born in Paris, he was the illegitimate son of General Alexandre de Girardin. In 1827 he published an autobiographical novel, *Émile*, and the following year he founded the periodical *Le Voleur*. After the July Revolution (1830) he started the *Journal des Connaissances Utiles*, and in 1831 married DELPHINE DE GIRARDIN. In 1836 a charge that the halfpenny Orleanist *La Presse* was subsidized by the government led to a fatal duel with Armand Carrel, the editor of the *National* (1800–36). From then Girardin gradually became a republican. He promoted LOUIS NAPOLEON's election to the presidency, but was exiled for disapproving of the coup d'état and became a socialist, proposing the splitting of France into 15 federal states. In 1874, however, he founded *La France*, in which he again supported the republic.

Girardon, François 1630–1715
French sculptor
Born in Troyes, he studied in Rome, and after 1650 settled in Paris and joined the Le Brun group of artists painting in the flamboyant, illusionistic style of CHARLES LE BRUN at Versailles. He worked on decorative sculpture in LOUIS XIV's galleries, gardens and palaces, mostly at Versailles (1666–73), where he is noted for the fountain figures, and designed the tomb of Cardinal RICHELIEU (1694) in the chapel of the Sorbonne, Paris.

Giraud, Henri Honoré 1879–1949
French soldier
In World War I he became chief of staff of the Moroccan Division. In early 1940 he commanded the French 7th and 9th Armies, suffering capture and internment by the Germans. On his escape in 1942 he was picked up by a British submarine and persuaded to support the Allied cause as a subordinate of General EISENHOWER, and to collaborate as joint chairman of the French Committee of National Liberation with General DE GAULLE. On the abolition of his post of commander-in-chief of the French forces, he refused the appointment of inspector-general of the forces to become a highly critical right-wing deputy in the Second Provisional Assembly of 1946.

Giraudoux, (Hippolyte) Jean 1882–1944
French writer
He was born in Bellac, Limousin. After a brilliant academic career at the École Normale Supérieure, Paris, and extensive travel, he joined the diplomatic service and became head of the French Ministry of Information during World War II, until his affiliations became suspect. As a poet and novelist he was much affected by psychoanalytic theories, and pioneered an Impressionistic technique in literature, exemplified particularly in *Provinciales* (1909), *Simon le Pathétique* (1918) and his reflection on his war experiences, *Retour d'Alsace, août 1914* (1916, 'Return from Alsace in August 1914'). His plays are mainly fantasies based on Greek myths and biblical lore, satirically treated as commentary on modern life. They include *La Folle de Chaillot* (1945, Eng trans *The Madwoman of Chaillot*, 1949), *La Guerre de Troie n'aura pas lieu* (1935) and *Pour Lucrèce* (1953). The last two were translated as *Tiger at the Gates* (1955) and *Duel of Angels* (1958) by CHRISTOPHER FRY. Giraudoux also wrote literary criticism, some short stories and two film scripts. 🕮 L LeSage, *Giraudoux: His Life and Works* (1959)

Giroud, Françoise, *originally* **Françoise Gourdji** 1916–2003
French journalist, feminist, broadcaster and politician
Born in Geneva and educated at the Lycée Molière, Paris, and the Collège de Groslay, she began her career as a typist. She worked for the Resistance during World War II and was imprisoned by the Gestapo. After the war, she began writing screenplays. In 1953 she co-founded the news magazine *l'Express*, which she also edited. She was a prominent postwar journalist and feminist; from 1974 to 1976 she was government minister for the status of women, and from 1976 to 1977, minister of culture. Much of her writing has been translated into English, including *Ce que je crois* (1975, 'What I Believe'), *La Comédie du pouvoir* (1977, 'The Comedy of Power') and the bestseller *Les hommes et les femmes* (1993, 'Men and Women').

Girtin, Thomas 1775–1802
English painter
He was a close friend and a contemporary of J M W TURNER, with whom he worked in the studio of John Raphael Smith (1750–1812), colouring prints. He painted some of his best landscapes in the north of England and in France, which he visited in 1801–02 for his health. His paintings were among the first in which watercolour was exploited as a true medium as distinct from a tint for colouring drawings, as in *The White House at Chelsea* (1800). His breadth of vision was in sharp contrast to the detailed fussiness of the majority of early watercolourists, and he was one of the greatest of the earlier landscape painters in watercolours. He influenced JOHN CONSTABLE considerably.

Giscard d'Estaing, Valéry 1926–
French Conservative statesman
Born in Koblenz, Germany, the son of a wealthy Auvergne-based inspector of finance, he was educated in Paris. He was awarded the Croix de Guerre for his work for the Resistance during World War II. After the war he graduated from the École Nationale d'Administration and worked in the Ministry of Finance before being inducted into the private 'cabinet' of Prime Minister EDGAR FAURE in 1953. He entered the National Assembly, representing Puy-de-Dome, in 1956 as an Independent Republican, and became finance minister to President DE GAULLE in 1962. Giscard fell out with De Gaulle in 1966, but returned as finance minister during the POMPIDOU presidency (1969–74). Following Pompidou's death, he was narrowly elected president in May 1974, and proceeded to introduce a series of liberalizing reforms. However, faced with deteriorating external economic conditions, he was defeated in 1981 by

his 1974 opponent FRANÇOIS MITTERRAND. Giscard was re-elected to the National Assembly in 1984 and was the influential leader until 1996 of the Union pour la Démocratie Française (Union for French Democracy), a centre-right grouping which he formed in 1978. In 1989 he resigned from the National Assembly to play a leading role in the European Parliament. From 2002–03 he served as president of the Convention on the Future of Europe, the body responsible for drafting a European constitution. He is a strong proponent of a united Europe. His publications include a volume of memoirs (1988) and a novel (1994). 🕮 Charles Hargrove, *L'autre Giscard: Valéry Giscard d'Estaing vu par un Anglais* (1981)

Gish, Lillian Diana, *originally* **Lillian de Guiche** 1893–1993
US actress
Born in Springfield, Ohio, she made her stage debut at the age of five, and acted in touring theatre companies with her sister Dorothy (1898–1968), with whom she made a joint film debut in *An Unseen Enemy* (1912). A long association with D W GRIFFITH brought her leading roles in *Birth of a Nation* (1915), *Intolerance* (1916) and *Broken Blossoms* (1919) and she created a gallery of waif-like heroines with indomitable spirits. Unsuited to talking pictures, in 1930 she returned to the stage, where her many credits include *The Trip to Bountiful* (1953), *Romeo and Juliet* (1965) and *Uncle Vanya* (1973). She continued to play supporting roles in television and on film, including *Duel in the Sun* (1946) and *The Night of the Hunter* (1955), and returned to a major screen role in *The Whales of August* (1987). She directed one film, *Remodelling Her Husband* (1920), and wrote several volumes of autobiography. She received an honorary Academy Award in 1971.

Gislebertus early 12th century
Sculptor, possibly French
Nothing is known about Gislebertus beyond the inscription *Gislebertus hoc fecit* ('Gislebertus made this'), which appears at the feet of the figure of Christ in the carving of the Last Judgement above the west door of the church of Saint-Lazare at Autun in Burgundy (c.1120–30). Nevertheless, this work and the other carvings in the church attributable to him and his workshop establish him as a sculptor of great power. The Judgement scene was plastered over in the 18th century by less appreciative clerical authorities, and ironically this probably saved it from damage (or even total destruction) during the iconoclastic excesses of the French Revolution.

Gissing, George Robert 1857–1903
English novelist
Born in Wakefield, Yorkshire, he earned a scholarship to Owens College (now the University of Manchester), and from there won another scholarship to the University of London. However, before he could take it up he fell in love with Marianne ('Nell') Harrison, thought to have been a prostitute, from whom he contracted venereal disease. Intent on setting her up as a seamstress, he stole money from his fellow students, for which he was sentenced to a month's hard labour and expelled from college. He was packed off to the USA in disgrace, and while in Chicago wrote a melodramatic tale of English life which was bought by the *Chicago Tribune*. He returned to England in 1877, started his first novel, *Workers in the Dawn* (1880), and married Nell in 1879. He was doggedly productive, feeding the circulating libraries with novels such as *The Nether World* (1889), one of the most graphic accounts of Victorian poverty ever written, but the couple struggled financially until Nell died in 1888. Now better off, Gissing travelled on the Continent, and went on to produce some of his finest fiction: *New Grub Street* (1891), a grim rebuke to all aspiring authors, *Born in Exile* (1892) and *The Odd Women* (1893). He moved to the south of France for the sake of his lungs, and wrote several books in the last five years of his life, including a notable critical biography of DICKENS (1898), a travel book, *By the Ionian Sea* (1900), and *The Private Papers of Henry Ryecroft* (1902), a spoof autobiography that was instantly successful. His *Commonplace Book* was published in 1962 and *The Diary of George Gissing, Novelist* appeared in 1982. 🕮 John Halperin, *Gissing: A Life in Books* (1982)

Giugiaro, Giorgetto 1938–
Italian car and industrial designer
Born in Garessio, near Cuneo, he worked in the 1960s for the bodywork designers Bertone and Ghia, before establishing his own firm, Italdesign, in 1968. While he has designed for such makers as Alfa Romeo and Lancia, the models have mostly been those aimed at a popular market. He is especially associated with impressive small cars such as the first Volkswagen 'Golf' (1974), and the Fiat 'Panda' (1980), 'Uno' (1983) and 'Punto' (1993). He established the consultancy Giugiaro Design in 1981, since when he has been involved in the design of a wide range of products.

Giuliani, Rudy (Rudolph William Louis III) 1944–
US lawyer and politician
Born in Brooklyn, New York City, he studied law at New York University. Following a successful career in the US Attorney's office and in private practice, he was elected mayor of New York City in 1994. Re-elected in 1997, he focused on reducing crime and improving the quality of life of the people of New York. In 2001, shortly before he left office, the 11 September terrorist attacks on the World Trade Center brought him to international prominence. His composure and leadership in the wake of the tragedy saw him named *Time* magazine's Person of the Year in 2001 and he was awarded an honorary knighthood. 🕮 *Leadership* (2002)

Giulini, Carlo Maria 1914–2005
Italian conductor
He was born in Barletta and quickly showed musical gifts. After studying at the Santa Cecilia Academy in Rome, he joined the city's Augusteo Orchestra as a viola player. By 1946 he had become director of music for Italian Radio. Five years later he was conducting at La Scala, Milan, where in 1954 he conducted MARIA CALLAS in some memorable performances. Between 1969 and 1984 he worked as principal conductor of the Chicago Symphony, Vienna Symphony, and Los Angeles Philharmonic orchestras and gave guest performances all over the world. Giulini was a 'romantic' conductor with a small but perfectly formed repertoire, who achieved his results quietly and without histrionics. Outside the opera house, where he excelled in MOZART and VERDI, he was a frequent exponent of MAHLER, TCHAIKOVSKY, DEBUSSY and RAVEL.

Giulio Romano, *properly* **Giulio Pippi de'Giannuzzi** c.1492–1546
Italian painter and architect
Born in Rome, he assisted RAPHAEL in the execution of several of his finest works, and at his death in 1520 completed the *Transfiguration* in the Vatican. In 1524 he went to Mantua on the invitation of the duke. The drainage of the marshes and the protection of the city from the floods of the Po and Mincio rivers attest to his skill as an engineer. His genius as an architect found scope in the restoration and adornment of the Palazzo del Tè, the cathedral, and a ducal palace. In Bologna he designed the façade of the church of S Petronio. Among his oil paintings are the *Martyrdom of St Stephen* (Genoa), a *Holy Family* (Dresden) and the *Madonna della Gatta* (Naples).

Giuseppino, Il Cavaliere d'Arpin *See* CESARI, GIUSEPPE

Giusti, Giuseppe 1809–50
Italian poet and political satirist
Born near Pistoia, he mercilessly denounced the enemies of Italy and the vices of the age in a series of elegantly crafted satirical poems. He was elected to the Tuscan Chamber of Deputies in 1848. 🕮 S Horner, *The Tuscan Poet* (1928)

Givenchy, Hubert James Marcel Taffin de 1927–
French fashion designer
Born in Beauvais, he was two years old when his father died, and his grandfather, who had at one time studied painting, was an early influence. He attended the École des Beaux-Arts and the Faculté de Droit in Paris. He obtained a job with Jacques Fath in 1944, then worked with Piguet, Lelong and SCHIAPARELLI. He opened his own house in 1952 and his Bettina blouse in white cotton became internationally famous. In the early 1950s he met CRISTÓBAL BALENCIAGA, who influenced and encouraged him. His clothes are noted for their elegance and quality. He produces ready-to-wear clothes under his Nouvelle Boutique label. He retired in 1995 after 43 years as designer-in-chief at his eponymous Paris fashion house, and was replaced by JOHN GALLIANO.

Gjellerup, Karl Adolph 1857–1919
Danish writer and Nobel Prize winner
He was born in Roholte, the son of a Lutheran minister, who died when he was three. He studied theology at the University of Copenhagen, where he was influenced by the ideas of Georg Brandes; he subsequently declared himself an atheist. His first novel, *En Idealist* (1878, *An Idealist*), published under the pseudonym Epigonos, concerns a young intellectual who denounces theology and religion. Several stories and poems followed which mocked theology in favour of DARWIN's theory of evolution, including *Arvelighed og moral* (1881, *Heredity and Morals*). He became increasingly concerned with the concepts of free will, fate and the human condition. After moving from

Gladstone, William Ewart 1809–98
English Liberal statesman

Gladstone was born in Liverpool, the son of a merchant and MP. He was educated at Eton and Christ Church, Oxford. In 1832 he was returned by Newark as a Conservative to the reformed parliament, serving under ROBERT PEEL. After several junior appointments, he was appointed president of the Board of Trade in 1843. In December 1845 he was made colonial secretary. He later gave up his seat, and did not re-enter Parliament until the corn-law struggle was over; then, at the general election of 1847 he was elected by the University of Oxford, still as a Tory.

When Peel died in July 1850 Gladstone was brought more directly to the front; and he compelled the House of Commons and the country to recognize in him a supreme master of parliamentary debate. His first really great speech in parliament was made in the debate on DISRAELI's budget in 1852. On the fall of the short-lived Tory administration, Lord ABERDEEN formed the famous Coalition Ministry, with Lord PALMERSTON for home secretary, Lord JOHN RUSSELL for foreign secretary and Gladstone for Chancellor of the Exchequer. His speech on the introduction of his first budget was again masterly.

Gladstone was again Chancellor in 1859 when Palmerston was prime minister. In 1865, on Lord Palmerston's death and Lord Russell's accession to the premiership, Gladstone became leader of the House of Commons. A minor reform bill was introduced enlarging the franchise in boroughs and counties. The Conservative Party opposed it, and were supported by a considerable section of the Liberals. The bill was defeated: the Liberals went out of office (1866).

The serious condition of Ireland, however, and the Fenian insurrection brought the Liberals to power, with Gladstone as prime minister, in 1868. He was frequently in office until 1894, when he resigned. He disestablished and disendowed the Irish Church. For the first time in English history a system of national education was established. He also introduced a measure to improve university education in Ireland, but Catholic members voted against it, and it was rejected (1873). Gladstone offered his resignation, but Disraeli declined to undertake any responsibility, and Gladstone had to remain at the head of affairs. But the by-elections began to tell against the Liberals; Gladstone suddenly dissolved Parliament and Disraeli came back to power (1874). For some time Gladstone took the opportunity to concentrate on his literary studies.

Parliament was dissolved in 1880, the Liberals came in with an overwhelming majority, and Gladstone (now member for Midlothian) became prime minister once more. He succeeded in carrying out a scheme of parliamentary reform, which went a long way towards universal male suffrage. After a further period out of office, he attempted to introduce a Home Rule bill for Ireland, but a split was caused in his party, the bill was rejected and after an appeal to the country he was defeated at the polls. In 1893, after his final return to office, the Home Rule bill was carried in the Commons, but was thrown out by the Lords. His advanced age led to his resignation in March 1894. He died at Hawarden, and was buried in Westminster Abbey.

🕮 Roy Jenkins, *Gladstone* (1995); H C G Matthew, *Gladstone 1875–1898* (1995) and *Gladstone 1809–1874* (1986); E J Feuchtwanger, *Gladstone* (1975); P Magnus, *Gladstone* (1954).

> 'Remember the rights of the savage, as we call him. Remember that the happiness of his humble home, remember that the sanctity of his life in the hill villages of Afghanistan, among the winter snows, is as inviolable in the eye of Almighty God as can be your own.'
>
> – From a speech at Edinburgh Foresters' Hall, during the Midlothian Campaign (26 November 1879).

Denmark to Germany in 1892, he fell under the influence of GOETHE and SCHILLER, and converted to writing in German. He remained an enthusiastic Germanophile until his death, and in the early 20th century became interested in Buddhist theology. His major works include the novels *Germanernes Laerling* (1882, *The Apprentice of the Teutons*) and *Møllen* (1896, *The Mill*) and the play *Brynhild* (1884). In 1917 he shared the Nobel Prize in literature with fellow Dane HENRIK PONTOPPIDAN.

Gladstone, Herbert John Gladstone, 1st Viscount 1854–1930
English politician
He was born in London, at No12 Downing Street, which his father WILLIAM EWART GLADSTONE then occupied as Chancellor of the Exchequer. He was Liberal MP for Leeds (1880–1910) but during this time he was criticized when a journalist made use of a private conversation with him about his father's intention to support Irish Home Rule (1885). He became Liberal Chief Whip in 1899, and was home secretary from 1905 to 1910, when he was appointed first Governor-General of the Union of South Africa and raised to the peerage. He was head of the War Refugees Association from 1914 to 1919.

Gladstone, William Ewart *See panel above*

Glaisher, James 1809–1903
English meteorologist
Born in Rotherhithe, London, he was self-educated. After taking part in the trigonometrical survey of Ireland, he became assistant to the director of Cambridge University Observatory. In 1835 he went to Greenwich Observatory and in 1840 became superintendent of the magnetic and meteorological department. In 1845 he produced tables for the calculation of dewpoints of the air which became standard. He was later invited to produce reports on the meteorology of England for the registrar-general's quarterly returns (1849), which he did for 54 years. He was a founder member in 1850 of the British Meteorological Society (which later became the Royal Meteorological Society). He is best known for 29 balloon ascents between 1862 and 1866, which were carried out in every month of the year and with different weather conditions. The main aim was to measure temperature, dewpoint and wind at different heights, and the highest ascent is believed to have reached 30,000 feet. He was a member of many learned societies and was elected FRS in 1849.

Glanvill, Joseph 1636–80
English philosopher and clergyman
Born in Plymouth, Devon, he studied at Oxford. He served as vicar of Frome (1662), rector of the Abbey Church in Bath (1666) and prebendary of Worcester (1678). A sympathizer with the Cambridge Platonists against the rigid Aristotelianism current in Oxford, he attacked scholastic philosophy in his famous work *The Vanity of Dogmatising* (2nd edn, 1665), supported experimental science and appealed for freedom of thought. He dedicated the work to the newly established Royal Society, of which he had become a Fellow in 1664. After his death HENRY MORE edited and published his *Sadducismus Triumphatus* (1681), which, surprisingly perhaps, attacked the rationalizing scepticism of those who denied the existence of ghosts, witches and other apparitions of the spirit.

Glanvill, Ranulf de d.1190
English jurist
Born in Stratford St Andrew, near Saxmundham, Suffolk, he was Chief Justiciary of England (1180–89). An adviser to HENRY II, he reputedly wrote the earliest treatise on the laws of England, the *Tractatus de Legibus et Consuetudinibus Angliae* (c.1187), which briefly but lucidly describes the procedure of the king's courts and is based on the writs which initiated actions. In 1174 he raised a body of knights and captured King WILLIAM I of Scotland at Alnwick. He joined the Third Crusade and died at the Siege of Acre (1190).

Glanville-Hicks, Peggy 1912–90
Australian composer
Born in Melbourne, Victoria, she studied at the Conservatorium of Music there, at the Royal College of Music, London, and with RALPH VAUGHAN WILLIAMS, NADIA BOULANGER, Arthur Benjamin and EGON WELLESZ. Between 1948 and 1958 she was music critic of the *New York Herald Tribune* and in 1959 she went to Greece, where her opera *Nausicaa* (to a text by ROBERT GRAVES) was produced for the 1961 Athens Festival. Much of her output was for theatre and ballet. Other major works include the operas *The Transposed Heads* (story by THOMAS MANN) and *Sappho* (by

LAWRENCE DURRELL), *Etruscan Concerto*, *Letters from Morocco* and *Concerto Romantico*. From 1975 she was director of Asian studies at the Australian Music Centre, Sydney.

Glas, John 1695–1773
Scottish sectarian
Born in Auchtermuchty, Fife, he was minister of Tealing near Dundee from 1719. When he was deposed in 1728, he formed a congregation of Glassites or Sandemanians based on simple apostolic practice. They held that church establishments were unscriptural and that congregations should be self-governing. The name Sandemanians was from his son-in-law Robert Sandeman (1718–71).

Glaser, Donald Arthur 1926–
US physicist and Nobel Prize winner
Born in Cleveland, Ohio, he was educated at the Case Institute of Technology, Cleveland, and at the California Institute of Technology (Caltech), then became a professor at the University of Michigan (1949–59) and at the University of California at Berkeley (1960–). He was awarded the 1960 Nobel Prize in physics for inventing the 'bubble chamber' for observing the paths of elementary particles. Bubble chambers were used to discover many subatomic particles and reached their pinnacle in 1971 with the construction of 'Gargamelle', a thousand-tonne detector, but have now largely been superseded by electronic or gas detectors capable of providing data immediately. His subsequent research in the field of molecular biology has explored the physiology of human vision through computer modelling.

Glasgow, Ellen Anderson Gholson 1874–1945
US novelist
Born in Richmond, Virginia, she spent most of her life there apart from various trips to Europe from 1896. She was best known for her stories of the South, including *The Descendant* (1897), *The Voice of the People* (1900), *Virginia* (1913) and *In This Our Life* (1941, Pulitzer Prize). *Barren Ground* (1925) is a more optimistic and progressivist narrative. 🕮 Susan Goodman, *Ellen Glasgow: A Biography* (2003)

Glashow, Sheldon Lee 1932–
US physicist and Nobel Prize winner
Born in New York City, he studied at the universities of Cornell, Harvard, Copenhagen and Geneva, before becoming professor of physics at Harvard in 1967 and Higgins Professor of Physics in 1979. He was appointed the first Arthur Metcalf Professor of Science at Boston University in 2000. Glashow developed one of the first models to describe simultaneously two of the four forces of nature, the electromagnetic and weak forces, and subsequently developed the 'electroweak' theory of STEVEN WEINBERG and ABDUS SALAM by introducing a new particle property known as 'charm'. He was a major contributor to the theory of quantum chromodynamics, which assumes that strongly interacting particles, such as the protons and neutrons which form the nucleus, are made of quarks and that 'gluons' bind the quarks together. He shared the 1979 Nobel Prize in physics with Salam and Weinberg for their contributions to 'the standard model' of all particle interactions. He is an outspoken opponent of superstring theory, because of the limited possibility of verifying it through experimentation.

Glaspell, Susan 1882–1948
US writer
She was born in Davenport, Iowa, and studied at Drake University in Des Moines, Iowa. She began by writing short stories, collected in *Lifted Masks* (1912). Her novels include *Fidelity* (1915), *Brook Evans* (1928) and *The Fugitive's Return* (1929). She also wrote plays, among them *Trifles* (1917) and *Alison's House* (1930), based on the life of EMILY DICKINSON, which won a Pulitzer Prize. 🕮 Linda Ben-Zvi, *Susan Glaspell: Her Life and Times* (2005)

Glass, Philip 1937–
US composer
Born in Baltimore, Maryland, he studied with NADIA BOULANGER (1964–66) and RAVI SHANKAR. He was much influenced by Far Eastern music with its static harmonies, by the melodic repetition found in North African music, and by rock music. The resulting 'minimalist' style, often cast over long periods with unremitting rhythmic patterns and simple diatonic chords, gained him a considerable following, especially in such stage works as *Einstein on the Beach* (1976), *Satyagraha* (1980), *Akhnaton* (1984), *The Making of the Representative for Planet 8* (1988) and *The Voyage* (1992). His other compositions include the film scores for *Hamburger Hill* (1989) and *The Truman Show* (1998), and the operas *Orphee* (1993), *Monsters of Grace* (1998) and *Galileo Galilei* (2002).

Glatstein, Jacob 1896–1971
US Yiddish poet and critic
Born in Lublin, Poland, he emigrated to the USA just before World War I. After he arrived in New York at the age of 18, he started to write poetry in English. This short period turned out to be a useful one, for he came under the influence of RABINDRANATH TAGORE, whose mysticism stayed with him. He then met a number of Yiddish poets, and, together with Nokhem Minkoff (1893–1958) and Aaron Glanz-Leyeles (1889–1966), he established the In Zikh movement – it derived its name from the Yiddish magazine, and meant 'within the self'. However, Glatstein was never dogmatic, and he helped to introduce a carefully cadenced free verse into Yiddish poetry. His own poetry, which is vital, sharply ironic and true to his inner self, is paramount in the Yiddish (and Jewish) poetry of the 20th century. His published work includes *Poems* (1970) and *The Selected Poems of Jacob Glatstein* (1972). He also wrote two outstanding autobiographical volumes about his return to Poland in the mid-1930s to see his dying mother: *Ven yash iz geforn* (1938, Eng trans *Homeward Bound*, 1969) and *Ven yash iz gekumen* (1940, Eng trans *Homecoming at Twilight*, 1962). 🕮 *Commentary* (January 1972); J R Hadda, *Yankev Glatstein* (1980)

Glauber, Johann Rudolph 1604–70
German physician
He was born in Karlstadt, Bavaria, but settled in the Netherlands. In 1648 he discovered hydrochloric acid, and he was probably the first to produce nitric acid. He also discovered 'Glauber's salt' (sodium sulphate), the therapeutic virtues of which he greatly exaggerated, and acetone, benzine and alkaloids. He was likened to ROBERT BOYLE in achievement, and became known as the 'father of chemistry'.

Glauber, Roy Jay 1925–
US theoretical physicist and Nobel Prize winner
Born in New York City, he was a member of the theoretical physics division at Los Alamos (1944–46), and then studied at Harvard. He was appointed as a lecturer at the California Institute of Technology (Caltech) from 1951 to 1952, and in 1962 became professor of physics at Harvard. He established the theoretical foundations of quantum optics in two epic papers in 1963, and also made pioneering contributions to nuclear physics and to statistical mechanics (showing how a bulk magnetic moment in matter can be generated by the alignment of the atomic magnetic moments). For his contribution to the quantum theory of optical coherence he was awarded the 2005 Nobel Prize in physics, which he shared with JOHN L HALL and THEODOR W HÄNSCH.

Glazebrook, Sir Richard Tetley 1854–1935
English physicist
He was born in Liverpool and educated at Dulwich College, Liverpool College and Trinity College, Cambridge. He was appointed assistant director of the Cavendish Laboratory (1891), principal of University College, Liverpool (1895), and director of the National Physical Laboratory (1900–19). During his career he also held the presidencies of the Physical Society (1903–05), the Optical Society (1904–05, 1911–12), the Institution of Electrical Engineers (1906), the Faraday Society (1911–13) and the Institute of Physics (1919–21). He wrote several physics textbooks and is known for his work on electrical standards. He was elected FRS in 1882, and knighted in 1917.

Glazunov, Aleksandr Konstantinovich 1865–1936
Russian composer
Born in St Petersburg, he studied under RIMSKY-KORSAKOV, and was director of the St Petersburg Conservatory from 1906 until the Revolution of 1917, when the Soviet government gave him the title of People's Artist of the Republic. Among his compositions are eight symphonies and works in every branch except opera. In 1927 he emigrated to Paris.

Gleim, Johann Wilhelm Ludwig 1719–1803
German poet
Born in Ermsleben, near Halberstadt, he held religious and political offices. He was the leader of the Anacreontic school of lyric poets, celebrating the joys of wine, love and friendship, as in *Lieder* (1745, 'Songs') and *Lieder nach dem Anakreon* (1766, 'Anacreontic Songs'). His patriotic *Lieder eines Preussischen Grenadiers* (1758–78, 'Songs of a Prussian Grenadier') contributed to the war poetry of the age of FREDERICK II, THE GREAT.

Glemp, Jozef 1929–
Polish ecclesiastic
He studied at the Primatial Spiritual Seminary in Gniezno, was ordained in 1956 and became Bishop of Warmia in 1979. In 1968 he was appointed secretary to Cardinal STEFAN WYSZYŃSKI, whom he succeeded as Archbishop of Gniezno (1981–92), Archbishop of Warsaw (1981–2006) and primate of Poland (1981–). A specialist in civil and canonical law, Glemp was a prominent figure during Poland's internal political unrest. He was made a cardinal early in 1983 and was sent to Russia in 1989 by Pope JOHN PAUL II, where he became the first cardinal to be interviewed by *Pravda*. Later that year he was criticized for his handling of the furore over the siting of a Carmelite convent at the Auschwitz concentration camp.

Glen, Esther 1881–1940
New Zealand journalist and children's writer
Aware of the lack of children's reading material in newspapers, she started writing a children's supplement for the family newspaper the *Christchurch Sun*, and later for the *Christchurch Press*. Her first novel for younger readers was *Six Little New Zealanders* (1917), followed by its sequel *Uncles Three at Kamahi* (1926). Although she only wrote four books – the others were *Twinkles on the Mountain* (1920) and *Robin of Maoriland* (1929) – her influence on New Zealand children's writing was considerable, and in 1945 the New Zealand Library Association established the annual Esther Glen award for distinguished contributions to the genre.

Glencorse, Lord *See* INGLIS, JOHN

Glendower, Owen, *properly* **Owain Glyndwr** c.1350–c.1416
Welsh rebel
Born in Montgomeryshire, he claimed descent from Llywelyn ap Gruffydd. He quarrelled with Lord Grey over some lands and, unable to obtain redress from HENRY IV, began a guerrilla campaign against the English lords of the Marches which became a national war of independence. He proclaimed himself Prince of Wales, and in 1402 captured Lord Grey and Sir Edmund Mortimer, both of whom married Glendower's daughters and joined him in coalition with HENRY PERCY (Hotspur). That coalition ended in the Battle of Shrewsbury (1403), won by Henry IV. In 1404 Glendower entered into a treaty with Charles VI of France, who in 1405 sent a force to Wales. Glendower, though often defeated, kept fighting until his death.

Glenn, John Herschel 1921–
US astronaut and politician
Born in Cambridge, Ohio, he was educated at Maryland University. He joined the US Marine Corps in 1943, and served in the Pacific during World War II, and later in Korea. In 1957 he completed a record-breaking supersonic flight from Los Angeles to New York. He became an astronaut in 1959, and in 1962 became the first American to orbit the Earth in a three-orbit flight in the Friendship 7 space capsule. He resigned from the Marine Corps in 1965, and from 1975 to 1999 served as Democratic senator for Ohio. He sought the Democratic nomination for the presidency unsuccessfully in 1984 and 1988. In 1998 he took part in a flight of the space shuttle *Discovery*, becoming the oldest person to go into space.

Glennie, Dame Evelyn Elizabeth Ann 1965–
Scottish percussion player
Born in Aberdeen, she studied timpani and percussion from the age of twelve, and trained at the Royal Academy of Music, London. Judged to be a percussionist of outstanding abilities, she is additionally remarkable in her achievements as she experienced a gradual but total loss of hearing in her early teens. She has received innumerable prizes and awards and is a Fellow of the Royal College of Music. Many leading composers have written specially for her, and she has recorded and appeared widely throughout Europe, the USA, Australia and the Far East. Her autobiography, *Good Vibrations*, was published in 1990. She was awarded an OBE in 1993, and created DBE in 2006.

Gleyre, Charles 1806–74
Swiss painter
Born in Chevilly in the Swiss canton Vaud, he studied in Italy, travelled in Greece and Egypt and took over PAUL DELAROCHE's teaching school in Paris. MONET, RENOIR and ALFRED SISLEY numbered among his pupils. Much of his work is at Lausanne.

Glinka, Mikhail Ivanovich 1804–57
Russian composer
Born in Novopasskoi, Smolensk, he became a civil servant, but after a visit to Italy began to study music in Berlin. Returning to Russia, he produced his opera *A Life for the Tsar* (1836, known earlier as *Ivan Susanin*). His *Russlan and Ludmilla* (1842), based on a poem by ALEXANDER PUSHKIN, pioneered the style of the Russian national school of composers.

Glock, Sir William Frederick 1908–2000
English music critic and impresario
He was born in London and won an organ scholarship to Cambridge. After studying piano with ARTUR SCHNABEL in Berlin, he became music critic of *The Daily Telegraph* (1934), *The Observer* (1934–45) and the *New Statesman* (1958–59). He was also director of the Dartington Hall summer school of music (1953–79) and as controller of music at the BBC (1959–72) greatly extended the range of its repertory, notably in the HENRY WOOD Promenade Concerts. He was knighted in 1970.

Glória, Maria Da *See* MARIA II

Gloucester, Prince Henry, Duke of 1900–74
British prince
The third son of GEORGE V, he was educated privately and at Eton. He became a captain in the 10th Hussars and was created Duke of Gloucester (1928). In 1935 he married Lady Alice Montagu-Douglas-Scott (1901–2004), and they had two children: Prince William (1941–72) and Prince RICHARD, who succeeded him. He was Governor-General of Australia (1945–47).

Gloucester, Prince Humphrey, Earl of Pembroke and **Duke of**, *nicknamed* **Good Duke Humphrey** 1391–1447
English prince and literary patron
The youngest son of King HENRY IV, as Regent of England (1420–21) and Protector (1422–29) during the minority of HENRY VI, he was overshadowed by his elder brother, the Duke of BEDFORD, and greatly increased Bedford's difficulties by his greed, irresponsibility, and factious quarrels with their uncle, Cardinal HENRY BEAUFORT. In 1447 he was arrested for high treason by Suffolk, Beaufort's successor as first minister, at Bury St Edmunds and five days later was found dead in bed (apparently from natural causes). The first great figure in the English Renaissance, he cultivated friendships with literary figures like JOHN LYDGATE and the Italian humanists, who supplied him with manuscript books. He later presented these to Oxford to form the nucleus of the Bodleian library. He earned his nickname from his patronage of literature. 🕮 Susanne Saygin, *Humphrey, Duke of Gloucester (1390-1447) and the Italian Humanists* (2002)

Gloucester, Prince Richard, Duke of 1944–
British prince
The younger son of Prince Henry, Duke of GLOUCESTER, and grandson of GEORGE V, he trained as an architect. In 1972 he married Brigitte Eva van Deurs (1946–), the daughter of a Danish lawyer. They have one son, Alexander, Earl of Ulster (1974–), and two daughters, Lady Davina Windsor (1977–) and Lady Rose Windsor (1980–).

Gloucester, Prince Robert, Earl of d.1147
English prince
An illegitimate son of HENRY I, he was the principal supporter of his half-sister MATILDA, the Empress Maud, in her civil war against STEPHEN.

Gloucester, Gilbert de Clare, 8th Earl of, *known as* **the Red Earl** 1243–95
English nobleman
He was born in Christchurch, Hampshire, the son of Richard de Clare, 7th Earl of Gloucester. He sided with SIMON DE MONTFORT and helped him win the Battle of Lewes (1264) against the king's forces, but after quarrelling with de Montfort, he joined Prince Edward (later EDWARD I), and won the Battle of Evesham (1265). He married Joan, daughter of Edward I, and built Caerphilly Castle in south Wales.

Gloucester, Gilbert de Clare, 9th Earl of 1291–1314
English nobleman
Also 10th Earl of Clare and 8th Earl of Hertford, he was the son of Gilbert de Clare, 8th Earl of GLOUCESTER. His younger sister Margaret was married to Piers Gaveston, the favourite of EDWARD II, and after Gaveston's execution Gloucester acted as mediator for the barons with the king. He was killed in the English defeat by the Scots at Bannockburn (1314). Another sister, Lady Elizabeth de Clare (c.1291–1360), endowed Clare College, Cambridge (1336).

Gloux, Olivier *See* AIMARD, GUSTAVE

Glover, Jane Alison 1949–
English conductor and musicologist
Born in Helmsley, Yorkshire, she was educated at St Hugh's College, Oxford, where she became a lecturer in music (1976) and carried out research on the Italian composer FRANCESCO CAVALLI. She joined the Open University faculty of music in 1979, and also became a television presenter of such BBC programmes as *Orchestra* (1983) and *Mozart* (1985). She made her conducting debut at the Wexford Festival (1975), and went on to conduct nearly all the top orchestras in the world. After joining the Glyndebourne Opera in 1979, she worked as chorus director (1980–84) and as musical director of the touring opera (1982–85). She made her first appearance at the Royal Opera House, Covent Garden, in 1988, and was artistic director of the London Mozart Players (1984–91). In 2002, she became music director of Chicago's Music of the Baroque.

Glovichisch, Jurni *See* CLOVIO, GIULIO

Glowacki, Aleksander *See* PRUS, BOLESŁAW

Glubb, Sir John Bagot, *known as* **Glubb Pasha** 1897–1986
English soldier
He was born in Preston, Lancashire. After service in the Royal Engineers in World War I, he was the first organizer of the police force in the new state of Iraq in 1920. In 1926 he became an administrative inspector in the Iraqi government. Between 1930 and 1956 he organized and commanded British-mandated Transjordan's Arab Legion's Desert Patrol, which became the most efficient Arab army (the Jordanian army) in the Middle East. He was abruptly dismissed from his post following Arab criticism, despite his prestige among the Bedouin and great influence in Arabia. His publications include *The Story of the Arab Legion* (1948), *A Soldier with the Arabs* (1957), *Britain and the Arabs* (1959), *The Course of Empire* (1963), *The Middle East Crisis: A Personal Interpretation* (1967). He also wrote *Into Battle: A Soldier's Diary of the Great War* (1977). 🕮 Trevor Royle, *Glubb Pasha: Life and Times of Sir Bagot Glubb* (1992)

Gluck, Christoph Willibald 1714–87
German composer
Born in Erasbach, Bavaria, he studied in Milan, and began to write operas in 1741. In collaboration with the librettist Ranieri Calzabigi, he produced such works as *Orfeo ed Euridice* (1762, 'Orpheus and Eurydice') and *Alceste* (1767). In the late 1770s, Paris was divided into two – the Gluckists, who supported Gluck's French opera style, and the Piccinnists, who supported the traditional Italian style of NICCOLA PICCINNI, but Gluck won great accolades with his *Iphigénie en Tauride* (1778), and retired honourably from Paris.

Gluckman, Max Herman 1911–75
British social anthropologist
Born in Johannesburg, South Africa, he studied at Witwatersrand and Oxford, then carried out field research in southern and central Africa among the Zulu (1936–38), Barotse (1939–47) and Tonga (1944). Gluckman was director of the Rhodes–Livingstone Institute, Northern Rhodesia (1941–47), then was a lecturer at Oxford (1947–49) and in 1949 was appointed to the chair of social anthropology at Manchester, becoming research professor in 1971. During this period he built up a distinctive school of social anthropological research with a strong regional focus on central African societies, stressing the role of conflict in the maintenance of social cohesion. His major works were in the anthropology of law, politics and ritual, and include *Custom and Conflict in Africa* (1955) and *Politics, Law and Ritual in Tribal Society* (1965).

Glyn, Elinor, *née* **Sutherland** 1864–1943
British novelist
Born in Jersey, Channel Islands, she began writing with *The Visits of Elizabeth* (1900), but found fame with *Three Weeks* (1907), a book which gained a reputation for being risqué. She kept her public enthralled with such books as *Man and Maid* (1922), *Did She?* (1934) and *The Third Eye* (1940). Her novels were nonsensical, faulty in construction and ungrammatical, but were nevertheless avidly read. From 1922 to 1927 she lived in Hollywood, where 'it' (her version of sex appeal) was glamorized on the screen. 🕮 *Romance Adventure* (1936)

Gmelin, Johann Georg 1709–55
German botanist, natural historian and geographer
Born in Tübingen, he graduated in medicine aged 18, and only four years later had become professor of chemistry and natural history at St Petersburg University. In 1733 he took part in a lengthy scientific expedition to eastern Siberia, continued along the Yenisei River, and then turned south, returning to St Petersburg nearly nine-and-a-half years after setting out. He became the first person to determine that the Caspian Sea lay at a lower level than the Black and Mediterranean seas, and he published the expedition's botanical results as *Flora Sibirica* (4 vols, 1747–69). In 1747 he returned to Tübingen, where from 1749 he was professor of botany, chemistry and medicine.

Gmelin, Leopold 1788–1853
German chemist and physiologist
Born in Göttingen, he studied in Germany and Italy and taught at the University of Heidelberg, where he became professor and director of the Chemical Institute in 1817, posts that he held until 1851. His interests ranged from physiology to chemistry and mineralogy. He worked towards a definition of organic chemistry and introduced the terms 'ester' and 'ketone'. One of the pioneers of physiological chemistry, he prepared uric acid, formic acid and potassium ferricyanide (Gmelin's salt). He also developed a test which shows the presence of bile pigments (Gmelin's test).

Gmelin, Samuel Theophilus, *originally* **Samuel Gottlieb Gmelin** 1745–74
German botanist
He was born in Tübingen. He became professor of botany at St Petersburg University (1767) and explored the Don, the Volga and the Caspian Sea. His two most important works were *Historia Fucorum* (1768), dealing with the brown alga *Fucus* and its allies, and the account of his travels, *Reise durch Russland*, published in four volumes in the 1770s and 1780s. He was the nephew of JOHANN GEORG GMELIN.

Gneisenau, August Wilhelm Anton, Graf Neithardt von 1760–1831
Prussian soldier
Born in Schildau in Prussian Saxony, he accompanied the German auxiliaries of England to America in 1782, joined the Prussian army in 1786, and in 1806 fought against NAPOLEON I at Saalfeld and Jena. His defence of Colberg (1807) led to his appointment on the commission with GERHARD VON SCHARNHORST for the reorganization of the Prussian army. In the War of Liberation (1813–14) he served at Leipzig (1813). In the 1815 Waterloo campaign, as chief of staff under GEBHARD VON BLÜCHER he directed the strategy of the Prussian army.

Göbbels, (Paul) Joseph *See* GOEBBELS, (PAUL) JOSEPH

Gobbi, Tito 1913–84
Italian baritone and opera producer
Born in Bassano del Grappa, he studied law, but took up singing in Rome, and made his operatic debut in Gubbio (1935). A regular performer with the Rome Opera from 1938, he was an acclaimed actor and soon made an international reputation, especially in VERDIan roles such as Falstaff and Don Carlos. He also produced operas and appeared in films.

Gobelin
French family of dyers
Probably from Rheims, they founded a factory in about 1450 on the outskirts of Paris which later became famous for its tapestries.

Gobind Singh 1666–1708
Last of the ten Sikh Gurus
He completed the process by which the Sikhs developed from the quietist faith propagated by Guru NANAK to a militant creed. Gaining the leadership on the execution by the Mughals of his father, Guru Tegh Bahadur (1664–75), he was implacably hostile to them, and in the final years of the 17th century established a small Sikh state in the Punjab foothills by military means. At the Baisakhi festival in 1699 he instituted the Khalsa, the new Sikh brotherhood marked by a new code of discipline, the 'Five Ks' (visible symbols, including the uncut hair and beard), and common adoption of the name Singh for males and Kaur for females. Following AURANGZEB's death in 1707, moves towards an accommodation between Sikhs and Mughals were ended by Gobind Singh's death at the hands of Pathan assassins the next year. Traditionally, Gobind Singh declared on his deathbed that guruship would henceforth reside in the Sikh scripture (*Guru Granth*) and the Sikh community (*Guru Panth*), his sons having already died in battle or been executed by the Mughals.

Gobineau, Joseph Arthur, Comte de 1816–82
French Orientalist and diplomat
Born in Bordeaux, he was a member of the French diplomatic service and secretary to ALEXIS DE TOCQUEVILLE (1849–77). He wrote several romances and a history of Persia, but is best known for

his essay *The Inequality of Human Races*. He has been called the 'intellectual parent' of NIETZSCHE and the real inventor of the 'superman' and super-morality.

Godard, Benjamin Louis Paul 1849–95
French composer and violinist
Born in Paris, he studied under HENRI VIEUXTEMPS, and is now remembered chiefly for the 'Berceuse' from his opera *Jocelyn* (1888).

Godard, Jean-Luc 1930–
French film director
Born and educated in Paris, he began his career as a cinema critic (1950), and contributed to *Cahiers du Cinéma* (1952–65). He started making short films in 1954, and his first feature film, *À Bout de souffle* (1960, *Breathless*), established him as a leader of the *Nouvelle vague* ('New Wave') cinema. His elliptical narrative style and original use of jump cuts and freeze frames gained him much critical attention, both enthusiastic and otherwise. Other influential work from the 1960s includes *Bande à part* (1964), *Pierrot le fou* (1965), *Alphaville* (1965) and *Week-end* (1967). From 1967 onwards his work became more radically political, and he submerged himself in 'revolutionary anti-capitalist' films, although he returned to more mainstream concerns in the 1980s with *Sauve qui peut* (1980, 'Slow Motion'), *Detective* (1984), *Je vous salue, Marie* (1985, 'Hail Mary') and a highly idiosyncratic *King Lear* (1987). His recent work, such as *Éloge d'amour* (2001, 'In Praise of Love'), has embraced new video and digital technology.🕮 Colin McCabe, *Godard: A Portrait of the Artist at Seventy* (2003)

Godber, John Harry 1956–
English playwright and film and theatre director
Born in Upton, West Yorkshire, he was educated at Bretton Hall College in Leeds. He began his career as a schoolteacher (1979–83) and became artistic director of Hull Truck Theatre Company in 1984. During a prolific writing career he has produced over 30 plays for stage and television, including *Bouncers* (1986), *Teechers* (1987), *Lucky Sods* (1995) and *Thick as a Brick* (1999). *Up 'n' Under* (1984) won an Olivier award and was made into a film in 1997. He has also written widely for radio.

Goddard, Rayner Goddard, Baron 1877–1971
English judge
Born in London, he was educated at Marlborough and Trinity College, Oxford. Called to the Bar in 1899, he was appointed a High Court judge in the King's Bench Division in 1932, and became a Lord Justice of Appeal and a Privy Councillor in 1938. In 1944 he was made a life peer and became a Lord-of-Appeal-in-Ordinary, serving as Lord Chief Justice from 1946–58. A strong traditionalist and a believer in both capital and corporal punishment, he stressed that 'punishment must punish'.

Goddard, Robert Hutchings 1882–1945
US physicist, rocket engineer and inventor
Born in Worcester, Massachusetts, he received a PhD in physics from Clark University, Worcester, in 1911, and subsequently taught physics there for almost 30 years. Fascinated by the idea of space travel, he published *A Method of Reaching Extreme Altitudes* (1919) and in 1926 his first liquid-fuel rocket was launched. By 1929 he had developed the first instrument-carrying rocket able to make observations in flight. The following year he launched rockets at 500mph (804.5kph) to 2,000 feet (610 metres) and in 1935 they exceeded the speed of sound. He developed jet vanes and gyroscopic control ten years before the Germans, and described the prospects for electric propulsion, a solar-powered generator and electrostatically accelerated jets of ionized gas. In all, he was granted 214 patents. In 1937 one of his rockets attained an altitude of 1.8 miles (3km), but even during World War II the US government showed little interest in his achievements. Only after his death was he given due recognition for his pioneering work, which led directly to NASA and the US space exploration programme. 🕮 David A Clary, *Rocket Man: Robert H Goddard and the Birth of the Space Age* (2003)

Godden, (Margaret) Rumer 1907–98
English novelist, poet and children's author
Born in Eastbourne, Sussex, she lived for many years in India, a country and culture which provide the backdrop to much of her fiction. Her third novel and first major success, *Black Narcissus* (1939), describes the struggles of nuns attempting to found a mission in the Himalaya region. Her first book for children was *The Dolls' House* (1947). She often wrote from the point of view of a young person, most notably in *The Greengage Summer* (1958). Her later books include *Coromandel Sea Change* (1991), a love story set in southern India, *Pippa Passes* (1994) and *Cromartie vs The God Shiva* (1998). 🕮 *A House with Four Rooms* (1989); *A Time to Dance, No Time to Weep* (1987).

Gödel or **Goedel, Kurt** 1906–78
US logician and mathematician
Born in Brünn, Moravia (now Brno, Czech Republic), he studied and taught in Vienna, then emigrated to the USA in 1940 and joined the Institute for Advanced Study at Princeton University. He stimulated a great deal of significant work in mathematical logic and propounded one of the most important proofs in modern mathematics, namely Gödel's theorem, published in 1931, which demonstrated the existence of formally undecidable elements within any formal system of arithmetic. This result put an end to hopes of giving a truly rigorous foundation to all mathematics on essentially finite terms. His contact with EINSTEIN led him to discover novel solutions to Einstein's field equations which seem to infer the physical possibility of time travel.

Goderich, Frederick John Robinson, Viscount, *afterwards* **1st Earl of Ripon** 1782–1859
English politician
He was born in London and educated at Harrow and Cambridge. He entered parliament as a Tory MP in 1806, becoming president of the Board of Trade (1818–23, 1841–43) and Chancellor of the Exchequer (1823–27). He was associated with financial reforms to reduce government debt and promote greater freedom of trade. His success led WILLIAM COBBETT to name him 'Prosperity Robinson'. He was secretary of state for war and the colonies (1827) under GEORGE CANNING, whom he succeeded as prime minister. His weak leadership was soon exposed and he resigned willingly before meeting Parliament as prime minister (1827–28), the only premier to do so. Briefly changing parties, he served in Lord GREY's Whig governments as secretary for war and the colonies (1830–33) and Lord Privy Seal (1834–35). His last government office was under Sir ROBERT PEEL as president of the Board of Control (1843–46) and he introduced the bill to repeal the Corn Laws (1846).

Godfree, Kitty (Kathleen), *née* **McKane** 1896–1992
English tennis player
Born in London, she lost to SUZANNE LENGLEN in the 1923 Wimbledon final as Kitty McKane, and defeated the young US player Helen Wills the next year. In 1926, as Kitty Godfree, she defeated Lili de Alvarez to win the title again. In 1986 she presented a silver salver to MARTINA NAVRATILOVA when the latter won her seventh title.

Godfrey of Bouillon c.1060–1100
French crusader
The eldest son of Count Eustace II of Boulogne and Ida of Bouillon, he became Count of Verdun and Lord of Bouillon in the Ardennes in 1076 as heir to his maternal uncle Godfrey (the Hunchback). He had to fight to maintain this inheritance against rival claimants and other local enemies, even after his appointment as Duke of Lower Lotharingia by Emperor HENRY IV (1089), and in 1096 he sold or mortgaged all of his lands and joined the First Crusade. In 1099 he was elected ruler of Jerusalem, taking the title of 'Advocate' or Defender of the Holy Sepulchre, and the next month defeated an Egyptian invasion at Ascalon. He had begun to extend the territory held by the Christians when he died after a reign of only a year.

Godfrey, Bob (Robert) 1921–
British animated-cartoon producer and director
He was born in New South Wales, Australia, and brought to England as a baby. After training in animation as a background artist, he went on to make his own animated cartoons: *Watch the Birdie* (1954), which brought a new bawdy humour to British cartoons, *Polygamous Polonius* (1960), *Henry 9 till 5* (1965), *Kama Sutra Rides Again* (1971), and others. His musical cartoon *Great*, on the life of ISAMBARD KINGDOM BRUNEL, won an Academy Award in 1975. He is also known for the children's cartoons *Roobarb* (1974), *Henry's Cat* (1983) and, more recently, *Kevin Saves the World* (2002). He was awarded an MBE in 1986.

Godfrey, Sir Dan(iel Eyers) 1868–1939
English conductor
Born in London, he conducted opera and symphony concerts throughout Great Britain and from 1893 to 1934 was director of music to the Corporation of Bournemouth and its symphony orchestra. His father Daniel (1831–1903) was bandmaster of the Grenadier Guards (1856–96). His uncle Charles (1839–1904) was bandmaster of the Scots Fusiliers and the Royal Horse Guards and professor of military music at the Royal

College of Music, London. Another uncle, Adolphus Frederick (1837–82), was bandmaster of the Coldstream Guards, as was Charles (1790–1863), Sir Dan's grandfather, who founded *Jullien's Journal*, was devoted to military music, and was appointed musician-in-ordinary to King WILLIAM IV (1831).

Godfrey, Sir Edmund Berry 1622–78
English politician
A London wood merchant and justice of the peace, he was knighted in 1666. His unsolved murder, one of the most celebrated of historical mysteries, was used by TITUS OATES to advance his 'Popish Plot'.

Godiva, Lady d.c.1080
English noblewoman and religious benefactor
She was the wife of Leofric, Earl of Chester (d.1057). According to the 13th-century chronicler ROGER OF WENDOVER, she rode naked through the market-place of Coventry in order to persuade her husband to reduce the taxes he had imposed. A later embellishment of the legend suggests that she requested the townspeople to remain indoors, which they all did except for 'Peeping Tom', who was struck blind. Godiva built and endowed monasteries at Coventry and Stow, Lincolnshire. 🕮 Daniel Donoghue, *Lady Godiva: A Literary History of the Legend* (2002)

Godolphin, Sidney, 1st Earl of 1645–1712
English statesman
Born in Helston, Cornwall, he became a royal page in 1662, entered parliament in 1668, and in 1684 was made head of the Treasury and Baron Godolphin. On WILLIAM III's landing in 1688 Godolphin remained loyal to JAMES VII AND II, and started negotiations with William on his behalf. When James fled, he voted for a regency. However, in 1689 William reinstated him as first commissioner of the Treasury, where he remained until 1696, when he was replaced by a Whig. Queen ANNE on her accession made him her sole Lord High Treasurer (1702) and in 1706 he was created earl. In 1698 he married Henrietta, daughter of the Duke of MARLBOROUGH. His able management of the Treasury financed Marlborough's campaigns without increasing the public debt by more than one million annually. To prevent his own overthrow, he forced Anne to dismiss ROBERT HARLEY (1708). However, the influence of Harley's friend and relative, ABIGAIL MASHAM, helped Harley to power, and in 1710 Godolphin was himself dismissed. 🕮 Roy A Sundstrom, *Sidney Godolphin: Servant of the State* (1993)

Godowsky, Leopold 1870–1938
US pianist and composer
Born near Vilna, Lithuania, he toured in Russia as a boy, studied briefly in Berlin, and then went to the USA, where he spent much of his subsequent life. He worked at the Chicago Conservatory of Music (1895–1900) and was a professor at Vienna (1909–14). A skilful exponent of the keyboard, he developed the possibilities of the instrument (and left-hand technique in particular) to the utmost. However complex his compositions and many transcriptions may appear to be, they remain innately pianistic. He became a US citizen in 1891.

Godoy, Manuel de, Duke of Alcudia 1767–1851
Spanish politician
Born in Badajoz, he was a member of CHARLES IV's bodyguard and became the royal favourite. Having deposed the Count of ARANDA, he achieved dictatorial power at the age of 25 through the favour of the queen, Maria Luisa, whose lover he was. In 1795 he assumed the title Prince of the Peace, following Spain's defeat by Revolutionary France. In 1796 he allied with France against England – a disastrous move which turned Spain into a virtual French satellite, and greatly contributed to her losing her American Empire. On the French invasion of 1808, the king was obliged to imprison Godoy as a protection from popular fury. He subsequently intrigued with NAPOLEON I and spent the rest of his life in exile in Rome and Paris. 🕮 Douglas Hilt, *Troubled Trinity: Godoy and the Spanish Monarchs* (1988)

Godunov, Boris *See* BORIS GODUNOV

Godwin d.1053
Anglo-Saxon nobleman and warrior
The father of King HAROLD II, he was probably the son of the South Saxon Wulfnoth, but later stories indicate that his father was a peasant. He was made Earl of Wessex by King KNUT (Canute) (1018), and in 1042 helped raise EDWARD THE CONFESSOR to the throne, marrying him to his daughter Edith (1045). He was ambitious for his five sons, all of whom received earldoms (1043–57) and collectively their wealth almost equalled that of the royal family. His struggle against the king's Norman favourites caused Edward to confine Edith to a monastery and banish Godwin (1051). However, in 1052 Godwin won the support of Edward's forces and subjects, so that Edward was forced to reinstate him. His son Harold was for a few months Edward's successor.

Godwin, Edward William 1833–86
English architect and designer
Born in Bristol, he trained there and from 1854 practised as an architect. Northampton Town Hall (1861) dates from his early Gothic period. In 1865 he moved his practice to London. His mainly domestic architecture included the White House (1877), a studio house in Chelsea for his friend JAMES MCNEILL WHISTLER. He was a central figure in the Aesthetic movement, and his furniture designs after 1875 were much influenced by the Japanese style which that movement made fashionable. Much of it, in ebonized pine, was remarkably advanced in its simple unornamented structure. He was also a theatrical designer, dress reformer and journalist. He was the lover of ELLEN TERRY, and their son was EDWARD GORDON CRAIG.

Godwin, Fay Simmonds 1931–2005
English photographer
Born in Berlin, Germany, she was educated in numerous schools worldwide. She began by taking photographs of her two young sons but became best known for her landscapes, including Welsh and Scottish scenes. In later years they often made a sociological or ecological statement by incorporating pollution, in order to alert people to the threats posed by environmental disaster. From 1970 she worked as a freelance photographer, based in London. In 1979 her collaboration with TED HUGHES resulted in the collection of photographs and poems *Remains of Elmet: A Pennine Sequence*. Her many other publications include *The Oldest Road: An Exploration of the Ridgeway* (1975, co-authored with J R L Anderson), *Land* (1985) and *Our Forbidden Land* (1990). Her enduring love of Britain's wild places also found expression in her support for the Ramblers' Association, of which she was president (1979–80) and life president from 1990.

Godwin, Francis 1562–1633
English prelate and author
Born in Hannington, Northamptonshire, the son of Bishop Thomas Godwin (1517–90), he was educated at Oxford. He became rector of Sampford, then Bishop of Llandaff (1601) and of Hereford (1617). His eight works include *A Catalogue of the Bishops of England* (1601), but he is best known for his science-fiction romance *Man in the Moon or a Voyage Thither, by Domingo Gonsales* (1638), used as a source by Bishop JOHN WILKINS, CYRANO DE BERGERAC and JONATHAN SWIFT.

Godwin, Sir Harry 1901–85
English botanist
Born in Holmes, Rotherham, Yorkshire, he was educated at University College, Nottingham, and Clare College, Cambridge. From 1923 to 1968 he was on the staff of Cambridge, as professor of botany from 1960 to 1968. He was also the first director of the subdepartment of quaternary research at the Cambridge Botany School (1948–66). He pioneered British pollen analysis, and is also known for his contributions to the science of radiocarbon dating, and studying changes in land/sea levels in recent geological time. In 1930 he wrote *Plant Biology*, whose emphasis on physiology secured a deeper understanding of the basic role of the green plant, but his major published work was *The History of the British Flora* (1956). Elected FRS in 1945, he was knighted in 1970.

Godwin, Mary *See* WOLLSTONECRAFT, MARY

Godwin, William 1756–1836
English political writer and novelist
Born in Wisbech, Cambridgeshire, he spent his childhood in Guestwick, Norfolk, and then attended Hoxton Presbyterian College (1773–78). During a five years' ministry at Ware, Stowmarket and Beaconsfield, he turned Socinian and republican, and by 1787 was a 'complete unbeliever'. His *Enquiry Concerning Political Justice* brought him fame, and captivated COLERIDGE, WORDSWORTH, ROBERT SOUTHEY, and later and above all SHELLEY, who became his disciple, son-in-law and subsidizer. It was calmly subversive of everything (law and 'marriage, the worst of all laws'), but it deprecated violence, and its author escaped prosecution. His masterpiece, *The Adventures of Caleb Williams* (1794), was designed to give 'a general review of the modes of domestic and unrecorded despotism'. In 1797 he married MARY WOLLSTONECRAFT, who was pregnant by him, but she died soon after their daughter, MARY WOLLSTONECRAFT SHELLEY, was born. Four years later he married Mrs Clairemont. A book-

selling business long involved Godwin in difficulties, and in 1833 he was glad to accept the sinecure post of yeoman-usher of the Exchequer. His tragedy *Antonio* (1800) was widely criticized. The best of his later prose works are *The Enquirer* (1797) and *St Leon* (1799). 🕮 Peter H Marshall, *William Godwin* (1984)

Godwin-Austen, Henry Haversham 1834–1923
English soldier and surveyor
A lieutenant-colonel, he was attached to the trigonometrical survey of India (1856–77). The second highest mountain in the world, in the Karakoram Range, Pakistan, was named Mt Godwin-Austen after him in 1888, although it is more commonly known as K2.

Goebbels or **Göbbels, (Paul) Joseph** 1897–1945
German Nazi politician
Born in Rheydt, the son of a Rhenish factory foreman, he was educated at a Catholic school and Heidelberg University. A club foot absolving him from military service in World War I, he won a number of scholarships and attended eight universities. He became HITLER's enthusiastic supporter, and was appointed editor of the Nazi sheet *Völkische Freiheit* and led the Nazi Party in Berlin in 1923. With the Führer's accession to power 'Jupp' was made head of the Ministry of Public Enlightenment and Propaganda. A bitter anti-Semite, he had a gift for mob oratory which made him a powerful exponent of the more radical aspects of the Nazi philosophy. Wartime conditions greatly expanded his responsibilities and power, and by 1943, while Hitler was running the war, Goebbels was virtually running the country. He retained Hitler's confidence to the last, and in the Berlin bunker he and his wife committed suicide after they had taken the lives of their six children. His diaries now represent a major historical source. 🕮 Ralf Georg Reuth, *Goebbels: The Life of Joseph Goebbels, the Mephistophelean Genius of Nazi Propaganda* (1993)

Goedel, Kurt *See* GÖDEL, KURT

Goehr, (Peter) Alexander 1932–
British composer
Born in Berlin, the son of a conductor, he was taken to England in 1933, and studied at the Royal Manchester College (1952–55) and in Paris. He was professor of music at Leeds University (1971–76) and at Cambridge (1976–99, now emeritus). Sometimes referred to as one of the Manchester School with PETER MAXWELL DAVIES and HARRISON BIRTWISTLE, and typically exploratory in style, he wrote (1992) the piano cycle ... *In Real Time*, a series of studies in the tensions between 'real' and 'experimental' time. That year his choral work *The Death of Moses* had its first performance at the Seville Expo. His other compositions include concertos, the operas *Arden Must Die* (1967), *Behold the Sun* (1985) and *Ariana* (1995), and choral, orchestral and chamber music.

Goeppert-Mayer, Maria, *née* **Goeppert** 1906–72
US physicist and Nobel Prize winner
Born in Kattowitz, Germany (now Katowice, Poland), she graduated from Göttingen University in 1930, emigrated to the USA and taught at Johns Hopkins University, where her husband, Joseph Mayer, was professor of chemical physics. From 1960 she held a chair at the University of California, San Diego. Based on the fact that certain nuclei are very stable, having 'magic numbers' of protons and neutrons, she drew an analogy with atomic physics in which stable atoms have a closed shell of electrons and developed the shell model of the nucleus, resolving some initial problems by discussions with ENRICO FERMI. A similar model was developed in Germany by HANS JENSEN. Goeppert-Mayer shared the 1963 Nobel Prize in physics with EUGENE WIGNER and Jensen.

Goerdeler, Carl 1884–1945
German politician
Born in Schneidemühl, he served under HITLER as commissar for price control (1934), but resigned from his post as mayor of Leipzig in 1937 and became one of the leaders of the opposition to Hitler. He was executed together with a number of generals following Count CLAUS VON STAUFFENBERG's unsuccessful bomb plot of 20 July 1944.

Goering or **Göring, Hermann Wilhelm** 1893–1946
German Nazi politician
He was born in Rosenheim, Bavaria. One of the first infantry officers to fight on the Western Front in World War I, he transferred to the air force in 1915, became an ace pilot and later commanded the famous 'Death Squadron'. An anti-Semite, he joined the Nazi party in 1922 and next year commanded the HITLER stormtroopers, the Brownshirts (SA), but went into exile for five years after the failure of the November Munich putsch. In 1928 he became one of the twelve Nazi deputies to the Reichstag. In the troubled years of economic crisis his influence increased and in 1932 he became president of the Reichstag. When Hitler assumed power (1933) Goering entered the Nazi government, his several posts including that of Reich air minister and, in 1938, war minister. As Hitler's chief lieutenant he instigated the Reichstag fire, his pretext for outlawing his Communist opponents. He founded the Gestapo, set up the concentration camps for political, racial and religious suspects, and, in the great purge of 30 June 1934 ('Night of the Long Knives'), had his comrades murdered. Two years later the international phase of his career opened when he mobilized Germany for total war under the slogan 'guns before butter'. He was director of the Four-Year Plan, renewed in 1940, to prepare the economy for war, and played a major part in the Anschluss with Austria (1938), and in the annexation of the Sudetenland (1938). When the Munich Agreement was made in 1938, he announced a five-fold extension of the Luftwaffe. Early in 1940 he became economic dictator of Germany and in June reached the pinnacle of his power when Hitler made him marshal of the Reich, the first and only holder of the rank. However, the Battle of Britain, the failure of the 1941 Nazi bombing attacks to disrupt the British ports and cities, and the mounting Allied air attacks on Germany in 1942 and 1943 led to a decline in his prestige. By the time of the Allied liberation of Normandy in 1944 he was in disgrace. As the war drew to a close, he attempted a revolution. Hitler condemned him to death, but he escaped and was captured by US troops. In 1946 he was the principal defendant at the Nuremberg war crimes trial, when his record of unscrupulous intrigue and merciless oppression was laid bare. He was condemned for guilt 'unique in its enormity', but committed suicide by poison a few hours prior to his intended execution. 🕮 R J Overy, *Goering: The Iron Man* (2000)

Goes, Hugo van der c.1440–1482
Flemish painter
Born probably in Ghent, and dean of the painters' guild at Ghent (1473–75), he painted the magnificent Portineri Altarpiece containing *The Adoration of the Shepherds* (now in the Uffizi, Florence) for the S Maria Nuova Hospital in Florence, and many other notable works. He spent the last years of his life in the monastery of Soignies, near Brussels.

Goethals, George Washington 1858–1928
US engineer
Born in Brooklyn, New York City, he graduated from West Point in 1880 and served as an officer in the army's engineer corps. As chief engineer of the Panama Canal (1907–14), he supervised a corps of 30,000 workers and directed the excavation and construction, completing the project six months ahead of schedule. He later served as civil governor of the Canal Zone (1914–16).

Goethe, Johann Wolfgang von *See panel p634*

Goetz von Berlichingen *See* GÖTZ VON BERLICHINGEN

Goffe, William c.1605–1679
English Parliamentarian
Born in Stanmer, Sussex, he became major-general in the Parliamentary army, sat in the House of Commons, and signed CHARLES I's death warrant. In 1660 he fled to America, where he lived for many years in seclusion at Hadley, Massachusetts.

Goffman, Erving 1922–82
Canadian sociologist
Born in Alberta, Canada, he was educated at the universities of Toronto and Chicago, and from 1949 to 1951 he carried out research at Edinburgh University. He then returned to Chicago, before serving as a visiting scientist at the National Institute for Mental Health (1954–57). In 1958 he joined the department of sociology at the University of California, Berkeley, remaining there until 1968, when he moved to Pennsylvania University. Renowned for his work on patterns of human communication, he was particularly interested in the way in which people present themselves to each other, and what happens when they deviate from accepted norms. His later work was concerned with language. His books include *Asylums* (1961), *Stigma* (1963), *Behavior in Public Places* (1963), *Relations in Public* (1972) and *Forms of Talk* (1981).

Gogarty, Oliver St John 1878–1957
Irish poet and memoir-writer
He was born in Dublin. Also a playwright, politician and surgeon, he knew JAMES JOYCE and was the model for 'stately,

Goethe, Johann Wolfgang von 1749–1832

German poet, dramatist, scientist and court official, one of the greatest figures in European literature

Goethe was born in Frankfurt am Main, the son of a lawyer. He was educated privately and reluctantly studied law at Leipzig (1765–68); however, a love affair inspired him to write his first two plays, *Die Laune des Verliebten* (1767, 'The Beloved's Whim') and *Die Mitschuldigen* (staged 1787, 'The Accomplices'). After a protracted illness he continued his law studies at Strasbourg from 1770, where he came under the influence of JOHANN HERDER, the pioneer of German Romanticism.

In 1771 he qualified and returned to Frankfurt, where he became a newspaper critic and captured the spirit of German nationalism in an early masterpiece of drama, *Götz von Berlichingen* (1773), which epitomized the man of genius at odds with society. *Faust* was begun, and Goethe followed up his first triumph with his self-revelatory cautionary novel *Die Leiden des jungen Werthers* (1774, 'The Sorrows of Young Werther'), which mirrored his own doomed affair with Charlotte Buff, the fiancée of a friend. *Clavigo*, a Hamlet-like drama, followed in the same vein, based on BEAUMARCHAIS' *Mémoires*. A romance with Lili Schönemann inspired the love lyrics of 1775.

In the autumn Goethe (perhaps surprisingly) accepted the post of court official and privy councillor (1776) to the young Duke of Weimar. He conscientiously carried out all his state duties, interested himself in a geological survey, and exerted a steadying influence on the inexperienced duke. His ten-year relationship with the young widow, CHARLOTTE VON STEIN, served as a psychological support, but did little to help his development as a creative writer.

Goethe also took an interest in the life sciences; in 1782 he extended his researches to comparative anatomy, discovered the intermaxillary bone in man (1784), and formulated a vertebral theory of the skull. In botany he developed a theory that the leaf represented the characteristic form of which all the other parts of a plant are variations, and made unsuccessful attempts to refute ISAAC NEWTON's theory of light. He wrote a novel on theatrical life, *Wilhelm Meisters Theatralische Sendung* ('Wilhelm Meister's Theatrical Mission', not discovered until 1910), which contains the enigmatic poetry of Mignon's songs, epitomizing the best in German romantic poetry, including the famous 'Nur wer die Sehnsucht kennt' ('Only He Who Knows Longing'). His visits to Italy (1786–88, 1790) cured him of his emotional dependence on Charlotte von Stein and contributed to a greater preoccupation with poetical form, as in the severely classical verse version of his drama *Iphigenie auf Tauris* (1787) and the more modern *Egmont* (1788) and *Torquato Tasso* (1790).

His love for classical Italy, coupled with his passion for Christiane Vulpius, whom he married in 1806, found full expression in *Römische Elegien* (1795, 'Roman Elegies'). From 1794 he formed a friendship with SCHILLER, with whom he conducted an interesting correspondence on aesthetics (1794–1805) and carried on a friendly contest in the writing of ballads which resulted in Schiller's part in *Das Lied von der Glocke* ('The Song of the Bell') and Goethe's in the epic idyll *Hermann und Dorothea* (1798). They wrote against philistinism in the literary magazine *Die Horen*.

Goethe's last great period saw the prototype of the favourite German literary composition, the *Bildungsroman*, in *Wilhelm Meisters Lehrjahre* (1796, 'Wilhelm Meister's Apprenticeship'), continued as *Wilhelm Meisters Wanderjahre* (1821–29, 'Wilhelm Meister's Travels'). *Wilhelm Meister* was to become the idol of the German Romantics, of whom Goethe increasingly disapproved. He disliked their enthusiasm for the French Revolution, which he satirized in a number of works, including the epic poem *Reineke Fuchs* (1794), based on a medieval theme, and the drama *Die natürliche Tochter* (1803, 'The Natural Daughter'), and their disregard for style, which he attempted to correct by example in his novel *Die Wahlverwandtschaften* (1809, 'The Elective Affinities') and the collection of lyrics, inspired by Marianne von Willemer, *West-östlicher Divan* (1819), an attempt to marry East with West.

Goethe's masterpiece, however, is his version of CHRISTOPHER MARLOWE's drama of *Faust*, on which he worked for most of his life. Begun in 1775, the first part was published after much revision and Schiller's advice in 1808, and the second part in 1832. Faust, the disillusioned scholar, deserts his 'ivory tower' to seek happiness in real life, and makes a pact with Satan, who brings about the love affair with, seduction and death of Gretchen, an ordinary village girl, and subtly brings Faust by other such escapades to the brink of moral degradation.

Goethe took little part in the political upheavals of his time, although he saw in NAPOLEON I the saviour of European civilization; Napoleon made a point of meeting Goethe at the congress of Erfurt (1803). When he died, Goethe was buried near Schiller in the ducal vault at Weimar.

🕮 Goethe's autobiography is *Aus Meinem Leben: Dichtung und Wahrheit* (1811–22, Eng trans *From My Life: Poetry and Truth*, 1848). See also Nicholas Boyle, *Goethe: The Poet and the Age* (2 vols, 1991 and 2000); Victor Lange (ed), *A Collection of Critical Essays* (1967); George H Lewes, *The Life of Goethe* (1855).

♫ Many of Goethe's songs have been set to music. Famous examples are *Das Veilchen* (*The Violet*, MOZART), *Erlkönig* (*The Erl King*, SCHUBERT and LOEWE), *Ganymed* (*Ganymede*, SCHUBERT and HUGO WOLF), *Klärchens Lied* (*The Song of Klärchen*, BEETHOVEN), *Gretchen am Spinnrade* (*Gretchen at Her Spinning-Wheel*, SCHUBERT), *Heidenröslein* (*Wild Rose*, SCHUBERT).

Wer nie sein Brot mit Tränen aß,
Wer nie die kummervollen Nächte,
Auf seinem Bette weinen saß,
Der kennt euch nicht, ihr himmlischen Mächte.

'Who never ate his bread in sorrow,
Who never spent the darksome hours
Weeping and watching for the morrow
He knows ye not, ye heavenly powers.'

– From *Wilhem Meisters Lehrjahre* (1796).

plump Buck Mulligan' in *Ulysses*. He was a senator of the Irish Free State from its foundation in 1922 until 1939, when he moved to the USA. His garrulous, witty prose is at its best in *As I Was Going Down Sackville Street* (1937) and *Tumbling in the Hay* (1939). It is on these volumes, rather than the *Collected Poems* (1952), that his lessened reputation now rests.

Gogh, Vincent Van *See* VAN GOGH, VINCENT WILLEM

Gogol, Nikolai Vasilevich 1809–52

Russian novelist and dramatist

Born in Sorochinstsi, Poltava, he settled in St Petersburg in 1829, and in 1831–32 published his first major work, *Vechera na khutore bliz Dikanki* ('Evenings on a Farm near Dikanka'). This was followed by two short-story collections, *Mirgorod* (1835, Eng trans 1928) and *Arabesques* (1835, Eng trans 1982), which contained some of his finest stories, like 'Shinel' ('The Overcoat'), 'Nevsky Prospect' and 'Zapiski symashedshevo' ('The Diary of a Madman'), introducing a nightmarish world of his fantastic imagination, detailing his fears, frustrations and obsessions. In 1836 he brought out his play, *Revizor* (Eng trans *The Inspector-General*, 1892), the best of Russian comedies, a wild and boisterous satire exposing the corruption, ignorance and vanity of provincial officials. He left Russia for Italy in 1836, and in Rome wrote the first part of *Myortvye dushi* (1842, Eng trans *Dead Souls*, 1854), one of the great novels in world literature. It deals with an attempt by small landowners to swindle the government by the purchase of dead serfs whose names should have been struck off the register. His later work shows increasing obsession with his own 'sinfulness' and he burnt many of his remaining manuscripts, including the second part of *Myortvye dushi*. He returned to Russia in 1846. 🕮 Donald Fanger, *The Creation of Nicolai Gogol* (1979)

Goh Chok Tong 1941–

Singapore politician

Born in Singapore, he was educated at the Raffles Institute and at Williams College in the USA. He worked as a civil servant before joining the Neptune Orient Lines as a businessman in 1969. Elected to parliament in 1976, he specialized in trade-

union legislation and became the first secretary of the Peoples' Active Party. In parliament he held a number of ministerial posts, including trade and industry (1979–81) and defence (1982–85), before becoming deputy prime minister in 1985. He was appointed prime minister in 1990, and remained in office until 2004, when he became a senior minister and also the chairman of the Monetary Authority of Singapore in 2004.

Gokhale, Gopal Krishna 1866–1915
Indian politician and social reformer
Born in Kotluk, Bombay, he became professor of history at Fergusson College, Poona, resigning in 1904 when he was selected as representative of the Bombay legislative council at the supreme council. He founded the Servants of India Society in 1905 to work for the relief of the underprivileged, and in the same year was elected president of the Indian National Congress. He was a leading protagonist of Indian self-government and influenced MAHATMA GANDHI, advocating moderate and constitutional methods of agitation and gradual reform. 🕮 B R Nanda, *Gokhale: The Indian Moderates and the British Raj* (1977)

Gold, Jimmy *See* NAUGHTON AND GOLD

Gold, Thomas 1920–2004
US astronomer
Born in Vienna, Austria, he studied at Cambridge and worked in the UK before moving to the USA in 1956. While in England he worked with HERMANN BONDI and FRED HOYLE on the steady-state theory of the origin of the universe. The theory was later displaced through new evidence, but it was a valuable contribution to cosmology. From 1959 to 1981 Gold was director of the Center for Radiophysics and Space Research at Cornell University, and in 1968 he suggested the currently accepted theory that pulsars (discovered by JOCELYN BELL BURNELL and ANTONY HEWISH in that year) are rapidly rotating neutron stars, dense collapsed stars which produce beams of radio waves from their poles which appear as radio pulses on Earth. His book *The Deep Hot Biosphere* (1999) proposed an unorthodox theory of the origin of petroleum and natural gas, suggesting that some deposits arise from gas trapped in the Earth's interior from the time of the planet's formation. He was professor of astronomy at Cornell University from 1971 to 1986, then emeritus, and became an honorary Fellow of Trinity College, Cambridge, in 1986.

Goldberg, Arthur Joseph 1908–90
US jurist and diplomat
He was born in Chicago. As a lawyer in private practice he was an advocate of organized labour, and in 1955 he helped to found AFL–CIO, a national federation of labour unions formed by the merger of the American Federation of Labor, an organization composed primarily of craft unions founded in 1886, and the Congress of Industrial Organizations, a federation of industrial unions founded in 1938. He served as an associate justice of the Supreme Court (1962–65), resigning to become a US representative to the United Nations (1965–68), but never realized his goal of negotiating an end to the Vietnam War (1975).

Goldberg, Reuben Lucius, *known as* **Rube** 1883–1970
US cartoonist
Born in San Francisco, he studied engineering at the University of California, but soon after graduating (1904) he embarked on a career as a newspaper cartoonist, first in San Francisco and then (from 1907) in New York City, where he worked for the *New York Evening Mail* and other journals. Syndicated from 1915, his popular cartoons often mocked the pointless complications of modern life, and he was famous for his drawings of ridiculously elaborate machines designed to accomplish simple tasks. He turned to editorial cartooning after 1938 and won the Pulitzer Prize in 1948.

Goldberg, Whoopi, *originally* **Caryn Johnson** 1949–
US actress
Born in New York City, she appeared on stage from the age of eight, and gradually developed her talent as a mimic and stand-up comedienne, which culminated in her Broadway triumph *Whoopi Goldberg* (1984–85). She made her major film debut in *The Color Purple* (1985), for which she was nominated for a Best Actress Academy Award. Rarely offered first-rate material, she turned to television, finding recurring roles in the short-lived sitcom *Bagdad Café* (1990) and the series *Star Trek: The Next Generation* (1992–94). She acquired further recognition for her performance in *Ghost* (1990), which brought her a Best Supporting Actress Academy Award, and for the commercially successful *Sister Act* (1992). Along with comedians Billy Crystal and ROBIN WILLIAMS, she has organized the cable-television show *Comic Relief* for several years in order to raise money for the homeless in the USA. Later films include *Boys on the Side* (1995) and *How Stella Got Her Groove Back* (1998). She starred in her own NBC series, *Whoopi* (2003–04).

Goldberger, Joseph 1874–1929
US physician and epidemiologist
Born in Girált, Hungary, he went to the USA as a child and studied medicine at the Bellevue Hospital Medical College in New York City. After private medical practice he joined (1899) the US Public Health Service, where he investigated the mechanisms of the spread of a number of infectious diseases, including measles, typhus and yellow fever. His brilliant epidemiological studies of pellagra within institutions in the southern USA demonstrated that pellagra is a nutritional disorder caused by an unbalanced diet and cured by the addition of fresh milk, meat or yeast. He used himself in a series of well-designed experiments which demonstrated that, contrary to contemporary opinion, pellagra was not an infectious disease. The deficiency was later shown to be niacin, one of the vitamins of the B complex.

Goldblum, Jeff(rey) Lynn 1952–
US actor
Born in Pittsburgh, Pennsylvania, he studied at the Neighborhood Playhouse in New York. He is known for his portrayals of nervy outsiders or maverick scientists in films such as *Invasion of the Bodysnatchers* (1978), *The Fly* (1986), *Jurassic Park* (1993), *Independence Day* (1996) and *The Lost World* (1997).

Goldie, Charles Frederick 1870–1947
New Zealand painter
He was born in Auckland and in his day was one of New Zealand's most successful artists. Now considered more of historical than artistic interest, he began working in Paris in 1892, winning the Prix Julian in 1896, and returned to Auckland in 1898. Apart from a ten-year break through ill health, up to 1916 and in the 1930s he worked strenuously on portraiture, especially on *moko*, the traditional and elaborate Maori facial tattoos. His detailed and meticulous life studies and portraits provide a valuable insight into a disappearing society.

Goldie, Sir George Taubman 1846–1925
British soldier and trader
After service as an army officer, he became a trader in West Africa. He foresaw the developing partition of Africa and believed that British interests must be secured against the French in the Oil Rivers region and along the Niger as a great commercial highway to the interior. By 1884 he had amalgamated all the British companies as the National Africa Company and set out to secure treaties from chiefs throughout the Niger Delta and in northern Nigeria. In 1886 he secured a charter for his renamed Royal Niger Company and effectively ruled the Niger regions until 1898. He employed FREDERICK LUGARD, who conquered the emirates of Northern Nigeria.

Goldin, Nan(cy) 1953–
US photographer
Born in Washington, DC, she ran away in her early teens from her conventional suburban upbringing after the suicide of her sister, and found an alternative family among the drag queens and drug addicts of the East Coast's bohemian subculture. Her intimate photographic 'diary' of lovers, friends, transvestites and junkies in the 1970s and early 1980s was an attempt to capture and retain a transient moment, but her images became a poignant reminder of loss in the wake of heroin abuse and AIDS; collected as *The Ballad of Sexual Dependency*, they were first exhibited as a multimedia slideshow before publication in 1986. While initially regarded as transgressive and shocking, Goldin has come to be recognized as a seminal artist whose influence continues to be widely felt in fashion as well as in photography and art. 🕮 *Nan Goldin: I'll Be Your Mirror* (2002)

Golding, Sir William Gerald 1911–93
English novelist and Nobel Prize winner
Born in St Columb Minor, Cornwall, he was educated at Marlborough Grammar School and Brasenose College, Oxford, where he took examinations in sciences but then transferred to English literature. After five years at Oxford he published his first book, *Poems* (1934), a rarity which he later disowned. He spent the next five years working in small theatre companies, as an actor, director and writer, and in 1958 he adapted the short story 'Envoy Extraordinary' for the stage as *The Brass Butterfly*. He married in 1939, spent World War II in the Royal Navy, and from 1945 to 1961 was a teacher. He gained international celebrity with *The Lord of the Flies* (1954). A chronicle of the increasingly malevolent actions of a group of schoolboys shipwrecked on a desert island in the wake of a nuclear war,

Golding said that it arose from his five years' war service and ten years of teaching small boys. *The Inheritors* (1955) was his second novel and is similar in theme and tone. Next came *Pincher Martin* (1956), *Free Fall* (1959), *The Spire* (1964) and *The Pyramid* (1967). There was a gap of twelve years before *Darkness Visible* (1979), during which he wrote short stories, a film script and aborted novels. *Rites of Passage* (1980), the first of a trilogy about a 19th-century voyage from England to Australia, won the Booker Prize. *Close Quarter* (1987) was its sequel and the trilogy closed with *Fire Down Below* (1989). His only other novel was *The Paper Men* (1984). He was awarded the Nobel Prize in literature in 1983. 🕮 Kevin McCarron, *William Golding* (1994)

Goldman, Emma, *known as* **Red Emma** 1869–1940
US anarchist, feminist and birth-control advocate
She was born in Kaunas, Lithuania, and her Jewish family moved to Russia but were forced to go to Germany to avoid persecution. In 1885 she emigrated to the USA, where she began active anarchist agitation against tyrannical employers and was jailed in 1893 for incitement to riot in New York City. She founded and edited the anarchist monthly *Mother Earth* (1906–17) and became internationally known for her stirring speeches and her visits to anarchist congresses in Paris (1899) and Amsterdam (1907). She also worked extensively in US urban slums. In 1917 she was imprisoned for opposing government policy on registration of military recruits; she was deported to the USSR but returned to the USA in 1924, and later supported the anarchists in the Spanish Civil War. Her publications include an autobiography, *Living My Life* (1931), and such other works as *Anarchism and Other Essays* (1910) and *My Disillusionment in Russia* (1923). She eventually settled in France. 🕮 Theresa and Albert Moritz, *The World's Most Dangerous Woman* (2001)

Goldmark, Carl 1830–1915
Hungarian composer
Born in Keszthely, he studied in Vienna and composed *Die Königin von Saba* (1875, 'The Queen of Sheba'), *Merlin* (1886) and other lavishly colourful operas, two symphonies, two violin concertos and other works. His nephew was Rubin Goldmark (1872–1936), the US composer who taught AARON COPLAND and GEORGE GERSHWIN.

Goldmark, Peter Carl 1906–77
US engineer and inventor
Born in Budapest, Hungary, he studied at Vienna and Berlin. He emigrated to the USA in 1933 and found employment in the laboratories of the Columbia Broadcasting System, where he developed the first practical colour television system, used for experimental transmissions in New York City in 1940. He led the team that invented the long-playing microgroove record in 1948, and later built a special type of camera for the lunar orbiting space vehicle, which transmitted very high-definition pictures of the Moon's surface back to Earth.

Goldoni, Carlo 1707–93
Italian dramatist
Born in Venice, he studied law, but turned to writing for the stage. After several years in north Italy, he settled in Venice in 1740, and over the next 20 years wrote no fewer than 250 plays, in Italian, French and the Venetian dialect. He was greatly influenced by MOLIÈRE and the 'commedia dell'arte', although many of his subjects are derived from direct observation of daily life. His best-known plays are *La locandiera* (1753, Eng trans *La Locandiera (The Mistress of the Inn)*, 1912), *I rusteghi* (1760, Eng trans *The Boors*, 1961) and *Le baruffe chiozzote* (1762, Eng trans *The Squabbles of Chioggia*, 1914). In 1762 he began to write for the Italian theatre in Paris, and he was attached to the French court until the Revolution. He published his *Mémoires* in 1787 (Eng trans 1814). 🕮 Joseph Farrell, *Carlo Goldoni and Eighteenth-century Theatre* (1998)

Goldschmidt, Berthold 1903–96
British composer
Born in Hamburg, Germany, he was a younger contemporary of many avant-garde composers. He had a promising career in Germany, and became artistic adviser to Carl Ebert at the Berlin City Opera (1931–33). In 1932 his first opera, *Der gewaltige Hahnrei* ('The Magnificent Cuckold'), was premiered at Mannheim. He fled to London in 1935, and shortly after composed his Second String Quartet (1936), expressing the sorrow of his race. In 1951 he was one of four winners in a competition for a new opera sponsored by the Arts Council for the Festival of Britain, but neither his opera (*Beatrice Cenci*) nor any of the others was performed. An expert on the music of GUSTAV MAHLER, he helped to complete Mahler's unfinished Tenth Symphony in 1960 with DERYCK COOKE, and conducted its first performance in London in 1988. He continued to compose until his death.

Goldschmidt, Hans 1861–1923
German chemist
Born in Berlin, he studied under ROBERT BUNSEN at Heidelberg. In 1905 he invented the highly inflammable mixture of finely divided aluminium powder and magnesium ribbon known as thermite. The high temperatures obtained from this mixture make it useful for welding and for reducing metals such as chromium, manganese and cobalt from their oxide ores. It has also been used in incendiary bombs. Around 1910, he developed a commercial process for extracting beryllium, a rare metal which is used in the manufacture of hard alloys and some scientific instruments.

Goldschmidt, Meïr Aron 1819–87
Danish journalist and novelist
He was born in Vordingborg, of Jewish parentage, and was educated in Copenhagen before turning to a career in journalism. He founded a satirical periodical, *Corsaren*, in 1840. His best-known novels are *En Jøde* (1845, Eng trans *Bendixen the Jew*, 1852, and as *The Jew of Denmark*, 1952), and *Hjemløs* (1853, Eng trans *Homeless*, 1857). They are acutely psychological and relate characters to social pressures in a distinctively 'modern' way. He also wrote an autobiography (1877). 🕮 M Brøndstadt, *Meïr Goldschmidt* (1965)

Goldschmidt, Richard Benedikt 1878–1958
German biologist
Born in Frankfurt am Main, he was appointed biological director of the Kaiser Wilhelm Institute, Berlin (1921), and in 1935 went to the USA, where he became professor of zoology at the University of California (1936–58). He experimented on the role of the X-chromosomes using butterflies, and proposed the idea that the chromosomes themselves, and not the individual genes, are the units of heredity. One of his more important contributions was to show that much geographical variation is genetic and not environmental in origin. He also demonstrated that environmental effects could mimic some of the effects of genetic mutations. His books include *Physiological Genetics* (1938), *The Material Basis of Evolution* (1940) and *Theoretical Genetics* (1955).

Goldschmidt, Victor Moritz 1888–1947
Norwegian geologist and crystallographer
Born in Zurich, Switzerland, he moved to Christiania (renamed Oslo in 1925) with his family in 1905. After studying chemistry, geology and mineralogy at Christiania, he became a professor and director of the Mineralogical Institute there in 1914. From 1916 to 1922 he was chairman of the materials supply committee of the Norwegian Government. In 1927 he took up the chair of mineralogy at Göttingen, initially commuting by air from Oslo, but he resigned the Norwegian position and settled in Göttingen in 1929. In 1935 he was forced to leave Germany by the Nazis and returned to Oslo, where he was immediately granted a chair. When Germany invaded Norway in 1940, he worked secretly for the Allies for some time. In the end he fled to Sweden and then to Great Britain, where he worked at the Macaulay Institute and at Rothamsted. In 1946 he returned to Norway. His earliest work was on the petrology of southern Norway. Following the development of X-ray crystallography by WILLIAM and LAWRENCE BRAGG, he undertook an extensive X-ray study of the binary compounds of the elements. This led to his rationalization of crystal structures in terms of ionic radii and polarizabilities. His interests in crystallography and petrology came together in research on the distribution of the elements in the Earth. His massive book *Geochemistry* was published posthumously in 1954.

Goldsmith, Oliver 1730–74
Irish playwright, novelist and poet
Born in Pallasmore, County Longford, he was educated at local schools and Trinity College, Dublin. In 1752 he went to Edinburgh to study medicine, but was more noted for his social gifts than his professional skills. He drifted to Leyden, set out to make the Grand Tour on foot, but returned penniless in 1756. He practised as a poor physician in Southwark, and was proof-reader to SAMUEL RICHARDSON, before publishing a translation of the memoirs of Jean Marteilhe, a persecuted French Protestant, in 1758. An *Enquiry into the Present State of Polite Learning in Europe* (1759) attracted some notice. Goldsmith started and edited a weekly, *The Bee* (1759), and wrote essays for TOBIAS SMOLLETT's *British Magazine*. For JOHN NEWBERY's *Public Ledger* he wrote the *Chinese Letters* (1760–71, republished as

The Citizen of the World). *The Vicar of Wakefield* (1766) secured his reputation as a novelist, *The Deserted Village* (1770) as a poet, and three years later he also achieved high regard as a playwright with *She Stoops to Conquer*. 🕮 Austin Dobson, *Life of Oliver Goldsmith* (2003)

Goldstein, Eugen 1850–1930
German physicist
Born in Gleiwitz, Upper Silesia (now Gliwice, Poland), he was educated at Ratobor Gymnasium and the University of Breslau before going to the University of Berlin (1878), where he worked with HERMANN VON HELMHOLTZ. He then spent his career as a physicist at the Potsdam Observatory. In 1876 he showed that cathode rays could cast sharp shadows and were emitted perpendicular to the cathode surface. This led to the production of concave cathodes, which were useful in many experiments. In 1886 he published his discovery of 'Kanalstrahlen', literally canal rays, known as positive rays in English, which emerged from channels or holes in anodes, and were eventually shown to be positively charged particles of atomic mass. This apparatus was developed into the mass spectrograph by J J THOMSON, FRANCIS ASTON and others.

Goldstein, Joseph Leonard 1940–
US molecular geneticist and Nobel Prize winner
Born in Sumter, South Carolina, he graduated with a medical degree from the University of Texas, Dallas, in 1966, where he later became head of the division of medical genetics (1972), professor of internal medicine (from 1976), professor of medical genetics (from 1977) and regental professor of the university (from 1985). With MICHAEL BROWN, he has worked on cholesterol metabolism in the human body, particularly studying the low-density lipoproteins (LDLs) which carry cholesterol in the blood. In some diseases the liver cells cannot remove cholesterol from the bloodstream because they are missing a receptor site for the LDLs, but in 1984 Goldstein and Brown described several mutations in the LDL receptor gene, opening up possibilities for new drugs to combat these diseases. For this work, they were jointly awarded the 1985 Nobel Prize in physiology or medicine. Goldstein and Brown's subsequent discovery of SREBP, the sterol regulatory element binding protein, which controls LDL reception, was rewarded with the 2003 Albany Medical Prize in Biomedical Sciences. Goldstein was also awarded the 1988 US National Medal of Science.

Goldstein, Vida 1869–1949
Australian feminist
Born in Portland, Victoria, and educated in Melbourne at the Presbyterian Ladies' College and at Melbourne University, she ran a school with her sister and became involved with the campaign for women's suffrage. She was a member of the first Australian suffrage group, the Woman's Suffrage Society, and later formed the Woman's Federal Political Association. She also founded the feminist publication *Australian Woman's Sphere* and stood as an independent candidate in Victoria five times (1903–17). Full suffrage and eligibility to stand in national elections was granted to women in Australia in 1902, just after federation, and she became the first woman in the British Empire to stand in national parliamentary elections.

Goldsworthy, Andy (Andrew Charles) 1956–
English sculptor
Born in Cheshire, he studied at Bradford and Lancaster Art Colleges. A foremost exponent of land art, he has created outdoor works in Britain and elsewhere featuring natural materials such as snow, ice, stone, wood and earth. His ephemeral works are recorded in photographs and then published in books, the spirit of his creations being encapsulated in a 1989 title, *A Collaboration with Nature*. He has taught in Britain and the USA, becoming professor at Cornell University (2000–06). 🕮 William Malpas, *The Art of Andy Goldsworthy* (1998)

Goldwater, Barry M(orris) 1909–98
US Republican politician and author
Born in Phoenix, Arizona, the son of a Jewish father of Polish descent, he was educated at Arizona University and served as a ferry pilot during World War II. He worked at his family's department store, becoming president (1937–53) and marketing a popular brand of men's undergarments, before representing his home state in the US Senate (1952–64). He was a conservative Republican, supporting JOSEPH MCCARTHY and opposing President DWIGHT D EISENHOWER and state intervention in economic affairs. He contested the 1964 presidential election for the Republicans, but was heavily defeated by LYNDON B JOHNSON. Returning to the Senate in 1969, he chaired the Armed Services Committee, before retiring in 1987. He was one of the architects of the conservative revival within the Republican Party and many of his ideas were later adopted by the Republican 'New Right' and implemented by the REAGAN administration. He wrote *The Conscience of a Conservative* (1960) and published his autobiography, *Goldwater*, in 1988.

Goldwyn, Samuel, *originally* **Samuel Goldfish** 1882–1974
US film producer
Born of Jewish parents in Warsaw, Poland, he was orphaned and, at the age of eleven, ran away to relatives in England, and again, at 13, to the USA. After working as a glove-salesman, he founded a film company with a depressed playwright, CECIL B DE MILLE, as director and produced *The Squaw Man* (1914). In 1917 he founded the Goldwyn Pictures Corporation, in 1919 the Eminent Authors Pictures, and finally in 1925 the Metro-Goldwyn-Mayer Company, allying himself with United Artists from 1926. His 'film-of-the-book' policy included such films as *Bulldog Drummond* (1929), *All Quiet on the Western Front* (1930), *Stella Dallas* (1937) and *Wuthering Heights* (1939). He also produced *The Little Foxes* (1941), *The Best Years of Our Lives* (1946, Academy Award), *The Secret Life of Walter Mitty* (1947), *Guys and Dolls* (1955) and *Porgy and Bess* (1959). Examples of well-known 'Goldwynisms' are 'include me out' and 'a verbal contract isn't worth the paper it's written on'. 🕮 A S Berg, *Goldwyn: A Biography* (1989)

Golgi, Camillo 1843–1926
Italian cytologist and Nobel Prize winner
He was born in Corteno, Lombardy. He began his career as a physician in Abbiategrasso, where he made the invaluable discovery of how to stain nerve tissue using silver nitrate (1873). As professor of pathology at Pavia (1876–1918) he discovered the 'Golgi bodies' in animal cells, which, through their affinity for metallic salts, are readily visible under the microscope, and opened up a new field of research into the central nervous system, sense organs, muscles and glands. He shared with SANTIAGO RAMÓN Y CAJAL the 1906 Nobel Prize in physiology or medicine.

Goliath 11th century BC
Biblical character
Described (in 1 Samuel 17) as a giant from Gath in the Philistine army, he entered into single combat with the young DAVID and was slain by a stone from David's sling, resulting in Israel's victory. Some confusion exists over a similar name in 2 Samuel 21.19 (also 1 Chronicles 20.5).

Golitsyn, Dimitri Augustine *See* GALLITZIN, DIMITRI AUGUSTINE

Gollancz, Sir Hermann 1852–1930
British rabbi and scholar
He was born in Bremen, Germany, and was educated at University College London, before preaching at synagogues around England from 1876. An authority on Hebrew language and literature, he became professor at University College London (1902–24), and was also a preacher at the Bayswater synagogue (1892–1923). He was the first British rabbi to be knighted (1923), sat on several government commissions and did much philanthropic work. He was the brother of Sir ISRAEL GOLLANCZ.

Gollancz, Sir Israel 1864–1930
English scholar
Born in London, he was appointed professor of English literature at University College London in 1906. An authority on early English texts, he was a founder and first secretary of the British Academy. He was the brother of Sir HERMANN GOLLANCZ.

Gollancz, Sir Victor 1893–1967
English publisher, author and philanthropist
He was born in London into a family of Jewish businessmen and was educated at St Paul's School and New College, Oxford. As a young man he was in revolt against orthodox Judaism, which he eventually rejected. He became a teacher, went into publishing in 1920, and founded his own firm in 1928, becoming known for his innumerable campaigns and pressure-group activities. In 1919 he was secretary of the Radical Research Group, in 1936 he founded the Left Book Club, which influenced the growth of the Labour Party, and during World War II he helped to get Jewish refugees out of Germany. After the War he worked hard to relieve starvation in Germany and tried to oppose the belief in German collective guilt for Nazi crimes. He founded the Jewish Society for Human Service. He also launched national campaigns for the abolition of capital punishment and for nuclear

disarmament. 🕮 Ruth Dudley Edwards, *Victor Gollancz: A Biography* (1987)

Golssenau, Arnold Friedrich von *See* RENN, LUDWIG

Goltzius, Hendri(c)k 1558–1617
Dutch engraver and painter
Born in Mülbracht (now Bracht am Niederrhein in Germany), near Venlo, he worked for most of his life in Haarlem, where he set up his own printing business and was the leader of a group of Mannerist artists. He made skilful reproductions of engravings by ALBRECHT DÜRER and LUCAS VAN LEYDEN before executing original work, which often made use of chiaroscuro woodcuts. He produced sets of prints on biblical and historical subjects, such as his *Roman Heroes* (1586). Also noted for his miniature portrait drawings, he was less successful as a painter.

Gomarus or **Gommer, Francis** 1563–1641
Dutch Calvinist theologian
He was born in Bruges, Belgium, and as professor of divinity at Leyden (1594) he became known for his hostility to his colleague JACOBUS ARMINIUS. At the Synod of Dort (1618) he secured the Arminians' expulsion from the Reformed Church. From then until his death he was a professor at Groningen.

Gomberg, Moses 1866–1947
US chemist
Born in Kirovograd, Russia, he fled with his family to Chicago in 1884. He went to the University of Michigan in 1886. He received his PhD there and joined the faculty in 1893, remaining there for the rest of his professional life. He studied in Munich and Heidelberg, where he was successful in preparing molecules which had proved difficult to assemble because they contained bulky groups. When he returned to Michigan Gomberg attempted the synthesis of the compound hexaphenylethane. His work alerted chemists to the possibility of long-lived radicals in solution and this is now accepted as an important type of reactive intermediate. He was elected to the US National Academy of Sciences and served as president of the American Chemical Society in 1931.

Gombrich, Sir Ernst Hans Josef 1909–2001
British art historian
Born in Vienna, he studied at the university there. He then emigrated to England, where he joined the staff of the Warburg Institute, London (1936), becoming its director and professor of history of the classical tradition (1959–76). During World War II he worked for the BBC Monitoring Service. His books include *The Story of Art* (1950), *Art and Illusion* (1960) – an influential study of the psychology of pictorial representation – and *The Sense of Order* (1979). He was knighted in 1972 and awarded the Order of Merit in 1988.

Gombrowicz, Witold 1904–69
Polish novelist
He was born in Maloszyce, studied law and economics in Warsaw and Paris, and spent most of his working life as a bank employee in Argentina, where he had gone on a visit on the eve of World War II. Beginning with the short stories in *Pamietnik z okresu dojrzewania* (1933, 'A Recollection of Adolescence'), Gombrowicz's work is much concerned with patterns of sexual and psychological dependency, and it is clear from his journal, published as *Dziennik, 1953–1966* (3 vols, 1957–66), that many of the complexes and inhibitions portrayed are his own. The slightly pathological tone of the early stories largely disappears in his best books, *Ferdydurke* (1937, Eng trans 1961) and *Pornografia* (1960, Eng trans *Pornography* 1966), which sustain a certain ironic distance from their vulnerable characters and claustrophobic situations. His collected works, *Dziela zebrane* (11 vols, 1969–77), began to appear in the year of his death. The strange *Opetani* (1973, Eng trans *Possessed, or The Secret of Myslotch*, 1980) was published posthumously. 🕮 E Thompson, *Gombrowicz* (1979)

Gomme, George Laurence 1853–1916
British folklorist
He was a founder member and subsequently president of the Folklore Society (1890–94). His first publication, *Primitive Folk Moots; or Open-Air Assemblies in Britain* (1880), revealed his approach to folklore, not as a relic of myth but as the vehicle of preserved 'remnants of archaic social existence'. Thus for him the proper field of folklore was untutored classes in a civilized society, not primitive societies themselves. A member of the same group as ANDREW LANG and Alfred Nutt, he was the most crusading in his desire to see folklore recognized as a scientific discipline. He expanded these issues in *Ethnology in Folklore* (1892) and *Folklore as an Historical Science* (1908). In 1890 he produced a *Handbook of Folklore*, the first fieldwork guide for amateur collectors.

Gommer, Francis *See* GOMARUS, FRANCIS

Gompers, Samuel 1850–1924
US labour leader
Born in London, England, he emigrated to the USA in 1863, where he followed his father's trade as a cigar maker, joining a union the following year. Self-educated, he studied and rejected Marxism and socialism, developing instead the US practice of nonpolitical trade unionism. He helped found (1886), and was long-time president of, the American Federation of Labor (AFL), and with the AFL's triumph as the main force in organized labour he became a major public figure. 🕮 Harold Livesay, *Samuel Gompers and Organized Labor in America* (1978)

Gomułka, Władysław 1905–82
Polish Communist leader
Born in Krosno, south-east Poland, he became a local trade-union leader. He organized underground resistance to the Germans during World War II and took an active part in the defence of Warsaw. In 1943 he became secretary of the outlawed underground Communist Party. He became vice-president of the first postwar Polish government, but from 1948 was gradually relieved of all his posts for 'non-appreciation of the decisive role of the Soviet Union' and was arrested in 1951. But for STALIN's death in 1953 he would have been executed. In 1954 he was released from solitary confinement. He was rehabilitated in August 1956 and returned to power as party first secretary in October, thus preparing the way for a new course for Polish society. He was re-elected to this post in 1959. Braving the risk of a 'Stalinist' military putsch, Gomułka sought to put Poland on the road to a measure of freedom and independence, allowing freer discussion within a Marxist framework. He resigned office in 1971, following a political crisis. 🕮 Nicholas Bethell, *Gomułka: His Poland and His Communism* (1969)

Gonçalves, Nuno fl.1450–72
Portuguese painter
He is recorded, in 1463, as court painter to ALFONSO V. He was virtually forgotten until the discovery of his only extant work, an altarpiece for the convent of St Vincent (the patron saint of Portugal) in 1882. This work was exhibited in Paris in 1931 and established him as the most important Portuguese painter of the 15th century.

Gonçalves Dias, António 1823–64
Brazilian poet, dramatist and translator
Born in Maranhão, he went to Coimbra to study law, but became enamoured of poetry, in which he showed great technical skill. He was himself of Native American, African and European extraction, and his fervent patriotism and ability to identify with all three races made him the Brazilian national poet. He was one of the first poets whose so-called 'Indianism' was genuine rather than merely exotic and decorative. He drowned within sight of his native town.

Goncharov, Ivan Aleksandrovich 1812–91
Russian novelist
Born in Simbirsk, he graduated from Moscow University (1834), and led an uneventful life in the civil service, punctuated by a trip to Japan, which he described in *Freget Pallada* (1858, Eng trans *The Frigate Pallas: Notes on a Journey*, 1965). He wrote three novels, the most important being *Oblomov* (1859, Eng trans 1915), one of the greatest and most typical works in the Russian Realist style. Neither *Obyknovennaya istoriya* (1847, Eng trans *A Common Story*, 1894) nor *Obryv* (1870, Eng trans *The Precipice*, 1916) attained the same heights. 🕮 V Sechkarov, *Ivan Goncharov: His Life and Works* (1974)

Goncharova, Natalia Sergeyevna 1881–1962
French painter and designer
Born in Ladyzhino, Tula province, Russia, she began as a science student but turned (c.1898) to sculpture, studying at the Moscow Academy of Art. She began painting in 1904 and, like MIKHAIL LARIONOV (with whom she lived and whom she eventually married on her 74th birthday) and KASIMIR MALEVICH, chose the flat colours and primitive forms of Russian folk art, combining these with the new influences of Cubism and Fauvism with an original flair. She moved to Geneva in 1915 with Larionov to design for SERGEI DIAGHILEV's ballets, and went to Paris in 1921. She took French nationality in 1938.

Goncourt, Edmond de 1822–96 and **Jules de** 1830–70, *known as* **the Goncourt Brothers**
French novelists
Born in Nancy and Paris respectively, they were primarily artists, but after collaborating in studies of history and art they turned to writing novels. Their subject was the manners of the 19th century and the enormous influence of environment and habit upon people. The first of their novels, *Les Hommes de lettres* (1860, 'The Men of Letters'; new edn as *Charles Demailly*, 1868), was followed by *Sœur Philomène* (1861, Eng trans *Sister Philomène*, 1890), *Renée Mauperin* (1864, Eng trans 1864 (US); 1887 (UK)), *Germinie Lacerteux* (1865, Eng trans 1887), *Manette Salomon* (1867) and *Madame Gervaisais* (1869), their greatest novel. After Jules's death, Edmond published the extraordinarily popular *La Fille Élisa* (1878, Eng trans *Elisa*, 1959), *La Faustin* (1882, Eng trans 1902) and *Chérie* (1885, 'Darling'). The interesting *Idées et Sensations* (1866, 'Ideas and Sensations') had already revealed their morbid acuteness of sensation, and *La Maison d'un artiste* (1881, 'An Artist's House') had shown their love for bric-à-brac. In the *Lettres de Jules de Goncourt* (1885) and in the *Journal des Goncourt* (9 vols, 1888–96) they revealed their methods and their conception of fiction. Various translations of these have been made, including *The Journal of the De Goncourts* (1908), *Paris under Siege, 1870–1871* (1969) and *Edmond and Jules de Goncourt, with Letters and Leaves from Their Journals* (1894). Edmond, in his will, founded the Académie Goncourt to foster fiction with the annual Prix Goncourt. 🕮 Robert Baldick (ed), *Pages from the Goncourt Journals* (2006)

Gondi, Jean François Paul de *See* RETZ, JEAN FRANÇOIS PAUL DE GONDI, CARDINAL DE

Góngora (y Argote), (Don) Luis de 1561–1627
Spanish lyric poet
Born in Córdoba, he studied law, but in 1606 took orders and became a prebendary of Córdoba and eventually chaplain to PHILIP III. His earlier writings were sonnets, romances and satirical verses, but he is best known for his longer poems, such as *Soledades* (1613, Eng trans *The Solitudes*, 1931), *Polifemo* (1613, Eng trans *Polyphemus and Galatea*, 1977) and *Piramo y Tisbe* ('Pyramus and Thisbe'), written in an affected style which came to be called 'gongorism' and which his followers designated the *estilo culto*. 🕮 D W and V R Foster, *Góngora* (1973)

Gonne, Maud, *married name* **MacBride** 1865–1953
Irish nationalist and actress
The daughter of an English colonel, she was an agitator for the cause of Irish independence and edited a nationalist newspaper, *L'Irlande libre*, in Paris. She met W B YEATS in the early 1890s and, though Yeats wished to marry her, she ultimately rejected him and married Major John MacBride, who fought against the British in the Boer War and was executed as a rebel in 1916. She was one of the founders of Sinn Féin. Her son SEÁN MACBRIDE was foreign minister of the Irish Republic from 1948 to 1951.

Gonzaga, Luigi, *known as* **St Aloysius** 1568–91
Italian Jesuit
Born near Brescia, the eldest son of the Marquis of Castiglione, he renounced his title to become a missionary and entered the Society of Jesus in 1585. When Rome had an epidemic of the plague in 1591 he devoted himself to the care of the sick, but was himself infected and died. He was canonized in 1726, and in 1926 was declared the patron saint of Christian youth by Pope PIUS XI. His feast day is 21 June.

Gonzaga, Tomás António, *pseudonym* **Dirceu** 1744–1809
Portuguese poet
Born in Oporto, of an English mother and Brazilian father, he studied law, and was sent to Vila Rica in Brazil in 1782, where he met the 'Marilia' of his verses. He was exiled to Mozambique for his revolutionary activities, and there he married a rich mulatta and became a leading citizen. His *Marilia de Dirceu* (1792) contains impressive verses in the Arcadian tradition, considered second only to those of MANOEL BOCAGE and deemed masterpieces of the Mineiro school.

Gonzalès, Eva 1849–83
French painter
Born in Paris, she was noted for her great beauty at an early age. She studied with Charles Chaplin, an academic who was also the teacher of MARY CASSATT. When she was 20, MANET requested her family's permission to paint her portrait, and she became both his model and his pupil. She was the only artist permitted by him to sign 'pupil of Manet' on Salon entries, and her first entry to the Salon in 1870, *L'Enfant de troupe* ('The Boy Soldier'), was purchased by the government. She married the engraver Henri Guérard in 1876 and bore her first child in 1883, dying of an embolism five days later, one day after Manet.

González (Márquez), Felipe 1942–
Spanish politician
Born in Seville, he studied law and practised as a lawyer, and in 1962 joined the Spanish Socialist Workers' Party (PSOE), at that time an illegal organization. The party regained legal status in 1977, three years after he became secretary-general. He persuaded the PSOE to adopt a more moderate, less overtly Marxist line, and in the general elections of 1982 they won a substantial overall majority to become the first left-wing administration since the Socialist-led coalition of 1936. González was made prime minister, remaining in power until 1996, when the conservative Popular Party, led by JOSÉ MARÍA AZNAR LÓPEZ, won the election. He resigned as head of the party that year.

González, Julio 1876–1942
Spanish sculptor
He was born in Barcelona, and studied there, then in 1900 went to Paris, where he joined the avant-garde circle around PICASSO. He began as a painter, but in 1927 turned to sculpture, mainly in wrought and welded iron. Like Picasso he was inspired initially by African masks, and worked in a Cubist style, but his work also had Surrealist features. His works include *Angel* (1933, Pompidou Centre, Paris) and *Maternity* (1934, Tate Modern, London), and he made a life-size figure of a peasant mother (1936–37), a symbol of popular resistance in the Spanish Civil War, for the Paris World's Fair.

Gonzalvo de Córdoba, Hernández, *known as* **the Great Captain** 1453–1515
Spanish soldier
Born in Montilla, near Córdoba, he served with distinction against the Moors of Granada and afterwards in Portugal. Sent to assist FERDINAND, THE CATHOLIC (Ferdinand III of Naples), in his Holy League against the French (1495), he conquered most of the kingdom of Naples and expelled the French. After the partition of Naples in 1500, he again set out for Italy, but first took Zante and Cephalonia from the Turks and restored them to the Venetians. He then landed in Sicily, occupied Naples and Calabria, and demanded that the French keep the treaty. When they refused he waged war against them. Ultimately Gonzalvo won a great battle (1503) at the Garigliano River, which he crossed five miles above Minturno at a spot where in 1943 the 56th British Division found a crossing. His victory secured Naples for Spain. Recalled in 1506, and neglected by the king, he withdrew to his estates in Granada.

Gooch, Sir Daniel 1816–89
English engineer
Born in Bedlington, Northumberland, he was early associated with GEORGE and ROBERT STEPHENSON in railway construction, became locomotive superintendent of the Great Western Railway (1837–64), and then distinguished himself in submarine telegraphy by laying the first Atlantic cable (1865–66). His three brothers, Thomas Longridge (1808–82), John Veret (1812–1900) and William Frederick (b.1825), were also civil or locomotive engineers.

Gooch, Graham 1953–
English cricketer
Born in Leytonstone, London, he made his debut for Essex in 1973, and was captain of the club (apart from 1988) from 1986 to 1994. First capped for England in 1975, he went on to play in over 100 Test matches, and he recorded his highest score of 333 runs against India at Lord's in 1990. In July 1993 he resigned as captain of England after their eighth defeat in nine Test matches. When he retired from English Test cricket in 1995 he had made a career total of 8,900 runs. Since retiring from playing, he has worked as a coach with Essex and as a pundit for BBC Sport. He has published two volumes of autobiography, *Testing Times* (1991) and *Gooch: My Autobiography* (1995, co-written with Frank Keating).

Goodall, Dame (Valerie) Jane, *née* **Morris-Goodall** 1934–
English primatologist and conservationist
Born in London, she worked in Kenya with the anthropologist LOUIS LEAKEY, obtained her PhD from Cambridge in 1965, and subsequently set up the Gombe Stream Research Centre in Tanzania. She has been a visiting professor at the department of psychiatry and program of human biology at Stanford University (1971–75) and visiting professor of zoology at Dar es

Salaam (1973–). Since 1967 she has been scientific director of the Gombe Wildlife Research Institute. She has carried out a study of the behaviour and ecology of chimpanzees which has transformed the understanding of primate behaviour by demonstrating its complexity. She discovered that chimpanzees modify a variety of natural objects to use as tools and weapons, and showed that they hunt animals for meat. She is active in chimpanzee conservation in Africa, and her books include *In the Shadow of Man* (1971), *The Chimpanzees of Gombe: Patterns of Behavior* (1986) and *The Chimpanzee: The Living Link between 'Man' and 'Beast'* (1992). She has received many awards, including the Albert Schweitzer award (1987), the Encyclopaedia Britannica award (1989) and the Kyoto prize for science (1990). In 2003 she was created DBE. 🕮 Dale Peterson, *Jane Goodall: The Woman Who Redefined Man* (2006)

Goode, George Brown 1851–96
US ichthyologist
Born in New Albany, Indiana, he was on the staff of the Smithsonian Institute in Washington from 1827, was US fish commissioner (1887–88) and author of *American Fishes* (1888) and *Oceanic Ichthyology* (1895).

Goodhart, Arthur Lehman 1891–1978
US jurist
Born in New York City, he was educated at the Hotchkiss School and Yale. He lived most of his life in England, becoming professor of jurisprudence at Oxford and master of University College there (1951–63). His major scholarly work was his editorship of the *Law Quarterly Review* (1926–75), to which he contributed many valuable articles and a series of case notes examining recent decisions analytically and critically, but constructively. He also published a few small books on legal theory.

Goodman, Benny (Benjamin David) 1909–86
US clarinettist and bandleader
Born in Chicago to a poor immigrant family, he was a musical prodigy who was working in dance bands by the age of 13, and joined the Ben Pollack Orchestra at 15. He formed his own orchestra in New York in 1934 and, thanks to media exposure, became one of the best-known leaders of the era with the sobriquet 'King of Swing'. Hiring top black musicians such as pianist TEDDY WILSON and vibraphone-player LIONEL HAMPTON, Goodman successfully defied racial taboos of the time. He led a succession of large and small bands for three decades, occasionally performing as a classical player, and was noted for his technical facility and clean tone. 🕮 James L Collier, *Benny Goodman and the Swing Era* (1989)

Goodman, Isador 1909–82
Australian pianist and composer
Born in Cape Town, South Africa, he studied at the Royal College of Music, London, and appeared in concerts in England and Europe before emigrating in 1930 to Australia, where he taught at the New South Wales Conservatorium. For the next 50 years he performed in recital and as a soloist with leading orchestras, in concert and for television and radio. In 1944 he wrote his *New Guinean Fantasy* on that island at the height of the battle there. He was a renowned exponent of the Romantic repertoire, and especially of RACHMANINOV and LISZT. He played Liszt's first piano concerto in London at the age of 14 with Sir MALCOLM SARGENT and made his Australian debut with the same work in 1930.

Goodrich, Samuel Griswold, *pseudonym* **Peter Parley** 1793–1860
US publisher
Born in Ridgefield, Connecticut, he was self-educated. In Boston he edited *The Token* (1828–42), to which he contributed moralistic poems, tales and essays for children and in which the best of NATHANIEL HAWTHORNE's 'Twice-told Tales' appeared. He published some 200 volumes, mostly for the young as 'Peter Parley' books, starting with *The Tales of Peter Parley about America* (1827).

Goodricke, John 1764–86
English astronomer
Born in Groningen, the Netherlands, he was unable to hear or speak from an early age. He was the first, in 1782, to recognize that the star Algol (Beta Persei) is an eclipsing binary and that its periodic diminutions in brightness are due to one of the binary stars passing in front of the other. Two years later he discovered the regular variability of the stars Delta Cephei and Beta Lyrae. He was awarded the Copley Medal of the Royal Society in 1783.

Goodsir, John 1814–67
Scottish anatomist
Born in Anstruther, Fife, he attended the University of St Andrews and then Edinburgh University. Specializing in surgery, he joined his father's practice and published early in dentistry. He developed a passionate interest in marine biology, and was appointed in 1840 conservator in comparative anatomy at the Edinburgh University Museum, in 1846 becoming professor of anatomy at the university. His researches attempted to apply the mathematics of form to problems of living structures, in particular to cell biology. He also cultivated the theory of the triangle as the basic natural living form.

Goodyear, Charles 1800–60
US inventor
He was born in New Haven, Connecticut. Having failed as an iron manufacturer, he began research into the properties of rubber in 1834. Amid poverty and ridicule he pursued the experiments which culminated, in 1844, in the invention of vulcanized rubber, which led to the development of the rubber-manufacturing industry and the production of the well-known tyres named after him.

Googe, Barnabe 1540–94
English poet
Born in Alvingham, Lincolnshire, he studied both at Cambridge and Oxford, travelled on the Continent, and became one of the gentlemen-pensioners of ELIZABETH I. His best works are a series of eight *Eclogues, Epytaphes and Sonnets* (1563), which are one of the earliest examples of the pastoral form in English, and his *Cupido Conquered*.

Goolagong, Evonne *See* CAWLEY, EVONNE

Goossens, Eugène 1845–1906
Belgian conductor
Born in Bruges, he studied at the Brussels Conservatory, and became the conductor of several opera companies in Belgium, France and Italy. He made his name, however, in Great Britain, in comic opera with the Carl Rosa Company (from 1873). He founded the Goossens Male Voice Choir in Liverpool in1894.

Goossens, Eugène 1867–1958
Belgian violinist and conductor
Born in Bordeaux, France, he studied at the Brussels Conservatory and at the Royal Academy of Music, London. From 1884 to 1886 he played with the Carl Rosa Company under his father, the Belgian conductor EUGÈNE GOOSSENS, and with the orchestra at Covent Garden, London (1893–94). He was principal conductor of the Carl Rosa Company from 1899 to 1915.

Goossens, Sir Eugène 1893–1962
English composer and conductor
Born in London, the son of the Belgian violinist and conductor EUGÈNE GOOSSENS, he studied in Bruges and London, and became associate conductor to Sir THOMAS BEECHAM (1916–20) in his opera seasons. In 1921 he gave a successful series of orchestral concerts, in which he brought out some of his own music. From 1923 to 1945 he worked in the USA, as conductor of the Rochester (New York) Philharmonic Orchestra and of the Cincinnati Symphony Orchestra. Conductor of the Sydney Symphony Orchestra and director of the New South Wales Conservatorium from 1947 to 1956, he became a major influence on Australian music. His own music includes the operas *Judith* (1929) and *Don Juan de Mañara* (1937), a large-scale oratorio, *The Apocalypse* (1950–54), and two symphonies.

Goossens, Léon 1897–1988
English oboist
Born in Liverpool, he studied at the Royal College of Music, London. After 1913, he held leading posts in most of the major London orchestras. He then retired from orchestral work to devote himself to solo playing and teaching. He was the brother of the composer and conductor Sir EUGÈNE GOOSSENS. 🕮 Carole Rosen, *The Goossens: A Musical Century* (1993)

Göransson, Göran Fredrik 1819–1900
Swedish industrialist and engineer
He made the Bessemer process of producing steel a practical possibility in 1858. He was one of the founders of the Sandviken Iron Works company in 1868 and under his leadership it achieved international repute. His son Henrik and grandson Fredrik succeeded him in turn as directors of the company.

Gorbachev, Mikhail Sergeyevich 1931–
Russian statesman and Nobel Prize winner

Mikhail Gorbachev was born in Privolnoye in the North Caucasus, the son of an agricultural mechanic. In 1950 he began to study law at Moscow University, where he met and married a philosophy student, Raisa Titorenko (see RAISA GORBACHEV), who was to play an important part in his later career. He joined the Communist Party (CPSU) in 1952 and worked actively for it in Stavropol, introducing reforms and becoming local party leader in 1970. Having impressed his influential fellow countryman YURI ANDROPOV, he was admitted to the CPSU secretariat as agriculture secretary in 1978. He was promoted to full membership of the politburo in 1980, and in 1983, following Andropov's election as party general-secretary, took broader charge of the Soviet economy.

During the CHERNENKO administration (1984–85) he established himself as the second-ranking figure in what was a 'dual key' administration, and was swiftly appointed party general-secretary after Chernenko's death. He soon made his presence felt as party leader, forcing the retirement of obstructive colleagues and bringing into the politburo and secretariat a new group of younger technocrats who were more supportive of his vision of reform. He also introduced a major campaign against alcoholism and corruption during 1985–86, and, after strongly criticizing the BREZHNEV era, unveiled, under the slogans *glasnost* ('openness') and *perestroika* ('restructuring'), a series of liberalizing economic, political and cultural reforms which had the aim of making the Soviet economy and society more efficient and open. A major setback occurred in April 1986 at Chernobyl in Ukraine, where a disastrous explosion in a nuclear reactor led to the immediate death of over 30 people, the hospitalization of at least 500, and radioactive fallout which caused disease and contamination in many parts of eastern and northern Europe. Nevertheless, the effectiveness of Gorbachev's reforms was evidenced by the apparent availability of information about the disaster.

In foreign policy, Gorbachev launched a new 'detente offensive', meeting US president RONALD REAGAN in several summits (1985–88) and signing an Intermediate Nuclear Forces (INF) abolition treaty in 1987. He sanctioned the USSR's military withdrawal from Afghanistan (1989) and its progressive disengagement from eastern Europe. He was elected head of state in 1988, and became an executive president with increased powers in 1990. Through seeking to transform the USSR into a new 'socialist pluralist' democracy, he encountered internal opposition on all sides from party conservatives, radicals, and nationalists – particularly in the Baltic republics, which sought and eventually achieved their independence. In particular, Gorbachev faced a continuing challenge in BORIS YELTSIN, who urged more radical reform and supported the breakaway republics. It was an embarrassment to Gorbachev when Yeltsin was elected to the Russian presidency in 1990, although he endeavoured to establish a working relationship with him.

In 1990 Gorbachev was awarded the Nobel Peace Prize in acknowledgement of his contribution to the improvement in relations between the USSR and the West. The following August he survived a coup staged by conservative elements, and Yeltsin again emerged as the principal focus of opposition to him. Later in the year, Gorbachev found himself with no choice but to resign when the Communist Party was abolished and the USSR disintegrated. He ran unsuccessfully for president in 1996. Although well regarded in the West, in Russia his legacy is tied to the collapse of the USSR and the ensuing economic dislocation.

📖 His works include *Perestroika: New Thinking for Our Country and the World* (1987), *The August Coup: The Truth and the Lessons* (1992) and *Memoirs* (1996). See also Robert G Kaiser, *Why Gorbachev Happened* (1991); Richard Sakwa, *Gorbachev and His Reforms* (1991); Zhores Medvedev, *Gorbachev* (1986).

> Commenting on her first meeting with Gorbachev in 1984, MARGARET THATCHER said: 'I like Mr Gorbachev. We can do business together'.
>
> In his speech proposing Gorbachev to the Supreme Soviet as party leader in 1985, ANDREI GROMYKO said: 'This man, Comrades, has a nice smile, but he has iron teeth'.

Gorbachev, Mikhail Sergeyevich *See panel above*

Gorbachev, Raisa Maksimovna, *née* **Titorenko** 1932–99
Russian educationalist
Born in the Altai region, she graduated from Moscow University and pursued a career in sociological research and lecturing. She worked as a sociologist at Stavropol Teacher Training Institute (1957–61) and was a lecturer at Moscow University (1977–85). She had gained standing in her own right before 1985, when, as the wife of MIKHAIL GORBACHEV, the then general-secretary of the Communist Party of the USSR, she accompanied him on special occasions and overseas tours. At the end of his presidency she continued as a member of the board of the Cultural Heritage Commission. 📖 *I Hope: Reflections and Reminiscences* (1991)

Gorbunovs, Anatolijs 1942–
Latvian politician
He was born in the Ludza district and educated at the Riga Polytechnic Institute and Moscow Academy of Social Sciences. He worked as a mechanic before serving in the Red Army (1962–65) and rising through the Latvian Communist Party to become chair of the Supreme Council of Latvia (1988–93). He followed Lithuania and Estonia in declaring (1990) his intention for Latvia to become independent of the USSR; this independence was recognized in 1991. He served as president from 1990 to 1993, and parliamentary speaker until 1995. Between 1995 and 2002 he served variously as minister of regional development, minister of transportation and deputy prime minister.

Gorchakov, Prince Aleksandr Mikhailovich 1798–1883
Russian politician
Born in St Petersburg, he was ambassador at Vienna (1854–56) and succeeded Count KARL NESSELRODE as foreign minister. As chancellor of the empire (1863) he was, until BISMARCK's rise, the most powerful minister in Europe. He secured Austrian neutrality in the Franco-German War of 1870, and in 1871 absolved Russia from the Treaty of Paris (1856). After the conclusion of the Russo-Turkish war, the repudiation of the Treaty of San Stefano and the signing of the Treaty of Berlin, his influence began to wane. He was the cousin of Prince MIKHAIL GORCHAKOV.

Gorchakov, Prince Mikhail Dmitriyevich 1795–1861
Russian soldier
He served against the French in the Napoleonic campaign of 1812–14 and in the Russo-Turkish war of 1828–29. He helped to suppress the Polish revolution of 1831 and the Hungarian insurrection in 1849. On the outbreak of the Crimean War (1853–56) he commanded in the Danubian Principalities and, now commander-in-chief in the Crimea (1855), was defeated on the Tchernaya, but defended Sebastopol. The cousin of Prince ALEKSANDR GORCHAKOV, he was military governor of Poland from 1856 to 1861.

Gordimer, Nadine 1923–
South African novelist and Nobel Prize winner
Born in Springs, Transvaal, she was educated at a convent school, and at the University of the Witwatersrand, Johannesburg. Her first book was a collection of short stories, *Face to Face* (1949), followed by another collection, *The Soft Voice of the Serpent* (1952). In 1953 she published her first novel, *The Lying Days*, in which a white girl triumphs over the provincial narrowness and racial bigotry of her parents, though she too has to come to terms with the limitations of her social background. This recurrent theme dominates Gordimer's early books, such as *Occasion for Loving* (1963) and *The Late Bourgeois World* (1966). Apartheid, and her characters' reaction to it, is ever-present in her fiction, most powerfully in *The Conservationist* (1974), joint winner of the Booker Prize. Other important titles are *A Guest of Honour* (1970), *Burger's Daughter* (1979), *July's People* (1981) and *A Sport of Nature* (1987). She was awarded the Nobel Prize in literature in 1991. Later publications include the novels *None to Accompany Me* (1994), *The House Gun* (1998), *The Pickup* (2001) and *Get a Life* (2005), and the volume of essays *Writing and Being* (1995). 📖 Dominic Head, *Nadine Gordimer* (1994)

Gordon, Adam Lindsay 1833–70
Australian poet
Born in Fayal in the Azores, where his mother's father had a plantation, he completed his education in England but vanished to Australia after a series of reckless adventures. He had a brief career in the South Australian Mounted Police, and established a livery stable in Victoria. His ballads, such as 'The Sick Stockrider', 'How We Beat the Favourite' and 'The Ride from the Wreck', reflect his interest in horses. Much of his best work is collected in *Sea Spray and Smoke Drift* (1867, reissued 1876 with a preface by MARCUS CLARKE) and in *Bush Ballads and Galloping Rhymes* (1870). His poem 'The Swimmer', with its undertones of suicide, was set as the last song in ELGAR's *Sea Pictures*. A succession of unfortunate incidents precipitated a mental breakdown and his suicide. He is the only Australian poet honoured in Poets' Corner in Westminster Abbey, London.

Gordon, Charles George, *known as* **Chinese Gordon** 1833–85
English general
Born in Woolwich, London, he joined the Royal Engineers in 1852, and in 1855–56 fought in the Crimean War. In 1860 he went to China, where he crushed the Taiping Rebellion. In 1877 he was appointed governor of the Sudan. He resigned in poor health in 1880, but returned in 1884 to relieve Egyptian garrisons which lay in rebel territory. He was besieged at Khartoum for ten months by the troops of the Mahdi (MUHAMMAD AHMED) and killed there two days before a relief force arrived. 🕮 Anthony Nutting, *Gordon of Khartoum: Martyr and Misfit* (1966)

Gordon, Cyrus Herzl 1908–2001
US Hebrew scholar
Born in Philadelphia, Pennsylvania, he graduated at the University of Pennsylvania and taught Hebrew there before becoming field archaeologist in Bible lands with the American Schools of Oriental Research (1931–35). Thereafter he taught at Johns Hopkins University, Princeton, Dropsie College, Brandeis University and New York University before retirement in 1989. His books include *The Living Past* (1941), *Adventures in the Near East* (1957) and various technical handbooks on Ugaritic.

Gordon, David 1936–
US dancer and choreographer
Born in Brooklyn, New York City, he studied painting before he began dancing with James Waring's company in New York (1958–62). He was a founding member (1962) of the seminal Judson Dance Theater and, in the following decade, the improvisational dance-theatre collective Grand Union. In 1974 he formed his own Pick-Up Company. He became known for his often humorous experimentation, and several of his works are in the repertories of major US and British classical and modern dance companies. He is married to the English-born ex-CUNNINGHAM dancer, Valda Setterfield.

Gordon, Dexter (Keith) 1923–90
US jazz saxophonist
Born in Los Angeles, he adapted his early love of the music of the swing era, and LESTER YOUNG in particular, to the emerging bebop style of the mid-1940s. He developed a bebop vocabulary on tenor saxophone, and was a notable exponent of the so-called 'chase', in which two tenor saxophonists 'duelled' for supremacy (1947's 'The Chase', with Wardell Gray, is a famous example). Problems with drugs dominated his life in the 1950s, but he moved to Europe and forged a new career in the 1960s, returning to the USA as a rediscovered star in 1977. He starred in BERTRAND TAVERNIER's film *Round Midnight* in 1986. 🕮 Stan Britt, *Long Tall Dexter* (1989)

Gordon, Douglas 1966–
Scottish installation and video artist
Born in Glasgow, he studied at the Glasgow School of Art and the Slade School of Art in London. Using film, photography, text and sound, his installations explore memory, recognition and the psychological relationship between viewer and viewed. Often he deconstructs and manipulates film images, as in his best-known piece, *24-Hour Psycho* (1993), which plays ALFRED HITCHCOCK's film in slow motion so that it lasts a whole day. In *30 Seconds Text* (1996), a light bulb illuminates for 30 seconds a text about a head responding for 30 seconds after being guillotined. He won the Turner Prize in 1996.🕮Katrina M Brown, *Douglas Gordon* (2004)

Gordon, George, 2nd Earl of Huntly d.c.1502
Scottish nobleman
He married Princess Annabella, daughter of JAMES VI AND II, in 1459. Their second son married the Countess of Sutherland and was progenitor of the earls of Sutherland. Their third son was progenitor of the turbulent Gordons of Gight, from whom BYRON's maternal ancestors were descended. He served as Lord High Chancellor of Scotland from 1498 to 1501.

Gordon, George, 1st Marquis of Huntly and **6th Earl** 1562–1636
Scottish nobleman
He was the head of the Roman Catholics in Scotland. He defeated a royal force under the 7th Earl of ARGYLL in 1594 at Glenlivet but, after submitting to the king, was pardoned and made marquis and joint Lieutenant of the North (1599).

Gordon, Lord George 1751–93
English anti-Catholic agitator
Born in London, he became an MP in 1774. With the aim of repealing the Catholic Relief Act of 1778, Lord George, as president of a Protestant association, led a mob of 50,000 to the House of Commons to present a petition for its repeal (1780). For five days serious rioting took place, during which many Catholic chapels and private houses, Newgate, and the house of the chief justice, Lord Mansfield, were destroyed. Five days later the troops were called out, and almost 300 of the rioters were killed, 21 being executed. Lord George was tried for high treason, but THOMAS ERSKINE's defence earned his acquittal. He subsequently converted to Judaism, and was known as Israel Abraham George Gordon. In 1787 he was convicted for a libel on MARIE ANTOINETTE, and taken to Newgate Prison, where he died.

Gordon, Hannah Campbell Grant 1941–
Scottish actress
Born in Edinburgh, she trained at the College of Music and Dramatic Art, Glasgow, before making her television debut in *Johnson over Jordan* (1965). This was followed by the situation comedies *My Wife Next Door* (1972) and *Joint Account* (1988–90), as well as such popular drama series as *Upstairs, Downstairs* (1976) and *Telford's Change* (1979). Rare film appearances include *Spring and Port Wine* (1969), *Alfie Darling* (1974) and *The Elephant Man* (1980). Her stage performances include *Can You Hear Me at the Back?* (1979), *The Jeweller's Shop* (1982), *The Country Girl* (1983) and *Shirley Valentine* (1989). In 2000, she starred in the final episode of the popular sitcom *One Foot in the Grave*.

Gordon, John Rutherford 1890–1974
Scottish journalist
Born and educated in Dundee, he left school at the age of 14 to join a local newspaper, and worked as a sub-editor in London. Appointed editor of the *Sunday Express* in 1928, he turned a failing title into one of the most profitable newspapers in the world, increasing its circulation from 450,000 to 3,200,000 by the end of his reign. He introduced the first crossword puzzle and the first astrology column in a British newspaper. When he retired as editor (1952), he began an acerbic weekly column for the paper, called 'Current Events', which he continued until his death.

Gordon, Noele 1922–85
English actress
Born in East Ham, London, she made her first stage appearance at the age of two in a concert staged by the Maud Wells Dancing Academy. After studying at RADA she worked in repertory and pantomime before such London successes as *Diamond Lil* (1948) and *Brigadoon* (1949–51). She assisted JOHN LOGIE BAIRD with his early experiments in colour television and first appeared on that medium in *Ah, Wilderness* (1938). She later studied television techniques in the USA, and returned to Great Britain as an adviser to ATV (Associated Television) and host of such series as *Lunch Box* (1955) and *Fancy That* (1956). She became a household name as the owner of the motel in the television soap opera *Crossroads* (1964–81). Unceremoniously dismissed from the series, she returned to the stage in barnstorming musicals like *Gypsy* (1981), *Call Me Madam* (1982–83) and *No, No, Nanette* (1983).

Gordy, Berry, Jnr 1929–
US record executive, producer and songwriter
He was born in Detroit, Michigan. He opened a jazz record shop in 1955, but its failure left him working in a car plant until Jackie Wilson had a hit with his song 'Reet Petite' in 1957. He became an independent producer in 1958, and launched Tamla Records the following year, the company which he built into Tamla Motown, one of the most famous labels in the history of US popular music. He oversaw the whole operation in the 1960s, when his artists, such as DIANA ROSS and The Supremes, STEVIE WONDER, The Four Tops, MARVIN GAYE and SMOKEY ROBINSON, ruled the charts. He became increasingly involved in the business side of

the company, including a move to California in the early 1970s and a venture into films, by which time its creative peak was already past. He sold the company to MCA (Music Corporation of America) in 1988. His autobiography, *To Be Loved*, was published in 1994.

Gore, Al(bert Arnold), Jnr 1948–
US Democratic politician
Born in Washington into a prominent political family, he was educated at Harvard and served as a US army reporter in Vietnam (1969–71). He then studied theology at Vanderbilt University and worked for the *Nashville Tennessean* newspaper and as a farmer before entering the House of Representatives, representing Tennessee, in 1977. He was elected to the Senate in 1984 and made an unsuccessful bid for the Democratic nomination for president in 1988. In 1992 he was chosen as BILL CLINTON's running mate and went on to serve as his vice-president (1992–2000), taking an active role in policy-making. In 2000, with Joseph Lieberman (1942–) as his running mate, he ran for president in what turned out to be the closest contest in over 100 years, losing to Republican GEORGE W BUSH by the narrowest of margins. Observers blamed Gore's defeat upon his association with the scandals that had blighted the Clinton presidency, and on his relatively weak performances in public debates with Bush. His publications include *Earth in the Balance* (1992), *Common Sense Government* (1995), *Let the Glory Out* (2000) and, perhaps most significantly, *An Inconvenient Truth* (2006). A documentary film adaptation of *An Inconvenient Truth* was released in 2006 to coincide with Gore's international lecture tour on the subject of global warming.🕮 David Maraniss and Ellen Nakashima, *The Prince of Tennessee* (2001)

Gore, Catherine Grace Frances, *née* **Moody** 1799–1861
English novelist
Born in East Retford, Nottinghamshire, she was a prolific and immensely popular writer of novels, mainly of fashionable life in the manner of the 'silver fork' school. They include *Mothers and Daughters* (1831), *Mrs Armytage* (1836) and *The Banker's Wife* (1843). She also wrote three plays and short stories.

Gore, Charles 1853–1932
English Anglican prelate and theologian
The nephew of the 4th Earl of Arran, he was educated at Harrow and Oxford. He became a Fellow of Trinity College, Oxford, in 1875 and first principal of Pusey House in 1884. His contribution to *Lux Mundi* (1889) abandoned the strict tractarian view of biblical inspiration, and his Bampton Lectures (1891) were equally controversial. He founded the Community of the Resurrection at Pusey House in 1892, and became successively Bishop of Worcester (1901), Birmingham (1904) and Oxford (1911–19).

Gore, Spencer Frederick 1878–1914
English painter
Born in Epsom, Surrey, he joined the New English Art Club in 1909. He was a founder member and first president of the Camden Town Group (1911), and became a member of the London Group in 1913. He met WALTER SICKERT in Dieppe, France, in 1904 and was inspired to paint theatre and music-hall subjects, using a quasi-Pointillist technique learned from LUCIEN PISSARRO. In 1912 he contributed to ROGER FRY's second Post-Impressionist exhibition.

Goren, Charles Henry 1901–91
US contract bridge expert and author
Born in Philadelphia, Pennsylvania, he practised law there until 1936, when he abandoned it to concentrate on bridge. He wrote numerous books, including *Winning Bridge Made Easy* (1936) and *Contract Bridge in a Nutshell* (1946). He also wrote on backgammon (*Goren's Modern Backgammon Complete*, 1974), and contributed to a daily newspaper column, syndicated in the USA.

Gorenko, Anna Andreyevna *See* AKHMATOVA, ANNA

Gorey, Edward St John 1925–2000
US writer and illustrator
He was born in Chicago, and after one term at art school and a spell in the US army, joined a publisher's art department. Although he worked as a Broadway set designer and illustrated books by other authors, he is best known for his own wry, surreal, macabre picture books. These are typically peopled with disturbing, strange creatures, as in *The Doubtful Guest* (1957), or show children and other unfortunates meeting unpleasant, undeserved deaths, as in *The Gashlycrumb Tinies* (1963). Many are set in a gloomy pastiche of late Victorian England. He insisted: 'I write about everyday life.'🕮*Ascending Peculiarity: Edward Gorey on Edward Gorey* (2001)

Gorgas, William Crawford 1854–1920
US military doctor
Born near Mobile, Alabama, he trained in medicine at Bellevue Hospital Medical College in New York City, and joined the US Army Medical Corps in 1880. Following the discovery of the role of the mosquito in the transmission of yellow fever, Gorgas directed the mosquito eradication programme in Havana and the Panama Canal Zone, the latter permitting the successful construction of the canal (1904–14). He was surgeon-general to the US army during World War I and established the systematic medical examination of recruits, which greatly improved the quality of medical care among troops.

Gorges, Sir Ferdinando c.1566–1647
English colonialist
Born in Ashton, Somerset, he founded two Plymouth companies (1606–19, 1620–35) for settling lands in New England. In 1639 he received a charter making him proprietor of Maine. His grandson sold his rights to Massachusetts in 1677.

Görgey, Artúr 1818–1916
Hungarian rebel soldier
He was born in Toporcz, North Hungary. During the revolt of 1848 he compelled Josip Jelačič (1801–59) and his 10,000 Croats to capitulate at Ozora. As Hungarian commander-in-chief, despite conflict with LAJOS KOSSUTH, he relieved Komorn by inflicting a series of severe defeats on the Austrians, practically driving them out of the country. In 1849 he was repeatedly defeated and in August surrendered to the Russians with his army of 24,000 men at Világos, near Arad. Görgey was imprisoned at Klagenfurt, but was eventually released and returned to Hungary in 1868.

Gorgias c.490–c.385 BC
Greek philosopher and rhetorician
Born in Leontini, Sicily, he was one of the sophists who were professional itinerant teachers of oratory and political skills. He went to Athens as ambassador in 427 BC and quickly became a celebrity for his public performances. His philosophy was an extreme form of scepticism or nihilism: that nothing exists, that if it did it would be unknowablé, that if it were knowable it would be incommunicable to others, and that we live in a world of opinion, manipulated by persuasion. He is memorably portrayed in PLATO's dialogue, the *Gorgias*, where he and SOCRATES debate the morality implicit in his teachings and activities.

Goria, Giovanni 1943–94
Italian politician
He was born in Asti, Piemonte region, where he became provincial secretary of the Christian Democratic Party (DC). Elected to the Chamber of Deputies in 1976, he held a number of ministerial posts in DC-led coalition governments before being made Treasury minister in 1982. In 1987, after a near constitutional crisis had been averted when the Socialists withdrew their support for the Christian Democrats, Goria managed to form another coalition, which he led until it collapsed in 1988. He resigned in 1993, caught up in a government corruption investigation, and was brought to trial in 1994. He was acquitted of one charge, with another pending at the time of his death.

Göring, Hermann Wilhelm *See* GOERING, HERMANN WILHELM

Goring, Marius 1912–98
English actor
Born in Newport, Isle of Wight, he was educated at universities in Frankfurt, Munich, Vienna and Paris, made his West End debut in *The Voysey Inheritance* (1934) and took the title role in *Hamlet* at the Old Vic (1935). After serving in intelligence during World War II, he continued his film career with pictures such as *The Magic Box* (1951), *The Adventures of Quentin Durward* (1955), *The Barefoot Contessa* (1955) and *I Was Monty's Double* (1958). On television, he played the title role in *The Adventures of the Scarlet Pimpernel* (1955–56) and police pathologist Dr John Hardy in *The Expert* (1968–76).

Goris, Jan-Albert *See* GIJSEN, MARNIX

Gorky, Arshile, *originally* **Vosdanig Manoog Adoian** 1905–48
US painter
Born in Khorkom Vari, in Turkish Armenia, he emigrated to the USA in 1920 and studied at the Rhode Island School of Design and in Boston before moving to New York City in 1925. His art combined ideas from the European Surrealists who had fled to

New York in the early 1940s with the biomorphic abstraction of such artists as JOÁN MIRÓ, and he played a key role in the emergence of the New York school of Action Painters in the 1940s.

Gorky, Maxim, *pseudonym of* **Aleksei Maksimovich Peshkov** 1868–1936
Russian novelist
Born in Nizhny Novgorod, he was a pedlar, scullery boy, gardener, dock hand, tramp and writer, leading a restless, nomadic life, which he described brilliantly in his autobiographical trilogy *Detstvo* (1913–14, Eng trans *My Childhood*, 1915), *Vlyudakh* (1915–16, Eng trans *In the World*, 1918) and *Moi universitety* (1922, Eng trans *My University Days*, 1923). He first achieved fame with his story *Chelkash* (1895), followed by others in a romantic vein, with vividly drawn characters, mostly tramps and down-and-outs. *Foma Gordeyev* (1899, Eng trans 1902) marks his transition from Romanticism to Realism. In 1902 he produced his best-known play, *Na dne* (Eng trans *A Night's Lodging*, 1905, better known as *The Lower Depths*, 1912). Involved in strikes and imprisoned in 1905, he lived abroad until 1914 and then engaged in revolutionary propaganda. From 1922 to 1928 he lived abroad again on account of his health, but then returned, a wholehearted supporter of the Soviet regime. He sponsored 'Social Realism' as the official school in Soviet literature and art. 🕮 Barry P Scherr, *Maxim Gorky* (1988); Tovah Yedlin, *Maxim Gorky: A Political Biography* (1999)

Gormley, Antony Mark David 1950–
English sculptor
Born in London, he read archaeology, anthropology and art history at Cambridge, before training at the Central School of Art and Design, Goldsmiths College and the Slade School of Art, London. In 1981 he began to make moulds from his own body in various poses, to express the space, or spirit, within and the body's receptiveness to life, for example *Untitled (for Francis)* (1985). After 1990 his bodies expanded into bulbous forms, and in 1993 his exhibition *Testing a World View* featured five identical figures, their bodies bent at right angles, 'testing' themselves against walls, floor and ceiling. His *Field for the British Isles* (1993) – a vast assembly of tiny terracotta figures staring back at the viewer – toured the country, and his popular *Angel of the North* (1997–98), a figure some 20 mètres high with a wingspan of 54 metres, was erected near Gateshead, north-east England. His exhibition *Domain Field* (2003, Baltic Centre, Gateshead) consisted of tree-like sculptures, made up of short metal bars, which evoked people's bodies. He won the Turner Prize in 1994, was awarded the OBE in 1998 and was made an RA in 2003. 🕮 John Hutchinson et al, *Antony Gormley* (2000)

Görres, Johann Joseph von 1776–1848
German writer
He was born in Coblenz, which in 1812 became the literary centre of the National movement. Denouncing political and religious absolutism with great vigour, he angered the Prussian government, and had to flee the country (1820). In 1827 he was made professor of literature at Munich, where he devoted himself to literature and controversial theology. His chief work was his *Christliche Mystik* (1842, 'Christian Mysticism'). 🕮 Jon Vanden Heuvel, *A German Life in the Age of Revolution: Joseph Gorres, 1776-1848* (2001)

Gorshkov, Sergei Georgiyevich 1910–88
Soviet admiral
He joined the navy in 1927, graduated from the Frunze Naval Academy in 1931, and served in the Black Sea and in the Far East. From 1940 to 1955 he served mostly in the Black Sea fleet, commanding the fleet by 1951. He was appointed commander-in-chief of the Soviet navy by NIKITA KHRUSHCHEV in 1956, with the brief to cut back expenditure. However, after the Cuban Missile Crisis (1962) and Khrushchev's ousting (1964), the new Soviet leader, LEONID BREZHNEV, pressed for naval expansion. Supporting this view, Gorshkov oversaw a massive naval build-up, creating a force capable of challenging the West by the 1970s. Although he was in command of the navy until his death, his influence declined rapidly after MIKHAIL GORBACHEV came to power (1985).

Gort, John Standish Surtees Prendergast Vereker, 6th Viscount 1886–1946
English field marshal
Educated at Harrow and the Royal Military College, Woolwich, he served with the Grenadier Guards in World War I and won the VC in 1918. He was appointed chief of the Imperial General Staff in 1938. In World War II he was commander-in-chief of the British forces overwhelmed in the initial German victories of 1940. Afterwards he was governor of Gibraltar (1941–42) and of Malta (1942–44), and was promoted to field marshal in 1943. He was High Commissioner for Palestine and Transjordan from 1944 to 1945.

Gorton, Sir John Grey 1911–2002
Australian politician
Educated at Geelong Grammar School and Brasenose College, Oxford, he joined the Royal Australian Air Force in 1940, serving in Europe, Malaya and Australia. He was discharged in 1944 after being seriously wounded. He was a Liberal senator for Victoria (1949–68) and a member of the House of Representatives (1968–75). He served in the governments of Sir ROBERT MENZIES and HAROLD HOLT and, when Holt died in 1967, succeeded him as prime minister. In 1971 he was defeated on a vote of confidence and resigned in favour of WILLIAM MCMAHON, under whom he served as defence minister until 1971. He retired from politics in 1975 after changing parties and standing unsuccessfully as an independent. He was appointed a Companion of the Order of Australia in 1988.

Gorton, Samuel 1592–1677
American colonist and religious leader
Born in Gorton, Lancashire, England, he emigrated in 1637 to Massachusetts Colony in New England, where he founded the sect of 'Gortonites'. Denying the doctrine of the Trinity and the existence of heaven and hell, he was tried for heresy (1637–38) and banished. Returning to London in 1644, he was given a letter of safe-conduct by John Rich, the 2nd Earl of WARWICK, to settle in Rhode Island (1648). He changed the name of the township Shawomet to Warwick, and lived there peacefully with a few faithful Gortonite adherents.

Gossaert, Jan *See* MABUSE, JAN

Gosse, Sir Edmund William 1849–1928
English poet and critic
Born in London, the son of PHILIP HENRY GOSSE, he was educated privately. He became assistant librarian in the British Museum (1867–75), then translator to the Board of Trade (1875–1904) and finally librarian to the House of Lords (1904–14). His reputation as a critic was damaged after attacks on his accuracy and scholarship by Churton Collins in 1885, an incident which troubled him throughout his life. He initially regarded himself as a poet, and published several works, including the volumes *On Viol and Flute* (1873) and *Collected Poems* (1911). His *Studies in the Literature of Northern Europe* (1879), and other critical works, first introduced IBSEN to English-speaking readers. He also wrote on WILLIAM CONGREVE (1888), JOHN DONNE (1899), JEREMY TAYLOR (1904), Sir THOMAS BROWNE (1905), ALGERNON CHARLES SWINBURNE (1917) and FRANÇOIS DE MALHERBE (1920), although his special field was *Seventeenth-Century Studies* (1897). His finest work is considered to be the autobiographical *Father and Son* (1907), in which he describes his puritanical father's domineering character and beliefs and his own escape into the literary world. 🕮 A Thwaite, *Edmund Gosse, a Literary Landscape* (1984)

Gosse, Philip Henry 1810–88
English naturalist
Born in Worcester, he went to North America in 1827 and became a professional naturalist in Jamaica, with a particular interest in coastal marine biology. His *Manual of Marine Zoology* (1855–56) and *History of British Sea-anemones and Corals* (1860), written on his return to England, greatly expanded interest in marine organisms. He published *Omphalos* (1857) in opposition to evolutionary theory. His best-known work was the *Romance of Natural History* (1860–62).

Gosse, (Laura) Sylvia 1881–1968
English artist and printmaker
Born in London, she was a daughter of the writer Sir EDMUND GOSSE. She studied at St John's Wood School of Art, then the Royal Academy Schools, London. In 1908 she met WALTER SICKERT, who encouraged her, and she became co-principal at his school of painting and etching at Rowland House. In 1913 she had the first of many solo shows and the following year became a founder member of the London Group. She was influenced by Sickert and SPENCER GORE, encompassing genre subjects and everyday interiors, often with a single figure, as well as urban, town and Continental scenes. Her work includes accomplished etchings and features in many public collections throughout the UK.

Gosse, William Christie 1842–81
Australian explorer
He was born in Hoddesden, Hertfordshire, England, but his family emigrated to Adelaide, South Australia (1850), where he

was educated privately and then joined the South Australian surveyor-general's department. In 1873 Gosse led an expedition from Alice Springs in the Northern Territory (at that time administered by South Australia), in search of an overland route to Perth on the west coast of the continent. Gosse reached the massive sandstone monolith which had been sighted by ERNEST GILES the previous year, and named it Ayers Rock after Sir HENRY AYERS. Although his group was forced to turn back, his maps proved invaluable to Sir JOHN FORREST's successful 1874 expedition from Perth.

Gotama *See* GAUTAMA

Gottfried von Strassburg fl.1200
German poet
He wrote the masterly German version of the legend of *Tristan and Isolde*, based on the Anglo-Norman poem by THOMAS. He is also noteworthy as an early exponent of literary criticism, having left appraisals of the work of poets of the period. 🕮 M S Bates, *Gottfried von Strassburg* (1971)

Gottlieb, Adolph 1903–74
US painter
Born in New York City, he attended the Art Students' League in New York, and from 1921 to 1923 studied in Paris. In 1935 he joined the New York avant-garde group The Ten, whose members included MARK ROTHKO. From 1941 he painted an unusual series of pictographs in which a grid system is drawn on to the canvas and a primitive symbol inserted in each space. A strong interest in African and Native American art informed these works. After 1950 his paintings became radically simplified, consisting of gestural marks of bright colour which evoke imaginary landscapes. He stands as one of the most original of the Abstract Expressionist school of painters.

Gottlieb, Robert Adams 1931–
US publisher and editor
Born in New York City, he was educated at Columbia University and at Cambridge. After serving as editor-in-chief at Simon & Schuster (1955–68) and at Alfred Knopf (1968–87), he became editor of *The New Yorker* (1987–92). He is famous for 'discovering' JOSEPH HELLER and publishing his debut novel, *Catch-22* (1961). He later became a dance and book critic. His publications include *George Balanchine – The Ballet Maker* (2004).

Gottschalk, Laura Riding *See* RIDING, LAURA

Gottschalk, Louis Moreau 1829–69
US pianist and composer
Born in New Orleans, he studied in Paris (1842–46), and impressed CHOPIN and BERLIOZ. After touring in France, Switzerland and Spain, he returned to the USA (1853) and enjoyed success with his piano and piano-orchestral compositions, many of which explore Creole, African and Spanish idioms.

Gottwald, Klement 1896–1953
Czechoslovak politician
Born in Dedice, Moravia, he fought with the Austro-Hungarian army in World War I. He then joined the Communist Party, whose secretary-general he became in 1927. He opposed the Munich Agreement of 1938 and later went to Moscow, where he was trained for eventual office. In 1945 he became vice-premier in the Czechoslovak provisional government. Prime minister in 1946, he carried out the Communist coup d'état which averted a defeat for his party at the polls in February 1948. In June he became president. Strong in his support of STALIN, whose line he followed closely, he established a complete dictatorship in Czechoslovakia. He died of an illness contracted while he was attending Stalin's funeral.

Götz or **Goetz von Berlichingen** 1480–1562
German soldier
He was born in Jaxthausen in Württemberg, and gained the nickname 'Götz mit der eisernen Hand' ('Götz with the iron hand') because of a steel replacement for his right hand, which he lost in the Siege of Landshut (1505). From 1497 he was involved in continual feuds, in which he displayed both lawless daring and chivalrous magnanimity. Twice he was placed under the ban of the empire. He fought for Duke Ulrich of Württemberg (1519) against the Swabian League, and after his heroic defence of Möckmühl was taken prisoner. In the Peasants' War of 1525 he led a section of the insurgents, was captured by the Swabian League, kept prisoner at Augsburg for two years, and sentenced to life imprisonment. He was only freed on the dissolution of the league in 1540. In 1542 he fought in Hungary against the Turks, and in 1544 in France. He wrote an autobiography, published in 1731, on which GOETHE based his drama *Götz von Berlichingen*.

Goudge, Elizabeth 1900–84
English novelist
Born in Wells, Somerset, she studied at Reading University and taught art and design. Her first major success was with the novel *Green Dolphin Country* (1944), set in 19th-century New Zealand and the Channel Islands, which was made into a film in 1947. Other important novels include *Gentian Hill* (1949) and *The Child from the Sea* (1970). *The Little White Horse* (1946), a book for children, won a Carnegie medal, and she wrote several books with a Christian theme, including biographies of JESUS CHRIST and St FRANCIS OF ASSISI. 🕮 *The Joy of the Snow* (1974)

Goudimel, Claude c.1514–1572
French composer
Born in Besançon, he composed masses, motets, songs and psalm tunes. He taught music in Rome, and died in Lyons as a Huguenot just after the St Bartholomew's Day Massacre.

Goudsmit, Samuel Abraham 1902–78
US physicist
Born in The Hague, the Netherlands, he studied in Amsterdam and Leyden and emigrated in 1927 to the USA, where he was professor at the University of Michigan (1932–46) and later worked at the Brookhaven National Laboratory, Long Island (1948–70). Aged 23, he and his fellow student GEORGE UHLENBECK proposed the idea that electrons in atoms can have intrinsic spin angular momentum. Initially physicists found it difficult to accept this rotational property of electrons, but P A M DIRAC's 1928 theory of relativistic quantum mechanics showed that spin is an intrinsic property of the electron. During World War II, Goudsmit headed the secret Alsos mission charged with following German progress in atomic bomb research (1944), which led to the award of the US Medal of Freedom, and to his book *Alsos* (1947).

Goudy, Frederic William 1865–1947
US printer and type designer
Born in Bloomington, Illinois, he worked in printing shops before founding his own small press in 1895. While operating this and two subsequent presses, he designed more than 90 typefaces still admired for their simplicity and beauty, including Goudy Old Style, Hadriano, and Garamond.

Gough, Sir Hubert de la Poer 1870–1963
Irish general and mutineer
He was born in Gurteen, County Waterford. Educated at Eton and Sandhurst, he served in the Boer War, and relieved Ladysmith against orders. He returned to Ireland where, in 1914, he and 57 other officers threatened to resign rather than take arms in Ulster to impose Home Rule against Sir EDWARD CARSON's Ulster Volunteers, and won the day. The episode convinced extreme Irish nationalist elements that reliance on government Home Rule promises was hopeless and only force would be respected. Gough was rapidly promoted in World War I, but his command of the 5th Army at the third Ypres campaign impaired his reputation. He was made a scapegoat for British military failure during the German advance of March 1918 and retired in 1922. He wrote a self-vindication in his *Fifth Army* (1931). His memoirs, *Soldiering On*, appeared in 1954.

Gough, Hugh Gough, 1st Viscount 1779–1869
Anglo-Irish soldier
Born in Woodstown, County Limerick, he served in the West Indies (1797–1800), through the Peninsular War, and in India, and in 1838 was made commander-in-chief of the forces sent against China during the First Opium War. After storming Canton, he compelled the Chinese to sign the Treaty of Nanking (1842), and in 1843 defeated the Marathas in India. In the Sikh War in 1845 he defeated the enemy in the battles of Mudki, Ferozeshah and Sobraon. In 1848 the Sikhs renewed the war, but Gough again defeated them at Ramnagar, Chillianwalla and Gujerat, victories which resulted in the annexation of the Punjab.

Goujon, Jean c.1510–c.1568
French sculptor
He was a Huguenot, but seems to have died before the St Bartholomew's Day Massacre (1572). From 1555 to 1562 he worked in the Louvre, Paris, and some of his finest works can be seen there, such as *Diana Reclining by a Stag* and the reliefs for the *Fountain of the Innocents* (1549). He also created the monument to the Duke of Brézé in Rouen Cathedral (1541–44).

Goulart, João (Belquior Marques) 1918–76
Brazilian politician
Born in Rio Grande do Sul, he became the wealthy landowning neighbour of GETULIO VARGAS. He was linked with the Brazilian Labour Party (PTB) in the late 1940s and, as Vargas's protégé,

became minister of labour in 1954. He became leader of the PTB in 1960 and, having been accused by the army of nurturing pro-Communist sympathies, was elected vice-president against military hostility. The army reluctantly agreed to allow him to become president of a parliamentary regime in 1961. A weak and vacillating leader (1963–64), he alienated moderate opinion by flirting with nationalist and left-wing groups. He was ejected by a coup (1964) engineered by the army and supported by powerful conservative politicians in the Brazilian Democratic Union (UDN).

Gould, Benjamin Apthorp 1824–96
US astronomer
Born in Boston and educated at Harvard and Göttingen, he founded the *Astronomical Journal* (1849–61), was director of the Dudley Observatory at Albany (1856–59) and in 1866 determined, by aid of the submarine cable, the difference in longitude between Europe and the USA. He helped to found and was director of the National Observatory at Córdoba, Argentina, from 1868. He published *Uranometria Argentina*, which complemented FRIEDRICH ARGELANDER's *Atlas* of the northern heavens.

Gould, Bryan Charles 1939–
British politician
Born in New Zealand, the son of a bank official, he won a university scholarship at the age of 15, entering Auckland University two years later. A Rhodes Scholarship took him to Balliol College, Oxford, and in 1964 he joined the British diplomatic service. He was, however, more interested in a political career and in 1968 left the civil service to teach at Worcester College, Oxford (1968–74). His own background and distaste for the British class system made the Labour Party his natural choice and, after experience in local politics, he entered the House of Commons as MP for Southampton Test (1974–79). He lost his seat in the 1979 general election but returned in 1983 to represent Dagenham, having spent the intervening four years as a television journalist. His rise in the Labour Party was rapid and he was elected to the shadow cabinet (1986), but resigned in 1992 over the party's policy on Europe. He stood unsuccessfully for both the party leadership and deputy leadership in 1992, and then resigned from British politics to return to New Zealand, where he was vice-chancellor of Waikato University from 1994 until 2004. He published his memoirs, *Goodbye to All That*, in 1995.

Gould, Chester 1900–85
US strip cartoonist
Born in Pawnee, Oklahoma, he won a cartoon contest in *American Boy* magazine (1916), and drew sports cartoons for *Daily Oklahoma* whilst at college. After a year at the Zuckerman Art Studio in Chicago (1921), he joined the art staff of the *Chicago American*, creating his first strip, *Fillum Fables* (1924), then moving to the *Chicago Tribune* to draw *Girl Friends* (1929). He submitted a new idea in continuity strips, *Plainclothes Tracy*, the first 'tough detective' in comics, to the *New York Daily News*, who rechristened it *Dick Tracy*. It kept Gould busy until his retirement in 1977, when his former assistant took it over.

Gould, Glenn 1932–82
Canadian pianist and composer
Born in Toronto, he started to play the piano at the age of three, and studied at the Royal Conservatory of Music there before making his debut, at 14, as a soloist with the Toronto Symphony Orchestra. He toured extensively in the USA and Europe and made many recordings, particularly of works by BACH and BEETHOVEN. His own work, *A String Quartet*, was premiered in 1956. In 1964 he retired from the concert platform, believing concerts were obsolescent, and devoted himself to recording and broadcasting. His writings were collected together as *The Glenn Gould Reader* (1987).

Gould, Jay (Jason) 1836–92
US financier
Born in Roxbury, New York, he made a survey of parts of the state, engaged in lumbering, and in 1857 became the principal shareholder in a Pennsylvania bank. He began to buy up railroad bonds, started as a broker in New York (1859), and manipulated shares to seize the presidency of the Erie Railway Company (1868–72). He tried to corner the gold market, causing the 'Black Friday' stock market crash of September 1869. He bought up huge areas of railroad companies.

Gould, John 1804–81
English ornithologist and publisher
Born in Lyme Regis, he became curator and preserver (taxidermist) to the new Zoological Society's museum in London in 1827. An accomplished artist, he travelled widely, drawing birds whose skins he collected for the museum. Working with the newly developed technique of lithography, he produced 18 monumental books of sumptuous bird illustrations, including *Birds of Europe* (5 vols, 1832–37), *Birds of Australia* (7 vols, 1840–48), *Birds of Asia* (1849–83) and *Birds of Great Britain* (5 vols, 1862–73). One of his assistant draughtsmen at the Zoological Society was EDWARD LEAR.

Gould, Morton 1913–96
US composer
He was born in New York City. His music is national in style and exploits the various aspects of popular music from both North and South America. He composed symphonies and a variety of works in a more popular style, including a *Tap-dance Concerto* (1952). He won a Pulitzer Prize for *Stringmusic* in 1995, written for and premiered by the National Symphony of Washington, DC.

Gould, Nat(haniel) 1857–1919
English writer
He was born in Manchester, and began as a journalist on provincial and London newspapers. He went to Australia in 1884 and became racing editor of the *Sydney Referee*, for which he was a successful tipster under the name 'Verax', and also published two serials, the second of which, 'With the Tide', was later published as *The Double Event* (1891). Two years later it was made into a highly successful melodrama, staged in Melbourne with 20 horses in the 'cast', and his subsequent books became popular both in Australia and Great Britain. He returned to England in 1895 and from that time wrote over 130 novels, mainly thrillers about racing or with other sporting plots. He wrote three volumes of autobiography, *On and Off the Turf in Australia* (1895), *Town and Bush* (1896) and *The Magic of Sport; Mainly Autobiographical* (1909).

Gould, Shane Elizabeth 1956–
Australian swimmer
She was born in Brisbane, Queensland, and between 1971 and 1972 set world records at every freestyle distance from 100 metres to 1,500 metres. Her time of 58.5 seconds for the 100-metres freestyle broke the record set by DAWN FRASER in 1964. Gould also became the first woman to win three individual swimming golds in world record times at the 1972 Olympics – in the 200-metres individual medley and 200-metres and 400-metres freestyle – and she also won a silver and a bronze. As well as breaking or equalling eleven world records throughout her short career, she won numerous Australian individual championships, all before retiring at the age of 17 to marry and become a social welfare worker.

Gould, Stephen Jay 1941–2002
US palaeontologist
Born in New York City and educated at Antioch College and the universities of Ohio and Columbia, he was professor of geology from 1973 and Alexander Agassiz Professor of Zoology from 1982 at Harvard. In an influential paper published in 1972 he, together with the palaeontologist Niles Eldgredge, posited the theory of 'punctuated equilibrium'. He also championed the idea of 'hierarchical evolution'. He was critical of the 'adaptationist programme', emphasizing that many characters of organisms are not 'adaptive' in the strict sense. He popularized his ideas in a monthly column in *Natural History* magazine, collected in such books as *Ever Since Darwin* (1977), *The Panda's Thumb* (1980), *Hens' Teeth and Horses' Toes* (1983), *The Flamingo's Smile* (1985), *Bully for Brontosaurus* (1991) and *Eight Little Piggies* (1993). His books won many awards, including the 1990 Science Book prize for *Wonderful Life* (1989), a reinterpretation of the Cambrian Burgess Shale fauna. Gould admitted to Marxist influence in his scientific work and was a forceful speaker against pseudo-scientific racism and biological determinism; *The Mismeasure of Man* (1981) is a critique of intelligence testing. He was also a witness in a courtroom trial about the teaching of evolution in US public schools. His final work, *The Structure of Evolutionary Theory*, was published shortly before his death.

Gouled Aptidon, Hassan 1916–2006
Djiboutian politician
Born in the city of Djibouti, he was a representative of French Somaliland in France while becoming increasingly active in the independence movement. He joined the African People's League for Independence (LPAI) in 1967 and when independence was achieved, in 1977, became the country's first president. Later the LPAI was amalgamated with other parties to become the People's Progress Party (RPP) and Djibouti's

sole political party. He pursued a largely successful policy of amicable neutralism in a war-torn region, and remained president until he stood down in 1999.

Gounod, Charles François 1818–93
French composer
Born in Paris, he studied at the Paris Conservatoire and in Rome. He became organist of the Church of the Missions Étrangères, Paris, where his earliest compositions, chiefly polyphonic in style, were performed. His major works include the comic opera *Le Médecin malgré lui* (1858, 'The Mock Doctor') and *Faust* (1859). He also published hymns, masses and anthems, and was popular as a songwriter. He fled to England during the Franco-Prussian War (1870). He was a member of the Institute (1866) and a Commander of the Legion of Honour (1877).

Gourd, Emilie 1879–1946
Swiss feminist and writer
She founded and edited the newspaper *Le mouvement féministe*. She campaigned on behalf of women's rights, and continually lobbied the Swiss authorities at both regional and national level on behalf of the cause of women's suffrage. She was president of the Swiss Women's Association (1914–28), and was also secretary of the International Alliance of Women. Her writings include a biography of the US suffragist SUSAN B ANTHONY.

Gourmont, Rémy de 1858–1915
French poet, novelist and critic
Born in Bazoches-en-Houlme, Normandy, he studied law at Caen University. He was dismissed from his post at the Bibliothèque Nationale, Paris, because of an allegedly pro-German article in *Mercure de France*, of which he was a co-founder. After that he lived the life of a recluse. His creative work – poetry and novels in the Symbolist vogue – is cerebral and stylistic, betraying a 'fin de siècle' obsession with words as sound more than as sense. However, his evaluative work, which includes *Le Livre des masques* (1896–98) and *Promenades philosophiques* (1905–09), is clear-sighted and individualistic, exhibiting scholarship and intellectual curiosity. His novels include *Sixtine* (1890, Eng trans *Very Woman*) and *Un Cœur virginal* (1907, Eng trans by ALDOUS HUXLEY, *A Virgin Heart*, 1921).

Gow, Ian 1937–90
English Conservative politician
Educated at Winchester School, he later studied law, and after army service as a commander of the 15th/17th Hussars (1956–62), he practised as a solicitor. He entered Parliament for the Conservatives in 1966, and served as parliamentary private secretary to MARGARET THATCHER after his party's 1979 election victory, then as minister of housing (1983–85) and Treasury minister, until resigning in 1986 in protest at the Anglo-Irish Agreement. His continuing fierce condemnation of IRA activities and of any relaxation of Great Britain's obligation to the province, together with his continuing closeness to Thatcher, who frequently sought his informal counsel, singled him out as a prime IRA target, and he was killed by a car bomb.

Gow, Niel 1727–1807
Scottish violinist and songwriter
Born in Inver, near Dunkeld, Perthshire, he was the son of a plaid weaver, and started playing the fiddle at the age of five. He was largely self-taught, but went on to become Scotland's most famous fiddler and songwriter, known as 'the father of strathspey and reel players'. Patronized by the dukes of Atholl, he was much in demand as a player at important balls and parties. His compositions include strathspeys, jigs, reels and laments. His open, honest character, unique style of playing, long career and fine compositions combined to make him a household name during his lifetime and a legend after it. His influence on Scottish music continued through the work of his sons Andrew, John and Nathaniel, all of whom were practising musicians.

Gowda, (Haradanahalli Dodde) Deve 1933–
Indian politician
Born in Haradanahalli, Karnataka, he trained as a civil engineer and was elected to the Karnataka state assembly in 1962, eventually becoming its chief minister. He emerged as an opponent of INDIRA GANDHI within the Congress Party, and was imprisoned for 18 months in 1975 for resisting Gandhi's state of emergency. Having helped reunite the Janata Dal Party in the 1980s, attracting the support of divergent castes and religious groups, he became prime minister of a United Front coalition government (1996–97), the first Indian government to be dominated by people with lower-caste backgrounds, but failed to push through a tax-cutting budget and resigned. He then returned to Karnataka, where he worked to achieve guaranteed local government representation for women and minority Muslims.

Gower, David Ivon 1957–
English cricketer
Born in Tunbridge Wells, Kent, he came to the fore quickly chiefly because of the elegance of his left-handed stroke play. A consistent rather than heavy scorer, he accumulated 8,231 runs in his Test cricket career, including 18 centuries. He was captain of England in the mid-1980s, though without particular success. He was recalled as captain in 1989, only to lose the captaincy and his place in the team after a crushing defeat in the Test series against Australia. He has become a cricket commentator on both radio and television, and regularly appeared on the comedy sports quiz *They Think It's All Over* (1995–2006). He published his autobiography in 1992.

Gower, John c.1325–1408
English medieval poet
Born in Kent, he spent most of his life in London and had contacts with the court in the service of RICHARD II and HENRY IV. A friend of CHAUCER, he wrote *Speculum Meditantis* ('The Mirror of Thought'), in French verse, which was discovered at Cambridge only in 1898, and 50 French ballads. Other works include the *Vox Clamantis* ('The Voice of One Crying Out'), elegiacs in Latin (1382–84) describing the rising under WAT TYLER, the long English poem *Confessio Amantis* ('A Lover's Confession', c.1383), consisting of over 100 stories taken from OVID's *Metamorphoses*, the *Gesta Romanorum* ('History of the Romans') and medieval histories of Troy. Gower was blind from about 1400. 🕮 J A Burrows, *Ricardian Poetry: Chaucer, Gower, Langland and the Gawain Poet* (1971)

Gowers, Sir Ernest Arthur 1880–1966
English civil servant
The son of the neurologist Sir William Richard Gowers (1845–1915), he was educated at Rugby and Clare College, Cambridge, and called to the Bar in 1906. After a distinguished career in the civil service he emerged as the champion of *Plain Words* (1948) and *ABC of Plain Words* (1951), designed to maintain standards of clear English, especially in official prose.

Gowing, Sir Lawrence Burnett 1918–91
English painter and writer on art
Born in Stoke Newington, London, he studied at the Euston Road School under WILLIAM COLDSTREAM, and his Impressionist style is often applied to portraits, such as *Mrs Roberts* (1944). One of his best-known pre-war paintings is *Mare Street, Hackney* (1937). He was professor of fine art at the University of Durham (1948–58), principal of the King Edward VII School of Art, Newcastle upon Tyne (1948–58), principal of Chelsea School of Art (1958–65), professor of fine art at Leeds (1967–75) and Slade Professor of Fine Art at University College London (1975–85). His studies of RENOIR (1947) and VERMEER (1952) initiated his reputation as an art historian. Among his other publications are works on JOHN CONSTABLE (1961), GOYA (1965) and MATISSE (1979).

Gowon, Yakubu 1934–
Nigerian soldier and politician
Born in Garam, Plateau state, he was raised a Christian in a Muslim area, and was educated at a missionary school. After military training in Ghana and at Sandhurst in the UK, he joined the Nigerian army in 1956, serving with the UN force in the Congo from 1960 to 1961. He became adjutant-general in 1963 and chief of staff in 1966. The ethnic conflicts in the country precipitated a coup in January 1966, led by Ibo officers, and Gowon headed a counter-coup in July of the same year. He then became head of the federal military government, and commander-in-chief. Unable to prevent a civil war, with US and Soviet aid he successfully retained Biafra (the eastern region) within a single Nigeria, while acceding to ethnic concerns by increasing the number of states. However, his delayed return to democracy encouraged another military coup. He was deposed in 1975 and went into voluntary exile in the UK, returning to Nigeria in 1983.

Goya y Lucientes, Francisco (José) de 1746–1828
Spanish artist
Born in Fuendetodos, near Saragossa, he returned to Spain in 1775 after travelling in Italy, to design for the Royal Tapestry Works. He worked quite conventionally at first, painting scenes of court pastorals strongly influenced by GIOVANNI TIEPOLO and the Neapolitans, but he soon began introducing scenes from everyday Spanish life, such as *Blind Guitarist* (1778), which

show his passion for reality. At the same time he studied VELÁZQUEZ in the Royal Collections, and this prompted him to begin painting the portraits for which he became famous. In 1786 he was appointed court painter to CHARLES IV (chief painter in 1799). The portraits, particularly those done of the Spanish royal family (eg *The Family of Charles IV*, 1800, Prado, Madrid) are painted in an uncompromising and unflattering style which makes one wonder how acceptable they were to their subjects. Other works include *Maja Nude* and *Maja Clothed* (c.1797–1800, Prado, Madrid). In a series of 82 satirical etchings called *Los Caprichos*, issued in 1799, Goya castigated the follies of the court. After the Napoleonic occupation he produced an equally sardonic series entitled *The Disasters of War*. His religious paintings, particularly the frescoes (1798) for the church of San Antonio de la Florida, Madrid, are extremely freely painted. After 1792 he became increasingly deaf and in later life retired to the outskirts of Madrid, where he painted some extraordinary decorations for his own house (*House of the Deaf Man*, now in the Prado, Madrid). In 1824, on the accession of FERDINAND VII, he went into voluntary exile in France, where he continued to work. His work has influenced virtually every major painter from EUGÈNE DELACROIX to PICASSO.

Goyen, Jan Josephszoon van 1596–1656
Dutch painter
Born in Leyden, he produced many sea and river pieces in soft browns and greys, and, unusually for his time, omitted small details and developed a broad atmospheric effect. JAN STEEN, who became his son-in-law, was one of his pupils. His *River Scene* (c.1645) is in the National Gallery, London.

Goytisolo, Juan 1931–
Spanish novelist and critic
Born in Barcelona, he was associated with progressive, anti-Franco writers in his early career, when he cofounded the group 'Turia' with Ana María Matute (1926–) and others. In 1957 he left Spain for Paris, where he worked for the publisher Gallimard. His early novels, such as *Juegos de manos* (1954, Eng trans *The Young Assassins*, 1959), show the influence of both his bisexuality and the Arabic elements in Spanish literature. He became a determined and influential Modernist and Postmodernist, and his best-known novels are *Reivindicación del conde Don Julián* (1970, Eng trans *Count Julian*, 1974) and *Juan sin tierra* (1976, Eng trans *John the Landless*, 1977), which are essentially a 'deconstruction' of Spain's official history (1939–64). His two volumes of autobiography, *Coto vedado* (1985, Eng trans *Forbidden Territory*, 1989) and *En los reinos de taifa* (1986, Eng trans *Realms of Strife*, 1990), recount his early life. Later works include *Las semanas del jardín* (1997, Eng trans *The Garden of Secrets*, 2000) and *Carajicomedia* (2000, Eng trans *A Cock-Eyed Comedy*, 2002), a satire on the Catholic Church. He has announced that *Telón de boca* (2002, Eng trans *The Blind Rider*, 2005) – essentially a meditation on the prospect of his own death – will be his last novel. 🕮 J Ortega, *Juan Goytisolo* (1972, in Spanish)

Gozzi, Count Carlo 1720–1806
Italian dramatist
He was born in Venice. His *Tartana* (1757), a satirical poem against CARLO GOLDONI, was followed by a very popular comedy, *Fiaba dell' amore delle tre Melarance* (1761, Eng trans *The Love of Three Oranges*, 1949). He also wrote several similar 'dramatic fairy tales', of which the best known, from SCHILLER's translation of it, is *Turandot* (Eng trans *Turandot, Princess of China*, 1913). 🕮 E Borghesani, *Carlo Gozzi e l'opera sua* (1904)

Gozzoli, Benozzo, *properly* **Benozzo di Lese** c.1420–97
Italian painter
Born in Florence, he was a pupil of FRA ANGELICO. In Florence (1456–64) he adorned the Palazzo Medici-Riccardi with scriptural subjects, including his famous *Journey of the Magi*, in which Florentine councillors appear accompanied by members of the MEDICI family. He painted similar frescoes at San Gimignano (1464–67) and in the Campo Santo at Pisa (1468–84).

Graaf, Regnier de 1641–73
Dutch physician and anatomist
Born in Schoonhoven, he studied medicine at Utrecht and Leyden, where he was a student of FRANCISCUS SYLVIUS and a contemporary of JAN SWAMMERDAM (with whom he was later involved in violent priority disputes), and then practised at Delft. In 1672, on the basis of human and animal dissection, he discovered the 'Graafian vesicles' of the female gonad, coining the term 'ovary' for the organ. Not noticing the rupture of the ovarian follicles, Graaf was not able to develop a satisfactory theory for explaining the role of the ovary, and the mammalian egg was not discovered until the work of KARL ERNST VON BAER in 1827. Graaf is rightly credited with having been one of the founders of experimental physiology.

Graaff, Robert J(emison) Van de *See* VAN DE GRAAFF, ROBERT J(EMISON)

Grabbe, Christian Dietrich 1801–36
German playwright
He was born in Detmold, and died at the age of 35 from tuberculosis and alcoholism. Together with his contemporary, GEORG BÜCHNER, he was associated with the 'Young Germany' movement. The first of his plays to be staged was *Don Juan und Faust* (1822), in which he attempted to emulate GOETHE. *Kaiser Friedrich Barbarossa* (1829) is a similarly ambitious tragedy. *Napoleon* (1831) is less cohesive, but notable as the first German play in which the crowd is the main character. His recklessly satirical *Scherz, Satire, Ironie und tiefere Bedeutung* ('Joke, Satire, Irony and Deeper Significance'), written in 1822 but not performed for 70 years, is now considered to anticipate the Theatre of the Absurd. 🕮 A Bergmann, *Christian Dietrich Grabbe* (1954, in German)

Grable, Betty (Elizabeth Ruth) 1916–73
US actress
Born in St Louis, Missouri, she lived in Los Angeles from 1928 and studied dancing, subsequently making her film debut as a chorus girl in *Let's Go Places* (1930). She appeared in numerous small roles throughout the next decade but began to build a following at Twentieth Century Fox, appearing in such popular films as *Down Argentine Way* (1940) and *Moon Over Miami* (1941). Her girl-next-door good looks and shapely legs made her a favourite pin-up girl of wartime troops. Her most successful films, usually musicals, include *The Dolly Sisters* (1945), *Mother Wore Tights* (1947) and *How to Marry a Millionaire* (1953). Her last film appearance was in *How to Be Very, Very Popular* (1955) but she continued to work in cabaret and on stage in such productions as *Hello, Dolly!* (1965–67) and *Belle Starr* (1969).

Gracchus, Gaius Sempronius c.159–121 BC
Roman politician
After the murder of his brother TIBERIUS SEMPRONIUS GRACCHUS he continued trying to solve major social and economic problems – the growing landlessness of the Roman peasantry and the consequent decline in army recruitment – by enacting reforms. He was tribune of the plebs in 123 and 122 BC, and when he failed to achieve a third term he led a demonstration that turned into a riot. Many of his followers were killed and he committed suicide. The legislation and reforms enacted by Gaius and his brother were influential in the last century of the Republic.

Gracchus, Tiberius Sempronius 168–133 BC
Roman statesman
In 137 BC he was quaestor in Spain, where his family's popularity enabled him to gain better terms from the Numantines for 20,000 conquered Roman soldiers. He was concerned by the poverty of thousands of the Roman citizens, and agitated for reform. Elected tribune in 133 BC, he reimposed the agrarian law of Licinius Stolo, requisitioned all land held in excess and distributed it in allotments to the poor. The authority of the Senate was threatened when he deposed Tribune Marcus Octavius, who had vetoed his proposal. When Attalus, King of Pergamus, bequeathed his wealth to the Roman people, Gracchus proposed that it should be divided among the poor. But he was accused of having violated the character of the tribuneship by the deposition of his colleague Caecina. The common people deserted him, and during the next election for the tribuneship he was murdered, along with 300 of his friends. He was the brother of GAIUS SEMPRONIUS GRACCHUS. 🕮 A H Bernstein, *Tiberius Sempronius Gracchus: A Tradition and Apostasy* (1978)

Grace, W(illiam) G(ilbert) 1848–1915
English cricketer and doctor
Born in Downend, near Bristol, he is considered the first genuinely great cricketer of modern times. He started playing cricket for Gloucestershire in 1864, and was immediately picked for the Gentlemen v Players match. He scored 2,739 runs in a season in 1871, and in 1876 he scored 344 runs in an innings for MCC. He took his medical degree in 1879 and had a practice in Bristol, but devoted most of his time to cricket. He toured Canada and the USA, and twice captained the Test team against Australia, in 1880 and 1882. By 1895 he had scored 100 first-class centuries, and by the end of his career in 1908 he was a national hero. 🕮 Simon Rae, *W G Grace: A Life* (1998)

Gracian, (y Morales) Baltasar 1601–58
Spanish philosopher and writer
Born in Belmonte, Aragon, he entered the Jesuit order in 1619 and later became head of the college at Tarragona. His early works, such as *El Héroe* (1637, Eng trans *The Hero*, 1652), *El Político* (1640, 'The Politician'), *El Discreto* (1646, Eng trans *The Compleat Gentleman*, 1729) and *Oráculo manual y arte de prudencia* (1647, Eng trans *The Courtier's Manual Oracle and the Art of Prudence*, 1685), are all heavily didactic guides to life. He set out his literary ideas on *conceptismo*, the art of conceited writing, in *Agudeza y arte de ingenio* (1642, 'Subtlety and the Art of Genius'). He is best known, however, for his three-part allegorical novel, *El Criticón* (1651, 1653, 1657, 'The Critic'), in which civilization and society are portrayed through the eyes of a savage. 🕮 A Coster, *Baltasar Gracian* (1958)

Grade (of Elstree), Lew Grade, Baron, *originally* **Louis Winogradsky** 1906–98
British theatrical impresario
Born near Odessa, Russia, he was the eldest of three brothers who were to dominate British showbusiness for over 40 years. He moved to Great Britain in 1912, with his parents and brothers Boris (later Bernard, Baron DELFONT of Stepney) and Leslie. Lew and Boris became dancers (semi-professional at first), winning competitions during the 'Charleston' craze of the 1920s, but gave up dancing to become theatrical agents, booking variety acts into theatres. Lew joined forces with his youngest brother Leslie and was joint managing director of their theatrical agency until 1955. He also became an impresario, helping to establish such stars as NORMAN WISDOM and MORECAMBE AND WISE. He launched the ITV company ATV in 1956, and headed several large film entertainment and communications companies, producing films such as *The Cassandra Crossing* (1976) and the television film *The Lady and the Highwayman* (1989). He was made a life peer in 1976.

Grade, Michael Ian 1943–
English television administrator
Born in London, the son of Leslie Grade and nephew of LEW GRADE and Baron DELFONT of Stepney, he began in print journalism as a *Daily Mirror* trainee in 1960, and was a sports columnist (1964–66) on the same paper. He then became a theatrical agent for his family's Grade Organization. In 1973 he was appointed deputy controller of London Weekend Television, where he remained until 1977. He was the controller of BBC1 (1984–86), then became the BBC's director of programmes (1986–88). In 1988 he sought a new challenge by becoming chief executive officer of Channel 4, but unexpectedly resigned in 1997. He was made a Fellow of BAFTA in 1994, and awarded the CBE in 1998. He became chair of the BBC's board in 2004 and in 2006 was announced as chair of the BBC Trust, with effect from January 2007, but instead joined the corporation's commercial rival, ITV, as executive chairman.

Graebe, Karl 1841–1927
German organic chemist
Born in Frankfurt am Main, he was professor at Königsberg (1870) and at Geneva (1878–1906). With Carl Theodore Liebermann (1842–1914), he first synthesized alizarin from anthraquinone (1869), a process of great importance to the German dyestuffs industry.

Graebner, (Robert) Fritz 1877–1934
German ethnologist
Born in Berlin, he studied history there, and joined the staff of the Royal Museum of Ethnology in 1899, but moved to the Rautenstrauch-Joest Museum in Cologne in 1906 (director in 1925), and became honorary professor at Cologne University (1926). He is best known for developing the theory of *Kulturkreise*, clusters of diffusing cultural traits, which he used to explain cultural similarities and differences. His main work, *Methode der Ethnologie* (1911, 'Method of Ethnology'), became the cornerstone for the German culture-history school of ethnology.

Graells, Mariano de la Paz 1809–98
Spanish naturalist
Born in Tricio, Logrono, he studied at Barcelona University and became curator of the Natural History Museum at the Academy of Science and Arts there. He was professor of zoology at Madrid University (from 1837) and later professor of comparative anatomy, and director of the National Museum of Natural Sciences and of the botanical gardens there. An outstanding entomologist, he discovered the Spanish Moon Moth. He also published a *Flora of Catalonia* (1831). He is known as the 'father of Spanish natural history'.

Graf, Steffi 1969–
German tennis player
Born in Brühl, she first came to prominence in 1984, when she won the Olympic demonstration event and reached the last 16 at Wimbledon. In 1988 she won the grand slam of singles titles – the US, French, Australian and Wimbledon – as well as the gold medal at the Seoul Olympics. She was surprisingly defeated by Arantxa Sanchez (1971–) in the 1989 French final, but the retention the same year of her Wimbledon title confirmed her position as world number one. She won a total of 22 grand slam singles titles, just two behind record-holder MARGARET COURT. They included: the French Open (1987–88, 1993, 1995–96, 1999), the Australian Open (1988–90, 1994), the US Open (1988–89, 1993, 1995–96), and the Wimbledon championship (1988–89, 1991–93, 1995–6). In 2001 she married ANDRE AGASSI.

Grafton, Richard c.1513–c.1572
English printer and historian
A grocer by trade, he went to Antwerp in 1537 and there printed the Matthews Bible, the revised COVERDALE New Testament and the 'Great' (folio) Bible. He became printer to EDWARD VI and produced the Book of Common Prayer (1549), but fell into disfavour for printing Lady JANE GREY's proclamation. He also wrote three histories of England, and sat in Parliament.

Graham, Billy (William Franklin) 1918–
US evangelist
He was born in Charlotte, North Carolina. After studying at Florida Bible Institute (now Trinity College) from 1938 to 1940, he was ordained a minister of the Southern Baptist Church (1940). In 1943 he graduated in anthropology from Wheaton College, Illinois, and in the same year married Ruth Bell. He made his first high-profile preaching crusade in Los Angeles in 1949 and has since conducted his crusades on all continents, preaching in the former USSR during the Cold War and in other eastern European countries. Through his crusades and the subsidiary ministries of broadcasting, films and the printed word, it is claimed that millions have been won to Christianity. A charismatic figure who has been the friend and counsellor of many in high office, including RICHARD NIXON, Graham has consistently emerged from investigative reporting as a person of high integrity, and his Billy Graham Evangelistic Association as a model of financial accountability. His books include *Peace with God* (1952), *World Aflame* (1965), *Angels* (1975), *Storm Warning* (1992) and his autobiography, *Just as I Am* (1997). 🕮 Marshall Frady, *Billy Graham: A Parable of American Righteousness* (1979)

Graham, George 1944–
Scottish football player and manager
He was born in Bargeddie, North Lanarkshire. His career as a player started at Aston Villa in 1961, and he played for Chelsea, Arsenal, Manchester United, Portsmouth and Crystal Palace, as well as for California (1978). He gained winner's medals in the FA Cup and League in 1971, and was capped twelve times for Scotland. He was manager of Millwall from 1982 to 1986, when he became manager of Arsenal for nine years (1986–95). In that time the team won the League title in 1988–89 and 1990–91, the Football League Cup and FA Cup in 1993, and the European Cup Winner's Cup in 1994. Dismissed in February 1995 following proceedings relating to the receipt of a 'bung', or cash gift, from a players' agent, he nevertheless returned to football as manager of Leeds (1996–98) and Tottenham Hotspur (1998–2001). He continues to work as a football pundit for Sky Sports.

Graham, Sir James Robert George, 2nd Baronet 1792–1861
British politician
He was born in Netherby, Cumberland (now Cumbria), and educated at Westminster and Christ Church, Oxford. In 1813 he became private secretary to the British minister in Sicily. He entered parliament as a Whig in 1826, and supported Catholic emancipation and the Reform Bill. Earl GREY (1764–1845) made him (1830) first lord of the Admiralty, but in 1834 he resigned over the Irish church question and in 1841 became home secretary under ROBERT PEEL. In 1844 he issued a warrant for opening the letters of GIUSEPPE MAZZINI, and the information thus obtained was communicated to the Austrian minister. His dealing with the Scottish Church increased the troubles which ended in the Disruption of 1843. He supported Peel over the Corn-Law Repeal Bill, and resigned (1846) as soon as it was carried. On Peel's death in 1850 he became leader of the Peelites, and from 1852 to 1855 was first lord of the Admiralty in the coalition ministry.

Graham, Martha 1894–1991
US dancer, teacher, choreographer and pioneer of modern dance

Martha Graham was born in Pittsburgh. She trained in Los Angeles with the Denishawn School and appeared on stage first in vaudeville and revue. In 1926 she made her independent debut in New York, and set up her School of Contemporary Dance the following year. She was much influenced by the composer Louis Horst, and her early work constitutes a major contribution to the American Expressionist movement and to the development of modern dance. *Lamentation* (1930) and *Frontier* (1935) are among her better-known early works.

In 1930 she founded the Dance Repertory Theatre, and trained the company in her own method, which was to use every aspect of the body and mind to dramatic purpose, including movement, breathing and muscular control. Her ballets are based on the same idea of unity, in décor, choreography and music and, frequently, spoken dialogue. One of her best-known ballets, *Appalachian Spring* (1958, music by AARON COPLAND), was a product of her great interest in Native American life and mythology and the early American pioneer spirit, and much of her work was based on the reinterpretation of ancient myths and historical characters. Her method of dance training has been widely adopted in schools and colleges around the world.

📖 Martha Graham published *The Notebooks of Martha Graham* in 1973. See also Agnes de Mille, *Martha: The Life and the Works of Martha Graham* (1991); Don McDonach, *Martha Graham* (1973); LeRoy Leatherman, *Martha Graham* (1966).

> 'We look at the dance to impart the sensation of living in an affirmation of life, to energize the spectator into keener awareness of the vigor, the mystery, the humor, the variety, and the wonder of life. This is the function of the American dance.'
>
> – From 'The American Dance' in Virginia Stewart (ed), *Modern Dance* (1935).

Graham, John Galbraith, *also known as* **Araucaria** 1921–
English crossword compiler
He was born in Oxford, and read classics at King's College, Cambridge. His studies were interrupted by World War II, during which he served in the RAF; he subsequently returned to read theology at King's, and was ordained a Church of England priest in 1949. His first published crossword appeared in *The Manchester Guardian* in 1958, and he has continued to set cryptic crosswords for *The Guardian* under the pseudonym 'Araucaria', meaning monkey puzzle tree; he also sets for the *Financial Times* as 'Cinephile'. Widely admired for his challenging themed puzzles and witty, ingenious clues, he was awarded the MBE in 2005.

Graham, Katharine Meyer, *née* **Meyer** 1917–2001
US newspaper proprietor
Born in New York City, the daughter of the publisher Eugene Meyer (1875–1959), she was educated at Vassar College and the University of Chicago. In 1939 she joined her father's newspaper, the *Washington Post*, as an editor. In 1940 she married Philip Graham, who also joined the *Post* as associate publisher in 1946. When Meyer sold the paper to his daughter and her husband in 1948, they formed the Washington Post Company, bought *Newsweek* magazine (1961), and began to enlarge their circulation. When Philip committed suicide in 1963 after suffering from a mental illness, Katharine Graham took over the presidency (1963–73) and emerged as a tough media tycoon, also taking charge of several television and radio stations. In 1972 the *Post* editors investigated the Watergate scandal, which led to the resignation of President RICHARD NIXON in 1974. She was succeeded in 1979 by her son Donald Graham, who became the company's president and chief executive in 1991. Her autobiography *Personal History* (1997) won the Pulitzer Prize in 1998.

Graham, Martha *See panel above*

Graham, Otto Everett, Jnr 1921–2003
US football player
Born in Waukegan, Illinois, he was a quarter-back with the Cleveland Browns, the most successful team in the American Football Conference (formed in 1946 in opposition to the already established National Football League). In 1950, the Browns went into the NFL and he led them to championship victories in 1950, 1954 and 1955. He was head coach of the Washington Redskins from 1966 to 1968.

Graham, Robert Bontine Cunninghame *See* CUNNINGHAME GRAHAM, ROBERT BONTINE

Graham, Thomas 1805–69
Scottish chemist
Born in Glasgow, he was educated at Glasgow and Edinburgh universities. He began to teach chemistry in Glasgow, at first privately and then at the Mechanics Institute. In 1830 he became professor of chemistry at Anderson's College and in 1837 moved to London as professor of chemistry at University College. He held this chair until 1854, when he was appointed master of the mint, a post he held until his death. His earliest work (1825) was on the solubility of gases in liquids, but his most famous research was on the diffusion of gases and related phenomena; Graham's law states that the velocity of effusion of a gas is inversely proportional to the square root of its density. He discovered the properties of colloids and their separation by dialysis. He was elected Fellow of the Royal Society in 1836 and received its Copley Medal in 1862. He was a founder member and first president of the Chemical Society (1841). 📖 Robert Angus Smith, *The Life and Works of Thomas Graham, DCL, FRS* (1884)

Graham, W(illiam) S(ydney) 1918–86
Scottish poet
He was born in Greenock and studied structural engineering at Stow College, Glasgow. His first collection of poetry, *Cage without Grievance*, was published in 1942. In 1944 he moved to Cornwall, where with DYLAN THOMAS and GEORGE BARKER he shared neo-Romantic sensibilities. *The White Threshold* (1949) is regarded as the first collection of his mature voice, which has drawn comparisons with that of SAMUEL BECKETT. Other work includes the long poem *The Nightfishing* (1955), *Malcolm Mooney's Land* (1970) and a number of posthumous collections. In part because of HAROLD PINTER's enthusiasm for his verse, his reputation has grown since his death. His *New Collected Poems* appeared in 2004.

Graham-Smith, Sir Francis 1923–
English radio astronomer
He spent most of his early research life at Cambridge, moved to Jodrell Bank in 1964, and in 1976 became director of the Royal Greenwich Observatory, where he supervised the establishment of the Northern Hemisphere Observatory at Las Palmas on the Canary Islands. He moved back to Jodrell Bank in 1981 as director, and was the Astronomer Royal of Britain between 1982 and 1990. In 1950 he showed that fluctuations in radio source signals were caused by diffraction in the ionosphere, in 1951 he proposed a method of measuring electron densities in a star's outer layer by astronomical observations, and during the 1950s he participated in a systematic survey of radio sources. He also made the first investigation of radio noise from above the atmosphere. From 1964 to 1974 he concentrated on pulsars, in 1968 discovering that they emitted polarized radiation. He was Langworthy Professor of Physics at Manchester University (1987–90), then emeritus. He was elected FRS in 1970, and knighted in 1986.

Grahame, Kenneth 1859–1932
Scottish children's writer
Born in Edinburgh, the son of an advocate, he was educated at St Edward's School, Oxford, and in 1876 entered the Bank of England as a clerk. He became its secretary in 1898 and retired for health reasons in 1908. His early work consisted of collected essays and country tales, such as *Pagan Papers* (1893), *The Golden Age* (1895) and *Dream Days* (1898), which revealed a remarkably subtle, delicate and humorous sympathy with the child mind. In 1908 he published his best-known work, *The Wind in the Willows*, originally written in the form of letters to his son Alastair, and featuring the quaint and unforgettable riverside characters Rat, Mole, Badger and Toad. It did not at first win acclaim, but within a few years of Grahame's death had become a children's classic. 📖 Alison Prince, *Kenneth Grahame: An Innocent in the Wild Wood* (1994)

Grahame-White, Claude 1879–1959
English aviator and engineer
He was born in Burseldon, Hampshire, and was the first Englishman to be granted a British certificate of proficiency in aviation (1910). In 1909 he founded the first British flying school at Paris, and in 1910 founded his own company to build aircraft. He helped to establish London Aerodrome at Hendon (1911) and published books on the aeroplane and flying.

Grahn, Lucile 1819–1907
Danish ballerina
Born in Copenhagen, she made her official debut at the age of only seven. She subsequently studied and worked in the Royal Danish Ballet with AUGUSTE BOURNONVILLE, creating Astrid in his *Valdemar* (1835) and then becoming his first *La Sylphide* in 1836. In 1838 she moved from Copenhagen to base herself in Paris, also dancing in Hamburg, St Petersburg and London. Retiring from dancing in 1856, she was ballet mistress at the Leipzig State Theatre (1858–61) and then with the Munich Court Opera (1869–75), where she assisted RICHARD WAGNER in the production of *Die Meistersinger von Nürnberg* (1868, 'The Mastersingers of Nuremberg') and *Das Rheingold* (1869, 'The Rhine Gold'). A street in Munich is named after her.

Grainger, (George) Percy Aldridge 1882–1961
Australian–US composer and pianist
Born in Brighton, Victoria, as a child he toured as a concert pianist under the management of his mother, whose maiden name Aldridge he adopted. He studied under Pabst and FERRUCCIO BUSONI, then in 1914 settled in the USA, after collecting folk tunes in the UK and Europe. He took US nationality and served in the US army as a bandsman. A friend and admirer of EDVARD GRIEG, he followed his example in championing the revival of English and Scandinavian folk music in such works as *Molly on the Shore* (1914) and *Shepherd's Hey* (1911), which make skilful use of traditional dance themes. He also experimented with 'free form' music and mechanical music machines, and wrote *The Warriors: Music to an Imaginary Ballet*. He often returned to Australia, and in 1935 founded the Grainger Museum in Melbourne.

Gram, Hans Christian Joachim 1853–1938
Danish bacteriologist
Born in Copenhagen, he developed in 1884 the most important staining technique in microbiology, which is still in use today. The stain divides bacteria into two groups, *Gram-positive* or *Gram-negative*, depending on the structure of their cell walls. Gram took up a clinical career, and was appointed professor of medicine at Copenhagen University in 1900.

Grammaticus ('the Grammarian') *See* ÆLFRIC

Gramme, Zénobe Théophile 1826–1901
Belgian electrical engineer
He was born in Jehay-Bodegnée. In 1869 he built the first successful direct-current dynamo, incorporating a ring-wound armature (the 'Gramme ring'), which after various improvements he manufactured from 1871. It was the first electric generator to be used commercially, for electroplating as well as electric lighting. In 1873 he showed that a dynamo could function in reverse as an electric motor.

Gramont or **Grammont, Philibert, Comte de** 1621–1707
French courtier
He served under Louis, 4th Prince de CONDÉ, and Henri, Vicomte de TURENNE, and became a favourite at the court of LOUIS XIV, but was exiled from France in 1662. He found congenial society at the court of CHARLES II of Great Britain, and married Elizabeth Hamilton, with whom he afterwards returned to France. His *Mémoires*, including tales of amorous intrigues at Charles's court, were written by his brother-in-law, Count Anthony Hamilton, and were first printed anonymously in 1713.

Gramsci, Antonio 1891–1937
Italian journalist, politician and political thinker
Born in Ales, Sardinia, into a poor family, he was educated at Turin University, where he was drawn into political activity in the Socialist Party. A founder member of the PCI (Italian Communist Party) in 1921, he was Italian delegate at the Third International in Moscow (1922). In 1924 he became leader of the Communists in parliament. He was one of a number of outspoken Communist critics of the Fascist regime to be arrested in 1928 and was sentenced to 20 years' imprisonment; he spent the rest of his life in prison. His reputation rests primarily on his *Lettere del carcere* (1947, *Prison Notebooks*), which were a collection of thoughts and reflections written while in confinement and published posthumously. They are regarded as one of the most important political texts of the 20th century.

Gran, Ahmad *See* AHMAD IBN IBRAHIM AL-GHAZI

Granados y Campiña, Enrique 1868–1916
Spanish composer and pianist
Born in Lerida, he studied in Barcelona and Paris, and made his concert debut at the age of 16. He was a composer of Spanish dances, and his *Goyescas* (1911, 'GOYA-like works') for piano are his most accomplished works. He was drowned when the *Sussex* was torpedoed by the Germans in the English Channel.

Granby, John Manners, Marquis of 1721–70
English soldier
He was born in Scarborough, Yorkshire. MP for Grantham in 1742, he served on the Duke of CUMBERLAND's staff. As colonel of 'The Blues' and second-in-command of the British horse at Minden (1759), he witnessed the failure of Lord George Sackville (1716–85) to lead the cavalry into action, which earned his commander the contemptuous title of 'The Great Incompetent'. In 1760 Granby redeemed the cavalry's reputation with the spectacular victory of Warburg. He became 'the mob's hero', in HORACE WALPOLE's sneering phrase, and in 1763 was appointed Master-General of the Ordnance, succeeding the aged John, 1st Earl of Ligonier (1680–1770) as commander-in-chief in 1766.

Grand, Sarah, *pseudonym of* **Frances Elizabeth Bellenden McFall**, *née* **Clarke** 1854–1943
British novelist
She was born in Donaghadee, Ireland, of English parentage, and at the age of 16 married an army doctor, D C McFall (d.1898). In 1923 and from 1925 to 1929 she was mayoress of Bath. Her reputation rests on *The Heavenly Twins* (1893) and *The Beth Book* (1898), in which she skilfully attacks immorality and marital hypocrisy. Her later works, including *The Winged Victory* (1916), are advocacies of feminine emancipation.

Grandi, Dino, Count of Mordano 1895–1988
Italian politician and diplomat
Born in Mordano, near Bologna, he studied law and joined the Fascist quadrumvirate during the 1922 March on Rome. He became MUSSOLINI's foreign minister (1929–32), then Italian ambassador in London (1932–39), during which time he unsuccessfully warned Mussolini of British opposition to the Abyssinian invasion (1935). He was created count in 1937. He was recalled in 1939 after the formation of the Berlin–Rome Axis, and appointed minister of justice. He became extremely concerned about Mussolini's regard for HITLER's policies and in 1943 he moved the motion in the Fascist grand council that full constitutional powers be restored to VICTOR EMMANUEL III. This brought about Mussolini's resignation. Grandi then fled to Portugal before being sentenced to death in absentia by a Fascist Republican court at Verona. For many years he lived in exile in Brazil, then returned to Italy in 1973 and wrote two acclaimed books, *The Foreign Policy of Italy, 1929–32* and *My Country*.

Grange, Kenneth Henry 1929–
English industrial designer
Born in London, he studied at Willesden School of Arts and Crafts before working as a technical illustrator. He ran his own design consultancy from 1958 to 1971, when he co-founded the multidisciplinary practice Pentagram. His product designs include food mixers for Kenwood, cameras for Kodak, pens for Parker, locomotives for British Rail and parking meters for Venner. He became a Royal Designer for Industry in 1969. The recipient of ten Design Council Awards and the PRINCE PHILIP Designers Prize (2001), he was awarded a CBE in 1984.

Grange, Red (Howard Edward) 1903–91
US football player and coach
He was born in Forksville, Pennsylvania. He played from 1923 to 1925 for Illinois University, where he gained 4,280 yards and was described as the 'greatest broken-field runner in the history of the game'. When he signed for the Chicago Bears in 1925 it caused a great controversy over the registration of student players. He was the first man to earn $100,000 in a season. He went on to play in New York before returning to the Bears (1929–34), retiring in 1935.

Granger, Sir Clive W(illiam) J(ohn) 1934–
Welsh economist and Nobel Prize winner
Born in Swansea, he moved with his family to England as a child. Despite his mother being told by a schoolteacher that he would never be a success, he went on to study at the University of Nottingham, where he later became a professor. In 1974 he

moved to the University of California at San Diego. His work on the relationships between different financial or economic variables over time led to breakthroughs in macroeconomic forecasting. He shared the 2003 Nobel Prize in economics with ROBERT F ENGLE for methods of analysing economic time series. He was knighted in 2005.

Granger, James 1723–76
English biographer
Born in Shaftesbury, he published a *Biographical History of England...adapted to a Methodical Catalogue of Engraved British Heads* (1769) and insisted 'on the utility of a collection of engraved portraits' by publishing later editions with blank interleaved paper for inserting extra illustrations. This led to extraordinary zeal in the collection of portraits, and 'grangerized copies' were embellished with engravings clipped from every conceivable source, even the most valuable early books. He himself is said to have cut some 14,000 engraved portraits from other books. At his death he was vicar of Shiplake, Oxfordshire.

Granger, Stewart, *originally* **James Stewart** 1913–93
English actor
Born in London, he trained at the Webber–Douglas School of Dramatic Art, then entered the acting profession as a film extra and lowly supporting figure at the Old Vic. He then progressed via repertory companies in Hull and Birmingham to the West End and a leading role in the film *So This Is London* (1939). After wartime service in the Black Watch, his handsome looks and virile manner made him a popular leading man in costume melodramas like *The Man in Grey* (1943), *Caravan* (1946) and *Blanche Fury* (1948). He made a successful Hollywood debut in *King Solomon's Mines* (1950) and proved an adept swashbuckler and man of adventure in the likes of *Scaramouche* (1952) and *Moonfleet* (1955). He later starred in a succession of 'continental westerns' and the television series *The Men from Shiloh* (1970) before curtailing his acting career to concentrate on business interests. An abrasive figure, he published an autobiography, *Sparks Fly Upward* (1981), and made his Broadway debut in *The Circle* (1989–90).

Granit, Ragnar Arthur 1900–91
Swedish physiologist and Nobel Prize winner
Born in Helsinki, Finland, he studied psychology and medicine at Helsinki University, specializing in neurophysiology. After graduating he was appointed instructor in physiology in 1927, and the following year visited England to work for a short period in Sir CHARLES SHERRINGTON's laboratory at Oxford. In 1929 he won a fellowship in medical physics to work at the Johnson Foundation at the University of Pennsylvania, where he met both GEORGE WALD and HALDAN HARTLINE, with whom he was to share the 1967 Nobel Prize in physiology or medicine. After two years he returned to Helsinki and became professor of physiology in 1937. After the Soviet invasion of Finland he escaped to Sweden, where he became professor of neurophysiology at the Karolinska Institute in Stockholm (1940–67). His analyses of retinal processing revealed that visual mechanisms were complex responses to light and dark, and he pioneered the recording of the mass response of the retina, the electroretinogram (ERG). From these studies he was able to explain the mechanisms of colour discrimination. He also contributed to research on the spinal cord, on pain mechanisms and on the philosophy of science.

Grant, Alexander Marshall 1925–
New Zealand dancer and director
Born in Wellington, he won a scholarship to London and the Royal Ballet, Covent Garden, where he was to spend his entire dancing career. A soloist by 1949, he became best known for character roles like Bottom in FREDERICK ASHTON's *The Dream* (1964). He was director of the Royal Ballet's off-shoot, Ballet For All (1971–75), and from 1976 to 1983 he was director of the National Ballet of Canada. Guest artist at the Royal Ballet (1985–89) and Joffrey Ballet (1987–89), he was also senior principal at the London Festival Ballet (now English National Ballet) from 1989 to 1991. He was awarded the CBE in 1965.

Grant, Anne, *née* **MacVicar** 1755–1838
Scottish poet and essayist
Born in Glasgow, she lived in North America as a child (1758–68). In 1779 she married the Rev James Grant, minister of Laggan. Left a widow in 1801, she turned to writing and published *Poems* (1803), *Letters from the Mountains* (1806), *Memoirs of an American Lady* (1808) and *Superstitions of the Highlanders* (1811). In 1810 she moved to Edinburgh, where she mixed in literary circles, and in 1825 she received a pension of £50 through the influence of Sir WALTER SCOTT.

Grant, Bernie (Bernard Alexander Montgomery) 1944–2000
British Labour politician
Born in Georgetown, British Guiana (now Guyana), he was educated at St Stanislaus College, Georgetown, Tottenham Technical College, London, and at Heriot-Watt University in Edinburgh. He worked as an analyst in Guyana before moving to Great Britain in the early 1960s, where he found employment as a railway clerk and, from 1969 to 1978, as a telephonist. An area officer with the National Union of Public Employees (1978–83), he worked as a development officer for the Black Trade Unionists Solidarity Movement (1983–84), before entering local government service in London (1985–87). He was elected MP for Tottenham in 1987. He was founder and chairman of the Parliamentary Black Caucus, which promotes greater parliamentary representation of ethnic minorities in Britain.

Grant, Cary, *originally* **Archibald Leach** 1904–86
US film actor
Born in Bristol, England, he worked as an acrobat and juggler, before moving (1920) to the USA, where he stayed to pursue a stage career. He went to Hollywood in 1928 and made his film debut in *This Is the Night* (1932). A suave, debonair performer opposite MARLENE DIETRICH and MAE WEST, he played leads in sophisticated light comedy, displaying metronomic timing and a sense of the ridiculous in films like *Bringing Up Baby* (1938), *His Girl Friday* (1940) and *Arsenic and Old Lace* (1944). He was also notable in ALFRED HITCHCOCK's thrillers, including *Suspicion* (1941), *Notorious* (1946), *To Catch a Thief* (1955) and *North by Northwest* (1959). Married five times, he retired from the screen in 1966 and received a special Academy Award (1970) for his 'unique mastery of the art of screen acting'.
Graham McCann, *Cary Grant: A Class Apart* (1997)

Grant, Duncan James Corrowr 1885–1978
Scottish painter
Born in Rothiemurchus, Inverness, he studied at the Westminster and Slade School of Art, London, and in Italy and Paris. He was associated with ROGER FRY's Omega Workshops, and later with the London Group. His works were mainly landscapes, portraits and still lifes, but he also designed textiles and pottery. Through his cousin, LYTTON STRACHEY, he became friends with many of the Bloomsbury Group. He collaborated on many projects with VANESSA BELL, with whom he lived for many years.

Grant, Sir Francis 1803–78
Scottish painter
Born in Edinburgh, he painted sporting scenes, and his portrait groups were in great demand, such as the *Meet of HM Staghounds* and the *Melton Hunt*, executed for the Duke of WELLINGTON. He was president of the Royal Academy in 1866.

Grant, Hugh John Mungo 1960–
English actor
Born in London, he studied English literature at Oxford, where he appeared on stage as part of the Dramatic Society, and made his film debut in *Privileged* (1982). He worked at the Nottingham Playhouse and performed comedy revues with the Jockeys of Norfolk. A prolific actor in often forgettable films and television mini-series, his screen appearances include *Maurice* (1987), *The Lair of the White Worm* (1988), *Impromptu* (1991) and *Bitter Moon* (1992). The phenomenally popular *Four Weddings and a Funeral* (1994, Best Actor BAFTA and Golden Globe awards) revealed him as a polished light comedian with charm and wit, whilst the character of a bumbling, emotionally repressed Englishman endeared him to audiences worldwide. Subsequent films include *Sense and Sensibility* (1995), *Notting Hill* (1999), *Bridget Jones's Diary* (2001) and *About a Boy* (2002).

Grant, James Augustus 1827–92
Scottish soldier and explorer
Born in Nairn, in the Scottish Highlands, he was educated at Marischal College, Aberdeen. He joined the Indian army, eventually reaching the rank of colonel, and fought in the Battle of Gujerat, the Indian Mutiny, and in the Abyssinian campaign of 1868. With JOHN HANNING SPEKE he explored the sources of the Nile (1860–63) and made important botanical collections. On Speke's death he took over as the main spokesman for the expedition, becoming a leading African specialist. He wrote *A Walk Across Africa* (1864),

Grant, Linda 1951–
English writer
Born in Liverpool to Russian and Polish Jewish immigrants, she was educated at York and did graduate work at McMaster and Simon Fraser universities, both in Canada. After returning to the UK she became a journalist, and was a feature writer for *The Guardian* and a columnist on the *Jewish Chronicle*. She has published three non-fiction books: *Sexing the Millennium* (1993), *Remind Me Who I Am, Again* (1999) and *The People on the Street* (2006). Her novels are *The Cast Iron Shore* (1996), *When I Lived in Modern Times* (2000, Orange Prize) and *Still Here* (2002).

Grant, Richard E, *originally* **Richard Grant Esterhuysen** 1957–
British actor
He was born in Mbabane, Swaziland, and studied at the University of Cape Town before moving to London in the early 1980s. Among his earliest films was the one that made his reputation, *Withnail and I* (1986), where he played the rancorous failed thespian Withnail. Subsequent films include *How to Get Ahead in Advertising* (1989) and *Keep the Aspidistra Flying* (1997). His directorial debut, *Wah-Wah* (2005), was loosely based on his early life in Africa. He has also published two autobiographical works, and the satirical novel *By Design* (1999).

Grant, Ulysses S(impson), *originally* **Hiram Ulysses Grant** 1822–85
18th president of the USA
Born in Point Pleasant, Ohio, he graduated from West Point in 1843 and fought in the Mexican War (1846–48), gaining promotion to the rank of captain in 1853. He resigned from the army (1854) and settled on a farm near St Louis, Missouri. However, on the outbreak of the Civil War in 1861 he returned to the army, swiftly becoming a brigadier-general, and in 1862 he captured Fort Henry and Fort Donelson in Tennessee, securing for the Union its first major victory. He was criticized for high Union casualties at Shiloh, but in 1863 he besieged Vicksburg, Mississippi, and forced its surrender, thus capturing the last major Confederate stronghold on the Mississippi River and cutting the Confederacy in half. Having driven the enemy out of Tennessee, he was made a lieutenant-general and given command of the Union forces in 1864. His strategy was to concentrate all the national forces into several distinct armies, which should operate simultaneously against the enemy, with General SHERMAN moving toward Atlanta, while Grant accompanied the army of the Potomac against Richmond. He encountered General ROBERT E LEE in the wilderness, and fought a desperate battle, driving the enemy within the lines of Richmond and culminating in Lee surrendering his entire army in April 1865. The fall of Richmond substantially ended the war. In July 1866 Grant was appointed a full general but relinquished the rank when in 1868 and 1872 he was elected president as the candidate of the Republicans. Despite his military skill, he was politically naïve, and his administration (1869–77) was marked by corruption and incompetence. Most of the achievements of his presidency were traceable to his brilliant secretary of state, HAMILTON FISH, who negotiated the Treaty of Washington (1871) with Great Britain and resolved the *Alabama* claims. The proposal of a third term of presidency not having been approved, Grant returned to private life and became a sleeping partner in a banking house but was robbed of all he possessed by two of the partners. In the hope of providing for his family, he had begun his autobiography, when in 1884 a sore throat proved to be cancer at the root of the tongue. The sympathies of the nation were aroused, and in March 1885 Congress restored him to his rank of general, which he had lost on accepting the presidency, thus qualifying his dependants for an army pension. His *Personal Memoirs* (2 vols, 1885–86) are a classic of US military history. 🕮 Michael Korda, *Ulysses S Grant: The Unlikely Hero* (2004)

Grant, William 1839–1923
Scottish distiller
Born in Dufftown, Banffshire, he began his career in quarrying and lime-burning. He then worked as bookkeeper and manager at the Mortlach distillery in Banffshire for almost two decades. Having bought second-hand equipment from a neighbouring distiller he proceeded, with his six sons, to build the Glenfiddich distillery, where most of the whisky would be sold for blending. This accomplished, production began in 1887, and it was so successful that a second distillery was opened at Balvenie in 1893. Grant then sent both his son and his son-in-law to Glasgow to set up the family's own blending business. From this time Glenfiddich became established as a popular five-year-old, and William's eldest son, John, took over the running of the company.

Grant, William 1863–1946
Scottish lexicographer
Born in Elgin, Grampian, he studied in France, Belgium and Germany, and became a lecturer in English, modern languages and phonetics at Aberdeen University. He was until his death editor of the *Scottish National Dictionary*, and published various works on Scottish dialects.

Granville, 1st Earl *See* CARTERET, JOHN

Granville-Barker, Harley 1877–1946
English actor, playwright and producer
He was born in London. His career as an actor was noted for his appearances in plays by GEORGE BERNARD SHAW, who chose him to play Marchbanks in *Candida* (1900). In 1904 he became co-manager of the Court Theatre with John Vedrenne, and there followed a four-year season that was a landmark in the history of the British theatre. First performances in England of plays by Count MAURICE MAETERLINCK, ARTHUR SCHNITZLER, GERHART HAUPTMANN, W B YEATS, JOHN GALSWORTHY, JOHN MASEFIELD and Shaw were presented in circumstances that set new standards of acting and design. He left the Court (1907) and continued his success with a series of SHAKESPEARE plays at the Savoy. He retired from the stage in the early 1920s. His plays include *The Marrying of Ann Leete* (1902), *The Voysey Inheritance* (1905), *Waste* (performed privately in 1907, publicly in 1936) and *The Madras House* (1910). With William Archer he devised a scheme for a national theatre. His prefaces to Shakespeare's plays (4 vols, 1927–45) are valuable for their original criticism and ideas on production. 🕮 Dennis Kennedy, *Granville-Barker and the Dream of Theatre* (1985)

Grappelli, Stephane 1908–97
French jazz violinist
He was born in Paris and had a classical training on violin and other instruments. With the Belgian gipsy guitarist DJANGO REINHARDT as co-leader, he was a founder member of the Quintette du Hot Club de France, which brought a European influence into jazz from the mid-1930s. Grappelli worked as a solo artist in London during World War II, returning later to France. He went on to perform prolifically throughout the world, usually leading a quartet and adhering to the bright swing-based style of which he was a recognized master. 🕮 Paul Balmer, *Stephane Grappelli: With and Without Django* (2003)

Grass, Günter Wilhelm 1927–
German novelist and Nobel Prize winner
Born in Danzig (now Gdansk, Poland), he trained as a stonemason and sculptor, then attended the Academy of Art, Düsseldorf, and the State Academy of Fine Arts, Berlin. He served in World War II and was a prisoner of war. He worked as a farm labourer, apprentice stonecutter, miner and jazz musician, and was then a speech-writer for WILLY BRANDT when Brandt was mayor of West Berlin. *Die Blechtrommel* (1959, Eng trans *The Tin Drum*, 1962, filmed 1979) was the first of the novels that have made him Germany's greatest living novelist. Ostensibly the autobiography of Oskar Matzerath, detained in a mental hospital for a murder he did not commit, it caused a furore in Germany because of its depiction of the Nazis. Intellectual and experimental in form, theme and language, his books consistently challenge the status quo and question our reading of the past. He is also a prolific playwright, poet and essayist. Important books are *Katz und Maus* (1961, Eng trans *Cat and Mouse*, 1963), *Hundejahre* (1963, Eng trans *Dog Years*, 1965), *Örtlich betäubt* (1969, Eng trans *Local Anaesthetic*, 1970), *Der Butt* (1977, Eng trans *The Flounder*, 1978), *Das Treffen in Telgte* (1979, Eng trans *The Meeting at Telgte*, 1981), *Die Rättin* (1986, Eng trans *The Rat*, 1987), *Unkenrufe* (1992, Eng trans *The Call of the Toad*, 1992), *Mein Jahrhundert* (1999, Eng trans *My Century*, 1999) and *Im Krebsgang* (2002, Eng trans *Crabwalk*, 2003). He has illustrated many of his own book jackets. In 1995 he published *Ein weites Feld* (Eng trans *Too Far Afield*, 2000), one of the first major novels to tackle the issue of German reunification. An advocate of openness with regard to Germany's Nazi past, he caused controversy in 2006 when, in a publicity campaign for his memoirs *Beim Häuten der Zwiebel* (2006, Eng trans *Peeling the Onion*, 2007), he revealed that he had served briefly in the Waffen SS at the end of World War II. He was awarded the Nobel Prize in literature in 1999. 🕮 K Miles, *Günter Grass* (1975)

Grasse, François Joseph Paul, Comte de 1722–88
French admiral
Born into nobility at Château du Bar, near Grasse, he entered the navy in 1738 and served in the War of the Austrian

Succession and the Seven Years' War. As commander of the French fleet in Chesapeake Bay during the American Revolution, he blockaded the York and James rivers and trapped CHARLES CORNWALLIS at Yorktown, which made possible the American victory that ended the war.

Grassic Gibbon, Lewis *See* GIBBON, LEWIS GRASSIC

Grassmann, Hermann Günther 1809–77
German mathematician and philologist
Born in Stettin, he studied theology and classics at Berlin University (1827–30), then became a schoolmaster in Berlin and Stettin. His book *Ausdehnungslehre* (1844, 'The Theory of Linear Extension: A New Branch of Mathematics') set out a new theory of *n*-dimensional geometry expressed in a novel language and notation. Despite its almost complete neglect by mathematicians of the time, its importance has gradually been recognized, as it anticipated much later studies in quaternions, vectors, tensors, matrices and differential forms. From 1849 he studied Sanskrit and other ancient Indo-European languages, work which met with immediate acceptance.

Gratian, *properly* **Flavius Augustus Gratianus** AD 359–83
Roman emperor
The son of the Emperor VALENTINIAN I, he was born in Sirinium, Pannonia, and in AD 367 his father made him Augustus in Gaul. He and his half-brother VALENTINIAN II succeeded their father on his death (AD 375). Gaul, Spain and Britain fell to Gratian's share, but as his brother was only four years old he virtually ruled the whole Western Empire, and in AD 378, on the death of his uncle Valens, he suddenly became sovereign also of the Eastern Empire. Thereupon he recalled THEODOSIUS I, the Great, from Spain, and appointed him his colleague (AD 379). He was much influenced by St AMBROSE, and persecuted pagans and heretics. He was eventually overthrown by the usurper MAGNUS MAXIMUS, and was murdered at Lyons.

Gratian, *Latin* **Franciscus Gratianus** 12th century
Italian jurist and Camaldolese monk of Bologna
Between 1139 and 1150 he compiled the collection of canon law known as the *Decretum Gratiani*, which was to become the basic text for all studies of canon law.

Grattan, Henry 1746–1820
Irish politician
Born in Dublin and educated at Trinity College, Dublin, and at the Middle Temple, he became such a fervent supporter of HENRY FLOOD that his father disinherited him. He deserted law for politics in 1775 when he entered the Irish parliament for Charlemont. When Flood, who had been leading the fight for Irish independence, accepted a government post Grattan immediately took his place, attempting to secure the removal of the restrictions imposed on Irish trade. When the concessions he won were revoked in 1779, he began the struggle for legislative independence. He secured the abolition of all claims by the British parliament to legislate for Ireland in 1782, but was unable to prevent the Act of Union and sat in the parliament at Westminster until his death.

Gravelet, Jean François *See* BLONDIN, CHARLES

Graves, Alfred Perceval 1846–1931
Irish writer and educationalist
He was born in Dublin, and worked as an inspector of schools in England. He wrote much Irish folk-verse and songs, including 'Father O'Flynn', and an autobiography, *To Return to All That* (1930). A leader of the Celtic revival, he helped to found the Irish Literary Society in London.

Graves, Michael 1934–
US architect
Born in Indianapolis, Indiana, he studied architecture in Cincinnati and at Harvard, and after spending two years as a Fellow at the American Academy in Rome, began to teach at Princeton University in 1962; he remained there for 40 years. His designs in the 1960s, influenced by LE CORBUSIER, were in the sleek, functional style of orthodox Modernism, but in the late 1970s he began to incorporate into his work 'quotations' from earlier architectural styles, including pyramids, columns, pilasters, and vaults. His colourful, irreverently ornamented works in the 1980s included the Portland Building (Portland, Oregon), the Walt Disney Co. Corporate Headquarters (Burbank, California) and the Humana Building (Louisville, Kentucky). He has also designed furniture and housewares. Denounced by some as a maker of empty and arbitrary historical allusions and praised by others for the energy and inventiveness of his designs, Graves is one of the leading proponents of Postmodernism in architecture. In 2001 he received the American Institute of Architecture gold medal.

Graves, Richard 1715–1804
English writer
Born in Mickleton, Gloucestershire, and educated at Pembroke College, Oxford, he became a Fellow of All Souls, Oxford, in 1736, and also rector of Claverton, near Bath. Of his great output, only his novel *The Spiritual Quixote* (1772), a comic tilt at changing Methodist views which satirizes the evangelical preacher GEORGE WHITEFIELD, is remembered. His other novels, though little read, contain well-observed portraits of the social conditions of his age. 🕮 F Kilvert, *Richard Graves of Claverton* (1858)

Graves, Robert James 1796–1853
Irish physician
Born in Dublin, he studied medicine in Edinburgh but qualified in 1818 from Dublin. After three years' travel in Europe (several months of it with the painter J M W TURNER), he returned to Dublin, when he was appointed physician to the Meath Hospital. There he reorganized medical teaching along the lines advocated in France, with emphasis on physical examination and systematic note-taking and autopsies. He was an excellent diagnostician, best remembered today for his description of a form of hyperthyroidism ('Graves' disease'), and his *Clinical Lectures on the Practice of Medicine* (1843) won him an international reputation.

Graves, Robert Ranke 1895–1985
English poet, novelist, essayist and critic
Born in London and educated at Charterhouse, he was professor of English at Cairo and professor of poetry at Oxford (1961–66). His early poetry, such as *Over the Brazier* (1916) and *Fairies and Fusiliers* (1917), was published during World War I, and his poems also appeared in the popular anthology *Georgian Poetry*. In 1925 he met LAURA RIDING, with whom he went into exile in Majorca on the proceeds of his autobiography, *Goodbye to All That* (1929). He returned to England in 1939 for World War II, but settled permanently in Majorca in 1946. His best-known novels are *I, Claudius* (1934) and *Claudius the God* (1934), which were adapted for television in 1976. *The White Goddess* (1948) is his most significant non-fiction title, and his interest in myth prompted *Greek Myths* (1955) and *Hebrew Myths* (1963). He is generally regarded as the best love poet of his generation. 🕮 Miranda Seymour, *Robert Graves: Life on the Edge* (1995)

Gray, Alasdair James 1934–
Scottish novelist, painter and playwright
Born in Glasgow, he was educated at Glasgow School of Art. Painting was his first vocation and he came late to novel-writing; *Lanark*, his first novel, was published in 1981. His novel *1982 Janine* (1984) is typically erotically charged and humorous. His other novels include *The Fall of Kelvin Walker* (1985), *Something Leather* (1990), *McGrotty and Ludmilla* (1990), 'the Aladdin story set in modern Whitehall', *Poor Things* (1992, Guardian Fiction Prize and Whitbread Novel Award) and *A History Maker* (1994). He has also published volumes of short stories, including *Unlikely Stories, Mostly* (1983), *Mavis Belfrage* (1996) and *The Ends of Our Tether: 13 Sorry Stories* (2003), a volume of poetry, *Old Negatives* (1989), and the autobiographical *Saltire Self-Portrait no 4* (1989). He has also written for stage, television and radio.

Gray, Asa 1810–88
US botanist
Born in Sauquoit, New York, he was educated there and in Clinton, Iowa, before going to Fairfield Academy, to whose medical school he transferred after a year. He practised medicine briefly at Bridgewater, New York (1831–32), and began collecting plants. In 1836 he became professor of natural history at the University of Michigan, Ann Arbor (1838–42). Following a tour of European botanical institutes, he became professor of natural history at Harvard (1842–73) on the understanding that he specialize in botany. He eventually became the USA's leading 19th-century plant taxonomist, was also a strong Darwinian, and used CHARLES DARWIN's theory to explain the distribution of plants occurring in both eastern Asia and eastern North America. His works include *Manual of Botany of the Northern United States* (1848, known as 'Gray's Manual'), *Genera Florae Americae Boreali-Orientalis Illustrata* (1845–50) and *A Free Examination of Darwin's Treatise* (1861). 🕮 A Hunter Dupree, *Asa Gray* (1988)

Gray, David 1838–61
Scottish poet
Born in Merkland, near Kirkintilloch, Dunbartonshire, he studied divinity at Glasgow University, but took an interest in poetry and in 1860 moved to London with ROBERT BUCHANAN. His only collection of poetry was *The Luggie and Other Poems*, published posthumously in 1874. Its title piece is a long lyrical poem in praise of the stream near his birthplace, written in the manner of JAMES THOMSON's *The Seasons* (1730). It also contained 'In the Shadows'. 🕮 A V Stuart, *David Gray, Poet of the Luggie* (1961)

Gray, Edward Whitaker 1748–1806
English botanist and physician
Born probably in London, he was appointed librarian to the Royal College of Physicians in 1773, and from 1787 to 1806 was keeper of the department of natural history at the British Museum, arranging the collections according to the Linnaean system. In 1788 he was made one of the first associates of the newly formed Linnaean Society of London. Elected FRS in 1779, he became its secretary in 1797. He sent a collection of plants from Oporto, Portugal, to Sir JOSEPH BANKS in 1777, and was the author of *On the Class of Animals Called by Linnaeus Amphibia* (1789). He was the uncle of SAMUEL FREDERICK GRAY.

Gray, Eileen 1878–1976
Irish architect and designer
Born in Enniscorthy, County Wexford, she studied at the Slade School of Art, London (1898), then moved to Paris in 1902, studying at the Académie Colarossi and Académie Julian. She also worked with Japanese craftsman Sugawara. Specialising in lacquering, she began to design furniture and started making carpets, lamps and wall hangings. In 1922 she opened her Galerie Jean Désert in the Rue du Fauborg Saint-Honoré, where she showed her famous lacquer screens. Among her patrons were Jacques Doucet and Suzanne Talbot. Self-taught as an architect, she worked in the modern movement with Jean Badovici. She later exhibited at the Paris 1937 Exhibition with LE CORBUSIER. In the 1960s her work was 'rediscovered' and she witnessed the revival of her art while in her nineties. Her furniture designs were reproduced in Italy, France and the UK.

Gray, Elisha 1835–1901
US inventor
Born in Barnesville, Ohio, he was a manufacturer of telegraphic apparatus. His firm became the Western Electric Co., and his 60 patents included a multiplex telegraph. He also claimed the invention of the telephone, but lost the patent rights to ALEXANDER GRAHAM BELL after a long legal battle in the US Supreme Court.

Gray, George Robert 1808–72
English ornithologist and entomologist
Born in London, he was the son of SAMUEL FREDERICK GRAY and brother of JOHN EDWARD GRAY. Educated at Merchant Taylor's School, he became zoological assistant at the British Museum in 1831. His first task was cataloguing insects, and he published *Entomology of Australia* (1833). From 1831 to 1872 he ran the ornithological section of the museum, where he produced his most important work, the *Genera of Birds* (3 vols, 1844–49). Gray's Grasshopper Warbler is named after him.

Gray, Gordon Joseph 1910–93
Roman Catholic archbishop and cardinal
Born in Leith, near Edinburgh, he was educated at Holy Cross Academy, Edinburgh, St Joseph's Seminary, Sussex, and St John's, Surrey, and was ordained a priest in 1935. Following various appointments, he was appointed Archbishop of St Andrews and Edinburgh in 1951. In 1969 he was named cardinal by Pope PAUL VI, the first such appointment in Scottish history (apart from exiled clerics in Rome). In 1982 he played a major part in bringing Pope JOHN PAUL II to Scotland. A traditionalist in manner, he was a valuable force in furthering ecumenical advances, and made possible the great improvement in the acceptability of Catholics in Scottish life.

Gray, Gustave Le 1820–82
French photographer and inventor
His early training was as a painter, but he is remembered as a pioneering photographer who in 1851 invented the waxed-paper process to replace the calotype process. His photographs were mainly of the landscape and architecture of France.

Gray, Hanna Holborn, *née* **Holborn** 1930–
US historian
She was born in Heidelberg, Germany, the daughter of the historian Hajo Holborn, who fled the Nazis with his family in 1934 and settled in the USA. As a Renaissance and Reformation scholar, she worked in various universities during the 1950s and 1960s. She was appointed professor of history and provost of Yale in 1974, and became acting president (1977–78). Her appointment as president of the University of Chicago (1978–93) made her the first woman to head a major US university. In 1991 she was awarded the Presidential Medal of Freedom.

Gray, Sir James 1891–1975
English zoologist
Born in London, he studied at Cambridge, where he was made a demonstrator in the zoology department in 1924, a reader in experimental zoology in 1931, and later professor of zoology (1937–61). His investigations into the cellular mechanisms underlying fertilization, cell division and growth resulted in his 1931 *Text-book of Experimental Cytology*. His subsequent research interests were in the mechanics of locomotion, much of his research dealing with swimming and the problems of size and scale. He was one of the first people to make use of cinematography to analyse movement and used this technique in his examination of ciliary movement. He was a member of the Advisory Committee on Fisheries Research (1932–65, chairman from 1949), president of the Marine Biological Association (1945–55) and a trustee of the British Museum (1948–60). He was knighted in 1954.

Gray, John Edward 1800–75
English zoologist and botanist
Born in Walsall, Staffordshire, he was the son of SAMUEL FREDERICK GRAY and brother of GEORGE ROBERT GRAY. He studied medicine in London, but was much more interested in botany, and was co-author with his father of *The Natural Arrangement of British Plants* (1821). In 1824 he joined the British Museum as assistant keeper of zoology (keeper, 1840–74) and enormously increased its collections. He published 1,162 books, memoirs and notes, mostly zoological, but including a *Handbook of British Waterweeds* (1864).

Gray, Milner Connorton 1899–1997
English graphic designer
Born in London, he studied at Goldsmiths College there. He was always associated with multidisciplinary design practices, forming in 1922 one of the first in Great Britain, with Charles Bassett (Bassett-Gray), and later co-founding with MISHA BLACK the Industrial Design Partnership (1935) and the Design Research Unit (1945). He was also, in 1930, one of the founders of the designers' professional body, The Society of Industrial Artists (Chartered Society of Designers). He worked for the Ministry of Information during World War II and was involved in two major exhibitions, 'Britain Can Make It' (1946) and the 'Festival of Britain' (1951). Although he designed ceramics and furniture, he is best known for his co-ordinated corporate identity schemes for organizations such as Ilford, Austin Reed, ICI, Gilbey and British Rail. He became a Royal Designer for Industry in 1937.

Gray, Robert 1755–1806
US explorer
He was born in Tiverton, Rhode Island. He became the first US captain to sail around the world (1787–90), carrying sea otter skins from the north-west to China and then returning to Boston with a Chinese cargo, and in doing so he established the three-cornered China trade. His explorations of the north-west coast, especially his discovery of the Columbia River (1792), became the basis for the successful US claim to the Oregon country.

Gray, Samuel Frederick 1766–1828
English botanist and pharmacologist
Born in London, he moved to Walsall, Staffordshire, in 1797, and practised as a pharmaceutical chemist until 1800. In that year he returned to London and lectured on botany and materia medica. He published *Supplement to the Pharmacopoeia* (1818) and with his son JOHN EDWARD GRAY wrote *Natural Arrangement of British Plants*. Gray was the first person to establish fungal genera such as *Amanita*, *Lepiota* and *Corticium*.

Gray, Simon James Holliday 1936–
English dramatist, director and novelist
Born in Hayling Island, Hampshire, he studied at Cambridge. He has written novels and several television plays, but is best known as a stage dramatist. His first play, *Wise Child*, was produced in 1967. Subsequent plays include *Butley* (1971), *Otherwise Engaged* (1975), *The Rear Column* (1978), *Quartermaine's Terms* (1981), *The Common Pursuit* (1984, televised 1992), *Melon* (1987) and *Cell Mates* (1995), whose staging was the focus of much media attention following the walk-out and

disappearance of STEPHEN FRY. This episode is central to Gray's autobiographical *Fat Chance*, published later in 1995. He was a lecturer in English literature at Queen Mary College, London (1965–85), and many of his plays are set in the world of academics, publishers, or academics who publish. His best television play is *After Pilkington* (1987), a wry thriller set in Oxford. *They Never Slept* (1991), also for television, is a comedy about ghosts in World War II, with characteristically serious comment on war and the position of women. He has also published books about the process of staging a play, *An Unnatural Pursuit* (1985) and *How's That for Telling 'Em, Fat Lady?* (1988). Seven of his plays have been directed by HAROLD PINTER, including *The Old Masters* (2004). He was awarded the CBE in 2005.

Gray, Stephen 1666–1736
English physicist
He was born in Canterbury, and his first scientific paper (1696) described a microscope made of a water droplet, similar to the simple glass bead microscopes made so famous by ANTONI VAN LEEUWENHOEK in the following decade. He was one of the first experimenters in static electricity, using frictional methods to prove conduction; this work had a great influence on the electrical theory of CHARLES DUFAY.

Gray, Thomas 1716–71
English poet
Born in London, he was educated at Eton and Peterhouse, Cambridge. At Eton he met HORACE WALPOLE, whom he accompanied (1739) on a two-and-a-half-year tour of France and Italy, but they quarrelled at Reggio and parted. Gray returned to England and in 1742 he wrote his 'Ode on a Distant Prospect of Eton College' (1747), and began the 'Elegy Written in a Country Churchyard' (1751), in Stoke Poges, Buckinghamshire. He then went back to Cambridge, where he wrote his *Pindaric Odes* (1757). He declined the laureateship in 1757. In 1768 he collected his poems in the first general edition, and became professor of history and modern languages at Cambridge. 🕮 Robert L Mack, *Thomas Gray: A Life* (2000)

Graziani, Rodolfo, Marchese di Neghelli 1882–1955
Italian soldier
He was born near Frosinone. He served in Libya in 1913 and on the Italian front during World War I. In 1930 he became vice-governor of Cyrenaica and in 1936 led the Italian forces on the Somalian front during the conquest of Abyssinia. He succeeded PIETRO BADOGLIO as viceroy of Ethiopia. He was placed in charge of the Italian forces in North Africa (1940–41) but was replaced after a series of defeats by the British under Lord WAVELL. He accepted MUSSOLINI's invitation to become defence minister of the Republic of Salò in 1943, but was captured in 1945 and tried for war crimes. In 1950 he was sentenced to 25 years in prison, but was released the same year. He was active in the Italian Social Movement until his death.

Greathead, James Henry 1844–96
British inventor
Born in Grahamstown, Cape Colony, South Africa, he went to England (1859) and after studying civil engineering as an apprentice, he undertook to build a subway under the Thames in London (1869). To penetrate the difficult water-bearing strata he devised the 'Greathead shield', a cylindrical wrought-iron tube pushed forward by powerful screws as material was excavated in front of it. In 1884 he patented further improvements to his shield, incorporating the use of compressed air and forward propulsion by hydraulic jacks instead of screws. The improved shield was used in the building of the City and South London railway tunnels (1886).

Greatrakes or **Greatorex, Valentine** 1629–83
Irish physician, the 'touch doctor'
He was born in Affane, County Waterford, and from 1649 to 1656 was an officer in the Parliamentary army in Ireland. From 1662 he became famous for curing 'king's evil' and all manner of diseases by 'touching' or 'stroking'. He failed at Whitehall before the king in 1666, but his gratuitous cures were attested by ROBERT BOYLE, RALPH CUDWORTH, HENRY MORE, and others. He replied to scepticism in his *Brief Account* (1666).

Greaves, Jimmy (James Peter) 1940–
English footballer
Born in East Ham, London, he started his career with Chelsea in 1957 and became the youngest player to score 100 English league goals. After a brief spell with AC Milan he joined Tottenham, scoring prolifically during a successful period in which the club won two FA Cups and one European Cup Winners' Cup. He had an outstanding record of 44 goals in 57 games for England, but missed his country's greatest triumph in the final of the 1966 World Cup, having been dropped in favour of GEOFF HURST. After a battle with alcoholism in the 1970s, he became a popular television personality in the 1980s.

Grechko, Andrei Antonovich 1903–76
Soviet marshal and politician
He fought in the cavalry during the civil war which followed the Revolution of October 1917, and held several cavalry commands in the first half of World War II. As commander-in-chief in East Germany he helped put down the Berlin rising (1953), and he was commander-in-chief of the Warsaw Pact when the Berlin Wall was erected (1961). He became minister of defence in 1967 and a politburo member in 1973. In the debate about East–West détente he was regarded as a hardliner.

Greco, El, *properly* **Domenico Theotocopoulos** 1541–1614
Spanish painter
Born in Candia, Heraklion, Crete, of Greek descent, he studied in Italy, possibly as a pupil of TITIAN. Around 1570 he painted a *View of Mount Sinai and the Monastery of St Catherine* (Historical Museum of Crete, Heraklion, the sole example of his painting to be found in his native Crete). He is known to have settled in Toledo about 1577, when he was commissioned to execute the decorations for the new church of S Domingo el Antiguo, the centrepiece being the *Assumption of the Virgin* (1577, now at Chicago). He became a portrait painter whose reputation fluctuated because of the suspicion which greeted his characteristic distortions. His painting is a curious blend of Italian Mannerism and Baroque rhythm, with elongated flame-like figures, arbitrary lighting and colour, and, in his later pictures, almost Impressionist brushwork. The most famous of his paintings is probably the *Burial of Count Orgaz* (1586) in the Church of S Tomé, Toledo. Many of his works are to be seen in Toledo (Museo del Greco). His *Crucifixion* and *Resurrection* (1604) are held in the Prado, Madrid, his *Self-portrait* and *View of Toledo* (c.1600–1610) are in New York, and the National Gallery, London, has a version of the *Purification of the Temple* (c.1600). 🕮 F Marías, *El Greco: Biographie d'un peintre extravagant* (1997); David Davies and John Elliott, *El Greco* (2003)

Gréco, Juliette 1927–
French singer and actress
Born in Montpellier, she began her career in Left Bank clubs at the end of World War II. In 1949, at the height of existentialism, she made her first cabaret appearance at Le Boeuf sur le Toit, establishing herself as the archetypal interpreter of world-weary lyrics, delivered in a half-sung, half-spoken style. She recorded many songs by JACQUES PRÉVERT and Josef Kosma (notably '*Les feuilles mortes*', 'Dead Leaves'), Charles Aznavour ('*Je hais les dimanches*', 'I Hate Sundays') and above all Jacques Brel ('*Je suis bien*'). She had a much-publicized relationship with MILES DAVIS. Her film appearances include *Au Royaume des cieux* (1949, 'In the Kingdom of Heaven'), *The Sun Also Rises* (1957) and *Crack in the Mirror* (1957). 🕮 Bertrand Dicale, *Gréco: les vies d'une chanteuse* (2001)

Greeley, Horace 1811–72
US editor and politician
Born in Amherst, New Hampshire, he worked as a printer. He went to New York in 1831, started the weekly *New Yorker* in 1834 and in 1841 the daily *New York Tribune*, of which he was the leading editor until his death, exerting a supreme influence on US opinion. The *Tribune* was at first Whig, then anti-slavery Whig, and finally extreme Republican; it advocated, to a certain extent, the social theories of CHARLES FOURIER. Greeley published in the *Tribune* his 'Prayer of Twenty Millions', and within a month the Emancipation Proclamation was issued. After ROBERT E LEE's surrender he advocated a universal amnesty, and his going to Richmond and signing the bail-bond of JEFFERSON DAVIS awakened a storm of public indignation. In religious faith he was a Universalist. He was an unsuccessful Liberal Republican candidate in 1872 for the presidency. 🕮 Robert C Williams, *Horace Greeley: Champion of American Freedom* (2006)

Greely, Adolphus Washington 1844–1935
US explorer
Born in Newburyport, Massachusetts, he was a volunteer in the Civil War, and later joined the regular army as lieutenant. In 1881 he conducted a US expedition to Smith Sound to set up a meteorological station, during which one of the team travelled to within 396 miles (638km) of the North Pole, the farthest point reached at that time. The relief boat failed to turn up in 1883, and when rescue came in 1884, only six of the party of 25 were still alive. In 1887 Greely became chief of the signal service.

Becoming major-general in 1906, he retired in 1908 and was awarded the Congressional Medal of Honour in 1931.

Green, George 1793–1841
English mathematician and physicist
Born in Sneinton, near Nottingham, he was largely self-taught and in 1828 published a pamphlet entitled *An Essay on the Application of Mathematical Analysis to the Theories of Electricity and Magnetism*, containing Green's theorem and Green's functions. Green's theorem relates integrals taken over a volume with those taken over the surface enclosing that volume, and has valuable implications for potential theory. His functions are a valuable technical tool for solving partial differential equations. He went to Caius College, Cambridge, in 1833, published several papers on wave motion and optics, and was elected a Fellow of the college in 1839. Green's theorem was made known to European mathematicians through JOSEPH LIOUVILLE, and his *Mathematical Works* (1850–54) were edited by William Thomson (later Lord KELVIN). 🕮 D M Cannell, *George Green: Mathematician and Physicist 1793–1841* (1993)

Green, Henry, *pseudonym of* **Henry Vincent Yorke** 1905–73
English novelist
Born in Tewkesbury, Gloucestershire, and educated at Oxford, he became managing director in his father's engineering company in Birmingham, but pursued a parallel career as a novelist. His first novel, *Blindness* (1926), was published while he was still an undergraduate. *Living* (1929) gave a unique insight into life on the factory floor in Birmingham. An elliptical and highly stylized writer, he was partial to terse and sophisticated titles, such as *Party Going* (1939), *Caught* (1943), *Loving* (1945), *Back* (1946), *Concluding* (1948), *Nothing* (1950) and *Doting* (1952). He was a contemporary of ANTHONY POWELL and EVELYN WAUGH, and like IVY COMPTON-BURNETT he relies heavily on dialogue, plot being conspicuous only by its absence. His influence and reputation extended beyond the literary cognoscenti, and his writing was much admired in Europe. *Pack My Bag: A Self Portrait* (1940) is autobiographical.

Green, John Richard 1837–83
English historian
Born in Oxford, he was educated at Magdalen School and Jesus College there. He took orders and became curate and vicar of two East End London parishes, and also contributed historical articles to the *Saturday Review*. In 1868 he became librarian at Lambeth, but the next year developed tuberculosis, which made all active work impossible. Thus he began his *Short History of the English People* (1874), the first complete history of England from the social side related to geography and the antiquities. Its instant success encouraged a larger edition, *A History of the English People* (1877–80). His *Making of England* (1881) and the *Conquest of England* (1883) are fragments of an intended history of early England.

Green, Julien 1900–98
French novelist
Born in Paris, of US parents, and educated partly in the USA, he was bilingual, and became a convert to Catholicism. He began a successful series of psychological studies in a melancholy vein, written in French but later translated, with *Mont-Cinère* (1926, Eng trans *Avarice House*, 1927 (US); 1928 (UK)). His other works include *Adrienne Mesurat* (1927, Eng trans *The Closed Garden*, 1928), *Léviathan* (1929, Eng trans *The Dark Journey*, 1929), which won the Harper Prize Novel contest, and *Moïra* (1950, Eng trans 1951). He also published a series of *Journals*, the first eight of which were translated in two volumes as *Journal 1928–66* in 1969. *Memories of Happy Days* (1942) and *Memories of Evil Days* (1976), both written in English, also describe his life. A later publication was the novel *Dixie* (1995). 🕮 G S Burne, *Julien Green* (1972)

Green, Lucinda, *née* **Prior-Palmer** 1953–
British three-day eventer
Born in London, she won the Badminton Horse Trials a record six times (1973, 1976–77, 1979, 1983–84), and the Burghley Horse Trials in 1977 and 1981. At the European championships she won an individual gold medal in 1975 and 1977, a team gold in 1977, 1985 and 1987, and an individual and team silver in 1983. She was the 1982 world champion on Regal Realm, when she also won a team gold medal. Since retiring from international competition in 1987, she has worked as a commentator and instructor.

Green, Michael Boris 1946–
English theoretical physicist
Born in London, he was educated at Cambridge, studied at the Institute for Advanced Study at Princeton University (1970–72), and from 1972 to 1977 worked at Cambridge. He was then a Science and Engineering Council Advanced Fellow at Oxford from 1977 to 1979, became professor at Queen Mary and Westfield College, London, in 1985, and returned to Cambridge in 1993 as John Humphrey Plummer Professor of Theoretical Physics. With John H Schwarz and Edward Witten, he was the founder of superstring theory. This is based on the idea that the ultimate constituents of nature, when inspected at very small scales, do not exist as point-like particles but as 'strings', in not three dimensions but ten. String theories are now considered very good candidates for the actual laws of physics at the ultimate small scale. His awards for this work include the Maxwell Medal (1987) and the Dirac Medal and Prize (2005), both awarded by the Institute of Physics, the William Hopkins prize of the Cambridge Philosophical Society (1987), the Dirac Medal of the International Centre for Theoretical Physics (1989) and the American Physical Society's Dannie Heineman Prize (2002). He was elected FRS in 1989.

Green, Sir Philip 1952–
English entrepreneur
Born in Croydon, south London, he left school at 15 to begin working in retail. He took over his family's property company in 1973, and subsequently built up his business empire and personal wealth by purchasing ailing clothing retail businesses at low prices and turning them around to generate profits. He is best known for his purchase and rapid transformation of the Bhs chain (2000) and the Arcadia Group (2002), which includes the TopShop, Dorothy Perkins, Evans and Burton chains. He was knighted in 2006.

Green, William 1873–1952
US labour leader
Born in Coshocton, Ohio, the son of a coal miner, he became a miner himself at the age of 16, and he rose through the ranks of the United Mine Workers of America (UMW) to become president of the American Federation of Labor (AFL) in 1924. He held the post for the rest of his life and is remembered for his effort to eliminate radicalism from the labour movement. He led the AFL's struggle with the more militant Congress of Industrial Organizations (CIO), expelling the CIO unions in 1936 and breaking with his former mentor, UMW president JOHN L LEWIS.

Greenaway, Kate (Catherine) 1846–1901
English artist and book illustrator
Born in London, she started publishing her popular portrayals of child life in 1879 with *Under the Window*, followed by *The Birthday Book* (1880) and *Mother Goose* (1881). The Greenaway Medal is awarded annually for the best British children's book artist. 🕮 Rodney K Engen, *Kate Greenaway* (1976)

Greenaway, Peter 1942–
English film-maker and artist
Born in Newport, Gwent, he trained as a painter, and first exhibited at the Lord's Gallery in 1964. Employed at the Central Office of Information (1965–76), he worked as an editor and began making his own short films. He later gained a reputation for originality and invention on the international festival circuit with such works as *A Walk Through H* (1978) and *The Falls* (1980) before *The Draughtsman's Contract* (1982) won him critical acclaim and a wider audience. He has subsequently pursued a prolific career utilizing ravishing visual composition, a painterly sense of colour and the distinctive music of MICHAEL NYMAN to explore such preoccupations as sex, death, decay and gamesmanship in films like *The Belly of an Architect* (1987), *Drowning by Numbers* (1988) and *The Cook, The Thief, His Wife and Her Lover* (1989). His *Prospero's Books* (1991) was based on *The Tempest* and starred JOHN GIELGUD. Later films include *The Baby of Mâcon* (1993) and *The Pillow Book* (1996). Now resident in the Netherlands, he continues to hold and curate exhibitions and publish art books.

Greene, (Henry) Graham 1904–91
English writer
Born in Berkhamsted, Hertfordshire, he was educated at Berkhamsted School, where his father was headmaster. In *A Sort of Life* (1971), the first of two autobiographies (*Ways of Escape*, the second volume, appeared in 1980), he recounts how he played Russian roulette and how, aged 13, he tried to cut open his leg with a penknife. He went to Balliol College, Oxford, and while there published *Bubbling April* (1925), a collection of verse. He became a Roman Catholic in 1926 and became a journalist with *The Times*. He married in 1927 and was later separated but not divorced. His first novels, *The Man Within* (1925), *The Name of Action* (1930) and *Rumour at Nightfall*

(1932), made little impression and he subsequently disowned them, though he later allowed the first to be included in the Collected Edition. *Stamboul Train* (1932) was his first fully successful novel, although he termed it an 'entertainment'. Like many of his subsequent novels it is sombrely romantic, fusing tragedy and comedy in a peculiar no-man's land that critics christened 'Greeneland'. *It's a Battlefield* (1934) and *England Made Me* (1935) are likewise 'entertainments'. A prolific writer, he wrote a great number of novels, stories, plays and biographies as well as film criticism. He was the film critic for *Night and Day*, and was partly responsible for its demise when the magazine was successfully sued after he had accused Twentieth Century Fox of 'procuring' SHIRLEY TEMPLE 'for immoral purposes'. His career as a so-called Catholic novelist began with *Brighton Rock* (1938), a thriller which asserts that human justice is inadequate and irrelevant to the real struggle against evil. A recurring theme in his work, this is explored in some of his other Catholic novels – *The Power and the Glory* (1940), *The Heart of the Matter* (1948) and *The Quiet American* (1955) – whose unorthodoxy often led him into controversy with the Church's hierarchy. Other notable novels include *The Third Man* (1950, filmed by CAROL REED), *The End of the Affair* (1951), *Our Man in Havana* (1958), *A Burnt-Out Case* (1961), *The Comedians* (1965), *Travels with My Aunt* (1969), *The Honorary Consul* (1973), *The Human Factor* (1978), *Doctor Fischer of Geneva* (1980), *Monsignor Quixote* (1982) and *The Captain and the Enemy* (1988). The multifarious settings reflect his wanderlust and his fascination with uncomfortable countries – Argentina, the Congo, Mexico, Vietnam – as well as his seeming disregard for his personal safety. He settled in Antibes in 1966, where he lived for the rest of his life. In 1982 he broke his relative seclusion by publishing an incendiary pamphlet, *J'Accuse*, which brought him into conflict with the local authorities in Nice. He published travel books: *Journey without Maps* (1936), *The Lawless Roads* (1939) and *In Search of a Character: Two African Journals* (1961). The *Collected Essays* appeared in 1969 and the *Collected Stories* in 1972. His plays include *The Living Room* (1953), *The Potting Shed* (1957) and *The Complaisant Lover* (1959). *A World of My Own – A Dream Diary* was published in 1992. Few modern writers have his range and power, critical acclaim and popular success. He is often cited by his peers as the greatest novelist of his time, although there are dissenting voices from that judgement, including that of ANTHONY BURGESS. 🕮 Norman Sherry, *The Life of Graham Greene* (3 vols, 1989–2005)

Greene, Sir Hugh Carleton 1910–87
English journalist and television executive
He was born in Berkhamsted, Hertfordshire, and after studying at Merton College, Oxford, he moved to Germany, working as a foreign correspondent for the *Daily Herald* and later *The Daily Telegraph* (1934–39). He joined the BBC (1940) to work on propaganda broadcasts to Germany, and in 1946 he became controller of broadcasting in the British zone of Germany and rebuilt the country's peacetime radio service. He worked with the BBC's Overseas Service (1952–56) and was the BBC's first director of news and current affairs (1958–60) before becoming director-general (1960–69). He encouraged the BBC to compete with Independent Television and he created a liberal climate in which programme makers flourished. He was the brother of GRAHAM GREENE. 🕮 Michael Tracey, *A Variety of Lives: A Biography of Sir Hugh Greene* (1983)

Greene, Maurice 1974–
US athlete
Born in Kansas City, Missouri, he began training as a runner aged eight and subsequently dominated the 100-metre event in international competition. He won his first gold medal in the 100 metres at the world championships in 1997 and was world champion again in 1999 (in which year he became the only athlete to win both the 100 metres and 200 metres in the same world championship) and in 2001. In 2000 he added Olympic gold in the 100 metres, as well as winning in the 4 × 100-metres relay. He has held world records in the 100 metres, the 50 metres and the 60-metres indoor dash.

Greene, Nathanael 1742–86
American soldier
Born in Warwick, Rhode Island, he was a Quaker farmer's son. At the Battle of Brandywine (September 1777) he commanded a division and saved the American army from complete destruction. In 1780 he succeeded HORATIO GATES in command of the army of the South, which had just been defeated by CHARLES CORNWALLIS, and improved its condition. Although defeated by Cornwallis at Guilford Courthouse (March 1781) he conducted a masterly retreat into South Carolina, which, with Georgia, was rapidly retaken, until at Eutaw Springs (September 1781) the war in the South was ended in what was virtually an American victory. A general second perhaps only to GEORGE WASHINGTON, he died at Mulberry Grove, Georgia. 🕮 George Greene, *Life of Nathanael Greene* (3 vols, 1867–71)

Greene, Robert 1558–92
English dramatist
Born in Norwich, Norfolk, and educated at Cambridge, he wrote plays and romances. The latter are often tedious and insipid, but they abound in beautiful poetry. One of them, *Pandosto* (1588), supplied SHAKESPEARE with hints for the plot of *The Winter's Tale*. The most popular of his plays was *Friar Bacon and Friar Bungay* (c.1591). As Greene helped to lay the foundations of the English drama, even his worst plays are valuable historically. After his death the pamphlet entitled *The Repentance of Robert Greene, Master of Arts*, appeared, in which he lays bare the wickedness of his former life. His *Groatsworth of Wit bought with a Million of Repentance* (1592) contains one of the few authentic contemporary allusions to Shakespeare. 🕮 W H Chapman, *William Shakespeare and Robert Greene: The Evidence* (1912)

Greenfield, Susan Adele, Baroness Greenfield of Ot Moor 1950–
English pharmacologist and neuroscientist
Born in London, she initially studied classics and philosophy at St Hilda's College, Oxford, but graduated in experimental psychology (1973) and was awarded a DPhil (1977). In 1998 she was made director of the Royal Institute of Great Britain, and is currently Fullerian Professor of Physiology and a senior fellow in pharmacology at Lincoln College, Oxford. As well as being active in academic research, she is involved in science policy and promoting the public understanding of science; she was the first woman to give the Royal Institution Christmas Lectures (1994), and her popular science books include *The Private Life of the Brain* (2002). She was awarded a CBE in 2000 and a life peerage in 2001.

Greengard, Paul 1925–
US biochemist and Nobel Prize winner
Born in New York, he was educated at Johns Hopkins University, Baltimore, and undertook (1953–59) post-doctoral studies in biochemistry at the University of London, at Cambridge University, at the National Institute for Medical Research, UK, and at the National Institute of Health in Bethesda, Maryland. He was director of the department of biochemistry at the Geigy Research Laboratories at Ardsley, New York (1959–67), and subsequently worked at the Albert Einstein College of Medicine, New York (1961–70), and at the Yale University School of Medicine (1968–83) before becoming head of the Laboratory of Molecular and Cellular Neuroscience at Rockefeller University, New York (from 1983). He is currently the Vincent Astor professor there. In 2000 he shared the Nobel Prize in physiology or medicine with ARVID CARLSSON and ERIC KANDEL for their research into signal transduction in the nervous system, which enabled the development of a range of new drugs. He used his share of the prize money to fund a new prize for women scientists, against whom he believes the profession discriminates.

Greenhow, Rose O'Neal 1817–64
US Confederate spy
Born in Port Tobacco, Maryland, she married the doctor and historian Robert Greenhow, and lived in Washington, DC, during the Civil War. As a society hostess she overheard information regarding Union troop movements which she is reputed to have passed to the Confederate government. She was placed under house arrest in 1861 and later exiled to the Confederacy (1862). She ran the blockade and travelled to England and France representing the Confederate states, but her ship foundered on her return and she drowned off the North Carolina coast. She published *My Imprisonment and the First Year of Abolition Rule at Washington* (1863).

Greenough, Horatio 1805–52
US sculptor and writer
Born in Boston, Massachusetts, he spent two years at Harvard, then moved to Italy (1825), becoming a leading member of the US artistic colony there. His principal work is a colossal statue in classical style of GEORGE WASHINGTON as Zeus, commissioned for the Capitol Rotunda but now in the Smithsonian Institution, Washington. His advanced views on functionalism and freedom from ornament in design, as expressed in his *Travels, Observations and Experience of a Yankee Stonecutter* (1852),

probably influenced the architectural ideas of LOUIS SULLIVAN and FRANK LLOYD WRIGHT.

Greenspan, Alan 1926–
US businessman and financier
Born in New York City, he became president and chief executive officer of Townsend-Greenspan and Co. Inc., New York City (1954–74, 1977–87). He was consultant to the US Treasury and to the Federal Reserve Board (1971–74). He has been a consultant to the congressional budget office since 1977, and was a member of the president's economic policy advisory board from 1981 to 1989. A free-market economist, he served as chairman of the board of governors of the Federal Reserve Bank for an unprecedented five terms (1987–2006), favouring tight monetary policies to keep inflation in check.

Greenway, Francis Howard 1777–1837
Australian architect
Born in Mangotsfield, Gloucestershire, England, into a West Country family of builders and stonemasons, he was a student of JOHN NASH. He set up his own architecture firm but went bankrupt and in 1812 he was transported for forgery, arriving in Sydney two years later. He was soon given parole and established himself in practice as an architect in the town. Governor LACHLAN MACQUARIE appointed him civil architect, and Greenway designed most of the early colony's public buildings. He made effective use of local material and the best remaining examples of his work, including St James's Church, Sydney, and St Matthew's Church, Windsor, New South Wales, are elegant examples of the Georgian style. Later, his abrasive manner caused him to lose his influential supporters, but he has since been depicted on the Australian $10 note.

Greenwood, Arthur 1880–1954
English politician
Born in Leeds and educated at the university there, he became a wartime member of LLOYD GEORGE's secretariat. He became an MP in 1922 and deputy leader of the parliamentary Labour Party in 1935, showing himself an outspoken critic of 'appeasement'. In the 1940 government he was minister without portfolio, and in 1945 he became Lord Privy Seal, resigning from the government in 1947. He remained treasurer of the Labour Party, of whose national executive he became chairman in 1953. He did much to shape Labour's social policies. His son, Anthony Greenwood (1911–82), was also a Labour MP, entering Parliament in 1946.

Greenwood, Joan 1921–87
English actress
Born in Chelsea, London, she studied at RADA before making her stage debut in MOLIÈRE's *Le Malade Imaginaire* (1938, 'The Hypochondriac'). Her film debut came in *John Smith Wakes Up* (1940) and her early theatre work included *The Women* (1939) and *Peter Pan* (1941–42). She toured with the Entertainment National Service Association (ENSA) during World War II and afterwards joined DONALD WOLFIT's company. She was a woman of distinctive style, and her husky tones, wit and sensuality were evident in both classical roles and contemporary femmes fatales. Her film credits include the influential and enduring Ealing comedies *Whisky Galore* (1948), *Kind Hearts and Coronets* (1949) and *The Man in the White Suit* (1951). Later stage successes include *Lysistrata* (1957), *Hedda Gabler* (1960) and *Oblomov* (1964). Later films were *Tom Jones* (1963) and *Little Dorrit* (1987). She married actor André Morell in 1960.

Greenwood, Walter 1903–74
English writer
He was born in Salford, Lancashire, of working-class parents, and educated at the local grammar school. His novel *Love on the Dole* (1933), inspired by his experiences of unemployment and depression in the early 1930s, made a considerable impact as a document of the times and was subsequently dramatized. He also wrote other novels with a social slant, and several plays.
🕮 *There Was a Time* (1967)

Greer, Germaine 1939–
Australian feminist and author
Born in Melbourne, she attended the universities of Melbourne, Sydney and Cambridge, becoming a lecturer in English at Warwick University (1968–73). Her controversial and successful book *The Female Eunuch* (1970) portrayed marriage as a legalized form of slavery for women, and attacked the denial and misrepresentation of female sexuality by male-dominated society. From 1989 to 1998 she was special lecturer and unofficial Fellow at Newnham College, Cambridge. In 1998, she returned to Warwick University as professor of english and comparative studies. She is a regular contributor to newspapers and periodicals and a frequent television panellist. Her later works include *The Whole Woman* (1999), *The Beautiful Boy* (2003) and *Whitefella Jump Up: The Shortest Way to Nationhood* (2004).

Greg, William Rathbone 1809–81
English essayist
Born in Manchester, he became the manager of mills at Bury, then a commissioner of customs (1856) and comptroller of HM Stationery Office (1864–77). His numerous essays on political and social history were collected in *Essays on Political and Social Science* (1854), *Literary and Social Judgments* (1869) and *Miscellaneous Essays* (1884). His *Rocks Ahead* (1874) took a highly pessimistic view of the future of Great Britain, anticipating with foreboding the political supremacy of the lower classes, industrial decline and the divorce of intelligence from religion.

Gregg, John Robert 1867–1948
US publisher, inventor of the 'Gregg shorthand system'
He was born in Shantonagh, County Monaghan, Ireland. While working in Liverpool he invented a new shorthand system, published in *Light Line Phonography* and the *Gregg Shorthand Manual* (1888). Emigrating to the USA in 1893, he established the Gregg Publishing Company. He published *Gregg Speed Studies* (1917), and also founded the *American Shorthand Teacher* in 1920 (later renamed *American Business World*).

Gregg, Sir Norman McAlister 1892–1966
Australian ophthalmologist
Born in Burwood, Sydney, he was educated at Sydney University, and served with the Royal Australian Medical Corps in World War I, winning the MC in France. He later studied ophthalmology in London before returning to Sydney. After an epidemic of German measles there in 1939, his research proved the link between the incidence of that illness in pregnancy and cataracts or blindness in children.

Grégoire, Henri 1750–1831
French prelate and revolutionary
Born in Vého, Lorraine, he took orders and was sent to the Estates General of 1789 as a deputy of the clergy. The first of his order to take the oaths of loyalty to the new constitution, he was elected 'constitutional bishop' of Loir-et-Cher (1790). After the 18th Brumaire, he became a member of the Corps Législatif, and the Concordat (1801) forced him to resign his bishopric. He died unreconciled with the Church. Among his works are *Essai sur la régénération des juifs* (1789, 'Essay on the Regeneration of the Jews'), which became widely popular, *Histoire des sectes religieuses* (1814, 'History of the Religious Sects') and *L'Eglise gallicane* (1818, 'The Gallic Church').

Gregor, William 1761–1817
English chemist and clergyman
Born in Trewarthenick, Cornwall, he analysed local minerals, particularly the sand known as ilmenite, in which he discovered titanium.

Gregory, St, *known as* **the Illuminator** c.240–332 AD
Armenian Christian
Born in Cappadocia, of Armenian parents, he is said to have been of the royal Persian race of the Arsacids. Known as 'the Apostle of Armenia', he was kept a prisoner for 14 years by Tiridates III for refusing to condone idolatry but, after converting the king (AD 301), he was made patriarch of his country.

Gregory I *See panel p660*

Gregory II, St 669–731
Italian pope
Born in Rome, he was elevated in 715. The authority of the Eastern emperors had shrunk in the West into little more than a name, and the draconian measures of Emperor Leo the Isaurian against image worship weakened the tie even more. Gregory protested strongly against the imperial policy, the result being a notable increase of the political authority and influence of the popes in Italy. Under Gregory's auspices, St BONIFACE began to carry out his missionary work in Germany. His feast day is 11 or 13 February.

Gregory III d.741
Syrian pope
Born in Syria, he became pope in 731, succeeding GREGORY II, and excommunicated the Iconoclasts. The threat of the Lombards became so formidable that, the Eastern emperors being powerless to help, the Romans compelled Gregory to send a deputation to CHARLES MARTEL, asking for his help, and offering to make him a consul of Rome. This offer is of historical

Gregory I, *known as* **Gregory the Great** c.540–604
Pope (from 590) and saint, a Doctor of the Church

Gregory was born in Rome and though appointed by JUSTIN II as praetor of Rome, he relinquished this office, distributed his wealth among the poor and withdrew into a monastery at Rome. It was while he was here that he is said to have seen some Anglo-Saxon youths in the slave-market, and to have been seized with a longing to convert their country to Christianity. He embarked on this but was called back, and Pelagius II sent Gregory as nuncio to Constantinople for aid against the Lombards.

Gregory reluctantly agreed to become pope on the death of Pelagius. He proved to be a great administrator, and during his period of office the Roman Church underwent a complete overhaul of its public services and ritual and the systematization of its sacred chants, from which arose the Gregorian chant. He entrusted the mission to convert the English to AUGUSTINE, and the Gothic kingdom of Spain, long Arian, was reconciled with Rome.

Gregory was tolerant towards heathens and Jews, and he used all his efforts to repress slave-dealing and to mitigate slavery. He is buried in St Peter's basilica, Rome, and his feast day is 12 March.

📖 In his writings the whole dogmatical system of the modern Church is fully developed. He left homilies on EZEKIEL, JOB and on the Gospels, the *Regulae Pastoralis liber* ('Book of Rules for Pastors'), and the *Sacramentarium* and *Antiphonarium*. See also Carole Straw, *Gregory the Great* (1988); F H Dudden, *Gregory the Great: His Place in History and Thought* (2 vols, 1905).

> *Scriptura sacra mentis oculis quasi quoddam speculum opponitur, ut interna nostra facies in ipsa videatur.*
>
> 'Holy scripture is placed before the eyes of our mind like a mirror, so that we may view our inner face therein.'
>
> – From *Moralia* in *Job*, bk 2, ch.1, section 1.

significance in that it failed to enlist the aid of Charles, but it was a step towards the independence of the West.

Gregory VII, St, *originally* **Hildebrand** c.1020–85
Italian pope
Born near Soana, Tuscany, he was educated at the monastery of St Maria, Rome. He became a cardinal in 1049. As pope (1073–85), he worked to change the secularized condition of the Church, which led to conflict with the Holy Roman Emperor HENRY IV, who declared Gregory deposed in a diet at Worms (1076), but then yielded to him after excommunication. In 1080 Henry resumed hostilities, appointing an antipope (Clement III), and after a siege took possession of Rome (1084). Gregory was freed by Norman troops, but was forced to withdraw to Salerno. He was canonized in 1606, and his feast day is 25 May.
📖 Allan J MacDonald, *Hildebrand: A Life of Gregory the Seventh* (1932)

Gregory IX, *originally* **Ugo** or **Ugolino de Segni** 1148/55–1241
Italian pope
He was the nephew of Pope INNOCENT III, by whom he was created cardinal-deacon in 1198. A strong supporter of the Franciscans and the Dominicans, he became pope in 1227 and constantly feuded with Emperor FREDERICK II of Germany, asserting the supremacy of papal power. After a phase of uneasy collaboration with the emperor, in which the pope supported him in his relations with the Lombard cities, while he supported the pope against opposition in Rome, a ferocious conflict broke out over Frederick's Constitutions of Melfi, which subjected Sicily to his will. Rome itself was under siege when the pope died. He was responsible for ordering the first authoritative collection of papal decretals (1234), which were to remain the basic source of canon law in the Catholic Church until 1917.

Gregory XI, *originally* **Pierre Roger de Beaufort** 1329–78
French pope
He became pope in 1370, and despite the opposition of France and his own family, he ended the Babylonian Captivity of the papacy, moving its seat from Avignon to its original place in Rome (1377). He was the last French pope, and the elections held after his death began the Great Schism.

Gregory XIII, *originally* **Ugo Buoncompagni** 1502–85
Italian pope
Born in Bologna, he studied at the university there and became professor of law (1531–39). He became one of the theologians at the Council of Trent, then in 1565 a cardinal and legate to Spain. As pope (1572–85), he did much to promote education, and endowed many of the colleges in Rome. His pontificate is notable for the correction of the calendar and the introduction of the Gregorian Computation in 1582, but his reputation was damaged by his ordering a *Te Deum* for the slaughter of French Protestants in the St Bartholomew's Day Massacre in 1572. Gregory published a valuable edition of the *Decretum Gratiani*.

Gregory XV, *originally* **Alessandro Ludovisi** 1554–1623
Italian pope
Born in Bologna, he became pope in 1621. He established the still-used procedure for papal elections, set up the congregation of the Propagation of the Faith, regained Moravia and Bohemia to the Roman faith, and canonized FRANCIS XAVIER, IGNATIUS LOYOLA and TERESA OF ÁVILA, among others.

Gregory XVI, *originally* **Bartolomeo Alberto Mauro Cappellari** 1765–1846
Austrian pope
Born in Belluno, Venetia, he went to the monastery of San Michele de Murano, near Venice, and became a member of the Camaldolese order. He was pope from 1831 and represented reaction and ultramontanism in a revolutionary period. He favoured the Jesuits, and increased the papal debt by spending on buildings and museums.

Gregory of Nazianzus or **Nazianzen, St** c.330–c.389 AD
Greek prelate and theologian
Born of Greek parents in Cappadocia, he was educated at Caesarea, Alexandria and Athens. He became a close friend of BASIL THE GREAT, and was made Bishop of Sasima, but withdrew to a life of religious study at Nazianzus. The Emperor THEODOSIUS I, the Great, made him patriarch of Constantinople (Istanbul) in AD 380, but he also resigned this in the following year. His theological works were largely concerned with upholding Nicene orthodoxy and include discourses, letters and hymns. His feast day in the West is 2 January.

Gregory of Nyssa AD 331–95
Greek Christian theologian
Born in Caesarea, Cappadocia, he was consecrated Bishop of Nyssa in Cappadocia (c.371 AD) by his brother BASIL THE GREAT. During the persecution of the adherents of the Nicene Creed in the reign of Valens, Gregory was deposed, but on the death of Valens was welcomed back (AD 378). He was present at the Council of Constantinople in AD 381, and was appointed to share in the overseeing of the diocese of Pontus. He travelled to Arabia and Jerusalem to set in order the churches there, and was again at a synod in Constantinople (Istanbul) in AD 394. His chief works are his *Twelve Books against Eunomius*, a treatise on the Trinity, several ascetic treatises, many sermons, 23 epistles and his great *Catechetical Oration*.

Gregory of Tours c.538–94
Frankish prelate and historian
Born in Arverna (now Clermont), to a distinguished Roman family of Gaul, he made a recovery from sickness following a pilgrimage to the grave of St MARTIN of Tours. This led Gregory to devote himself to the Church, and he was elected Bishop of Tours in 573. As a supporter of Sigbert of Austrasia and his wife BRUNHILDE against Chilperic and his wife FREDEGOND, he was relentlessly persecuted. His *Historia Francorum* ('History of the Franks') is the chief authority for the history of Gaul in the 6th century. His *Miraculorum libri vii* is a hagiographical compilation.

Gregory, Augustus Charles 1819–1905
Australian surveyor and explorer
Born in Farnsfield, Nottingham, England, he went to Australia in 1829, joining the Western Australian Survey Department in 1841. He set out to explore a large area north of Perth in 1846 and discovered coal on the Irwin River. In 1848 he travelled inland from Shark Bay and found lead in the Murchison River. He then headed the Northern Australian expedition (1855–56),

instigated by the Royal Geographical Society and financed by the British government, which discovered new pastures along the reverse of the route of LUDWIG LEICHHARDT. In 1858 his explorations showed that many rivers drained into Lake Eyre and so solved the mystery of the South Australian Lakes. He was surveyor-general of the new state of Queensland (1859).

Gregory, Isabella Augusta, Lady, *née* **Persse** 1852–1932
Irish playwright
She was born at Roxborough House near Coole, County Galway, the daughter of a wealthy family. The Gregory family were nearby landowners, and in 1880 Augusta Persse married Sir William Henry Gregory (1817–92), who was governor of Ceylon (1872–77). After her husband's death, Lady Gregory furthered her study of Irish mythology and folklore, an interest which led in 1896 to her meeting W B YEATS. She shared his vision of a resurgent Irish drama and, with Yeats and the writer Edward Martyn (1859–1923), co-founded the Abbey Theatre, Dublin, which opened in 1904. Lady Gregory wrote or translated about 40 short plays about the Irish rural peasantry, including the comedy *Spreading the News* (1904), the patriotic *Cathleen ni Houlihan* (1902, with Yeats) and *The Rising of the Moon* (1907). *The Gaol Gate* (1906) is a tragedy, while *The White Cockade* (1905) and *The Deliverer* (1911) are history plays. She also translated MOLIÈRE and wrote versions of the Irish legends in dialect. She was a leading figure in the Irish literary revival, and her home at Coole Park became a focus for the movement. 🕮 Cólm Toibín, *Lady Gregory's Toothbrush* (2002)

Gregory, James 1638–75
Scottish mathematician
Born in Drumoak, Aberdeenshire, he graduated from Aberdeen University and went to London in 1662, and the following year published *Optica promota*, containing a description of the Gregorian reflecting telescope that he had invented in 1661. From 1664 to 1667 he was in Padua, where he published a book on the quadrature of the circle and hyperbola, giving convergent infinite sequences for the areas of these curves. In 1668 he became professor of mathematics at St Andrews University, before taking the chair at Edinburgh in 1674. Much of his later work was concerned with infinite series, a term which he introduced into the language.

Gregory, John Walter 1864–1932
English geologist and explorer
Born in London, he started his career (1887–1900) at the British Museum, London, before becoming the first professor of geology at the University of Melbourne (1900–04) and at the University of Glasgow (1904–29). He accompanied the first British East African Expedition, describing the Great Rift Valley of Kenya and Tanzania (1893), and subsequently visited the Middle East, Tibet and the Americas. Gregory wrote more than 300 geological papers on diverse topics such as corals, tectonics, glacial phenomena and the origin of oceans. His publications included *The Dead Heart of Australia* (1906), *The Rift Valleys and Geology of East Africa* (1921), *To the Alps of Chinese Tibet* (1923) and *Elements of Economic Geology* (1927). He was killed in the gorge of the River Urubamba in the Peruvian Andes.

Gregory Thaumaturgus c.213–c.270 AD
Roman Christian
Born in Neocaesarea in Pontus, he became a disciple of ORIGEN, and was consecrated Bishop of Neocaesarea. His *Ekthesis* ('Confession of Faith') is a summary of Origen's theology. The genuineness of two other treatises is doubtful. His *Panegyricus* (which contains an autobiography) is printed among the works of Origen. His name means 'wonder-worker' in Greek.

Greif, Andreas *See* GRYPHIUS, ANDREAS

Greig, John 1942–
Scottish footballer and manager
Born in Edinburgh, he spent his entire senior career, from 1960 to 1978, with Rangers, much of it as club captain. He won five league championships and six Scottish Cups while with the club, as well as the European Cup Winners' Cup in 1972. Winning 44 caps for Scotland, he was voted Scottish player of the year in 1966 and 1976. Retiring as a player in May 1978, he immediately became Rangers' manager, holding the post until 1983. He then became a radio football commentator, before returning to take up a position in Rangers' publicity department in 1990. He is remembered as a player for his inspirational captaincy, his fierce shot and his commanding defensive qualities.

Greig, Maysie Coucher, *properly* **Jennifer Greig Smith** 1901–71
Australian journalist and writer
Born in Sydney, she moved to England in 1920, writing short stories and serials for London newspapers. Her first romantic novel, *Peggy of Beacon Hill* (1920), was later filmed, and was followed by nearly 200 other novels. She was hugely popular in the circulating libraries until the 1950s, both under her own name and as Jennifer Ames.

Greig, Sir Samuel 1735–88
Scottish naval commander in the Russian navy
Born in Inverkeithing, Fife, he transferred to the Russian navy in 1763, just after the assumption of power by Empress CATHERINE II, and fought in the war with the Turks (1768–72) and the victory at Çesme (1770). Promoted to rear admiral (1770) and vice-admiral (1773), he reformed the fleet and led it in the Baltic War against Sweden (1788–90).

Grenfell, Joyce 1910–79
English entertainer
Born in London, she made her debut in *The Little Revue* in 1939. After touring hospitals with concert parties during World War II, she appeared in revue until the early 1950s, performing comic monologues. She later appeared in her own one-woman shows, such as *Joyce Grenfell Requests the Pleasure*. Her monologues gently mocked the habits and manners of the middle class, English schoolmistresses and ageing spinster daughters. She wrote her autobiography, *Joyce Grenfell Requests the Pleasure* (1976), and *George, Don't Do That* (1977).

Grenfell, Julian Henry Francis 1888–1915
English poet
Educated at Eton and Balliol College, Oxford, he was killed in World War I. He is remembered for his war poem 'Into Battle', which was published in *The Times* in 1915 and is often selected by anthologists. 🕮 V Meynell, *Julian Grenfell* (1917)

Grenfell, Sir Wilfred Thomason 1865–1940
English physician and missionary
He was born in Parkgate, Cheshire. An Oxford rugby blue and house surgeon to the London Hospital, he took a master mariner's certificate and became a medical missionary in the North Sea fisheries. In 1892 he went to Labrador and founded hospitals, orphanages and other social services as well as fitting out hospital ships for the fishing grounds. He was knighted in 1927.

Grenville, Sir Bevil 1596–1643
English soldier
Born in Brinn, Cornwall, he entered Parliament in 1621, and sided for some years with the popular party. From 1639 he espoused the king's cause, and helped defeat the Parliamentarians at Bradock Down (1643), but fell at the head of the Cornish Infantry in the Royalist victory of Landsdowne.

Grenville, George 1712–70
English politician
He practised as a lawyer and became an MP in 1741, rising to Lord of the Admiralty (1744–47), Lord of the Treasury (1747–54) and Treasurer of the Navy (1754–55, 1756–62). He was briefly secretary of state for the Northern Department (1762–63) and then became prime minister (1763–65). During his period in office, JOHN WILKES was arrested for seditious libel for his attack on the king's speech (1763). The closer supervision of revenue collection (1764–65) and Stamp Act (1765) began to alienate the American colonies from British rule. His tactlessness and clumsy handling of arrangements to cover a possible regency during GEORGE III's first serious illness (1765) led to his dismissal by the king, and he remained in opposition for the rest of his life.

Grenville, Kate 1950–
Australian novelist
She was born in Sydney, and educated at the University of Sydney and the University of Colorado. A collection of stories, *Bearded Ladies* (1984), was followed by her first novel, *Lilian's Story* (1986), which concerns an overweight woman and her struggles against society's conventions. In general, her writing has explored women's experiences in such novels as *Dreamhouse* (1986), *Joan Makes History* (1988), *Dark Places* (1994, US *Albion's Story*) and *The Idea of Perfection* (1999, Orange Prize 2001). *The Secret River* (2006), a historical novel dramatizing the conflict between convicts and Aboriginal people, won the 2006 Commonwealth Writer's Prize for best overall book.

Grenville, Sir Richard c.1541–1591
English naval commander
Born in Buckland Abbey, Devon, he fought in Ireland (1566–69) and Hungary. He was knighted (c.1577) and was an MP for Cornwall (1571–84). In 1585 he commanded the seven ships carrying his cousin WALTER RALEIGH's first colony to Virginia. He contributed three ships to the English fleet against the Spanish Armada (1588). In 1591, as commander of the *Revenge*, he fought alone against a large Spanish fleet off the Azores, dying of wounds on board a Spanish ship. 🕮 A L Rowse, *Sir Richard Grenville of the Revenge* (1937)

Grenville, William Wyndham Grenville, 1st Baron 1759–1834
English politician
The son of GEORGE GRENVILLE, he studied at Eton and Oxford, and became an MP in 1782. In 1783 he was paymaster-general, in 1789 speaker, and while home secretary (1790) was created baron. He became foreign secretary in 1791, and resigned, along with his cousin WILLIAM PITT, the Younger, in 1801 on the refusal of GEORGE III to assent to Catholic emancipation. In 1806 he formed the government of 'All the Talents' which, before its dissolution in 1807, abolished the slave trade. From 1809 to 1815 he acted along with Charles, 2nd Earl GREY, and generally supported GEORGE CANNING. 🕮 Peter Jupp, *Lord Grenville 1759–1834* (1985)

Gresham, Sir Thomas 1519–79
English financier and philanthropist
Born probably in London, the son of Sir Richard Gresham (c.1485–1549), he founded the Royal Exchange, and became Lord Mayor of London (1537). From Cambridge in 1543 he passed into the Mercers' Company, and in 1551 was employed as 'king's merchant' at Antwerp. In two years he paid off a heavy loan and restored the king's credit. As a Protestant he was dismissed by Queen MARY I, Tudor, but soon reinstated by Queen ELIZABETH I, who made him ambassador to the Netherlands (1559–61). In 1569, on his advice, the state borrowed money from London merchants instead of from foreigners. He made the observation, known as 'Gresham's Law', that of two coins of equal legal exchange value, that of the lower intrinsic value would tend to drive the other out of use. Having lost his only son, Richard, in 1564, from 1566 to 1568 he devoted a portion of his great wealth to building an exchange, in imitation of that of Antwerp. He made provision for founding Gresham College, London, and he left money for eight alms-houses.

Gresley, Sir (Herbert) Nigel 1876–1941
English locomotive engineer
Born in Edinburgh, he was the foremost British locomotive designer for 30 years from 1911, creating such classic trains as the streamlined 'Silver Jubilee' and 'Coronation' in the mid-1930s. His A4 class Pacific 4-6-2 'Mallard' achieved a world record speed for a steam locomotive of 126mph (201.5kph) in July 1938 – a speed which has never been exceeded.

Grétry, André Ernest Modeste 1741–1813
French composer
Born in Liège, Belgium, he settled in Paris in 1767. He was the composer of over 40 comic operas, of which *Le Huron* (1768) and *Lucile* (1769) were the earliest, and among the best known are *Raoul* and *Richard Cœur-de-Lion* (1784, 'Richard the Lionheart'). He became inspector of the Paris Conservatoire and a member of the Institute. He published his memoires in 1796.

Gretzky, Wayne 1961–
Canadian ice-hockey player
Born in Brantford, Ontario, he played for the Edmonton Oilers (1978–88), then joined the Los Angeles Kings (1988–96) and signed with the New York Rangers in 1996 after a brief stint with the St Louis Blues. He set numerous records, including most goals scored in a season (92 in 1981–82) and most points scored in a National Hockey League career (2,857). Nine times named the NHL's Most Valuable Player (1980–87, 1989), he is nicknamed the Great One and considered the greatest player in the history of the game. He retired in 1999. 🕮 Ted Ferguson, *Superkid Wayne Gretzky 99* (1983)

Greuze, Jean Baptiste 1725–1805
French genre and portrait painter
Born in Tournus, near Mâcon, he painted Italian subjects after a visit to Italy (1755), but he is seen at his best in such studies of girls as *The Broken Pitcher* in the Louvre, Paris, and *Girl with Doves* in the Wallace Collection, London. He died in poverty.

Greville, Charles Cavendish Fulke 1794–1865
English diarist
He was educated at Christ Church, Oxford, and became private secretary to Earl Bathurst, and was clerk of the privy council (1821–59). His position gave him good opportunity to study court and public life, which is reflected in his noted *The Greville Memoirs* (1875–87), and also in his *Letters* (1924) and *The Greville Diary* (1927).

Greville, Sir Fulke, 1st Baron Brooke 1554–1628
English poet and courtier
Born in Beauchamp Court, Warwickshire, he was educated at Shrewsbury and Jesus College, Cambridge. A friend of Sir PHILIP SIDNEY and a favourite of ELIZABETH I, he held many important offices, including Secretary for Wales (1583–1628) and Chancellor of the Exchequer (1614–21). He was created baron in 1620. He wrote several didactic poems, over a hundred sonnets and two tragedies, one of which was *The Tragedy of Mustapha* (1609), printed in 1633. His best-remembered work is his *Life of the Renowned Sir Philip Sidney* (published 1652) with its vivid pictures of contemporary figures. He was murdered by an old retainer who thought himself cut out of his master's will. 🕮 R A Rebholz, *The Life of Fulke Greville* (1971)

Gréville, Henry, *pseudonym of* **Alice Durand**, *née* **Fleury** 1842–1902
French novelist
Born in Paris, she accompanied her father in 1857 to St Petersburg, and wrote novels portraying Russian society.

Grévy, François Paul Jules 1807–91
French politician
The vice-president of the Constituent Assembly of 1848, he opposed NAPOLEON III, and after the coup d'état retired from politics. In 1871 he was elected president of the National Assembly and in 1879 he became president of the Republic. Re-elected in 1885, he resigned in 1887 after a financial scandal involving his son-in-law.

Grew, Nehemiah 1641–1712
English botanist and physician
Born in Atherstone, Warwickshire, and educated at the universities of Cambridge and Leyden, he practised at the universities of Coventry and London, and was author of *Comparative Anatomy of the Stomach and Guts* (1681) and of the pioneering *Anatomy of Plants* (1682). In this work he used the microscope to elucidate plant structure and gave the first complete account of plant anatomy, and it remained the most significant and authoritative work in this field for more than 150 years. He discovered some of the crucial differences between plant root and stem tissue, described in detail the complex folding of unexpanded leaves in buds, and accepted the idea that the stamen is the male organ of the plant. As well as making enormous contributions to anatomy and physiology, his analytical studies presaged the development of phytochemistry.

Grey, Dame Beryl, *stage name of* **Mrs Beryl Svenson** 1927–
English ballerina
Born in London, she won a scholarship to Sadler's Wells Ballet School at the age of nine. Her first solo appearance at Sadler's Wells Theatre was in the part of Sabrina in *Comus* (1941). The youngest Giselle ever at the age of 16, she was prima ballerina of the Sadler's Wells Ballet (1942–57), and also appeared with the Bolshoi Ballet in Russia (1957–58) – the first English ballerina to do so – and the Chinese Ballet in Peking (1964). She was artistic director (1968–79) of the London Festival Ballet (now English National Ballet) and became its president in 2005. Her publications include *My Favourite Ballet Stories* (1981). She was created DBE in 1988. 🕮 David Gillard, *Beryl Grey, an Autobiography* (1977)

Grey, Charles, 2nd Earl 1764–1845
English statesman
He was born in Fallodon, Northumberland, and educated at Eton and King's College, Cambridge. He joined the Whig Opposition in parliament in 1786, and wasted little time in attacking the government of WILLIAM PITT, the Younger, for its domestic and foreign policies and its union with Ireland in particular. On the Whigs' return to power in 1806, he became first lord of the Admiralty and, as foreign secretary on the death of CHARLES FOX, piloted the abolition of the African slave trade. After succeeding his father to the earldom in 1807, he withdrew from doing battle in the Commons, but after the 1830 general election returned as prime minister of the new Whig administration. He introduced his first Reform Bill a year later, and after its defeat and the dissolution of Parliament, he

returned even more resolved to secure its provisions. When the second bill was carried by the Commons but rejected by the Lords, there were violent demonstrations, and Grey piloted a third attempt that reached its second reading in the Lords but collapsed when ministers resigned over its disenfranchisement clauses. After the Duke of WELLINGTON failed to form a government, Grey returned as premier and persuaded WILLIAM IV to create a sufficient number of new peers to guarantee the legislation's adoption in the Upper House. His bill finally received royal assent in 1832, and Grey continued to lead the reformed parliament, extending his earlier anti-slavery measures to the colonies. However, a Cabinet split over reform of the Church of Ireland made Grey's position untenable, and he resigned in 1834. 🕮 E A Smith, *Lord Grey, 1764–1845* (1990)

Grey, Sir Edward, 1st Viscount Grey of Fallodon 1862–1933
English politician and diplomat
Born in London and educated at Balliol College, Oxford, he succeeded to the baronetcy of his grandfather, SIR GEORGE GREY (1799–1882), in 1882, and was elected a Liberal MP in 1885. He served as Foreign Secretary in the governments of CAMPBELL-BANNERMAN (1905–08) and ASQUITH (1908–16), negotiating an entente with Russia in 1907, backing France against Germany in the Agadir crisis of 1911 and concluding the secret treaty that brought Italy into World War I in 1915. Reserved and reclusive, he was criticized for maintaining secrecy about pre-war talks between the British and French military, thus creating confusion regarding Britain's readiness to support France if attacked by Germany. He was created a viscount in 1916. A keen ornithologist and fly fisherman, he published popular books on both subjects. 🕮 *Twenty-Five Years* (1925)

Grey, Sir George 1799–1882
English politician
Born in Gibraltar, the nephew of Charles, 2nd Earl GREY, he graduated from Oriel College, Oxford, and relinquished the law after succeeding his father in the baronetcy in 1828. MP for Devonport (1832–47) and under-secretary for the colonies (1834–35), he ably defended Lord JOHN RUSSELL's bill for the temporary suspension of the Lower Canadian constitution. In 1839 he became judge-advocate, in 1841 chancellor of the Duchy of Lancaster, and in 1846 home secretary. During the Chartist disturbances he discharged his duties with much vigour and discrimination. He carried the Crown and Government Security Bill, the Alien Bill, and a measure for the further suspension in Ireland of the Habeas Corpus Act (1849). In 1854 he became colonial secretary, and in 1855, under Viscount PALMERSTON, took his old post of home secretary. From 1859 he was chancellor of the Duchy of Lancaster, and home secretary again from 1861 to 1866.

Grey, Sir George 1812–98
British explorer and administrator
He was born in Lisbon, Portugal. He made two expeditions (1837, 1839) to the north-west of Western Australia, and was later appointed magistrate at King George Sound, where he produced a vocabulary of local Aboriginal dialects. In 1840 he was appointed governor of South Australia. His stringent reform of the colony's finances resulted in economic success, but led to his transfer to New Zealand as lieutenant-governor in 1845. In 1854 he became governor of Cape Colony and High Commissioner of South Africa, and in 1861 was sent back to New Zealand for a second term (1861–68), when he brought the Maori Wars to a close. He was a member of the New Zealand House of Representatives (1874–94) and premier (1877–79), before retiring to England in 1894.

Grey, Henry, 3rd Earl 1802–94
English politician
The son of Charles, 2nd Earl GREY, he entered Parliament in 1826 as Lord Howick, became under-secretary for the colonies in his father's ministry, retired in 1833, but was subsequently under-secretary in the home department, and in 1835 secretary for war. In 1841 he opposed Sir ROBERT PEEL's policy, in 1845 succeeded to the peerage, in 1846 became colonial secretary, and in 1852 published his *Defence of Lord John Russell's Colonial Policy*. He was an opposer of the Crimean War, and condemned DISRAELI's Eastern policy. In 1858 he issued his *Essay on Parliamentary Government as to Reform*, and then in 1867 his father's *Correspondence with William IV*.

Grey, Lady Jane 1537–54
Queen of England for nine days
Born in Bradgate, Leicestershire, she was the great-granddaughter of HENRY VII, the great niece of HENRY VIII, and the eldest daughter of Henry Grey, Marquess of Dorset. Educated under the tutorship of JOHN AYLMER (later Bishop of London), she proved an able pupil, especially proficient at languages. During the final illness of EDWARD VI, she was married against her will to Lord GUILDFORD DUDLEY, fourth son of John Dudley, Duke of Northumberland, as part of the latter's scheme to make sure of a Protestant succession. Declared queen three days after Edward's death (9 July 1553), she was forced to abdicate nine days later in favour of Edward's sister, MARY I, TUDOR, and imprisoned in the Tower of London. Following a rebellion in her favour under Sir THOMAS WYATT, the Younger, in which her father (by then Duke of Suffolk) also participated, she was beheaded with her husband. 🕮 Alison Plowden, *Lady Jane Grey: Nine Days Queen* (2004)

Grey, Maria Georgina, *née* **Shirreff** 1816–1906
English pioneer of women's education
The sister of EMILY SHIRREFF, she married her cousin William Thomas Grey in 1841. She helped to found the National Union for Promoting the Higher Education of Women (1871), which created the Girls' Public Day School Company, later Trust, in 1872 to establish 'good and cheap Day Schools for Girls of all classes above those attending the Public Elementary Schools'. She eventually had some 38 schools which set new academic standards for girls' education. One of the first schools, Croydon, had a kindergarten. With her sister she revived interest in the work of the German educationalist FRIEDRICH FROEBEL and promoted the Froebel Society. The Women's Educational Union opened what was later called Maria Grey College in 1878 as a training college for teachers in higher grade girls' schools. She also published a novel and works on women's enfranchisement and education.

Grey, Zane 1875–1939
US novelist
Born in Zanesville, Ohio, he began his working life as a dentist, but after a trip out west in 1904 turned out 'Westerns' with machine-like regularity, totalling 54 novels and an overall sale estimated at around 12 million copies. His best known, *Riders of the Purple Sage*, sold nearly two million copies. His hobby of big-game fishing off the coasts of Australia and New Zealand was utilized in such books as *Tales of Fishing* (1919). His success was due to the 'escapist' lure of his simple adventure plots and attractive, authentic settings. 🕮 Thomas H Pauly, *Zane Grey: His Life, His Adventures, His Women* (2005)

Grey-Thompson, Dame Tanni 1969–
Welsh paralympic athlete
Born in Cardiff, Wales, she was confined to a wheelchair from the age of eight and emerged as a promising athlete while still at school. By 2006 she had amassed 16 paralympic medals, including eleven golds. Her other triumphs include five wins in the London marathon and numerous British and world records. She has received the MBE (1993) and the OBE (2000), and in 2005 was created DBE.

Griboyedov, Aleksandr Sergeyevich 1795–1829
Russian writer and diplomat
Born in Moscow, he wrote *Gore ot Uma* (1824, Eng trans *Wit Works Woe*, 1933), a comedy in rhymed iambics, which satirized contemporary Moscow society so aptly that it provided household phrases for the Russian people. Involved in the Decembrist Revolt, he was nevertheless cleared and in 1828 became Russian ambassador to Persia (Iran). He was killed in an anti-Russian demonstration at the embassy in Teheran. 🕮 V N Orlov, *Griboyedov* (1954); and other works by V N Orlov

Grieg, Edvard Hagerup 1843–1907
Norwegian composer
Born in Bergen of Scots descent, he studied at the Leipzig Conservatory, where he was influenced by SCHUMANN's music. He made Copenhagen his main base between 1863 and 1867, and was in close contact there with NIELS GADE, HANS CHRISTIAN ANDERSEN and the young Norwegian poet-composer Nordraak. With their encouragement, he evolved into a strongly national Norwegian composer with an intense awareness of his folk heritage. After some years teaching and conducting in Christiania (Oslo), the success of his incidental music for IBSEN's *Peer Gynt* (1876) on top of the award of a state pension in 1874 enabled him to settle near Bergen. Apart from his Piano Concerto in A minor, some orchestral suites, three violin sonatas and one quartet, his large-scale output was small, although he wrote many songs. In 1867 he married his cousin, Nina Hagerup, a well-known singer. 🕮 Lionel Carley, *Edvard Grieg in England* (2006)

Grieg, (Johan) Nordahl Brun 1902–43
Norwegian poet and dramatist
Born in Bergen, he studied at Oslo and Oxford, and spent much of his youth travelling, as reflected in his early poetry volumes, such as *Rundt Kap det Gode Haab* (1922, 'Round the Cape of Good Hope') and *Norge i våre hjerter* (1925, 'Norway in Our Hearts'). His novel, *Skibet gaar videre* (1924, 'The Ship Sails On'), about his experiences on a voyage to Australia as an ordinary seaman, was the model for MALCOLM LOWRY's *Ultramarine*. A committed antifascist, he wrote dramas about national freedom, as in *Vår ære og vår makt* (1935, 'Our Honour and Our Might') and *Nederlaget* (1937, 'Defeat'), about the Paris Commune of 1871. During World War II he joined the Resistance, escaped to London, and broadcast his patriotic verses to Norway. His plane was shot down over Berlin in 1943. 🕮 F J Hallund, *Nordahl Grieg. En dikter og hans tid* (1962)

Grien, Hans *See* BALDUNG, HANS

Grierson, John 1898–1972
Scottish documentary film producer
Born in Kilmadock, Stirlingshire, he studied communications in the USA and then joined (1928) the Empire Marketing Board, with whom he made his reputation with *Drifters* (1929), a film about herring fishermen. He headed the British General Post Office from 1933, inspiring hundreds of short films (including *Night Mail*, with a verse commentary by W H AUDEN). During World War II he set up the National Film Board of Canada, and was then appointed director of mass communications for UNESCO (1946–48) and film controller at the Central Office of Information in London (1948–50). Known as the 'father of British documentary', he was also the presenter of an anthology of international documentary films on television (1957–65).

Griesbach, Johann Jakob 1745–1812
German New Testament scholar
Born in Butzbach, he studied theology at Tübingen, Halle and Leipzig. He lectured at Halle, and in 1775 became a professor at Jena and devoted himself to critical revision of the New Testament text, reclassifying the manuscripts into three recensions, Alexandrian, Western and Byzantine. See his *Commentarius Criticus* (1811, 'Critical Commentary'), in which he coined the term 'synoptic' for the first three Gospels.

Griffin, Bernard 1899–1956
English prelate
Born in Birmingham, he was educated at the English and Beda colleges, Rome, then became Archbishop of Westminster in 1943, and cardinal in 1946. He toured postwar Europe and the USA and in 1950 was papal legate for the centenary celebrations of the reconstitution of the English hierarchy.

Griffin, Donald Redfield 1915–2003
US zoologist
Born in Southampton, New York, and educated at Harvard, he demonstrated for the first time that the ultrasound produced by bats is used in echolocation, and later showed that it is also used in hunting. During World War II he studied the effects of background noise on radio communication, and investigated night vision using infrared light. Continuing his pre-war studies on birds' homing abilities, he showed in 1968, by the use of radar, that migrating birds are able to maintain their orientation while flying blind in clouds. He launched the study of 'cognitive ethology' in 1981, an investigation of the way in which non-humans think and feel. His published works include *Animal Minds* (1992).

Griffin, Gerald 1803–40
Irish novelist
Born in Limerick, County Limerick, he wrote for local journals and went to London in 1823 to make a career in literature. He failed as a dramatist, but was more successful with collections of short stories of southern Irish life such as *Holland Tide* (1826) and *Tales of the Munster Festivals* (1827). His novel *The Collegians*, on which DION BOUCICAULT's drama *The Colleen Bawn* is founded, was published anonymously in 1829. In 1838 he burned his manuscripts and entered a monastery. 🕮 *The Dead March Past* (1940)

Griffin, Marion *See* MAHONY, MARION LUCY

Griffin, Walter Burley 1876–1937
US architect and town planner
Born in Maywood, Illinois, he graduated from Illinois State University and was for some years an associate of FRANK LLOYD WRIGHT before establishing his own practice in 1905. In 1910 he married a colleague, MARION MAHONY. In 1912 he won an international competition for the design of the new federal capital of Australia, Canberra, which was to be built on a virgin site in the south of New South Wales. His original design was set aside but Griffin was invited to Melbourne in 1913 and became director of design and construction for the new city. He remained as director until late 1920 but refused to serve on the committee which superseded him, although his last grandiose and geometric plan was adopted officially in 1925. He then went into private practice in Australia, designing a number of notable buildings and the eccentric Castlecrag estate in north Sydney. He developed something of a speciality in municipal incinerators, designing twelve such buildings, one of which is now preserved. In 1935 he went to India following an invitation to design a library for Lucknow University.

Griffith, Arthur 1872–1922
Irish nationalist politician
Born in Dublin, he was a compositor for a time, and joined the Gaelic League. He spent a period in South Africa, where he worked as a gold-miner and as a journalist. Back in Ireland he edited a new weekly paper, *The United Irishman*. In 1905 he founded a new political party, Sinn Féin ('We Ourselves'), and a paper of that name in 1906. A supporter of the Irish Volunteers, he took no part in the Easter Rising of 1916, but was imprisoned as a nationalist. He became vice-president in ÉAMON DE VALERA's provisional government (1919). During the the Anglo-Irish War (1919–21) he was imprisoned again (1920–21), but signed the Anglo-Irish Treaty of 1921 that brought about the Irish Free State. He was a moderate president of Dáil Éireann (1922), but died suddenly, as further fighting broke out between those who opposed and those who supported the 1921 treaty. 🕮 Padraic Colum, *Arthur Griffith* (1959, US *Ourselves Alone!*)

Griffith, D(avid Lewelyn) W(ark) 1875–1948
US pioneer film director
Born in Floydsfork, Kentucky, he began as an actor and short-story writer, before turning to the film industry, learning his trade in hundreds of silent films. Using technical innovations such as close-ups, fade-outs, flashbacks and moving cameras, he did much to create the conventions of modern cinematic art. His first great film, *The Birth of a Nation* (1915), was both hailed as a masterpiece for its subtlety and dramatic force and bitterly criticized by African-American groups appalled by its racism. Subsequent films include his epic *Intolerance* (1916) and his war film *Hearts of the World* (1918), which incorporated battle scenes actually filmed at the front. He discovered many stars, including LILLIAN GISH, who appeared in his films *Broken Blossoms* (1919) and *Orphans of the Storm* (1922). 🕮 Richard Schickel, *D W Griffith: An American Life* (1984)

Griffith, Nanci 1954–
US folk and country music singer and songwriter
She was born near Austin, Texas, into a musical family, and started to perform while still at school. She recorded her first album in 1978, and began to attract attention both for her winsome vocal style, which encompasses both folk and country, and her sophisticated, acutely observed songs. A string of increasingly successful records followed, and she formed her backing band, The Blue Moon Orchestra, in 1986. She has built a large audience for her work in both the USA and Europe, but in making inroads into the rock and pop audience she was, many felt, compromising her musical origins. She returned to her roots in the 1990s with a series of recordings, including 2006's torch-song collection, *Ruby's Torch*.

Griffith, Sir Richard John 1784–1878
Irish soldier, geologist and engineer
Born in Dublin, he joined the Royal Irish Regiment in 1800, but he resigned shortly afterwards and studied chemistry, mining and geology in London and Edinburgh. He returned to Ireland in 1808, surveyed the coalfields of Leinster and examined the Irish bogs for a government commission. As commissioner of valuations after the Irish Valuation Act of 1827, he created 'Griffith's valuations' for country rate assessments. He published the first complete geological map of Ireland in 1838, with a major revision in 1855, and made major contributions to the knowledge of its strata. He was knighted in 1858.

Griffith, Samuel Walker 1845–1920
Australian judge
Born in Merthyr Tydfil, Glamorgan, Wales, he emigrated to Australia in 1854, and studied at Sydney University. From 1867 he practised law in Queensland, and became prime minister of that state three times. He was an active proponent of federation and, as chairman of the Constitutional Committee of the National Australian Convention in 1891, had a major role in drafting what became in 1900 the Australian Commonwealth

Constitution. Chief justice of Queensland from 1893, he was first chief justice of the High Court of Australia (1900–19). In this position he had considerable responsibility for the court's assumption of authority to rule on the legislative validity of Commonwealth and state legislation. His judgements in non-constitutional cases were also highly regarded.

Griffith-Joyner, Florence, *known as* **Flo-Jo** 1959–98
US track-and-field sprinter
Born in Los Angeles, California, she excelled at athletics in high school and college, and won the National Collegiate Athletic Association 200-metres title in 1982. Two years later she won an Olympic silver medal in the 200 metres. At the 1988 Olympics she won three gold medals: for the 100 metres and 200 metres – setting world records of 10.54 seconds for the former and 21.34 seconds for the latter – and for the 4 × 400-metres relay. That year her awards included the 1988 Sullivan award as the top amateur athlete in the USA and the 1988 Associated Press Female Athlete of the Year award. She died following a heart seizure, aged 38.

Griffiths, James 1890–1975
Welsh miners' leader and politician
Born in Betws, near Ammanford, Carmarthenshire, he became a leading official in the miners' union in South Wales, and was elected Labour MP for Llanelli (1936–70). In the Labour governments of 1945 to 1951, he was minister of national insurance and secretary of state for the colonies. A strong believer in a measure of devolution for Wales, he argued for a separate Welsh Office, and became the first secretary of state for Wales (1964–66). He was a moderating influence in Labour Party politics during the tensions of the GAITSKELL–BEVAN disputes in the 1950s.

Griffiths, Richard 1947–
English actor
Born in Stockton-on-Tees, North Yorkshire, the son of deaf and mute parents, he left school at 15 with few qualifications, returning to Manchester University as a mature student. He was a member of the Royal Shakespeare Company for much of his early career, later appearing in films such as *Greystoke* (1984), *A Private Function* (1985) and *Withnail and I* (1987). He is known to television audiences for roles including the generously proportioned detective-cum-restauranteur Henry Crabbe in *Pie in the Sky* (1994–95). His recent work has included the role of Harry's overbearing Uncle Vernon in the Harry Potter films (from 2001), as well as both stage (2004) and film (2006) appearances in ALAN BENNETT's *The History Boys*, winning both Olivier and Tony awards.

Griffiths, Trevor 1935–
English dramatist
He was born in Manchester, and his first plays, *The Wages of Thin* (1969) and *Occupations* (1970), were staged there. These were followed in 1973 by *The Party*, at the National Theatre, London. Set in May 1968, the play revolves around a discussion of left-wing politics, with LAURENCE OLIVIER, in his last stage role, playing an eloquent Glaswegian Trotskyist. *Comedians* (1975) is the story of a group of young apprentice comedians learning their craft under the guidance of an ageing comic. Other plays include *Real Dreams* (1986), a typically angry political piece, *The Gulf Between Us* (1992), which tackles the issues of the Gulf War in the style of a dream play, *Hope in the Year Two* (1994) and *Thatcher's Children* (1994). His films include WARREN BEATTY's *Reds* (1981) and KEN LOACH's *Fatherland* (1994).

Grignard, (François Auguste) Victor 1871–1935
French chemist and Nobel Prize winner
Born in Cherbourg, he joined the chemistry department in Lyons, where he became 'chef de travaux pratiques' (1898) and began his work on the use of organomagnesium compounds in organic synthesis. Since then such compounds (Grignard reagents) have proved to be among the most useful and versatile reagents available for the synthesis of complex molecules, giving many different types of molecules under mild conditions. He received the Nobel Prize in chemistry in 1912 for this work. During World War I he worked on war gases and in 1919 he was appointed to the chair in Lyons, where he remained until his retirement.

Grigorovich, Yuri Nikolayevich 1927–
Russian dancer, artistic director, teacher and choreographer
Born in Leningrad (now St Petersburg), he trained at the Leningrad Choreographic School before joining the Kirov Ballet as a soloist in 1946. His first major ballet, *The Stone Flower* (1957), marked a new stage for Soviet choreography. He followed this with *Legend of Love* (1961). In 1964 he switched allegiance from the Kirov, where he was ballet master, to become chief choreographer and artistic director of the Bolshoi Ballet. His idea of a 'total theatre' for ballet means the dancing springs more from the music and is freer from mime than was previously the case in Russia. Acting as his own librettist, he has brought an elegance to the Bolshoi's celebrated athletic style in ballets like *Spartacus* (1968), for which he was awarded the Lenin prize in 1970, and *Ivan the Terrible* (1975). He has also staged new versions of the classics, such as *Swan Lake* (1969) and *Romeo and Juliet* (1978). Made a People's Artist of the USSR in 1973, he is married to Bolshoi dancer NATALIA BESSMERTNOVA. His forced resignation from the Bolshoi in 1995 prompted a strike by the dancers; since then, he has continued as artistic director of his own company, the Grigorovich Ballet Company.

Grigson, Geoffrey Edward Harvey 1905–85
English poet, critic and editor
He was born in Pelynt, Cornwall, and was the founder of the influential magazine *New Verse* (1933–39). He published several volumes of precisely observed and tersely expressed verse, gathered in *Collected Poems, 1924–62* (1963). A later *Collected Poems* included his subsequent work from 1963 to 1982, and was followed by *Montaigne's Tree* (1984). As a literary critic he was often outspoken. He was married to the cookery writer JANE GRIGSON. 🕮 *The Crest on the Silver* (1950)

Grigson, (Heather Mabel) Jane, *née* **McIntyre** 1928–90
English cookery writer
After graduating from Newnham College, Cambridge, she worked as an editorial assistant (1953–55) and as a translator from Italian (1956–67) before writing her first book, *Charcuterie and French Pork Cookery* (1967), which acknowledged the influence of ELIZABETH DAVID. She became cookery correspondent for *The Observer* magazine and continued to write books, much influenced by her country lifestyle, including the three now regarded as cookery classics: *English Food* (1974), *Jane Grigson's Vegetable Book* (1978) and *Jane Grigson's Fruit Book* (1982). Her husband was the poet GEOFFREY GRIGSON.

Grillo, Adelaide del *See* RISTORI, ADELAIDE

Grillparzer, Franz 1791–1872
Austrian dramatic poet
Born in Vienna, he was in the imperial civil service from 1813 to 1856. He first attracted notice in 1817 with a tragedy, *Die Ahnfrau* ('The Ancestress'), followed by *Sappho* (1818, Eng trans 1820), *Das goldene Vlies* (1820, Eng trans *Medea*, 1879), *Des Meeres und der Liebe Wellen* (1831, Eng trans *Hero and Leander*, 1938), *Der Traum ein Leben* (1834, Eng trans *A Dream Is Life*, 1946), and others. He wrote lyric poetry and one notable prose novel entitled *Der arme Spielmann* (1848, 'The Poor Musician'), the only one of his works set in the Vienna of his day. 🕮 J Nadler, *Franz Grillparzer* (1952)

Grimald, Nicholas 1519–62
English poet and playwright
Born of Genoese ancestry in Huntingdonshire, he went to Christ's College, Cambridge, and became NICHOLAS RIDLEY's chaplain, but recanted under MARY I, TUDOR. He contributed 40 poems to RICHARD TOTTEL's *Songes and Sonettes* (1557), known as *Tottel's Miscellany*, and translated VIRGIL and CICERO. He also wrote two Latin verse tragedies on religious subjects. 🕮 L R Merrill, *The Life and Poems of Nicholas Grimald* (1925)

Grimaldi, Francesco Maria 1618–63
Italian physicist
Born in Bologna, he joined the Society of Jesus (Jesuits) at the age of 14, and was educated at his order's houses at Parma, Ferrar and Bologna, where he became professor of mathematics (1648). At this time the Jesuits were notable teachers of the new science. Among many other contributions, he verified GALILEO's laws of falling bodies, produced a detailed lunar map and, more notably, discovered diffraction of light and researched into interference and prismatic dispersion. He was one of the first to postulate a wave theory of light.

Grimaldi, Joseph 1779–1837
English comic actor, singer and acrobat
Born in London, he first appeared at Sadler's Wells, London, in 1781 as an infant dancer. He appeared as the pantomime clown ('Joey') there and at Drury Lane, and from 1806 to 1823 was engaged at Covent Garden. Many of his innovations became the character's distinctive characteristics. His memoirs were edited by DICKENS. 🕮 Richard Findlater, *Grimaldi: His Life and Theatre* (1979)

Grimké, Angelina Emily 1805–79
US feminist and social reformer
Born in Charleston, South Carolina, she joined her sister SARAH GRIMKÉ in 1829 in Philadelphia, where she vigorously appealed to the women of the USA to support their fight against slavery in *Appeal to the Christian Women of the South* (1836) and *Appeal to Women of the Nominally Free States* (1837). In the wake of Angelina having a letter published in the anti-slavery newspaper *The Liberator* (1835), they became public figures, and Angelina went on a speaking tour. In 1838 she married the abolitionist THEODORE WELD and gave up public life. With Sarah she continued, however, to be committed to reform. Their most significant work was *American Slavery as It Is: Testimony of a Thousand Witnesses* (1838). 🕮 Larry Ceplair, *The Public Years of Sarah and Angelina Grimké* (1991)

Grimké, Sarah Moore 1792–1873
US feminist and social reformer
Born in Charleston, South Carolina, the daughter of a slave-owning judge, she deplored slavery. Moving to Philadelphia in 1821, she became a Quaker, and was joined by her sister ANGELINA GRIMKÉ in 1829. Together they campaigned for the abolition of slavery, moving to New York City, where they lectured for the American Anti-Slavery Society (the first women to do so), and broadened their concern to include women's emancipation. Sarah's works include *Epistle to the Clergy of the Southern States* (1836), aimed at changing their views on slavery, and *The Condition of Women* (1838). 🕮 Larry Ceplair, *The Public Years of Sarah and Angelina Grimké* (1991)

Grimm, Friedrich Melchior Grimm, Baron von 1723–1807
German critic and journalist
Born in Ratisbon (Regensburg), and educated at Leipzig, he accompanied a nobleman to Paris, and became reader to the crown prince of Saxe-Gotha. He became acquainted with JEAN JACQUES ROUSSEAU in 1749, and through him with DENIS DIDEROT and LOUISE FLORENCE D'ÉPINAY. Through the Encyclopédistes he became secretary to the Duke of Orléans, and began to write for several German princes a series of fortnightly private newsletters on Parisian life (1757–73), collected as *Correspondance Littéraire* (1812). In 1776 he was made a baron by the Duke of Gotha, and appointed minister plenipotentiary at the French court. At the Revolution he withdrew to Gotha, and afterwards to the court of CATHERINE II, THE GREAT, from where he was sent in 1795 as Russian minister to Hamburg.

Grimm, Jacob Ludwig Carl 1785–1863 and **Wilhelm Carl** 1786–1859
German folklorists and philologists
Born in Hanau, Hesse-Kassel, they were brothers, and both studied at Marburg. In 1808 Jacob became librarian to JÉRÔME BONAPARTE, King of Westphalia, and published a work on the Meistersingers (1811). In 1812 the brothers published the first volume of the famous *Kinder- und Hausmärchen* (*Grimm's Fairy Tales*, first translated as *German Popular Stories*, 1823). This work formed a foundation for the science of comparative folklore. The second volume followed in 1815, and the third in 1822. In 1829 the two moved to Göttingen, where Jacob became a professor and librarian, and Wilhelm under-librarian (professor in 1835). They were among the seven professors dismissed in 1837 for protesting against taking the oath of allegiance to the King of Hanover. In 1841 the brothers received professorships in Berlin, where they began to compile the monumental *Deutsches Wörterbuch* (1854–1961, 'German Dictionary'). As a philologist, Jacob Grimm published *Deutsche Grammatik* (1819, 'German Grammar'), perhaps the greatest philological work of the age, and formulated 'Grimm's Law' of consonant sound changes, an elaboration of earlier findings by JOHAN IHRE and RASMUS RASK, but an important contribution to the subject. Wilhelm's chief independent work was *Die deutsche Heldensage* (1829, 'The German Heroic Myth'). 🕮 Jack Zipes, *The Brothers Grimm: From Enchanted Forests to the Modern World* (2002)

Grimmelshausen, Hans Jacob Christoffel von c.1622–1676
German novelist
Born in Gelnhausen, Hesse-Kassel, he served on the Imperial side in the Thirty Years' War (1618–48), then led a wandering life, but ultimately settled down in Renchen near Kehl, where he became a senior civil servant of the town. In later life he produced a series of remarkable novels, the best of which are on the model of the Spanish picaresque romances. The sufferings of the German peasantry at the hands of lawless troopers who overran the country have seldom been more powerfully pictured than in his *Der abenteuerliche Simplicissimus Teutsch und Continuatio* (1669, Eng trans *Simplicissimus the Vagabond*, 1924). It was followed by *Trutz Simplex* (1669, Eng trans *Mother Courage*, 1965), *Der seltzame Springinsfeld* (1670, Eng trans *The Singular Life Story of the Heedless Hopalong*, 1981), *Das wunderbarliche Vogelnest* (1672, 'The Amazing Bird's Nest'), and others. 🕮 K Negus, *Grimmelshausen* (1974)

Grimond, Jo(seph) Grimond, Baron 1913–93
Scottish Liberal politician
Born in St Andrews and educated at Eton and Balliol College, Oxford, he was called to the Bar in 1937, and served during World War II with the Fife and Forfar Yeomanry. In 1945 he contested the Orkney and Shetland seat, which he ultimately won in 1950. From 1956 to 1967 he was leader of the Liberal Party, during which time Liberal representation in Parliament was doubled. His aim of making the Liberal Party the real radical alternative to Conservatism was only partially realized in the creation of the Social Democratic Party, and later the (Social and) Liberal Democrats. He served again as party leader for a short period following the resignation of JEREMY THORPE (1976). He retired from Parliament in 1983, when he was made a life peer. He published his *A Personal Manifesto* the same year.

Grimthorpe, Edmund Beckett Denison, 1st Baron 1816–1905
English lawyer, and authority on architecture and horology
Born in Carlton Hall, near Newark, Nottinghamshire, he was educated at Doncaster, Eton, and Trinity College, Cambridge. He made a fortune at the Bar, then turned his attention to church architecture and clock-making. He designed a new casement for Big Ben in the Palace of Westminster, London, and restored St Albans Abbey.

Gringoire or **Gringore, Pierre** c.1475–1538
French poet and dramatist
Born in Caen, he was active in the production of pantomime farces, and is one of the creators of the French political comedy. He attacked the enemies of LOUIS XII and thus found cover for his comments on the vices of the nobility, the clergy and even the pope himself. In later life he was a herald to the Duke of Lorraine, and wrote religious poetry. His works include the famous *Mystère de Monseigneur Saint Loys* (c.1524). Gringoire figures in VICTOR HUGO's *Notre Dame*, and in a play by THÉODORE DE BANVILLE. 🕮 E Bardel, *Gringoire* (1925)

Grinnell, Henry 1799–1874
US shipping merchant
Born in New Bedford, Massachusetts, he financed an Arctic expedition to search for Sir JOHN FRANKLIN in 1850, and another in 1853 under ELISHA KENT KANE. Grinnell Land was named after him.

Gris, Juan, *pseudonym of* **José Victoriano González** 1887–1927
Spanish painter
Born in Madrid, he went in 1906 to Paris, where he associated with PICASSO and MATISSE and became an exponent of Synthetic Cubism. He exhibited with the Cubists in the Section d'Or exhibition in Paris (1912), and in 1920 at the Salon des Indépendants. He settled at Boulogne and in 1923 designed the décor for three productions by SERGEI DIAGHILEV. He also worked as a book illustrator. In most of his paintings the composition of the picture dictates the deliberate distortion and rhythmic rearrangement of the subjects, as in *Still Life with Dice* (1922) in the Musée d'Art Moderne, Paris.

Grisebach, August Heinrich Rudolph 1814–79
German botanist and plant geographer
Born in Hanover and educated there and at Ifeld University, he went to Göttingen University in 1832, but completed his studies at Berlin University. In 1838 he published his vast work, *Genera et Species Gentianearum*. In 1839 he set off on an important expedition to the Balkan Peninsula and Bithynia, then largely unexplored botanically. This journey laid the foundation for his phytogeographical work which culminated in *Vegetation der Erde* (1872). Later he studied Caribbean and South American botany and published another of his most important works, *Flora of the British West Indian Islands* (7 parts, 1859–64).

Grisham, John 1955–
US author
Born in Jonesboro, Arkansas, he studied law at the University of Mississippi and set up his own legal practice before establishing himself as a bestselling writer of suspenseful courtroom dramas. *A Time to Kill* (1988) was well received but was far outstripped by the enormously successful *The Firm* (1991),

which, like many of Grisham's most popular stories, has been filmed. Bestselling titles since then have included *The Pelican Brief* (1992), *The Client* (1993), *The Testament* (1999), *The Brethren* (2000), *The Summons* (2002) and *The Broker* (2005).

Grishin, Viktor Vasilevich 1914–92
Soviet politician
He was a supporter of LEONID BREZHNEV, whom he expected to succeed. A railwayman, he only took up party work during World War II. From 1956 to 1967 he was head of the Soviet trade unions and managed to keep them firmly in line. In 1967 he became first secretary of the Moscow party and succeeded in making it toe the line for 18 years. In 1985 MIKHAIL GORBACHEV replaced him almost immediately with BORIS YELTSIN.

Grisi, Carlotta 1819–99
Italian ballerina
Born in Visinada in the Austrian Empire (now in Croatia), she studied under JULES PERROT, who became her husband. She was the original Giselle (1841) in Paris, and was a cousin of the Italian sopranos GIUDITTA and GIULIA GRISI.

Grisi, Giuditta 1805–40
Italian mezzo-soprano
Born in Milan, she was the sister of GIULIA GRISI, whom she taught. She was the original Romeo in VINCENZO BELLINI's *I Capuleti ed i Montecchi* (1830), but retired on marrying Count Barni in 1833.

Grisi, Giulia 1811–69
Italian soprano
Born in Milan, she was renowned for her roles in VINCENZO BELLINI's operas, especially *I Puritani* ('The Puritans'), which was written for her, and *Norma*. She was the sister of GIUDITTA GRISI, who taughther.

Grivas, Georgeios Theodoros 1898–1974
Greek–Cypriot nationalist leader
Born in Trikomo, Cyprus, he commanded a Greek Army division in the Albanian campaign of 1940–41 and was leader of a secret organization called 'X' (Khi) during the German occupation of Greece. In 1945 he headed an extreme nationalist movement against the Communists. Some nine years later he became head of the underground campaign against British rule in Cyprus. As founder and leader of EOKA (Ethnikí Orgánosis Kipriakoú Agónos, or the National Organization of Cypriot Struggle), he began to call himself 'Digenes Akritas' after a legendary Greek hero. His secret diaries were found in 1956, when he had a price of $10,000 on his head. After the Cyprus settlement (February 1959) Grivas left Cyprus and, acclaimed as a national hero by the Greeks, was promoted to general in the Greek army. In 1964 he returned to Cyprus until 1967, when he was recalled to Athens. He returned secretly to Cyprus in 1971 and directed a terrorist campaign for *enosis* (union with Greece) until his death. He was given a hero's funeral.

Grock, *stage name of* **Adrien Wettach** 1880–1959
Swiss clown
Born in Reconvilier, he became world-famous for his virtuosity in both circus and theatre. He wrote several books, including *Ich lebe gern* (1930) and *Grock, King of Clowns* (1956, trans Creighton).

Grocyn, William c.1446–1519
English scholar and humanist
Born in Colerne, Wiltshire, he was educated at Winchester, and went to New College, Oxford, in 1465. He studied in Italy (1488–91), acquiring his knowledge of Greek from the Greek exile and scholar Demetrios Chalkondylas (1424–1511), and then settled again in Oxford, where he was the first to teach Greek publicly and where Sir THOMAS MORE was his pupil. ERASMUS lived at Oxford in Grocyn's house, and spoke of him as his 'patronus et praeceptor'. In 1506 he became master of All Hallows College near Maidstone.

Groening, Matt(hew Abram) 1954–
US cartoonist
He was born in Portland, Oregon, and educated at Evergreen State College in Olympia, Washington. In the late 1970s he moved to Los Angeles, where he began drawing comic strips as well as working at the *Los Angeles Reader*, a weekly newspaper. The success of his comic strip *Life in Hell* from 1980, later anthologized in numerous books, brought him to popular notice. His cartoon family, *The Simpsons*, first appeared on television in 1987 and was a huge critical and popular success, subsequently becoming the longest-running animated series in television history. Groening went on to create another cartoon series, *Futurama* (1999–2003).

Groen van Prinsterer, Guilaumme 1801–76
Dutch historian and politician
Born in Voorburg, he became secretary to the king's Cabinet and archivist to the Dutch royal family, and edited the massive *Archives de la maison d'Orange-Nassau* (1835–61). In 1847 he published a seminal critique of the French Revolution, *Ongeloof en Revolutie* ('Unbelief and Revolution'); it became the classic statement of a renascent Calvinist political movement in the Netherlands. He served as a member of the Second Chamber of Government (1849–57, 1862–66). His spiritual and intellectual political heir was ABRAHAM KUYPER.

Grofé, Ferde 1892–1972
US composer
Born in New York City, he is known for a number of orchestral suites – all named after places in the USA – which are descriptive of the US scene, such as the *Grand Canyon Suite* (1931). He worked as an arranger for PAUL WHITEMAN's 'symphonic jazz' band, and orchestrated *Rhapsody in Blue* for GEORGE GERSHWIN (1924). The modern-style orchestra based upon saxophones rather than strings is attributed to Grofé.

Grolier, Jean Vicomte d'Aguisy 1479–1565
French bibliophile
He was born in Lyons. He was attached to the court of FRANCIS I, went to Italy as intendant-general of the army, was long employed in diplomacy at Milan and Rome, and then became treasurer general of France (1547). He built up a magnificent library of 3,000 volumes, dispersed in 1675. He acquired choice copies of the best works, and had them magnificently bound, with the inscription *Io. Grolierii et Amicorum* ('for Grolier and his friends'). About 350 of his books have come to light.

Gromyko, Andrei Andreyevich 1909–89
Soviet politician and diplomat
Born near Minsk into a peasant family, he studied agriculture and economics and became a research scientist at the Soviet Academy of Sciences. In 1939 he joined the staff of the Soviet embassy in Washington, DC, becoming ambassador in 1943 and attending the famous 'big three' conferences at Teheran, Yalta and Potsdam. In 1946 he was elected a deputy of the Supreme Soviet, and in the same year became deputy foreign minister and was made permanent delegate to the UN Security Council, achieving an unenviable reputation through his use of the power of veto no fewer than 25 times. For a few months (1952–53) he was ambassador to the United Kingdom. He became foreign minister in 1957, holding this post until 1985, and being responsible for conducting Soviet relations with the West during the Cold War, showing no relaxation of the austere and humourless demeanour for which he had become notorious in diplomatic circles. During the 1970s, however, he adapted to the new policy of détente. MIKHAIL GORBACHEV promoted him to the largely ceremonial and mainly domestic post of president in 1985, but he retired from office in 1988, when he was replaced in a much stronger presidency by Gorbachev himself.
🕮 *Memories* (1989)

Groot, Huig de *See* GROTIUS, HUGO

Gropius, Walter Adolph 1883–1969
US architect
Born in Berlin, Germany, he studied in Munich and worked in the office of PETER BEHRENS in Berlin. After World War I he was appointed director of the Grand Ducal group of schools in art in Weimar, which he amalgamated and reorganized to form the Bauhaus, which aimed at a new functional interpretation of the applied arts, utilizing glass, metals and textiles. His revolutionary methods and bold use of unusual building materials were condemned as 'architectural socialism' in Weimar, and the Bauhaus was transferred (in 1925) to Dessau, housed in a building which Gropius had designed for it. When the Nazis came to power the Bauhaus became a Nazi training school and Gropius went (1934–37) to London, where he worked on factory designs and housing estates for the Home Counties, including a revolutionary adjunct to Christ Church, Oxford, which was never built. In 1937 he emigrated to the USA, where he became professor of architecture at Harvard (1938–52), and designed the Harvard Graduate Center (1949) and the American Embassy in Athens (1960). His other major constructions include the Fagus shoe factory at Alfeld (1911), a model factory and office for the Cologne Exhibition (1914) and large housing estates in Germany. He also designed Adler car bodies (1929–33). 🕮 Sigfried Giedion, *Walter Gropius* (1992)

Gros, Antoine Jean, Baron 1771–1835
French historical painter
Born in Paris, he studied under JACQUES LOUIS DAVID, and later travelled with NAPOLEON I's armies and acquired celebrity with his depictions of battles (1797–1811). His *Charles V and Francis I* (1812), *Departure of Louis XVIII for Ghent* (1815) and *Embarkation of the Duchess of Angoulême* (1815) combine Classicism and Romanticism. He subsequently attempted a return to Classicism, but found his work ignored and drowned himself in the Seine.

Gross, David Jonathan 1941–
US physicist and Nobel Prize winner
Born in Washington, DC, he lived as a child in Israel, returning later to study in the USA. In 1996 he became director of the Kavli Institute for Theoretical Physics at the University of California, Santa Barbara. His work with FRANK WILCZEK helped to develop the idea of 'asymptotic freedom' in the theory of strong interactions, or quantum chromodynamics. Asymptotic freedom expresses the fact that the force between two quarks grows larger as they move further apart. He shared the 2004 Nobel Prize in physics with Wilczek and with H DAVID POLITZER, who had worked independently in the same area.

Gross, Hans 1847–1915
Austrian criminologist and lawyer
He was born in Graz, and became a pioneer in the field of scientific detection of crime. From 1905 he was professor of criminal law at Graz, where he established the first criminal museum. His *Handbuch für Untersuchungsrichter* (1893, Eng trans *Criminal Investigation*, 1907) is a standard work.

Gross, Michael, *also called* **the Albatross** 1964–
German swimmer
Born in Frankfurt am Main, a butterfly and freestyle swimmer, he won 13 gold medals between 1981 and 1987 for West Germany at the European championships. He was the world 200-metres freestyle and 200-metres butterfly champion in 1982 and 1986, and has won three Olympic gold medals: the 100-metres butterfly and 200-metres freestyle in 1984, and the 200-metres butterfly in 1988.

Grosseteste, Robert c.1175–1253
English prelate
Born in Stradbroke, Suffolk, he was educated at Lincoln, Oxford and Paris. After teaching for a number of years in Oxford, he became Bishop of Lincoln in 1235. He undertook the reformation of abuses, including the granting, by Pope INNOCENT IV, of English benefices to priests who used the income of their offices but seldom appeared in their parishes. Grosseteste's opposition to this earned him a temporary suspension from his bishopric and a continual threat of excommunication. In the last year of his life he refused the pope's request to promote his nephew, an Italian, to a canonry. The pope is said to have excommunicated him, but his clergy continued to work with him regardless. His catalogue of works included 'treatises on sound, motion, heat, colour, form, angles, atmospheric pressure, poison, the rainbow, comets, light, the astrolabe, necromancy and witchcraft'.

Grossi, Tommaso 1791–1853
Italian poet
Born in Bellano on Lake Como, he studied law at Padua and practised in Milan. His first poem, *La Prineide* (1814, 'The Prineide'), was a battle poem in the Milanese dialect. There followed several historical romances, the most notable of which is *Marco Visconti* (1834, Eng trans 1836), and the epic poem for which he is best known, *I Lombardi alla prima crociata* (1826, 'The Lombards on their First Crusade'), which VERDI used for his opera *I Lombardi*. 🕮 E Flori, *Scorci e figure del romanticismo* (1938)

Grossmith, George 1847–1912
English humorist, actor and writer
He was born in London and for several years was a police-court reporter for *The Times*. In 1870 he became a singer and entertainer, creating several leading roles in the premières of operettas by GILBERT and SULLIVAN. He published his *Reminiscences of a Clown* in 1888, and *Piano and I* in 1910. He is best remembered, though, for his collaboration with his brother Weedon Grossmith (1854–1919) on *The Diary of a Nobody*, serialized first in *Punch* and published in book form in 1892. An imaginary journal of domestic life in Holloway, London, it records the doings of the amiable, pompous city clerk Mr Pooter, striving to better himself culturally and socially but who, unwittingly, becomes the butt of numerous jokes he fails to understand. 🕮 T Joseph, *George Grossmith* (1982)

Grosz, George 1893–1959
US artist
Born in Berlin, Germany, he was associated with the Berlin Dadaists in 1917 and 1918. While in Germany he produced a series of bitter, ironic drawings attacking German militarism and the middle classes. He fled to the USA in 1932 (becoming naturalized in 1938) and went on to produce many oil paintings of a symbolic nature. He returned to Berlin in 1959, where he died. 🕮 K M Flavell, *George Grosz: A Biography* (1988)

Grósz, Károly 1930–96
Hungarian politician
Born in Miskolc, the son of a steel worker, he began his career as a printer and then a newspaper editor. He joined the ruling Hungarian Socialist Workers' Party (HSWP) in 1945 and moved to Budapest in 1961 to work in the agitprop department, becoming its deputy head in 1968 and its head in 1974. Grosz served as Budapest party chief (1984–87) and was inducted into the HSWP politburo in 1985. He became prime minister in 1987 and succeeded JÁNOS KÁDÁR as HSWP leader in 1988, giving up his position as prime minister six months later. Following the lead given by MIKHAIL GORBACHEV in Moscow, he became a committed and frank-speaking reformer in both the economic and political spheres, seeking to establish in Hungary a new system of 'socialist pluralism'. However, when the HSWP reconstituted itself in 1989 as the new Hungarian Socialist Party (HSP), he was replaced as party leader by Rezso Nyers, a radical social democrat.

Grote, George 1794–1871
English historian and politician
He was born in Clay Hill, Beckenham, Kent, and educated at Charterhouse. In 1810 he became a clerk in the bank (founded in 1766 by his grandfather) in Threadneedle Street, of which he became governor (1830–43). From 1832 to 1841 he was MP for the City of London. During his first session he brought forward a motion for the adoption of the ballot; it was lost, but Grote continued to advocate the measure until he retired from parliamentary life and banking to devote himself to literature, mainly his *History of Greece* (1846–1856). In 1865 he finished *Plato and the Other Companions of Socrates*, but his *Aristotle* was unfinished. He also wrote *Fragments on Ethical Subjects* (1876). He was buried in Westminster Abbey, London.

Grotell, Maija 1899–1973
Finnish potter
Born in Helsinki, Finland, she studied under ALFRED WILLIAM FINCH and in 1927 she moved to the USA, where she worked for a ceramics studio in New York and then taught at Rutgers University in New Jersey (1936–38). She won prizes in Barcelona and Paris for her early Art Deco work. She became head of the ceramics department of the Cranbrook Academy of Art, Michigan, in 1938, continuing to teach there until 1966, and became noted for rough-textured glazes, including a cratered glaze achieved by using a stoneware glaze over Albany slip. She came to be regarded as the 'mother of American ceramics', and her work is in many private and public collections in the USA.

Groth, Klaus 1819–99
German poet
Born in Heide, Holstein, he became a schoolteacher, and in 1866 professor of German language and literature at Kiel. His masterpiece, *Quickborn* (1852), is a series of poems in Low German (*Plattdeutsch*) dealing with life in Dithmarschen. Some of his work is in High German, and he also published children's tales and short stories. 🕮 Peter Russell, *Johannes Brahms and Klaus Groth: The Biography of a Friendship* (2006)

Grothendieck, Alexandre 1928–
French mathematician
Born in Berlin, Germany, he became a French citizen after fleeing Germany in 1941. After early important work on infinite-dimensional vector spaces, he switched to algebraic geometry, where he revolutionized the subject. His work led to a unification of geometry, number theory, topology and complex analysis, and helped to resolve the important conjectures of ANDRÉ WEIL. His work has also had profound implications for the theory of logic. His remarkably powerful introduction of the ideas at the very basis of algebraic geometry has extended the language of geometry from fields to rings, and has opened up many problems concerning the integers by allowing the use of geometrical techniques hitherto available only when dealing with rational or real numbers. He was awarded the Fields Medal (the mathematical equivalent of the Nobel Prize) in 1966, although he initially declined to accept it. Constantly at odds with the hierarchy of the maths world, he also refused the

Crafoord Prize in 1988 and disappeared altogether in 1991, reportedly living since then as a hermit in Andorra.

Grotius, Hugo, *also called* **Huig de Groot** 1583–1645
Dutch jurist, politician, diplomat, poet and theologian
Born in Delft, he studied at Leyden, practised in The Hague, and in 1613 was appointed Pensionary of Rotterdam. He was a political champion of the Remonstrants, and in 1618 religious and political conflicts led to his imprisonment. In 1621 he escaped in a trunk from Loevestein Castle to Paris, where LOUIS XIII for a time gave him a pension. Recognized as one of the founders of international law, he published his great work on the subject, *De Jura Belli et Pacis* ('On the Law of War and Peace') in 1625. He led diplomatic missions for Sweden from 1634 until his death. He also wrote Latin and Dutch verse. His tragedy *Adamus Exsul* was one of MILTON's sources, and he wrote the famous *De Veritate Religionis Christianae* (1627) and annotated the Bible (1641–46). His most impressive historical work is *Annales de Rebus Belgicis* (1657).

Grotowski, Jerzy 1933–99
Polish theatre director, teacher and drama theorist
Born in Rzeszów, he trained at the Kraków Theatre School. He founded the Theatre of 13 Rows in Opole (1959–64), which moved to Wrocław as the Theatre Laboratory (1965–84). In 1968 the company visited the Edinburgh Festival, and went on to London and New York City. Also in 1968, he published *Towards a Poor Theatre*, detailing many of his ideas about theatre and performance. In 1976 he disbanded his Laboratory Theatre and began working with actors and students on shows of his own devising to which no audiences were admitted. His work had a major impact on experimental theatre and actor training in the West in the 1960s and 1970s. A later publication is *Teksty z lat 1965–1969* (1990, 'Texts from the Years 1965–1969').

Grouchy, Emmanuel, Marquis de 1766–1847
French soldier
Born in Paris, he was second to Lazare Hoche (1768–97) in the abortive expedition to Ireland (1796), and fought also in Italy (1798). Later he fought at Hohenlinden, Eylau, Friedland and Wagram, and in the 1812 Russian campaign, and after Leipzig covered the retreat of the French. On NAPOLEON I's escape from Elba he destroyed the BOURBON opposition in the south of France, and helped to rout GEBHARD VON BLÜCHER at Ligny. After Waterloo (1815), where he failed to play an effective part due to misleading orders, he was commander-in-chief of the broken armies of France and led them skilfully back towards the capital before retiring to the USA. He returned in 1819, and was reinstated as marshal in 1831.

Grouès, Henri Antoine *See* PIERRE, ABBÉ

Groulx, Abbé Lionel 1878–1967
French-Canadian nationalist, historian and novelist
In reaction to the more moderate interpretations of the early 20th century, he depicted French-Canadian history as an unremitting struggle against English domination. In such works as *Notre maître le passé* (1944) he celebrated the clerical and agrarian elements of that past, although he never explicitly advocated separatism.

Grove, Sir George 1820–1900
English musicologist, biblical scholar and civil engineer
Born in London, he trained as a civil engineer, and erected the first two cast-iron lighthouses in the West Indies, and worked on the Britannia tubular bridge. He was secretary to the Society of Arts (1849–52), and became secretary and director of the Crystal Palace Company in 1852. Editor of *Macmillan's Magazine* (1868–83), he was a major contributor to Sir WILLIAM SMITH's *Dictionary of the Bible*. His major work was as editor of the *Dictionary of Music and Musicians* (4 vols, 1878–89; 6th edn 1980). On a journey with Sir ARTHUR SULLIVAN to Vienna in 1867 he participated in the discovery of compositions by SCHUBERT. His *Beethoven and His Nine Symphonies* (1896; new edn 1956) remained a standard work for years. Knighted in 1883 on the opening of the Royal College of Music, he was its director until 1895. 🕮 Percy M Young, *George Grove: A Biography, 1820–1900* (1980)

Grove, Sir William Robert 1811–96
Welsh physicist and jurist
Born in Swansea, he was educated at Oxford, but had to abandon his law career because of poor health. Concentrating instead on electrochemistry, he invented a new type of voltaic cell named after him (1839), and also a 'gas battery', the first fuel cell. He also invented the earliest form of filament lamp intended for use in mines. As professor of physics at the London Institution (1841–64), he studied electrolytic decomposition and demonstrated the dissociation of water. Thereafter he returned to law, was raised to the bench (1871), and became a judge in the High Court of Justice (1875–87). He was one of the original members of the Chemical Society, and one of the leaders of the Royal Society's reform movement (elected FRS in 1840). He was knighted in 1872.

Groves, Sir Charles Barnard 1915–92
English conductor
He was born in London and studied at the Royal College of Music. He was appointed chorusmaster of the BBC Chorus (1938–42), and conductor of the BBC Northern Symphony Orchestra (1944–51), the Bournemouth Symphony Orchestra (1951–61), the Royal Liverpool Philharmonic Orchestra (1963–77) and the Leeds Philharmonic Society (1988–92). He also conducted with Welsh National Opera (1961–63) and English National Opera (1978–79). He was knighted in 1973, and established a wide reputation, especially for his work in the early Romantics and in English music.

Groza, Petru 1884–1958
Romanian politician
During the 1930s he led the Ploughmen's Front, which drew its support from the Transylvanian peasantry. When Romania entered World War II in 1944, he joined the Communist front organization, the National Democratic Front (FND). In 1944, together with his fellow 'home Communist' GHEORGHE GHEORGIU-DEJ, he represented the FND in the government of Sănătescu. In 1945 STALIN approved his appointment as presiding minister in the FND government, a post he held until 1952, when he became president of the presidium of the Romanian Communist Party (RCP).

Grubb, Sir Howard 1844–1931
Irish engineer and builder of astronomical instruments
Born in Dublin, he studied civil engineering at Trinity College, Dublin, then worked with his father, Thomas Grubb (FRS), engineer to the Bank of Ireland and also a maker of optical instruments. In 1865 his father was commissioned to build a 48-inch reflecting telescope for Melbourne, Australia, and Grubb was given charge of the work under his father's supervision. This instrument, one of the largest in the world at the time, established his reputation on an even higher level than his father's. On his father's retirement in 1868, the firm moved to larger premises in Dublin, and (c.1880) he completed a 27-inch refracting telescope for Vienna, for some years the most notable telescope of its kind in the world. In 1900 he patented a new type of optical gun sight, and developed and perfected the submarine periscope. In 1925, at the age of 81, he retired from active participation in the business, and it was acquired by Sir CHARLES ALGERNON PARSONS (1854–1931) and moved to Newcastle upon Tyne as the Sir Howard Grubb Parsons Company. Grubb was elected FRS in 1883 and knighted in 1887.

Grubb, Sir Kenneth George 1900–80
English missionary, ecumenist, and Anglican lay churchman
He was born in Oxton, Nottinghamshire. Following extensive research on religious and social conditions in South America in the 1930s and wartime service with the Ministry of Information, he became president of the Church Missionary Society (1944–69), chairman of the Churches Committee on International Affairs (1946–68) and chairman of the House of Laity in the Church Assembly (1959–70). Author of several studies on South America and successive editions of the *World Christian Handbook* (1949–68), he revealed his waspish assessments of himself and others in *A Layman Looks at the Church* (1964) and his autobiography *Crypts of Power* (1971).

Grubbs, Robert H(oward) 1942–
US chemist and Nobel Prize winner
Born near Possum Trot, Kentucky, he grew up working on his uncles' farms and helping his father to rebuild car engines. He majored in agricultural chemistry at the University of Florida before studying at Columbia University, where he explored the possibilities of using metal compounds to control chemical reactions. Positions at Michigan State University (1969) and subsequently at Caltech (1979) saw further development of this work, leading to the discovery of powerful catalytic compounds. In 2005 he was awarded the Nobel Prize in chemistry, which he shared with YVES CHAUVIN and RICHARD R SCHROCK.

Gruenberg, Louis 1884–1964
US composer
Born near Brest-Litovsk, Russia, he was taken to the USA at the age of two. A pupil of FERRUCIO BUSONI, he worked as a concert

pianist until 1919, and then retired to devote himself to composition. He wrote extensively for orchestra, chamber music combinations and voices, but is best known for his opera *The Emperor Jones* (1933), based on EUGENE O'NEILL's play.

Grumman, Leroy Randle 1895–1982
US engineer and aircraft pioneer
Born in Huntington, New York, he studied engineering at Cornell University, and served as a navy pilot in World War I. From 1921 to 1929 he was general manager of the Loening Aeronautical Corporation, thereafter forming the Grumman Aircraft Engineering Corporation at Bethpage, Long Island. He produced a series of successful navy aircraft – Wildcat, Hellcat, Bearcat and Tiger Cat – which played vital roles in the naval wars in the Pacific and the Atlantic in World War II. These were followed by the jet fighters Panther, Cougar and Tiger, and several attack and search aircraft. Grumman built the lunar excursion module (LEM) for the Apollo flights to the Moon.

Grün, Anastasius *See* AUERSPERG, ANTON ALEXANDER, GRAF VON

Grün, Hans *See* BALDUNG, HANS

Grundtvig, Nikolai Frederik Severin 1783–1872
Danish theologian, historian, poet and educator
Born in Udby, Zealand, he studied theology in Copenhagen. He wrote *Northern Mythology* (1801) and *The Decline of the Heroic Age in the North* (1809), and some volumes of patriotic poetry. He became a curate in 1815 in his father's church, but because of his criticisms of the rationalist tendency in the Danish Church, he was suspended from preaching (1825). His antiquarian interests continued with translations of SNORRI STURLUSON's *Heimskringla* and of SAXO GRAMMATICUS, followed by a translation of *Beowulf* (1820). As a result of visits to England, he was the inspiration behind the Folk High School movement, begun in 1844, which provided adults with education in practical subjects and the humanities, and which contributed to the transformation of rural life in Denmark after the German–Danish War of 1864.

Gruner, Elioth 1882–1939
Australian painter
Born in Gisborne, New Zealand, of Norwegian and Irish parentage, he arrived in Sydney as an infant, and in 1894 trained at JULIAN ASHTON's Art School. He won the Wynne prize for landscape painting in 1916, and was to win it six more times. Regarded as one of Australia's leading landscape artists, he captures, in his best work, the special quality of the Australian light, for example in *On the Murrumbidgee* (1929, Sydney). He organized the exhibition of Australian art shown at the Royal Academy, London, in 1923, and his work was exhibited at the Royal Academy and the Paris Salon.

Grünewald, Isaak 1889–1946
Swedish painter
Born in Stockholm, he was a leader of Scandinavian Expressionism. His wife, Sigrid Grünewald-Hjerten (1885–1946), was also a painter.

Grünewald, Matthias, *originally perhaps* **Mathis Nithardt**, *otherwise* **Gothardt** c.1475–1528
German artist, architect and engineer
Born probably in Würzburg, Bavaria, very little is known of his life, but he was trained in Alsace in the style of MARTIN SCHONGAUER, and became court painter to the Archbishop of Mainz (1508–14) and to Cardinal Albrecht of Brandenburg (1515–25), and he designed waterworks for Magdeburg (c.1526). In 1516 he completed the great Isenheim altarpiece (Colmar Museum, Alsace), the nine paintings of which exhibit his rare livid colours and his use of distortion to portray passion and suffering. Towards 1524 he painted an even more dramatic *Crucifixion* (Karlsruhe, Kunsthalle) with its greenish, blood-spattered body of Christ. Grünewald is the *Mathis der Maler* of PAUL HINDEMITH's opera. 🕮 Andree Hayum, *The Isenheim Altarpiece: God's Medicine and the Painter's Vision* (1989)

Gryphius or **Greif, Andreas** 1616–64
German lyric poet and dramatist
Born in Glogau, Silesia, he travelled in Holland, France and Italy, studying medicine and astronomy, then returned to his native town. His early misfortunes led him to the 'all is vanity' theme of his lyrics, expressed in deep gloom, collected under the title *Sonn-und-Feiertagssonette* (1639, 'Sonnets for Sundays and Holidays'). His dramas, mainly concerned with martyrdom, include *Leo Armenius* (1650), *Catharina von Georgien* (1657) and *Papinianus* (1659). He also wrote the pastoral *Die geliebte Dornrose* (1660, Eng trans *The Beloved Hedgerose*, 1928), and the comedies *Herr Peter Squentz* (1663, Eng trans *Absurda Comica, or Master Peter Squentz*, 1964), which resembles the scenes with Bottom in SHAKESPEARE's *A Midsummer Night's Dream*, and *Horribilicribrifax* (1663), satirizing the Thirty Years' War. He was indirectly influenced by Shakespeare and JOOST VAN DEN VONDEL. 🕮 H Becker, *Andreas Greif, Poet Between Epochs* (1973)

Gryphius, Sebastian 1493–1556
German printer
He was born in Reutlingen, Swabia. In 1528 he went to Lyons and there between 1528 and 1547 printed more than 300 works, notable for their accuracy and clear type. Among the more noted are the fine Latin Bible of 1550 and ÉTIENNE DOLET's *Commentaria Linguae Latinae* (1536, 'Commentaries on the Latin Language').

Guardi, Francesco 1712–93
Italian painter
Born in Pinzolo, he was a pupil of CANALETTO, and was noted for his views of Venice, full of sparkling colour, with an Impressionist's eye for light effects. His *View of the Church and Piazza of S Marco* is in the National Gallery, London. His brothers, Giovanni Antonio (1669–1760) and Nicolò (1715–86), often collaborated with him.

Guardia, Fiorello H(enry) la *See* LA GUARDIA, FIORELLO H(ENRY)

Guare, John 1938–
US dramatist
Born in New York City, he studied at the Yale School of Drama and began to write tragicomic plays influenced by the Theatre of the Absurd. He won an Obie award for *The House of Blue Leaves* (1971), which investigated the grotesquely inappropriate ambitions and necessary self-deceptions of a family in the borough of Queens. In later plays such as *Six Degrees of Separation* (1990) and *Four Baboons Adoring the Sun* (1992), he has written in a style more naturalistic but still highly inventive. His screenplays for *Atlantic City* (1980) and for the film version of *Six Degrees of Separation* (1993) were nominated for Academy Awards.

Guareschi, Giovanni 1908–68
Italian journalist and writer
He was born in Parma, and became editor of the Milan magazine *Bertoldo*. After World War II, in which he was a prisoner, he returned to Milan and journalism, but it was *Mondo piccolo 'Don Camillo'* (1950, Eng trans *The Little World of Don Camillo*, 1951) which brought him fame. These stories of a village priest and a Communist mayor, with their broad humour and rich humanity, have been translated into many languages. They were followed by *Mondo piccolo 'Don Camillo e il figliuol prodigo'* (Eng trans *Don Camillo and the Prodigal Son*, 1952) and others. He illustrated his books with his own drawings. 🕮 *Diario clandestino, 1943–1945* (1949)

Guarini, Giovanni Battista 1538–1612
Italian poet
Born in Ferrara, he was entrusted by Duke Alfonso II with diplomatic missions to the pope and the emperor, and was sent to Venice and Poland. His chief work was the famous pastoral play *Il Pastor Fido* (1585, 'Fido the Shepherd'), an imitation of TORQUATO TASSO's *Aminta*. 🕮 V Russi, *Battista Guarini ed il Pastor Fido* (1885)

Guarini, Guarino, *originally* **Camillo** 1624–83
Italian Baroque architect, philosopher and mathematician
Born in Modena, he became a Theatine monk at the age of 15. In Rome he studied the work of FRANCESCO BORROMINI, from which he developed his own style. A love of complexity and movement in all dimensions is the keynote of his work. He designed several churches in Turin, of which the only two survivors are San Lorenzo (1668–80) and Capella della Sindone (1668), and the Palazzo Carignano (1679), as well as palaces for Bavaria and Baden. He also published books on mathematics, astronomy and architecture. His influential *Architectura Civile* (published posthumously in 1737), concerning the relationship of geometry and architecture, also included a defence of Gothic architecture.

Guarnieri or **Guarneri**
Italian family of violin makers
From Cremona, the most important were Andrea (fl.1650–95), his sons Giuseppe (fl.1690–1730) and Pietro (fl.1690–1725), and Giuseppe's son Giuseppe (fl.1725–45), the last commonly known as Giuseppe del Gesò (of Jesus) because he signed his violins with IHS (Iesu hominum salvator) after his name.

Gubaydulina, Sofiya Asgatovna 1931–
Russian composer
Born in Chistopol in the Tatar SSR, she has been resident in Germany since 1991. Educated at Kazan (1949–54) and Moscow (1954–63) conservatories, she worked for the next decade in the Soviet theatre and film industry, as accompanist and composer, with a special interest in electronic music. In 1975, her choral/orchestral *Steps* won an International Composers' Competition in Rome, and in the same year she co-founded the improvising ensemble Astreja, of which she remains a member. Her major works include the violin concerto *Offertorium* (1980–86), *Seven Words* (1982), which was initially suppressed, and the symphony *Stimmen... Verstummen* (1986).

Guderian, Heinz (Wilhelm) 1888–1953
German general
After serving in World War I, he stayed in the small army allowed to Germany by the Treaty of Versailles, and pioneered mechanized warfare. Created general of panzer (armoured) troops in 1938, he advocated fast-moving *Blitzkrieg* warfare which he later put into brilliant effect, commanding forces in France and the USSR under FEDOR VON BOCK. He had a stormy relationship with HITLER and was dismissed and reinstated several times. He wrote *Panzer Leader* (1952).

Guedalla, Philip 1889–1944
English writer
Born in London, he was educated at Rugby and Oxford, and became a barrister (1913–1923). He was a highly popular historian and wrote *Second Empire* (1922), *Palmerston* (1926), *The Hundred Days* (1934), *The Hundredth Year* (1940), *Two Marshals* (about JEAN RENÉ BAZAINE and PHILIPPE PÉTAIN, 1943) and *Middle East* (1944).

Guelf, *properly* **Welf** c.825–1866
German dynasty
The first known Welf was a Frankish noble with lands in Bavaria and Swabia (c.825). The family was most powerful under HENRY THE LION, Duke of Saxony and Bavaria, but FREDERICK I, BARBAROSSA, took both duchies, only allowing him the area of Braunschweig-Lüneburg, which became a duchy in 1235 for Henry's grandson Otto. They became electors (1692) and later kings (1814) of Hanover, and in 1714 the Elector George Ludwig became GEORGE I of England. The death of WILLIAM IV (1837) separated the British and Hanoverian crowns, when Salic Law prevented VICTORIA from ruling Hanover. Her cousin, GEORGE V of Hanover, lost his throne to Prussia in 1866. In medieval Italy, the term Guelfs represented political factions supporting the papacy and the Angevin rulers of Naples. Their opponents were the imperialist Ghibellines, who were originally supporters of the HOHENSTAUFEN dynasty.

Guercino, *literally* **'the Squint-Eyed'**, *properly* **Gian-Francesco Barbieri** 1590–1666
Italian painter of the Bolognese school
Born in Cento, he painted the famous *Aurora* at the Villa Ludovisi in Rome for Pope GREGORY XV. In 1642, after the death of GUIDO RENI, he became the dominant painter of Bologna, combining in his work the liveliness and movement of the CARRACCI with a warmer, more Venetian colouring.

Guericke, Otto von 1602–86
German engineer and physicist
Born in Magdeburg, he worked in Leipzig, Helmstadt, Jena and Leyden, studying law and mathematics, mechanics and the art of fortification. An engineer in the Swedish army, he became one of the four burgomasters of Magdeburg from 1646 to 1681, elected for his service to the town as an engineer and diplomat during its siege in the Thirty Years' War. He developed a primitive vacuum pump which enabled the natural philosophers of the day to study new areas of physics. He arranged a dramatic demonstration of the effect of atmospheric pressure on a near vacuum in 1654 at Regensburg before Emperor FERDINAND III. Two large metal hemispheres were placed together and the air within pumped out. They could not then be separated by two teams of eight horses, but fell apart when the air was allowed to re-enter. He showed that in a vacuum candles cannot remain alight and small animals die, and he devised several experiments that demonstrated the elasticity of air. He also carried out some experiments in electricity and magnetism.

Guérin, Charles 1873–1907
French Symbolist poet
Born in Lunéville, he travelled in Germany and Italy, and periodically stayed in Paris. His work is confined to a few collections, including *Le Cœur solitaire* (1898, 'The Lonely Heart') and *L'Éros funèbre* (1900, 'Eros in Mourning'). A later series, *L'Homme intérieur* (1906, 'The Inner Man'), echoed his late conversion to the Catholic faith. 🕮 Joseph B Hanson, *Le Poète Charles Guérin* (1935)

Guerin, Orla 1966–
Irish journalist
Born in Dublin, she studied in the city, gaining an MA in film studies and a certificate in journalism. She worked as a reporter and presenter for the Irish public broadcasting service Radio Telefís Éireann before joining the BBC in 1995. From 1996 to 2000 she was the corporation's southern Europe correspondent, based in Rome. In 2001, she became Middle East correspondent. She won the London Press Club's Broadcaster of the Year award in 2002, and received an honorary MBE in 2004. She became the BBC's Africa correspondent in 2006.

Guérin, Pierre Narcisse, Baron 1774–1833
French historical painter
Born in Paris, a skilful painter of classical subjects but inclined to melodrama, he was appointed professor at the École des Beaux-Arts (1814), where he counted among his pupils THEODORE GÉRICAULT and EUGÈNE DELACROIX. From 1822 to 1829 he was director of the French Academy of Painting in Rome.

Guerin, Veronica 1958–96
Irish journalist
Born in Dublin, she studied accountancy and established a public relations agency, then worked as a researcher for CHARLES HAUGHEY at the New Ireland Forum, a cross-party peace organization. She served on the governing body of Dublin's National Institute of Higher Learning for two terms. In 1990, she began working as a journalist for the *Sunday Business Post*, later joining the *Sunday Tribune* (1993–94) and the *Sunday Independent* (1994–96). She won a string of awards for her investigative reporting on drugs and organized crime, which provoked threats and three separate gun attacks, the last of which was an assassination carried out by professional killers. Her story was dramatized in the 2003 film *Veronica Guerin*, which featured CATE BLANCHETT in the title role. 🕮 Emily O'Reilly, *Veronica Guerin: The Life and Death of a Crime Reporter* (1998)

Guerra, Tonino (Antonio) 1920–
Italian screenwriter
Born in Santarcangelo di Romagna, he was a poet and novelist before writing for the cinema, collaborating on the script for *Uomini E Lupi* (1956, 'Men and Wolves'). *L'Avventura* (1960, 'The Adventure') began a lengthy partnership with director MICHELANGELO ANTONIONI, and their most notable films include *La Notte* (1961, 'The Night') and *Il Deserto Rosso* (1964, 'The Red Desert'). He received Academy Award nominations for his contribution to the screenplays for *Casanova '70* (1965), *Blow-Up* (1966) and *Amarcord* (1973). He has worked extensively with some of the most distinguished film-makers in contemporary European cinema, and his finest scripts include *Cadaveri Eccellenti* (1976, 'Illustrious Corpses') for Francesco Rosi, *La Notte di San Lorenzo* (1981, 'The Night of San Lorenzo') for the Taviani brothers, *Landscape in the Mist* (1988) for Theo Angelopoulos, and *Stanno Tutti Bene* (1990, 'Everybody's Fine') for Guiseppe Tornatore.

Guerra González, Alfonso 1940–
Spanish politician
He was born in Seville. A close friend of FELIPE GONZÁLEZ from the early 1960s, Guerra was largely responsible for the transformation of the Spanish Socialist Workers' Party (PSOE) into a major political organization during the 1970s. An able administrator, he complemented the charismatic appeal of González, though his control of the party machine has been heavily personalized and intolerant of dissent. A deputy in every election since 1977, he was deputy prime minister from 1982 until his major split with González in 1991.

Guerrero, José Gustavo 1876–1958
El Salvadorian lawyer and judge
He practised in San Salvador and was the author of many books on international law. A judge of the Permanent Court of International Justice from 1930, he became its president (1937–39). He was a judge (1946–55) and president of the International Court of Justice (1946–49).

Guerrouj, Hicham el- 1974–
Moroccan athlete
Born in Berkane, he took up running at the age of 15 and won a bronze medal in the 5,000 metres in the world junior championships in 1992. He won the world indoor title in the 1,500 metres in 1995 and went on to set six world records at various

distances, becoming in 1999 the first athlete to hold world record times in the mile and the 1,500 metres, both indoors and outdoors. The dominant figure in middle-distance running, he won the 1,500 metres at the world championships in 1997, 1999 and 2001 but, against expectation, failed to win gold in the Olympics of 1996 and 2000. However, he more than made up for those disappointments at the Athens Olympics in 2004, winning gold in the 1,500 metres and the 5,000 metres.

Guesclin, Bertrand du c.1320–1380
French soldier, Constable of France
Born near Dinan, he took part in the contests for the dukedom of Brittany. After King JOHN II's capture at Poitiers in 1356, du Guesclin displayed military skill against the English, particularly at Rennes (1356) and Dinan (1357), until he was taken prisoner at Auray and ransomed. He next supported Henry of Trastamare against PEDRO, the Cruel, King of Castile, but was defeated and taken prisoner by EDWARD, THE BLACK PRINCE (1367). Again ransomed, he defeated Pedro in 1309, and crowned Henry of Trastamare, but was recalled by CHARLES V of France to be made Constable of France. In 1370 he opened his campaigns against the English, and soon nearly all their possessions were in the hands of the French. He died during the Siege of Châteauneuf de Randon.

Guest, Sir Josiah John 1785–1852
Welsh industrialist
Born in Dowlais, Glamorgan, he inherited the Dowlais Iron Company founded by his grandfather, John Guest, and made it the leading iron producer in South Wales. Guest was interested in the welfare of his workers and in Welsh culture. In 1833 he married Lady Charlotte Bertie, later CHARLOTTE SCHREIBER, and she participated fully in his industrial and cultural concerns.

Guettard, Jean Étienne 1715–86
French botanist, invertebrate palaeontologist, stratigrapher and geomorphologist
Born in Étampes, Île-de-France, he studied medicine in Paris. He subsequently became a physician and accompanied the Duke of Orléans on his travels as keeper of his natural history collections. In 1746 he published a geological map of part of northern France with stratal boundaries and later produced another in which he attempted to link the geology of France with that of England; these were amongst some of the earliest geological maps to be prepared. Guettard demonstrated that the distribution of plants could be used as a means of mapping outcrops. He independently recognized that fossils are the remains of once-living organisms and named some invertebrate genera. He also perceived the erosional and depositional roles of running water, and was the first to conclusively demonstrate the volcanic character of the Auvergne (1752). His mineralogical map of western Europe was published in 1780.

Guevara, Che, *properly* **Ernesto Guevara de la Serna** 1928–67
Argentine Communist revolutionary leader
Born in Rosario, he graduated in medicine at the University of Buenos Aires (1953), then joined FIDEL CASTRO's revolutionary movement in Mexico (1955), played an important part in the Cuban revolution (1956–59) and afterwards held government posts under Castro. An activist of revolution elsewhere, he left Cuba in 1965 to become a guerrilla leader in South America, and was captured and executed by goverment troops in Bolivia while trying to foment a revolt. He became an icon for left-wing youth in the 1960s. He wrote *Guerrilla Warfare* (1961) and *Reminiscences of the Cuban Revolutionary War* (1968). 🕮 John Lee Anderson, *Che Guevara: A Revolutionary Life* (1997)

Guevara, Luis Vélez de 1570–1644
Spanish dramatist
Born in Ecija, he wrote many plays in the style of LOPE DE VEGA. His novel *El Diablo cojuelo* (1641, 'The Limping Devil') was used as the model for ALAIN LESAGE's *Le Diable boiteux*. 🕮 F E Spencer and R Schevil, *The Dramatic Works of Luiz Vélez de Guevara* (1937)

Guggenheim, Meyer 1828–1905
US industrialist
Born in Langnau, Switzerland, he emigrated to the USA in 1847 and made a fortune in the copper industry. He had seven sons, including the famous philanthropists Simon Guggenheim (1867–1941), who established the Guggenheim Foundation (1925) to provide scholars, writers and artists with grants for studying or working abroad, and Solomon Robert Guggenheim (1861–1949), who endowed the Solomon R Guggenheim Museum (1937) in New York City. His granddaughter, PEGGY GUGGENHEIM, was also an art patron.

Guggenheim, Peggy (Marguerite) 1898–1979
US art collector
Born in New York City, she married in 1922 but divorced after eight years and went to live in Paris (1930–1941), socializing with all the prominent artists of the time, and purchasing many paintings by new (now famous) artists. During World War II she returned to the USA with the artist MAX ERNST, to whom she was married (1941–45), and opened a gallery called 'Art of This Century' in New York. There the works of European artists, as well as those of JACKSON POLLOCK, MARK ROTHKO and HANS HOFMANN, were exhibited, changing the course of US art. After the war, Guggenheim moved to Venice, where she lived on the Grand Canal in the Palazzo Venier dei Leoni, which now houses the famous Guggenheim Collection.

Guicciardini, Francesco 1483–1540
Italian historian, lawyer and diplomat
Born in Florence, he became professor of law there, and also practised as an advocate. He served as Florentine ambassador in Spain (1512–14), and became papal governor of Modena (1516), Reggio (1517), Parma (1521), the Romagna (1523) and Bologna (1531). Retiring from the papal service in 1534, he secured the election of COSIMO DE' MEDICI as Duke of Florence, but, disappointed by the post of mayor of the palace, withdrew to Arcetri, where he wrote his *Storia d'Italia*, an analytical history of Italy from 1494 to 1532. 🕮 Roberto Ridolfi, *The Life of Francesco Guicciardini* (1960, Eng trans 1968)

Guiccioli, Teresa Gamba Ghiselli, Countess 1801–73
Italian noblewoman and mistress
The daughter of a Ravenna noblewoman, she was married in 1817 to the 60-year-old Count Alessandro Guiccioli. In 1851 she married the French Marquis de Boissy (1798–1866). She was the mistress of Lord BYRON and later wrote *Lord Byron jugé par les témoins de sa vie* (1868).

Guido d'Arezzo, *English* **Guy of Arezzo**, *also called* **Guido Aretino** c.990–1050
Italian Benedictine monk and musical theorist
Born probably in Arezzo, he was a monk at Pomposa, and is said to have been prior of the Camaldolite monastery of Avellana. He contributed much to musical science and ascribed to him are the invention of the staff and the introduction of the system of using syllables to name the notes of a scale.

Guilbert, Yvette c.1869–1944
French comedienne
Born in Paris, she was a seamstress before she went on the stage. She became famous for her songs and sketches of all facets of Parisian life and, after 1890, for her revivals of old French ballads. Later, she founded a school of acting in New York City. She wrote two novels, and *La Chanson de ma vie* (1919, 'Song of My Life').

Guilhem or **Guillaume, 9th Duke of Aquitaine, 7th Count of Poitou** 1071–1126
The earliest known troubadour
The establishment in his territory (richer than those of the King of France) of the proto-Catharist mystical order of Fontevrault offers the key to the understanding of a man who, on the one hand, sacrificed an army of 60,000 men in a pointless crusade (1101), and who, on the other possibly 'invented' *amour courtois* ('courtly love') and who was, according to a contemporary, 'one of the most courtly men in the world'. He left eleven poems whose high quality no one has doubted: five are capably and amusingly obscene, one is an exercise, and the rest are exquisitely cryptic. 🕮 *Romanische Forschungen*, LXXIII (1961); R R Bezzola, *Les Origines de la littérature courtoise en occident* (1944–62)

Guillaume de Machaut c.1300–1377
French poet and musician
Born possibly in Rheims, he worked successively under the patronage of John of Luxemburg and JOHN II of France. *Le Livre du voir-dit*, written in the form of letters from the elderly poet to a girl, influenced CHAUCER. He was one of the creators of the harmonic art, and wrote a mass, motets, songs, ballads and organ music.

Guillaume, Charles Édouard 1861–1938
Swiss physicist and Nobel Prize winner
Born in Fleurier, he was educated at Neuchâtel University and at the Zurich Polytechnic, and in 1883 joined the staff and eventually became director of the Bureau of International Weights and Measures at Sèvres. In the course of the Bureau's efforts to improve the precision of its standards, he redetermined the volume of the litre, and investigated the effect of

thermal movement on standards of length. His search for a material with little or no thermal expansion or contraction led to the discovery of a nickel–steel alloy, christened 'Invar', the use of which significantly improved the accuracy and stability of timekeeping devices, precision instruments and standards of measurement. For this discovery Guillaume was awarded the Nobel Prize in physics in 1920.

Guillem, Sylvie 1965–
French ballerina
Born in Paris, she trained in gymnastics before attending the Paris Opera's ballet school, and joined the Opera ballet company in 1981. Promoted to the rank of étoile at age 19, she remained there until 1989, when she shocked colleagues by departing to join the Royal Ballet in London as a principal guest artist. Since then, she has retained that position whilst simultaneously pursuing an international career, working with companies such as the American Ballet Theatre, collaborating with experimental choreographers and, since 2001, focusing increasingly on modern dance. She has been created a Chevalier of the French Légion d'Honneur (1994) and an Officer of the Ordre National du Mérite (1999), and awarded the CBE (2003).

Guillemin, Roger (Charles Louis) 1924–
US physiologist and Nobel Prize winner
Born in Dijon, France, he graduated from Dijon University in 1942 and began a medical course. In 1949 he graduated in medicine from Lyons University and went to Montreal to study the role of the hypothalamus (a structure at the base of the brain) in regulating the activity of the pituitary gland. In 1953 he accepted an appointment at Baylor University School of Medicine in Houston. He was promoted to the chair of physiology at Baylor in 1963, and in 1970 moved to the Salk Institute, San Diego, where he remained until 1989. Guillemin and his colleagues were responsible for isolating and identifying the chemical structures of hypothalamic hormones, principally the hormone which stimulates the thyroid gland, and the hormones which release and inhibit the growth hormone. These discoveries have important applications, and potential applications for the treatment of various endocrinological diseases. In 1975 he was the first to isolate endorphins, molecules which act as opiates in the brain. Guillemin and ANDREW SCHALLY shared half of the 1977 Nobel Prize in physiology or medicine, with the other half awarded to ROSALYN YALOW. He is currently distinguished professor at the Salk Institute, La Jolla, California (1997–).

Guillén, Jorge 1893–1984
Spanish poet
He was born in Valladolid and began his career as an academic at the University of Seville. The first edition of his most important work, *Cántico* (1928), was a collection of 75 poems consisting of what the author termed 'pure poetry' – verse stripped of the prosaic, the explanatory or the merely functional. By the edition of 1950, following his flight to the USA and his establishment in a teaching post at Wellesley College, Massachusetts, that number had risen to 334. His other major work is *Homage* (1967), which includes translations as well as original poems. His critical works include *Language and Poetry* (1961). 🕮 Elizabeth Matthews, *The Structured World of Jorge Guillén* (1985)

Guillén, Nicolás 1902–89
Cuban poet
He was born in Camagüey. His poetry is famous for its relating of black to Latin-American themes. He was the first to recognize that the black presence on his island was not merely exotic. He became Cuba's best-known poet, celebrated even by the illiterate. Much of his poetry is political, as was natural from a man who for many years was a leading member of the Communist Party of Cuba. He received a state funeral. There are two volumes of his poetry in translation: *Man-Making Words* (1972) and *The Great Zoo* (1972). 🕮 L V Williams, *Self and Society in the Poetry of Nicolás Guillén* (1982)

Guillotin, Joseph Ignace 1738–1814
French doctor and revolutionary
He was born in Saintes. As a deputy in the Estates General in 1789, he proposed to the Constituent Assembly the use of a decapitating instrument, which was adopted in 1791 and was named after him, although similar apparatuses had been used earlier in Scotland, Germany and Italy.

Guimarães Rosa, João 1908–69
Brazilian novelist and short-story writer
Born in Cordisburgo, Minas Gerais, he practised as a doctor before becoming a diplomat in 1932. The chief area of his concern was that of Euclydes da Cunha, the backlands of Brazil. He shared a mutual admiration with the Peruvian José María Arguedas (1911–69), who also tried to write in a 'native' form of his own European language. *Sagarana* (1946, rev edn 1958, Eng trans 1966) collects nine 'parables of the sertão', some of them about animals. One of the most important Latin-American writers of the 20th century, he is best known for *Grande Sertão: veredas* (1956, rev edn 1958), for which its translators chose the title *The Devil to Pay in the Backlands* (1968). Of all high-calibre Brazilian novelists, only the more accessible GRACILIANO RAMOS has similar power.

Guimard, Hector Germain 1867–1942
French architect
Born in Lyons, he was the most important Art Nouveau architect active in Paris between 1890 and World War I. For his impressive architectural scheme, the *Castel Béranger* apartment block (1894–98), he designed every aspect of the building and its interiors. He is best known for the famous Paris Métro entrances of the early 1900s, many of which are still in place.

Guimerá, Ángel 1849–1924
Catalan poet and dramatist
He was born in Santa Cruz, Tenerife. His work falls into three periods, of which the first and third – for the most part historical plays – show the influence of the French Romantics. His middle period owes its preoccupation with contemporary life to IBSEN. He is regarded as the greatest Catalan dramatist. His best-known play is *Terra Baixa* (1896, 'Lowlands'), on which EUGEN D'ALBERT based his opera *Tiefland*. 🕮 J Minack, *Guimerá* (1959)

Guin, Ursula K le *See* LE GUIN, URSULA K(ROEBER)

Guinness, Sir Alec 1914–2000
English actor
Born in London, he worked briefly as a junior copywriter for an advertising firm before training to become an actor at the Fay Compton Studio of Dramatic Art. He made his stage debut in *Libel* (1934). He appeared as Osric in JOHN GIELGUD's production of *Hamlet* (1934–35) and joined the Old Vic in 1936, where he played *Hamlet* (1938). He rejoined the company in 1946 after serving in the Royal Navy throughout World War II. He made his film debut as an extra in *Evensong* (1934) but began his cinema career in earnest with the DICKENS adaptations *Great Expectations* (1946) and *Oliver Twist* (1948). Long associated with Ealing Studios, his many comic triumphs include *Kind Hearts and Coronets* (1949), *The Lavender Hill Mob* (1951) and *The Ladykillers* (1955). He received a Best Actor Oscar for *The Bridge on the River Kwai* (1957). Other films include *Tunes of Glory* (1960), *Lawrence of Arabia* (1962), *Star Wars* (1977) and *Little Dorrit* (1988). Although infrequent, his many distinguished stage performances include *The Cocktail Party* (1949–50), *Ross* (1960), *Dylan* (1964), *Macbeth* (1966), *A Voyage Round My Father* (1971), *The Old Country* (1977) and *A Walk in the Woods* (1989). His television work includes two appearances as inscrutable spycatcher George Smiley in *Tinker, Tailor, Soldier, Spy* (1979) and *Smiley's People* (1982) as well as *Foreign Field* (1993). He was knighted in 1959 and published the autobiographies *Blessings in Disguise* (1985) and *My Name Escapes Me* (1996). 🕮 R Tanitch, *Guinness* (1989)

Guinness, Sir Benjamin Lee 1798–1868
Irish brewer
Born in Dublin, the grandson of Arthur Guinness (1725–1803), founder of Guinness's Brewery (1759), he joined the firm at an early age, and became sole owner at his father's death (1855). Under him the brand of stout became famous and the business grew into the largest of its kind in the world. He was the first Lord Mayor of Dublin in 1851 and an MP from 1865 to 1868. He restored St Patrick's Cathedral (1860–65) at his own expense.

Guinness, Edward Cecil, 1st Earl of Iveagh 1847–1927
Irish brewer
The third son of Sir BENJAMIN LEE GUINNESS, he spent much of his huge fortune on philanthropic projects, including housing in Dublin and London, and gave the mansion of Kenwood at Highgate, London, with its collection of paintings, to the nation.

Güiraldes, Ricardo 1886–1927
Argentine novelist, poet and editor
Born in Buenos Aires, he founded the leading periodicals *Martin Fierro* and *Proa* with the young JORGE LUIS BORGES and others. He lived between Buenos Aires and Paris, and was thus in touch with European influences. His best novel is *Don Segundo Sombra* (1926, Eng trans 1935), the story of a childhood on a

gaucho ranch. Its style is an elegant blend of literary Argentinian and the vernacular. He was an adherent of Vedanta, and his record of his search, *El sendero* ('The Way'), was published in 1932. 🕮 G Previtali, *Ricardo Güiraldes and Don Segundo Sombra* (1963)

Guiscard, Robert c.1015–1085
Norman adventurer
He was born near Coutances, and as the champion of Pope Nicholas II he campaigned with his brother ROGER I of Sicily against the Byzantine Greeks in southern Italy and Sicily (1060–76). In 1059 the papacy recognized him as Duke of Apulia, Calabria and Sicily. He defeated the Byzantine emperor ALEXIUS I COMNENUS in 1081 at Durazzo. He interrupted his march on Constantinople (Istanbul) to liberate Pope GREGORY VII from Emperor Henri IV in Italy (1084), and died during his second attempt on Constantinople. 🕮 G A Loud, *The Age of Robert Guiscard* (2000)

Guise
French ducal family of Lorraine
The name was taken from the town of Guise. The direct line became extinct on the death (1675) of François Joseph, the 7th Duke. 🕮 H D Sedgwick, *The House of Guise* (1938)

Guise, Charles of 1525–74
French prelate
He was the son of Claude of Lorraine, 1st Duke of GUISE, and brother of MARY OF GUISE and Francis, 2nd Duke of Guise, with whom he became all-powerful in the reign of FRANCIS II. Archbishop of Rheims, he was created Cardinal of Guise in 1547. He introduced the Inquisition into France and exerted a great influence at the Council of Trent (1562–64).

Guise, Claude of Lorraine, 1st Duke of 1496–1550
French nobleman and soldier
Born at the Château of Condé, Lorraine, the fifth son of René II, Duke of Lorraine, he fought under FRANCIS I at Marignano, Italy, in 1515, but subsequently remained at home to defend France against the English and Germans, and defeated the army of the Holy Roman Emperor, CHARLES V, at Neufchâteau. He was regent during the captivity of Francis (1525–26). For suppressing a peasant revolt in Lorraine (1527) he was created Duke of Guise. His daughter, MARY OF GUISE, married JAMES V of Scotland and became mother of MARY, QUEEN OF SCOTS.

Guise, Francis, 2nd Duke of, *called* **Le Balafré ('the Scarred')** 1519–63
French soldier and politician
The son of Claude of Lorraine, 1st Duke of GUISE, he commanded the expedition against Naples in 1556, and took Calais (1558), bringing about the Treaty of Château Cambrésis (1559). He and his brother, Cardinal CHARLES OF GUISE, shared the main power in the state during the reign of FRANCIS II (of France). They headed the Roman Catholic Party, sternly repressing Protestantism. With the Duc de MONTMORENCY, he defeated the Huguenots at Dreux (1562), and was besieging Orleans when he was assassinated by a Huguenot.

Guise, Henri, 3rd Duc de 1550–88
French soldier and politician
The son of Francis, 2nd Duke of GUISE, he was one of the contrivers of the St Bartholomew's Day Massacre (1572) and was the head of the Holy League against the BOURBONS (1576).

Guise, Mary of *See* MARY OF GUISE

Guitry, Sacha 1885–1957
French actor and dramatist
Born in St Petersburg, Russia, the son of French actor-manager Lucien Guitry (1860–1925), he first appeared on the stage in Russia with his father's company. His first appearance in Paris was in 1902, still under his father's management. He went to London in 1920 with *Nono*, a play written when he was 16. It starred the second of his five wives, YVONNE PRINTEMPS. He wrote nearly a hundred plays, mostly light comedies, many of which have been successfully performed in English. He also wrote and directed several delightful films, including *Le Roman d'un tricheur* (1936, *The Tale of a Cheat*) and *Les Perles de la couronne* (1937, *The Pearls of the Crown*). 🕮 J Harding, *Sacha Guitry, the Last Boulevardier* (1968)

Guizot, François Pierre Guillaume 1787–1874
French historian and politician
Born in Nîmes, of Huguenot stock, he went to Paris in 1805 to study law, but soon drifted into literature, and in 1812 became professor of modern history at the Sorbonne. As a Liberal, he was deprived of his appointments in 1821, and in 1825 was prohibited from lecturing. With some friends he then published *Mémoires relatifs à l'histoire de France jusqu'au 13 siècle* (31 vols, 'Memoirs Concerning the History of France up to the 13th Century) and *Mémoires relatifs à la Révolution d'Angleterre* (25 vols, 'Memoirs Concerning the English Revolution'), and edited translations of SHAKESPEARE and Henry Hallam (1777–1859). Restored to his chair in 1828, he began his famous lectures, later published, on the history of civilization. Elected to the Chamber (1830), he became minister of the interior (1830), then minister of public instruction (1832), establishing a system of primary education. In 1840 he went to London as ambassador, but was recalled to replace LOUIS THIERS as the king's chief adviser. He relapsed into reactionary methods of government which were partly responsible for the revolution of 1848 and the fall of LOUIS PHILIPPE, with whom he escaped to London. After the coup d'état of 1851 he devoted himself entirely to historical scholarship.

Gujral, Inder Kumar 1919–
Indian politician
Born in Jhelum (now in Pakistan), he was educated at the Forman Christian College and Hailey College of Commerce in Lahore, and at Punjab University. He was imprisoned (1930–31 and again in 1942) by the British for his involvement in the freedom movement, and settled in India on partition in 1947. He became an MP in 1959 and served as minister of external affairs (1989–90 and 1996–97) before being named prime minister of India (1997–98) at the head of a United Front coalition, and working to improve relations between India and Pakistan. In 1998 he became chairman of the Parliamentary Committee on External Affairs. He retired from politics in 1999.

Gulbenkian, Calouste Sarkis 1869–1955
British financier, industrialist and diplomat
Born in Scutari, Turkey, of Armenian descent, he entered his father's oil business in Baku in 1888. After becoming a naturalized British subject in 1902 he brought the Russians into the new Royal Dutch–Shell merger and in 1907 he arranged for the latter to break into the US market, thus laying the foundations of an important British dollar asset. In 1916 he organized French entry into the Turkish Petroleum Company, instead of the Germans, and between 1921 and 1928 he did the same for the Americans. In 1940 in Vichy France, the five-per-cent Iraq Petroleum Company interest was confiscated by Great Britain, and he was declared an 'enemy under the Act', whereupon he assumed Persian citizenship. From 1948 to 1954 he negotiated oil concessions between the USA and Saudi Arabia. He left $70 million and vast art collections to finance an international Gulbenkian Foundation. His son Nubar Sarkis Gulbenkian (1896–1972), philanthropist and *bon vivant*, was commercial attaché to the Iranian embassy (1926–51, 1956–65) and until his father's death worked with him. 🕮 Ralph Hewins, *Mr Five Per Cent: The Biography of Calouste Gulbenkian* (1957)

Guldberg, Cato Maximilian 1836–1902
Norwegian mathematician and chemist
Born in Christiania (Oslo), he went to the University of Christiania in 1854 to study mathematics and science. He became a teacher at the Royal Military Academy (1860), professor of applied mathematics in the Royal Military College (1862), a lecturer at the University of Christiania (1867) and finally professor of applied mathematics there (1869). He is best known for his work in collaboration with his brother-in-law PETER WAAGE, which established the law of mass action, stating that the rate of a homogeneous chemical reaction is proportional to the concentrations of the reacting substances (1864).

Gullstrand, Allvar 1862–1930
Swedish ophthalmologist and Nobel Prize winner
Born in Landskrona, he studied medicine at the universities of Uppsala and Vienna, before becoming chief physician and, in 1892, director at the Stockholm Eye Clinic. Two years later he became professor of ophthalmology at Uppsala University. In his investigations into physiological optics, Gullstrand developed mathematical formulae which facilitated the treatment of conditions such as astigmatism. He also developed new techniques for the examination of the eye, including the Gullstrand ophthalmoscope, used to examine the eye for arteriosclerosis and diabetes mellitus. He was awarded the 1911 Nobel Prize in physiology or medicine for his first work on the dioptrics of the eye.

Gully, John 1783–1863
English sportsman
He was born in Wick, near Bristol. A butcher by trade, he was imprisoned for debt, which he paid from the proceeds of an

informal boxing match. He later became the British heavyweight boxing champion (1806–08). After he retired from the ring he took up horse-racing and his horses won the Derby three times (1832, 1846, 1854) as well as the St Leger in 1832 and the Two Thousand Guineas in 1844 and 1854. He was MP for Pontefract (1832–37), and bought coalmines in County Durham. He was also the father of 24 children (by two wives).

Gumilev, Nikolai Stepanovich 1886–1921
Russian poet
He was a leader of the Acmeist school, which revolted against Symbolism. His exotic and vivid poems include *Kolchan* (1915, 'The Quiver'), about war and adventure, and *Kostyor* (1918, 'The Pyre') and *Ognennyi stolp* (1921, 'The Pillar of Fire'), which contain his best pieces. He also wrote criticism and translated French and English poetry. He was shot as a counter-Revolutionary. He was married to the poet ANNA AKHMATOVA. 🕮 L I Strekhobsky, *Craftsman of the Word* (1949)

Gummer, John Selwyn 1939–
English Conservative politician
Born in Stockport, he was educated at King's School, Rochester, and Selwyn College, Cambridge. After graduating from university he became a successful business publisher. In 1970 he was elected Conservative MP for Lewisham West. Although he was defeated in the 1974 general election, he returned to Parliament in 1979 as Conservative MP for Eye (Suffolk Coastal from 1983). He was secretary of state for agriculture (1989–93) and secretary of state for the environment (1993–97). He retained his seat in the 1997 general election when Labour came to power. A former member of the General Synod of the Church of England, he left the Church in the early 1990s in protest at its decision to allow the ordination of women; he then became a Roman Catholic.

Gundelach, Finn Olav 1925–81
Danish diplomat
Born in Vejle, he attended the University of Aarhus, gaining a degree in economics. He had a distinguished career in the Danish diplomatic service, culminating in his appointment as ambassador to the European Economic Community in 1967. He directed the negotiations for Denmark's entry into the Community on 1 January, 1973, and became his country's first European Commissioner. He was promoted to vice-president of the new European Commission under ROY JENKINS in 1977 and was given charge of the EEC's common agricultural policy, in which he attempted to maintain a better balance between farmers and consumers than had previously been the case.

Gundicarius, *also known as* **Gunther** or **Gunnar** c.385–437 AD
First recorded King of the Burgundians
He was an ally of the Romans, but was killed when his army was annihilated by the Huns. In later Germanic and Norse heroic legend he was cast as the brother-in-law of ATTILA the Hun, who had not, in fact, taken part in the war against the Burgundians, but who was said to covet their gold, for which he put Gunnar/Gundicarius to death in a snake pit.

Gundulf 1024–1108
Norman prelate
A monk at Bec and Caen, he followed LANFRANC to England in 1070. Bishop of Rochester from 1077, he built the Tower of London, rebuilt Rochester Cathedral and founded St Bartholomew's Hospital in Chatham. The keep of Rochester Castle is also attributed to him.

Gunn, Neil M(iller) 1891–1973
Scottish novelist
He was born in Dunbeath, Caithness, the son of a fisherman. Educated at the village school, and privately in Galloway, he passed the civil service examination in 1907, and moved to London. He was in the civil service until 1937, from 1911 as an officer of customs and excise in Inverness and elsewhere in Scotland. After writing a number of short stories, he published his first novel, *Grey Coast* (1926), which was immediately acclaimed, then *The Lost Glen* (serialized in 1928) and the even more successful *Morning Tide* (1931). Other works include a historical novel on the Viking age, *Sun Circle* (1933), *Butcher's Broom* (1934), *Highland River* (1937, James Tait Black Memorial Prize), *Wild Geese Overhead* (1939), *The Silver Darlings* (1941), and the contrasting war-time novels *Young Art and Old Hector* (1942) and *The Green Isle of the Great Deep* (1944). Gunn was at his best when describing the ordinary life and background of a Highland fishing or crofting community, and when interpreting in simple prose the complex character of the Celt. His last novels are *The Well at the World's End* (1951), *Bloodhunt* (1952) and *The Other Landscape* (1954). *The Atom of Delight* (1956) is a philosophical autobiography. 🕮 F R Hart and J B Pick, *Neil M Gunn: A Highland Life* (1981)

Gunn, Thom(son) William 1929–2004
English poet
Born in Gravesend, Kent, he attended Trinity College, Cambridge, and moved to the USA in 1954. From 1990 to 1999 he was a senior lecturer in English at the University of California, Berkeley. His first collection, *Fighting Terms* (1954), labelled him a 'Movement' poet. Other volumes include the existentialist *The Sense of Movement* (1957), the contemplative *My Sad Captains* (1961), the celebratory *Moly* (1971), *The Passages of Joy* (1982), about his homosexuality, and *The Man with Night Sweats* (1992), which includes a series of elegies on men who died as a result of AIDS. *Collected Poems* and *Shelf Life*, a volume of essays, were published in 1993, and his final book of poems, *Boss Cupid*, in 2000. 🕮 A Bold, *Thom Gunn and Ted Hughes* (1976); *Thom Gunn in Conversation with James Campbell* (2000)

Gunnar *See* GUNDICARIUS

Gunnarsson, Gunnar 1889–1975
Icelandic novelist
Born in Fljótsdalur, East Iceland, he went to Denmark at the age of 18 to seek fame and fortune, and he wrote all his major works in Danish before rewriting them in Icelandic. His first novel, *Gæsten enojede, af borgslægtens historie* (1920, Eng trans *Guest the One-Eyed*, 1920), was the first Icelandic work to be turned into a feature film. He was a prolific writer, but his acknowledged masterpiece is the autobiographical novel, *Kirken paa Bjerget* (5 vols, 1923–28, Eng trans *Ships in the Sky* and *The Night and the Dream*, 1938). 🕮 E O Gelsted, *Gunnar Gunnarsson* (1926)

Gunnell, Sally Jane Janet 1966–
English track-and-field athlete
Born in Chigwell, Essex, she is the only female British athlete to have won world, Olympic, European and Commonwealth titles. Her first national title was the long jump at the Women's Amateur Athletic Association junior championships in 1980. She later won a gold medal in the 100-metres hurdles at the Commonwealth Games in 1986, and silver in 1990. She made her debut in the 400-metres hurdles in 1987, came fifth at the Olympics in 1988, and won gold medals at the Commonwealth Games in 1990 and at the Olympic Games in 1992. She became world champion in 1993 in a record time of 52.74 seconds and set a new world record in the 400-metres hurdles in Stuttgart, also winning that event in the European Cup. She won the European and Commonwealth titles in 1994, but she was put out of action for most of 1995 due to injury, and her 400-metres record was broken by Kim Batten. She retired in 1997 and now works as a television presenter. She was awarded the OBE in 1998.

Gunning, Elizabeth 1734–90
Irish socialite
Born near St Ives, Cambridgeshire, England, she was the sister of MARIA GUNNING. She married the 6th Duke of Hamilton (1752) and, on his death (1759), the future Duke of Argyll. She was created Baroness Hamilton in 1770.

Gunning, Maria 1733–60
Irish socialite
Born near St Ives, Cambridgeshire, England, she was the sister of ELIZABETH GUNNING. She went to London with her sister (1751) and married the 6th Earl of Coventry (1752).

Gunter, Edmund 1581–1626
English mathematician and astronomer
Born in Hertfordshire and educated at Christ Church, Oxford, he received a Southwark living in 1615, but in 1619 became professor of astronomy at Gresham College, London. He invented many measuring instruments that bear his name: 'Gunter's chain', the 22-yard (20.1m) long 100-link chain used by surveyors, 'Gunter's line', the forerunner of the modern slide-rule, 'Gunter's scale', a 2-foot (60cm) rule with scales of chords, tangents and logarithmic lines for solving navigational problems, and the portable 'Gunter's quadrant'. He made the first observation of the variation of the magnetic compass, and introduced the words 'cosine' and 'cotangent' into the language of trigonometry. By some accounts it was his reliability that gave rise to the expression 'according to Gunter', but others connect the expression to the chain.

Gunther *See* GUNDICARIUS

Günther, Johann Christian 1695–1723
German lyric poet
Born in Strugan, Silesia, he studied medicine but went on to live a somewhat dissolute life, and died in poverty, rejected by his

family. His poems, such as the *Leonorenlieder*, have a surprising range, and are for that period unusually direct in language and emotional expression. He wrote love lyrics notable for their sensitivity and their lack of affectation, as well as satires, political poems, religious poems, student songs and drinking songs.

Gunther, John 1901–70
US author and journalist
Born in Chicago, he was a foreign correspondent for the *Chicago Daily News* and for NBC. He established his reputation with the bestselling *Inside Europe* (1936), followed by a series of similar works, in which first-hand material is blended with documentary information to present penetrating social and political studies. Other books include *Death Be Not Proud* (1949) and *A Fragment of Autobiography* (1962).

Guðjónsson, Halldór *See* LAXNESS, HALLDÓR KILJAN

Guo Moruo (Kuo Mo-jo) 1892–1978
Chinese poet, academic and revolutionary
Born into a bourgeois Sichuan (Szechwan) family, he studied medicine in Japan, starting his writing career there by translating foreign classics into Chinese from Japanese sources. He returned to China to fight in the civil war of 1925, and his work was banned by the nationalist Guomindang (Kuomintang). His early work, including his first collection of verse, *Nü shen* (1921, Eng trans *The Goddesses*, 1958), is liberal-democratic in tone, but it became increasingly didactic and polemical as he embraced communism. His play *Zhu yuan* (1942) is a reworking of a traditional piece about a hero-poet, now with a pro-communist message grafted on to it. In 1949, immediately after the revolution, his status as grand old man of revolutionary literature was confirmed by his being appointed president of the First All-China Federation of Literature and Art Circles. He was attacked during the Cultural Revolution but returned to power in the early 1970s.

Gurdjieff, Georgei Ivanovich c.1865–1949
Armenian thinker
He was born in or near Kars. He practised as a healer in St Petersburg (1910–17) and in 1914 met PETER OUSPENSKY, who became his disciple. He left Russia during the Revolution and in 1922 moved to Fontainebleau, France, where he set up the Institute for the Harmonious Development of Man. It was here that KATHERINE MANSFIELD died in 1923. His *Beelzebub's Tales to His Grandson* (1949) circulated in manuscript during his lifetime, but was not published until after his death. A charismatic modern Christian gnostic, Gurdjieff synthesized an extraordinary and profound system – to which his novel is a non-literary and deliberately shocking guide – which influenced many writers, including RUDYARD KIPLING, ALDOUS HUXLEY, J B PRIESTLEY, CHRISTOPHER ISHERWOOD and many others. 🕮 J Moore, *Gurdjieff* (1992)

Gurdon, Sir John Bertrand 1933–
English geneticist
Born in Dippenhall, Hampshire, he was educated at Oxford, became a lecturer in the zoology department there (1965–72), and was a staff member at the Medical Research Council Laboratory of Molecular Biology, Cambridge (1972–83). Since 1983 he has been John Humphrey Plummer Professor of Cell Biology at Cambridge, and since 1991 chairman of the Wellcome Cancer Research Campaign Institute. He was elected FRS in 1971, and became a foreign member of the US National Academy of Sciences in 1980. He solved one of the central questions in biology in the 20th century, investigating the mechanism by which one cell type (the fertilized egg) gives rise to all the different cell types in the adult animal. In 1968 he transplanted a nucleus derived from frog gut into a fertilized egg, and produced a normal tadpole. This demonstrated that fully differentiated animal cells retain the genetic information to become any cell type under the correct environmental stimuli, and paved the way for future nuclear transfer experiments culminating in Ian Wilmut's (1944–) successfully cloned sheep, Dolly, in 1997. Gurdon became master of Magdalene College, Cambridge, in 1995 and was knighted the same year.

Gurevich, Mikhail Iosifovich 1893–1976
Soviet aircraft designer
Born in Rubanshchina, near Kursk, he graduated in 1925 from the aviation faculty of Kharkov Technological Institute. He was best known for the fighter aircraft produced by the design bureau he headed with ARTEM MIKOYAN, the MiG (Mikoyan and Gurevich) series.

Gurney, Sir Goldsworthy 1793–1875
English inventor
He was born in Treator, near Padstow, Cornwall. He studied medicine and practised in Wadebridge, Cornwall, and in London, but gave up to work on scientific problems. He devised an improved limelight known as the 'Drummond light', and built a series of steam carriages, one of which in 1829 travelled from London to Bath and back at the rate of 15mph (24.1kph).

Gurney, Ivor 1890–1937
English composer and poet
Born in Gloucester, he studied composition at the Royal College of Music, London, under CHARLES STANFORD. Gassed and shell-shocked in 1917, he published two volumes of poems (the first while he was in hospital): *Severn and Somme* (1917) and *War's Embers* (1919). He returned to the Royal College to study with RALPH VAUGHAN WILLIAMS, and published his first songs, *Five Elizabethan Songs* (1920), which are considered his best work. From 1922 he was confined in an asylum. Some 300 of his songs survive, and there are also around 900 poems.

Gurney, Joseph John 1788–1847
English Quaker banker and reformer
Born at Earlham Hall, he became a minister for the Society of Friends in 1818, visited North America and the West Indies (1837–40), and campaigned actively for black emancipation, prison reform and the abolition of capital punishment. He was the brother of ELIZABETH FRY.

Gursky, Andreas 1955–
German photographer
Born in Leipzig, he studied photography at the Folkwangschule in Essen and at the Staatliche Kunstakademie in Düsseldorf. He is best known for his bold, brightly coloured photographs, typically of office buildings, stock exchange floors, factories, hotels and crowds, printed on a large scale and emphasizing the patterns formed by structure and colour.

Gustav I Vasa 1496–1560
King of Sweden and founder of the Vasa dynasty
He was born in Lindholmen, Uppland, into an aristocratic Swedish family. He was taken to Denmark (1518) as a hostage on the orders of King CHRISTIAN II, but managed to escape. After the death of his father in the infamous Stockholm Bloodbath (1520), he led an uprising against Christian, captured Stockholm (1523) and was elected king by the Diet, effectively ending the Kalmar Union. An orator of impressive presence and a hard worker, Gustav imposed order and peace on the demoralized kingdom. He introduced the Lutheran Reformation, made himself head of the Swedish Church, and confiscated Catholic Church properties, using the revenues to build up a well-organized standing army and navy. He fostered schools, promoted trade, and built roads, bridges and canals. In 1544 he persuaded the Riksdag (parliament) to declare the monarchy hereditary, and was succeeded by ERIK XIV, his son by his first wife. Ruthless in dealing with opponents, he crushed a series of revolts, and left the country united and stable.

Gustav II Adolf, *originally* **Gustavus Adolphus**, *known as* **the Lion of the North** 1594–1632
King of Sweden, a champion of Protestantism
Born in Stockholm, he was the son and successor of CHARLES IX and grandson of GUSTAV I VASA. When he came to the throne in 1611 he found the country immersed in wars and disorder, but he quickly conciliated the nobility, reorganized the government, and revitalized the army. He made a favourable peace at Knäred (1613) with Denmark, which, under CHRISTIAN IV, had invaded Sweden in 1611. He defeated Russia (1613–17) and received a large part of Finland and Livonia from Poland through the Treaty of Stolbova (1617). He fought King SIGISMUND III VASA of Poland (1621–29) for the Swedish throne, took Livonia and forced a favourable six-year truce with the Treaty of Altmark (1629). This left him free to intervene directly in the Thirty Years' War (1618–48) on behalf of the Protestants against the Catholic League of the Habsburg Holy Roman Emperor, FERDINAND II, and his victorious general ALBRECHT VON WALLENSTEIN. Leaving the government in the care of the chancellor, AXEL OXENSTIERNA, he crossed to Pomerania in 1630 with 15,000 men and took Stettino. In 1631 he failed to prevent the massacre of Magdeburg by Count von TILLY, who had supplanted Wallenstein, but in September of that year he decisively defeated Tilly at Breitenfeld, near Leipzig, and took the Palatinate and Mainz. In the spring of 1632 he advanced into Bavaria, defeated and killed Tilly and captured Augsburg and Munich. Emperor Ferdinand recalled Wallenstein, and in November 1632 the two armies met in a furious battle

Gutenberg, Johannes Gensfleisch 1400–68
German printer, regarded as the inventor of printing

Gutenberg was born in Mainz, the son of a patrician called Friele Gensfleisch or Gutenberg. Between 1430 and 1444 Gutenberg was in Strasbourg, probably working as a goldsmith, and it is there (by 1439) that he may have begun printing. Living in Mainz again by 1448, he entered into partnership (c.1450) with JOHANN FUST, who financed a printing press. This partnership ended in 1455; Fust sued him for the debt when the loan was not repaid, and received the printing plant in lieu of payment. Fust carried on the concern with the assistance of his son-in-law PETER SCHÖFFER and completed the famous Bible which Gutenberg had begun, while Gutenberg, aided by Konrad Humery, set up another printing press.

Although Gutenberg is credited with the invention of printing, it is probable that rudimentary printing was practised before Gutenberg's development of the art. Apart from his Forty-Two-Line Bible, Gutenberg is credited with the *Fragment of the Last Judgment* (c.1445), and editions of AELIUS DONATUS's Latin school grammar.

📖 M E Gekker, *Gutenberg* (1991); Janet Ing, *Johann Gutenberg and His Bible: A Historical Study* (1988); Victor Scholderer, *Johann Gutenberg* (1963).

> The Gutenberg Bible, also known as the Mazarin Bible because the first copy went into the library of Cardinal MAZARIN, was a three-volume Latin work printed in columns of 42 lines – hence its other name, the Forty-Two-Line Bible.

at Lützen, near Leipzig. The Swedes won, but Gustav Adolf was killed. A compelling leader of impressive abilities and military achievement, he left Sweden the strongest power in Europe and reformed the country's central and local administration, establishing Stockholm as the administrative capital.

Gustav III 1746–92
King of Sweden
Born in Stockholm, he was the son of King ADOLF FREDERICK and Louisa Ulrika, sister of King FREDERICK II, THE GREAT, of Prussia. A brilliant and captivating figure, when he ascended the throne in 1771 he was determined to break the power of the oligarchy of nobles. He arrested the council, declared a new form of government (1772), purged the bureaucracy, and encouraged agriculture, commerce and science. He granted religious toleration, but also created a secret police system and introduced censorship. He was a patron of the arts, and wrote plays. His court became a northern Versailles, with the foundation of the Royal Opera House (1782), the Swedish Academy (1786) after the French pattern, and the Royal Dramatic Theatre (1788). With poor harvests and a failing economy creating discontent, as a diversion he launched into a war against Russia (1788–90) that proved unpopular and inconclusive, and in 1789 he assumed new royal prerogatives as absolute monarch. At the beginning of the French Revolution he encouraged Count HANS AXEL VON FERSEN to rescue the French royal family in the abortive Flight to Varennes (1791), and planned to use his army to help LOUIS XVI, but in 1792 he was shot by a former army officer, JOHAN JAKOB ANCKARSTRÖM, and later died. Married to Sofia Magdalena of Denmark, he was succeeded by his young son, GUSTAV IV ADOLF.

Gustav IV Adolf 1778–1837
King of Sweden
Born in Stockholm, he was the son and successor (1792) of GUSTAV III. During his minority the regent was his uncle Karl (Charles), Duke of Södermanland. In the first years of his reign as an absolute monarch he did much to improve Swedish agriculture with a General Enclosure Act (1803). He abandoned Swedish neutrality to declare war on France (1805) and when Russia became an ally of NAPOLEON I, the Swedes lost their last German possessions. In 1808 Sweden was attacked by Denmark, and Finland was simultaneously invaded by Russia. Tactless and autocratic, he spurned an offer of help by a British force under Sir JOHN MOORE, and Finland was annexed by Russia (1809). He was arrested in a military coup and forced to abdicate (1809). He was exiled with his family, and after divorcing his wife (1812) wandered alone in Europe for 25 years as Colonel Gustafsson until he died in Switzerland.

Gustav V 1858–1950
King of Sweden
Born in Stockholm, the son and successor (1907) of OSCAR II, he was shy and reserved by nature. He disliked pomp and spectacle and refused a coronation ceremony, thus becoming the first uncrowned king on the Swedish throne. Nevertheless, he sought to assert the personal power of the monarchy, and in 1914 he challenged the government with a call for greater spending on defence. Demands for his abdication were stilled by the outbreak of World War I, when Sweden mobilized but remained neutral. Thereafter he reigned as a popular constitutional monarch, and in World War II came to symbolize the unity of the nation. He was the longest-reigning king in Swedish history. In 1881 he married Princess Viktoria, daughter of the Grand Duke of Baden and granddaughter of Sofia of Sweden (GUSTAV IV ADOLF's daughter), thus uniting the reigning Bernadotte dynasty with the former royal House of Vasa. His nephew was Count Folke BERNADOTTE. He was succeeded by his son, GUSTAV VI.

Gustav VI 1882–1973
King of Sweden
He was born in Stockholm, the son and successor of GUSTAV V, and became a respected scholar and archaeologist and an authority on Chinese art. He married (1905) Princess Margaret (1882–1920), daughter of Prince Arthur, Duke of Connaught, and granddaughter of Queen VICTORIA, by whom he had four sons and a daughter, Ingrid, who married King FREDERICK IX of Denmark. In 1923 he married Lady Louise Mountbatten (1889–1965), sister of Earl MOUNTBATTEN of Burma. On Gustav's accession (1950) Lady Louise became the first British-born queen in Swedish history. A new constitution was under preparation during his reign, and the king worked to transform the Crown into a democratic monarchy, which helped to preserve it against political demands for a republic. As his eldest son, Gustav Adolf (1906–47), was killed in an air crash, he was succeeded by his grandson, CARL XVI GUSTAF.

Guston, Philip 1913–80
US painter
Born in Montreal, Canada, he settled in 1936 in New York City, where he was involved with the Federal Works of Art Project (1935–40). His work of the 1950s was in the Abstract Expressionist style, but from the late 1960s he introduced brightly coloured and crudely drawn comic-strip characters into his painting. A major series depicted the Ku Klux Klan.

Gutenberg, Beno 1889–1960
US geophysicist
Born in Darmstadt, Germany, he studied geophysics and mathematics at Darmstadt Technische Hochschule, and gained a PhD from Göttingen University. From 1913 to 1916 he was an assistant at the International Seismological Association in Strassburg (now Strasbourg, France), where he made two important contributions; he deduced from earthquake shock waves the existence of a zone in the mantle where seismic waves travel with low velocities (1913), and in 1914 he made the first correct determination of the depth to the Earth's core, which he concluded is liquid. At the University of Frankfurt (1924–30) he taught seismology and worked on the structure of the atmosphere. In 1929 he moved to the USA, where he accepted the chair in geophysics at the California Institute of Technology (Caltech, 1930) and became director of the Seismological Laboratory when it moved from the Carnegie Institution to Caltech in 1937.

Gutenberg, Johannes Gensfleisch *See panel above*

Gütersloh, Albert Paris von, *pseudonym of* **Albert Conrad Kiehtreiber** 1887–1973
Austrian painter and novelist
He was born in Vienna. A practitioner of Expressionism, he worked as a stage designer for MAX REINHARDT, but was also a professor of fine arts until the Nazis forced him to work in a factory. The most extraordinary of his Baroque novels is *Sonne und Mond* (1962, 'Sun and Moon'), which is, simultaneously, a massive allegory of Austria as it tottered from grand empire to shabby and always menaced republic, and a 'huge gloss on the perennially puzzling parable of the Unjust Steward'. He started this major work as early as 1935.

Guthorm or **Guthrum** d.890
Danish King of East Anglia
An opponent of King ALFRED the Great, he led a major Viking invasion of Anglo-Saxon England in 871 (the 'Great Summer Army'), seized East Anglia, and conquered Northumbria and Mercia. He attacked Wessex (878) and drove Alfred into hiding in Somerset. Alfred recovered sufficiently to defeat the Danes at the crucial Battle of Edington, Wiltshire (878). In the ensuing treaty, Guthorm agreed to leave Wessex and accept baptism as a Christian, and he and his army settled down peacefully in East Anglia. He issued coinage modelled on Alfred's and there were substantial links between the English and Danes.

Guthrie, Sir James 1859–1930
Scottish painter
Born in Greenock, Renfrewshire, the son of a minister, he began to study law at Glasgow, but abandoned this in 1877 to become an artist. Almost entirely self-taught, he was a follower of the Glasgow school, and attracted some attention in Paris with his early works. He later turned from genre to portraiture, of which he became a notable exponent. As president of the Royal Scottish Academy he was instrumental in improving the conditions and facilities of the National Galleries of Scotland.

Guthrie, Janet 1938–
US racing driver, the first woman to complete the Indianapolis 500
Born in Iowa City, Iowa, she began building and racing cars in 1962. In 1976 she became the first woman to race in a NASCAR Winston Cup event, and also that year qualified for the Indianapolis 500, but was unable to compete because of equipment failure. The following year she became the first woman to compete in the Indianapolis 500, though she did not finish, and in 1978 she competed and finished ninth, establishing herself as the first woman to complete the race. Her 1978 Indianapolis 500 driver's suit and helmet are in the Smithsonian Institution in Washington, DC; she was inducted into the International Motorsports Hall of Fame in 2006. 🕮 *Janet Guthrie: A Life at Full Throttle* (2005)

Guthrie, Samuel 1782–1848
US chemist and physician
Born in Brimfield, Massachusetts, he studied at the College of Physicians and Surgeons, New York City, and at the University of Pennsylvania. During the 1812 War with Britain, he served in the army medical corps and later practised medicine in Sacketts Harbor, New York. He is reputed to have invented percussion priming powder, and in 1830 he devised a process which rapidly converted potato starch into molasses. The following year he made chloroform by distilling chloride of lime with alcohol in a copper vessel.

Guthrie, Sir (William) Tyrone 1900–71
English theatrical producer
He was born in Tunbridge Wells, Kent, and educated at Wellington College and Oxford. After being director of the Scottish National Players and the Cambridge Festival Theatre, he produced many successful SHAKESPEARE plays at the Old Vic during the 1930s, becoming administrator of the Old Vic and Sadler's Wells (1939–45) and director of the Old Vic (1950–51). He directed many plays at the Edinburgh Festival and abroad, and founded the Tyrone Guthrie Theatre in Minneapolis, USA, in 1963. He wrote *A Life in the Theatre* (1960). He was knighted in 1961. 🕮 James Forsyth, *Tyrone Guthrie* (1976)

Guthrie, Woody (Woodrow Wilson) 1912–67
US folk singer, songwriter and author
He was born in Okemah, Oklahoma. A folk-poet in the true sense, he travelled the length and breadth of the USA and wrote hundreds of songs about his experiences, using mostly traditional country-music and blues themes. His deep concern about the plight of the poor people of the USA turned into active campaigning for trade unions and racial equality in the 1930s and 1940s, and, along with PETE SEEGER, he formed the influential radical group, the Almanac Singers. At the same time he wrote many much-loved songs for children, but it is for classic folk-song statements like 'This Land is Your Land', 'So Long It's Been Good to Know You' and 'Pastures of Plenty' that he is best remembered. His colourful autobiography, *Bound for Glory*, was published in 1943. In the 1950s his career was prematurely ended by Huntington's chorea, an inherited wasting disease; a young BOB DYLAN was among the supplicants who visited his sick-bed. His son, Arlo Guthrie (1947–), became a popular figure on both the folk and rock scenes from the late 1960s. 🕮 Ed Cray, *Ramblin' Man: The Life and Times of Woody Guthrie* (2006)

Gutiérrez, Gustavo 1928–
Peruvian theologian
He was born in Lima. Abandoning medical studies for the Roman Catholic priesthood, he studied philosophy and psychology at Louvain (1951–55) and theology at Lyons (1955–59) before ordination in Lima, becoming professor of theology at the Catholic university there in 1960. His seminal work *A Theology of Liberation* (1971, Eng trans 1973) is dedicated to 'doing' theology. This is defined as 'critical reflection on historical praxis' and is based on responding to the needs of the poor and the oppressed rather than on imposing solutions from the outside. His arguments have challenged supporters of the status quo in Latin America and practitioners of academic theology elsewhere. He explores the biblical and spiritual roots of liberation theology more deeply in *The Power of the Poor in History* (1984), *We Drink from Our Own Wells* (1984) and *On Job* (1987). He was awarded the French Legion of Honour in 1993 and the Spanish Prince of Asturias Award in 2003.

Gutiérrez Alea, Tomás 1928–96
Cuban film director
He was born in Havana and trained in law before moving to Rome in the early 1950s to study film. On his return to Cuba in 1953 he began making films supporting the struggle against the BATISTA regime, and after the revolution he helped found the national revolutionary film institute ICAIC (Instituto del Arte y Industria Cinematográfica), directing films such as *Stories of the Revolution* (1960). *Memories of Underdevelopment* (1968) gained international praise for its vivid collage portrayal of a disaffected bourgeois intellectual. Departures from this political documentary style were apparent in later films such as *The Last Supper* (1976), a historical epic, and *Strawberry and Chocolate* (1994), which featured a gay critic of the CASTRO regime and was nominated for an Academy Award.

Guttuso, Renato 1912–87
Italian painter
Born at Bagheria, near Palermo, he worked for some time in Milan and settled in Rome in 1937. He joined the outlawed Communist party in 1940, and much of his work is an allegory of life under Fascism, such as *Flight from Etna* (1938–39) and his *Crucifixion* (1941). He also opposed the Mafia, as in his *Assassination* (1948). After the war, he began to paint dramatic Realist pictures of the lives of working people, such as *The Discussion* (1959–60, Tate Modern, London), and in 1972 he was awarded the LENIN Peace Prize. In 1984 he completed a cycle of paintings on the theme of female gymnasts and football players (exhibited by the Olympic Committee in Rome and then in Los Angeles). He left major works to the Galleria d'Arte Moderna in Rome and a collection of his paintings to the town of Bagheria (Museo Guttuso, Bagheria).

Gutzkow, Karl Ferdinand 1811–78
German writer
He was born in Berlin. He was influenced by the French Revolution of 1830, and for his *Wally die Zweiflerin* (1835, 'Doubting Wally') got three months' imprisonment as a champion of the 'Young Germany' movement. He next became a journalist and in 1847 director of the Court Theatre at Dresden, having meanwhile written many dramas, the most successful being *Richard Savage* (1839) and *Zopf und Schwert* (1844, 'Pigtail and Sword'). Among his romances is *Die Ritter vom Geiste* (1850–52, 'The Knights of the Spirit'). 🕮 E W Dubert, *Karl Gutzkow und seine Zeit* (1968)

Gu Yanwu (Ku Yen-wu) 1613–82
Chinese scholar and official
He is celebrated for his loyalty to the MING dynasty and his refusal to serve the succeeding Manchu Qing (Ch'ing) dynasty. He participated in the Ming resistance movement against the Manchus in the late 1640s and later led the life of an independent scholar, rejecting all offers by the Qing authorities to enter officialdom. Gu was to serve as an inspiration for early 20th-century anti-Manchu revolutionaries.

Guy of Arezzo *See* GUIDO D'AREZZO

Guy of Lusignan d.1194
French crusader
He became King of Jerusalem in 1186 as consort of Sibylla, daughter of Amalric I, but was defeated and captured at Hattin (1187) by SALADIN, who overran most of the kingdom. On the death of his wife in 1190 the throne passed to Conrad of Montferrat (d.1192), but Guy received Cyprus as compensation, where his family ruled until 1474.

Guy, Buddy (George) 1936–
US blues guitarist and singer
Born in Lettsworth, Louisiana, he began playing in his native Louisiana, but his mature style was not formed until he moved to Chicago in 1957, where he inherited the electric urban blues style of MUDDY WATERS, B B KING and Guitar Slim (1926–59). His frenetic style won him fans in the rock audience in the 1960s, helped by admiring endorsements from JIMI HENDRIX and ERIC CLAPTON. He opened his own blues club, Legends, in Chicago in 1989, and remains a major figure in his area of music and one of its most exciting live performers. 🕮 With D Wilcock, *Damn Right I Got the Blues* (1994)

Guy, Thomas c.1644–1724
English bookseller and philanthropist
Born in Horselydown, Southwark, he began business in 1668 importing English Bibles from Holland and later he contracted with Oxford for the privilege of printing Bibles. By this means and by selling out South Sea shares, he amassed a fortune. He was MP from 1695 to 1707. In 1707 he built and furnished three wards of St Thomas's Hospital, London, and in 1722 he founded the hospital in Southwark, Guy's Hospital, which bears his name. He also built and endowed almshouses.

Guy, William 1859–1950
English dentist
Born in Kent, he studied medicine at Edinburgh, was a general physician in Cumberland, then returned to Edinburgh to learn dentistry and became partner to the Dental School's founder, JOHN SMITH, whose daughter, Helen, he married. He was dean of the school from 1899 to 1933. He put Scotland in the forefront of the drive for professionalization in dentistry, lobbying for the 1921 Act to outlaw amateur and untrained dentists from practice, and pressurizing other scientific bodies to accept dentistry as a respectable science. In 1948 he published *Mostly Memories – Some Digressions*.

Guyon, Jeanne Marie de la Mothe, *née* **Bouvier** 1648–1717
French mystic
Born in Montargis, she had planned to become a nun, but was married at the age of 16 to the wealthy and elderly Jacques de la Motte Guyon. A widow at only 28, she determined to devote her life to the poor and needy and to the cultivation of spiritual perfection. To this end, she went to Geneva (1681), but three years later was forced to leave on the grounds that her Quietist doctrines were heretical. In Turin, Grenoble, Nice, Genoa, Vercelli and Paris, where she finally settled in 1686, she became the centre of a movement for the promotion of 'holy living'. In 1688 she was arrested for heretical opinions and for having been in correspondence with Miguel de Molinos (1640–97), the leader of Quietism in Spain. Released by the intervention of Madame de MAINTENON, she was again imprisoned in 1695, and not released from the Bastille until 1702. Her works include *Les Torrents spirituels, Moyen court de faire oraison* (1685, 'The Short and Very Easy Method of Prayer'), a mystical interpretation of the Song of Solomon, an autobiography, letters and some spiritual poetry.

Guyot, Arnold 1807–84
US geographer
Born in Boudevilliers, Switzerland, he became professor of geology at Neuchâtel (1839), and studied glaciers in Switzerland with LOUIS AGASSIZ. In 1848 he followed Agassiz to the USA, where he lectured at the Lowell Institute on *Earth and Man* (1853), and in 1854 became professor of physical geography and geology at Princeton. In charge of the meteorological department of the Smithsonian Institution, he published *Meteorological and Physical Tables*. He wrote *Earth and Man* (1849), and was joint editor of *Johnson's Cyclopaedia* (1874–77).

Guyton de Morveau, Louis Bernard, Baron 1737–1816
French lawyer and chemist
Born in Dijon, Burgundy, he practised law during much of his life, notably as a provincial prosecutor, but devoted his leisure to studying and teaching chemistry. In 1791 he was elected a member of the legislative assembly. From 1795 to 1805 he was director of the École Polytechnique and was Master of the Mint from 1800 to 1814. He was made a baron of the French Empire in 1810. He adopted the views of ANTOINE LAVOISIER on combustion, and in the 1780s he was involved with Lavoisier, CLAUDE LOUIS BERTHOLLET and ANTOINE FRANÇOIS FOURCROY in revising chemical nomenclature and publishing *Méthode d'une nomenclature chimique* (1787, 'Method of Chemical Nomenclature'). He wrote many scientific articles and several books, and his interests spanned mineralogy, applied chemistry, metallurgy and balloon flight.

Guzmán, Martín Luis 1887–1976
Mexican novelist, editor and journalist
He was born in Chihuahua. Originally a lawyer, he became a supporter of FRANCISCO MADERO, and then, after the latter's assassination, private secretary to PANCHO VILLA. Later a revolutionary who could not abide revolutionaries, he abandoned Mexico for New York and Madrid, but finally returned in 1936. With Mariano Azuela (1873–1952), Guzmán was the most important novelist of the revolution, all the events of which he recorded in his fiction. *El águila y la serpiente* (1928, Eng trans *The Eagle and the Serpent*, 1930), which is partly autobiographical, became the most famous of all Mexican novels of the revolution. *La sombra del caudillo* (1929, 'In the Shadow of the Leader'), his best novel, deals with the dominance of Obregón. His *Memorias de Pancho Villa* (1938–51, Eng trans *Memoirs of Pancho Villa*, 1965) is certainly a novel, but is told in the authentic voice of the illiterate caudillo. 🕮 W M Langford, *The Mexican Novel Comes of Age* (1971); J S Brushwood, *Mexico in Its Novel* (1970)

Guzmán Blanco, Antonio 1829–99
Venezuelan politician
Born in Caracas and educated in Europe, he was violently anticlerical and a bitter opponent of JOSÉ ANTONIO PÁEZ. He was vice-president from 1863 to 1868, when he was driven from office. He then headed a revolution which restored him to power in 1870, and became dictator, holding the presidency on three occasions (1873–77, 1879–84, 1886–88). He was prevented from returning from a visit to Paris by a rising in Caracas, and died in exile. 🕮 George S Wise, *Caudillo: A Portrait of Guzmán Blanco* (1951)

Gwathmey, Charles 1938–
US architect
Born in Charlotte, North Carolina, he studied at the University of Pennsylvania and at Yale. As a member of the 'New York Five' in the 1960s, he was encouraged by the patronage of PHILIP JOHNSON. He has won the American Institute of Architects (AIA) House award ten times (1968–82), and became a Fellow of the AIA in 1981. Having become a partner in Gwathmey Seigel and Associates (1971), he built a reputation for business architecture, including buildings such as the Library and Science Building, Westover School, Connecticut (1979) and the Fogg Art Museum extension, Harvard (1991). 🕮 Peter Arnell and Ted Bickford (eds), *Charles Gwathmey and Robert Seigel: Buildings and Projects, 1964–1984* (1984)

Gwyn, Nell (Eleanor), *also spelt* **Gwynn** or **Gwynne** c.1650–1687
English actress, and mistress of Charles II
Born of humble parents, she lived precariously selling oranges before establishing herself as a comedienne at Drury Lane, London, especially in breeches parts. The first protector of 'pretty, witty Nell' was Lord Buckhurst, but the transfer of her affections to CHARLES II was genuine. She had at least one son by the king – Charles Beauclerk, Duke of St Albans – and James Beauclerk is allegedly a second. She is said to have urged Charles to found Chelsea Hospital. 🕮 Bryan Bevan, *Nell Gwynn* (1969)

Gwynn, Stephen Lucius 1864–1950
Irish biographer and literary historian
Born in Dublin, the grandson of WILLIAM SMITH O'BRIEN, and educated at Brasenose College, Oxford, he became a schoolmaster and then a journalist in London (1896–1904). He moved into Irish nationalist politics as MP for Galway (1906–18), and later wrote a fine memoir of his leader, *John Redmond's Last Years* (1919). His wife became a Roman Catholic and their sons prominent Roman Catholic intellectuals. His literary output was prodigious, his *Masters of English Literature* (1904) proving a great bestseller. Perhaps his most remarkable work is *Experiences of a Literary Man* (1926), on the meaning of life in the midst of literature.

Gwynne, Nell *See* GWYN, NELL

Gwynne-Vaughan, Dame Helen Charlotte Isabella, *née* **Fraser** 1879–1967
English botanist and servicewoman
Educated at Cheltenham Ladies' College and King's College London, she became head and later professor of botany at Birkbeck College, London (1909). She became an authority on fungi. In World War I she was organizer (1917) and later controller of the Women's Army Auxiliary Air Force in France, and commandant of the Women's Royal Auxiliary Air Force (1918–19). In World War II she was chief controller of the

Women's Auxiliary Territorial Service (1939–41). She retired from Birkbeck in 1944.

Gyatso, Geshe Kelsang 1931–
Tibetan Buddhist teacher and monk
He was born in western Tibet and spent 15 years at Sera Je monastery and a further 20 years in meditation in the Himalayas before moving to Great Britain in 1977. He is the Spiritual Guide at the Manjushri Buddhist Centre in Ulverston, Cumbria, and has founded numerous centres around the world. He is the founder of the New Kadampa Tradition of Buddhism, which seeks to preserve and promote the essence of Buddhist teaching in a form suited to the modern world and way of life. His books include *Clear Light of Bliss* (1982), *The Joyful Path of Good Fortune* (1990) and *Introduction to Buddhism* (1992).

Gyges d.c.648 BC
King of Lydia
He came to power in c.685 BC, when he murdered his predecessor Candaules, married his wife, and became King of Lydia. He also founded the Marmnad dynasty. Under him, Lydian power and wealth began to grow, and close relations developed with the Greeks. He initiated an aggressive policy towards the Greek cities of Asia Minor, which his successors continued down to CROESUS. He also cultivated good relations with the Oracle of Apollo at Delphi and with ASHURBANIPAL of Assyria. He died fighting an invasion of the Cimmerians.

Gyllenhammar, Pehr Gustaf 1935–
Swedish industrialist
Born in Gothenburg, he was educated at Lund University and studied international law in England, the USA and Switzerland. He joined the Volvo motor company in 1970, was managing director (1971–83), became chairman in 1983, and was executive chairman of the board of directors from 1990 to 1993. He has written numerous articles and a number of books, including *Jag tror på Sverige* (1973, 'I Believe in Sweden') and *En industripolitik för människan* (1979, 'Industrial Policy for Human Beings'). He became a trustee of Reuters in 1984 and chairman in 1999.

Gyp, *pseudonym of* **Comtesse de Mirabeau de Martel** 1849–1932
French novelist
She was born in the château of Koëtsal in Brittany, and wrote a series of humorous novels describing fashionable society. The best known are *Petit Bob* (1868, 'Little Bob') and *Le Mariage de Chiffon* (1894, 'Chiffon Marriage').

H

Haack, Susan 1945–
English philosopher
Born in Burnham, Buckinghamshire, she studied philosophy at Oxford and Cambridge, becoming a lecturer (1971) and then professor (1982) at the University of Warwick. In 1990 she moved to the University of Miami to become professor of philosophy and law. Her areas of interest include philosophy of logic and language, epistemology and metaphysics, and philosophy of science. She has held a number of international visiting professorships and published numerous books, including *Deviant Logic* (1974), *Philosophy of Logics* (1978) and *Defending Science – Within Reason* (2005). 🕮 Cornelis De Waal (ed), *Susan Haack: The Philosopher Responds to Her Critics* (2006)

Haakon I Haraldsson, the Good c.914–961
King of Norway
The youngest son of HARALD I HALFDANARSON, he was brought up in England at the Christian court of King ATHELSTAN. Co-ruler of Norway from c.940, he returned to Norway on his father's death (c.945) and seized the Crown with his half-brother, ERIK HARALDSSON, BLOOD-AXE. Haakon proved to be an able legislator and administrator. He brought missionaries from England and built some churches, but his attempts to convert Norway to Christianity met stubborn resistance. He had to fight off several attempts on the throne by the sons of Erik Blood-Axe, led by HARALD II ERIKSSON, GREY-CLOAK, and eventually died in battle against them.

Haakon or **Hakon IV Haakonsson, the Old** 1204–63
King of Norway
He was the illegitimate grandson of the usurper SVERRIR SIGURDSSON. His uncle, Duke Skúli, put him on the throne at 13 and acted as regent, but was defeated by his nephew and killed (1240). Haakon strengthened relationships with the Church, and was ceremoniously crowned (1247). He annexed Iceland and Greenland to the Norwegian Crown (1262), but on an expedition to the Western Isles of Scotland to reassert Norwegian power there (1263), he suffered a setback at the Battle of Largs against ALEXANDER III of Scotland and died at Kirkwall in Orkney on his way back to Norway.

Haakon VII 1872–1957
King of Norway
Born in Charlottenlund, Denmark, he was Prince Carl of Denmark, being the second son of King FREDERICK VIII, and was elected King of Norway (1905) when the country voted for independence from Sweden. In 1896 he married Princess Maud, youngest daughter of King EDWARD VII of Great Britain. Known as the 'people's king', he dispensed with much of the pomp of royalty. When Germany invaded Norway (1940) he refused to abdicate, and when further armed resistance was impossible, carried on the resistance from Great Britain, returning in triumph in 1945. He was succeeded by his son, OLAV V. 🕮 Tim Greve, *Haakon VII of Norway, Founder of a New Monarchy* (1983)

Haas, Ernst 1921–86
Austrian photojournalist
Born in Vienna, he became interested in photography during World War II; he famously bartered 10kg (22 lb) of margarine on the black market in return for a camera in 1946. His acclaimed photo essay on returning Austrian prisoners of war appeared first in *Heute* magazine and then in *Life* in 1949, and led to an invitation to join Magnum Photos. He experimented with colour film from the 1950s, pioneering its use, and his colour photo essays for *Life* were extremely influential. His publications include the hugely successful *The Creation* (1971).

Haavelmo, Trygve Magnus 1911–99
Norwegian economist and Nobel Prize winner
Born in Skedsmo, he was educated at the University of Oslo and became a professor there in 1948. He was awarded the 1989 Nobel Prize in economics for his pioneering work on modern econometrics (quantitative economics). His publications include *Study in the Theory of Economic Evolution* (1954) and *Investment Decision* (1960).

Haba, Alois 1893–1972
Czech composer
Born in Vyzovice, he studied in Prague, Vienna and Berlin and was made a professor at the Prague Conservatory in 1924. He composed prolifically, and was interested in the division of the scale into quarter-tones. His works include an opera, *Matka* (1931, 'The Mother'), and orchestral, chamber and piano music. His brother Karel (1898–1972) was a violinist, teacher and composer.

Haber, Fritz 1868–1934
German physical chemist and Nobel Prize winner
Born in Breslau (Wrocław, Poland), he was the son of a dyestuffs merchant and took up chemistry initially with a view to entering the family business. After study at the universities of Berlin and Heidelberg, he obtained his doctorate at the Technische Hochschule, Charlottenberg. In 1894, he became an assistant at the Technische Hochschule in Karlsruhe, and began the study of physical chemistry and its technical applications. He became *'Privatdozent* in 1896, professor extraordinary in 1898, and in 1906 professor of physical chemistry and electrochemistry. In 1904 he began to study the direct synthesis of ammonia from nitrogen and hydrogen gases, work which continued after his move to Berlin and which, in association with CARL BOSCH, led to the large-scale production of ammoniá. This was important in maintaining an explosives supply for the German war effort from 1914 to 1918. It also led to Haber receiving the Nobel Prize in chemistry in 1918. This occasioned some criticism because he had been involved in the organization of gas warfare. In 1911 he moved to Berlin to direct the Kaiser Wilhelm Institute for Physical Chemistry and Electrochemistry; however, he resigned in 1933 in protest at the anti-Jewish policies of the Nazi regime. He accepted an invitation to work in Cambridge, but decided to spend the winter first in Italy, and he died while travelling south. 🕮 M Goran, *The Story of Fritz Haber* (1967)

Haberl, Franz Xaver 1840–1910
German musicologist
Born in Ober Ellenbach, he was kapellmeister at Passau Cathedral (1862–67). He is known for his researches on 16th-century music, especially that of PALESTRINA, whose 33-volume edition of works he completed from volume X onwards.

Habermas, Jürgen 1929–
German philosopher and sociologist
Born in Düsseldorf, he was educated at Göttingen, Zurich and Bonn. He became professor of philosophy at Heidelberg (1961) then professor of philosophy and sociology at Frankfurt (1964) and was director of the Max Planck Institute, Starnberg (1971–80). The central theme of his work is the possibility of a rational political commitment to socialism in societies in which science and technology are dominant. His books include *Erkenntnis und Interesse* (1968, Eng trans *Knowledge and Human Interests*, 1971) and *Theorie des kommunikativen Handelns* (1981, Eng trans *The Theory of Communicative Action*, 1984). He was professor of philosophy at Frankfurt University from 1983 to 1994 (now emeritus).

Habington, William 1605–54
English poet
He was born in Hindlip, Worcestershire. His father was imprisoned, and his uncle Edward executed, for complicity in BABINGTON's plot. William was educated at St Omer and Paris, and married Lucy Herbert, daughter of the 1st Lord Powis. He immortalized her in his *Castara* (1634), a collection of metaphysical lyrics, and was the author of *The Historie of Edward the Fourth* (1640), and a play, *The Queen of Aragon* (1640). 🕮 K Allott, introduction and commentary to *The Poems of William Habington* (1948)

Habré, Hissène c.1930–
Chadian nationalist and politician
The son of a desert shepherd, he worked as a clerk for the French army before becoming an administrator. He joined the FAN (Forces Armées du Nord) guerrillas in the early 1970s but, having made his peace with President Malloum in 1978, he was appointed prime minister. When Goukouni seized power in 1979, Habré first became defence minister, then, supported by the CIA, took power himself in 1982. With French military assistance and support from African heads of state, he forced Libya to withdraw from northern Chad and, although uneasily, retained power until he was ousted in a coup led by IDRISS DÉBY (1990). He went to live in Senegal, where he remained despite attempts in 2000 and 2005 to extradite him for trial on charges of torture and crimes against humanity. In 2006, the African Union decided that he should be tried in Senegal.

Habsburg or **Hapsburg**
Royal dynasty of Austria–Hungary
The name comes from the castle of Habichtsburg (Hawk's Castle) on the River Aare in the Upper Rhine region (now in Switzerland), first built in the 11th century. The first Count of Habsburg was Werner I (d.1096). His descendant, Count Rudolf IV, was elected King of Germany (1273) as RUDOLF I, *de facto* the first Habsburg emperor although he was never anointed by the pope. The first recognized emperor was FREDERICK III of Germany, crowned in 1452. From that time, with one interruption from 1742 to 1745, the imperial Crown was a family possession until the Holy Roman Empire was dissolved in 1806. The zenith of Habsburg power was reached under the Emperor CHARLES V (Charles I of Spain) who presided over an empire stretching from the Danube to the Caribbean. After his death the House of Habsburg divided into two lines; the Spanish line died with CHARLES II of Spain (1700), but the Austrian line continued until the abdication of CHARLES (1887–1922), the last Habsburg-Lorraine emperor of Austria and Hungary, in 1918.

Habyarimana, Juvenal 1937–94
Rwandan soldier and politician
He was born in Gasiza, in Gisenji prefecture. He joined the National Guard and by 1973 had risen to the rank of major-general and head of the Guard. In the same year, as fighting between the Tutsi and Hutu tribes recommenced, he led a bloodless coup against President Gregoire Kayibanda and established a military regime. He founded the National Revolutionary Development Movement (MRND) as the only legal party and promised an eventual return to constitutional government.

Hácha, Emil 1872–1945
Czechoslovak lawyer and politician
Born in Trhové Sviny, Bohemia, he became president of Czechoslovakia in 1938 on EDUARD BENEŠ's resignation following the German annexation of Sudetenland; under duress, he made over the state to HITLER in 1939. He was puppet president of the subsequent German protectorate of Bohemia and Moravia. Arrested after liberation in 1945, he died in prison.

Häckel, Ernst Heinrich Philipp August *See* HAECKEL, ERNST HEINRICH PHILIPP AUGUST

Hackett, Deborah Vernon 1887–1965
Australian businesswoman
She was born in Guildford, Western Australia, the daughter of Frederick Drake-Brockman, a member of a pioneering family, and Grace Vernon Bussell, the heroine of a shipwreck from which she saved some 50 lives in 1875. Deborah's first husband, Sir John Hackett, died in 1916; in 1918 she married Frank Moulden, who became Mayor of Adelaide (1920–22) and was knighted in 1922. Inheriting a passion for geology from her father, she formed a syndicate in 1923 to mine tantalite at Port Hedland, in the north of Western Australia, and was later involved in mining tungsten in the Northern Territory; these rare metals both became invaluable in World War II. Also a lover of flying, she would sometimes travel over 30,000km (20,000 miles) in single-engined aeroplanes over Australia, and was a passenger on the first commercial flight from Australia to England in 1934. Her son by her first husband was General Sir JOHN HACKETT.

Hackett, Sir John Winthrop 1910–97
British soldier and academic
Born in Perth, Australia, and educated at Geelong Grammar School, Australia, and New College, Oxford, he was commissioned in the 8th Hussars in 1931. In World War II he served with distinction in the Middle East, Sicily, Italy and notably with the 4th Parachute Brigade at Arnhem in 1944. After the war he commanded the 7th Armoured Division as major general (1956), and was Commandant of the Royal Military College of Science (1958). He was commander-in-chief, Northern Ireland, in 1961 and of the British Army of the Rhine and of the Northern Army Group in 1966. He was Principal of King's College, University of London (1968–75), where he was professor of classics from 1977, and his publications include *I was a Stranger* (1977), *The Untold Story* (1982) and *The Profession of Arms* (1983).

Hackman, Gene (Eugene Alden) 1930–
US actor
Born in San Bernardino, California, he was a Marine and had studied journalism before pursuing acting at the Pasadena Playhouse. Working in television from 1959, he made his film debut in *Mad Dog Coll* (1961). He received Academy Award nominations for *Bonnie and Clyde* (1967) and *I Never Sang for My Father* (1970) before winning the award for his performance as the obsessive cop 'Popeye' Doyle in *The French Connection* (1971). His star roles include *The Poseidon Adventure* (1972), *The Conversation* (1974) and *Night Moves* (1975) and he played villain Lex Luthor in *Superman* (1978) and its sequels. One of US cinema's most respected and prolific character actors, he received a further Academy Award nomination for *Mississippi Burning* (1988) and won the Best Supporting Actor award for *Unforgiven* (1992). Recent films include *The Royal Tenenbaums* (2001), for which he won a Golden Globe.

Hackworth, Green Haywood 1883–1973
US lawyer and judge
He was a legal adviser to the State Department (1925–46) and the author of an authoritative *Digest of International Law* (1940–43). He became a judge of the International Court of Justice (1946–61) and was its president from 1955 to 1958.

Hackworth, Timothy 1786–1850
English locomotive engineer
Born in Wylam, Northumberland, he was manager of the Stockton to Darlington railway (1825–40), and builder of a number of famous engines, including the *Royal George* and the *Sans Pareil*, rival of GEORGE STEPHENSON's *Rocket*.

Hadamard, Jacques Salomon 1865–1963
French mathematician
Born in Versailles and educated in Paris, he became a lecturer in Bordeaux (1893–97), the Sorbonne (1897–1909), Paris, and then professor at the Collège de France and the École Polytechnique until his retirement in 1937. He was a leading figure in French mathematics throughout his career, working in complex function theory, differential geometry and partial differential equations. In 1896 he and the Belgian mathematician Charles de la Vallée Poussin independently proved the definitive form of the prime number theorem, previously conjectured in cruder forms by both ADRIEN-MARIE LEGENDRE and CARL FRIEDRICH GAUSS, and proved in a weaker form by PAFNUTII CHEBYSHEV. He lived to an exceptional age, and was still publishing mathematical work in his eighties.

Haddon, Mark 1962–
English novelist and children's writer
He was born in Northampton and educated at Oxford and Edinburgh. More than a dozen children's books, as well as episodes for children's television, preceded his acclaimed first novel, *The Curious Incident of the Dog in the Night-Time* (2004), told from the perspective of a boy named Christopher who suffers from Asperger's syndrome. That book won the Whitbread Book of the Year Award, the Art Seidenbaum Award for First Fiction and the Commonwealth Writers' Prize for best first book, all 2003. It was followed by *A Spot of Bother* (2006).

Haden, Sir Francis Seymour 1818–1910
English etcher
Born in London, he founded the Royal Hospital for Incurables, and pursued his career as a surgeon alongside that of etching. His work, which was largely concentrated in the period 1859 to 1863, revived the art of creative printing, and in 1880 he founded the Royal Society of Painter-Etchers and Engravers.

Hadfield, Sir Robert Abbott 1858–1940
English metallurgist and steel manufacturer
Born in Sheffield, he was educated locally and trained as a chemist before joining his father's steelmaking firm in 1879, becoming chairman of Hadfields in 1888 until his death. His discovery of manganese steel in 1882, when he was only 24, established his reputation. The alloy proved ideal for tramway and railway trackwork, excavating equipment and mining machinery. He followed this with research on silicon steel and on armour-piercing projectile steels. Hadfield was vain,

autocratic and very hardworking, and his entrepreneurial ability placed Hadfields among the world's leading steel firms by World War I. A prolific technical writer and publicist, he wrote several important books on metallurgy and the development of special steels, such as *Metallurgy and its Influence on Modern Progress* (1925). He was knighted in 1908, elected FRS in 1909 and made a baronet in 1917.

Hadid, Zaha 1950–
Iraqi architect
Born in Baghdad and educated at the Architectural Association, London (1972–77), she left college to start her own architectural practice. Her work, which is characterized by zigzag lines and geometric shapes, showing the influence of the Russian Constructivists earlier in the 20th century, includes the 'What a Wonderful World' Project (a centre for music, video and architecture) and one of the Pavilions at the Groningen Museum. Her design for the Vitra Fire Station was nominated for the 1994 BBC design awards. She won the competition to design the Cardiff Bay Opera House in 1994 (unbuilt), sparking off a lively debate among the local population over the value of modernist architecture. In 2004 she became the first female laureate of the prestigious Pritzker Architecture Prize. The first UK building constructed to one of her designs was the Maggie's Cancer Care Centre in Kirkcaldy, Scotland (2006).

Hadlee, Sir Richard John 1948–
New Zealand cricketer
He was born in Christchurch. He and his father Walter and brother Dayle represented New Zealand at Test level. He started his first-class career with Canterbury (1971–72), and has also played for Nottinghamshire and Tasmania. In England in 1984, he made 1,000 runs and took 100 wickets. He made his Test debut for New Zealand in 1973. In 1988 he became the first bowler to take more than 400 Test wickets, several times taking ten or more wickets in a match. He set a then world record of 431 wickets in 1990, the year he retired. He still holds the New Zealand record for most wickets in a series. He was cricket's first player to be knighted during his Test career. 🕮 Gerry Cotter, *The Test Match Career of Sir Richard Hadlee* (1991)

Hadley, John 1682–1744
English mathematician
Born in Hertfordshire, he invented a reflecting telescope (1720) and the reflecting ('Hadley's') quadrant (1730). A prominent member of the Royal Society (FRS 1717), he became its vice-president in 1728.

Hadow, Sir William Henry 1859–1937
English scholar, educationalist and musicologist
Born in Ebrington, Gloucestershire, a minister's son, he was educated at Malvern and Worcester College, Oxford, where he was successively scholar, lecturer (1884), Fellow, tutor and dean (1889) and honorary Fellow (1909). A noted lecturer in classics and music, his *Studies in Modern Music* (1892, 1895) are widely held to have marked a milestone in musical criticism. Other publications include *Sonata Form* (1896) and his highly regarded *The Viennese Period* in the *Oxford History of Music*. He was Principal of Armstrong College, Newcastle upon Tyne (1909–19), and then Vice-Chancellor of Sheffield University (1919–30). He was also chairman of the Consultative Committee set up by the Education Act of 1918, and of the Board of Education (1920–34). The most influential of the reports of the board was *The Education of the Adolescent* (1926) which called for the reorganization of elementary education, the abandonment of all-age schools and the creation of secondary modern schools. Other reports include those of 1931 (Primary School) and 1933 (Infant and Nursery Schools). He was a leading influence in English education at all levels in the 1920s and 1930s.

Hadrian, *in full* **Publius Aelius Hadrianus** AD 76–138
Roman emperor
Born probably in Rome, of Spanish origin, he was the ward and protégé of the Emperor TRAJAN. He became prefect of Syria (AD 114), and after Trajan's death was proclaimed emperor by the army (AD 117). He concluded a peace with the Parthians, having resolved to limit the boundaries of the empire in the East, and after appeasing the invaders of Moesia, he established his authority at Rome, and suppressed a conspiracy against his life (AD 118). He spent little of his reign in Rome, and from c.120 AD he visited Gaul, Germany, Britain (where he built the wall named after him from the Solway Firth to the Tyne), Spain, Mauretania, Egypt, Asia Minor and Greece. After crushing a major revolt in Judea (AD 132–34), he returned to Italy, where he died. Although at times ruthless and tyrannical, he was an able administrator, and probably the most intellectual and cultivated of all the Roman emperors. He reorganized the army and the imperial bureaucracy. A patron of the arts and architecture, he founded the Athenaeum at Rome, and among his buildings were the Pantheon, his mausoleum (now part of the Castle of St Angelo) and the magnificent villa at Tibur. He also founded Adrianopolis. 🕮 Bernard W Henderson, *The Life and Principate of the Emperor Hadrian, AD 76–138* (1923)

Hadrian IV *See* ADRIAN IV

Haeckel or **Häckel, Ernst Heinrich Philipp August** 1834–1919
German naturalist
Born in Potsdam, he studied medicine at the universities of Würzburg, Berlin and Vienna, but later quit medicine to study anatomy at the University of Jena, where he became professor of zoology (1862–1909). He made expeditions to the Mediterranean, Madeira, Canaries, Arabia, India and elsewhere. He wrote on the radiolarians (1862), calcareous sponges (1872) and jellyfishes (1879), and contributed *Challenger* reports on deep-sea medusae (1882), Radiolaria (1887) and Siphonophora (1888). The first to attempt a genealogical tree of all animals, he postulated the idea that in its embryological development, each species illustrates its evolutionary history. Known as the 'German Darwin', he was a charismatic and enthusiastic ambassador for evolution, and many of his books, including *Generale Morphologie* (1866), *The Natural History of Creation* (1868), *The Evolution of Man* (1874) and *Welträtsel* (1899, 'The Riddle of the Universe'), became bestsellers. 🕮 Wilhelm Bölsche, *Haekel: His Life and Work* (1906)

Haffkine, Waldemar Mordecai Wolff 1860–1930
British bacteriologist
Born in Odessa, Russia, he worked as an assistant to LOUIS PASTEUR (1889–93), and as bacteriologist to the government of India (1893–1915) he introduced his method of protective inoculation against the bacteria which cause cholera, using a heat-killed culture prepared from a highly virulent strain. He became a British subject in 1899.

Hafiz or **Hafez**, *pseudonym of* **Mohammad Shams od-Din Hafez** c.1326–c.1390
Persian lyric poet
Born in Shiraz, he was named by his contemporaries Chagarlab (Sugar-lip) because of the sweetness of his poetry. His *ghazals* (short poems) are all on sensuous subjects – wine, flowers, beautiful damsels – but they also possess an esoteric significance. Like nearly all the great poets of Persia, he was of the sect of Sufi philosophers, the mystics of Islam. His name is a household word throughout Iran, and his tomb, 3km (2 miles) north-east of Shiraz, has been magnificently adorned by princes, and is visited by pilgrims from all parts of the country. 🕮 G M Wickens, 'Hafez', in *Encyclopaedia of Islam* (1971)

Hagar 19th century BC
Biblical character
She was the maid of ABRAHAM's wife, SARAH. Owing to Sarah's barrenness, Abraham had a son, ISHMAEL, by Hagar (Genesis 16), but Hagar and her son were later reluctantly expelled into the wilderness by Abraham on the request of Sarah, who was granted a child, Isaac (Genesis 21). A divine messenger came to Hagar's aid, when they had run out of water, and assured her that Ishmael would become a great nation.

Hagen, Uta Thyra 1919–2004
US actress
Born in Göttingen, Germany, the daughter of an art historian, she emigrated to the USA with her family in 1924 and grew up in Wisconsin. After studying briefly at the Royal Academy of Dramatic Art in London, she made her Broadway debut in 1938 as Nina in *The Seagull*. It was the first of a series of famous performances, others being her Desdemona opposite PAUL ROBESON in *Othello* in 1943 (her friendship with Robeson led to her being blacklisted in Hollywood) and the title role in *Saint Joan* in 1951. She also originated the role of Martha in *Who's Afraid of Virginia Woolf?* (1962). A dedicated teacher of acting, she devoted much time from 1947 to the Herbert Berghof Studio, a drama school that she founded with Herbert Berghof (1909–90), her second husband. She returned to the stage in *Mrs Klein* (1995) at an off-Broadway theatre. She received the National Medal of Arts in 2002.

Hagen, Walter Charles, *nicknamed* **the Haig** 1892–1969
US golfer
Born in Rochester, New York State, he was the first US-born winner of the British Open championship, which he won four

times (1922, 1924, 1928–29). He won the US Open twice (1914, 1919), the US Professional Golfers' Association championship five times (1921, 1924–27), a record since equalled by JACK NICKLAUS, and captained the first six US Ryder Cup teams (1927–37). He published an autobiography, *The Walter Hagen Story*, in 1956.

Hägerstrand, Torsten 1916–2004
Swedish geographer
Born in Moheda, he was educated at Lund University, and was professor there (1957–71). An instigator of the quantitative revolution in Europe, he made Lund a major centre of innovation in geographical studies and established a new economic theory in which time and space are regarded as scarce resources. His publications include the classic work *Innovation Diffusion as a Spatial Process* (1967).

Haggard, Sir H(enry) Rider 1856–1925
English novelist
He was born in Bradenham Hall, Norfolk, the son of a lawyer. Educated at Ipswich Grammar School, he went to Natal in 1875 as secretary to Sir Henry Bulwer, and next year accompanied Sir Theophilus Shepstone to the Transvaal. He returned to England in 1881, married, and settled down to a literary life. He wrote a number of books on South Africa, including *Cetewayo and his White Neighbours* (1882), which pleased the Cape politicians, but attracted no attention elsewhere. He is remembered for his 34 vivid and pacey adventure novels, especially *King Solomon's Mines* (1885). This was followed by *She* (1887), *Allan Quatermain* (1887), *Eric Bright-eyes* (1891), *The Pearl Maiden* (1903), *Ayesha: The Return of She* (1905) and many other stories. Other publications include *Rural England* (1902) and an autobiography, *The Days of My Life* (1926). 🕮 M Cohen, *Rider Haggard* (1960)

Haggard, Merle (Ronald) 1937–
US country music singer and songwriter
Born in Bakersfield, California, he is one of the most influential artists in the history of country music, as well as one of its greatest practitioners. His early experiences included serving prison sentences for various crimes, material which later surfaced in his music, as did his parents' experiences as migrants from the Oklahoma dust bowl in the 1930s. He made his first record in 1963, and went on to achieve stardom with a string of hits later in the decade. His tribute albums helped restore interest in pioneering figures JIMMIE RODGERS, BOB WILLS and Lefty Frizzell. Admired by both traditional country audiences and the emerging country rock (who forgave his occasional polemical right-wing views) and later new country factions, he has proved an enduring artist, and continues to record and perform.

Haggett, Peter 1933–
English geographer
Born in Pawlett, Somerset, he studied at Cambridge. After various university appointments at home and abroad, he became professor of urban and regional geography at Bristol University (1966–98, now emeritus). He was a leading exponent in the advance towards a unifying philosophical and methodological basis for human geography, as exemplified in his book, *Locational Analysis in Human Geography* (1965). Focusing on the 'region' as an open system, this work presented a new framework for human geography and emphasized the critical association of the earth sciences, social sciences and geometrical sciences. Later publications include *The Geographer's Art* (1990), *Measles: An Historical Geography* (1993) and *Island Epidemics* (2000). He collaborated with Andrew Cliff (his former student) and Matthew Smallman-Raynor on *The World Atlas of Epidemic Diseases* (2004). He has been honoured with the Gold Medals of both the Royal and the American Geographical Societies.

Hague, William Jefferson 1961–
English Conservative politician
Born in Wentworth, Yorkshire, he addressed the 1977 Tory conference and received a standing ovation. He was educated at Oxford, became a political adviser to the Treasury (1983) and entered parliament as MP for Richmond, Yorkshire, in 1989. He rose quickly to be Secretary of State for Wales (1995–97) and he became party leader when JOHN MAJOR resigned following Labour's landslide win in the 1997 general election. He then resigned following defeat in the 2001 general election and was succeeded by IAIN DUNCAN SMITH. He became shadow foreign secretary under DAVID CAMERON in 2005.

Hahn, Kurt Matthias Robert Martin 1886–1974
German educationalist
Born in Berlin, he was educated at Wilhelm Gymnasium, Berlin, and Christ Church, Oxford, and the universities of Berlin, Heidelberg, Freiburg and Göttingen. He founded a school at Castle Salem in Germany, based on his ideas of what an English public school was supposed to be. In 1933 he fled from Nazi Germany to Great Britain, and in 1934 founded Gordonstoun School in Morayshire, Scotland. On similar lines to his school in Germany, Gordonstoun emphasized physical rather than intellectual activities in education, giving boys opportunities for self-discovery through practical tasks and allowing them to move up academically at their own pace. His ideas attracted the attention of the Admiralty and the War Office, and greatly affected the development of such establishments as the Outward Bound Schools (1941) and the Atlantic Colleges (1957).

Hahn, Otto 1879–1968
German radiochemist and Nobel Prize winner
Born in Frankfurt am Main, he studied at the universities of Marburg and Munich. He was appointed as an assistant at Marburg, but soon a growing interest in radiochemistry took him to the laboratories of Sir WILLIAM RAMSAY in London (1904–05) and Lord RUTHERFORD in Montreal (1905–06). From 1906 to 1912 he was at the University of Berlin under EMIL FISCHER and from 1912 to 1944 (with an interruption for service in World War I) he worked at the Kaiser Wilhelm Institute for Chemistry, of which he was director from 1928. When the Kaiser Wilhelm institutes were reorganized after World War II, Hahn became president of the MAX PLANCK Gesellschaft in Göttingen. His research from 1904 onwards was devoted entirely to the chemistry of the radioactive elements and their decay products. From 1907 to 1938 much of his work was done in collaboration with the Austrian physicist LISE MEITNER. Hahn was involved in the discovery of several new radio-elements, among them radiothorium, radioactinium and mesothorium, but his best-known research was on the irradiation of uranium and thorium with neutrons. This work, initially in association with Meitner and later with Fritz Strassmann, led to the discovery of nuclear fission (1938). For this Hahn received the Nobel Prize in chemistry in 1944. Greatly upset that his discovery led to the horror of Hiroshima and Nagasaki, he became a staunch opponent of nuclear weapons.

Hahn, Reynaldo 1874–1947
French composer, singer, conductor and writer on music
Born in Caracas, Venezuela, he was taken to Paris at the age of three. He studied composition with JULES MASSENET, and soon showed precocious musical gifts, especially in his early songs. He became a salon favourite and the intimate friend of MARCEL PROUST. He was for many years director of music at the Casino of Monte Carlo. His compositions included ballets, musical comedies (1923, *Ciboulette*; 1925, *Mozart*) and instrumental works, but he is best remembered for his songs, especially the *Chansons grises*, settings of lyrics by PAUL VERLAINE. He also wrote musical settings for Proust's *Les plaisirs et les jours* (1896).

Hahnemann, (Christian Friedrich) Samuel 1755–1843
German physician and founder of homeopathy
Born in Meissen, he studied at Leipzig, and for ten years practised medicine. After experiments on the curative power of cinchona bark (the source of quinine), he came to the conclusion that drugs produce a very similar condition in healthy persons to that which they relieve in the sick. This was the origin of his famous principle, *similia similibus curantur* (like cures like), which he contrasted to the belief of allopathic (ie ordinary) practitioners. His own infinitesimal doses of medicine provoked the apothecaries, who refused to dispense them. Accordingly, he illegally gave his medicines to his patients, free of charge, and was prosecuted in every town in which he tried to settle from 1798 until 1810. He then returned to Leipzig, where he taught his system until 1821, when he was again driven out. He retired first to Köthen, and then in 1835 to Paris. He spent much time undertaking 'proving' of a number of drugs, which then entered the homeopathic pharmacopoeia. Many of these were herbal in origin, and subsequent homeopathists have continued to emphasize natural remedies. By the time of his death, his system had been taken up by practitioners throughout Europe and North America, although their relations with ordinary doctors were often bitter. 🕮 T M Cook, *Samuel Hahnemann: The Founder of Homeopathic Medicine* (1981)

Hahn-Hahn, Ida Marie Luise Gustave, Gräfin, *née* **Hahn** 1805–80
German novelist
She was born in Tressow, Mecklenburg-Schwerin, and wrote society novels influenced by the 'Young Germany' movement. She later became converted to Catholicism and founded a convent in Mainz (1854). 🕮 E I Schmid Juergens, *Ida, Gräfin Hahn-Hahn* (1933)

Haidar or **Hyder Ali** 1728–82
Indian soldier and Muslim ruler of Mysore
He was born in Budikote. By his bravery he attracted the notice of the Maharaja of Mysore's prime minister, and soon rose to power, ousting both prime minister and raja (c.1761). He conquered Calicut, Bednor and Cannanore, and by 1766 his dominions included more than 218,000 sq km (84,000 square miles). He waged war against the Marathas and the British. Defeated by the Marathas (1772), he claimed British support, but when this was refused he became their enemy. Taking advantage of the war between Great Britain and the French (1778), he and his son TIPPOO SAHIB routed the British in the Carnatic, but were defeated in three battles by Sir EYRE COOTE. 🕮 N K Sinha, *Haidar Ali* (1941)

Haig, Alexander Meigs, Jnr 1924–
US soldier and public official
Born in Philadelphia, Pennsylvania, and educated at West Point, the Naval War College and Georgetown University, he joined the US army in 1947. He served in Korea (1950–51) and Vietnam (1966–67) and was made a general in 1973. During the NIXON presidency he was deputy to HENRY KISSINGER in the National Security Council, and became White House Chief of Staff (1973–74) at the height of the Watergate scandal. Returning to military duty in 1974 he became NATO's Supreme Allied Commander, Europe (1974–79) but went back to civilian life as president of United Technologies Corporation. He was President REAGAN's Secretary of State (1981–82), but resigned as a result of policy differences. He unsuccessfully sought the Republican Party's presidential nomination in 1988. In 1992 he published his autobiography, *How America Changed the World*. 🕮 Roger Morris, *Haig: The General's Progress* (1982)

Haig (of Bemersyde), Douglas Haig, 1st Earl 1861–1928
Scottish field marshal
Born in Edinburgh, he was educated at Oxford and Sandhurst. Active service in Egypt and South Africa, followed by assignments in India, led to his appointment in 1911 as General Officer Commanding Aldershot. In August 1914 he took the 1st Corps of the British Expeditionary Force to France, and succeeded Sir JOHN FRENCH as commander-in-chief in December 1915. Haig was forced to forgo a war of movement and wage a costly and exhausting war of attrition, for which he was much criticized; it was a task hampered by the progressive deterioration of the French after the failure of the Nivelle offensive of 1917, and by LLOYD GEORGE's distrust and attempts to control strategy. However, under the overall command of Marshal FOCH, Haig led the final successful offensive of August 1918. In the post-war years he devoted himself to the care of ex-servicemen, organizing the Royal British Legion. His earldom was awarded in 1919. 🕮 John Charteris, *Field Marshal Earl Haig* (1929)

Haigh, John George 1909–49
English murderer
Born in Stamford, Lincolnshire, he was a company director. He shot a widow (1949) and subsequently disposed of her body by reducing it in sulphuric acid. A vital clue leading to his conviction and execution was a plastic denture which had resisted the acid. He probably murdered five others in the same way, and although the motive was money, it is possible that he drank his victims' blood.

Hailes, Sir David Dalrymple, Lord 1726–92
Scottish jurist and historian
Born in Edinburgh, he became a judge of the Court of Session and a judge of the High Court of Justiciary in 1776. He is best known for his historical work, the chronological *Annals of Scotland* (1776–79), which is still a valuable work.

Haile Selassie I, *previously* **Prince Ras Tafari Makonnen** 1891–1975
Emperor of Ethiopia
He was born near Harer. Son of Ras Makonnen, he led the revolution (1916) against Lij Yasu, and became regent and heir to the throne. In 1930 he became Emperor of Ethiopia. A Coptic Christian, he westernized the institutions of his country and took it into the League of Nations. He settled in England after the Italian conquest of Abyssinia (1935–36), but in 1941 was restored after the liberation by British forces. In the early 1960s he played a crucial part in the establishment of the Organization of African Unity (OAU). Opposition to his reign had existed since 1960, and the disastrous famine of 1973 led to economic chaos, industrial strikes and mutiny among the armed forces. In 1974 he was deposed in favour of the Crown Prince, though he was allowed to return to his palace at Addis Ababa. Suspicion persists about the cause of his death. Accusations of corruption levelled against him and his family have not destroyed the unique prestige and reverence in which he is held by certain groups, notably the Rastafarians. 🕮 Peter Shwab, *Haile Selassie I* (1979)

Hailey, Arthur 1920–2004
Canadian novelist
He was born in Luton, Bedfordshire, England, and became a naturalized Canadian in 1947. He wrote many bestselling blockbusters about disasters, several of which enjoyed a new lease of life when filmed. Titles include *Hotel* (1965), *Airport* (1968), *Wheels* (1971), *Strong Medicine* (1984), *The Evening News* (1990) and *Detective* (1997).

Hailsham, Quintin McGarel Hogg, 2nd Viscount 1907–2001
English jurist and politician
He was born in London, the son of Douglas Hailsham. Educated at Eton College and Christ Church, Oxford (president of the Union, 1929), he became a Fellow of All Souls in 1931. In 1932 he was called to the Bar and from 1938 to 1950 he was MP for Oxford City. He succeeded to the title in 1950, and, among several political posts, was First Lord of the Admiralty (1956–57), Minister of Education (1957), Lord President of the Council (1957–59, 1960–64), and chairman of the Conservative Party (1957–59). He was Minister for Science and Technology (1959–64), and Secretary of State for Education and Science (1964). In the Conservative leadership crisis of 1963, he renounced his peerage for life, and was re-elected to the House of Commons in the St Marylebone by-election. He was Opposition Minister for the Home Office from 1966. In 1970 he was created a life peer (Baron Hailsham of Saint Marylebone) and became Lord Chancellor (1970–74, 1979–87). His publications include *The Case for Conservatism* (1947), his autobiography, *A Sparrow's Flight* (1990), *On the Constitution* (1992) and *Values: Collapse and Cure* (1994). 🕮 *The Door Wherein I Went* (1975)

Hailwood, Mike, *properly* **Stanley Michael Bailey Hailwood** 1940–81
English motorcyclist
He was born in Oxford. He took nine world titles: the 250cc in 1961 and 1966–67, the 350cc in 1966–67, and the 500cc in 1962–65, all using Honda or MV Augusta machines. In addition, he won 14 Isle of Man Tourist Trophy (TT) races between 1961 and 1979, and during the 1960s he also had a career in motor racing. He was killed in a car accident.

Haitink, Bernard 1929–
Dutch conductor
Born in Amsterdam, his first appearance with the Amsterdam Concertgebouw Orchestra was in 1956. In 1961 he became its principal conductor and in 1964 its chief conductor. He was appointed principal conductor of the London Philharmonic Orchestra in 1967, and was its artistic director from 1969 to 1978. He was appointed music director of the Glyndebourne Festival (1977–88), and of the Royal Opera House, Covent Garden (1987–2002). He has toured internationally and, in addition to opera, is an acclaimed interpreter of BRUCKNER and MAHLER. He was musical director of the European Union Youth Orchestra from 1994 to 1999 and has been principal guest conductor of the Boston Symphony Orchestra since 1995. He was created an honorary KBE in 1977.

Hajek, Jiří 1913–93
Czechoslovak academic, diplomat, politician and dissident
A political scientist and social democrat, he was imprisoned in a concentration camp for much of World War II. On the left wing of his party, he joined with the Communists in 1948 and soon began to rise. He became ambassador in London (1955–58), deputy Foreign Minister (1958–62), ambassador to the UN (1962–65), and Minister of Education (1965–68). In 1968 ALEXANDER DUBČEK appointed him Foreign Minister, in which post he tried to act as broker between the USSR and the West and, after the Soviet invasion (August 1968), tried to condemn the Soviet action by flying to the UN in New York. But he was summoned home and soon deprived of all his positions and privileges. In 1977 he was one of the founders of Charter 77 and was frequently harassed thereafter. Thoroughly disillusioned by

the Communist subversion of Socialism, he had the satisfaction of witnessing the so-called Velvet Revolution (November 1989). He became a member of the French Legion of Honour in 1993 and his writings include *Munich* (1958) and *Dix Ans après* (1978, 'Ten Years After').

Hakim, al- 985–1021
Sixth Fatimid caliph of Egypt
He succeeded his father in 996. The early part of his reign, one of the most turbulent of the Fatimid dynasty, was characterized by persecution of the Christian and Jewish minorities and the destruction of thousands of churches, including the Holy Sepulchre in Jerusalem (1003–13). His extreme Shiite policies antagonized the predominantly Sunni population. From 1017 he became convinced of his own divinity, which was publicly preached by his followers Hamza and al-Darazi, and in the midst of a growing crisis the caliph disappeared in mysterious circumstances. His cult became the basis of the Druze religion which took root in Lebanon, Syria and Galilee.

Hakkinen, Mika 1968–
Finnish racing driver
Born in Helsinki, he raced in go-karts before graduating to Formula Three and winning the world championship in 1990. A year later he made his debut in Formula One, driving for Lotus-Judd. He switched to McLaren in 1993 and won his first victory at the European Grand Prix in 1997. He secured the Formula One championship in 1998, reclaimed it once more in 1999, and was runner-up, behind MICHAEL SCHUMACHER, in 2000. He left Formula One at the close of the 2001 season.

Hakluyt, Richard c.1552–1616
English geographer, cleric and historian
Born in Hertfordshire, he was educated at Westminster School and Christ Church, Oxford, where he became the first ordained lecturer on geography. He introduced the use of globes into English schools. The publication of *Divers Voyages touching the Discovery of America* (1582), commissioned by Sir WALTER RALEIGH, advocating colonization of North America as a base for exploration via the Northwest Passage to the Orient, seems to have procured for him in 1584 the chaplaincy of the English embassy in Paris. While in Paris he wrote *Discourse concerning Western Discoveries* (1584), and decided to devote himself to publishing accounts of English navigations. On his return to England in 1588 he began to collect materials for his *Principal Navigations, Voyages, and Discoveries of the English Nation* (1589, and enlarged in 3 vols, 1598–1600), which contained accounts of the voyages of the CABOTS, Sir FRANCIS DRAKE, Sir HUMPHREY GILBERT, Sir MARTIN FROBISHER and many others. The *Hakluyt Society* was instituted in 1846 to promote an interest in geography and the maintaining of records of expeditions and geographical writings. 🕮 G B Parks, *Richard Hakluyt and the English Voyages* (2nd edn, 1961)

Hakon IV Haakonsson *See* HAAKON IV HAAKONSSON

Halas, František 1901–49
Czech poet
Born in Brünn, Moravia (now Brno, Czech Republic), he began as a proletarian poet, but soon, after a brief period during which he was a part of the Czech inter-war 'poetist' movement – an optimistic, playful affair, in defiance of the realities which threatened Czechoslovakia – adopted an extreme 'subjectivism'. His most characteristic collection, *Staréženy* (1935, Eng trans *Two Women*, 1947), expresses his anxiety and his view of the human predicament as something essentially tragic, which yet might be overcome by true hope. 'Halasism' was a term of opprobrium among the clerks in charge of Czech Communist culture. He had at first welcomed the Stalinist takeover, but died feeling betrayed. 🕮 A French, *The Poets of Prague* (1969)

Halas, George Stanley 1895–1983
US football coach and team owner
Born in Chicago, he was the coach of the Chicago Bears, and owner of the team. A co-founder of the National Football League (1920), he helped shape the modern professional game, bringing large crowds in to watch the sport for the first time. In 1968 he retired as head coach to the Bears for the fourth and last time. After more than 40 years of coaching his record showed 320 wins, 147 defeats and 30 draws.

Haldane, Elizabeth Sanderson 1862–1937
Scottish writer
Born in Edinburgh, she was the sister of JOHN SCOTT HALDANE and RICHARD BURDON HALDANE. She studied nursing, for a while managed the Royal Infirmary, Edinburgh, and became the first woman justice of the peace in Scotland (1920). She wrote a Life of DESCARTES (1905) and edited his philosophical works, translated HEGEL and wrote commentaries on GEORGE ELIOT (1927) and Mrs GASKELL (1930).

Haldane, James Alexander 1768–1851
Scottish minister
Born in Dundee, he was educated there and at Edinburgh, and then served with the East India Company (1785–94). With CHARLES SIMEON of Cambridge he made a holiday preaching-tour of Scotland in 1796, but it was for his 119-day evangelistic tour that he became known and from which Congregational Churches developed. He became Scotland's first Congregational minister in 1799. He opened a tabernacle in Edinburgh with his brother Robert Haldane (1801), where he preached for 50 years, and which became Baptist in 1808. His pamphlets were widely read.

Haldane, J(ohn) B(urdon) S(anderson) 1892–1964
Indian biologist
Born in Oxford, England, he was the son of physiologist JOHN SCOTT HALDANE, and the brother of NAOMI MITCHISON. Educated at Eton, he graduated at Oxford in classics and philosophy, later moving to genetics. He became Reader in Biochemistry at Cambridge (1922–32), conducting research on enzymes, then switched to population genetics and the mathematics of natural selection. He became professor of genetics at London University (1933–37), but again switched to the chair of biometry at University College London (1937–57), and studied underwater conditions and submarine safety. He was chairman of the editorial board of the Communist *Daily Worker* (1940–49), but left the Communist Party in 1956 over the LYSENKO controversy and 'Soviet interference in science'. In 1957 he emigrated to India, adopted Indian nationality, and became professor at the Indian Statistical Institute in Calcutta, but resigned in 1961. He became head of the Orissa State Genetics and Biometry Laboratory in 1962. His numerous popular works included *Animal Biology* (with JULIAN HUXLEY, 1927), *Possible Worlds* (1927), *Science and Ethics* (1928), *The Inequality of Man* (1932), *Fact and Faith* (1934), *Heredity and Politics* (1938) and *Science in Everyday Life* (1939). 🕮 Ronald W Clark, *JBS* (1968)

Haldane, John Scott 1860–1936
Scottish physiologist
Born in Edinburgh, he was the younger brother of Richard Burdon, 1st Viscount HALDANE, and father of J B S HALDANE and NAOMI MITCHISON. He graduated in medicine at Edinburgh University in 1884, became a demonstrator and Reader in Medicine at Oxford (1887–1913), and was elected a Fellow of New College, Oxford. He developed the famous Haldane gas analysis apparatus in 1898, but his best-known research was concerned with the chemical control of ventilation, in which he emphasized the importance of the partial pressure of carbon dioxide. He became an authority on the effects of industrial occupations upon respiration and served as a director of a mining research laboratory at Birmingham from 1912. He produced an important report upon causes of death in mining accidents, focusing particularly on the role of carbon monoxide. He also conducted research into breathing in deep-sea diving and at high altitudes.

Haldane, Richard Burdon Haldane, 1st Viscount 1856–1928
Scottish jurist, philosopher and Liberal politician
Born in Edinburgh, the grandson of Scottish Minister JAMES ALEXANDER HALDANE, he was educated at Edinburgh and Göttingen, and was called to the Bar in 1879. He entered parliament in 1879 as a Liberal. He is remembered for his period as Secretary of State for War (1905–12), when he remodelled the army, founded the Territorial Army and made the plans by which British mobilization took place in 1914. He was Lord Chancellor (1912–15 and again in 1924 following his move to the Labour Party) and ranked high as a judge. He also wrote on the philosophical aspects of relativity, and helped to found the London School of Economics (1895). 🕮 Dudley Sommer, *Haldane of Cloan* (1960)

Hale, Edward Everett 1822–1909
US Unitarian clergyman and writer
He was born in Boston, Massachusetts, and became pastor of the South Congregational Church there in 1856. He did much philanthropic work and his book *Ten Times One is Ten* (1870) inspired numerous 'Lend a Hand' clubs. He edited religious and other journals, and documents on the founding of Virginia, and wrote short stories. He was the great-nephew of NATHAN HALE.

Hale, George Ellery 1868–1938
US astronomer
Born in Chicago, he studied at the Massachusetts Institute of Technology and he established in 1891 the Kenwood Observa-

tory in Chicago, a private institution which became well known through its work in solar spectroscopy. In that year, simultaneously with HENRI DESLANDRES in France but independently of him, he invented the spectroheliograph. In 1892 he was appointed professor of astrophysics at the University of Chicago and in 1897 became the first director of the newly founded Yerkes Observatory near Chicago. When in 1905, following his initiative, the Carnegie Institution established the Mount Wilson Observatory in California, he was appointed its director and in 1906 he set up the first tower telescope for solar research there. Hale's scientific work at Mount Wilson included his discovery and measurement of magnetic fields in sunspots. 🕮 David Oakes Woodbury, *The Glass Giant of Palomar* (1970)

Hale, Sir Matthew 1609–76
English judge
Born in Alderley, Gloucestershire, he studied at Oxford. He entered Lincoln's Inn in 1628, and in 1637 was called to the Bar. He was a Justice of the Common Pleas from 1654 until CROMWELL's death in 1658 and, after the Restoration in 1660 (which he zealously promoted), he was made Chief Baron of the Exchequer, and Chief Justice of the King's Bench (1671). Much of his writing was left in manuscript form, and published after his death. Devout, acute, learned and sensible, although a believer in witchcraft, he wrote a *History of the Common Law* (1713), a *History of the Pleas of the Crown* (1736), both still important, and the *Prerogatives of the King* (printed 1776), as well as religious works.

Hale, Nathan 1755–76
American Revolutionary war hero
He was born in Coventry, Connecticut. He joined the Continental Army in 1775 and a year later volunteered to procure intelligence for GEORGE WASHINGTON from behind British lines on Long Island. He was captured and before being hanged as a spy reportedly stated, 'I regret that I have but one life to lose for my country.' Revered as a national hero, he is also the 'patron saint' of US espionage agencies, and his statue stands at the headquarters of the CIA in Langley, Virginia.

Hale, Sarah Josepha, *née* **Buell** 1788–1879
US writer
Born in Newport, New Hampshire, she embarked on a literary career on the death of her husband in 1822, in order to support herself and her five young children. In 1828 she became the first female editor of the *Ladies' Magazine* in Boston. She wrote a novel, *Northwood* (1827), and a book of *Poems for Our Children* (1830), which contained 'Mary had a Little Lamb'. From 1837 to 1877 she was editor of the popular and influential women's magazine the *Lady's Book* (later called *Godey's Magazine and Lady's Book*). She advocated the education of women and wrote *Woman's Record: Or, Sketches of All Distinguished Women from 'the Beginning' till A.D. 1850* (1853, 1869, 1876), a series of profiles of women notable for their contributions to society and literature. Also partly due to her work is the establishment of the national Thanksgiving day celebration. 🕮 R Finley, *The Lady of Godey's* (1931)

Hales, Stephen 1677–1761
English botanist and chemist
Born in Bekesbourne, Kent, he entered Corpus Christi College, Cambridge, in 1696. Well-grounded in all branches of contemporary science and inspired by ISAAC NEWTON's experimental philosophy, he was elected a Fellow of Corpus Christi College in 1702 and became in 1709 perpetual curate of Teddington. He was elected FRS in 1718, receiving the Royal Society's Copley Medal in 1739, and became a Foreign Member of the Académie Française in 1753. He was one of the founder-members of the Society for the Encouragement of Arts, Manufactures and Commerce, now the Royal Society of Arts. He was also chaplain to Prince George, later GEORGE III. Hales's *Vegetable Staticks* (1727) was the foundation of plant physiology, setting standards in the methodology of biological experimentation. His most important work was on the water balance of plants, and he was the first to measure root and leaf suction and root pressure. In *Haemastaticks* (1733) he discussed the circulation of blood and blood pressure. Besides a work on dissolving stones in the bladder, he wrote on a variety of subjects including ventilation, electricity and the analysis of air. He also invented machines for ventilating, distilling sea water, preserving meat and other practical applications of science. 🕮 D G C Allan, *Stephen Hales: Scientist and Philanthropist* (1986)

Halevi, Jehuda 1075–1141
Spanish Jewish poet, philosopher and physician
He was born in Toledo. His experience of anti-Semitism in Córdoba led him to expound and celebrate the superiority of Judaism over ARISTOTLE's philosophy, and over Christianity and Islam, in various highly wrought prose and poetic works. He encouraged a vision of the Jewish people and the land of Israel which has endeared him to modern Zionists. His main philosophical work (in Arabic) is the *Book of the Khazars* (in full, the 'Book of Argument and Proof in Defence of the Despised Faith'), and there is a collection of his poems entitled *Diwan*, including 'Zionide' ('Ode to Zion'), the most widely translated Hebrew poem of the Middle Ages.

Halévy, (Jacques François) Fromental (Élie), *originally* **Elias Lévy** 1799–1862
French composer
Born in Paris, he had early success with the opera *Clari* (1828), followed by the comic opera *Le Dilettante d'Avignon* (1829). His masterpiece, *La Juive* (1835, 'The Jewess'), made him famous across Europe. The same year, he produced the comic opera, *L'Éclair* ('The Lightning Flash'), and followed it with about a dozen other operatic works. He continued the school of French opera, midway between MARIA CHERUBINI and GIACOMO MEYERBEER. Admitted to the Academy of Fine Arts in 1846, he became perpetual secretary in 1854. His *éloges* were collected as *Souvenirs et portraits* (1861–63, 'Souvenirs and Portraits'). Among his pupils were BIZET and CHARLES GOUNOD, and his brother was the writer Léon Halévy (1802–83).

Halévy, Ludovic 1834–1908
French playwright and novelist
He was born in Paris, the son of the writer Léon Halévy (1802–83), and in 1861 became secretary to the Corps Législatif. With HENRI MEILHAC he wrote libretti for the best-known operettas of OFFENBACH, and for BIZET's *Carmen*, and produced vaudevilles and comedies. His *Madame et Monsieur Cardinal* (1873) and *Les petites Cardinal* (1880) are delightful sketches of Parisian theatrical life. Other works include *L'Invasion* (1872), *Criquette* (1883, Eng trans 1891), *Deux mariages* (*Un mariage d'amour*, 1880, Eng trans *Marriage for Love*, 1890), *Un grand mariage* (1883, 'A Grand Marriage'), *Princesse* (1884) and *Mariette* (1893). 🕮 *Carnets* (1935)

Haley, Alex Palmer 1921–92
US novelist and biographer
Born in Ithaca, New York State, and brought up in North Carolina, he worked as a coastguard for 20 years from 1939. He turned to writing with the publication of *The Autobiography of Malcolm X* (1965), which he co-wrote after the assassination of the black activist. *Roots* (1976) was a phenomenal success, being adapted for television and winning a Pulitzer Prize the following year. Beginning with the life of Kunta Kinte, an African who was enslaved and taken to the USA, this novel documented the history of black Americans, and its essentially optimistic approach rendered it accessible to a large white audience.

Haley, Bill, *originally* **John Clifton Haley** 1925–81
US pioneer of rock and roll music
Born in Highland Park, Michigan, he began his career as a country music singer. With his band The Comets he had an international hit with 'Rock Around the Clock' (1955), which featured in the US film *The Blackboard Jungle* (1955), directed by Richard Brooks (1912–92). Since then Haley has become synonymous with the beginnings of rock and roll. Other songs include 'Shake, Rattle and Roll' and 'See You Later Alligator'.

Haliburton, Thomas Chandler 1796–1865
Canadian writer and jurist
Born in Windsor, Nova Scotia, he was called to the Bar in 1820, and became a member of the House of Assembly, Chief Justice of the Common Pleas (1828), and judge of the Supreme Court (1842). In 1856 he retired to England, and from 1859 to 1863 he was Conservative MP for Launceston. He is best known as the creator of 'Sam Slick', a sort of US version of DICKENS's 'Sam Weller', in sketches printed in the Halifax newspaper *Nova Scotian*, and collected between 1837 and 1840 as *The Clockmaker, or Sayings and Doings of Samuel Slick of Slickville*, continued as *The Attaché, or Sam Slick in England* (1843–44). Other works include *Traits of American Humour* (1843) and *Rule and Misrule of the English in America* (1850). 🕮 V Chittick, *Thomas Chandler Haliburton* (1924)

Halifax, Charles Montagu, 1st Earl of 1661–1715
English statesman and poet
He was born in Horton, Northamptonshire, and educated at Westminster and Trinity College, Cambridge. As a poet his

most notable achievement was the parody of DRYDEN's *The Hind and the Panther*, entitled *The Story of the Country Mouse and the City Mouse* (1687), jointly written with MATTHEW PRIOR. As a lord of the Treasury in 1692 he established the National Debt with a loan of £1 million sterling. In 1694 he originated the Bank of England, as proposed by WILLIAM PATERSON three years earlier, and was appointed Chancellor of the Exchequer. His friend ISAAC NEWTON became Warden of the Mint, and Halifax raised a tax on windows to pay for the recoinage in 1695; he first introduced Exchequer bills. In 1697 he became prime minister, but he was unpopular, and when the Tories came into power in 1699 he retired from the Commons to the Exchequer. He was unsuccessfully impeached in 1701, and again in 1703. He strongly supported the union with Scotland and the Hanoverian succession. On Queen ANNE's death he was appointed a member of the Council of Regency, and on GEORGE I's arrival he became an earl and First Lord of the Treasury. His uncle was the Parliamentary general, the Earl of MANCHESTER.

Halifax, Edward Frederick Lindley Wood, 1st Earl of (2nd creation) 1881–1959
English Conservative politician
Born at Powderham Castle, Devon, he was the grandson of Sir Charles Wood, 1st Viscount Halifax (1800–85) and a descendant of Charles Montagu, 1st Earl of HALIFAX (1st creation). He became (as Baron Irwin 1925) Viceroy of India (1926–31), foreign secretary (1938–40) under NEVILLE CHAMBERLAIN, whose appeasement policy he implemented, and ambassador to the USA (1941–46). He was created earl in 1944.

Halifax, George Savile, 1st Marquis of 1633–95
English statesman
Born in Thornhill, Yorkshire, he was created viscount (1668) for his part in the Restoration, and in 1672 was made marquis and Lord Privy Seal. In 1675 he opposed Lord Danby's (see Duke of LEEDS) Test Bill, and in 1679 by a display of extraordinary oratory he procured the rejection of the Exclusion Bill. On the accession of JAMES VII AND II in 1685 he became president of the Council, but was dismissed soon after for opposing the repeal of the Test and Habeas Corpus Acts. One of the three commissioners appointed by James II to negotiate with William of Orange (later WILLIAM III) after he landed in England, on James's flight he gave allegiance to William and resumed the office of Lord Privy Seal, but joined the opposition and resigned his post in 1689. His defence is to be read in his *Character of a Trimmer* (1688).

Halimi, Gisèle Zeïza Elise, *née* **Taïeb** 1927–
French lawyer, writer and feminist
Born in La Goulette, Tunisia, she was educated in Tunis and at the Institute of Political Studies in Paris. She practised as a lawyer in Tunisia (1949–56) and in Paris (1956–), where she became known for her high-profile cases and clients such as JEAN-PAUL SARTRE and SIMONE DE BEAUVOIR. She also acted as defence lawyer for the Algerian National Liberation Front (FLN) during the Franco-Algerian war, and for the defendants in the notorious Bobigny test-case abortion trial (1972). In 1966 she chaired the Commission of Inquiry into War Crimes in Vietnam. She was an independent socialist member of the French national Assembly (1981–84). Her publications include two co-authored works, *La Cause des femmes* (1973, 'Women's Brief') and *Le Programme commun des femmes* (1978, 'Women's Common Programme'), as well as *Le Lait de l'oranger* (1988, 'The Milk of the Orange Tree').

Halkett, Samuel 1814–71
Scottish scholar
He was librarian to the Advocates' Library in Edinburgh (from 1848), and compiled the *Dictionary of Anonymous Literature* (4 vols, 1882–88) completed by the Rev John Laing (1809–80). From 1850 he was librarian of New College, Edinburgh.

Hall, Adelaide Louise Estelle 1901–93
British–US jazz singer
Born in Brooklyn, New York City, the daughter of a music teacher, she trained at the city's Pratt Institute and made her professional debut as a Broadway chorus singer in *Shuffle Along* (1921). In 1938 she moved to London, where she became one of Britain's most popular wartime entertainers and had her own radio show, becoming the first black artist to sign a long-term contract with the BBC. Over a long career she performed with bandleaders such as LOUIS ARMSTRONG and DUKE ELLINGTON, recorded more than 70 records with the Decca label and owned two successful nightclubs. Her most famous recording is 'Creole Love Call' (1927) with Ellington. 🕮 Iain Cameron Williams, *Underneath a Harlem Moon: The Harlem to Paris Years of Adelaide Hall* (2002)

Hall, Asaph 1829–1907
US astronomer
Born in Goshen, Connecticut, he was self-educated and was employed as an assistant at Harvard in 1857. From 1862 to 1891 he was on the staff of the Naval Observatory at Washington, and he later returned to Harvard as professor of Astronomy. In 1877 he discovered the two satellites of Mars which he named Deimos and Phobos. In 1876 he discovered a white spot on Saturn and used this as a marker in order to obtain the rotation period of the planet.

Hall, Ben(jamin) 1837–65
Australian bushranger
Born in New South Wales, son of an English convict, at 16 he married the daughter of a wealthy cattleman and settled down to farming. In 1862 he was arrested for armed robbery but was acquitted and freed. On returning home he found that his wife had left him, taking their young son. In anger Hall joined a gang led by Frank Gardiner, and was soon re-arrested, on suspicion of involvement with the Eugowra gold robbery. Again released, Hall returned to his farm to find it burned down by the police and all his cattle killed. He was now committed to a life of outlawry and a series of audacious raids followed, most notably on the Bathurst and the Sydney–Melbourne roads. After the shooting of two policemen by one of the gang, he went into hiding, but was betrayed by a companion and shot dead by the police at the age of 28.

Hall, Charles Francis 1821–71
US explorer
Born in Rochester, New Hampshire, he was a blacksmith, journalist, stationer and engraver, then became interested in the fate of the explorer Sir JOHN FRANKLIN whose expedition to the Northwest Passage had been lost in 1847. He made two search expeditions (1860–62, 1864–69), bringing back relics and the bones of one of Franklin's men. In 1871 he sailed in command of the *Polaris* on an expedition to the North Pole, and on 29 August reached, via Smith's Sound, 82° 16′ N, then the highest latitude reached. Heading southwards, he went into winter quarters at Thank God Harbour, Greenland, where he became ill, and died.

Hall, Charles Martin 1863–1914
US chemist
Born in Thompson, Ohio, and educated at Oberlin College, in 1886 he discovered (independently of PAUL HÉROULT) the first economic method of obtaining aluminium. Hall eventually secured the financial support of ANDREW W MELLON and others and began aluminium production in 1888 in Washington, Pennsylvania. Two years later Hall became vice-president of the Aluminum Company of America.

Hall or **Halle, Edward** c.1499–1547
English historian
Born in London, he was educated at Eton and King's College, Cambridge, where he was elected Fellow, and at Gray's Inn. He became a Common Serjeant in 1532. His *Union of the Noble Famelies of Lancastre and Yorke* (1542, commonly called *Hall's Chronicle*) was completed only to 1532; the rest, to 1546, was completed by the editor, RICHARD GRAFTON. Hall's work was used as a source by SHAKESPEARE, and is valuable to the student of HENRY VIII's reign.

Hall, Sir Edward Marshall 1858–1927
English lawyer
Born in Brighton, Sussex, he was educated at Rugby and Cambridge. He was called to the Bar in 1883, and, although the victim of hostility in the HARMSWORTH press, built up his reputation through a series of impressive victories in murder cases such as Robert Wood (1907), Edward Lawrence (1909), Ronald Light (1920) and Harold Greenwood (1920), where his powers of classical advocacy offset his legal ignorance. His notable failures included Frederick Henry Seddon and the murderer George Joseph Smith (1872–1915), who drowned his three 'brides in the bath'. His greatest civil triumph was *Russell* v *Russell* (1923). Despite his oratorical powers he made little mark as Conservative MP for Southport (1900–06) and East Toxteth (1910–16), while his legendary reputation owed much to his biographer Edward Marjoribanks.

Hall, G(ranville) Stanley 1844–1924
US psychologist and educationalist
He was born in Ashfield, Massachusetts. He studied at Leipzig under WILHELM WUNDT, then became successively professor at Antioch College, Ohio, lecturer at Harvard (1876–81) and

professor at Johns Hopkins University, where in 1882 he introduced experimental psychology on a laboratory scale. In 1887 he founded the *American Journal of Psychology*. He exercised a profound influence on the development of educational psychology and child psychology in the USA, and became the first president of Clark University (1889–1920). His works include *The Contents of Children's Minds* (1883), *Educational Problems* (1911) and *Life and Confessions of a Psychologist* (1923).

Hall, James 1811–98
US palaeontologist and stratigrapher
Born in Hingham, Massachusetts, he was educated at Rensselaer Polytechnic Institute in Troy, New York. After a short spell as a librarian, he worked as an assistant to Amos Eaton (1776–1842) and then in 1836 was appointed to the Geological Survey of New York State at the start of a long association. From 1855 to 1858 he was State Geologist of Iowa. He was author of 13 volumes on the palaeontology of New York State (1847–94) and many other works on its Palaeozoic fossils and stratigraphy. He undertook important studies of crinoids and other echinoderms and named many new fossil genera and species. He was also the director of the New York Museum of Natural History (1871–98), and the first president of the Geological Society of America.

Hall, Sir John 1933–
English property developer and football club chairman
The chairman of Cameron Hall Developments Ltd (1973–93) and Newcastle United Football Club (1992–97), he made his fortune from developing what was then Europe's biggest shopping centre – the MetroCentre on Tyneside (1985). More recently, he was a director of the Bank of England (1996–98). He was knighted in 1991.

Hall, John Lewis, *known as* **Jan** 1934–
US physicist
Born in Denver, Colorado, he earned a PhD in physics in 1961 from the Carnegie Institute of Technology, and spent much of his career at the Joint Institute for Laboratory Astrophysics at the University of Colorado. He has made important contributions to the development of laser-based precision spectroscopy, which can be used to measure the wavelength or colour of light with extreme precision. These methods have made it possible to develop extremely accurate clocks and improved global positioning technology. In 2005, he shared the Nobel Prize in physics with ROY GLAUBER and THEODOR HÄNSCH.

Hall, Joseph 1574–1656
English prelate and writer
Born in Ashby-de-la-Zouch, Leicestershire, he studied at Cambridge from 1589. A Fellow of Emmanuel College, Cambridge (1595), he became dean of Worcester (1617). In the same year he accompanied JAMES VI AND I to Scotland to help establish episcopacy. As Bishop of Exeter (1627–41) he was suspected by Archbishop LAUD of Puritanism. As Bishop of Norwich (1641–47) he protested with other prelates against the validity of laws passed during their enforced absence from parliament, and was imprisoned for seven months in the Tower of London. Soon afterwards he was deprived of his living, and in 1647 retired to a small farm in Higham. Among his works are *Contemplations, Christian Meditations, Episcopacy* and *Mundus Alter et Idem* (c.1605, 'The World Different and the Same'). His poetical satires *Virgidemiarum* (1597–98) were admired by ALEXANDER POPE.

Hall, Marshall 1790–1857
English physician and physiologist
Born in Basford, Nottinghamshire, he studied medicine at Edinburgh University. After further study in Paris, Göttingen and Berlin, he returned to Nottingham in 1817, where he practised medicine, being elected honorary physician to the General Hospital in 1825. The following year he moved to London, where he was elected a Fellow of the Royal College of Physicians. He wrote copiously on many aspects of medicine, including the circulation of the blood and respiration, developed a successful technique for resuscitating the drowned, and also canvassed changes in clinical practice, notably opposing the immoderate blood-lettings then considered an essential part of treatment. His researches on the physiology of reflex function built on the work of FRANÇOIS MAGENDIE and CHARLES BELL, and provided the foundation for the influential concept of the neural arc.

Hall, Sir Peter Reginald Frederick 1930–
English theatre, opera and film director
Born in Bury St Edmunds, Suffolk, he was educated at the Perse School and St Catherine's College, Cambridge. While at university he produced and acted in more than 20 plays. After working in repertory and for the Arts Council, he was artistic director of the Elizabethan Theatre Company (1953), assistant director of the London Arts Theatre (1954) and director in 1955–56, famously directing the English-language premiere of SAMUEL BECKETT's *Waiting for Godot* (1955). He formed his own production company, The International Playwrights' Theatre, in 1957. After several productions at the Stratford Memorial Theatre, he became director of the Royal Shakespeare Company (RSC), and remained as managing director of the company's theatres in Stratford and London until 1968, making his name by giving many of the classics a social context. Among his many productions during this period were the *Wars of the Roses* trilogy (*Henry VI Parts 1, 2* and *3*, and *Richard III*, 1963), HAROLD PINTER's *The Homecoming* (1965) and NIKOLAI GOGOL's *The Government Inspector* (1966). Continuing to direct for the RSC, he was also from 1969 to 1971 director of the Covent Garden Opera. In 1973 he succeeded LAURENCE OLIVIER as director of the National Theatre; his notable productions there include *No Man's Land* (1975), *Tamburlaine the Great* (1976), *Amadeus* (1979), *Othello* (1980) and *The Oresteia* (1981). In 1983 he became artistic director of the Glyndebourne Festival. Among his films are *Work is a Four Letter Word* (1968), *Perfect Friday* (1971) and *Akenfield* (1974). Hall left the National Theatre in 1988 and set up the Peter Hall Company, the inaugural project being his own production of TENNESSEE WILLIAMS's *Orpheus Descending*. That was followed in 1989 by Hall's production of *The Merchant of Venice*, with DUSTIN HOFFMAN as Shylock. Other productions include Williams's *The Rose Tattoo* (1991), starring JULIE WALTERS, and STEPHEN POLIAKOFF's *Sienna Red* (1992). His autobiography, *Making an Exhibition of Myself*, was published in 1993 and in 1996 he became artistic director of London's Old Vic theatre. In 2005, he directed a successful 50th anniversary revival of *Waiting for Godot* at Bath Theatre Royal. He was knighted in 1977. 🕮 Stephen Fay and R E Schofield, *Power Play: The Life and Times of Sir Peter Hall* (1995)

Hall, (Marguerite) Radclyffe 1880–1943
English writer
She was born in Bournemouth, Dorset, and educated at King's College London, and then in Germany. She began as a lyric poet with several volumes of verse, some of which have become songs, but turned to novel-writing with *The Forge* and *The Unlit Lamp* (both 1924). Her *Adam's Breed* (1926) won the Femina Vie Heureuse and the Tait Black Memorial prizes, but *The Well of Loneliness* (1928), which deals openly with female homosexuality, was prosecuted for obscenity, and was banned in Great Britain for many years, despite the support of VIRGINIA WOOLF, E M FORSTER and others. It was republished in 1949.

Hall, Wendy 1952–
English computer scientist and engineer
She was educated at the University of Southampton, and later returned there as a lecturer, eventually becoming the institution's first female professor of engineering (1994). Her work has included pioneering research into multimedia and hypermedia systems as well as the development of web technologies, digital libraries and human–computer interaction. She was elected Fellow of the Royal Academy of Engineering in 2000, and awarded the CBE the same year. She remains at Southampton, now as a professor of computer science, and in 2002 became head of the university's School of Electronics and Computer Science.

Hall, Willis 1929–2005
English dramatist
Born in Leeds, he first wrote for radio. His first stage success was *The Long and the Short and the Tall* (1958), dealing with the members of a British military patrol lost in the Malayan jungle in 1942. He followed this with the short plays *Last Day in Dreamland* and *A Glimpse of the Sea* (both 1959). He afterwards collaborated extensively with his childhood friend KEITH WATERHOUSE, notably on *Billy Liar* (1960), derived from the latter's novel, and on the farce, *Say Who You Are* (1965). *Saturday, Sunday, Monday* (1973) and *Filumena* (1973), based on plays by the Italian dramatist Eduardo de Filippo, were both enormous successes. He also wrote 40 radio and television plays and a number of children's books.

Hallé, Sir Charles, *originally* **Carle Halle** 1819–95
British pianist and conductor
Born in Hagen, Westphalia, he studied first at Darmstadt, and from 1840 in Paris, where his reputation was established by his concerts of classical music. Driven to England by the Revolution of 1848, Hallé settled in Manchester, where in 1858 he founded his famous orchestra. This did much to raise the

standard of musical taste by familiarizing the British public with the great classical masters, and he was knighted in 1888. In the same year he married the violinist Wilhelmine Neruda (1839–1911). 🕮 Charles Rigby, *Sir Charles Hallé: A Portrait for Today* (1952)

Halle, Edward *See* HALL, EDWARD

Halleck, Fitz-Greene 1790–1867
US poet
Born in Guilford, Connecticut, he became a clerk in New York, and in 1832 private secretary to JOHN JACOB ASTOR. In 1849 he retired to Guilford on an annuity left him by Astor. He published numerous poems, including the long mock-Byronic poem, *Fanny* (1819), a satire on the literature, fashions and politics of the time. 🕮 N F Adkins, *Fitz-Greene Halleck* (1930)

Halleck, Henry Wager 1815–72
US soldier
Born in Westernville, New York, he served in the Mexican War (1846–48) and, having taken a leading part in organizing the State of California, in the Civil War was appointed commander of the Missouri (1861). In 1862 he captured Corinth and was made general-in-chief, but in 1864 he was superseded by General ULYSSES S GRANT. Chief of Staff until 1865, Halleck commanded the military division of the Pacific until 1869, and that of the South until his death. He published *Elements of Military Science* (1846), and books on mining laws.

Haller, (Viktor) Albrecht von 1708–77
Swiss anatomist, botanist, physiologist and poet
Born in Bern, he studied anatomy and botany in Tübingen and Leyden, and started practice in 1729. In 1736 he became professor of anatomy, surgery and medicine in the new University of Göttingen. Here he organized a botanical garden, an anatomical museum and theatre, and an obstetrical school, helped to found the Academy of Sciences, wrote anatomical and physiological works, and took an active part in the literary movement. He experimented with injection techniques to investigate human blood vessels, and recognized the mechanical automatism of heart muscle function. In 1753 he resigned and returned to Bern, where he became a magistrate and director of a saltworks. After this he wrote three political romances, and prepared bibliographies of botany, anatomy, surgery and medicine. His *Elementa physiologiae corporis humani* (8 vols, 1757, 'Physiological Elements of the Human Body') was a major contribution to the understanding of the functioning of the body. 🕮 Adolf Haller, *Albrecht von Hallers Leben* (1954)

Hallesby, Ole Kristian 1879–1961
Norwegian theologian and preacher
Professor of the Free Faculty of Theology, Oslo (1909–52), he wrote several theological textbooks, but is best known outside Norway for translations of his devotional and apologetic writings: *Prayer* (1948), *Why I am a Christian* (1950) and *Under His Wings* (1978). Imprisoned like other religious leaders during World War II for opposing Nazi control of the Church, he influenced lay Christians through his chairmanship of the Norwegian Lutheran Home Mission, and students as first president of the International Federation of Evangelical Students (1947).

Halley, Edmond 1656–1742
English astronomer and mathematician
Born in London, he was educated at St Paul's School and Queen's College, Oxford. He left for St Helena in 1676 to make the first catalogue of the stars in the southern hemisphere (*Catalogus Stellarum Australium*, 1679). In 1680 he was in Paris with GIOVANNI CASSINI, observing comets, and his calculation of the orbital parameters of 24 comets enabled him to predict correctly the return (in 1758, 1835 and 1910) of a comet that had been observed in 1583 (Halley's comet). He was the first to make a complete observation of the transit of Mercury and the first to recommend the observation of the transits of Venus in order to determine the Sun's parallax. He established the mathematical law connecting barometric pressure with heights above sea level (on the basis of BOYLE's law). He published studies on magnetic variations (1683), trade winds and monsoons (1686), investigated diving and underwater activities, and voyaged in the Atlantic Ocean to test his theory of the magnetic variation of the compass, which he embodied in a magnetic sea chart (1701). Halley predicted with considerable accuracy the path of totality of the solar eclipse that was observed over England in 1715, and was the first to realize that the Moon's mean motion had a secular acceleration. He also noticed that stars such as Aldebaran, Arcturus and Sirius had a proper motion and that they had gradually changed their positions over the previous two millennia. In map-making he was the first to use an isometrical representation. He was also the first to predict the extraterrestrial nature of the progenitors of meteors. He encouraged ISAAC NEWTON to write his celebrated *Principia Mathematica* (1687) and paid for its publication himself. With his *Breslau Table of Mortality* (1693) he laid the actuarial foundations for life insurance and annuities. In 1703 he was appointed Savilian Professor of Geometry at Oxford, where he built an observatory on the roof of his house which survives today, and in 1720 he succeeded JOHN FLAMSTEED as Astronomer Royal of England. 🕮 C A Ronan, *Edmond Halley: Genius in Eclipse* (1969)

Hallgrímsson, Jónas 1807–45
Icelandic lyric poet
Born in Hraun, northern Iceland, he attended the Latin School at Bessastaðir, where he read classical and Old Icelandic literature, and then studied law at Copenhagen University before turning to natural history and literature. As a student he and his friends founded the periodical *Fjölnir* (1835–47), which added inspiration to the independence movement led by JÓN SIGURÐSSON. His poetry combined fervent nationalism – as in 'Island' (1835), with which *Fjölnir* was launched – and lyrical romanticism. His collected poems were first published in 1847; an English edition appeared in 1930. 🕮 T V Gíslason, *Jónas Hallgrímsson* (1903)

Halliday, Michael Alexander Kirkwood 1925–
English linguist
He was born in Leeds, and studied Chinese language and literature at London University, and linguistics in China and at Cambridge. In 1963 he was appointed director of the Communication Research Centre at University College London, and two years later professor of general linguistics. There he undertook a research project on linguistics and English teaching, which resulted in two reports, *Breakthrough to Literacy* for primary schools and *Language in Use* for secondary schools. In the 1970s he worked in Chicago and Sydney, and held visiting professorships at Yale, Brown and Nairobi. He has worked extensively on the semantics and grammar of modern English, and developed the systemic and functional principles established by J R FIRTH and his school, as described in *A Short Introduction to Functional Grammar* (1984).

Halliwell, James Orchard, *later surname* **Halliwell-Phillipps** 1820–89
English Shakespearean scholar and antiquary
Born in Chelsea, London, he studied at Jesus College, Cambridge, and contributed much to Shakespearean studies by his *The Life of William Shakespeare* (1848) and *Outlines of the Life of Shakespeare* (1881–87) and a Folio edition of Shakespeare (1853–65). He also published *Nursery Rhymes and Tales of England* (1845), *Dictionary of Archaic and Provincial Words* (1847) and *Popular Rhymes and Nursery Tales* (1849).

Hallstrom, Sir Edward John Lees 1886–1970
Australian refrigerator manufacturer and philanthropist
Born in Coonamble, New South Wales, he left school at 13 and worked in a furniture factory, later opening his own works to make first ice-chests and then wooden cabinets for refrigerators. Eventually he started making the units themselves, to his own design, and marketed the first popular domestic Australian refrigerator. With the expansion of demand after World War II he was able to channel his wealth into philanthropic acts, particularly towards medical research and children's hospitals. He had a keen practical interest in zoology and was an active collector, preserver and breeder of wild animals. He made many gifts to the Taronga Zoo in Sydney.

Halonen, Tarja Kaarina 1943–
Finnish politician
Born in Helsinki, she was educated at the University of Helsinki and served as general secretary of the National Union of Finnish Students. After earning a degree in law, she became an attorney with the Central Organization of Finnish Trade Unions. She entered politics in 1974, initially as Parliamentary Secretary to Prime Minister Kalevi Sorsa (1930–). She was elected to parliament in 1979 and served the Social Democratic Party in several ministerial posts, notably that of Minister for Foreign Affairs (1995–2000), before becoming Finland's first woman president in 2000. She was re-elected in 2006. Her policies as president have included closer involvement with the European Union but opposition to Finnish membership of NATO.

Hals, Frans, *sometimes known as* **Frans Hals the Elder** c.1580–1666
Dutch portrait and genre painter
Born probably in Antwerp, he studied under KAREL VAN MANDER and settled permanently in Haarlem (c.1603). He was twice married, led a ramshackle domestic life with many children and, despite many commissions, was constantly overshadowed by poverty. Among his early conventional portraits are those of *Paulus von Berestyn* and his wife *Catherine* (1620), *Jacob Pietersz Olycan* and *Aletta Hanemans* (1625), and the dignified, sumptuously costumed *Portrait of a Man* (1622). But it is his studies of every nuance of smile, from the vague, arrogant amusement of *The Laughing Cavalier* (Wallace Collection, London) to the broad grins and outright vulgar leers of the low life sketches *Gypsy Girl* (c.1628–30, Louvre, Paris), *Malle Babbe* (c.1630–33, Berlin) and *Jolly Toper* (Amsterdam), which belong to the period 1625–35, that have won him his perennial popularity. Another formal masterpiece is *Pieter van den Broecke* (1633, Kenwood, London). But from 1640 onwards, the virile, swaggering colours give way to more contemplative sombre blacks and greys, as in *Man in a Slouch Hat* (c.1660–66, Kassel). His own struggles and disappointments no doubt contributed to the bitter psychological study of old age, *The Seated Man* (Kassell), as well as the last of the eight portrait groups in the Frans Halsmuseum at Haarlem, *The Women Guardians of the Haarlem Almshouse* (1664). They are a world apart from an earlier group, the *Banquet of the Company of St Adrian* (1627), in which the mood of robust merrymaking is symbolized by the upturned glass in the hand of one of the officers, the whole assembly a feast of many-splendoured colour. Two of his brothers were also artists, as well as five of his sons, including Frans Hals the Younger (1637–69).

Halsey, William F(rederick), Jnr, *known as* **Bull Halsey** 1884–1959
US naval officer
Born in Elizabeth, New Jersey, he was educated at the US Naval Academy, Annapolis (1904). He served in the White fleet (1908–09), and held destroyer commands in World War I and until 1925. He commanded the USS *Saratoga* and Naval Air Station Pensacola, and the Carrier Division as rear admiral (1938) and vice-admiral (1940). He distinguished himself throughout the Pacific War (1941–45), latterly as commander of the Third fleet in the battles for the Caroline and Philippine islands, and for carrier attacks on the Japanese mainland. In October 1944 he defeated the Japanese navy at the Battle of Leyte Gulf. He retired as fleet admiral in 1949, and became president of International Telecommunications Laboratories (1951–57).

Halsted, William Stewart 1852–1922
US surgeon
He was born in New York City, and trained at the College of Physicians and Surgeons there and in Vienna under THEODOR BILLROTH. In 1881 he administered what is thought to be the first blood transfusion in the USA. Professor at Johns Hopkins University from 1886, where he established the first US school of surgery, he first used cocaine injections for local anaesthesia, and devised successful operative techniques for cancer of the breast and inguinal hernias. He pioneered the use of antiseptics and rubber gloves in surgery.

Ham
Biblical character
One of Noah's three sons, he was the brother of Shem and Japheth, and father of Canaan. He is described as helping NOAH to build the ark, but after the Flood his son Canaan was cursed by God for Ham's apparent sin of having seen 'the nakedness of his father' (Genesis 9.22). This curse may be an attempt to explain the later subjugation of the Canaanites to Israel due to Canaanite sexual perversion.

Hamada, Shoji 1894–1978
Japanese potter
He studied and held a professorship at the Institute of Pottery in Kyoto. He worked primarily in stoneware using ash or iron glazes and producing utilitarian wares in strong, simple shapes brushed with abstract design. He visited England in 1920 with BERNARD LEACH and experimented with lead-glazed slipware. On his return to Japan in 1923, he joined a pottery community in Okinawa, and later lived and worked in Mashiko alongside country potters, epitomizing his belief in the simple beauty of the handmade as opposed to the influences of industrialization. Widely recognized as one of the great modern potters, he became director of the Folk Art Museum in 1962.

Hamadhani, al- 969–1007
Arabic poet
He was the creator of the *maqamah*, the short story written out in rhymed prose. Two characters feature in his inventions, the *rawi* or narrator, and the unscrupulous wanderer or vagabond – one of the earliest representations of the trickster in post-classical literature. Al-Hamadhani's creations in the *Maqamat* (Eng trans 1913–17) played their part in the genesis of the picaresque novel.

Hamaguchi Osachi 1870–1931
Japanese politician
He began his career as a Finance Ministry bureaucrat and was elected to the lower house of the Diet in 1915. In 1927 he assumed the presidency of the Minseito, one of the two main political parties of the time, and became prime minister of a Minseito government in 1929. Renowned for his incorruptibility and dogged determination, he adopted a policy of domestic financial austerity and better relations with the USA and Great Britain. He aroused the bitter hostility of the navy when, in 1930, he pushed through the Diet ratification of the London Naval Treaty, which placed restrictions on Japan's naval development. In assuming sole responsibility for the ratification of the treaty and ignoring the opinions of the navy, Hamaguchi was accused by both the military and ultra-nationalists of infringing the emperor's prerogative of supreme command. In November of that year he was shot by a right-wing fanatic and died the following year.

Hamann, Johann Georg 1730–88
German philosopher and theologian
Born in Königsberg, Prussia (now Kaliningrad, Russia), he became a friend of IMMANUEL KANT. He seems to have been largely self-educated and to have had a desultory early career as private tutor, merchant, commercial traveller and secretary, and eventually (1767–84) as a government employee in the excise office and custom house. After 1784 private patronage brought him a more comfortable income. His writings attempt to reconcile Christianity and philosophy, and his impatient distrust of rationalism and abstraction led him to emphasize the role of faith and develop an original form of fideism. His style is notoriously cryptic and opaque, but he was an important influence on JOHANN HERDER, GOETHE, HEGEL and KIERKEGAARD, and interest in his work has returned.

Hambling, Maggi (Margaret) 1945–
English painter and sculptor
Born in Sudbury, Suffolk, she attended Ipswich and Camberwell schools of art and the Slade, London. She became artist in residence at the National Gallery in London, where she met MAX WALL, and became known for her powerful and expressive portraits of him. Her paintings are generally figurative and bold and colourful in style. Her granite-and-bronze sculpture *A Conversation with Oscar Wilde*, a coffin-shaped piece incorporating a bench, was installed near Trafalgar Square in London in 1998. In 2003 her controversial sculpture *Scallop* (representing an oversized seashell) was erected on the shore at Aldeburgh as a memorial to BENJAMIN BRITTEN. She was awarded an OBE in 1995.

Hamburger, Michael Peter Leopold 1924–
British poet and translator
Born in Berlin, into a German family which emigrated to England in 1933, he served in the Royal Army Education Corps during World War II, and then became a university teacher. He established an international reputation for his distinguished translations of poets, including FRIEDRICH HÖLDERLIN, GÜNTER GRASS and NELLY SACHS. Among his own collections of poetry are *Flowering Cactus* (1950), *Ownerless Earth* (1973) and *Late* (1997). Two important essay collections are *The Truth of Poetry* (1968) and *A Proliferation of Prophets* (1983), on German literature. His *Collected Poems 1941–1994* was published in 1995. He was awarded an OBE in 1992. 🕮 *A Mug's Game: Intermittent Memoirs 1924–1954* (1973, revised and reprinted as *String of Beginnings*, 1991)

Hamer, Fannie Lou, *née* **Townsend** 1918–77
US civil rights leader
Born in Montgomery County, Mississippi, the granddaughter of a slave, she worked as a plantation worker until 1962 when she began work for the Student Non-Violent Co-ordinating Committee. Her growing commitment to the civil rights movement was affected by her own experiences: in 1961 she was sterilized without her consent, and dismissed for attempting to register as a voter. Throughout the 1960s and 1970s she campaigned for voter registration and the desegregation of

schooling in Mississippi and other states. In 1964, with her co-workers, she founded the Mississippi Freedom Democratic Party. She was elected to the Central Committee of the National Women's Political Caucus when it was founded in 1971.

Hamerton, Philip Gilbert 1834–94
English writer on art
Born in Laneside, Oldham, he began as an art critic by contributing to the *Saturday Review*, and later was founder-editor of the art periodical, *The Portfolio*. He wrote several books, including *The Intellectual Life* (1873, letters of advice addressed to literary aspirants and others), *Human Intercourse*, *The Graphic Arts* (1882) and *Landscape* (1885).

Hamilcar, *also called* **Hamilcar Barca, ('Lightning')** c.270–228 BC
Carthaginian soldier
He and his son HANNIBAL were the greatest of the Carthaginians. From 247 BC he fought in the First Punic War, seizing the Sicilian stronghold of Ercte with a small band of mercenaries, from which he waged war for three years against Rome. He occupied Mount Eryx (244–242 BC) and defended it against a Roman army. At the end of the First Punic War (241 BC) Sicily was surrendered to Rome and the Carthaginian mercenaries revolted; Hamilcar crushed the rebellion after a terrible struggle in 238 BC. He aimed to compensate for the loss of Sicily by creating in Spain an infantry capable of coping with Roman legionaries. He entered Spain in 237 BC, and conquered most of the south and east of the peninsula before his death.

Hamilton, Alexander 1757–1804
American politician
Born on the island of Nevis in the West Indies, he studied at King's College (now Columbia) in New York City and wrote a series of pamphlets in defence of the rights of the colonies against Great Britain. On the outbreak of the American Revolution, as captain of artillery, he served in New York and New Jersey, and in 1777 became GEORGE WASHINGTON's aide-de-camp. In 1781, after a quarrel, he resigned his appointment, but fought at Yorktown. After the war he studied law, and became one of the most eminent lawyers in New York. In 1782 he was elected to the Continental Congress. In 1786 he played the leading role in the convention at Annapolis, which prepared the way for the great Constitutional Convention that met at Philadelphia in 1787. In the same year he conceived the series of essays arguing in favour of ratification afterwards collected as *The Federalist*, and himself wrote 51 out of the 85. On the establishment of the new government in 1789, he was appointed Secretary of the Treasury and restored the country's finances to a firm footing. He devised a system of taxation, insisted on payment of the national debt and proposed the creation of the Bank of the United States. He and his supporters favoured a strong central government and were mistrustful of an unbridled democracy; they clashed politically with THOMAS JEFFERSON's followers, who favoured limited government and envisaged an agrarian republic unsullied by commercial interests. In 1795 Hamilton resigned his office, but he remained the actual leader of the Federalist Party until his death. His successful effort to thwart the ambition of his rival, AARON BURR, prompted Burr to challenge him to a duel in Weekauken, New Jersey, in which Hamilton was mortally wounded after firing into the air. 🕮 Nathan Schachner, *Alexander Hamilton* (1946)

Hamilton, Alice 1869–1970
US physician and social reformer
Born in New York City, she graduated in medicine from the University of Michigan. After further training in pathology and bacteriology in Europe, she was made professor of pathology at the Woman's Medical College of North Western University (1897). She combined medical practice with social concerns, particularly the links between environment and disease, and served on state and national advisory committees on occupational disease. In 1919 she became the first woman professor at Harvard, almost 30 years before Harvard accepted women medical students, and retired in 1935. Considered the leading authority on lead poisoning in particular and industrial diseases in general, she published extensively, including a classic textbook, *Industrial Toxicology* (1934).

Hamilton, Edith 1867–1963
US classical scholar and educationalist
Born in Dresden, Germany, and raised in Fort Wayne, Indiana, she was educated at home and at Miss Porter's School, Farmington, Connecticut. She became Bryn Mawr Fellow in Latin (1894–95), and held the Bryn Mawr European Fellowship in 1895 when she attended Munich and Leipzig universities. She was headmistress of Bryn Mawr preparatory school in Baltimore from 1896 to 1922. Showing her devotion to classical studies, her publications include *The Greek Way* (1930), *The Roman Way* (1932), *The Great Age of Greek Literature* (1943) and her translation of ancient myths, *Mythology* (1942). She was made an honorary citizen of Athens at the age of 90.

Hamilton, Edmond 1904–77
US writer of science fiction
Born in Ohio, he started writing in the 1920s, contributing to the pulp magazines under a range of pseudonyms. It was largely through his work for *Weird Tales and Amazing Stories* that certain basic sci-fi concepts (galactic civilizations, cosmic radiation) took hold. His most enduring fictional creation was the tritely named Captain Future. Hamilton's wife, Leigh Brackett, also wrote science fiction.

Hamilton, Emma, Lady, *née* **Amy Lyon** c.1761–1815
English mistress of Lord Nelson
Born in Great Neston, Cheshire, into a poor family, her girlhood was passed at Hawarden. Known for her great beauty, she had had two children by a navy captain and a baronet when in 1782 she became the mistress of the Hon Charles Greville (1749–1809), and subsequently of his uncle, Sir WILLIAM HAMILTON (1786). After five years in Naples, she married Hamilton (1791). Lord NELSON first met her in 1793; they became lovers, and she gave birth to a daughter, Horatia (1801–81), later acknowledged by Nelson as his child. After Nelson's death she squandered her inheritance from her husband, was arrested for debt (1813) and died exiled and impoverished.

Hamilton, Gavin 1723–98
Scottish painter and picture-dealer
Born in Lanarkshire, he studied at Glasgow University before going to Italy in the mid-1740s. On his return (1751) he worked as a portrait painter but returned to Rome in 1756 where he remained for the rest of his life. There, he became a leading member of a circle of artists and scholars concerned with Roman archaeology, and he made many archaeological excavations which resulted in important additions to antique art collections. He was best known in Britain as an art dealer, but his paintings, mostly of Homeric subjects, became widely known throughout Europe through engravings, and influenced the development of the Neoclassical movement.

Hamilton, Hamish 1900–88
Scottish publisher
Born in Indianapolis, USA, of a Scottish father and a US mother of Dutch stock, he spent his childhood in Scotland and was educated at Rugby School and Caius College, Cambridge, studying medicine (briefly) and then modern languages, and becoming an accomplished Olympic oarsman. He joined Harper & Brothers, the New York publishers, as London manager in 1926. In 1931 he founded his own firm, Hamish Hamilton Ltd, with the support of Harpers, who helped him build up a particularly strong list of US writers. In 1965 he sold his company to Thomson Publications Ltd, who later sold it to Viking-Penguin. He retired as chairman in 1981.

Hamilton, Iain Ellis 1922–2000
Scottish composer
Born in Glasgow, he originally trained as an engineer, entering the Royal College of Music in 1947. He first attracted attention when his Clarinet Quintet was played at a concert of the Society for the Promotion of New Music. In 1951 he won the Royal Philharmonic Society's prize for his Clarinet Concerto, and an award from the Koussevitsky Foundation for his Second Symphony, which was followed by the Symphonic Variations (1953). He moved to the USA in 1962. He produced many orchestral and chamber works as well as operas, including *The Royal Hunt of the Sun* (1967–69) and *The Catiline Conspiracy* (1972–73). After moving back to London in 1981, he completed several large-scale choral works, the operas *Lancelot* (1982–83) and *Raleigh's Dream* (1983), and a wind octet, *Antigone* (1992).

Hamilton, Sir Ian Standish Monteith 1853–1947
English general
He was born in Corfu, Greece. He entered the army in 1873, and served with distinction in Afghanistan (1878) and the Boer wars (1881, 1899–1901). In World War I, as a general, he led the disastrous Gallipoli expedition (1915). Relieved of his command, he later became Lieutenant of the Tower (1918–20).

Hamilton, James, 2nd Earl of Arran and **Duke of Châtelherault** c.1515–1575
Scottish nobleman and Regent of Scotland
The grandson of James, 1st Baron Hamilton (d.1479) by the niece of Cardinal BEATON, he was a young man when the death of JAMES V (1542) left only an infant, the future MARY, QUEEN OF SCOTS, between him and the throne. He was chosen regent and tutor to the young queen, and held these offices until 1554, when MARY OF GUISE became regent. His regency was characterized by indecision and attention to family interest. He was granted the duchy of Châtelherault (1548) by HENRY II of France.

Hamilton, James, 3rd Earl of Arran 1530–1609
Scottish nobleman
The eldest son of JAMES HAMILTON, the 2nd Earl, he was proposed as the husband both of MARY, QUEEN OF SCOTS and of Queen ELIZABETH I of England, but he became insane in 1562, and remained locked away until his death.

Hamilton, James, 3rd Marquis and **1st Duke of** 1606–49
Scottish nobleman
He led an unsuccessful army of 6,000 men to support King GUSTAV II ADOLF of Sweden (1631–32), and later played a conspicuous part in the contest between CHARLES I and the Covenanters. Created duke in 1643, he led a Scottish army into England (1648) but was defeated by CROMWELL at Preston, and beheaded.

Hamilton, Sir James Arnot 1923–
Scottish aeronautical engineer
He was born in Edinburgh. Graduating in civil engineering from Edinburgh University, he joined the Marine Aircraft Experimental Establishment at Helensburgh in 1943. He worked initially on the design and development of airborne anti-submarine weapons and later undertook full-scale flight research associated with the design of seaplanes and flying boats. In 1948 he was appointed head of Flight Research. He joined the Royal Aircraft Establishment at Farnborough in 1951 to work on the aerodynamics of supersonic flight, and became head of the Project Assessment Group (1963). Becoming director of Anglo-French Military Aircraft (1964), he was project director of Jaguar and Tornado aircraft, and became the first director-general of the Concorde project (1966), taking the aircraft from early concepts to the first flights of the two prototypes. In 1976 he became Permanent Under-Secretary of State at the Department of Education and Science, the first engineer to become permanent head of a government department. He retired from the civil service in 1983.

Hamilton, James Douglas, 4th Duke of 1658–1712
Scottish nobleman
He fought against the Duke of MONMOUTH, led Scottish opposition to the Union, but discouraged bloodshed. He was created 1st Duke of Brandon (1711), a title challenged by the House of Lords. He helped to negotiate the Treaty of Utrecht (1713). As described in THACKERAY's *Henry Esmond*, he fought a duel with Lord Mohun in which both men were killed.

Hamilton, John, 1st Marquis of 1532–1604
Scottish nobleman
The brother of JAMES HAMILTON, 3rd Earl of Arran, he was a devoted adherent of MARY, QUEEN OF SCOTS, and he helped end her captivity on Loch Leven and reinstate her on the throne (1568). He fled to France and England (1579), but was reconciled with King JAMES VI of Scotland (later JAMES I of England) in 1585. In 1588 he was sent to negotiate the king's marriage to ANNE OF DENMARK, and was created marquis in 1599.

Hamilton, Patrick 1503–28
Scottish Lutheran theologian and martyr
Born in Glasgow, the son of Catherine Stewart, the illegitimate daughter of the Duke of Albany, second son of JAMES II, he was educated in Paris, then went to Louvain. He returned to Scotland and was in St Andrews in 1523, but was forced to leave in 1527 on account of his Lutheranism. After a brief stay in Wittenberg, where he met MARTIN LUTHER and PHILIP MELANCHTHON, he settled for some months in Marburg, where he wrote (in Latin) a series of theological propositions known as 'Patrick's Places', propounding the doctrines of the Lutherans. In 1528 he was summoned to St Andrews by Archbishop JAMES BEATON, and on a renewed charge of heresy was burned before St Salvator's College. His death did more to extend the Reformation in Scotland than ever his life could have done.

Hamilton, (Anthony Walter) Patrick 1904–62
English novelist
Born in Hassock, Sussex, he portrayed in his writing a particular brand of English middle-class existence, marked by reticence, fear and sublimated desire. *Craven House* (1926) was his first novel, but it was with *Rope* (1929) and *Gaslight* (the former filmed by ALFRED HITCHCOCK and the latter by GEORGE CUKOR and Thorold Dickinson) that he became well known. Apart from *Hangover Square* (1940), his most substantial achievement was the 'Gorse' trilogy: *The West Pier* (1951), *Mr Stimpson and Mr Gorse* (1953) and *Unknown Assailant* (1955).
📖 S French, *Patrick Hamilton* (1994)

Hamilton, Richard 1922–
English painter
Born in London, he studied painting at the Royal Academy Schools and at the Slade School of Art. During the 1950s, he devised and participated in several influential exhibitions, notably 'This is Tomorrow' (1956, Whitechapel Art Gallery, London), with its entrance display, the collage picture *Just What is it that Makes Today's Homes so Different, so Appealing?* This introduced the concept of Pop Art, of which Hamilton became a leading pioneer. His work in this vein fuses painting with printed imagery derived from such things as advertisements and pin-up photographs to comment ironically on contemporary life, politics and popular culture. Among his best-known works are *Hommage à Chrysler Corp* (1952), *Study of Hugh Gaitskell as a Famous Monster of Film Land* (1964) and his replica of MARCEL DUCHAMP's *The Bride Stripped Bare by her Bachelors, Even (The Large Glass)* (1965). At the 1993 Venice Biennale he shared the Golden Lion prize for best artist with ANTONI TÀPIES. He was created Companion of Honour in 2000.

Hamilton, Thomas 1784–1858
Scottish architect
Born in Glasgow, he studied as a mason with his father, beginning independent practice in Edinburgh before 1817. He was a leading figure in the international Greek Revival, together with his contemporary in Edinburgh, WILLIAM HENRY PLAYFAIR. In 1826 he was among the founders of the Royal Scottish Academy. His Grecian designs include the Burns Monument, Alloway (1820), the Royal High School, Edinburgh (1825–29), and the Royal College of Physicians, Edinburgh (1844–45). Cumston (Compstone) House, Kirkcudbright (1828), in a Tudor style, and a handful of gothic church designs, demonstrate his versatility. As a prime mover of the Edinburgh Improvement Act (1827) to create the New Town, he designed the George IV bridge which followed, among other projects.

Hamilton, William 1704–54
Scottish poet
Born in Bangour, West Lothian, he was educated at the High School of Edinburgh, and Edinburgh University, and contributed romantic songs and ballads to ALLAN RAMSAY's *Tea-table Miscellany* (1724). He joined the Jacobite Rising of 1745, and on its collapse escaped to Rouen, but he was permitted to return in 1749 and to succeed to the family estate, Bangour. The first collection of his poems was edited by ADAM SMITH in 1748. He is best known for his ballad, 'The Braes of Yarrow'.

Hamilton, Sir William 1730–1803
Scottish diplomat and antiquary
He was British ambassador at Naples from 1764 to 1800, and he married EMMA HAMILTON there in 1791. He took an active part in the excavation of Herculaneum and Pompeii, and formed rare collections of antiquities, one of them purchased in 1772 for the British Museum. He wrote several works on Greek and Roman antiquities.

Hamilton, Sir William 1788–1856
Scottish philosopher and scholar
Born in Glasgow and educated at Glasgow, and Balliol College, Oxford, he first made his name with papers in the *Edinburgh Review* where, among other subjects, he deplored the decayed state of Oxford and the high degree of illiteracy that was tolerated in England. These papers had a great influence on subsequent educational reform. He also wrote on philosophy, religion, psychology and logic, a subject that he did much to revive. As professor of civil history at Edinburgh (1821–38) and of logic and metaphysics (1838–56), he also revived philosophical scholarship. His main work was published posthumously as *Lectures on Metaphysics and Logic* (1859–60), presenting views on perception and knowledge that were later (unjustly) criticized in JOHN STUART MILL's *An Examination of Sir William Hamilton's Philosophy* (1865). Many of his articles were collected in 1852 under the title *Discussions on Philosophy and Literature, Education and University Reform*, and he edited a major edition of the works of THOMAS REID (1846), in itself a considerable achievement. He was in his day a figure of great importance in the revival of philosophy in Great Britain.

Hamilton, William Donald 1936–2000
English zoologist
Born in Cairo, Egypt, he studied at the universities of Cambridge and London, and taught at Imperial College, London (1964–77), in Brazil and at the University of Michigan (1978–84) before becoming Royal Society Research Professor at Oxford in 1984. His main interests were in evolutionary biology and his researches paved the way for the development of sociobiology. In 1964 he proposed his theory of 'kin selection' which accounted for the altruistic behaviour observed in animal societies by demonstrating that an individual may influence the survival and successful breeding of a relative, thus increasing the probability of survival of shared genes, even though the individual may be sterile. He subsequently developed the concept of 'reciprocal altruism', arguing that natural selection favours such behaviour in social animals. More recent research has demonstrated that choice of a sexual partner is affected by parasite load. His major contribution was to provide a theoretical framework for some of the problems in modern evolutionary biology. He was elected a Fellow of the Royal Society in 1980, and received its Darwin Medal (1988) and the Scientific Medal of the Linnaean Society (1989).

Hamilton, Sir William Rowan 1805–65
Irish mathematician
He was born in Dublin. At the age of nine he had a knowledge of 13 languages, and at 15 he read ISAAC NEWTON's *Principia* and began original investigations. In 1827, while still an undergraduate, he was appointed professor of astronomy at Trinity College, Dublin, and Irish Astronomer Royal. His first published work was on optics, and he then adopted a new approach to dynamics, later and independently proposed by CARL JACOBI, which became of considerable importance in the 20th-century development of quantum mechanics. In 1843 he introduced quaternions after realizing that a consistent algebra of four dimensions was possible. The discovery led to work on other abstract algebras and so proved to be the seed of much modern algebra. Because quaternions split naturally into a one- and a three-dimensional part, their discovery allowed the successful introduction of vectors into physical problems. He was knighted in 1835. 🕮 Reginald Percival Graves, *Life of Sir William Rowan Hamilton* (3 vols, 1882–89)

Hamilton and Brandon, Douglas Douglas-Hamilton, 14th Duke of 1903–73
Scottish aviator
Educated at Eton and Balliol College, Oxford, he held many distinguished royal positions, such as hereditary keeper of Holyroodhouse and Lord Steward of HM Household (1940–64). He developed an interest in aviation during the 1920s and 1930s, first as pilot, then as commander of the 602 Squadron of the Auxiliary Air Force (1927–36). In 1932 he was the chief pilot in the Houston Mount Everest Expedition, about which he wrote in *The Pilot's Book of Everest* (1936). He played a large part in the formation of Scottish Aviation Ltd at Prestwick Airport (now part of British Aerospace). During World War II he held various senior positions in the RAF, and commanded the Air Training Corps in Scotland. In 1941 RUDOLF HESS flew to Scotland seeking the duke's help as an intermediary in possible peace negotiations. The duke flew in his Hurricane to report to CHURCHILL, who was unimpressed, and Hess remained a prisoner for the rest of his life. In 1964 the duke received the Royal Victorian Chain from the queen.

Hamlin, Hannibal 1809–91
US politician
Born in Paris Hill, Maine, he practised law (1833–48), was Speaker of the Maine House of Representatives, and was returned to Congress in 1842 and 1844. In 1848 he became a member of the US Senate as a Democrat, but switched to the Republican party in 1856 because of his anti-slavery opinions. In the same year he was nominated as the Republican candidate for governor of Maine, and won the election in 1857, but then resigned to return to the US Senate. In 1861 he became Vice-President under ABRAHAM LINCOLN. After a further period in the Senate (1869–81), he was appointed Minister to Spain (1881–82).

Hamm, Mia (Mariel Margaret) 1972–
US footballer
Born in Selma, Alabama, she was a member of the successful University of North Carolina women's team, but it was her performances for the USA's national women's side that won her a reputation as the greatest female footballer in history. She helped her country to victories in the 1991 and 1999 FIFA Women's World Cup competitions, and was in the side that won gold at the Atlanta Olympics (1996). Voted FIFA World Player of the Year in 2001 and 2002, she finished her career with a remarkable record of 158 goals in 276 games. Her final triumph was another team gold at the Athens Olympics (2004).

Hammarskjöld, Dag Hjalmar Agne Carl 1905–61
Swedish statesman and Nobel Prize winner
He was born in Jönköping. In 1933 he became an assistant professor at Stockholm University, and subsequently secretary (1935) and then chairman (1941–48) of the Bank of Sweden. He was Swedish Foreign Minister (1951–53), and a delegate to the Organization for European Economic Cooperation, the British–Scandinavian Economic Community (UNISCAN), the Council of Europe and the UN General Assembly. He became Secretary-General of the UN in 1953. Hammarskjöld, who once described himself as 'the curator of the secrets of 82 nations', played a leading part in the setting up of the UN Emergency Force in Sinai and Gaza in 1956, and worked for conciliation in the Middle East (1957–58). He was awarded the 1961 Nobel Peace Prize after his death in an air crash near Ndola in Zambia, while he was engaged in negotiations over the Congo crisis. 🕮 Brian Urquhart, *Hammarskjöld* (1972)

Hammer, Armand 1899–1990
US business executive
Born in New York City, he trained as a physician at Columbia, and served with the US army medical corps (1918–19). In 1921, soon after taking his medical degree, he went to the USSR to help with an influenza epidemic, but turned to business, and exported grain to the USSR in exchange for furs, dealing face to face with LENIN and subsequent Soviet leaders. He founded the A Hammer Pencil Company in 1925, operating in New York, London and Moscow, and maintained strong trading and political connections with the USSR, acting as intermediary between it and the US government on a number of occasions, including the Soviet troop withdrawal from Afghanistan in 1987. In 1961 he bought the small Occidental Petroleum Corporation of California, and turned it into a giant. He founded Hammer Galleries Inc (New York) in 1930. Convicted of making illegal contributions to President NIXON's re-election fund, he was put on a year's probation and fined $3,000. President BUSH pardoned him in 1989. 🕮 Carl Blumay with Henry Edwards, *The Dark Side of Power: The Real Armand Hammer* (1992)

Hammerstein, Oscar c.1847–1919
US theatre manager
Born in Stettin, Germany, he emigrated to the USA in 1863, made a fortune by inventing a machine for spreading tobacco leaves, and founded and edited the *United States Tobacco Journal*. He leased, built or opened numerous theatres in New York, Philadelphia and London.

Hammerstein, Oscar, II 1895–1960
US lyricist and librettist
Born in New York City, the grandson of OSCAR HAMMERSTEIN, he graduated from Columbia College in 1916 and by the early 1920s was writing books and lyrics for Broadway musicals. Among his several collaborators were composers JEROME KERN, with whom he wrote *Showboat* (1927), and RICHARD RODGERS, with whom he formed a famous partnership in 1943. Together he and Rodgers produced such classic musicals as *Oklahoma!* (1943), *Carousel* (1945), *South Pacific* (1949, Pulitzer Prize), *The King and I* (1951) and *The Sound of Music* (1959). Hammerstein's sharp dialogue and ability to create dramatic movement through song helped to transform US musical theatre. In his hands musical comedies were no longer flimsy melodramas with songs tacked on, but seamless and powerful dramatic works. 🕮 Hugh Fordin, *Getting to Know: A Biography of Oscar Hammerstein II* (1986)

Hammett, (Samuel) Dashiell 1894–1961
US crime writer
Born in St Mary's County, Maryland, he grew up in Philadelphia and Baltimore and left school at 14. He was a messenger boy, newsboy, clerk, time keeper, yardman, machine operator and stevedore before joining the Pinkerton Detective Agency in New York as an operator. Having served his literary apprenticeship writing stories for magazines like *Black Mask*, he became the first US author of authentic 'private eye' crime novels. Original, unsentimental and an acute social observer, his four best novels are *Red Harvest* (1929), *The Dain Curse* (1929), *The Maltese Falcon* (1930) and *The Glass Key* (1931). In New York he met LILLIAN HELLMAN, with whom he lived for the rest of his life. He was already a chronic alcoholic, and his subsequent work never equalled his first literary successes. *The Thin Man* (1934), written in a brief period of sobriety, was made into a popular film, as were all his novels, notably *The Maltese Falcon*. He made

a living scriptwriting, and enlisted during World War II, but was discharged with emphysema, and continued to drink immoderately until 1948 when an attack of delirium tremens turned him to temperance. Politically a radical, he was anti-MCCARTHY and served a six-month jail sentence for his sympathies. A collection of short stories, *The Big Knockover and Other Stories* (1966), appeared posthumously. 🕮 D Johnson, *Dashiell Hammett: A Life* (1983)

Hammett, Louis Plack 1894–1987
US physical chemist
Born in Wilmington, Delaware, he graduated from Harvard in 1916, worked for a year with HERMANN STAUDINGER at the Swiss Federal Institute of Technology, Zurich, and after wartime research he joined the chemistry faculty of Columbia University, New York, in 1920, becoming full professor in 1935. He is regarded as a founder of physical organic chemistry, a field greatly influenced by his book *Physical Organic Chemistry* (1940). In structure–reactivity relationships he devised the 'Hammett equation' to summarize the reactivities of certain benzene derivatives, and he was also a pioneer in using the acidity function to study the effects of acidic solutions on organic reactions. His honours included the Priestley Medal (1961) and other awards of the American Chemical Society, and honorary fellowship of the Royal Society of Chemistry.

Hammond, Eric Albert Barratt 1929–
English trade union leader
He became active in trade union affairs in his early twenties and rose from shop steward in 1953 to general secretary of the Electrical, Electronics, Telecommunications and Plumbing Union (EETPU) in 1984. He was a long-time outspoken critic of what he considered as old-fashioned unionism and concluded single-union, 'no strike' agreements with employers, in defiance of Trades Union Congress (TUC) policy. Criticism of him and his union came to a head in 1988 when the EETPU was dismissed from the TUC. He retired from the EETPU in 1992, the same year that the union merged with the TUC-affiliated Amalgamated Engineering Union to form the Amalgamated Engineering and Electrical Union, and the publication year of his autobiography, *Maverick: The Life of a Union Rebel.*

Hammond, Henry 1605–60
English clergyman
Born in Chertsey, Surrey, he was educated at Eton and Magdalen College, Oxford. In 1633 he became rector of Penshurst, and in 1643 archdeacon of Chichester. His loyalty to CHARLES I cost him his living but he officiated as chaplain to the king until 1647, when he returned to Oxford, and was chosen sub-dean of Christ Church. Imprisoned by the Parliamentary Commissioners in 1648, he retired to Westwood in Worcestershire. He published *Paraphrase and Annotations on the New Testament* in 1653.

Hammond, Dame Joan Hood 1912–96
Australian soprano
Born in Christchurch, New Zealand, she studied at the Sydney Conservatorium of Music, originally as a violinist. An active sportswoman, she won a number of golf and swimming championships up to 1935. When an arm injury forced her to give up the violin, she turned to singing, performing in HANDEL's *Messiah* in London in 1938 and making her operatic debut the following year in Vienna. From 1945 she sang leading roles in some 30 operas, and made many recordings; her 'O mio babbino caro' was the first classical record to win a gold disc for sales of over one million. She retired from singing in 1971 to become the artistic director of the Victoria Opera Company, and was head of vocal studies at the Victorian College of the Arts (1975–92), then consultant in vocal studies at the University of Melbourne. In 1970 she received the Sir Charles Santley award (for Musician of the Year) from the Worshipful Company of Musicians in London and was made a DBE in 1974. She wrote an autobiography entitled *A Voice, A Life* (1970).

Hammond, John, Snr 1910–87
US music promoter, talent scout and producer
Born in New York City into a wealthy family, he acquired an early taste for jazz from Harlem, and began actively to promote both swing jazz and the racial integration of musicians. He is credited with the discovery of BILLIE HOLIDAY and with boosting the early careers of BENNY GOODMAN, COUNT BASIE and others. He was involved in establishing the Newport Jazz Festival in the 1950s. Engaged by Columbia Records in 1959, he showed as instinctive an ear for pop as for jazz, signing undiscovered future stars ARETHA FRANKLIN, BOB DYLAN and BRUCE SPRINGSTEEN to the label. 🕮 Dunstan Prial, *The Producer: John Hammond and the Soul of American Music* (2006)

Hammond, John Lawrence le Breton 1872–1949
English reforming journalist and social historian
Born in Yorkshire, he was educated at Bradford Grammar School and Oxford. His politics were Liberal-Labour, shown in his early editorship of the *Speaker* (1899–1906), but he went to the Civil Service Commission and then (after armed service) to the Ministry of Reconstruction until 1918. He later became a major figure on the *Manchester Guardian*. He was married from 1901 to Lucy Barbara Bradby (1873–1961), and together they revealed the harshness of English social conditions from 1760 to 1832, in *The Village Labourer* (1911), *The Town Labourer* (1917) and *The Skilled Labourer* (1919). *The Age of the Chartists* (1930), reworked as *The Bleak Age* (1934), addressed later stages of social injustice. Hammond also wrote biographies of CHARLES JAMES FOX (1903) and the editor of *The Guardian*, C P SCOTT (1934), but his major work was *Gladstone and the Irish Nation* (1938), based on the GLADSTONE manuscripts.

Hammond, Wally (Walter) 1903–65
English cricketer
Born in Dover, Kent, he enjoyed a highly successful career as a batsman with Gloucestershire and England. He played in 85 Test matches and scored over 50,000 runs in the first-class game, including 7,249 in Tests (nearly 3,000 of them against Australia). Highlights of his long career included a match against Surrey in 1928 in which he took a record ten catches.

Hammurabi or **Hammurapi** d.c.1750 BC
Amorite King of Babylon
He ruled from c.1792 to 1750 BC, and is best known for his Code of Laws (a tablet inscribed with it is in the Louvre, Paris). He is also famous for his military conquests that made Babylon the greatest power in Mesopotamia. 🕮 F M T Bohl, *King Hammurabi of Babylon in the Setting of His Time* (1946)

Hamnett, Katharine 1952–
English fashion designer
She was born in Gravesend, Kent, the daughter of a diplomat. Educated at Cheltenham Ladies College, she studied fashion at St Martin's School of Art in London, then worked as a freelance fashion designer, setting up a short-lived company (1969–74) and then her own business in 1979. Her designs have tended to reflect her interest in anti-war, HIV awareness and environmental campaigns, and her collections have often incorporated slogan T-shirts relating to these issues.

Hamp, Pierre, *pseudonym of* **Pierre Bourillon** 1876–1962
French writer
Born in Nice, he was a self-made and self-educated man, and his novels display a realism bred of first-hand experience. Among his works are *Marée fraîche* (1908, 'Fresh-Caught Fish'), *Le Rail* (1912), *Les Métiers blessés* (1919, 'The Injured Trades'), *Le Lin* (1924, 'Flax') and *La Laine* (1931, 'Wool'), novels of industrial life forming a cycle he called *La Peine des hommes* ('The Suffering of Men').

Hampden, John 1594–1643
English Parliamentarian
He became an MP in 1621 and in 1626 he helped to prepare the charges against the Duke of BUCKINGHAM. The next year, having refused to pay his proportion of the general loan which CHARLES I attempted to raise on his own authority, he was imprisoned, and in 1634, when Charles levied a tax for outfitting the navy ('ship-money'), he again refused to pay his share, and was prosecuted before the Court of Exchequer (1637). Seven of the twelve judges found against him, but the prosecution made Hampden the most popular man in England. He was MP for Buckinghamshire, in both the Short and the Long Parliaments. He was one of the five members whose attempted seizure by Charles in 1642 precipitated the Civil War. When hostilities broke out he raised a regiment of infantry for the Parliamentary army, and demonstrated bravery and generalship at the battles of Edgehill and Reading, but was killed at Thame. He was the most moderate, tactical, urbane and single-minded of the leaders of the Long Parliament. 🕮 John Adair, *John Hampden* (1976)

Hampson, Frank 1918–85
English strip cartoonist
Born in Audenshaw, Manchester, he became a Post Office telegraph boy. After studying art at Southport, he contributed his first strip to the Post Office staff magazine in 1937. In 1950 he designed a Christian comic for boys which eventually became *Eagle*, made popular by his two-page weekly serial, 'Dan Dare,

Pilot of the Future', a painted strip which introduced a unique authenticity through Hampson's use of human models and carefully modelled spaceships.

Hampton, Christopher 1946–
English dramatist
He was born in the Azores, and educated at Oxford. His first play, *When Did You Last See My Mother?* (1964), led to his appointment as the first resident dramatist at the Royal Court Theatre, London. The Court produced all his earlier plays, including *Total Eclipse* (1968), *The Philanthropist* (1970), *Savages* (1973), set in Brazil, and *Treats* (1976). His finest play is considered to be *Tales From Hollywood* (1982), but the most commercially successful has been *Les Liaisons Dangereuses* (1985, filmed 1988), a penetrating study of sexual manners, morality and responsibility, adapted from the novel by PIERRE CHODERLOS DE LACLOS. *White Chameleon* was staged at the National Theatre, London, in 1991. He has made many adaptations and translations, including the serialization of Oswald Wynd's *The Ginger Tree* for television in 1989. Later he wrote and directed the film *Carrington* in 1995, based on the life of DORA CARRINGTON. His many translations include the hit play *Art* by Yasmina Reza (1996). He also wrote screenplays from GRAHAM GREENE's *The Quiet American* and IAN MCEWAN's *Atonement* (2007). He was made a CBE in 1999.

Hampton, Lionel 1908–2002
US jazz musician and bandleader
Born in Louisville, Kentucky, he began as a drummer but was given xylophone tuition while a young man in Chicago. Along with Red Norvo, he introduced the vibraphone into jazz, recording with LOUIS ARMSTRONG in 1930. He was a member of BENNY GOODMAN's small groups in the late 1930s. He first formed a permanent big band in 1940, continuing as a leader into the 1990s even after he was confined to a wheelchair. He took his entertaining brand of musicianship and showmanship on many overseas tours. 🕮 Lionel Hampton and James Haskins, *Hamp* (1989)

Hampton, Wade c.1751–1835
American general
Born in Halifax County, Virginia, he served in the American Revolution (1775–83), and became a member of the US House of Representatives. He rejoined the army in 1808, rose to the rank of major-general by 1813, and made an unsuccessful attempt to invade Canada.

Hampton, Wade 1818–1902
US soldier
He was born in Columbia, South Carolina, the grandson of WADE HAMPTON. In the Civil War (1861–65) he raised 'Hampton's Legion'. As brigadier-general he commanded a cavalry force (1862–63), was wounded at Gettysburg, received the command of ROBERT E LEE's cavalry (1864), and served in South Carolina against WILLIAM SHERMAN (1865). He later became state governor in 1876, when he was instrumental in restoring white rule to South Carolina, and was a US senator (1878–91).

Hamsun, Knut, *pseudonym of* **Knut Pedersen** 1859–1952
Norwegian novelist and Nobel Prize winner
Born in Lom, Gudbrandsdal, he had no formal education, and spent his boyhood with his uncle, a fisherman on the Lofoten Islands. He worked at various odd jobs, including shoemaking, coal-mining and teaching, and twice visited the USA (1882–84, 1886–88), where he worked as a streetcar attendant in Chicago and a farmhand in North Dakota. He sprang to fame with his novel *Sult* (1890, Eng trans *Hunger*, 1899), followed by *Mysterier* (1892, Eng trans *Mysteries*, 1927) and the lyrical *Pan* (1894). His masterpiece is considered *Markens grøde* (1917, Eng trans *Growth of the Soil*, 1920), which was instrumental in his award of the 1920 Nobel Prize in literature. His last novel was the unfinished *Ringen slutlet* (1936, Eng trans *The Circle is Closed*, 1937). A recluse during the inter-war years, he lost popularity during World War II for his Nazi sympathies and support of the QUISLING regime, for which he was imprisoned in 1948, but his reputation has been largely re-established. 🕮 R Ferguson, *The Life of Knut Hamsun* (1987)

Hanbury Brown, Robert *See* BROWN, ROBERT HANBURY

Hanbury-Tenison, (Airling) Robin 1936–
English explorer and author
Brought up in Ireland, and educated at Eton and Oxford, in 1958 he achieved the first land crossing of South America at its widest point. His concern for Indian tribes led to his being one of the founding members of the charity Survival International, of which he is now president. He took part in both British Hovercraft expeditions in Amazonas (1968) and Trans-Africa (1969). In 1971 he undertook a three-month expedition for the Brazilian government, visiting 33 tribes, and publishing a report on their plight. He took part in the British Trans-Americas expedition of 1972, crossing the Darién gap and writing a report on the impact of the road on the Cuna Indians, and led the Royal Geographical Society's Gunung Mulu (Sarawak) Expedition (1977–78), which alerted the international community to the endangered status of rainforests. In more recent years he has ridden on horseback from Cornwall to the Camargue, along the Great Wall of China (1986), and south to north through New Zealand (1986). His publications include the autobiographical *Worlds Apart* (1984) and *Spanish Pilgrimage* (1990).

Hancock, Herbie (Herbert Jeffrey) 1940–
US jazz pianist, bandleader and composer
Born in Chicago, he studied classical music as a child, but began performing jazz as a student. He went to New York with trumpeter Donald Byrd, made his first record as a leader in 1962, and joined the seminal MILES DAVIS Quintet in 1963, where he confirmed his escalating reputation while continuing to make important records under his own name. He followed Davis's example in turning to electric jazz–funk with his Headhunters sextet, and has worked back and forth in both genres ever since, while keeping pace with new developments in jazz and popular music. He has exerted a wide-ranging influence, and is also a successful composer of film music. He won an Academy Award for his music for the jazz film *Round Midnight* (1987), in which he also appeared. A practising Buddhist, he helped to found the Rhythm of Life Organization (1996), which encourages the responsible use of technology.

Hancock, John 1737–93
American revolutionary and political leader
Born in Quincy, Massachusetts, he graduated from Harvard and became a merchant in Boston. He opposed the Stamp Act (1765), and in 1768 his sloop *Liberty* was seized by the British for smuggling. As president (1775–77) of the Continental Congress, he was the first to sign the Declaration of Independence, writing his name in a bold hand. He remained in the Congress until 1780, when he was elected governor of Massachusetts.

Hancock, Lang(ley) George 1909–92
Australian mining industrialist
Born in Perth, Western Australia, he leased claims for the mining of 'blue' asbestos at Wittenoom, Western Australia in 1934, and developed a processing plant in partnership with Peter Wright. Hancock pioneered the use of light aircraft for prospecting, after having discovered substantial iron ore deposits in the Pilbara region. Having established his claim, he concluded mining agreements with a number of companies, thus initiating the growth of Australian extractive industries. He went on to discover further deposits (1963–69), including Rhodes Ridge, the largest deposit in the world, of an estimated 10 million tonnes. He held controversial views on politics and Aboriginal affairs and in 1974 formed a secessionist movement in Western Australia with the aim of better political representation.

Hancock, Sheila Cameron 1933–
English actress
Born in Blackgang, Isle of Wight, she trained at RADA and made her name on television as shop treasurer Carole in the sitcom *The Rag Trade* (1961–62). She followed it with roles in *Mr Digby, Darling* (1969), *Gone to Seed* (1992), *Brighton Belles* (1993–94), *The Buccaneers* (1995), *Dangerous Lady* (1995), *Eastenders* (2000–01) and *Bleak House* (2005). Her films include *Doctor in Love* (1960), *Carry On Cleo* (1964), *The Anniversary* (1968), *Buster* (1988) and *3 Men and a Little Lady* (1990). On stage, she appeared in the West End in *The Anniversary* (1966) and on Broadway in *Entertaining Mr Sloane*. Awarded an OBE in 1974, she was married to the actor JOHN THAW, about whom she wrote the autobiography *The Two of Us: My Life with John Thaw* (2004). 🕮 *Ramblings of An Actress* (1987)

Hancock, Thomas 1786–1865
English inventor and manufacturer
Born in Marlborough, Wiltshire, he obtained in 1820 a patent for the 'application of a certain material (rubber) to render various parts of dress and other articles more elastic'. In experimenting with the preparation of rubber for waterproofing and other purposes, he built what was intended to be a shredding machine but found that it produced a solid homogeneous block of rubber, in a form that was much more

Handel, George Frideric, *German (until 1715)* **Georg Friedrich Händel** 1685–1759
German–English composer

Handel was born in Halle, Saxony, the son of a barber-surgeon. He became organist of Halle Cathedral at the age of 17 while studying law at the university. After some experience playing in the Hamburg opera orchestra, and four years in Italy, he was appointed in 1710 to the court of the Elector of Hanover. He took frequent leaves of absence to try his fortune in London, introducing himself with the opera *Rinaldo* (1711). These frequent absences displeased the Elector, whose succession to the English throne as GEORGE I led at first to some awkwardness; the *Water Music*, composed for a river procession, is said to have been a peace offering.

Between 1713 and 1720 Handel was attached to the households of the Earl of BURLINGTON and the Duke of Chandos. Later he devoted himself to the promotion of opera at the King's Theatre, Haymarket, under the auspices of the newly founded Royal Academy of Music. Attempting to satisfy the fickle taste of the fashionable London world with Italian opera was difficult, and his success varied. The Royal Academy of Music came to an end in 1728, was resuscitated temporarily, but collapsed again, after which Handel went into partnership with John Rich at his theatre in Covent Garden. Eventually he turned to a new form, the English oratorio, which proved to be enormously popular.

In 1735 Handel conducted 15 oratorio concerts in London. Despite a stroke in 1737, in the next five years he produced the oratorios *Saul* (1739), *Israel in Egypt* (1739) and the *Messiah* (1742), which had been first performed in Dublin. *Samson* followed in 1743, succeeded by *Joseph and His Brethren* (1744), *Semele* (1744), *Judas Maccabaeus* (1747), *Solomon* (1749) and others; his last, *Jephtha*, appeared in 1751. His *Music for the Royal Fireworks* had appeared in 1749, only serving to enhance his reputation in the eyes of the British people.

A sociable, cultivated, cosmopolitan figure, and a very prolific composer like his exact contemporary J S BACH, he wrote for the most part in the current Italianate style, though in his settings of English words there are reflections of HENRY PURCELL. His output included 46 operas, 32 oratorios, large numbers of cantatas, sacred music, concerti grossi and other orchestral, instrumental and vocal music. Regarded as the greatest composer of his day, Handel was buried in Westminster Abbey.

📖 D Burrows, *Handel* (1994); Christopher Hogwood, *Handel* (1985); Jonathan Keates, *Handel: The Man and His Music* (1985).

> 'Whether I was in my body or out of my body as I wrote it I know not. God knows.' Of the 'Hallelujah Chorus' in his *Messiah*.
>
> – Quoted in Romain Rolland, 'Essays on Music' (1948).

suitable for manufacturing purposes. He took out patents for his 'masticator' and a number of other devices and processes, including (1843) the first English patent for vulcanization of rubber. For a time he was in partnership with CHARLES MACINTOSH.

Hancock, Tony (Anthony John) 1924–68
English comedian
Born in Birmingham, he tried his hand as a stand-up comic in RAF concert parties and touring gang shows before making his professional stage debut in *Wings* (1946). Pantomimes, cabaret and radio appearances in *Educating Archie* (1951) contributed to his growing popularity and he made his film debut in *Orders is Orders* (1954). The radio series *Hancock's Half Hour* (1954), written by Alan Simpson and Ray Galton, allowed him to refine his lugubrious comic persona as a pompous misfit whose changeable social ambitions and blinkered patriotism are frequently thwarted or belittled. The series transferred to television (1956–61), gaining large viewing figures and rare public affection. Dispensing with his regular co-stars and writers, he made ill-advised attempts at solo projects and serious 'artistic' endeavours in films like *The Rebel* (1960) and *The Punch and Judy Man* (1963). A chronic alcoholic beset by self-doubt, he spent his final years in a self-destructive round of aborted projects and unsatisfactory performances, and committed suicide while attempting a further comeback on Australian television.

Hancock, Sir William Keith 1898–1988
Australian historian and writer
Born in Fitzroy, Victoria, and educated at Melbourne University, he became a Rhodes scholar in 1922 and was the first Australian to be elected a Fellow of All Souls, Oxford. From 1924 he held professorships at Adelaide, Birmingham and Oxford universities, before becoming director of the Institute of Commonwealth Studies in London (1939–57). He returned to Australia in 1957 as foundation director of research studies and was later professor of history at the Australian National University, Canberra. Author of many important works including *Australia* (1930) and a biography of JAN SMUTS (1962–68), he gave the ABC's Boyer Lectures entitled 'Today, Yesterday and Tomorrow' in 1973.

Hancock, Winfield Scott 1824–86
US soldier
Born in Montgomery County, Pennsylvania, he organized the Army of the Potomac in 1861, was prominent at South Mountain, Antietam and Fredericksburg, and in 1863 took command of the 2nd Corps. At Gettysburg he was in command until GEORGE G MEADE's arrival, and was severely wounded. In 1864 he was conspicuous in the battles of the Wilderness, Spottsylvania and Cold Harbor. Democratic candidate for the presidency in 1880, he was defeated by JAMES A GARFIELD.

Hand, (Billings) Learned 1872–1961
US judge and jurist
Born in Albany, New York State, into a dynasty of New York judges, he graduated from Harvard University and its Law School. He practised law in New York City and at the state capital Albany, until he was appointed US judge for the Southern District of New York (1908–24). He then became a judge of the US 2nd Circuit Federal Court of Appeals (1924–51). His judgements extended into all branches of law, and exerted so much influence on the US Supreme Court that although never appointed to it, he was known as the Supreme Court's 'tenth man'. He was hostile to judicial 'legislation' and held that judges should not go beyond the immediate case in hand, but also opposed Congressional attempts to limit judicial discretion. From 1951 to 1961 he continued to hear special cases. He published *The Bill of Rights* (1958) and *The Spirit of Liberty* (1952, 1960).

Handel, George Frideric *See panel above*

Handke, Peter 1942–
Austrian dramatist and novelist
Born in Griffen, he trained as a lawyer, and his first play, *Publikumsbeschimpfung*, was published in 1966 (Eng trans *Offending the Audience*, 1970). It presents four characters who speak randomly and insult the audience, and, like much of his work, has been the subject of some controversy. Other plays are *Das Mündel will Vormund sein* (1966, Eng trans *My Foot My Tutor*, 1971) and *Wunschloses Unglück* (1972, Eng trans *A Sorrow Beyond Dreams*, 1975 (US); 1976 (UK)). His novels include *Die Angst des Tormanns beim Elfmeter* (1970, Eng trans *The Goalie's Anxiety at the Penalty Kick*, 1972 (US); 1977 (UK)). In 1996, he published a travelogue describing a journey through Serbia, which provoked controversy with its sympathetic view of Serbian conduct during the Bosnian war. He declined a request to testify on behalf of SLOBODAN MILOŠEVIĆ at his trial, but spoke at his funeral in 2006. 📖 J Schlueter, *The Plays and Novels of Peter Handke* (1981)

Handley, Tommy (Thomas Reginald) 1892–1949
English comedian
Born in Liverpool, he worked in variety and concert parties during World War I, and in the early days of radio he became a regular broadcaster. In 1939 he achieved nationwide fame through his weekly programme *ITMA* (*It's That Man Again*), which, with its endearing mixture of satire, parody, slapstick and wit provided a major boost to wartime morale. The programme remained a favourite until his sudden death. 📖 Bill Grundy, *That Man: A Memory of Tommy Handley* (1976)

Handlin, Oscar 1915–
US historian
Born in Brooklyn, New York City, he was the son of Russian–Jewish immigrants. After graduating from Brooklyn College

and teaching there (1936–38), he taught at Harvard, where he took his doctorate in 1940, and remained on its staff in chairs of increasing honour, latterly Carl M Loeb University Professor (1984–86). His doctoral thesis and first book, *Boston's Immigrants 1790–1865* (1941) is his main work, and it was updated as *The Uprooted* (1951, Pulitzer Prize 1952), a comprehensive survey of all US immigration. With his sociologist wife, Mary Flug Handlin, he published *Commonwealth* (1947), a history of Massachusetts, and some of her work and influence are also present in his essays, *Race and Nationality in American Life* (1957). His later works include *The Americans* (1963), *Truth in History* (1979), *The Distortion of America* (1981) and *Liberty in Peril* (1991).

Hands, Terry (Terence David) 1941–
English stage director
Born in Aldershot, Hampshire, he was educated at Birmingham University, and co-founded the Everyman Theatre, Liverpool, in 1964. He joined the Royal Shakespeare Company (RSC) in 1966, became an associate director (1967), joint artistic director with TREVOR NUNN (1978), and sole artistic director and chief executive (1986–91), now director emeritus. He was consultant director at the Comédie Française (1975–77), and has directed SHAKESPEARE at the Burgtheater in Vienna. Among his RSC productions were *Othello* (1985), with BEN KINGSLEY in the title role, *Romeo and Juliet* (1989) and CHEKHOV's *The Seagull* (1990), his last production before he handed over his directorship in 1991. In 1992, he returned to the RSC to direct an award-winning production of CHRISTOPHER MARLOWE's *Tamburlaine the Great*, with ANTONY SHER in the lead role. Other productions include *The Merry Wives of Windsor* (1995) with the Royal National Theatre and *The Importance of Being Earnest* (1995) with the Birmingham Repertory Theatre. He is currently director of the Clwyd Theatr Cymru (1997–).

Handy, Charles Brian 1932–
Irish teacher and writer on management
Born in Dublin and educated at Oxford, he was a manager in Shell Petroleum and an economist in the City of London. In 1972 he became professor of management development at the London Graduate School of Business and in 1977 was appointed Warden of St George's House, Windsor (the Church of England's staff college). His comparative study of managers in Great Britain, the USA, Europe and Japan, *The Making of Managers* published in 1988, has helped to shape current management education. Later publications include *Beyond Certainty* (1995) and the autobiographical works *The Elephant and the Flea* (2001) and *Myself and Other More Important Matters* (2006). He was made a CBE in 2000.

Handy, W(illiam) C(hristopher) 1873–1958
US musician and composer
He was born in Florence, Alabama, and despite the opposition of his Methodist preacher father to his choice of a musical career, he joined a minstrel show as a cornet player. In 1903 he formed his own band in Memphis, Tennessee, and drew on various genres of African-American music, including spirituals, folk ballads, work songs and early jazz, to develop the form of music known as the blues. His earliest known composition 'The Memphis Blues' (1911), was followed by 'St Louis Blues' (1914), 'Beale Street Blues', 'Yellow Dog Blues', 'Careless Love' and many others. He was the first to introduce the blues style to printed music, founding a music publishing company with a partner in Memphis in 1913 and continuing to run the firm independently in New York City in the 1920s and afterwards. Long known as the 'father of the blues', he used that epithet as the title of his autobiography, published in 1958.

Hani, Motoko, *originally* **Matsuoka Moto** 1873–1957
Japanese journalist and educationalist
Born in Hachinohe, Aomori Prefecture, and educated at the Meiji Girls' School, Tokyo, she taught briefly in Aomori before returning to Tokyo where she joined the newspaper *Hochi Shimbun*. In 1897 she became its first full-time woman reporter. After her marriage to fellow reporter Yoshikazu Hani (1901), she and her husband joined the magazine *Katei no tomo* in 1903, which, under their ownership, became the highly influential woman's magazine *Fujin no Tomo*. In 1921 the Hanis founded the progressive school Jiyu Gakuen, which combines Christian and Confucian ethics.

Hanif Mohammed *See* MOHAMMED, HANIF

Hanks, Tom (Thomas Jeffrey) 1956–
US actor
Born in Concord, California, he made his film debut in the thriller *He Knows You're Alone* (1980) and was praised for his performance in the television sitcom *Bosom Buddies* (1980–82) before the unexpected popularity of the film *Splash* (1984) boosted his career. His relaxed manner and mischievous grin made him one of the USA's most popular young performers in comedies like *Bachelor Party* (1984) and *The Money Pit* (1985). Nominated for an Academy Award for his role in *Big* (1988), he later won the award for his performance in *Philadelphia* (1993) and as *Forrest Gump* (1994). Drawing on his everyman appeal, his many popular successes include *Sleepless in Seattle* (1993), *Apollo 13* (1995), *Saving Private Ryan* (1998), *Cast Away* (2000) and *The Da Vinci Code* (2006). He made his feature-length directorial debut with *That Thing You Do* (1995).

Hanley, Ellery 1961–
English rugby league player
Born in Leeds, he played for a Leeds amateur club and signed for Bradford Northern in 1978. He waited three years for a Division 1 match, then scored 55 tries in 1984–85. He transferred to Wigan in 1985 for the record fee of £150,000 and then to Leeds in 1991 for £250,000. He won 34 caps with Great Britain. Since retiring from playing he has coached teams in both rugby league and rugby union. He was awarded the MBE in 1990.

Hanna, Mark (Marcus Alonzo) 1837–1904
US businessman and politician
Born in New Lisbon, Ohio, he and his family moved to Cleveland, where he worked in his father's wholesale grocery. He served in the Union army (1864) and, starting in partnership with his father in coal and iron, made the most of the great post-war expansion. He helped organize the Union National Bank, bought the Cleveland Opera House, invested in Cleveland street-railways, and moved into politics to protect business interests, backing Ohio candidates for the presidency successfully (JAMES A GARFIELD, 1880), unsuccessfully (JOHN SHERMAN, 1888) and very successfully (WILLIAM MCKINLEY, 1896). He transformed local and state Republican boss systems into a massively organized national fighting force for the 1896 election, carrying campaign finance to unprecedented lengths. He refused Cabinet office, but accepted a seat in the Senate in 1897.

Hanna-Barbera, *properly* **William Denby Hanna** 1910–2001 and **Joseph Roland Barbera** 1911–
US animated cartoonists
Born in New Mexico, Hanna became a structural engineer, then turned to cartooning. He was one of the first directors at the new MGM animation studio in Hollywood in 1937, making RUDOLPH DIRKS's *Captain and the Kids*. There he teamed up with New York City-born Barbera, who arrived at MGM the same year. Together they made *Puss Gets the Boot* (1939), featuring a cat and mouse; developing the idea, they went on to make over 200 film shorts of the immortal duo *Tom and Jerry*, for which they received seven Academy Awards between 1943 and 1953. In 1957 they formed Hanna-Barbera Productions and turned to television, creating dozens of popular series such as *Huckleberry Hound*, *Yogi Bear* and *The Flintstones*. Receiving critical acclaim and commercial success in equal measure, they were the masters of 20th-century animation and their influence on the genre remains profound.

Hannibal *See panel p699*

Hannington, James 1847–85
English missionary
Born in Hurstpierpoint, Sussex, he studied at Oxford. In 1882, after a seven-year curacy in his native parish, he went out to Uganda for the Church Missionary Society. Fever and dysentery forced him to return to England, but in 1884 he was consecrated first Bishop of Eastern Equatorial Africa. In 1885 he travelled to Uganda, where he was murdered by King Mwanga.

Hanno 5th century BC
Carthaginian navigator
He undertook a voyage of exploration along the west coast of Africa. He founded colonies, and reached Cape Nun or the Bight of Benin. An account of his voyages, known as *Periplus of Hanno*, survives in a Greek translation.

Hanratty, James c.1936–1962
English alleged murderer
He was found guilty of the murder of Michael Gregsten, who was shot while in his car with his lover, Valerie Storie, on 22 August 1961. Storie, who had been raped, and paralysed by several bullets, picked out Hanratty from an identity parade. Hanratty, who was reportedly a petty criminal of low intelligence, was charged. He denied the charge but refused to name his alibis, saying that to do so would be to betray his friends' trust. He

Hannibal, 'the grace of Baal' 247–182 BC
Carthaginian soldier

Hannibal was the son of HAMILCAR and at the age of nine his father made him swear eternal enmity to Rome. He served in Spain under Hamilcar and his brother-in-law Hasdrubal, and was elected general after Hasdrubal's death. He won control of southern Spain up to the Ebro (221–219 BC), and the fall of Saguntum in 218 BC sparked off the Second Punic War with Rome. In 218 BC he surprised the Romans by marching from Spain through southern Gaul, and crossing the Alps into Italy with an army including elephants. His troops, used to the African and Spanish climate, perished by the thousand amid ice and snow; but he defeated the Taurini, forced Ligurian and Celtic tribes to serve in his army, and at the River Ticinus drove back the Romans under PUBLIUS CORNELIUS SCIPIO the Elder (218 BC).

The first great battle was fought in the plain of the River Trebia, when the soldiers of the Roman consular army were either cut to pieces or scattered in flight. Hannibal wintered in the valley of the Po, and in spring crossed the Apennines, devastating Etruria and marching toward Rome. He awaited the consul GAIUS FLAMINIUS by Lake Trasimene, where he inflicted on him a crushing defeat; the Roman army was annihilated. Passing through Apulia and Campania, he wintered at Gerunium, and in the spring at Cannae (216 BC) on the Aufidus utterly destroyed another Roman army under QUINTUS FABIUS ('Cunctator').

After Cannae the tide turned. Rome's allies remained loyal, and Hannibal received inadequate support from Carthage. Although he was not defeated, as his veterans were lost to him he had no means of filling their places, while the Romans could put army after army into the field. He spent the winter of 216–215 BC at Capua. The Romans wisely avoided a further pitched battle, and allowed the Carthaginians to overrun Italy, taking towns and gaining minor victories. However, Capua fell in 210 BC; and in 207 BC Hasdrubal, marching from Spain to his aid, was defeated and killed at the River Metaurus.

For four years Hannibal stood at bay in the hill-country of Bruttium, until in 203 BC he was recalled to Africa to meet a Roman invasion by Scipio. In the next year he met Scipio at Zama, his decisive defeat there ending the war. On the conclusion of peace, Hannibal devoted himself to political reform, but he aroused such strong opposition that he fled to the court of ANTIOCHUS III at Ephesus, and then to Bithynia. When the Romans demanded his surrender, he took poison.

📖 Bernard Levin, *Hannibal's Footsteps* (1986); D S Bradford, *Hannibal* (1981); Dennis Proctor, *Hannibal's March in History* (1971); Gavin De Beer, *Hannibal* (1969).

then changed the location of his alibi from Liverpool to Rhyl. The jury found him guilty. After he was hanged on 4 April 1962, several witnesses came forward who believed they had seen him in Rhyl. Following over 30 years of campaigning by his family, a police inquiry in 1997 concluded that Hanratty was wrongly convicted, and the alleged miscarriage of justice was passed to the Criminal Cases Review Commission; however, his conviction was upheld by the Court of Appeal in 2002.

Hansard, Luke 1752–1828
English printer

He was born in Norwich, Norfolk. After joining the office of Hughes, printer to the House of Commons, he became acting manager in 1774, and in 1798 succeeded as sole proprietor. He and his descendants printed the parliamentary reports from 1774 to 1889 and the official reports of proceedings in Parliament are still called 'Hansard' in his honour. WILLIAM COBBETT's *Parliamentary Debates* was continued from 1806 by Hansard's son, Thomas, and successors.

Hansberry, Lorraine 1930–65
US playwright

She was born in Chicago, where her father was a successful real-estate broker, and his efforts to move the family into a segregated neighbourhood in the late 1930s (their victory came only after he carried a lawsuit all the way to the Supreme Court) provided an early lesson in the explosive drama of race relations in the USA. Her play *A Raisin in the Sun* (1959), about a black family seeking to escape a Chicago ghetto, became the first work by an African-American woman to be produced on Broadway and won the New York Drama Critics Circle Award. She also wrote *The Sign in Sidney Brustein's Window* (1964), staged shortly before her death from cancer at the age of 34. Selections of her writings and letters were assembled post-humously as a dramatic self-portrait in *To Be Young, Gifted and Black* (1969).

Hänsch, Theodor Wolfgang 1941–
German physicist

Born in Heidelberg, he studied physics there before taking up a position at Stanford University. He became fascinated by the physics of lasers, and has researched their development throughout his career. In 1986 he became director of Munich's Max Planck Institute of Quantum Optics. He has made important contributions to the development of laser-based precision spectroscopy, which can be used to measure the wavelength or colour of light with extreme precision. These methods have made it possible to develop extremely accurate clocks and improved global positioning technology. He shared the 2005 Nobel Prize in physics with ROY GLAUBER and JOHN HALL.

Hansen, Christian Frederik 1746–1845
Danish neoclassical architect

Born in Copenhagen, he studied in Rome and was influenced by ANDREA PALLADIO, CLAUDE LEDOUX and geometry. The most important architect of his day, he was responsible for the rebuilding of Copenhagen after the 1807 British bombardment. Roman models inspired the strong simple masses of the Court House (1803–16), linked by bridges to its forbidding detention block. Only the chapel remains of his rebuilding of the Christenborg Palace, a porticoed rectangle surmounted by a saucer-dome. In the cathedral (1811–29) he reused the old walls, but introduced a bold geometrical interplay.

Hansen, Gerhard Henrik Armauer 1841–1912
Norwegian physician and bacteriologist

He was born in Bergen, and in 1869 discovered the bacillus that causes leprosy, also known as Hansen's disease.

Hansen, Marcus Lee 1892–1938
US historian

Born in Neenah, Wisconsin, he was educated in Michigan, Minnesota and Iowa, and then studied at Harvard under FREDERICK TURNER. He studied the European background, and toured Europe inspecting archives and newspapers (1925–27), making a special study of the ethnic composition of the USA in 1790 for the American Council of Learned Societies. He taught at Illinois University from 1892 to 1938. All his books were published posthumously in 1940: *The Mingling of the Canadian and American Peoples*, *The Immigrant in American History* and *The Atlantic Migration 1607–1860*.

Hansen, Martin Alfred, *pseudonym of* Jens Alfred Martin Hansen 1909–55
Danish novelist

Born in Stroby, he came from a farming family, and worked on the land and as a teacher, but after 1945 devoted himself to writing. His early novels, *Nu opgiver han* (1935, 'Surrender') and *Kolonien* (1937, 'The Colony'), deal with social problems of the 1930s. *Jonathans Rejse* (1941, 'Jonathan's Journey') and *Lykkelige Kristoffer* (1945, 'Lucky Christopher') are outwardly picaresque novels, but in reality are closely related to his work for the Danish underground press during the Occupation. With *Løgneren* (1950, 'The Liar'), a psychological novel intended first for broadcasting as a serial, he reached a wider public. His most original work is the metaphysical *Orm og Tyr* (1952, 'The Serpent and the Bull'). Other writings include the short stories collected as *Torne-busken* (1946, 'The Thorn Bush'). 📖 C M Woel, *Martin Alfred Hansen. Liv og digtning* (1959)

Hansford Johnson, Pamela 1912–81
English novelist, playwright and critic

Born in London, into a theatrical family, she left school at 18, working in a bank and as a book reviewer. For a short time in the early 1930s she was engaged to be married to DYLAN THOMAS. Her background provided what MARGARET DRABBLE has called 'a peculiar vantage point for an unprejudiced insight into a wide range of behaviour'. Her first novel, *This Bed Thy Centre* (1935), was set in working-class south London, and her many sub-sequent novels, such as the tragi-comical *The Unspeakable*

Skipton (1959), are observant both of the world of her youth, and of society in the sixties and seventies, and range from the comic to the morally insightful. Her critical works include writings on THOMAS WOLFE and MARCEL PROUST. In 1950 she married the novelist C P SNOW and they collaborated on many literary projects. 🕮 I Lindblad, *Pamela Hansford Johnson* (1982)

Hanslick, Eduard 1825–1904
Austrian music critic and writer on aesthetics
Born in Prague, he studied law at Prague University and gained a PhD from the University of Vienna. He was a professor at Vienna University from 1861 and he supported SCHUMANN and BRAHMS against RICHARD WAGNER in his critical writings. He propounded a theory of aesthetics in his *Vom Musikalisch-Schönen* (1854, Eng trans *The Beautiful in Music*, 1891), which did for music what the BELL–FRY theories later did for painting.

Hansom, Joseph Aloysius 1803–82
English inventor and architect
Born in York, he invented the 'Patent Safety (Hansom) Cab' in 1834, and designed Birmingham Town Hall and the Roman Catholic cathedral at Plymouth.

Hanson, Duane 1925–96
US sculptor
He was born in Alexandria, Minnesota, and studied at the Cranbrook Academy of Art in Bloomfield, Michigan, before going to Germany, where he lived from 1953 to 1961. He specialized in life-size figures made from polyester resin stiffened with fibreglass, then painted realistically and clothed. His earlier work was violent (for example *Abortion*, 1966), but he later shifted to mildly satirical pieces like *Woman with Shopping Trolley* (1969) and *Tourists* (1970, Scottish National Gallery of Modern Art, Edinburgh). He lived in south Florida from 1973 until his death, modelling with relish, and perhaps condescension, the ordinary people he saw around him.

Hanson, Howard 1896–1981
US composer
Born in Wahoo, Nebraska, of Swedish descent, he was awarded the US Prix de Rome in 1921. After three years' study in Italy, he was appointed director of the Eastman School of Music in Rochester, New York State, a post he held until 1964. Under his leadership, the School became a highly important centre of US musical life. His compositions, firmly in the tradition of 19th-century Romanticism, include an opera, *The Merry Mount* (1933), and seven symphonies.

Hanson, James Edward Hanson, Baron 1922–2004
English business executive
Born in Huddersfield, West Yorkshire, as a young man he was for a time engaged to the then unknown actress AUDREY HEPBURN. Following army service (1939–46), he inherited the family transport business, and turned his entrepreneurial skills to a successful greetings-card business with his partner, Gordon White. He became chairman of Hanson Trust in 1965, building up a huge and diversified conglomerate of businesses under that umbrella. He was a vocal opponent of European integration, and donated significant amounts to the Conservative Party. He was created a Life Peer in 1983.

Hanson, Raymond 1913–76
Australian composer and teacher
Born in Sydney, he studied at the New South Wales Conservatorium of Music, to which he returned to lecture from 1948 until his death. He had a considerable formative influence on the new generation of Australian composers and also, through his teaching, on the future of music education in Australia. Of his own work, his Trumpet Concerto is well known and was one of the first Australian recordings to be released internationally. Other works include operas, a ballet, a symphony, four concertos, chamber music and film scores, and music for piano including a bitter piano sonata, written between 1938 and 1940, which was his protest against war.

Hanson-Dyer, Louise Berta Mosson 1884–1962
Australian music publisher and patron
Born in Melbourne, she was an accomplished pianist, studying in Edinburgh and at the Royal College of Music, London. After marrying James Dyer she became the centre of Melbourne's musical life and helped establish the British Music Society there in 1921. In 1927 she went to London, then Paris, where she established Éditions de l'Oiseau-Lyre, a music publisher. In 1933 she brought out a complete edition of the works of COUPERIN, followed by works of PURCELL and JOHN BLOW and became a leader in the revival of early music. In the 1950s the press was among the first to issue on LP some of the works of MONTEVERDI, Purcell and HANDEL. She became Mrs Hanson-Dyer in 1939, on her remarriage after the death of her first husband. She was permanently resident in France and, after World War II, in Monaco, but maintained her links with Australia, and published the works of such leading Australian composers as MARGARET SUTHERLAND and PEGGY GLANVILLE-HICKS. Her considerable Australian estate was left to Melbourne University for music research.

Hansson, Ola 1860–1925
Swedish poet and novelist
Born in Hönsinge, he became known for his naturalistic lyric poetry. He left Sweden for Germany in 1890 in the face of negative criticism and public apathy on the publication of his erotic volume, *Sensitiva amorosa* (1887). Thereafter he wrote mostly in German, much influenced by NIETZSCHE, concentrating on the kind of moral anarchism he sketched out in *Parias* (1890, 'Pariahs'). The verses in *Ung Ofegs visor* (1892, Eng trans *Young Ofeg's Ditties*, 1893) are notable. 🕮 O Friesen, *Kylfverstenen, Af von Friesen och Hansson* (1909)

Hansson, Per Albin 1885–1946
Swedish politician
He rose to prominence in the Social Democratic youth movement and was elected to parliament in 1918. He served as Minister of Defence in Social Democrat administrations (1918–25) under KARL HJALMAR BRANTING, whom he succeeded as leader of the party (1925). He became prime minister of a minority Social Democrat government in 1932, but secured the support of the Agrarians in the so-called 'cow deal' the following year and, apart from a brief period in 1936, was in office from then until his death. He presided over the foundation of the modern welfare state in Sweden and guided his country's successful policy of neutrality during World War II.

Han Suyin, *originally* **Elizabeth Kuanghu Chow** 1917–
British novelist
Born in Peking (Beijing), the daughter of a Belgian mother and a Chinese father, she studied medicine at Peking, Brussels and London, where after the death in the Chinese civil war of her husband, General Tang, she completed her studies. She then practised in Hong Kong, which provided the background for her first, partly autobiographical novel, *A Many Splendoured Thing* (1952, filmed 1955). It describes the love affair of an emancipated Chinese girl and an English journalist, symbolizing the political and ideological conflicts of the British colony. From 1952 she practised in an anti-tuberculosis clinic in Singapore. Her other novels include *And the Rain My Drink* (1954), *Four Faces* (1963) and *The Enchantress* (1985). She also wrote *China*, a semi-autobiographical and historical work in six volumes, comprising *The Crippled Tree* (1965), *A Mortal Flower* (1966), *Birdless Summer* (1968), *My House has Two Doors* (1980), *Phoenix Harvest* (1980) and *Wind in My Sleeve* (1992), and two volumes of contemporary Chinese history (1972).

Hantzsch, Arthur 1857–1935
German organic chemist
Born in Dresden, Saxony, he became professor at Zurich, Würzburg and Leipzig, and investigated the arrangement of atoms in the molecules of nitrogen compounds and the electrical conductivity of organic compounds.

Hapsburg *See* HABSBURG

Hara Kei 1856–1921
Japanese politician
From a samurai family, he worked as a newspaper editor before joining the Ministry of Foreign Affairs (1882). He resigned from government service to join the Seiyukai, a political party formed in 1900, and shortly afterwards gained a seat in the lower Diet. As Home Minister in various non-party cabinets (1906–08, 1911–12, 1913–14) and leader of the Seiyukai, he was able to advance the party's interests by appointing pro-Seiyukai provincial governors and promoting regional economic development. As the head of the majority party in the Diet, he became prime minister in 1918 and presided over the first party cabinet since the establishment of the Meiji Constitution. He proved to be a conservative premier, moving cautiously on political and social reform. Although he expanded the electorate by lowering tax qualifications, he did not endorse the principle of universal manhood suffrage. He was assassinated by an ultra-nationalist fanatic.

Harald I Halfdanarson, Finehair or **Fairhair** c.860–c.945
King of Norway
He was the first ruler to claim sovereignty over all Norway. The son of Halfdan the Black (King of Vestfold), he achieved power and became king after the naval Battle of Hafursfjord, off Stavanger (c.890). His authoritarian rule caused many of the old aristocratic families to emigrate west to Orkney, Hebrides and Ireland, and to newly settled Iceland. He made several punitive expeditions across the North Sea to subdue his former subjects and impose Norwegian rule over the Northern and Western Isles of Scotland. In 942 he abdicated in favour of his eldest son, ERIK HARALDSSON, BLOOD-AXE.

Harald II Eriksson, Greycloak d.c.970
King of Norway
The eldest son of ERIK HARALDSSON, BLOOD-AXE, he retreated to Denmark with his mother, Gunnhild, the sister of King HARALD GORMSSON (Blue-Tooth) after his father's death in England (954). With Danish support he and his four brothers made several assaults on Norway from 960 against their uncle, King HAAKON I HARALDSSON, THE GOOD, and eventually killed him in battle off Hardangerfjord (c.961) and Harald became king. His reign was unpopular, especially when he tried to impose Christianity on his subjects. When he tried to break free of his alliance with Denmark one of his enemies, Earl Haakon of Lade, enlisted Harald Blue-Tooth's help for another invasion, and Greycloak was caught and killed at Limfjord.

Harald III Sigurdsson, *also called* **Harald Hardraade (the Ruthless)** 1015–66
King of Norway
The half-brother of OLAF II HARALDSSON (St Olaf), he retreated to Kiev with his nephew, MAGNUS I OLAFSSON after St Olaf had been killed. He served as a Viking mercenary with the Varangian Guard in Constantinople (Istanbul), and returned to Norway (1045) to demand, and receive, a half-share in the kingdom from his nephew. He became sole king on his nephew's death (1047). He expanded Norway's possessions in Orkney, Shetland and the Hebrides, and after long wars against King SVEIN II ULFSSON of Denmark, he invaded England (1066) to claim the throne after the death of EDWARD THE CONFESSOR, but although he captured York, he was defeated and killed by HAROLD II at Stamford Bridge.

Harald V 1937–
King of Norway
Born in Oslo, like his father OLAV V he was educated at Oslo University, at a military academy, and at Oxford. He served briefly in each of the country's three armed services, and in 1968 took the then unprecedented step of marrying a commoner, Sonja – a shopkeeper's daughter – after strenuous efforts by his father to obtain Cabinet approval. As prince regent, he effectively served as monarch after the king suffered a stroke in 1990, and he formally succeeded to the throne (the coronation ceremony having been discarded in 1957, in a pledge to the Constitution) on Olav's death in January 1991. A lover of nature, he has been president of the Norwegian branch of the World Wildlife Fund since its foundation in 1970. Since 2003, his increasingly fragile health has meant that Crown Prince Haakon (1973–) occasionally acts as regent.

Harald Gormsson, Blue-Tooth c.910–985
King of Denmark
The son of Gorm the Old and father of SVEIN I HARALDSSON, FORK-BEARD, he became king in c.940 and was the first king to unite all the provinces of Denmark. He was converted to Christianity by a German missionary, Poppo (c.960), and made Christianity the state religion of Denmark. He is thought to have built the fortified military barracks at Trelleborg and elsewhere in Denmark as well as the Jelling Stone, proclaiming his conversion. He strengthened the unity and central administration of the country, and repelled attacks from Norway and Germany. He was deposed by his son Svein (985), and died in exile soon afterwards.

Harcourt, Dame Catherine Winifred, *known as* **Kate Harcourt** 1927–
New Zealand actress
Born in Amberley, North Canterbury, she studied music at Melbourne Conservatorium and in 1954 joined the Joan Cross Opera Studio at Sadler's Wells in London. Since returning to New Zealand in 1956, she has spent several decades in theatre, being active in radio, film and television drama. In 1996 she was appointed the first Dame Commander of the New Zealand Order of Merit.

Harcourt, Sir William Venables Vernon 1789–1871
English chemist and clergyman
Born in Sudbury, Derbyshire, the son of the Archbishop of York, he was educated at home then spent five years in the Royal Navy before going to Christ Church, Oxford, in 1807, intending to become a clergyman. At Christ Church he met John Kidd, who interested him in the sciences. After graduation he undertook clerical duties at Bishopsthorpe and set up his own chemical laboratory there, taking advice from WILLIAM WOLLASTON and HUMPHRY DAVY. He was an amateur scientist whose importance lay in his influence and the stimulation he gave to others. He became the first president of the Yorkshire Philosophical Society and played an essential part in the establishment of the British Association for the Advancement of Science, which was to be open to all interested in science, at a time when the Royal Society was becoming more restrictive and professional in its membership.

Harcourt, Sir William Vernon 1827–1904
English Liberal politician
Born in York, the son of SIR WILLIAM VENABLES Harcourt, he graduated from Trinity College, Cambridge, and was called to the Bar in 1854, becoming a QC in 1866. He was a noted contributor to the *Saturday Review*, and to *The Times* with his letters signed 'Historicus' (collected 1863). He entered parliament as Liberal MP for the city of Oxford (1868). From 1869 he was professor of international law at Cambridge. He was Solicitor-General (1873–74), Home Secretary (1880–85) and Chancellor of the Exchequer under GLADSTONE (1886, 1892–94). On Gladstone's retirement in 1893 Sir William became leader of the House of Commons. He is best remembered for his revision of death duties and his 1894 budget. He resigned the Liberal leadership in 1898, but remained a private member of the party.

Hardaknut Knutsson or **Hardacanute** or **Hardicanute** 1018–42
King of Denmark and of England
He was the son of KNUT SVEINSSON (Canute the Great) and EMMA (the widow of King ETHELRED II, THE UNREADY), and was Knut's only legitimate heir. He inherited Denmark on his father's death (1035), but the English elected his illegitimate half-brother, HAROLD I KNUTSSON (Harefoot), as regent, confirming Harold as king in 1037. Hardaknut prepared to invade England to claim the Crown, but Harold died before he arrived. Hardaknut was made king (1040), and promptly punished the English by imposing a savage fleet-tax to pay for his expedition. His reign was universally disliked, and he died of convulsions at a wedding party.

Harden, Sir Arthur 1865–1940
English chemist and Nobel Prize winner
Born in Manchester, he worked in the Jenner (later Lister) Institute from 1897, becoming head of the biochemistry section from 1907 until his retirement in 1930. He was appointed emeritus professor by London University in 1912. Investigating the fermentation of sugars by bacteria, he made the crucial discovery that the first step in fermentation was the phosphorylation of the sugar to form an ester (1905), and isolated fructose 1,6-bisphosphate. Later he isolated two other intermediates. Harden also showed that dialysis destroyed activity, thereby implicating a dialysable co-factor in fermentation, and he recognized the presence of more than one enzyme. For this work he shared the 1929 Nobel Prize in chemistry with HANS EULER-CHELPIN. He studied vitamins and the nutritional problems of the army during World War I. He was elected Fellow of the Royal Society in 1909, awarded its Davy Medal in 1935 and knighted in 1936.

Hardenberg, Karl August, Fürst von 1750–1822
Prussian politician
